"And I have never known any newspaper which devoted itself wholly to the discussion of local affairs which did not come to an untimely end, either through the loss of patronage or the taking off of the editor, for that paper which discusses, as a specialty, neighborhood affairs must discuss neighborhood differences. Neigborhood differences are as sands of the sea in number, and the editor, in taking sides in each, which he must do, loses friends, though he may be victorious in each fight until the number of his combats leaves him without any friends at all. How pleasant it is, then, when pushed almost into a neighborhood row, for him to fly for refuge to the daily paper and there find relief in the opportunity of discussion, whether the news item about Rojestvensky seeking Togo is worth serious consideration.

"I have, in my experience, seen weekly newspapers literally snatched from the jaws of death by its editor taking the daily to task for infidelity to party instead of going into a neighborhood row that actually yawned for him that it might destroy him. I am proud to say that I have been the means of escape of many of my 'country cousins' on more than one occasion. I have been read out of the party by some of them who were in political and other troubles at home and sought safety in raising a row with patient and peaceful me.

"But the benefits to the country paper, if we are to call it this, coming from the publication of the daily, are far less than those coming to the daily from the publication of the weekly. The daily paper is a complex affair. It requires all sorts of ability in it, or at least all sorts of human peculiarities on it, for the men who can write a strong editorial can rarely write a good paragraph, and a good paragrapher can not write a strong editorial. I was fortunate enough to be intimate with the best paragrapher the country ever produced, Harry Merrich of the Washington *Post*. No man ever gave an expression to a thought in a more scintillating and pungent way, and his fame became world-wide. But he stalled if he had to go ten lines. Watterson is counted as fine an editorial writer as any country ever produced, yet he can not say that white is not black in less than twenty lines, and he feels that the breed of paragraphers ought to be exterminated. There are men who are good on descriptions and can not handle facts, and men who can handle facts and then

chew up a dollar's worth of pencils trying to think of something to say, when they have given them in their bare, naked way."

"Another thing about a daily newspaper, and that is that every man on it is given plenty to do in his particular line of work. Managing editors do not have a habit of dropping in and telling one of these workers to run out and enjoy himself in a few idle moments. Here and there on the force a man is put on the force to see what is going on generally. His business is to know what the people are doing. He can not know it unless he has a large sweep of the eye. It is a country paper which furnishes him the information; without it, his paper can be said to be ignorant. To be sure, it may have a man at both the State and National capitals, and they can tell what State and National bodies are doing, but even with this information, his paper is not informed, because it does not know the life, the feeling, the thought of its neighborhood, of its people. Only in the editorial columns of the weekly paper can exact direction of the public mind be ascertained, for the 'country cousin'—as he is called here in deference by my brothers who prepared the program for this meeting—keeps his eyes strictly on the gun, so to speak. He discusses the subject uppermost in the thoughts of his neighborhood and to the best of his ability gets on the strong side. If there are no great issues at stake, then, of course, he will adhere to principles, though he sinks in his fidelity to what he believes to be right. If the public mind is on crops, crops it is, in his editorials. If the public mind wants certain legislation, legislation is desired in the editorial columns. In politics the editorial column is almost infallible as a guide for the ascertainment of the views of the locality, and in this is the inestimable value of a country paper to the daily paper. It is not only in this way that the weekly is an aid to the daily paper, for without any exaggeration, the former contributes the sinews of prosperity to the latter.

"From my experience I have no hesitancy in stating that in no State like that of Texas where large cities do not exist, and where the large dailies must depend for their extended growth on the circulation beyond the limits of their own town, can such papers prosper unless they at least command the respect of the country papers. If they command this respect and are fortunate enough to command their friendship also, the road to wealth and influence is open to them and easy to travel. But if they are unceasingly condemned by the weekly press, the latter's influence will be felt in their impressing their people with their antagonism to such dailies, and it is from these very people that the dailies must have their food in order to exist. The wise man on the daily paper knows this. He knows there is more or less sentiment in the flintiest business transaction, and conducting a paper is purely a business transaction, more or less flinty.

"He knows also that the most powerfully effective sentiment is that of friendship. He wishes to secure this from the weekly paper for through it he reaches the public. In the larger cities there is not so much in gaining the respect and friendship of the public, though some of this respect must be had, for in the congested centers it is the news alone that is demanded, and it is dished out in that way which owners and managers of the paper think most palatable to the public taste. The difference between the daily papers in the sparsly settled communities like Texas and the congested communities like New York, Illinois and Pennsylvania, is that we have to be more decorous, if the word may be used, in the former, because there is a tomorrow, while in the latter States we can be sensational, inconsiderate, and even thoughtless, because it is all today to a great extent with both paper and people. I mean no flattery to ourselves in this statement. I do not admit any hypocrisy in our actions in trying to get along with our people and to prosper by it. The country cousin is as solicitous of the good opinion of his people as we are solicitous for the good opinion of our people. We respect public opinion. He does the same. We are often in error, because we are not angels.

"He himself does not fly. All in all, he is no worse nor better than we, and we are not his superiors in intelligence, honor or manliness. We are kith and kin, and spurred by the same ambitions. Here and there we may be spiteful and descend to the lower depths by misrepresenting each other, but such cases are rare in these times. I ask to be excused for reference to myself on the ground that I am assigned by my paper to the daily pleasure of a meeting with my country cousins, and have thus come to know them and their people as well as any one could know them who is not brought in personal contact with them.

"All in all, nearly a thousand papers of the State, dailies and weeklies, come to my desk every week. Through them I have not only learned the communities and the trend of their thoughts, but I have come to know the editors. I know every placid, smooth-tempered one. I know every irascible one. I know the politics, as far as his paper shows, of every one of them, for I have, for over six years, with a few months excepted, done nothing but read what they write and consider what they say. I have worked in nearly every department of a newspaper except the mechanical. I have, in the course of my work, been thrown with great men and historic characters. Yet I have no hesitancy in saying that I get more real enjoyment from my contact in my work with my country cousins than from any labor I ever performed, and that I like their character and company better than that of any men I ever met."

*From Address read before Texas Press Association.

"QUALIFICATIONS OF AN EDITOR"*

BY W. A. JOHNSON, MEMPHIS, TEXAS, HERALD.

FOR the basic principles of success in the newspaper business I would name intelligence, industry and enterprise. We must have, in the first place, sufficient intelligence to discuss the public questions as they present themselves in the community. We must have unrelenting industry and energy to push our advantages and make advantages to present themselves, whether they do so or not. We must then have the enterprise to take advantage of them and make the most of them.

It has been my experience that a lack of industry is one of the most grievous faults of the country editor. He is not prompt with his work. He does not push his business; but on the contrary, lets it push him. The people will stand for this only until they can do better, and a more up-to-date competitor comes along and absorbs the business. Let us push our work from early morning until late at night, and regard it as of just as much importance as the bank or mercantile establishment. It is just as legitimate and to make it a success we must use the same pluck and energy. Enterprise is but another name for being up-to-date and modern in our methods. I have seen more newspapers die from a lack of enterprise on the part of its editor than from any other source. Make your columns sparkle with bright local happenings, crisply and entertainingly told, and you will catch the public eye and warm to a close spot in the public affection.

The job printing department is often the author of the shortcomings of the country paper. The entire attention of the office force is given to the preparation of job work for from three to five days in the week, and when the next issue is once more thought of, it is only after the cream of the week's local news has passed out of the memory and been forgotten, and to scrape up a few little jokes, a few little slashes out of the leading daily papers, and slap in the columns a few chunks of boiler plate and go to press is often the result. No wonder the reader soon throws it aside with the disgusted expression, "There's nothing in it." I saw some time ago in a small West Texas paper a statement that they would not issue again for a month on account of a certain named large job of printing they had on hand. I thought at the time that it was remarkable, but I believe it was better judgment on the part of the editor than to have issued a makeshift paper of no interest while the work was going on. I believe beyond any doubt that the job printing business in the country printing office is responsible in a greater degree than any other one thing for the failure and shortcomings of the country press. The seeming profits of the job, as it is presented, overshadows the importance of maintaining the high standard of the weekly issue of the paper. Hence, I would be glad to hail the day when the businesses may be entirely separated from each other and no longer will one act as a stumbling block and a hindrance as it does today.

As to the matter going to make up the contents of the weekly issue, I would place it on a high plane, for the family paper is the successful one in every locality. You will find the paper which is popular with the women and children is the one which will always be found on the library tables.

American Type Founders Company

A Body Type of Much Merit

Cheltenham Oldstyle

A Good Type for Universal Use

Sold at Body Type prices in 25-lb fonts and multiples 6 to 18 Point

12 Point

There are seven sizes of Cheltenham that are adaptable for body type purposes—six, eight, ten, eleven, twelve, fourteen and eighteen point. These sizes are sold in fonts weighing twenty-five pounds and multiples, at regular body type prices. Cheltenham is sold also in complete job fonts, from 6 point to 72 point, fourteen sizes. Plenty of Cheltenham is *always carried in stock* at all the selling houses of the American Type Founders Company. This type face has made a place for itself in the printing world, and that place is at the top. An excellent body letter for many every-day purposes

12 Point Cheltenham Oldstyle 42c lb in 25-lb fonts and multiples

10 Point

A type suitable for a dainty brochure, for a merchant's catalogue, or a newspaper ad—that's Cheltenham, the world winner of types. Primarily, this face was perfected with a view to great legibility. Printers want perfect type—type that will always line just right and has the greatest wearing qualities. These qualities appear in Cheltenham and in all other types made by the American Type Founders Company.

10 Point Cheltenham Oldstyle 46c lb in 25-lb fonts and multiples

11 Point

Cheltenham is a most excellent body type for magazines, trade papers, also for educational and other periodicals, for a vast range of booklets and other literature devoted to advertising. The eye is not wearied by prolonged reading of Cheltenham print and this type will set 20 per cent more matter in a given space than *any other body letter*

In 25-lb fonts and multiples. Special prices on fonts of 500, 1000, 2000, 3000, 4000 and 5000 pounds. All prices subject to our usual discounts.

6 Point

Cheltenham is a plain clear type, that possesses vast merit. There is no type other than Cheltenham that will so clearly and strongly display so much matter in so little space. That is why Cheltenham is commercially meritorious—the element that makes a customer, should an invitation to trade be offered in a neat booklet, in a newspaper advertisement or a simple announcement in leaflet form. Cheltenham fits well and looks well in all of them. Cheltenham has won the approval of the printing world *by its effective simplicity*—by its wonderful adaptation to printing needs. Nearly all the magazines have Cheltenham, and many big weeklies. Also the magnificent publications now devoted to printing. For the body letter of magazines, periodicals, books, folders, class and trade papers, Cheltenham may be used with pleasure and profit.

6 Point Cheltenham Oldstyle 64c lb in 25-lb fonts and multiples

8 Point

Cheltenham appears freely in the big city dailies and in many hamlet weeklies, also in the vast "in between" classes of publications. Cheltenham type has been chosen to exploit more high grade mercantile advertising lately before the public than any other type face. Study the Cheltenham specimen sheets until the type may be readily identified in every day service. Then note the universality of its use in magazines, newspapers, booklets and other business literature. *Cheltenham will confront the eye everywhere* as the investigation progresses.

EXTRACT FROM A LETTER WRITTEN BY THE REVEREND HOMER WILBUR, A. M., SPEAKING ABOUT CHURCH WORK

If I know myself, and surely a man can hardly be supposed to have overpassed the limit of fourscore years without attaining to some proficiency in that most useful branch of learning, I have no smack of that weakness which would press upon the publick attention any matter pertaining to my private affairs. But since the following letter of Mr. Sawin contains not only a direct allusion to myself, but that in connection with a topic of interest to all those engaged in the publick ministrations of the sanctuary, I may be pardoned for touching briefly thereupon. Mr. Sawin was never a stated attendant upon my preaching, never, I believe, even an occasional one, since the erection of the new house in 1845. He did, indeed, for a time, supply a not unacceptable bass in the choir; but, whether on some umbrage taken against the bass-viol, then, and till his decease in 1850, under the charge of Mr. Asaph Perley, or, as was reported to us by others, on account of an imminent subscription for a new bell, thenceforth he absented himself from all outward and visible communion. Yet he seems to have preserved, as it were, in the pickle of a mind soured by prejudice, a lasting scunner, as he would call it, against our staid and decent form of worship: for I would rather in that wise interpret his fling, than suppose that any chance tares sown by my pulpit discourses should survive so long, while good seed too often fails to root itself. I trust that I have no personal feeling in the matter: though I know that, if w sound any man deep enough, our lead shall bring up the mud of hum nature at last. The Bretons believe in an evil spirit whose office it is t make the congregation drowsy; and though I have never had reason think that he was specially busy among my flock, yet I have seen enou to make me sometimes regret the hinged seats of the ancient meeting-ho whose lively clatter, not unwillingly intensified by boys beyond eye-sh of the tithing-man, served at intervals as a wholesome reveil. It is tr I have numbered among my parishioners some who are proof against t prophylactick fennel, nay, whose gift of somnolence rivalled that of C tan Rip Van Winkle, Epimenides, and who, nevertheless, complained

A POEM WRITTEN TO MR. HOSEA BIGLOW

It's some consid'ble of a spell sence I hain't writ no letters,
An' ther' 's gret changes hez took place in all polit'cle metters:
Some canderdates air dead an' gone, an some hez ben defeated,
Which 'mounts to pooty much the same; fer it's ben proved repeated
A betch o' bread thet hain't riz once ain't goin to rise agin,
An' it's jest money throwed away to put the emptins in:
But thet's wut folks wun't never larn; they dunno how to go,
Arter you want their room, no more'n a bullet-headed beau;
Ther's ollers chaps a-hangin' roun' thet can't see pea-time's past,
Mis'ble as roosters in a rain, heads down an' tails half-mast:
It ain't disgraceful bein' beat, when a holl nation doos it,
But Chance is like an amberill,—it don't take twice to lose it.

I spose you're kin' o' cur'ous, now, to know why I hain't writ.
Wal, I've ben where a litt'ry taste don't somehow seem to git
Th' encouragement a feller 'd think, thet's used to public schools,
An' where sech things ez paper 'n' ink air clean agin the rules:
A kind o' vicyvarsy house, built dreffle strong and stout,
So 's 't honest people can't git in, ner t'other sort git out,
An' with the winders so contrived, you'd prob'ly like the view
Better alookin' in than out, though it seems sing'lar, tu:
But then the landlord sets by ye, can't bear ye out o' sight,
And locks ye up ez reg'lar ez an outside door at night.

6-POINT

An' you may see the taters grow in one poor feller's patch,

ON LETTER OF INQUIRY RECEIVED CONCERNING THE LITERARY REMAINS OF LATE MR. WILBUR

I think I could go nearer to being a perfect Christian if I were always a visitor, as I have sometimes been, at the house of some hospitable friend. I can show a great deal of self-denial where the best of everything is urged upon me with kindliest importunity. It is not so very hard to turn the other cheek for a kiss. And when I meditate upon the pains that are taken for our entertainment in this life, on the endless variety of the seasons, of human character and fortune, on the costliness of the hangings and furniture of our dwelling here, I sometimes feel a singular joy in looking upon myself as God's guest, and cannot but believe that we should all be wiser and happier, because more grateful, if we were always mindful of our privileges in this regard. And should we not rate more cheaply any honor that men could pay us, if we remembered that we sat every day at the table of the Great King? Yet must we not forget that we are in strictest bonds His servants also; for there is no impiety so abject as that which expects to be dead-headed through life, and which, calling itself trust in Providence, is in reality asking Providence to trust us and taking up all our goods on false pretences. It is a wise rule to take the world as we find it, not always to leave it so. It has often set me thinking when I find that I can always pick up plenty of empty nuts under my shag-bark tree. The squirrels know them by their lightness, and I have seldom seen one with the marks of their teeth in it. What a school-house is the world, if our wits would only not play truant! For I observe that men set most store by forms and symbols in proportion as they are mere shells. It is the outside they want and not the kernel. What stores of such do not many, who in material things are as shrewd as the squirrels, lay up for their spiritual winter-supply

THE BOYHOOD HOME AND EARLY LIFE OF JAMES RUSSELL LOWELL—AT HARVARD

One cannot conceive more fortunate or charming conditions than those of the boyhood and early education of James Russell Lowell. You may study the babyhood and boyhood of a hundred poets and not find one home like this. His father, the Rev. Charles Lowell, was the minister of a large parish in Boston for more than fifty years. Before James was born, Dr. Lowell had moved his residence from Boston to Cambridge, to the home which was afterwards called Elmwood. So much of Mr. Lowell's poetry refers to this lovely place, as beautiful now as it was then, that even the far-away readers will feel a personal interest in it. The house, not much changed in the last century, was one of the houses deserted by the Tory refugees of Cambridge at the time of the Revolution. On the steps of this house Thomas Oliver, who lived there in 1774, stood and heard the demand of the freeholders of Middlesex County when they came to bid him resign George the Third's commission. He was lieutenant-governor of Massachusetts and president of the council. But by the charter of the province councilors were to be elected. Thomas Oliver became, therefore, an object of public resentment. He was waited upon by a committee of gentlemen of the county on the morning of September 2, 1774, at this place, not then called Elmwood. At their request he

WITH twofold pleasure THE LINOTYPE COMPANY exhibits on the two following pages some of the possibilities of THE LINOTYPE on rule and figure work with the NEW ROGERS TABULAR SYSTEM. First—because a great time, labor and money saving system has thus been perfected; and, Second—because it belongs to the Linotype and broadens in a wonderful degree the scope of that most valuable and necessary adjunct of the modern printing office.

The new device can be attached to any Linotype; the most intricate table work can be composed with its aid at a high rate of speed; the slugs are set straight across, the brass column rules remain rigid, and a substantial saving of time is effected in make-up, imposition, lock-up and make-ready on press.

This improvement is a decided step in advance of anything that has been heretofore accomplished, and it should be thoroughly investigated by every printer. Complete details and particulars will be given on application.

UNITY PRESS NEW YORK

New York, May 3, 1905.

Mergenthaler Linotype Co.,

Tribune Building,

N. Y. City.

Gentlemen:

We esteem it a fortunate circumstance in being able to obtain one of the first sets of matrices of the Rogers system for tabular work on the Mergenthaler Linotype Machine and have applied it to the composition of a book entitled "Fire Insurance by States," by Charles A. Jenney, F. S. S., and published by The Underwriter Printing & Publishing Co., this city, consisting of nearly 150 tabular pages, of which we send you sample pages printed direct from slugs and brass rule on a cylinder press. The quality of the work indicates its excellence.

We must pronounce the result a magnificent success, the system being exceedingly simple in its operation. The ease and rapidity with which we are now enabled to construct tabular work insure such economy of time and money that we are impelled to tender you our congratulations on this latest achievement.

Very truly yours,

UNITY PRESS,

(Signed) Per Oswald Maune,

Vice-President and Manager.

"ARE PUBLISHERS AVAILING THEMSELVES OF IMPROVED FACILITIES FOR PRODUCTION AND DISTRIBUTION?"

BY E. E. GILMORE, WILLS POINT, TEXAS, CHRONICLE.

THE very first thing necessary for a country publisher to do is to employ in the conduct of his business those cardinal business principles, the application of which, or the lack, makes success or failure of any business. A newspaper is a business institution as distinctly and as clearly as any other enterprise where capital, labor and brains are combined, and the first thing for the country publisher to do is to thoroughly impress himself with that fact, and then impressing it on the community will be an easy matter. Improved facilities will avail a publisher who does not take advantage of them, nothing, and it is certain that he will never be able to take advantage of them unless the very best business methods are applied.

The improved facilities for the production of country newspapers that the genius of man has given us are many, chief of which is the power press, the old reliable, gasoline engine, the folding machine, modern type and other labor-saving devices and devices that save time and improve the work turned out. The day is not far distant when the country publisher can afford a typesetting machine, but the time is not yet. It must be admitted that there has been much improvement in the country offices in this particular within the past few years, but there is still room for more and it has often occurred to me that the publishers who have the necessary material equipment are not availing themselves of the opportunity it affords to build up their papers. It is needless here to enumerate the many advantages that improved machinery offers over the old style way of doing business, but the greatest thing is the saving of time, which enables the publisher to give much more time to improving his paper from a standpoint of local news. No small item to the modernly equipped country office is the prestige that it gives the paper, the substantial establishment of it as a permanent institution in the community.

Knowing my own affairs better than those of any one else—a strange position for a newspaper man to occupy, I must confess—I trust I may be pardoned for referring to my own experience with what we might properly term improved facilitities in a country shop. Five years ago I put away the faithful G. Wash. that had been doing duty for many press days, and put in its stead a power press, folder, gasoline engine, power jobber, etc. There is not a newspaper man in Texas who is not as able as I was to take that step. My chief asset was my nerve and a clearly defined plan of action. But it has all been paid for long ago, and I feel some pride in the fact that the paper has grown from a five-column quarto, half auxiliary, and 750 circulation to a six-quarto, and necessary to print it all at home in order to give all the home news, and a circulation of 3,400, with subscription receipts for 1904 exceeding the receipts from advertising nearly $1,000. I take no honor to myself—what I have done, others can do. In discussing this matter with a friend the other day, he spoke more truthfully than he intended, perhaps, when he facetiously remarked that if I could accomplish what I had, what ought a real good newspaper man to do?

Then the improved facilities for the production of a local paper from a standpoint of news should not be overlooked. Chief among the modern inventions that have invaded the domain of the rural newspaper is the rural telephone. In my country there are, perhaps, 500 farmers with telephones in their homes, the lines extending all over the country and making it possible to obtain the particulars of any occurrence in a very few minutes, and I avail myself of this source of news to the limit.

The rural free delivery of mail is another fruitful source for news that every publisher of a country weekly should utilize. I find myself inevitably drifting into a discussion of what a local paper should be, a thing about which there are as many different opinions almost as there are country publishers. I cannot refrain from saying this much, however—and after all the matter and make-up of a local paper are the most important things—I believe a local paper should tell every possible item of home news and tell it while it is news. I strive to localize every item that goes in my paper as nearly as possible, and my county is as much territory as I try to cover. The only general news that gets into my columns are the comments on the editorial page. The improved facilities gives the man who is trying to "carry a message to Garcia" a chance to accomplish more than ever before in the history of the country newspaper business.

I want to mention one other thing that many of my friends of the country press seem to have overlooked—the use of halftone illustrations as a regular feature. Modern times have brought the halftone within reach of all and a better way to make your paper popular and useful can not be imagined. I have been using pictures of local scenes for several years, and while of course no direct returns have come in, I attribute the success in getting subscriptions in a large measure to this. Of course these pictures to be effective must be of local scenes and local people. Most of the pictures I have used I took myself with a kodak. This is easy to do and the very fact that you took the picture yourself adds interest to it in the community. I have printed the picture and given a biographical sketch of many an old settler in my county, some of whom had as many as forty and fifty children, grandchildren and great-grandchildren. In no instance have I ever made a charge for this or sought in any way to get direct returns, trusting entirely to the good it would do in the future.

I come now to the discussion of the second section of my subject. "Are publishers availing themselves of improved facilities of distribution?" Here is a vital point in the country newspaper business. After the production of the paper it will avail little if it is not distributed with all haste, and I am persuaded that many of my friends are not taking advantage of the facilities Uncle Sam has furnished—judging from the irregularity with which many of my exchanges get in.

Postal facilities have been greatly improved in the last few years, but nothing could equal the rural free delivery of mail. I have heard many country newspaper men take issue with me on this proposition, but as "for me and my house," I wish that every rural subscriber on my list lived on a rural route. We have something over a thousand papers in my county delivered to the doors of patrons on every publication day. It stands to reason that a paper that is worth reading at all is more valuable to the subscriber if he gets it immediately. Not only that, but getting it delivered at his door gives him an opportunity to read and study it more closely and therefore become more attached to it. On this point I can not refrain from incorporating here the words of a rural subscriber who lives eight miles from town, but on a rural route. Writing to a neighboring paper on the subject of rural free delivery, he said, after naming the papers he took: "You see I can read and farm, too, with the rural free delivery of mail. We get the papers regularly and have time to read them before they get old. Before we got the free delivery we would hardly ever get the mail before Saturday, so the papers that came the first of the week were hardly ever read, for a person likes to read the latest. I say, Hurrah for the "R. F. D." This expresses the situation from the standpoint of the rural subscriber. The expressed fear that the big dailies would one day crowd out the country weekly on account of the rural free delivery is groundless, for no paper or magazine, no matter what its character or size, can ever take the place of the live country weekly. In my office the publication day is Thursday. Wednesday afternoon at 5 o'clock the press starts and before the force quits for the night every package of mail is made up, weighed in the office, sacked and delivered to the depot for the night trains. In this way we reach every rural patron on the day of publication and also get to every postoffice in the county. For over twelve months we have not failed to do this. Nothing adds so much to the value of a country paper as its promptness in reaching its subscribers and the country publisher who employs improved facilities and improved ideas can not fail to make use of this. The paper that is on time this week and two days late the next can not expect to accomplish much.

Before I quit let me mention one other "improved" idea of business that is just as applicable to the country print shop as anywhere else. It is remarkable what a small per cent of the public knows anything of the printing business. I take special care and never miss an opportunity to show my plant to visitors, whether they be from town or country.

I have been in the newspaper business for twelve years. I have picked out what to my mind were the ideal country weeklies and striven to work up to them. That the improved facilities, which the past few years have put in reach of all, will soon make all ideal papers I have not the slightest doubt.

*From Address read before the Texas Press Association.

National Printer-Journalist

A Journal for Printing and Allied Trades

Entered at the Chicago Post-office as Second-class Matter.

BENJAMIN B. HERBERT . . . . . EDITOR

Official Paper of the National Editorial Association.

PUBLISHED MONTHLY BY THE
NATIONAL PRINTER - JOURNALIST COMPANY
OFFICE OF PUBLICATION:
1319 WEST RAVENSWOOD PARK, CHICAGO, ILLINOIS
EASTERN OFFICE:
150 NASSAU STREET, NEW YORK CITY.

WILLIAM E. HERBERT . . . . . Resident Manager, Chicago Office
BENJAMIN S. HERBERT . . . . . Secretary

SUBSCRIPTION RATES:—In the United States, Canada and Mexico, $2.00 per year, in advance; single copies, 20 cents.

Orders for subscriptions will be received by all dealers in printing material in the United States and Canada.

Remittances may be made by draft, money order, or registered letter. Make all remittances free of exchange and payable to the order of the NATIONAL PRINTER-JOURNALIST COMPANY.

FOREIGN SUBSCRIPTIONS:—To Countries within the Postal Union, 10s. 6d.

FOREIGN SUBSCRIPTION AGENTS:—International News Company, Breams Buildings, Chancery Lane, London, E. C.; F. O. Strong, 111 Fleet Street, London, E. C., G. G. Turri & Co., Melbourne, Australia; The India Printers' Agency, 249 Mint St., Madras, India; Successful Advertising Co., Bangalore, India; John Dickinson & Co., Ltd., Cape Town, South Africa.

ADVERTISING RATES PROMPTLY FURNISHED UPON APPLICATION

The NATIONAL PRINTER-JOURNALIST is unequalled as an advertising medium in its field. No attention paid to postal card requests. Information cheerfully furnished to all patrons.

Subscribers and patrons will confer a favor on the National Printer-Journalist Company by sending in the names of responsible newsdealers who do not keep the monthly on sale regularly.

Manuscript sent in for publication must be accompanied by a letter of explanation and return postage.

CHICAGO, JUNE, 1905

The "More Work through Publicity" department has to be omitted this month on account of lack of time for preparation of the etchings showing the samples of work on which comments are made. Mr. Woodworth has prepared, as usual an excellent department, giving valuable facts, hints, suggestions and the best examples of business-bringing publicity. A great quantity of this instructive matter has been published in these pages during the past months, and if all readers of the National-Printer Journalist, while waiting for the next installment, will carefully reread and study the department that appeared in the May issue, they will find that such a study will prove more than worth while. If this one month's department does not prove practicly beneficial and more valuable than a year's subscription, "if taken according to directions," the money will be refunded.

We were sorry, through a mistake that occured in the press room, some pages of the department were misplaced, yet the facts and examples were all given, so that nothing could have been lost to the readers.

George Washington was a Southern man and a slave owner and yet the following story is told of him in a book that treats of the services of colored soldiers in the war of 1812. Primus Hall was the body servant of Col. Pickering. General Washington visited Col. Pickering in his tent, and night having set in and his headquarters being at some distance, it was thought best that he should remain until morning, but Washington refused to do this, if his host would be discommoded. Primus being appealed to, declared there were plenty of straw and blankets. Beds were made up for the Gen. and Col. Pickering. Primus busied himself with work until he was sure both were asleep. He then seated himself on a campstool, and leaned his head on his hands to obtain such rest as he could for "his plenty of straw and blankets" had only been enough for two. In the middle of the night Washington awoke and saw Primus in his cramped position, and after gazing at him awhile called to him, and, after some parley, in which Primus was urged to share the straw and blankets with the General and had replied that he could not; General Washington threw open the blanket and moved to one side and peremptorily commanded the negro to occupy a place by his side. Primus reluctantly obeyed, and General Washington, the Father of his Country, whom God had made white, and the faithful self-sacrificing man whom God had made black slept side by side under the same blanket the remainder of the night. This story is not at all out of harmony with the way in which the Southern people have always treated loyal, faithful colored help. A negro was good enough in a case where humanity called, to sleep with George Washington, but they are, it seems, not good enough to take places vacated by others and to drive freight wagons on the streets of Chicago without causing a riot. Our attention was probably especially called to this matter from the fact that the book, containing this story, was the property of the late T. Herbert Whipple, for many years editorial writer on the Chicago *Tribune*, and was handed to us by his son, F. B. Whipple, on one of the days when the teamsters' strike was at its height. Pride and greed have made too many of the people of this Nation not only race and Nation proud, but have driven out the sentiments of mercy and humanity that have in part been considered obligatory and to be exercised toward the weak and unfortunate as well as to the strong—to all human beings and to all of God's creatures.

This paper has nothing to do, in any way or sense, with partizan politics or with solving race or other questions, but when we see a paper like the Chicago *Tribune* counseling employers against employing colored men to drive their teams, and qualifying its articles as to laborers and their rights with the word "white," and the mobs attacking teamsters, who are trying to earn a living in this humble employment, because they are black, we cannot refrain from thinking. The *Tribune* has had much to say in the past about the treatment of the negroes in the South, but we have visited every Southern State, and have never seen a Southern paper that was opposed to giving the colored people the right to work and to earn an honest living. It would be well for the press of the country before being led into manifestation of such a race prejudice and before trying in the future to make their Southern brethren good in this regard, to do a little studying and thinking.

Hon. John Dymond, of New Orleans, whose name has been frequently mentioned in connection with the honorable position of President of the National Editorial Association, evidently has those all-around qualities for varied and useful activities, characteristic of

wide-awake newspaper editors and publishers. He is not only editor and publisher of the Louisiana *Planter and Sugar Manufacturer,* one of the very best trade papers published in the United States and circulating everywhere on earth and accepted as an authority in the sugar industry; the president, chief owner and general manager of the American Printing Co., in New Orleans, which prints nearly every newspaper published in that great city outside the dailies, and one of the largest and most completely-outfitted printing houses in the South; but is also a large land owner and sugar planter, and for many years represented his district in the State legislature and is now serving his second term as State Senator, having been reëlected in 1904. He has been a leader in nearly every public movement in Louisiana and has great administrative ability. While Mr. Dymond's chief business is that of the editorial work, and the management of his printing house, in which duties he is constantly engaged, he is an active friend and promoter of educational matters, technical, scientific and general, in his own state, and has received many appointments by the governor in that direction. His earnest advocacy at St. Louis, of the proposed school of Journalism, indicates the bent of his mind of the good that all may hope will be realized from the support of this cause, so important to the future high standing of this calling, by such men.

Mr. Dymond is a gentleman of large experience, an old member of the organization who has never sought any preferment in the organization until now, when urged by his friends.

QUESTION BOX.

By CHARLES A. KING, Beverley, Mass.

I am foreman of a country office where we do all sorts of work on a cylinder press which is not a modern machine. It has two form rollers, and quite a number of "outs." For printing the newspaper we use a three-ply rubber blanket and six sheets of newspaper and one of strong manila for a tympan. For pamphlets we take off three or four sheets as required, but the posters give us the greatest trouble, and it is pretty difficult to print large wood type black without a smut. E. F. M., N. Y.

Presume you are doing as many hundreds of other printers are in small offices where ordinary work is turned out and it may be said that some of the work printed in the country offices with what a city printer would think impossible facilities is worthy of being rated fair work. We presume that as a rule you do as most country newspaper printers do, i. e. do not alter the ink fountain except for a long run after it is once set for the paper. In most offices where a paper is the principal job of printing, ink for other jobs is applied with a brayer and in this way a good book ink can be used for pamphlets and good job work without altering the fountain and a thin ink used for posters. One of the most successful printers of this class keeps can of kerosense oil in which a piece of tallow has been dissolved and use it to thin the poster ink. This does not hasten the drying of the ink but it makes the press run easier and is excellent where there is large wood type. Creosote added to the ink will prove a help although the smell is objectionable. There are a number of dryers that can be added to the ink but unfortunately they will dry on the rollers and make trouble, and in many country offices the rollers on a cylinder press are not washed frequently, in fact, pretty good work is done where rollers are not washed for one or two months, but the press is carefully covered. In old times "Riley's Indispensable" was sold for $10 for the receipt. It consists of one pint of kerosene, one pint of turpentine, four ounces of ether, four ounces of oil of cedar and eight ounces balsam of capaiba. This is rather expensive for poster ink reducer but many use it. One great secret of making a press work well is to clean the ink fountain occasionally. If your ink in the fountain is filled with dust, and paper dust will get in even if everything is air tight, try cleaning it out and you will be surprised at the result. After all a poster in large type does not show a smut when stuck up and an offset is not serious.

THE FACTS AS TO THE ENTERTAINMENT AT 101 RANCH.

At the St. Louis convention of the National Editorial Association, with a genuine desire and anxiety to see that the editors should be fittingly and royally entertained during their proposed visit to Oklahoma, and as an inducement to the delegates to vote to hold the next meeting at Guthrie, the Miller Brothers offered to give a grand spectacular exhibition, or *tableaux vivant*, of past and closing events in that "Land of the Fair God," of beauty, richness, sunshine and hospitality. This proposed living panorama was to occur after the convention of the National Editorial Association had adjourned and, hence, was, of necessity, an offer of entertainment to the individual delegates who should remain after the convention. This entertainment was looked upon, from the first, as being one of the peculiar and leading attractions to be offered this year, and for the last time, to visitors, and, hence, with the view of securing the pleasure and instruction of the editors, who should care to remain, and to induce a large attendance at the convention itself, it has been largely exploited as an atraction, though it is only one of a score of important entertainments offered to the editors by the patriotic, intelligent and progressive people of Oklahoma, Indian Territory and Texas. It was not known, at first, that the necessities of the beginning of the Oklahoma harvest would require the giving of the exhibition on Sunday, but, after this became known, very many thought that it would afford such a novel and instructive occasion, such a view never to be witnessed again, of past customs, of pioneer days and of changing conditions in the lives of a disappearing race—the members of which are no less God's children that are those who live in enlightenment under different conditions—that few would be willing to miss viewing such a historic exhibition, that cannot be given again in this land, with the natural surroundings to make the same seem real. There has been no thought of offending any one's conscience or of going contrary to the accepted beliefs, customs or traditions of this Christian land or to the religous or other views of any member of the noble and responsible newspaper calling. The institutions of this country and the religious principles of true men are too well founded to be disturbed by the seeking of a little knowledge, recreation and entertainment, in the open under God's blue sky, in the vast fields, by a company of editors while out on an excursion, even if on the day generally observed as Sunday. It is right, however, that all facts should be clearly stated and that there should be a fair and full expression of views and opinions, though there be nothing for the action of the National Editorial convention. To set every body right, we have taken the last form of this issue of the NATIONAL PRINTER-JOURNALIST from the press room, and lifted out other matter, to give place to the following article from the Guthrie, Okla., *State Capital* of May 26th:

"Not a few of the ministers of the territory, a few of the editors, and, according to a dispatch from Boston, a few members of the Massachusetts Press Association, are severely criticising the National and Oklahoma Press associations for the entertainment to be given at Miller Brothers' 101 ranch, near Bliss, June 11. This criticism is wholly uncalled for, and due to ignorance of the facts in the case. Neither the National nor the Oklahoma Press associations are giving the Bliss celebration, it being provided by individuals.

"The general committee in charge of the arrangements for the entertainment of the editors during their stay in Oklahoma have had no control over the arrangements for the entertainment at Bliss; are putting up none of the money, and are not attempting to say how the members of the National Editorial Association shall spent Sunday. President Screws, of the National association, has announced that the official program ends Friday evening.

"The editors will leave Guthrie Friday for Enid, El Reno, Chickasha, Lawton and other points in southern Oklahoma. Saturday afternoon they will arrive in Oklahoma City to spend the night, returning to Guthrie Sunday morning at 9 o'clock. At midnight the special train will leave for a trip through the Indian Territory. The Oklahoma Press Association has made no arrangements for the Sunday entertainment of the editors. The Guthrie ministers are arranging for special services for those who desire to spend Sunday in Guthrie, and a number will undoubtedly take advantage of this opportunity.

"Others will accept the invitation of the Miller Brothers to attend the entertainment at "101" Ranch. The invitations are extended to the members of the National Editorial Association individually, and each man is free to accept or decline.

"The Millers are spending thousands of dollars to make the celebration one that can never be equalled and will never be forgotten by those who witness it. Individually they have extended a hearty invitation, and have promised a warm welcome to all of the editors. So with those acquainted with the real facts there is no criticism either of the National or the Oklahoma associations, for as such they have nothing to do with the Sunday entertainment.

"In true American fashion the members are free to observe Sunday as they please, and will be welcome either in the churches of Guthrie or at the '101' ranch."

OFFICERS OF THE NATIONAL EDITORIAL ASSOCIATION.

PROGRAM TWENTIETH ANNUAL CONVENTION NATIONAL EDITORIAL ASSOCIATION, GUTHRIE, O. T.

WEDNESDAY, JUNE 7, 1905, 2 P. M.

Address of Welcome, by Governor Ferguson in Behalf of the People and Newspapers of the Territory.

Address of Welcome in Behalf of the City, by Mayor J. W. Duke, and by Hon. O. R. Fegan, President of the Commercial Club.

Music.

Response to Welcoming Addresses, by President W. W. Screws.

Association Called to Order.

President's Address.

DISCUSSIONS.

THURSDAY, JUNE 8, 2:30 P. M.

Reception to the Ladies of the Association at the home of Governor Ferguson.

THURSDAY, JUNE 8, 3 P. M.

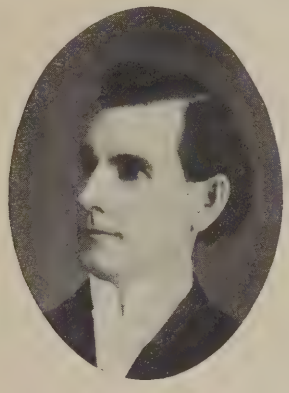
Report of Credentials Committee and all Other Committees ready.

Address—"Public Schools and Public Press," by J. W. Carr, Superintendent of Schools, Anderson, Ind.

Address by Wm. Allen White, of the *Gazette,* Emporia, Kans.

GOV. T. B. FERGUSON
Of Oklahoma.

MAYOR J. W. DUKE
Guthrie, Okla.



HON. O. R. FEGAN
President Guthrie Commercial Club.

Announcement of Committees:

Ways and Means, Necrology, Constitution and By-Laws, Postal Laws, Officers' Reports, Resolutions, Treasurer's Books.

Recitation by Prof. Ben Hennessy.

Address by Richmond Pearson Hobson, of Alabama.

Music.

Paper on "Some Printing House Economics," by Col. John Dymond, Louisiana Planter and Sugar Manufacturer.

"U. S. Postal Laws and Policies," by Hon. H. A. Castle, ex-Auditor of the U. S. Postoffice Department, Washington, D. C.

"Libel and Privilege," by D. H. Butler, of *The Legal News,* Lincoln, Neb.

Question Box. Questions Received.

WEDNESDAY, JUNE 7, 8:30 P. M.

Reception by the Citizens of Guthrie at the City Hall.

THURSDAY, JUNE 8, 9 A. M.

"Woman in Journalism," by Miss Virginia C. Clay, of the Huntsville, (Ala.) *Democrat.*

Annual Poem, by W. E. Pabor, Poet Laureate, Avon Park, Fla.

Recitation by Prof. Ben Hennessy.

Music—Vocal and Instrumental.

Report of Necrology Committee.

THURSDAY, JUNE 8, 9:30 P. M.

Reception by Scottish Rite Masons of Oklahoma and Indian Territories to the Association and Ladies thereof, at the Scottish Rite Temple.

FRIDAY, JUNE 9, 9:30 A. M.

A general circuit of the city by street cars, carriages and other conveyances.

FRIDAY, JUNE 9, 9:30 A. M.

Final Report of Credentials Committee.

"Muzzles in Pennsylvania," by J. S. Benn, of the Philadelphia *North American.*

Newspaper Diplomacy, "Tell the Truth," by Wm. Southern, Jr., of *The Examiner,* Independence, Mo.

"The New State and Its Newspapers," by H. R. Gilstrap, of Chandler, O. T.

Selection of next place of meeting, election of officers, and resolutions.

Adjournment.

REVIEW OF JOB WORK

BY A. V. FITZGERALD, MILWAUKEE, WIS.

Address all Communications for this Department to
1319 W. Ravenswood Park, Chicago, Ill.

CHAS C. METCALF, Munising, Mich.—The specimens submitted are well composed and well printed. Your office has apparently made a very judicious selection of type faces, and the manner in which they are handled shows that the compositor is closely following the progress of typographical styles. However, many of the jobs could be greatly improved by giving closer attention to the many little things, which are slighted by the average compositor. For instance, in the Frank Howard letterhead the main line is set in Caslon Italic caps. The conformation of this italic is such that it is seldom advisable to use a line of caps, and the appearance of the word "Howard" in the line referred to supports this statement. You will observe that here is an average of about three points between the letters composing this word, with the exception of the space between the "W" and "A" and here the space is about eight points—giving the appearance of two words. If used at all in conjunction, these letters should be mortised so as to equalize the spacing. The date line is placed too close to the panel rule. The use of an extended letter in the two small panels is condemned. So far as possible a type should be chosen the general form of which corresponds to the shape of the space it is to occupy. In a panel in which the lines of type run parallel with its greatest dimension an extended letter is appropriate, but in the case before us the extended letter not only does not conform to the shape of the panel in which it is placed, but has compelled the division of too many words. Caslon upper and lower case would give a better effect, and avoid mixing of Gothic and Caslon. The menu card set in eight point, upper and lower case is correctly composed, but it is printed on dark green cover stock and bronzed. The stock is too dark for such small type, and the type is too small and light for bronzing. The public school program is a first-class piece of composition, and the firm's letterhead is excellent in design and execution.

Bert R. Bowman, Denver, Colo.—There are few compositors of the younger school whose work gives greater promise. The specimens submitted to this department are characterized by simplicity and style, and possess a degree of individuality that is both unique and attractive. A comparison of the work Mr. Bowman is studious and ambitious, and the earnest at hand with similiar jobs executed by this artist two or three years ago shows that he has made a marked improvement.

A

effort he is putting forth is bound to put him in the front rank. Speciment "A" speaks for itself.

De Witt M. Gordon, Nashville, Tenn.—Specimens of general job work, well printed. The general arrangement of the display is very good but in a few of the jobs too many styles of type are used. The cover designs are excellent.

Edward Stutes, Spokane, Wash.—The billhead reproduced "B" shows a novel arrangement. The composition and presswork leave no room for criticism. In the large assortment of specimens before me there is not one that merits anything but praise. Few compositors can produce work so uniformly meritorious.

B. Ray Franklin, Fulton, Mo.—While the work received from this compositor does not take rank among the "art" creations it is properly classed as good commercial printing, and possesses an individuality and a uniform quality that is very pleasing. The only criticism I feel inclined to make of Mr. Franklin's work is that he seems prone to the excessive use of panels. In the offices handling the highest class of stationery printing the use of panel work is discouraged, especially in one-color work. It is well for a compositor to vary the style of his work. Panels will continue to be used, but the correct thing in most lines of stationery is severe simplicity—plain type, well printed, good stock. One of the specimens shows a combination of Engraver's Roman and Post Old Style—faces which should not be used together. In

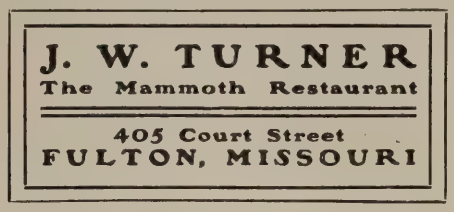
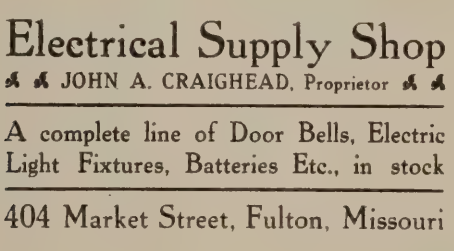
the same letterhead the words "Fulton" and "Missouri" are separated by a panel—a fault. The envelope corner cards



C

"C" shows the general style of his work, but the corner card "D" demonstrates that he knows how to vary it on occasion. Do so more frequently. A shaded text letter is a little too delicate to appear on an envelope corner card under a cut of a fat hog. In the "Koontz, Townsend & Palmer" letterhead, the line under the parallel rule is too widely spaced,—the words should be letterspaced. The rule work in all the specimens shows careful workmanship. The booklet for Mr.



Electrical Supply Shop
JOHN A. CRAIGHEAD, Proprietor
A complete line of Door Bells, Electric Light Fixtures, Batteries Etc., in stock
404 Market Street, Fulton, Missouri

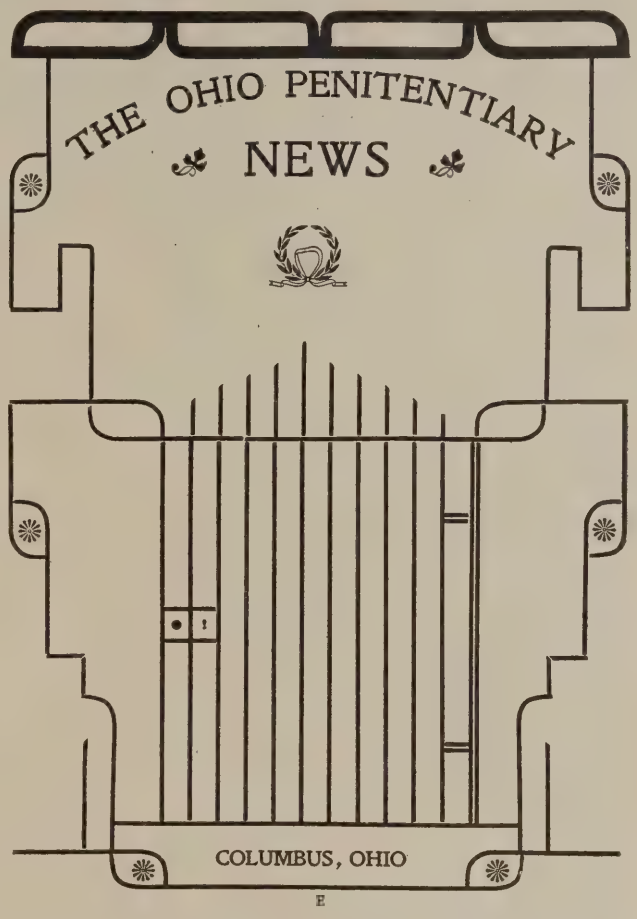
D

Tuttle is a first-class piece of composition. However, the presswork is not quite up to the mark set by the composition, being simply the average quality produced by country offices. This applies to the cover only, the presswork on the inside is very satisfactory. It may be that I have received an imperfect copy. So long as you stick to the plain, clean-cut style of work shown in this booklet, you may rest assured that you are headed the right way towards "safe and sane" typography.

A. Linden, Denver, Colo.—Several artistic up-to-date ads. Caslon Old Style and Caslon Old Style Italic are the types used. They are well displayed and the result is very attractive.

Brown County *World,* Hiawatha, Kans.—I have received through Mr. Copper several samples of the work of this office. There appears to have been considerable thought given to their production but the composition has not been very successful. In general the display is "too sprawling."

Prisoner 34,105, Ohio Penitentiary.—"Some of this work." A cover design (E) composed of labor saving rule. Such



E

work is acceptable as a typographic curiosity, but has no value artistically or commercially—it is kindergarten work.

E. C. Roach, Jacksonville, Ill.—The announcement is O. K. except as to margin. There should be at least three picas more margin at the foot. Your letterhead is very neat. the ad is a trifle too fussy. Your story is lost amid ornaments,—it lacks strength. The envelope card is stylish and up to date, but why not have it in two colors? It might create a desire on the part of a customer to have his work in colors, and this makes presswork, and presswork is profitable.

H. H. Lampman, Neche, N. Dak.—The last line on the Chas. E. Fee & Co. billhead should be letterspaced,—there is too much space between the words. The ornaments used

BENJAMIN B. HERBERT

Founder of National Editorial Association and Editor of the Official Paper, the NATIONAL PRINTER-JOURNALIST, Chicago

ENTERTAINMENTS FOR THE EDITORS

Committeman Prouty furnishes his interview with the Editor.

BENJAMIN B. HERBERT, founder of the National Editorial Association and editor of the NATIONAL PRINTER-JOURNALIST, Chicago, Ill., the official organ of the association, stopped off at Guthrie, Oklahoma, between trains on the morning of May 15th. He was on his way home from attending the meetings of the Texas State Press Association. During his short stay in Guthrie, he met many friends, who promised him that the National's boys and girls would be warmly welcomed and entertained while visiting the Capital City of Oklahoma. In an interview with Executive Committeeman, Frank G. Prouty, Mr. Prouty said:

"Well, Father Herbert, the time is drawing near for the meeting of the National Editorial Association at Guthrie. All Oklahoma and Indian Territory are preparing to give the distinguished guests a warm welcome and entertainment. This coming state of the Union has plenty of hustling material in body and brain to 'show' the visitors what has been done in developing a vast wilderness into a garden of profitable crops in sixteen years and how heads of families came to the 'Land of the Fair God' with a tent and now own brick blocks. The cities of Oklahoma and Indian Territory are yet small for the entertainment of 700 guests, but the National editors, wives and sweethearts will get the best there is in this fair land."

Speaking of the entertainment in Oklahoma and Indian Territory, Mr. Prouty further says:

AT CUTHRIE.

The local program for the National Editorial Association meeting here on the 7th, 8th and 9th of June, has been arranged as follows:

Address of welcome at first business meeting, by Governor T. B. Ferguson, on behalf of the people and newspapers of the territory.

The governor is a newspaper man, being the editor of the Watonga *Republican* and one of the delegates elect to the Guthrie convention.

Address of welcome on behalf of the city by Mayor J. W. Duke and by Hon. O. R. Fegan, president of the Commercial Club.

Wednesday evening, June 7th, reception by the people of the City of Guthrie at the city hall to the National Editorial Association, ending with light refreshments and a ball. The First Regiment Band will furnish the orchestral and street music.

Thursday afternoon at 2:30, reception to the ladies of the association at the home of Mrs. Governor Ferguson.

Thursday evening at 9:20, following the memorial service at the opera house, reception by the Scottish Rite Masons of Oklahoma and Indian Territory to the association and the ladies thereof and such others as may be admitted by card.

Friday morning from 8:30 to 9:30 a general circuit of the city by street car, carriages and other conveyances.

The Masonic Choir and special soloists will sing during the receptions.

THE ITINERARY.

On Friday evening, at 6:30, June 9th, the special Pullman train will leave the union depot, over the D. E. & G., for Enid, where the visitors will be royally entertained until midnight.

From there the train will leave Enid via Frisco for Lawton where breakfast will be served by the whole-souled club women. After this kingly feast the Commercial Club and citizens will have arranged carriages to take the visitors to the Indian schools, then to the historic Fort Sill, where Major Ripley will have prepared special military maneuvers.

From there the party will pass the home and tribe of old Geronimo up through the beautiful and picturesque valley of Medicine Bluff to the foot of Mount Sheridan to the Wichita mountains, thence to the gold fields and return to Lawton.

At eleven o'clock on the morning of June 10th, the train will be transferred to the Rock Island railroad and half hour stops will be made at Anadarko and Chickasha, arriving at El Reno at 3 p. m.

The Special will arrive at Chickasha at 12:30 p. m. on the 10th, where a royal reception and luncheon will be served by the Ladies' Federated Clubs, assisted by the Commercial Club. This is the first stop in the Indian Territory and the enterprising citizens will welcome with bands and anvils, luncheon and speeches. A stop of two hours will be made at this place.

One hour will be given at El Reno, arriving at Oklahoma City at 5 p. m.

The entertainment at Oklahoma City will be one of par excellence. That being one of the largest wholesale, manufacturing and wealthiest centers in the territory, something magnificent is to be expected.

AT 101 RANCH THE ENTERTAINMENT COMMEMORATES THE PAST AND PRESENT.

After this tour thus far made by the National editors, showing the great development and progress of Oklohoma in sixteen years, the visitors will be taken to the largest agricultural and stock farm in the United States comprising 87,000 acres of the best land in the west, owned by the Miller brothers.

Here will be presented one of the most intellectual and historical exhibitions ever given on the plains of the west. All of the tribes of Indians will congregate for the last time in commemoration of the dissolution of their tribal relations. This is something that has never been seen and something that will never be seen again.

The cause of this dissolution is that the Indians can realize more money by turning their lands over to the plowmen than from the cowmen, who have had charge of the largest portion of the redskins' possessions in the past. This condition will put the cowboys out of business and drive them to the far west, and the final roundup to be given on this occasion will be the farewell of this class of citizens in Oklahoma.

The parade on that day, June 11, will picture the days of old up to the present day of civilization and modern improvements.

One of the features of the program will be a representation of the grand rush for homes in the Cherokee strip. Those who have heard and read about this historical event and opening can not realize what it was. When seen it will be as exciting as it was on the day of the opening, September 16, 1893.

The 101 ranch will, in the future, be used in its entirety for agricultural pursuits and a large stock breeding farm, raising everything from buffalo down to chickens. There will be ten bands of music from Oklahoma, Kansas and Texas that will furnish music on this final celebration. Among the bands will be the Ladies' band from Stillwater, Oklahoma. This band is known as making a reputation at the National Editorial convention at St. Louis last May as the guest of the Oklahoma Press Association. Through their excellent music and their becoming ways this band won the hearts of the national editorial delegates at the world's fair and assisted in getting the convention for Oklahoma this year.

All the railroads will run excursions to 101 ranch on this

occasion and preparations are being made to entertain 60,000 people from all parts of the United States.

The big buffalo luncheon will be served to the National Editoral party at 12:30 p. m. The grand parade takes place at 1 p. m. and the entertainment will continue until 6;30 p. m. when the Editorial party will take special returning to Guthrie. Those editors who do not wish to attend the 101 ranch entertainment may stop at Guthrie and attend services morning and evening. Mr. Prouty has made arrangements to stop the special at Guthrie on the way to the ranch.

SPECIAL TRANSFERRED TO KATY.

The Editorial special will arrive at Guthrie on the evening of June 11th about 8:30 and will be transferred to the Katy road. At midnight it will pull out for Cleveland.

AT CLEVELAND.

This is the first stop in Oklahoma that will be enjoyed by the Special out of St. Louis for the Guthrie convention. The special will arrive here after breakfast on the morning of the 7th and the citizens will welcome you on Oklahoma soil by the firing of canons and music by the band. On the morning of June 12th the citizens of Cleveland will again welcome the Portland Editorial Special with breakfast and entertainment appropriate for an oil and gas city. This city closes the Oklahoma entertainment.

AT TULSA, INDIAN TERRITORY.

The Special arrives at this growing city at noon on the 12th where luncheon will be served and an entertainment will be enjoyed until 2:30 p. m.

AT MUSKOGEE, INDIAN TERRITORY.

The Special will arrive at 4 p. m. and the Commercial Club will escort the visitors to Fort Gibson, the famous and historical point, where the Indian bride of General Houston, of Texas is buried. Returning to Muskogee at 5:30 where luncheon will be served. An elaborate program in music, song and speech will be given at the opera house until 11:30 p. m. At midnight the Special leaves for Dallas, Texas. This closes the itinerary for Oklahoma and Indian Territory.

Now, Father Herbert, tell them all about it, and if there are any sore spots on the boys, the pure Oklahoma zephyrs will heal them. We await the coming.

Fraternally yours,

FRANK G. PROUTY,

Executive Committeeman, Oklahoma.

Editors to Attend Church

GUTHRIE, OKLA., May 8, 1905.

Major W. W. Screws, Montgomery, Ala.

MY DEAR MAJOR:—In response to yours of the 2nd inst., it certainly can be arranged to have all the editors who desire to, remain in Guthrie on Sunday and go to church and pass the day in any way their religious inclinations may determine.

As I told you before, the 101 Ranch entertainment is purely a side issue. It will be a wonderful entertainment full of history that no one can ever again see in the United States.

The editors can suit their own consciences about going. There will be a train ready to take them, but if they desire to stay in Guthrie and go to church, we assure them that they can hear sermons as good as they can hear anywhere in the United States and in churches fully up to our exalted citizenship.

With best personal regards, I am,

Sincerely yours,

F. H. GREER.

Secretary's Final Announcement

B. B. Herbert, Chicago, Ill.

DEAR MR. HERBERT:—The indications are the mimimum attendance at the Guthrie convention will be 600, about 350 delegates having already paid their per capita and something like 175 ladies and others have been paid for. So that at this time we are assured of a party of 500. I take it that all fully understand the special train leaves St. Louis, Tuesday, June 6th, at 1:30 p. m. and will not expect the train to wait on them. Good reports come along the line. Oklahoma and Texas, will, without doubt, do everything possible for the entertainment and pleasure of our party.

On May 12th I sent out a circular to all paid delegates asking that the Pullman deposit for the California and Portland trip be at once remitted to me. Since that time the mails and wire have been busy and there are now 262 delegates who have paid for this trip; undoubtedly some will be disappointed in delaying their reservations as my arrangements include a party of 300 only. The California Promotion Committee is looking well after our entertainment in that state and I believe a delightful trip is in waiting. I have endeavored to advise all delegates that they must make their own arrangements for transportation home wherever they leave the regular party. Those who expect to return from California should at once take the transportation question up with Geo. T. Nicholson, G. P. A., Santa Fe Ry., Chicago, Ill., unless some other route is more agreeable.

I expect to arrive in St. Louis by noon, Monday, June 5th, and will be at the Terminal Hotel ready to make assignments and transact other business.

Very respectfully,

WILLIAM A. ASHBROOK,

Cor. Secy., N. E. A.

"Guthrie Meeting to be a Booming Success"

LONDON, OHIO, May 8, 1905.

B. B. Herbert, Editor of National Printer-Journalist, Chicago, Ill.

DEAR MR. HERBERT:—As per your request, I send a list of the N. E. A. delegates selected at the annual meeting of the Hocking and Ohio Valley Editorial Association.

Executive Committeeman

Past Executive Committeeman

My Dear Mr. Herbert, I wish to congratulate you and the N. P.-J. on the neat manner you answer objections made in regard to the Oklahoma 101 Ranch entertainment.

I fear protests have been without due consideration of the matter in its true light. The Association, as the guests of Oklahoma, will be entertained in a style befitting the frontier and those people are doing and will do all in their power to entertain us in the best manner compatable with their rapidly changing environments, which will soon be matters of the historic past.

If any member of the Association objects to any feature of the entertainments, such as one can easily absent himself during that time.

Judging from the sentiment expressed among the attendants of the various Ohio Editorial Associations, which I have been fortunate enough to attend this year, I feel that the Guthrie meeting is going to be a booming success. Usually, we have had some difficulty in filling our N. E. A. apportionment of delegates among those who have signified their willingness to attend the convention. This year we have had an excess of candidates, all willing and anxious to go.

Trusting that I may soon have the pleasure of greeting you again, I am, Fraternally yours,

C. E. BRYAN.

THE TEXAS PRESS ASSOCIATION

The Editor of this paper had the pleasure of attending the twenty-sixth annual convention of the Texas Press Association at the beautiful little City of Brownwood, situated in what is called Western Texas, though it is near the center of the State. Texas is immense beyond calculation and people in Eastern Texas speak of Brownwood as in the west, somewhat on the same principle, that the people of New England and New York speak of Chicago as being in the West though many hundreds of miles east of the center of the mighty Republic. The magnificient distances in the Empire State of the Southwest were in part responsible for a late arrival at the meeting, at ten o'clock in the evening of the second day's session May 11th. The journey from Chicago required just fifty-two hours, and the distance from Boston where attending the Massachusetts Press Association, May 10th, seemed so great as to be constantly in mind.

Though late, at the convention, two days of solid, instructive enjoyment and pleasure still remained. The readers of the NATIONAL PRINTER-JOURNALIST can judge of the highly educative character of the meeting and the numbers on the program, by the extracts from seven of the very practical addresses, delivered at the convention, and published in this issue of the NATIONAL PRINTER-JOURNALIST. It is doubtful whether any other State Press Association in the country could present a more valuable symposium of papers read at one meeting, and the Dallas *News* showed enterprise and good judgement by publishing these in full, and, indirectly, conferred a great favor on this paper and its readers as well as on the newspaper men of Texas.

President S. J. Thomas, editor of the *Chief,* Comanche, is to be congratulated on the excellent program presented as well as upon the large attendance and the magnificent entertainments extended at Brownwood, Brady, San Angelo and Ballinger. He won golden opinions for his able management as well as for his courtesy, fairness and ability as a presiding officer, while Will H. Mayes of the Brownwood *Daily Bulletin* captured the goodwill and highest esteem of all by his unceasing care, and unflagging attentions, in carrying out the well arranged local program of entertainment.

The convention opened at 10 A, M. May 10th in the K. P. Hall. An address of welcome was delivered by Mr. Chester Harrison and it was in so many ways a model, so filled with truthful views of the useful work of the press, that it is printed here in full, from the Brownwood, Texas *Daily Bulletin* as follows:

In coming here for your twenty-sixth annual convention you have paid Brownwood a distinguished compliment. To me has been given the honor of conveying to you, this morning, a most hearty welcome from the people of Brownwood. My words but echo their thoughts: their thoughts but reflect the feelings of their hearts. We welcome you not as strangers, but as friends for we know you through your works. We may never have heard your names but your work has made its impress upon our lives. You have invaded our business world to aid us in times of adversity and to urge us o still greater achievements when success comes our way. You have come into the privacy of our homes to sympathize with us in our sorrows and reverses, to rejoice with us in our happiness and prosperity.

When in the early history of this country, man's energies were directed toward procuring the means of mere physical existence and security, the newspaper was looked upon as a luxury. In the enlightened civilization of today, when the chief anxiety of this very existence and security has come to be the higher things of the mind, the newspaper has become a necessity and your work is appreciated because of its greatness and completeness of purpose.

Nature is altruistic. She has so made man that he cannot live unto himself alone save as an unfinished and insufficient creature. She has correlated, interlaced and fused together the lives of men in social unity. Of all the agents of mankind the Press represents to the greatest degree the true spirit of altruism. Seldom does the editor find his years of toil rewarded by cumbrous wealth or priceless fame, yet he labors with patience and industry, rich in that he spends his life and his talents for the benefit of his fellowman and his country. The modern newspaper is a friend to all true men, to every good cause; an essential factor in the success of any business venture; the foremost means in all education; the leader in every movement toward moral and social betterment; the greatest contributor to the sum total of the world's progress and prosperity which make up what we call the advance of civilization—the improvement of the human race. Can any calling be more altruistic? Can the men and women of any profession do more for the world?

Loyalty to principle and fidelity to duty have found their highest development in your profession. Ever alive to the need of the hour, the newspaper editor lives and labors not alone for selfish gain and aggrandizement but always has a lively interest and performs an active part in anything tending to the welfare of the individual, the community and the state. From your lives we learn that success does not always mean fame, that greatness comes not by chance nor from a combination of events, but from the magic of unwavering determination, clear understanding and ceaseless toil. Your work is the thing. You strive to do it better each day for the work's sake and because of the resultant good to mankind. In doing this work you lose your identity to a certain extent. You may never be great as the world counts greatness. Your chiselled busts may never occupy places in the Hall of Fame along with the renowned scholars, statesmen and philosophers of the world; but your great qualities of head and heart are worthy of emulation. Your intellectual achievements have their influence not only upon the world of today but upon the one of tomorrow as well. No newspaper was ever a complete failure. However brief its existence, however insignificant its influence it has added something to the life of some person, something to the progress of the world. The most important invention the world has known is the art of printing, and the most important product of that art is the newspaper. Living at a period when goverment meant life and all that life contains, when his compatriots had poured out their life blood for a government, the immortal Thomas Jefferson paid you the richest tribute ever penned concerning any class of men. He said: "Were it left to me to decide whether we should have a government without newspapers or newspapers without a government I should not hesitate a moment to prefer the latter."

Although freedom of speech and of the Press were only in the initiative, Mr. Jefferson foresaw the possibilities of the newspaper and the influence it would have in the development of this the greatest of earth's nations.

That your influence is most potent with the individual, the community, the church and the state, we know. The value of that influence is greatly enhanced by a human sympathy communicating to the people new life and energy, touching and unsealing in their hearts the springs of resolution, self help, and visiting them with good cheer. That

your influence has, in the past, been for wisdom and truth, for justice and right is to your everlasting honor. For this your work is appreciated and not solely because of the sordid dollars and cents value placed upon it by the commercial world. Confident of your steadfastness in this course we do not fear the constant and ever apparent widening of the scope of your influence.

Members of the Texas Press Association, Brownwood people welcome you. Our homes are open to you. Or time is yours while you sojourn with us. We are honored to have you among us for what you are and because you represent the newspapers of Texas—newspapers not excelled in any state of the union.

We sincerely hope that your stay may prove as pleasant for you as it will be for us.

Following these admirable words of appreciation and welcome, Vice-President J. H. Lowry of the Honey Grove *Signal* made an appropriate response, and Editor Will N. Mayes, in charge of local arrangements and who had invited the Press Association to Brownwood, on request of President Thomas, made brief remarks. He called attention to the streamer festooned across the half, that bore the broadly meaning device, "There is nothing too good for you," and said this is the sentiment of the people of Brownwood. "The courtesies extended come from the heart.

President Thomas then delivered his annual address in which he said:—

The term of my stewardship as your servant is about to close, and at this meeting I will return to you my commission that you may deliver it to another. The year intervening between our last meeting at San Antonio and this, has been exceedingly pleasant to me in a personal and official sense, constituting a delightful epoch in my life. Through no efforts of my own, but largely through the efforts of those Nestors of Texas journalism and pioneers of this association, whom you know without designation by name, the Texas Press Association is now at high tide and the white caps are bursting on the billows of growing enthusiasm. And now at this meeting here in Brownwood it is an emphatic delight to me to greet one of the largest and most representative assemblies of newspaper men and women that has ever gathered in the state.

The statement was made in an evening paper last week that it used to be the case that our annual meetings were made the occasions for liquid jollifications and junketings. That statement is not correct, but it is a fact that in recent years our meetings have taken on more of the character of business and the useful and practical features have become preëminent over the purely social and entertaining; and to this fact I attribute its constant and healthy growth in recent years. I would not minimize the importance of these lighter and gayer features of our gatherings. A large percentage of the pleasure we get out of them comes from the re-union of friends and the making of new ones, and in the rest and recreation that proceeds from an outing away from the routine of office life. Yet these are only auxiliaries and accessories to the main issue. We cannot thrive on the sillabub of entertainment or the meringe of the railroad and junket; we must have first and foremost the smoking roast of business, the giblets of practical discussion. For several years past there has been a happy blending of the two, with the result that at Brownwood the most palatable sandwich of the social and the utilitarian that has ever been set before us.

To perpetuate our organization it is necessary that it have a mission and that it be constantly pegging away at it; some plan or project, either of a selfish nature, looking to the improvement of the Fourth Estate, or else of an altruistic character; some mission we must have if we would thrive and grow. The easiest and surest death is that which comes from inertia. The man of business, after an active life, retires on a competency to rest the remainder of his days, and then the rust accumulates in his joints, his brain becomes mouldy from disuse, and he passes quickly into a state of rest to which there is no end. This natural law appertaining in individual life and endeavor applies with equal force to an organization such as ours. If we would survive and thrive we must have something constantly before us demanding our united efforts.

Apropos to this suggestion, I am happy to announce that a new and unique feature has been added to the program of the present session by the committee. The school teachers have each year what they call a school of methods wherein those attending are given practical demonstrations in methods of management and of imparting instruction. And so we are to have at this meeting practical lessons in newspaper work, jobs, advertisements, etc., a kind of printers' Normal or School of Methods in which we may all learn something of value. It is confidently believed that this innovation will prove so useful and interesting that it will become a permanent feature of our annual meetings.

Again, it is proposed at the present session of the Association to organize a Press Congress, or confederation, the object of which is to secure a closer alliance between the various Associations of the state, and their coöperation in matters of vital interest to the press. The old sayings that "in union there is strength" and "united we stand, divided we fall," apply to newspaper associations as well as to other organizations. But this matter has a place on the program and will, at the proper time, be fully presented, and I will not take up your time with a discussion of it here.

A former president of this association, the distinguished manager of the Forth Worth *Record,* in an address before our last meeting, took occasion to compare the newspapers of his state with those of other states, and made a very flattering showing. Few of us are able to compare our own product with the foreign, because we see little of the press, of the country press at least, of other states. But we can institute a comparison between our own papers of today and of years ago. The improvement has been very marked. But a few years ago there were only a scanty number of power presses in use in the country offices; now, every little town has a cylinder press and an aggravating gasoline engine to pull it. A few years ago the advertiser addressed a formal card "To the Trade," full of insipid generalities, and a number of these dummies were stood up around the sides of the paper like frozen statues in a museum; now, with attractive cuts, borders, readable matter and good clean print and weekly changes, the ads are almost as interesting as the news columns, and the reader gets more than the value of his annual subscription in the bargains he finds in every issue.

Years ago the country weekly was an impersonal, acephalous sheet, with little to indicate that it had an editor beyond the occasional announcement that "ye editor" attended some fish fry or other function, or was the recipient of a mess of turnip greens from a subscriber; now the paper without a spicy editorial column is the exception, and its influence in social, civic and political lines has become one of the great reckoning forces of the state.

In a general, but very marked way, there has also been an improvement in the man behind the pencil and in the man behind the press. The editor of yesterday was in many cases a shiftless character, without ambition, money or credit in his community; today he discounts his bills for cash, and frequently breaks into the legislature. Yesterday he often begged his groceries and clothing by pawning his advertising columns to the merchant; today he dresses in tailor-made suits, imported palmettos and embossed hose, and pays for them with a check on the bank. Yesterday he was the secretary of his lodge and the footmat of his community; today he is grand mogul of the lodge, chairman of the board of trade, director in the bank, superintendent of the Sunday school and hires his washing done. Yesterday he spent the earnings of the week at the grogshop; today he takes his roll home to his wife and gives his small change to the children. The evolution of the men connected with the newspaper, from the editor up to the devil, within the last twenty years, is one of the most distinct and pleasing features of the forward movement of our great state.

There is a reason for this, and it is in the fact that better business judgment has got mixed with the ink, with the brain of the management and with the pages of the ledger. The newspaper is no longer regarded as an eleemosynary institution to be supported by the town for the good of the town, while the editor occupied a position similar to that of janitor of the cemetery. He runs his business principles, with the idea of making it a paying proposition, and the world respects him for it. So today I esteem it a very distinguished honor to face an assembly of such intelligence as this one. Representatives of the great dailies are here—the greatest in the South—Ousley of the Fort Worth *Record,* that peerless paper that drops smilingly at our doors out West here at breakfast on the morning of publication; and others — all here mingling with the boys from the country, from Pittsburg to Carrizo Springs, from Matagorda to Johnson of Memphis. And our ladies, our wives and sweethearts—how welcome they are to this gathering; how tame and insipid it would be without their inspiring presence. To them is due in a large measure the excellence of the personnel of

our Association. They have refined us of much of our dross and given us tone and a mercerized finish.

In this connection I want to render unto Caesar the things that are Caesar's. A man whose early efforts in its behalf might properly entitle him to the distinction of being called the father of this Association, but who is really old enough to be its grand-father, has gone up and down the iron avenues of the state and proclaimed the virtues of the Great West in whose palpitating heart this meeting is being held. He has carried this Association in his own generous, throbbing heart wherever the vicissitudes of a business on wheels has taken him. He loves it as his own child, and now as the sputtering mouthpiece of this big, bouncing chap, I wish to cordially thank this venerable gentleman for our healthy condition. I allude to him of a Franco-Prussian name and Huguenot ancestry, the urbane an ubiquitous Col. F. B. Baillio. Another who has in season and out of season worked with unabated zeal in behalf of the Association in general and of this session in particular, a man of American Foundry type but of Teutonic origin and designation, is he, who never fails to lend these meetings the wisdom of his counsel—C. F. Lehmann, the South Texas tobacco culturist. We are the guests of a most hospitable and refined people, a people whose enterprise is co-extensive with their hospitality, and both are free and unlimited. But I want to inform you that the Evil Genius behind all this endless chain of entrancing entertainment is my red-headed predecessor in the chair, the indomitable, the indefatigable editor of the *Banner-Bulletin* of this city. The editorial holy of holies of every newspaper in the state has been sown down with card, folders and programs; 'twas the work largely of this same Irish agitator. He has even gone so far as to erect a handsome office building that he might have a monument of his own design and construction to the enterprise and perseverance of the West Texas editor; and broad is the way and wide-open is the gate that leadeth to his heart and his sympathies; but straight is the gate and narrow is the way that leadeth to the goal of his enterprise and pluck, and few there be who attain unto it.

Others have rendered the officials of your association valuable assistance but to these three special credit is due.

The meeting now is yours. The table is set; help yourself, if there is anything not on the bill of fare that you want, ask for it and we will try to supply it. What you eat, masticate well, that it may be assimilated and do you good.

The afternoon was devoted to the reading of papers, that appear elsewhere in this issue, and to a carriage ride over the city. In the evening the editors attended an entertainment in Carnagie Hall. It was a high-class minstrel show, by lady minstrels that resulted in much innocent merriment.

Two incidents of the afternoon drive—which revealed many elegant homes and public buildings—that are worthy of special mention were receptions tendered to the editors by the Brownwood Twentieth Century Club at the beautiful home of Mrs. S. R. Coggin, and a second reception by the Floral Club at the residence of Mr. Ford. Souvenirs and flowers, sociality, music and song and choice refreshments were bestowed upon or delighted the ears of the knights of the pencil. At the Floral Club reception, ices were served on red, white and pink tables trimmed with La France, American Beauty and white roses. The ice cream was in floral designs of roses and the cake of floral colors, and to each guest was presented a souvenir book of Texas wildflowers, pressed. A mandolin club and a male quartette furnished the music.

The second day's sessions were devoted to routine and special business, to the reading of papers and discussions. The editor of this paper reached Brownwood at ten o'clock on the evening of the eleventh and was met at the cars by a carriage and a committee and conducted to the K. P. Hall where the association was in waiting. On entering the room a splendid assembly of editors and their ladies gave a cordial greeting. The hall, shown in our illustration, was handsomely decorated. Such brief words of greeting as were inspired by the occasion and the surroundings, were spoken and a brief history of the N. E. A. flag that hung back of the President's desk was given. Then all repaired to the banquet hall in the Crown hotel and, after the enjoyment of a very complete menu, responses were made to the toasts in the following order:—

"Texas and Her Newspapers," B. B. Herbert, editor NATIONAL PRINTER-JOURNALIST.

"The Ladies of the Texas Press Association," Hon. Jasper Collins, Panola *Watchman.*

"Frenzied Finance in the Newspaper Business," E. G. Gillette, Runge *News.*

"Irrigation," Alkali Eye, alias J. M. Lewis of the Houston *Post.*

"The Boll Weevil as a Public Benefactor," Col. W. G. Sterett.

"Our Guests" Rev. Geo. W. McCall, Brownwood.

"Our Hosts" J. H. Lowry, Honey Grove *Signal.*

Hall at Brownwood, Texas, where meeting was held, showing National Editorial Association Flag in front.

Col. Wm. G. Sterett acted as Toast-master. At the morning session, the editor of this paper delivered an address on "Newspaper Making and his Early Experience in Starting a Newspaper."

In brief, Mr. Herbert said that he had been especially pleased by the remarks of two speakers at the banquet on the previous evening. Mr. E. G. Gillette in speaking to the toast "Frenzied Finance in the Newspaper" had given as the financial principles in making a newspaper a money success. "Get a good field; one able to support a paper; make a good paper; get all the subscribers and all the advertising you can." Rev. Geo. W. McCall in responding to the toast. "Our Guests" had broadly reviewed the many fields of usefulness covered by the modern newspaper. It is necessary for the farmer to have productive land, then to plow and to sow and to reap but there must be thorough cultivation, systematic farming and knowledge as to the market.

The same principles hold as to the newspaper man.

He had been much edified, while on the train the previous day, by reading an able editorial in the Dallas *News* regarding the cotton industry of Texas. The paper had claimed that, in the past, there had been slackness in cultivation, a want of system and forethought in the planting and handling of the crops, a looseness in financiering and an ignorance as to the market and little regard as to what might or might not be the demand. It had occurred to him that the same faults had frequently been found among newspaper makers. The newspaper publisher must cultivate systematically along every line, must diversify, must understand all the demands of his market and must look carefully after his finances. He then related his experience when first fully launched into the business of publishing a newspaper in an agricultural county in Minnesota. He had found it necessary for the first six months to work seven days and two nights each week, in a thorough and conscientious study of conditions,

search for useful, acceptable and interest-commanding matter and in preparation of copy; in soliciting advertising and in a thorough, house to house canvass for subscribers, visiting every store, factory, shop and home in his city and county. This canvass was not made entirely with the view of direct results in increased business but with the further view of finding out the wants and the doings of the people, a gather-

Brownwood Bulletin Building, Brownwood, Texas, owned and occupied by the Mayes Printing Company.

ing and printing of such information and knowledge as might prove helpful, entertaining or useful. The result was the securing and giving information, among other things, as to all improvements that were being made in farm improvements and buildings; in better methods of farming, in the introducing of improved stock, etc., etc. One method, later adopted, was the formation of a farmer's institute to meet every month during the season from November to April, and the giving in the paper the discussions at these meetings, the advocating and enforcing by arguments and illustrating by examples, every week, improved methods of farming, diversifying and rotation of crops. Then, to afford a better market for the farmers and to build up the town, a flouring mill was advocated, money raised and the mill built; then followed the advocacy of better roads, of other factories and of a building and loan association. A half dozen of these enterprises were inaugurated and successfully carried on, including an industrial association for holding annual fairs at which liberal prizes were given for highest excellence in the products of farms, factories, shops and of women's work, cooking, butter-making, preserving of fruits and in sewing and fancy work. Lectures were also delivered on dairying and the points of best stock. All this afforded news and business for the paper and work for the job department. Neither were the schools, nor the churches, nor good government overlooked nor slighted. The paper was made an active promoter of all interests and was independent though advocating the principles of the party in harmony with the editor's own beliefs. The paper ever acknowledged that there was good in the opposite party and sometimes supported a worthy candidate of the opposition against a dishonorable one of its own party on the ground that this was the best service that could be rendered to the people and to its own party as well. The whole idea had been to make the paper fair, reliable and unprejudiced, helpful and useful without fear or favor to every reader and to every interest of the city and the whole region where published. The result had been a success and a loyal support of the paper which no opposition or competition could disturb.

Following this address the Vice-President of the Southern Cotton Association addressed the association in a most able manner with regard to the work and objects of his organization. Discussion followed and Mr. Herbert spoke of the experience of wheat raising in Minnesota. The one crop idea brought poverty, diversifying restored the soil and brought wealth. The following resolution was adopted by a unanimous vote:

Resolved, That the Texas Press Association hereby endorses the movement represented by the Southern Cotton Association and we pledge our united assistance to said Association in its effort to aid the Cotton Growers and business interest of the South.

The following officers were elected for the ensuing year: President, J. H. Lowry, of the Honey Grove *Signal;* Vice-President, T. B. Johnson, of the San Antonio *Light;* Secretary, T. B. Lusk, of the Italy *Herald;* General Attorney, Judge W. W. Walling, of San Antonio; Treasurer, C. F. Lehman, of the Hallettsville *Herald;* Essayist, J. B. Landsdale, of the McKinney *Gazette;* Orator, Mary Jane Cox, of the Moody *Courier.*

Resolutions of thanks were adopted for courtesies extended and the meeting was adjourned until evening. A handsome silver set was presented to retiring President Thomas and a beautiful, and appropriately engraved watch charm, to the Association's General Attorney, Judge W. W. Walling, with appropriate presentation and reception speeches.

In the afternoon an excursion was taken to Brady. Here the editors were met by carriages and driven to the polo grounds, where a very satisfactory and exciting game was witnessed. On these grounds, polo ponies are trained for the Eastern market and are often sold for prices as high as from $500 to $1,500 each. A feast of barbecued meats, fish, chicken, turkey and toothsome delicacies, was enjoyed

J. H. LOWRY,
Honey Grove Signal, President-Elect Texas Press Association.

in a pecan grove by a little stream of water near the city. Then followed a drive around the place and the return to Brownwood.

Saturday morning at 6:30, the whole party took the cars for a trip to San Angelo, a most beautiful little city of eight thousand people. The trip revealed a region of great beauty and richness.

At one point, Santa Anna, two singular ridges or mountains, separated by the famous Santa Gap through which the "old trail" used to run, were pointed out extensive stone quarries supplying a superior quality of building stone. At San Angelo, the old U. S. fort—where the deserted, famous hospital, the soldiers' barracks, built of stone, and officers' residences still stand—and Riverside Park were visited. At the barracks an old sun dial attracted much attention but the shadow was out of time with the watches that were all set to railroad instead of exact local meridian time. Amusements were witnessed at the park and rowing and naptha launch rides enjoyed. A most sumptuous, complete and admirably served dinner, provided by the refined and beautiful ladies of the place, who acted as and proved most charming hosts and waiters, was enjoyed. Eloquent speeches in praise of the country and the feast followed and then a drive around the city to the cars. On the return trip, the hospitalities of Ballenger were enjoyed. There was a reception and speeches at the opera house, and a splendid repast served by the ladies. In the interval between the reception and the feast, some of the party visited a ball game and others drove around the city. The return was then taken to Brownwood, where the editors arrived at 9:30 tired but refreshed and joyous over all that they had seen and experienced. This is the way they do things in Western Texas, and there is no more rich, beautiful or progressive region in this whole land. The people are from all sections of the Union, and they are prosperous, intelligent and refined. Splendid school houses and churches are everywhere in evidence in the cities and villages. Absolute prohibition, under a wise local option law, prevails in many places and there is a more prevalent religious sentiment than is found in many other regions of our country. Our only regret is that space forbids giving a more extended account of the country and of the magnificent entertainments enjoyed and of the hospitable people who are, in all this vast State of the Southwest, building so well and so grandly.

We can not refrain, however, from reprinting from the Brownwood *Bulletin*, a brief description of one entertainment, given to the ladies of the Association, on Thursday afternoon at Brady:

Despite the weeping clouds of the morning, the home of Mr. and Mrs. C. H. Bencini presented a scene of beauty and loveliness, the occasion being a reception tendered by Mrs. C. H. Bencini to the ladies of the Press Association.

Perfect in its appointment for entertaining, the interior of the home was beautified by exquisite floral decorations. In the large hall luxuriant with palms and ferns, the guests were greeted by Mesdames Blair and Guthrie and conducted to the parlor where the charming hostess received them in her most gracious manner, presenting them in turn to Miss De Zavala of San Antonio, the guest of honor. In the receiving line were also Mesdames Abney, Yantis and Gilliam. Festoons of the dainty graceful smilax added to the exquisite beauty of this room. Mesdames Rogers and Fowler led the way to the next room, a veritable bouquet of American Beauty roses. Here they were greeted by Mesdames Shepard, Mayes, Armstrong and Cross. In this room Misses Yantis and Ludlow and Miss Gooch of Temple dispensed delicious nectar from golden cups.

Mrs. Scott then showed the way to the diningroom. La France and Bride roses were used in this room in profusion. Mesdames Humphreys and McCartney received the delighted guests and to them was served moulded cream and cake by Misses Roxy Grove, Lella Lambertson, Hattie Conway and Cleone Bencini. Mrs. Lambertson and Mrs. Jersig then introduced each visitor to the tea room, where a bit of nature had been transplanted in the form of our state flower, the Blue Bonnets. Here Mesdames Timmins, Ketterson and Prater presided.

From this repast Mesdames Roberts and Percy Scott conducted the guests to the library, fragrant and beautiful with sweet peas. Mesdames Hervey Mayes, Lee, Grant, Conway and Misses Long and Green were here and in their most pleasant manner gave to each a souvenir of the occasion, and received the autograph of each guest in a beautiful, hand-painted booklet.

The sound of sweet music, mingled with the voices of joy and gladness, truly made one oblivious to all else beside.

It is safe to say that the Press ladies were there in full numbers.

Miss Adena De Zavala, mentioned as the guest of honor on this occasion is the President of the Daughters of the Republic of Texas, and her grandfather was Vice-President of that Republic, that had an existence, among the separate nations, of nine years after the declaring independence from Mexico and before becoming a part of the territory of the United States. During that period, the people made an unequaled record for patriotism, heroism and endurance. At the world-famed Alamo, the immortalized heroes,—surrounded by the soldiers under Santa Ana, outnumbering the Texan patriots more than a hundred to one,—fought until the last man fell and not one lived to tell the tale. Miss Zavala started and carried forward the movement, with the aid of other noble women, for the purchase and preservation of the Alamo and she is much honored for her work. The funds have been provided and the purchase made and it is now her ambition to fill the place with souvenirs and relics of the Republic and to make it a patriotic shrine not only for Texas but for the people of the whole Union.

James H. Lowry. President of the Texas Press Association

Tennessee has been liberal in her contribution of men to Texas—statesmen, patriots and citizens—and some newspaper men. Texas is indebted to Tennessee for the recently elected president of the Texas Press Association, James Hardy Lowry, of the Honey Grove *Signal*. Mr. Lowry was born at Bells, Tennessee, May 9, 1866, and lived on a farm till he was sixteen years of age. But the peaceful pursuits of farm life were not strenuous enough for him and when he was sixteen years of age he went into the printing office at Bells to learn the trade that should be his through life. Attracted by the possibilities of the state, he moved to Texas in 1886, working several years at his trade before settling at Honey Grove, where he has been for many years editor and publisher of the *Signal*, and blessed with a devoted wife and sweet little girl his cup of happiness should be complete. There is not a newspaper man in the big State of Texas better known or more highly esteemed than Jim Lowry. This popularity is not due to some eccentricity of disposition but to the recognized ability and sterling character of the man, whose ready wit and sparkling humor have won for him the sobriquet of "Bill Nye of North Texas," and whose genial disposition has made him a friend of every person with whom he has come in contact. The Texas Press Association has honored itself in electing J. H. Lowry as its president.

PANEL BORDERS

Printers generally will be quick to appreciate as a valuable acquisition the series of Panel Borders just brought out by the American Type Founders Company and shown for the first time in the Golden Book of Business. This is a series of a dozen or more border designs, each style being made in five different sizes and all being cast on six point body. These have been designed primarily for use in the building up of Panel Typography and will prove very attractive substitutes for brass rule being susceptible of such a variety of combinations and being at the same time cheaper than the use of brass rule for panel work.

ANNA, ILL., April 20, 1905.

DEAR SIRS:—Please find enclosed stamps to amount of 20 cents for which please send me the March number of your excellent journal. I consider it the best published in the U. S.

MILLARD F. RUSHING.

NEW PRESS ASSOCIATION FORMED

The Le Roy, N. Y., *Gazette,* gave, in its issue of April 26th, the following account of the forming of a new press association, that will, doubtless, be found profitably suggestive to editors and publishers in other states who have been contemplating the getting closer together in district or county organizations for the promotion of business ends, through frequent meetings, discussions and united action:

The publishers of weekly papers in Western New York have for some time felt the desirability of an organization tending toward a solution of some of the problems which in various ways confront the craft. It has been felt that the formation of a purely business association would afford valuable opportunity for "comparing notes" on all subjects pertaining to the publication of a newspaper and of printing in general. Conditions have changed very rapidly within the past few years, and they seem to point to the necessity of more uniform methods along general lines.

With the above ideas in mind, a meeting of publishers was held on Friday at the hall of the Chamber of Commerce in the city of Rochester and an organization perfected under the name of the Western New York Newspaper Publishers' Association. The following officers were chosen:

President—P. A. Blossum, Brockport *Republic.*

Vice-President—Geo. E. Marcellus, The Le Roy *Gazette.*

Secretary and Treasurer—W. O. Greene, Fairport *Mail.*

The above officers with J. A. Simpson, of the Albion *American,* and A. Van Allen, of the Avon *Herald,* constitute the executive committee.

It was decided that the annual meeting be held on the third Friday of April, and that regular meetings be held on the third Fridays of July, October and January.

A constitution was adopted, and by-laws are to be formulated at an adjourned meeting to be held at the Chamber of Commerce in Rochester, on Friday, May 5, at which time it is expected that the membership will be largely increased, and plans formulated for a practical working organization that will result in great mutual benefit.

TO PHOTO-ENGRAVERS

EMPHASIZING SOME HINTS THAT ARE EQUALLY VALUABLE TO PRINTERS AND NEWSPAPER PUBLISHERS.

DEAR SIRS:—The ninth annual convention of the Photo-Engravers of the United States and Canada will be held at Buffalo, N. Y., June 19, 20, 21.

The object of this gathering is to make an effort to correct certain evils or abuses in the trade. There may be many, but classified and condensed there are but two: First, competition which gives the average customer too much for his money. Second, organized labor, resulting in the workmen getting too much, in proportion, for the quality and quantity of service rendered. Between the two, the employer, the Photo-Engraver, gets too little for the services rendered to his customers, too meager returns on his investment and has scant promise of future improvement in any of these conditions.

The object of this meeting is commendable, but will it be successful? The proportion of the employers who will be there, to those who do not believe that anything will be done to improve conditions, may be in favor of the non-believers, and it must be obvious to every member that all old theories and arguments have failed to produce results. The business has become worse instead of better since the last convention, and instead of showing improvement at any time, each succeeding convention has found that the three conditions enumerated have grown,—better for the customer, better for the workmen and less satisfactory to the employer.

Admitting the possibility of this convention making plans to remedy any or all of these troubles through an absolute unanimity of views and promises to each other, what can be expected of the contrary cuss that never has and never will meet his competitors half-way on any proposition calculated to promote harmony and fellowship in the craft? Can we afford to frame up a plan that will not be acceptable to those of the trade who are not there, and take a chance of injuring our business in an effort to keep faith with each other?

Without argument the one object we are striving for is, that all Photo-Engravers shall be willing to "live and let live" by deciding as to what is a fair price for their work and religiously adhering to that price. A just object unquestionably, but what is a fair price for halftones, for example? Are we to declare in favor of a fifteen cent rate because that is the cost of minimums, or for a ten cent rate because there is a handsome profit in large cuts at that rate, or are we to decide in favor of a twelve and one-half cent rate because it is a "split the difference" and is the rate that is fast becoming general? Are we to sit in the meetings and scold and rail over the situation and not decide on a plan that will forever dispose of the square inch abomination? The National Association of Photo-Engravers has had eight conventions, the members have had a good time telling of their troubles, and have gone back to their shops to continue operations in the same old way.

There is one serious fault with the Photo-Engraving business that can be corrected by this convention, and that is the square inch folly. It is unprofitable to the engraver and

Mines in Cripple Creek District, Colorado

unjust to the best half of our customers. There is nothing consistent or equitable about it; it has been, is now, and always will be the cause of lowering prices. It is an absurdity without one redeeming feature and should have been disposed of at the first convention. Cut it out forever—kill it now. Go to the convention and do your part toward burying it. Declare yourself in favor of a Scale of Prices. Don't stay at home and kick and scold about the past,—but go, and get busy for future improvement. It's up to you.

GEO. H. BENEDICT.

NATIONAL ASSOCIATION OF PHOTO-ENGRAVERS

CHICAGO, April 25, 1905.

National Printer-Journalist, Chicago, Ill.

GENTLEMEN:—If not too late, we would like to have you give notice regarding the next annual convention of the Photo-Engravers, in your May number, or at least, in the next issue.

On the 12th of April, the joint Executive Committee of the Electrotypers and Engravers held a very enthusiastic meeting in Cleveland, there being a very large number in attendance. They heard reports from the National Secretary, who has been doing pioneer, organizing work for the past year, and the reports were exceedingly encouraging, showing great progress made. Members were all exceedingly enthusiastic, and it was voted that the work of the Chairman of the joint Executive Committee and the Secretary be endorsed, and that the Committee recommend to the National Association the continuance of the work. Also, decided to hold the convention at Buffalo, N. Y., June 19th, 20th and 21st, and the largest convention in the history of the National Association of Photo-Engravers is expected to be held at that time.

All the engravers are invited to come and bring their wives, and have a grand social time as well as a grand business time.

Thanking you for whatever you may do for us in extending this notice, I beg to remain,

Yours very truly,

J. L. SHILLING, President.

THE GOVERNOR OF OKLAHOMA ON THE 101 RANCH ENTERTAINMENT.

EXECUTIVE OFFICE, TERRITORY OF OKLAHOMA,
GUTHRIE, May 16, 1905.

Hon. Wm. A. Ashbrook, Corresponding Secretary N. E. A., Johnstown, Ohio.

Dear Sir: Having read the circular letter sent out by you under date of May 12, 1905, I perceive that certain impressions have gone abroad relative to the programme for the entertainment of the National Editorial Association at the 101 Ranch during the stay of the editors in Oklahoma.

It is to be regretted that such stories have been sent out. I want to assure you that no cruelty of any kind will be practiced on the occasion named. I take it for granted that the exercises at the 101 Ranch will be harmless enough, but exaggerated reports have reached the press and been spread all over the country in regard to cruelties, etc., which it is alleged will be practiced on that occasion. These reports are misrepresentative of conditions in Oklahoma and have given a false impression.

In regard to the programme at the 101 Ranch I desire to state that it will be just as much of a novelty to the people of Oklahoma as it will be to the visitors from the various states. The conditions advertised are not representative of the territory. It will simply be a show, a reproduction of what has been. For several months past those who are interested in this "buffalo hunt" have been making arrangements for the event and preparing the entertainment for the amusement of the Editorial Association. The "wild west" features of this entertainment have been gathered from all over the country. The buffalo have been shipped here from the north. The other "wild west" features have been gathered from various sources. The representatives of the press who understand this in its true light know that it is not to be a representation of conditions as they now are, but, as above indicated, a reproduction of conditions which prevailed here years ago.

In regard to the report alleging that a human being is to be scalped, I desire to say that it is merely a sensational story sent out for effect, and in regard to cruelty to animals will also say that no such thing will be allowed. The reports have gone out to the effect that buffalo will be chased by Indians, who will use spears, arrows, etc. These reports are wholly without foundation.

Taking it as a whole, I consider the stories relative to the 101 Ranch entertainment as a libel upon the name of Oklahoma, and very much regret that this entertainment was in any way associated with the visit of the editors to our territory. While harmless enough in its purpose, it has given color to the many misleading, sensational reports which have from time to time reached the public relative to conditions in Oklahoma. The programme at the ranch will draw a large crowd from Oklahoma. Why? Because the people here have seen nothing of the kind for many years and will be attracted by the novelty of it.

Assurance can be given to the public that no one will be scalped, no cruelty to animals will be allowed, and that the features of the proposed entertainment are not representative of conditions which now prevail in Oklahoma, but representative rather of conditions which prevailed here before the opening of Oklahoma to settlement. Very respectfully,

T. V. B. FERGUSON, Governor.

* * *

The Scale of Prices for Half-tones, presented in our advertising pages, by the Globe Engraving and Electrotyping Company, of Chicago, deserves careful study. The scale is founded on the true and just principles of cost of production. There is no greater folly, viewed from a practical business or economic standpoint, than the manufacture or sale of half-tones at a uniform, unvarying square-inch rate. It would be no greater folly for printers to charge for all job work by the square inch, or, for illustration, the setting up, taking proof, correcting and handling ten tastefully composed letter-heads for the same price per inch, because they cover the same space, as for setting up a page in a fine booklet or folder. In making separate cuts, each has to have a negative taken, and a separate etching, beveling, blocking and proof. The fact is that two hundred square inches of cuts two and a half by four inches, cost as much to make as do eight hundred inches of eight by ten inch cuts, or the smaller cuts cost the engraver four times as much as do the larger cuts.

* * *

"The Benedict Table of Wages," by Geo. H. Benedict & Co., 415 Dearborn street, Chicago, is a very ingenious device for almost automatically computing wages due, or the making up a pay roll from any rate of wages per day or week at from one cent to sixty-five cents an hour. It is issued in the form of a small revolving cylinder, and by turning the cylinder in the hand, the sum or amount of wages for any given time is shown, much more simply and quickly than is possible through the use of any ready reckoner in book form. By its use a girl in the office can make up the pay roll—having the time and rate of wages of each employe—without the aid of the bookkeeper, and the work of two hours can be done in twenty minutes. It secures accuracy, while saving valuable time and the labor of a skilled accountant. It will prove a great convenience in any office and a decided economy of hours and mintues, when the greatest speed is important, in large establishments where the pay rolls are complex by reason of the varying hours of work by scores or hundreds of employes.

BUSINESS NOTES

This Department is conducted for the benefit of advertisers, and expresses their claims and views

Charles M. Palmer, newspaper broker, 277 Broadway, N. Y., reports the negotiation of the sale, through his agency, from the owner, Mr. J. C. Longhead, of the *Daily News* of Braddock, Pa., to Mr. L. F. Ross, formerly city editor of the McKeesport, Pa., *News*.

The development of the western business of The Harris Automatic Press Company has necessitated larger and more convenient quarters in Chicago, and the Western office has been moved from the Old Colony building to ground floor store room at 317 Dearborn Street. This is in the midst of the habitat of the printer, and arrangements have been made to exhibit Harris presses in operation. All interested are cordially invited to call, by The Harris Automatic Press Company.

Twenty of the illustrations showing buildings and views in the city of Guthrie, appearing in our April issue, were from photographs by Armantrout Bros., Photographers, 118 East Oklahoma Avenue, Guthrie, Oklahoma. We have seldom, if ever, found a more satisfactory collection of views in any city of the United States. These photographs made a most excellent showing of that city and enabled us to properly present its attractions in our pages. It was intended, and directions were given, to give proper credit to the Armantrout Bros., but by some means, in the hurry of making up the forms, after the cuts arrived from the engravers, this was overlooked.

This issue of the NATIONAL PRINTER-JOURNALIST will be in the hands of every delegate to the National Editorial convention and if any of these wish photographic views, all such will be well served by visiting the gallery of the gentlemen named above.

The body type sizes of the Lowell Series, a handsome new face made by the Keystone Type Foundry, of Philadelphia and New York, is shown on a two page insert in the present issue. It is a remarkably clear and well cut letter and notwithstanding the fact that a great deal of matter can be put in a small space, it is easily read. While it is here shown purely as a body letter, yet in conjunction with the larger sizes from 24 to 84 point inclusive, which are about ready for delivery to the printer, it makes a very attractive and handy letter in the job room.

A good numbering machine is mechanically accurate and, when worked in a job, makes no skips of sheets In numbering by hand one forgets or blunders. The numbering machine is accurate and never forgets. The numbering machine is above all a great saver of time; it counts and numbers while the press runs. The Wetter Numbering Machine, manufactured by the Wetter Numbering Machine Company, 331-341 Classon avenue, Brooklyn, N. Y., has proved the test of years. It was first on the field, has been constantly improved and is now mechanically perfect. It is the only machine with a low plunger, and the only type high automatic numbering machine that can be worked on either a cylinder or platen press.

It locks up in a form like a slug or cut, and no attachments of any kind are necessary to operate. It is automatic from one to one hundred thousand, and will number anything. It is one of the most economical, practical appliances that can be bought, and should be in every printing office.

TIFFANY UPRIGHT

With usual enterprise the American Type Founders Company has reproduced the lettering at present so much in vogue with Tiffany and other leading engravers throughout the country. We show in this paragraph specimen lines of the 24 point size of this face which has been designated as Tiffany Upright.

Tiffany Upright
The Latest American Script Design

Printers will be quick to appreciate the possibilities of this face for use in printing wedding invitations, announcements, commencement programs, and coming just at the season when there is a particular demand for this kind of printing, there is no question but that Tiffany Upright will make a decided hit. It is made in 12, 14, 18, 24, 30, 36 and 48 point sizes.

"MAKE YOUR OWN TYPE"

The United Printing Machinery occupy page 386 of this issue to set before our readers their remarkable line of economizers. They send us the following memo, relating to their type machine:

"This machine in 300 days of 9 hours each will make 15,000 lbs. of type. A printer of national reputation, as a cost statistician, writes that job type as sold at present prices by the type foundries averages 57c per lb. for sizes ranging from 6 to 36 point. At this figure the product is worth $8,550. The cost statistician referred to, pays a lad $4.50 a week to operate his machine, others pay $6, $10, and so on, up to $25 per week. One lad is operating two machines for $12 per week. Add to the cost of labor as you find it the price of old type metal at 6c per lb., or new metal at 11c per lb. (a high figure) and you will find that the gross profit on a gross year's product at the highest rate for wages and highest price for metal is $5,600. Plenty of margin here to deduct incidental and fixed charges. We find a machine in Richmond running 18 hours a day, and another in New York. In these cases, it appears that the machine is a developer of profits "beyond the dreams of avarice."

What is a machine, so simple and automatic in its character, using less than ¼ h. p. worth? Would $5,000 be too much? Not for a typefounder, but too much for the printer.

Our policy is to sell to the printer, i. e., more machines at a lower price. The printer who will sign an agreement to use the machine and its product in his own establishment only can buy it at a very reasonable figure—one that will make it a profitable investment if he only makes 750 lbs. of type a year."

SANDERS ENGRAVING COMPANY SENDS OUT "AT HOME" INVITATIONS

Is Now Located in New Quarters at 221-223 Olive Street, St. Louis.

CUSTOMERS TO HAVE EVERY CONVENIENCE.

The building at 221 and 223 Olive street, which was sold last winter by J. T. McCasland to Lon Sanders, has been entirely reconstructed to be used as the permanent home of the Sanders Engraving Company. The location of this building is in the heart of the printers' district, which is very desirable for an engraving company, as a large percentage of the business comes from the printing firms and the idea was to secure a location which would be in close touch with the printing trade.

Since buying the building, the Sanders company has entirely changed the interior of the same, arranged to specially adapt it for an engraving and electrotyping establishment.

FLOOR SPACE LARGER.

The floor space in this building is about one-third larger than in their former location, which will give an opportunity for increasing their capacity in each branch of the business.

The Sanders Company is the largest engraving and electrotyping establishment in the West, employing over 100 men, and the volume of their business is of such size that they can arrange their men to work in separate departments, which gives the highest efficiency and is a great saving in the cost of producing such work.

They have placed a branch telephone exchange in the new Olive street building and as each department is now connected with a Bell telephone, their customers can easily talk to the superintendent in any department where they may have business, without loss of time.

Mr. Sanders is so proud of the new establishement that the company have recently mailed invitations to their customers to pay them a visit and go through the details of making engravings and electrotypes. They will gladly extend this invitation to any one interested in this line of business if they will call at the Sanders' building, 221 and 223 Olive street.—*St. Louis Chronicle.*

THE GOLDEN BOOK OF BUSINESS

Never before have printers received such a demonstration of printing as an art as that given in the Golden Book of Business which has just been mailed by the American Type Founders Company. Each leaf of the thirty pages of this notable work is printed on a different color of Old Hampshire Bond Paper, beautifully illuminated in colors and the pages abound with illustrations comprising about all the forms of commercial printing. Unquestionably this will prove of exceeding interest to every printer, being full as it is, of suggestive hints for treatment of just the kind of every day work which comes to the average printing office.

The buyer of printing whose announcements call for an absolutely plain type showing, will be more than charmed by the full page announcements appearing in this pamphlet. There is absolutely no embellishment about these special pages but they carry weight and are irresistibly attractive. Every shade of taste is represented, and the artistic printer will find the Golden Book of Business a veritable mine of wealth.

This work which is being done for the American Type Founders Company by Mr. Bradley will leave its impress on typography, the full influence of which will not be appreciated for years to come. Such exhibits can but give a wonderful impetus to printing and result in a general increase in the demand for varied forms of the kinds of publicity supplied by printers.

THE KEYSTONE IN DETROIT.

The Keystone Type Foundry, Philadelphia, with its New York Branch House and Selling Agencies in Chicago, Richmond and Atlanta, has leased the five-story and basement building, No. 43 Larned Street, West Detroit, Michigan, and has just installed a large and complete stock of Keystone, Nickel Alloy Type, Brass Rules, "All Brass Galleys," Leads and Slugs of its own manufacture, and in addition, an extensive line of the lateset and best of everything in the way of Wood Goods and Miscellaneous Printing Material.

This Foundry, which is especially noted for the excellence in design and quality of its goods, service and up-to-date advertsing, sees in Detroit a necessity for better service in supplying the many large printing and publishing houses in that city and vicinity, and we have no doubt that users of its products will welcome this new departure in their midst and show their appreciation by substantial support and encouragement.

RICHFIELD SPRINGS, N. Y.

Lackawanna Railroad

For your summer outing. Situated in the Otsego Hills, where the altitude is high, the air cool and bracing, the out-door life delightful; for those suffering from gout, rheumatism and nervous diseases the sulphur baths and springs are the most efficacious in the world.

A beautifully illustrated book of 128 pages describing these and other resorts along the Lackawanna Railroad, and containing a fascinating love story, entitled "A Paper Proposal," sent for 10 cents in stamps. The edition is limited. Write for a copy to-day to T. W. LEE, General Passenger Agent, Lackawanna Railroad, New York City.

B-C HALF-TONES
Are Easy To Print

Poor half-tones are *expensive* to print—they require an unwarranted amount of time in the "make-ready." The "make-ready" consumes the time of your high salaried pressmen and "ties up" your presses. *One* faulty half-tone may dissipate the profit on an *entire job.*

BARNES-CROSBY HALF-TONES ARE EASY TO PRINT

Why? They are made under right conditions; best materials—best apparatus—best workmanship. They are etched very deep—carefully re-etched—accurately blocked—and are *thoroughly tested* before leaving the shop.

With "B-C Quality" half-tones you are assured the best results at the minimum expense.

The Day and Night operation of our engraving department is another feature to be considered.

If you are interested in fine half-tone work write on your letter head for our "B-C Co. Budget."

Chicago New York St. Louis

Largest Engraving Concern in the World.

Wants and For Sale.

Advertisements will be inserted in this column at the rate of 25 cents a line, ten words to the line. Copy must reach this office no later than the 20th of the month preceding date of publication. Cash must accompany order.

FOR SALE—PRINTING MATERIAL

FOR SALE—The following fonts of 2-letter Linotype Matrices: Two fonts 6-point No. 2 with Gothic No. 3; three fonts 9-point Devinne series with Antique No. 3. The above matrices are complete and practically as good as new. Will sell at $40 per font. GENEVA PRINTING COMPANY, Geneva, N. Y.

MISCELLANEOUS

A COLD SIMPLEX STEREOTYPING OUTFIT, $17.00 and up, produces the finest book and job plates, and your type is not in danger of being ruined by heat. Simpler, better, quicker, safer, easier on the type and costs no more than papier-mache. Also two engraving methods costing only $5.00, with materials, by which engraved plates are cast in stereo metal from drawings, made on cardboard. "Ready-to-use" cold matrix sheets, $1.00. Come and see me if you can; if not, send postage for literature and samples. HENRY KAHRS, 240 East Thirty-third Street, New York.

THE VAN BIBBER ROLLER CO., Sixth and Vine Sts., Cincinnati, will give you *the best rollers* that can be made for any season or press. Our facilities are the best, and we use the latest Gatling Gun and compressed air apparatus. It pays you to have good rollers, and they count more in presswork than anything else. In writing or shipping, "Cincinnati" is sufficient. Everybody knows us.

YOUR
ANNUAL
INVENTORY

will show the exact condition of your business if written up on "Blanchard's Annual Tables for Printers and Binders." Sent postpaid on receipt of the price, $2.00. Address,

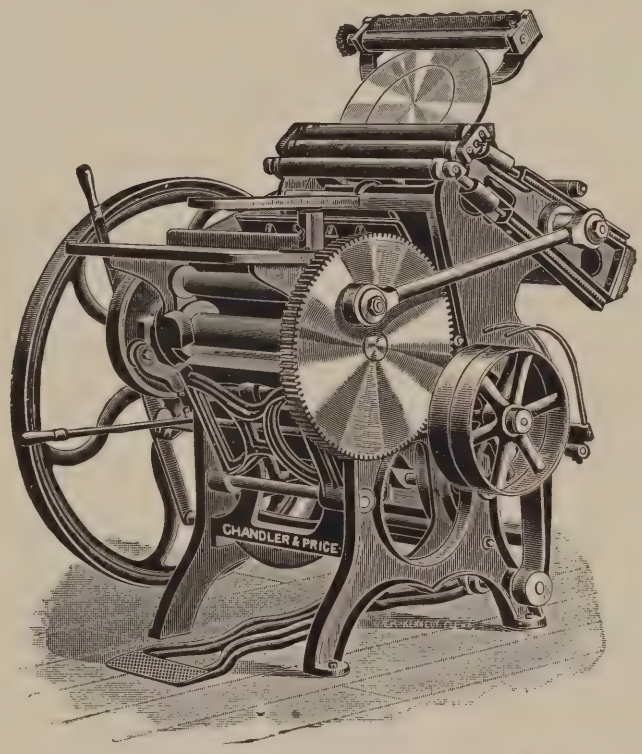
"*The* REASONS"

Perfection of Construction, proper adaptation to the work for which they are intended, *perfect adjustment, durability* and the *reasonable prices* at which they are sold (the latter being made possible by the large number manufactured), are the *Reasons* for the *World Wide Success* of the

CHANDLER & PRICE PRESSES



Their almost *Universal Use* by the *Best* and *Most Progressive Printers* all over the World, *Proves* that they are up to the *Highest Standard in every way*

THE CHANDLER & PRICE COMPANY

MANUFACTURERS OF HIGH GRADE MACHINERY

CLEVELAND, OHIO, U. S. A.

Do you still adhere to that old fallacy proverbial among so many printers

THAT one black is just as good as another if it's black, or one red is just as good as another if it's red? Just as though it did not take special treatment to qualify it for the various purposes for which it is used. Don't lose sight of this in the hurry; it will cost you money (in rejected work some day)—much more, probably, than the cost of a little good ink in the first place. The rapid growth of our business is good proof that our inks and colors are all that we claim for them—quality all through.

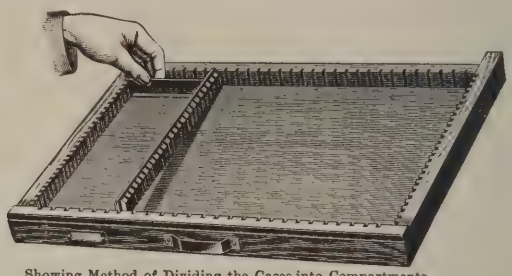
Hamilton Quality is the Best. *The Quality of others "is different."*

Hamilton's Time Savers and Worry Stoppers

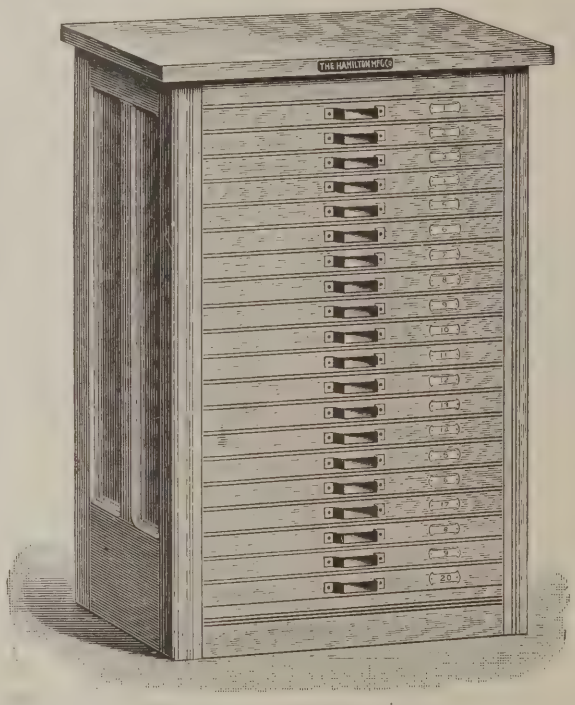
For the Printer and Advertising Manager

You can not afford to waste time hunting through a box or sorting over a pile of cuts on a shelf for that electrotype or wood cut needed at once, any more than you can afford to dig through a pile of letters or invoices when one of a certain date is wanted. A perfect system in letter-filing saves worry, time and dollars. Just so in taking care of those valuable HALF-TONES, WOOD CUTS, ELECTROTYPES and ZINC ETCHINGS. They run into money fast and you can save *money, time and worry* by adopting the HAMILTON INDEXED SYSTEM for the care of these valuables. Keep your mind free of details, stop that worry and put dollars in your pocket by purchasing the HAMILTON INDEXED ELECTROTYPE CABINET.



Showing Method of Dividing the Cases into Compartments to Fit each Cut.

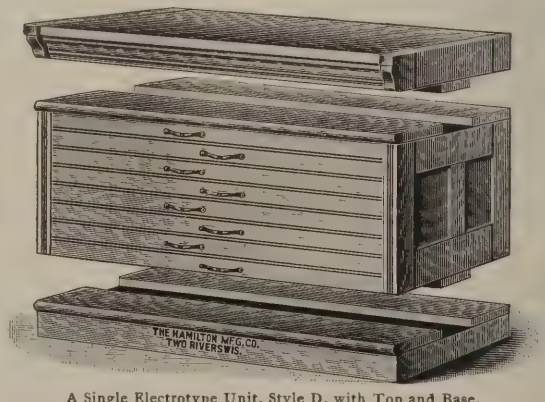
Steel Run Indexed Electrotype Cabinet.



Notice the perfect construction of the case; it can be divided into compartments to suit *any size* cut, and when wanted, can be found *at once*. We supply an Index Book with each Cabinet and cuts cannot be lost when using our system. We make these Cabinets in eighteen sizes, of steel run construction, and all the cases are made with *3-ply warp-proof, crack-proof, dust-proof bottoms*. They are the most perfect Electrotype Cabinets ever made. *Users in all parts of the world testify to this fact.* We also make the Indexed Cabinets with steel runs in the UNIT STYLE, each unit containing eight cases. You can purchase one or more units, one base and cap piece, adding to same as needed.

We are the ORIGINATORS of this style Cabinet. We do not imitate, we leave that to others. Why buy the imitation, when the original and tested article can be purchased at the same price?

Ask your dealer for Goods of HIGH QUALITY made at the HAMILTON WORKS.



A Single Electrotype Unit, Style D, with Top and Base. Occupies floor space 34½ x 20½ inches; height with top and base as shown, 18⅜ inches.

THE GLOBE ENGRAVING & ELECTROTYPE COMPANY'S

Scale of Prices for Half-Tones, Zinc Etchings, and Electrotypes.

Place the block or plate on the lower left-hand corner of the Scale, follow the curved line above the upper right-hand corner of the block to the columns of figures. On long narrow plates, not indicated on the Scale, the price is determined by the curved line directly above the extreme length of the cut. In estimating the cost of half-tones, add ¼ inch to the length and width for bevel.

HALF-TONE—From Photographs or Wash Drawings furnished. (without alteration or extra work on copy or plate) square finish, mounted on wood, charged as per first and largest figures on Scale; larger than 8x10, 15c. per sq. in.

Half-Tones, finer than 150 line screen, 25% extra.
Duplicate Half-Tones from original negatives, 25% less.
Retouching, altering or improving copies, or grouping photographs, 75c. per hour.
Vignetting, hand tooling or wood-cut finish, 75c. per hour.
Extra negatives for half-tone groups, ½ Scale price.
Anchoring Half-Tones on blocks, 10c. per anchor extra.
Extra proofs and proofs in colors, 60c. per hour.

ZINC ETCHING—From Black and White Line Drawings or Prints furnished.

(without alteration to copy or plate) mounted on wood, charged as per second figures on Scale; larger than Scale, 5c. per sq. in.

When a number of plates, under minimum size, are reproduced at one operation, the Scale price rules for the plate as etched, with an extra charge of 10c. each for blocking; minimum charge, 25c.

Reproductions from lithograph copy, script and penmanship, and etchings of color plates to register, 50% extra.

Reproductions of book, catalogue or music pages, over 50 plates, 10% less; over 100 plates, 15% less; over 200 plates, 20% less than Scale price.

Metal Base Cored, for either zinc or half-tone, 4c. per square in. extra; minimum, 25c.

Unmounted Plates, ½c. per sq. in. less than Scale.

ELECTROTYPING—From Cuts or Forms furnished.

mounted on wood, charged as per third and smallest figures on Scale; larger than Scale, 2c. per sq. in

Electrotypes from Half-Tones, 25% extra. Nickel-types, 50% extra.

Metal Base Cored, double Scale price.

Solid Metal Base, three times Scale price.

Mortising on Wood, outside, 10c.; inside, 15c.; on Metal, outside, 15c.; inside, 25c.

This Scale subject to revision without notice.

THE OPTIMUS
THE OPTIMUS

The bed drive of the Optimus is the only one unchanged and unchanging. It is the only one fully answering its purpose. Its pre-eminent fitness is established. It not only offers stability, but gives highest speed, smooth and easy reverse, absolute precision of movement, and constant register. It is the heart-beat of the press best fitted for the acme of production.

In no other way than by the ball and socket driving mechanism of the Optimus is it possible to make use of such an extremely simple and mechanically perfect motion. Nothing else is as good; nothing else can be as good. It embodies the vital, basic principle for most perfectly driving a printing press bed. In the ten years of its use there has not been an Optimus out of register between bed and cylinder, not a complaint made, not a cent expended.

THE OPTIMUS

SET IN BARNHART BROS. & SPINDLER'S OLD STYLE ANTIQUE NO. 6

The Monotype

The Machine for High-Class Work

¶ That the **Monotype's** versatility is one of its strongest features, is evidenced by the fact that the song of praise which arises in its favor is sung in many keys.

¶ Thus every **Monotype** user seems to find it peculiarly adapted to do just *his* particular line of work.

¶ The John C. Winston Company, of Philadelphia, for instance, as appears by the following samples and the accompanying letter, signal out for their especial commendation the **Monotype's** ability (as compared with that of other type-setting machines) to do the highest class of work. As they point out, the **Monotype** admits of over-running around cuts, and of the making of author's corrections at a minimum of cost.

Free Elective Courses.

Free Elective Courses, amounting to ten hours a week for one year, to be chosen by the student. It should be noted that a single study may be taken as a free elective, without electing the group that includes it, and any courses open as free electives, may be chosen without taking the remainder of the minor course of which they may form a part.

Tabular Statement.

The studies required for a degree may for convenience be tabulated as follows:

Required Courses (Five hours a week for One Year Each).

1 and 2.	3.	4.	5.	6.*
English. [*Two Courses.*]	Philosophy.	Science: Physics, or Chemistry, or Geology, or Biology.	Science, or History, or Economics and Politics, or Law, or Mathematics.‡	Matriculation French, or Matriculation German, or Matriculation Greek (or Minor Latin).†

Two Major Courses (Five hours a week for Two Years Each).

Constituting any one of the following thirty-four groups:

I—XV. Any Language with any Language§ (Fifteen Groups).	XVI. History with Economics and Politics.	XVII. History with Law.	XVIII. Economics and Politics with Law.
XIX. Economics and Politics with Philosophy.	XX. Philosophy with Greek.	XXI. Philosophy with English.	XXII. Philosophy with Mathematics.

* The College provides matriculation classes, five hours a week throughout one year, for those students who in the examination for matriculation may have omitted Greek, French, or German; students not wishing to study Greek may substitute the course in minor Latin for the examination in matriculation Greek. Attendance on these classes is not obligatory before the beginning of the junior year, the student being free until then to make good her deficiencies by private study. Minor Latin may not be offered for examination without attendance on the college class after the beginning of the junior year.

† A student choosing Latin as one of the languages of her Group, and not wishing to study Greek, may substitute for the year of minor Latin five hours a week for one year of post-major Latin, or of French, or of German, or of Italian, or of Spanish.

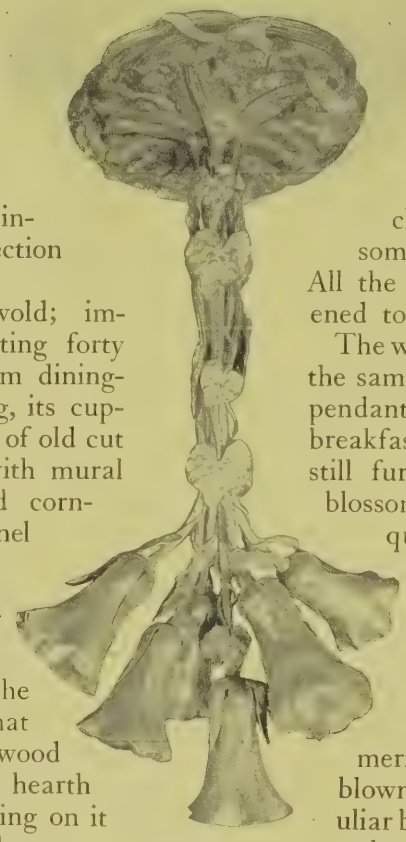
‡ Students electing minor Mathematics must also elect Trigonometry, two hours for one semester, or offer it for examination before entering the course in Minor Mathematics. Trigonometry may not be offered for examination without attendance on the college class after the beginning of the junior year.

§ For the purpose of forming a Group, Italian and Spanish count as one language; they may be combined so as to form a course of five hours a week for two years, as explained on pages 106 to 107.

THE MONOTYPE

mechanical inventions will, when given the leisure for culture, produce results as interesting and as original as any produced by the masters of the Renaissance. We are only at the beginning, and these illustrations are chiefly interesting as showing the direction of new thought and design.

But to return to Dreamwold; imagine a room capable of seating forty guests and still cosy. A farm dining-room in a house 300 feet long, its cupboards filled with the choicest of old cut glass and china, its friezes with mural decorations of farmyard and cornfield, while each individual panel in the tall dado below has on it, burnt and painted in conventional design, an ear of corn, a cluster of grapes, or other fruit, and so on around the room to the great fireplace that swallows cords of four-foot wood and cries for more. The tile hearth shows a grassy bank, and resting on it two large golden pumpkins whose tendrils climb over the fireplace facing and show, now a blossom, now a leaf, in the most naturalistic manner. The pumpkin gives the key to the room, and so it was again taken for a motif in the great central light that hangs over the table. A huge golden pumpkin with the light inside, it glows at night with all the mellowness of a Hallowe'en lantern, while around it and over it cling the vines and leaves that, hanging from the ceiling, support it and the cluster of golden pumpkin blossoms, each with its little light inside. All the colors are those of nature softened to the tone of the room.



Breakfast Room Chandelier

The wall brackets show the same idea, the same golden blossoms hiding in their pendants the lights within, while in the breakfast room the conceit is carried still further where a great cluster of blossoms hangs like an inverted bouquet over the table.

Sometimes, in an otherwise long and monotonous exterior wall a quaint freak is pardonable, such as the ship's lantern hung over the terrace doors, its skeleton resembling the earth's meridians and parallels, while the blown glass gives a succession of peculiar bulging forms that seem anything rather than stubborn glass. The door in the bottom is formed of a large turtle-back, while the fixture itself is in a soft grey green.

No form of electric bulb has yet been devised that in its unshaded form is beautiful. The imitation candle needs a shade, the ordinary bulb a covering that will give beauty. The shade then becomes a necessity and its own beauty must be its apology. The fixture should then be an ornamental piece of table sculpture or wall or ceiling decoration, but it must also always be an illuminating fixture. Perhaps the bubble blowing fixtures here illustrated are as near an approach to perfection as can be hoped for. For here the

Wood and Nathan Company,

Number One Madison Avenue,

New York City, N. Y.

Gentlemen:

Pages two and three of this insert are specimen pages, taken at random, of work done on our Monotype machines during the past two months.

In our long experience with type-setting machines, we find that there is a great field for the Monotype, and invariably use it on our high-class work, which allows for over-running around cuts, and authors' corrections at a minimum of cost.

Very truly yours,

THE JOHN C. WINSTON CO.

PRINTED ON NO. 1 PURE WHITE COATED PAPER, MADE BY THE CHAMPION COATED PAPER CO. HAMILTON, OHIO

BE A 20th CENTURY PRINTER

UNITED PRINTING MACHINERY COMPANY

A Company organized to manufacture and sell machines and appliances for reducing the cost of production of printing.

AUTOMATIC TYPE MACHINE.

Leased to printers (30 years, $2000), for making their own type from 6 to 36 point bodies; matrices ready for sale or rent for nearly all the standard and popular type faces and borders. The cost of type is about 6c. per lb., plus metal.

DUX FEEDING MACHINE.

The lowest priced feeding machines; effective on long and short runs of all sizes and kinds of paper.

AMERICAN ROLLER WASHING MACHINE.

A machine for washing rollers for cylinder presses. A great economizer in offices running five presses or over.

VICTOR STEEL DIE EMBOSSING PRESS.

Used by the leading steel die printers. Price reduced.

STEEN POWER COMBINATION PUNCH AND EYELET MACHINE.

The only machine that punches and eyelets at one feed. Price reduced.

SPARKS ROUND-HOLE MACHINE.

A small machine, using ⅛h.p., that does the work of five $200 punching machines, and better work.

SPARKS SLOTTING MACHINE.

Cuts slots in loose leaf paper, and card work of all kinds.

SPARKS CRIMPING MACHINE.

Crimps the binding edge of loose leaf papers, completing the operation without pressing.

DUNNING DECKLE EDGING MACHINE.

Puts a deckle edge on any kind or size of paper, after the printing. Cost of deckle edging is nominal.

MALEY IRON REGISTERING BLOCK.

Holds all sizes and shapes of electrotypes, registering them quickly and absolutely.

ELLIS FAC-SIMILE TYPEWRITER RIBBON HOLDER.

A small device ($10.00) for holding a typewriter ribbon on any job press, producing a perfect imitation of typewriter effect from type.

TYMPALYN.

A woven wire blanket filled with rubber, for use on printing press cylinders, resulting in a saving of one-third the time of make-ready.

PRINTING MATERIALS.

Everything of iron, steel, copper brass or wood, used in a printing office, at lowest prices.

EVERYTHING FOR ELECTROTYPING.

We manufacture the celebrated machinery of Geo. E. Lloyd of Chicago, and Lovejoy & Co., New York.

EVERYTHING FOR STEREOTYPING.

In this we excel. Nearly all the machinery used by Western Newspaper Union, A. N. Kellogg Newspaper and American Press Association, was made in our Geo. E. Lloyd factory in Chicago.

EVERYTHING FOR PHOTO ENGRAVING.

Complete plants, cameras, screens, lenses, etc., and all the machinery.

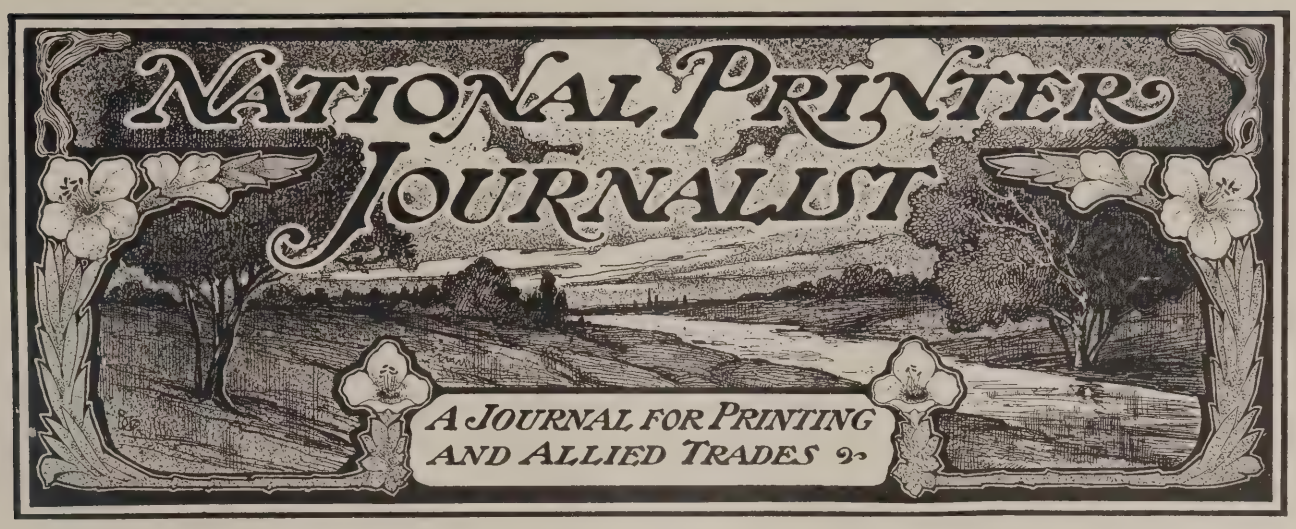
When new type is battered and the edges of valuable plates are badly worn do you not wish your presses were built with a device to hold up the cylinder and prevent its dropping in margins?

THE CAMPBELL COMPANY

HENRY A. WISE WOOD, President

334 DEARBORN ST., CHICAGO 1 MADISON AVE., NEW YORK



Volume Twenty-two Chicago, July, 1905 Number Seven

Addresses before the Twentieth Annual Convention of the National Editorial Association, Guthrie, Oklahoma, June 7-9, 1905.

ADDRESS BY W. W. SCREWS, PRESIDENT NATIONAL EDITORIAL ASSOCIATION.

DELIVERED BEFORE THAT BODY,—JUNE 7, 1905.

ONE-FIFTH of a century is not a long period in the calculation of time, when the vastness of the world and the volume of work accomplished is taken into consideration. The age of the individual must also be considered in the matter of computation of hours and days. When we were children it seemed that the space between one Christmas and the next was interminable. After arriving at man's or woman's estate we are scarcely through celebrating the advent of a new year, before its close is upon us.

Twenty years ago this Association entered upon its existence and we can look back upon the intervening time with great satisfaction because of the good that it has accomplished. If, in one-fifth of a century so much that is beneficial to our country stands to the credit of our Association, the most roseate picture can be safely drawn of its future. There were only a few who gathered at the call of our honored first President, B. B. Herbert, in the office of W. H. H. Judson, in New Orleans in 1885, to consider the advisability of organizing an Association for the advancement of the interest of the newspapers and which would bring together representatives from every State in the Union. To many, twenty years seem to have rapidly passed away. Many in that first meeting have paid the last debt of Nature. The two whose names have been mentioned are with us today in the enjoyment of vigorous health and promise of many years of usefulness.

BENEFIT TO STATE ASSOCIATION.

Who can estimate the value of the work launched at that meeting? The promoters could have scarcely dreamed of such results, for the membership has grown from scarce a baker's dozen to the great representation of newspapers which we have here today—making up an organization which is alive and active, with clear, resonant voice reaching to the utmost limits of this great country.

Every State Press Association has been strengthened through the instrumentality of the National Organization. It is true that some of them are not represented today, but our influence is growing greater year by year, and will result in the not distant future in every State answering "here" to our annual roll call.

THE PRESS WORTHY OF ITS FREEDOM.

There is an old adage that "self praise is half scandal," but how shall we, on an occasion of this character, avoid saying things in commendation of our work and our profession? From the foundation of our government one of its proudest boasts has been that we have a free and untrammeled press. Is it bordering on scandal, to say that the press of this country is conducted in a manner that renders it eminently worthy of the freedom and latitude it enjoys? Where there is one newspaper which you would not admit to your home circle, there are a thousand which can be read with satisfaction and interest to every member of the household.

In proportion to population there are more newspapers printed in the United States than in any other country and in many of the chief European countries put together. To go back three decades is sufficient to show the steady growth. In 1880, according to the census, the total number of publications reported was 11,314, in 1890 14,901, in 1900 18,226, and by the latest Directory returns, the number on January 1, 1905 was 20,963, and of these 337 are credited to the Territory of Oklahoma. A study of the newspaper portion of the census will show that in volume of business and increase of plants we are moving side by side with other great industries and in advance of many.

GOVERNED BY CONVICTION.

There is a tremendous rush, hither and thither of men seeking to advance their individual interests. There is at the present time greater activity of mind and body along commercial and industrial lines, than ever known before. Transactions that cannot stand the rigid test of honesty and correct dealing are daily reported. They involve, some in almost every branch of business, yet have you ever thought how seldom any of the newspapers of this country are mentioned as being derelict in this regard? Above all others this is an age devoted to material betterment of individuals and corporations. The desire of every rational being to rise in fortune and in the good opinion of friends and neighbors is well nigh universal. Few reach the highest point in the public eye through intellectual power and the great effort of the great mass of human kind is to accumulate property. This has been the trend since civilized human society was organ-

ized. Those who conduct newspapers are as human as the rest of the world, but experience shows that as a rule they are unwilling to surrender conviction and principle for pay.

SOME WHO LOWER THE STANDARD.

In saying this, however, it must not be forgotten that the methods of some newspaper publishers are not to be commended, and the fewer the imitators of that class, the better for mankind. Until quite recent years the object of all who published newspapers was to give news in unobjectionable form and to present views through their editorial columns, which appealed to judgment and reason. This is still the high mark of nine-tenths of those who are responsible for the effort required to put forth its product.

NEWS AND EDITORIAL—BOTH ESSENTIAL.

The furnishing of news is, of course, a feature without which no paper can achieve local or general success. Equally so is the fact, that opinionless newspapers are without any influence and incapable of aiding in the building up of a great sentiment or securing any measure of reform. A newspaper as one of our craft expresses it, "which can reach and convince the minds of even a small number of leading men, to help form public opinion in its responsible sources; must constitute a more effective contribution to the making of history than bawling all day long into the dull ear of a mob." This is a strong way of expressing the difference between public speaking and editorials, but it isn't far wrong. A man listens to a public speech amid hurrah and applause, and after he goes away he may remember an occasional expression, but most of the speech has been forgotten. If he sits down and reads a careful report accompanied by a thoughtful, fair and well written editorial, he remembers and is improved by it.

HON. W. W. SCREWS,

President N. E. A. Advertiser, Montgomery, Ala.

CRITICAL AND INTELLECTUAL CORRECTNESS.

As a rule there is always hurry in the newspaper office and mistakes may be expected. It is, however, doubtful if in any other calling there is so great a proportion of that which is critically and intellectually correct. In dealing with this phase of newspaper experience Dr. St. Clair McKelway says "the percentage of error in newspapers is less than the percentage of it in the speech of people, in their oratory or in the letter writing, and wonder should be that the errors of the press are really so few, considering at what long range it is served, by how many hands it is worked, and how quickly it is required to put forth its product. No equal test is applied to any other form of utterance. The oration is carecarefully prepared. The sermon can be a week or year in the making. The book or review is gradually created. The judge's charge or the court's decree is based on long settled authorities. The report or the editorials must be created at once and served at once. The large measure of correctness and the small measure of error in them are really extraordinary."

While the words of the great Brooklyn editor apply mainly to the daily paper, yet in a large measure they hit the case of the weekly. It often happens, that, just on the eve of going to press with a weekly, events transpire which must be written up by reporters and commented on editorially and there is then the same necessity for rapid work as in the closing hours of a morning or evening paper.

GENERAL TOPICS.

It is perhaps, the duty of the presiding officer in his remarks at the opening of our annual gathering to devote more time to consideration of every day practical newspaper life than to the line of thought that has thus far been presented. The fact of our meeting here in the heart of the great expanse of country which the wisdom of our forefathers secured a century ago, and the part that newspapers have played in its upbuilding is sufficient excuse for what some may term exploiting ourselves.

Before the hour of adjournment you will have the pleasure of listening to addresses and papers which will present for your consideration matters of vital interest to us all.

LIBEL SUITS.

All newspaper proprietors are more or less liable to libel suits—some perhaps more than others. In most of the States there is a disposition to allow proof of lack of intention to do injury or to secure revenge. In Alabama, for instance, before bringing suit the party claiming to be wronged must give five days' notice in writing of such intention and thus afford opportunity for public retraction. If the latter is done the only damage that can be secured is such as the plaintiff can show he has sustained. It would be to our common advantage if the Legislation as to libel in all the States was uniform.

COLLEGE OF JOURNALISM.

The College of Journalism, which a successful journalist proposed to establish, has been postponed until after his death. This, perhaps, is a wise step in view of the difficulties with which the proposition was beset. It can be more definitely established for the future by delay and its usefulness be more certainly demonstrated. Whether the saying "a poet is born, not made," can be paraphrased to suit the journalistic profession is true or not, it will find strong advocates until the proposed school proves to the contrary. Whatever may be the outcome, the movement is entitled to the hearty endorsement given it at our last meeting, and the great promoter to the thanks which were so generously extended.

ADVERTISING IN POLITICAL CONTEST.

More than ever before candidates for office are using newspaper space in which to reach the hearts and secure the votes of the dear people. There is good sense in a Republican setting forth under regular advertising contract in a Democratic newspaper such views as he may desire to impress upon those who would naturally be opposed to him and, for the same reason, the Democratic candidate can profitably seek the columns of the opposition papers. There is no call upon a party paper to do any more for its candidate than such editorials as the gravity of the occasion may suggest and certainly whole pages should not be surrendered merely to earn the appellation of being a party organ. Of course, space contracted and paid for should have such marks as to clearly show that it is a business arrangement on both sides. No editorial matter should ever be paid for, no matter how tempting the offer. It should represent the conviction and the policy of the paper and be absolutely unpurchasable. The most notable instance of using the papers, without regard to party, but on strict business lines was furnished last year in the marvelous campaign for Governor of Massachusetts.

IMPOSITION IN THE NAME OF CHARITY.

Possibly there is no man here who does not give, in space value to every entertainment in his community, gotten up in the name of charity, five times more than any other individual, and then publish a card of thanks in which profuse expressions of gratitude abound for all, save and except the man who is the most deserving of them all. A little business along this line would not be inappropriate; indeed, you are no more called on to give up your space for nothing, than others who receive pay for what they furnish. Charge your regular rates and donate to the cause as much as your inclination prompts you.

VISITING STATE ASSOCIATIONS.

In his address at the Hot Springs meeting Past President Tozier said "in my opinion much good work can be done and this organization strengthened by having some officer, or all of the officers were it possible, to visit the State and District Associations. The presence at a meeting of a State Press Association of an officer from the National body gives encouragement." It was my good fortune last October to attend a monthly meeting of the New England Suburban Press in Boston, and after my experience with that intelligent and wide awake body of men the conviction was forced upon me that it would benefit any member of this body to visit them and hear their discussion and learn of their practical business ways. If all of our State bodies could meet oftener than once a year it would redound to the advantage of the members and while any officer of the National body who may visit a subordinate one is sure to be benefited thereby, it is more than probable that the visited body will also derive a benefit therefrom.

TRADING STAMPS VENTURE.

It is not out of place to refer to a journalistic venture of the past year, which had the appearance of being a freak and which ended in a very decided and proper failure. It was the effort to establish a paper based solely on the vicious system of trading stamps. It is bad enough for reputable business houses to give countenance to such a system—it is bad beyond expression for a newspaper to have so poor a foundation on which to stand. The intelligence of the community in which the venture originated gave it the death blow and it is to be hoped that one trial will be sufficient for all time to come. The great moral from the newspaper standpoint to be drawn from this venture is the fact that the public pays no attention whatever to advertisements in a newspaper, no matter how good, for which they do not pay. A paper to be seriously considered must be one for which a man is willing to pay. Some of the brightest men of the newspaper world were employed on this paper, there was plenty of money behind it and a splendid news service, yet it failed because it was not based on paid circulation.

MINIMIZING THE PUBLICATION OF CRIME.

Annually a band of good women, members of the Society of Friends, meet in Baltimore. During the sessions they adopt a form of letter which is sent to many, if not all, of the newspapers in the land urging that crime be reported in the most minified form possible. In some particulars my personal inclination is in accord with theirs, but there are crimes which the papers must exploit even to the minutest particulars. This does not mean murders, burglaries and the life, but breaches of trust, embezzlement, robbery by men (and occasionally a woman) in high places. In an address recently in Trenton, N. J., a distinguished clergyman said "the world is made up both of good and evil. The newspaper in performing its function of narrating the history of the day, is obliged to take cognizance of both. However, we may regret the existence of evil, it cannot be said that it would be best to exclude the account of it from the public press. Publicity is a foe to crime. It is one of the means by which the way of the transgressor is made hard. It is a part of the retribution of sin. Many a grave wrong has been unearthed by the faithful reporter, and the criminal thereby brought to the legal condemnation he deserved.

"Thus the newspaper treatment of evil becomes a safeguard to society. On the other hand, it must be remembered that danger may lurk in the treatment of crime and vice by the press. While nothing but praise should be given to those papers which deal with evil simply, briefly and as an aid to justice, there are no words too strong to express the loathing with which we should regard that socalled yellow journalism which by sensational exaggeration caters to the morbid appetites of a degenerate portion of the public. It is the duty of the pulpit to condemn and of all right-thinking persons to exclude from their homes those papers which by such means exert a debasing influence upon the morals of the young.

NEWSPAPER READERS AS JURYMEN.

While on this subject of crime publicity, it is well to mention another phase of it, which appeals directly to every newspaper publisher—it is the effort so often made to exclude from juries, men who have read something of the matter about which they are to sit in judgment. This is virtually a premium to ignorance in the make-up of juries, for it is a safe proposition that all intelligent men of this day read newspapers. Consequently a jury made up of non-newspaper readers is a jury remarkable only for the density of the ignorance of those who compose it. Because you read some of the details of either a civil or criminal matter it is no indication that your mind is so warped one way or the other that you will be unable to reach a correct conclusion after the matter has been presented to you in due and legal form while sitting as a juryman. It ought to be the earnest desire of all connected with the administration of the law to secure the most intelligent consideration of all matters presented, yet it must be said that it is too often the case that studious effort is made to exclude intelligence from the jury box. In most of our States intelligence is a prerequisite to voting, it being deemed essential to minimize the evils of voting ignorantly and indiscriminately. Is not the sitting in judgment upon the life and property, equally as important as voting, and intelligence equally as essential?

In the celebrated McCue trial in Virginia a few months ago, one of the jurors when impaneled was asked of he had formed an opinion on the case, to which he replied that he had formed an opinion "on newspaper evidence." He was asked next: "In your present state of mind could you go on that jury starting out with the presumption of innocence in your mind?" He answered: "I could not say that I could, for the reason that I have read this evidence. Naturally there is some impression on my mind, but I cannot say that it is biased or prejudiced." When the case was appealed the highest court in Virginia held, in regard to this juror, who was accepted by the trial court: "If the courts take an extreme position upon this subject and hold that every opinion shall work a disqualification for service as a juror, the administration of justice will be confided, not to the most intelligent but to the most ignorant of our citizens." In this instance the Virginia Court of Appeals took the right position. If the courts generally will exercise discrimination in the selection of jurors the administration of justice will not suffer.

THE NEWSPAPER AS A MORAL FORCE.

It is as a moral force that the thoroughly honest newspaper and its utterances are most powerful and in a measure a necessary part of our lives. A distinguished member of Congress a year or two ago said that "if it were not for the newspapers the jobs which would go through Congress would be terrible to contemplate," and, he added, that if there were no newspapers he would be afraid to trust himself alone in the House of Representatives for fifteen minutes. The mere fact of publicity is, of course, a great deterrent of evil, but followed up editorially a great public sentiment is aroused, which finds expression at poll places, and defeat of men who indulge in shady transactions. It is beyond question that the fear of exposure from an independent press is one of the safeguards of our government.

It was Jefferson who said "when the press is free, and every man able to read, all is safe." And it has been widely published that he declared further, "if it were left to me to decide whether we should have a government without newspapers, or newspapers without a government, I should not hesitate to choose the latter." Who shall say that he was not right? Fortunately there has not been, and we hope never will be, an occasion when the correctness of his statement will be put to the test. A land without a free and independent press would be a land of ignorance, of tryanny and of degradation. As long as the press is free, fearless and incorruptible freedom is assured. While we have newspapers in whose columns will be found exposures of fraud and corruption and criticism of public servants, that long will we have free government and a free people. A handcuffed press would be a greater menace to liberty than any tyrant. As moulders of public opinion, as representatives of the mightiest force, always excepting the pulpit, as conservators of the honor and dignity and welfare of the American people, newspapers and those who conduct them are entitled to honor and commendation.

THE GOOD ACCOMPLISHED BY OUR ANNUAL MEETINGS.

The more frequently men can be brought together from widely separated points to consider matters of mutual interest, the more certainly will the feeling of good will as between man and man and of affection for our government be increased. From the first meeting of the National Editorial Association until this hour, good work has been going on in the way of wiping out sectional feeling and of strengthening the ties of personal friendship. No man has yet dared to raise his voice in our midst in favor of, or against, any political party. Not one word has been uttered in condemnation of or ridicule of any section of the Union. Of what other great National organization can as much be said? Even some religious bodies in the last twenty years have indulged in

scenes that were disgraceful because of semi-political discussions. We set such brethren a good example in our capacity of peacemakers. Every political shade of opinion and possibly every kind of religion has an adherent in our ranks, yet who of you could tell from anything that falls from the lips of any member of this Association during any of our business sessions what may be his political or religious opinion. At a meeting of the members of a purely political Association composed of editors and held in Washington a few months ago, Mr. J. A. Sleicher, President of the Association said "Since the close of the Civil War we have not had an era of better feeling between the press and people of the North and South than exists today. Much of this has been brought about through the influence of the non-partisan National Editorial Association and the social meetings which diversify its annual conventions." Yearly in such meetings as this, we exemplify the correctness of that statement.

We are strenuous advocates in our papers of those things which we believe to be right, but whether we win or lose in the great contests, after the battles of the ballots have been fought, we are more intensified in the feeling of pride that we are American citizens and ready to do and dare in defence of the honor and integrity of the American Union.

POSTAL LAWS AND POLICIES.

BY HENRY A. CASTLE, EX-AUDITOR FOR THE P. O. DEPT.

TWELVE years' service in responsible positions connected with the United States mail system, and more than fifteen years' practical acquaintance with newspaper work, both as editor and publisher, enable me to fairly appreciate the relations between the postoffice and journalism.

Those relations are intimate and important; they are interesting and interdependent; they are inevitable and inescapable. Without the postoffice the newspaper would be impossible; without the newspaper the postoffice would be mostly unnecessary and wholly unintelligible.

Consequently, the postal service, which touches more or less directly every man, woman and child in the Republic, has a mission and meaning to the journalist. Hence, Postal Laws and Policies have for newspaper men, in addition to the intelligent interest they feel, as citizens, in all that affects the public welfare, a peculiar significance, as affecting at many points, their own business—promoting or retarding it, according to the wisdom with which they have been framed and the equity of their administration.

The proprieties of this occasion restrict the otherwise unlimited scope of the topic assigned me, mainly to the consideration of such laws and policies of the postal service as most nearly affect the business in which the members of this association are engaged.

At the outset we are confronted by a dilemma. An Englishman being once asked to describe the manners and customs of the Spaniards replied: "Manners they have none and their customs are beastly." To the close observer our postal laws are crude, illogical and inconsistent, while the policies are shifting and uncertain—picturesque, variegated and altogether undeciperable.

The United States postal service is the greatest business enterprise on earth. Our Post Office Department is greater in the number of its employes, in the multitude of its operations and in the aggregate amount of its financial transactions, than all the other executive departments combined. Official estimates place 302,500 names on its pay-roll; its mail routes and carriers not only reach the city home and the remotest frontier village, but now go daily to the farmhouse; its receipts and payments, including the money-order system, will this year foot up over twelve hundred million dollars.

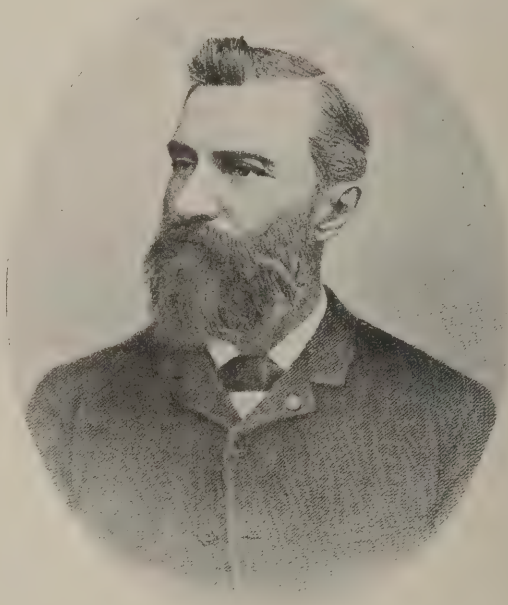
All this vast business, with its complex ramifications, is conducted by a hap-hazzard organization, built up under laws which have never been systematized, which resist all attempts at codification, which consist, in fact almost wholly of incoherent provisos irregularly attached to annual appropriation bills. These brief clauses recklessly enact and carelessly repeal, until a jumble of uncertainties has resulted.

And the policies under which those confused, conflicting laws are administered, are, in many cases, only the recorded whims and splurges of successive bureau and division chiefs, which have solidified by time and have been sanctified by tradition until they are accepted as revealed gospel, without reference to whether they are legal and rational, or merely the product of egotism, audacity and indigestion.

Nevetheless, the "laws" are there and the "policies" are at work. The three-fold miracle which perpetually astonishes those who have studied the real situation is, that such beneficent results can flow in a stupendous stream from so imperfect a source; that so few fatal injuries are inflicted by the manifest errors in management, and that the explosion which must inevitably come, unless the vital defects are cured, has been so long delayed.

At several important points, the postal laws and the Departmental policies which are supposed to conform thereto, directly concern those who are engaged in the newspaper business.

The most obvious and important point of contact is that relating to the classification of mail matter. Second-class rates were established for the benefit of legitimate newspapers and periodicals, having in view the educational influence of their circulation on the whole people. The rate of one cent a pound fixed by law for this class of mail matter was only a fraction of the known cost of handling and transporting the same. Hence it was the duty of the Department to carefully guard this special privilege.



HENRY A. CASTLE,
Washington, D. C.

But during a series of years abuses had grown up. Many publications which had no real public purpose and were in no sense periodical literature, had been admitted to the privilege, until second-class matter constituted 70 per cent of the whole weight of mail transmitted, but yielded only four per cent, of the revenue.

About five years ago Third Assistant Postmaster General Edwin C. Madden inaugurated effective measures for curbing this costly abuse. He was sustained by the heads of the Department, but has been antagonized at every step in the courts by parties interested, until by a series of decisions he finally won a substantial victory. Several expensive excrescences have been cut off. The book privilege, under which publishers secured second class rates for standard works of fiction, history, etc., because they were issued periodically, has been reduced to a minimum; the news-agent's privilege of returning unsold books by mail at pound rates has been taken away; many law-evading schemes have been excluded from the mail at "pound rates."

Some of the contentions of the Department have not been upheld by the courts, and a few matters are still pending. Meantime, notice is given that yet more advanced steps are to be taken in ruling on the admissibility of certain suplements, etc., and there are prospects of bitter controversies in the early future.

Upon the whole the Department has been generally sustained, thus far, by the press and the people in its crusade. Some adverse comment has been made by interests which have been injuriously affected, and there has been an occasional warning against the danger which arises from establishing a precedent of "bureau-made law." It is this latter consideration which will appeal most forcibly to thoughtful journalists. The tendency of executive authority is toward the usurpation of power. Mr. Madden may not be satisfied when he has gone far enough, or he may be succeeded by an official ambitious to eclipse his performances.

The assertion of the right to so construe a vague and ill-digested statute as to cripple a legitimate enterprise, is dangerous. The law should, after mature consideration, be made specific, so as to fully protect the government, and at the same time be fair to private interests involved—then faithfully executed. The press of the country will be safe in advocating such a change of law and policy as will, along these lines, commit more to the written page of the enactment, and less to the uncertain discretion of Department officers.

While the "classification" authorities are thus extending their claims to decide what periodicals shall be deprived of the pound rate of postage, another bureau, that of the Assistant Attorney General of the Postoffice Department, seems to contemplate the assertion of a still more dangerous prerogative. It is now, apparently, about to be accepted as a duty of this official to decide what class of advertisements newspapers and magazines shall publish.

This species of censorship began with the meritorious crusade against lotteries. The law prohibiting the circulation of newspapers containing lottery advertsements accomplished its purpose by killing off that nefarious business. But the law was by no means suffered to lapse. Its functions were extended so as to cover gift enterprise, dot-counting and guessing-contest notices. Now we are told that executive construction is to go further and eliminate objectionable patent medicine advertisements, and all which appear to be inserted for the purpose of defrauding the public. It is intimated that cases will be taken up individually by the law officers and when supposed violations of law are apprehended the offending publication will be prosecuted in the courts or excluded from the mails.

Our paternal government is doing the people a lot of good in warning them against storms, supplying them with garden seeds, and protecting them against swindlers. The "fraud order" has heretofore been aimed at the swindler himself, and not at the periodical which has innocently published his advertisement. If we are to be protected against fraud in the advertising columns, why should we not, after a while, invoke protection against falsehoods in the editorial columns, against deception in politics and heresy in religion disseminated by the periodicals of the day?

There is a narrow line somewhere between the freedom of the press guaranteed by the Constitution, and that executive usurpation which precedes the downfall of liberty. Fortunately, we can rely upon a vigilant editorial instinct to jealously guard that line from insidious encroachments.

Rural free delivery brings some new factors into the newspaper problem. To say the least, it requires, in many cases, reorganization and readjustment. In some localities the wails of the abolished postmaster and of the diminished country storekeeper, fill the air, but the rural service goes on expanding with rapid strides. It has manifestly come to stay, and both the city and the village editor must revise his arrangements in accordance with its demands.

The circulation of many daily papers, particularly in the smaller cities, will be enormously increased. Small dailies ought to be possible hereafter, in towns which are not, of themselves, able to support them. And the average weekly must, it would seem, promptly meet the changed conditions, by a marked advance in enterprise, vigor and news-gathering industry. The rural delivery service is certain to bring a marvellous quickening of the national intelligence, the benefits whereof, the newspapers which are alive to its tendencies, will get the lion's share.

The policy of the Department as to mail transit on fast trains is of vital importance to the newspapers. While that class of mail only pays one cent a pound and letters over fifty cents, they both go on the same trains and they must continue to do so if the press is to fulfill its mission as a disseminator of the news. Some reformers propose that all except the letter mail be sent on slower trains, at less cost for railroad transportation, and there is a merit in the suggestion as to merchandise parcels, books and even magazines. But from the beginning, it has been the Department's policy to place letters and newspapers on the same basis as to speed of transit.

Even in the slow old days of 1840, the annual report of the Postmaster General stated that sufficient attention had been given by him to the manner in which newspapers and other printed matter were conveyed by mail, to satisfy him that it was radically defective. No supervision or power of punishment, exercised or possessed by the Postmaster General, was adequate to prevent, on some occasions, the canvas bags in which printed papers were stowed away from being left behind, so long as they were carried separately from the letter mails, or on the outside of coaches and stages. To prevent the evil in some degree, he provided in contracts awarded on the main routes to the West, that, on the outward trip, no passengers should be carried in the inside of the mail coach, but that it should be devoted exclusively to the mails; and on similar routes along the seaboard the same restriction was applied in both directions. He expresses the belief that the enforcement of the contracts in this respect will insure the safe conveyance of newspapers as far as they travel on these routes.

If, before the days of telegraphs or even of railroads, the people demanded their favorite journals by the speediest conveyance available, there is little fear that they will now consent to any adverse discrimination. The fastest trains are none too speedy to satisfy popular impatience for the news—indeed, all the typical "fast mail" trains are avowedly run for the benefit of newspaper readers, and their schedules are fixed accordingly. It would be a fatal step backward to detract anything from the rapidity with which the welcome messenger of the world's doings flies from publisher to patron.

It is a standing grievance against the Department, cherished by the printing trade, that it furnishes envelopes at cost and prints thereon the return request, free of charge. The explanation of this radical departure from normal, governmental policies, and unfair competition with private industry, is, that it facilitates the return of unclaimed letters and saves clerk-hire in the Dead Letter Office.

But in spite of the inducements offered, and the large aggregate loss to the printing houses, probably not one letter in ten thousand passing through the postoffices is enclosed in a government "request" envelope. Hence, the relief afforded is inappreciable though the damage done is considerable. A far more effective remedy would consist in formulating an iron-clad rule that no letter should be mailable, without extra postage, that did not show, in writing or in print, on the envelope, the name or address of the sender. Then, let the Department furnish the stamps and allow private enterprise to do the rest. The present gratuity enures almost entirely to great business firms who neither need nor appreciate the favor. The plain people get none of its benefits and printers, employers as well as employed, stand the loss.

No class of business men suffer as much as the publishers of newspapers and periodicals from the lack of a safe, convenient method of making small remittances through the mails. Postal money orders are inconvenient; postage stamps are a nuisance; paper currency is unsafe.

Innumerable would-be subscribers are deterred by the absence of a fit medium, always ready and unquestionably secure. The purchase of a money-order involves a trip to the postoffice, with tedious formalities and vexatious delays. In spite of the trouble caused 25,000,000 people buy money-orders for less than $2.50 every year; if each spends half an hour in the process, there is an aggregate loss of time equal to the labor of five thousand men for one year. Uncounted millions of people refuse to suffer this loss, and refrain from ordering the book, or the paper, or the package they would gladly purchase if the facilities were at hand.

A scheme has been devised by which an intending remitter can, at any time, if he has any money, take from his pocket-book a piece of currency, and by a stroke or two of the pen, transform it into a check having all the important safeguards of the postal money-order. This device is called the post-check. It was invented by Mr. C. W. Post, of Michigan, who has voluntarily assigned his patent to the government.

A bill is pending in Congress, favorably reported by the Post Office Committee, to put this simple plan in operation. The bill provides that all one, two and five-dollar notes printed in future shall contain certain blank spaces, but will pass from hand to hand like other Government currency, until they come into the possession of some one desiring to send money through the mail. Then the blank spaces are filled with the name of the payee and his address, and a two-cent stamp is placed in a space provided in the bill for that purpose. The scheme would not in any manner change our financial system—it would merely change the form of small notes.

Under the proposed law the process of redemption, cancellation and re-issue would be simple. The post-checks are to be paid at any national bank or money-order postoffice, where they will at once be cancelled and withdrawn from circulation. They will then go forward as "mutilated currency" to the United States Treasury for destruction and re-issue. The two-cent stamp would pay the entire cost of printing and distributing the bills.

The boon of a cleaner paper currency of the smaller denominations is one of the incidental advantages which the people, especially of the West, would have reason to hope from the post-check plan. The constant flow of cancelled bills to the Treasury and their redemption with new, clean currency would ensure a much better average condition of the circulating medium, which is now, in too many cases, dirty, ragged, utterly disreputable and perhaps infected.

This device has numerous other advantages which account for its popularity as soon as understood. State and national commercial bodies, postmasters' associations and farmers' clubs have heartily endorsed it. Thousands of newspapers, quick to see that, aside from its great public benefits, it had a special value to them, have urged its adoption, with scarcely a dissenting voice. But the bill hangs fire in Congress. A distinguished Senator who represents half a state and a whole express company, fears it will injure his business and the legislative pack-pedal is applied, after encouraging momentum has been gained. It is a sad admission to make, that if the public-spirited inventor, instead of donating his invention to the public had capitalized it for many millions and distributed a portion of the stock judiciously among profit-sharing statesmen, he would probably have made more rapid progress in securing the adoption of his meritorious scheme.

The newspaper fraternity has thus, at several important points, a direct professional and business interest in the laws and policies which control that gigantic enterprise of transportation, finance, commerce and education we call the "postoffice." This interest is sufficient to warrant—nay, to demand, a careful scrutiny of its operations.

Above and beyond this, the public press owes to its vast constituency, a solicitous study of all its varied functions and the fearless exposure of its numerous defects.

The entire people are more interested in the postoffice than in any other governmental agency. It is going to force itself on their attention more and more vigorously. Within five years it will be a leading feature in economic discussion —possibly, a dominant political issue. Nothing rasps the public mind like a deficit. We shudder to contemplate a probable shortage in government funds this year, of $30,000,000. We will quake when we realize that half of this is due to waste and graft in the postal service, where the deficit is officially estimated at nearly $15,000,000, when it ought to yield a handsome profit.

Defects of administration due to imperfections in the law; extravagances of management due to lavish appropriations; working of cross purposes due to antagonisms and jealousies of Department officials, are a few of the drawbacks to the efficiency of the service, and some of the causes of its unnecessary losses. It is growing so rapidly and extending into so many new fields of useful activity, that the perplexities and the perils increase every year. And they are by no means confined to the administrative functions.

Such a vast financial institution necessarily involves a great and complicated accounting system. This system has been in operation since 1836, but it still has so many imperfections that it is a constant source of uneasiness. Official reports have pointed out some of its defects, but the remedy, depending wholly upon legislation by Congress, has not been applied.

Presumably, there is a double audit of all government receipts and expenditures, but, literally, under present conditions, ninety per cent of the postal transactions have no examinations whatever in the Postoffice Department. Accounts come direct from 70,000 postmasters to the Auditor's Office.

As to one large item, aggregating $40,000,000 a year paid to railroads for transporting the mail, the accounting office issues warrants based solely upon the certificate of the Postoffice Department that the amounts certified are payable.

No accounts are kept to show profits or losses of the various features of the system. The entire volume of the public business of the country transmitted through the mails, including correspondence, documents and even heavy cases of freight, is carried wtihout any compensation to the postal revenues, but at how much loss no man has ever known.

Second class matter is carried by thousands of tons at one cent a pound, while the transportation costs eight cents.

The money-order system is conducted at a loss of over two million dollars per annum.

Practically, all classes of mail matter are carried at a loss except letters and postal cards, but how much the losses amount to are questions which the accounting office has never attempted to answer. Yet in any private enterprise the figures would be so segregated as to give accurate information of such details.

No account has ever been kept with the Postoffice Department of the stamps and stamped paper furnished to it by contractors. The amount received by postmasters in payment of postage on newspapers, magazines, etc., is collected in cash, but no satisfactory means of accounting for this cash has been devised.

These brief statements only indicate some dangerous features of current methods. They have been commented on by successive accounting officers, but no attention is paid to the warning by Congress which alone can supply a remedy. That remedy would consist of a thorough reorganization of the accounting system, with new and stringent laws to govern it at many points, and a largely increased force to carry out this legislation.

I can justly lay claim to a modest share in the movement for organizing this national association, which originated at my home in Minnesota twenty years ago. I have occasionally participated in its deliberations and I have always watched its work with admiration. You have done well to establish a standing committee on postal affairs. That committee will grow, in the near future, to be a leading factor in your achievements. It will be a very busy committee. The subjects considered by it will be the principal but all-sufficient incentive for your conventions. As an old friend and a sincere well-wisher I earnestly commend to you a timely preparation for the serious duties which will soon devolve upon you, in conserving your own and the people's vital interests in the United States postal service.

PRESS MUZZLES IN PENNSYLVANIA.

BY J. S. BENN, CITY EDITOR, NORTH AMERICAN, PHILADELPHIA.

IT was a compliment, indeed, for your chairman to refer to me as a Kansan. Former Kansan I believe was the expression he used, but once a Kansan, always a Kansan. It was in the "Sunflower" State that I learned to stick type and from work at the case was graduated to the editorial end of the newspaper business. If the chairman had also referred to me as being formerly of Oklahoma he would not have been mistaken, for on the day the Cherokee Strip was opened, I galloped fifteen miles on the back of a pony from the state line at Cimarron and took possession of one of the finest quarter sections of land that was thrown open for settlement. While I did not, unfortunately, maintain possession long enough to prove up on the claim and incorporate myself as a citizen of the Territory, I have never forgotten that I rode among the pioneers who settled this soil and first broke the sod of its prairies. It will always be a question in my mind whether I did not make a mistake in reversing the famous injunction—"Go West, young man"—by turning my back upon Oklahoma and its mother state, Kansas, even although it was for the purpose of returning to my native commonwealth, the great Keystone State of Pennsylvania.

When your President invited me to address the Editorial Association on the subject "Press Muzzles in Pennsylvina," I was glad to accept because of the opportunity presented to enlighten the newspaper men of other states as to the causes which lead up to the stringent libel laws at present on the Pennsylvania statute books and their effect upon the press, or at least the daily press, of the State.

The causes were political, and go back nearly a decade to the tempestuous struggles which agitated Pennsylvania in the endeavor to throw off the domination of the Quay Machine. It is not my purpose to discuss Pensylvania politics, but it would be impossible to intelligently consider the development of the present libel law without harking back to events that led up to its enactment.

It is history, with which you are all familiar, that U. S. Senator Matthew Stanley Quay, in the declining years of his life was made to reap a partial harvest sown by the political oligarchy of which he was chief, in a series of tremendous scandals growing out of Machine Maladministration of State affairs. Scandal after scandal arose concerning the State Treasury, Quay's grip upon which was the keystone of his political power. Successive legislatures reeked with bribery charges concerning elections for United States Senator. Finally the long list of disgraceful episodes culminated in the arrest and trial of Quay himself on the charge of criminal conspiracy in wrecking the Peoples' Bank of Philadelphia. The cashier of this bank, to whom Quay had sent the famous telegram, "Buy me 1,000 shares of Metropolitan Traction Stock and I will shake the plum-tree," meaning that he would order the State Treasurer to deposit sufficient of the State's money in the bank to protect Quay's stock account, committed suicide, following the example of a Quay State Treasurer, who took his own life after flying into exile to prevent the secrets of the State Treasurer's office from becoming known.

JAMES S. BENN.

Now Senator Quay had another and entirely different side than that which was presented to the public as a masterful, unscrupulous, political boss. He was a home loving man and a scholar, his library being one of the best in the City of Washington. In the last few years of his life he gave many evidences of being tired of the ceaseless struggle for political supremacy in which he was engaged. Callous as he outwardly seemed to all criticism and attacks and unmoved by the repeated scandals that fastened themselves upon his political mantle, his friends knew that he smarted under the fire to which he was subjected. He became solicitous for the character he should hand down to posterity, and anxious that before his career should close there should be a change in the estimate in which he was held by the public.

These longings of Quay's better nature manifested themselves time and again in his public utterances. Some of the speeches which he delivered in his last campaign for election to the United States Senate were almost pathetic in their appeal to the public to judge him by higher standards than those which his past political career had set. Among other things, Quay resolved that he should have a biographer, one who would dwell upon and illustrate his great achievements in the Senate; as the National Chairman in the Republican campaign which elected Harrison; as a literary student; and in every respect in which the name of Quay might be handed down to posterity as a shining example of greatness. Such a biography was actually undertaken, in fact is now under way, and will, no doubt, some day make its appearance from the pen of no less a personage than the present Governor of Pennsylvania, Samuel Whitaker Pennypacker. When he began the biography at Quay's suggestion, Pennypacker was a judge of the courts in Philadelphia. He is a distant relative of Senator Quay's, being a second or third cousin on the maternal side.

Quay also determined upon making Pennypacker Governor of the State, although the effort to do so almost disrupted the State political machine. In addition to honoring the man chosen to be his official biographer it was Quay's purpose to install a Governor who would be a credit to Quay himself, and thus contribute to the public esteem which he hoped to arouse in his last years. For Judge Pennypacker was a man above reproach, whose personal and official integrity was beyond question.

In Pennypacker, Quay had a Governor of whom he was absolute master of thought, word and deed, and a biographer pronounced in his views of the Senator's immaculate greatness. Every man in Pennsylvania knows of the adulation which Pennypacker heaped on his cousin, the Senator, and the great admiration, almost veneration, in which he held him as a statesman and public official. Some of you may have heard some of Pennypacker's expressions in reference to Quay, such as "Quay is greater than Webster or Clay." This astounding statement was reiterated publicly until the Pennsylvania public was convinced that Pennypacker really believed it. His public speeches and written documents are full of similar tributes to Senator Quay. For instance, in a public speech before the Penrose Club in Philadelphia he declared:

"In manliness and intelligence and in a rare order of ability there has never been in public life in America Matthew Stanley Quay's equal." He has declared that Quay was the greatest statesman ever produced by Pennsylvania, the greatest member of the United States Senate, and given vent to so many other grossly exaggerated estimates of the Senator that the people of Pennsylvania would not be surprised if their Governor should issue a proclamation declaring that Quay was the greatest man the world ever produced.

In his public eulogy of the memory of Senator Quay, delivered before the Legislature on March 21, 1905, among other things he said:

"In the capacity for the building up and maintenance of political forces, and for the application to the accomplishment of public ends, it may well be doubted whether the country ever before produced the equal of Mr. Quay."

"To an extent equaled by few other American statemen, he permanently affected the development of our national life. For a quarter of a century no Republican could have been elected President of the United States and no national policy have succeeded without his consent."

In concluding his eulogy, the Governor pathetically chided the State for not giving due credit to the character and achievements of his great cousin. He said:

"Will Pennsylvania never fully understand how large in character as well as in strength was this statesman she has lost! The time has gone by and the harvest we might have garnered, had we only known, will never be ours. It is all too late for us to reap, too late even to bend over as did the archdeacon to kiss his hand and acknowledge our shortcomings, but we still may implore for him that peace which we ever denied him while he was on earth."

During the campaign which resulted in the election of Pennypacker for Governor, the newspapers, more in the spirit of jest than otherwise, made play upon Pennypacker's adulation of Quay and his expressions concerning the great statesman. Pennypacker himself did not escape comment and

criticism and the method by which his nomination had been purchased in the state convention by Quay's agents were especially made use of during the campaign.

The result was that Pennypacker, who had sat for twenty years unmolested and uncriticized on the bench, was stung to fury. It cut him to the bone to have himself caricatured in the public press, and it hurt him even more, that Mr. Quay should have his name smirched by the old scandals, and the first pages of the biography, still under his pen, should be so flatly contradicted.

It was no surprise, therefore, that his first public declaration after induction to office should be a tirade against the newspaper press. In a message submitted to the Legislature on January 20, 1903, he gave vent as follows:

"Experience has shown that men are neither strong enough nor virtuous enough to be entrusted for any length of time with unlimited and irresponsible power. Institutions of the highest utility when established often become dangerous to the community. Even the church has been at times used for the worst of personal ends.

"The doctrine of the liberty of the press, conceived at a time when it was necessary to disclose the movements of arbitrary power, has become in recent days too often a cover for base and ignoble purposes, and, like the sanctuaries of old, a place of retreat where any wrongdoer may secure immunity from punishment.

"Sensational journals have arisen all over the land, the owners in concealment and the writers and purveyors undesignated, and they have thriven by propagating crime and disseminating falsehood and scandal by promulgating dissension and anarchy, by attacks upon individuals and by assaults upon government and the agencies of the people. They are a terror to the household, a detriment to the public service and an impediment to the courts of justice.

"The time is near at hand and may have already come when society will find means to prevent this development of vicious life which constitutes the most conspicuous of existing ills. I know of no reason why Pennsylvania, which has been foremost in so many directions in the past, should not take the lead in a needed effort to improve manners and morals by such a reform. Our Constitution imposes responsibility for the abuse of the liberty of the press, and I suggest for the consideration of the Legislature whether or not it would be well to extend to such cases the law of negligence as developed by the decisions of our courts, so that there should be liability in damages for the physical and mental suffering caused by publications made without reasonable care.

"I further suggest an inquiry as to the propriety of requiring the names and residences of the owners of newspapers to be published with each issue. It may be that on consideration the Legislature in its wisdom will be able to devise other means which, while protecting journals of good repute, will tend to eliminate the unworthy."

If Pennypacker's mandate to the Legislature was not dictated by Quay, it was at least heartily concurred in by the Senator and the political machine at large, who saw an opportunity to place an effective curb upon the growing menace or criticism and exposure by the public press. Accordingly a bill was drafted and passed by the Legislature. It was as follows:

"From and after the passage of this act, civil actions may be brought against the proprietor, owner, publisher, or managing editor of any newspaper published in this commonwealth, whether the same be published monthly, bi-weekly, or daily, to recover damages resulting from negligence on the part of such owner, proprietor or managing editor in the ascertainment of facts and in making publications affecting the character, reputation or business of citizens. In all civil actions which may be hereafter brought against the proprietor, owner, publisher, or managing editor of any newspaper, published in this Commonwealth, whether the same be published monthly, bi-weekly, semi-weekly, or daily, and whether such owner be an individual, partnership, limited partnership, joint-stock company, or corporation, if it shall be shown that this publication complained of resulted from negligence on the part of such owner, proprietor, manager or editor, in the ascertainment of the facts or in the publication thereof, compensatory damages may be recovered for injuries to business and reputation resulting from such publication, as well as damages for the physical and mental suffering endured by the injured party or parties; and whenever in any such action it shall be shown that the matter complained of is libelous, and that such libelous matter has been given special prominence by the use of pictures, cartoons, headlines, displayed type, or any other matter calculated to specially attract attention, the jury shall have the right to award punitive damages against the defendant or defendants.

"From and after the passages of this act, each and every newspaper published in this commonwealth, whether the same be published monthly, bi-weekly, semi-weekly or daily, shall publish in every copy of every issue, on the editorial page, in a conspicuous position, at the top of the reading matter, the name of the owner, owners, proprietor or proprietors of such newspapers, together with the names of the managing editor thereof; and if said newspaper or newspapers shall be owned or published by a corporation, then the name of the corporation shall be published, together with the names of the president, secretary, treasurer, and managing editor thereof; and if the said newspaper or newspapers shall be owned by a partnership or partnership limited, then the names of the partners, or officers and managers, of said partnership or partnership limited, shall be published in like manner."

The previous libel laws on the statute books were similar to most of the libel laws in the other states of the union and fully conserved the interests of the public, as was proven by many years of experience, and were not unduly harsh upon the newspapers. Any publisher will see at once the wide opportunity that is opened by the Pennypacker bill for the harassment of the newspapers. In addition to the legitimate damages to which a libelled individual is entitled under the libel laws based upon the old common law of England and the Constitutions of a majority of the states of the Union, this bill practically invited litigants to contest for smart money on the top of compensatory damages for actual injuries to business and reputation. It provides damages for physical and mental suffering. Moreover, to cap the climax, it establishes the right to recover punitive damages in case prominent headlines, pictures, cartoons or other special matter for illustration have been used.

Was there ever a crook who robbed a house, snatched a woman's purse, looted a city or state treasury or sold out his constituents in a City Council or State Legislature, who has not smarted under the publication of the truth concerning his rascality? Yet Mr. Pennypacker's libel law goes so far toward destroying the legal axiom, that it is a publisher's right to plead the truth in defense against civil action for libel, that any of these crooks, from housebreaker to State Treasurer, can claim smart money for the exposure of their crookedness in the newspaper press.

Blackstone says in discussing the civil libel law that where there is no actual injury the law gives no remedy, yet Mr. Pennypacker creates an injury offhand. If the crook is known to be such by the whole community, if it is impossible for him to lose a penny in value or a shred in reputation, he still has the anguish of physical and mental suffering to value high in demanding damages from the newspaper which, in printing the news or from a sense of public duty, has shown him up as a crook.

Mr. Pennypacker also indicts the newspaper press at large for carelessness or negligence in the ascertainment and publication of the news. He has repeatedly stated his belief that newspapers are not conducted with proper care and therefore his bill proposes to regulate the matter by placing the burden of proof upon the publisher that every "i" be dotted and every "t" be crossed, or else be obliged to pay damages. Under the wide caption of negligence in the ascertainment and publication of facts he has created as good cause for damages against a newspaper as the average libel law considers malice to be. Plainly speaking, Mr. Pennypacker had opened wide the door for every man with a fancied grievance, every shyster lawyer who can obtain a client, and every crook who has suffered mental anguish over the exposure of his crimes, to take a fling at the newspaper press of Pennsylvania.

Needless to say the press of Pennsylvania, conscious of its constitutional rights, refused to be awed into submission by Mr. Quay's governor and biographer. Regardless of party or factional lines, papers of the state denounced the bill. I am proud to say that I do not know of a single instance in which a newspaper in the state deviated from the straight course it was sailing despite Mr. Pennypacker's smart money libel law. Cartoons, against which Mr. Pennypacker was particularly incensed, continued to be published daily and in their news columns the papers continued to call a spade a spade and a thief a thief. In signing this libel law Governor Pennypacker honored the newspaper with which I am connected with several references in a long statement to which he appended his signature. The *North American* had a few weeks before printed a cartoon showing the governor stand-

ing on a stool alongside a printing press, about to thrust a crowbar into the flywheel in order to stop the press. Referring to this cartoon the Governor said in his message:

"A cartoon in a daily journal of May 2 defines the question with entire precision. An ugly dwarf representing the Governor of the Commonwealth stands on a crude stool. The stool is subordinate to and alongside of a huge printing press with wheels as large as those of an ox-team, and all are so arranged as to give the idea that when the press starts the stool and its occupant will be thrown to the ground. Put into words, the cartoon asserts to the world that the press is above the law and greater in strength than the government.

"No self-respecting people will permit such an attitude to be long maintained. In England, a century ago, the offender would have been drawn and quartered and his head stuck upon a pole without the gates. In America today this is the kind of arrogance which goeth before a fall."

The Governor also took occasion to criticise members of the clergy who had raised their voices in denunciation of the existing evils in Philadelphia and Pennsylvania. He said:

"Bishops, too, hurry into print without investigation, and with only such information as comes from muddy sources, to express their disregard for those whom the people have entrusted with authority."

Further along in this remarkable document, he deplored the cartooning of his cousin, Senator Quay. For several years Cartoonist Nelan had depicted Senator Quay as an owl, and the public seemed to think it was not unflattering to represent the Senator as such a wise bird, but not so the Governor. Referring to this series of cartoons in The *North American,* he stated:

"It is sad to reflect that some historian of 500 years hence, misled by what he reads, will probably study the statesman whom we know to be able and strong, generous and kindly, keeping his promises and paying his debts, and depict him with the features of an owl, and the propensities of a Nero or Caligula."

The Governor in this paper also held out the threat of suppression against newspapers. He cited the fact that during the War of the Rebellion a New York newspaper which forged a Presidential proclamation was suppressed. This, Mr. Pennypacker thought, was a precedent which, he said, "No doubt will be followed in the future should occassion demand it."

The Governor's personal estimate of newspaper men in general was aptly illustrated when he compared them with garbage men. Justifying the application of the law of negligence to newspapers he said: "It applies to the gatherer of garbage. Why not the gatherer of news?"

In concluding this remarkable paper, which abounded with statements similar to those I have quoted, he stated:

"This much is certain. Since the laws of God and nature are immutable and inexorable, unless means are found to uproot some of the tendencies of modern journalism, confidence, already shaken, will be utterly lost and the influence of the press will be gone forever."

Two years passed and our worthy Governor must have ground his teeth to observe that in no material respect were the newspapers brought under submission, nor had any suspended publication. Senator "Quay had passed from the arena of statecraft," to use the Governor's expression, making the Governor's duty as biographer more important and increasing the necessity, as the Governor viewed it, of finding some means to curb the publications that placed such light estimate upon the record of the great statesman. Accordingly on the convocation of the last session of the Legislature he sent another history-making message to the Senate and House of Representatives concerning the iniquitous press. This time he delivered his venom almost solely at the newspaper with which I have the honor to be connected. In his message he said:

"Further legislation is required for the protection of the commonwealth from the injury to her reputation and the disadvantage to the administration of her affairs which arise from the prevalent dissemination of scandalous inventions concerining her officials and their efforts in her behalf.

"We are compelled to recognize that since the cry of the liberty of the press became a Shibboleth, the relation of the newspaper to the government and the people has been very much modified.

"No ruler now sits by divine right in his palace and writes letters de cachet to confine his subjects in some bastile at his own will, and on the other hand the newspaper will sometime become, not the representative of the people seeking information for their good, but a commercial venture, the main object of whose existence is to aid its patron in selling his wares, as anxious to attract attention of the statesman, the rules with respect to them must be changed with the change in conditions.

"There is a daily newspaper of wide circulation, published in the City of Philadelphia, ostensibly by a Pennsylvania corporation.

"A twenty-story building on the main street in the heart of the city, largely rented out for offices and other business purposes bears its name.

(At this point I might say that this statement by Governor Pennypacker should render him liable to prosecution for negligence in the ascertainment of facts, because The *North American* is published in a twenty-one-story and not in a twenty-story building.)

"Since its control of what had been a useful and venerable newspaper began, every Mayor of Philadelphia, every Governor, every United States Senator, save one who has only been in office four weeks, and every Legislature of the Commonwealth, have been subjected to a daily fire in its columns, not of adverse comment but of invented untruths.

"Recently in one of the States an offended citizen who shot and killed an editor, was tried for murder and acquitted. Lawlessness is the inevitable result of a failure on the law to correct existing evils.

"How can the right of a newspaper to publish the facts concerning the government and its officials and to comment on them even mistakenly be preserved and the continuance of intentional fabrication in the guise of news be prevented? The Constitution in the same section provides for freedom of speech as well as freedom of the press.

"Under the English common law, when a woman habitually made outcries of scandals upon the public highways to the annoyance of the neighborhood, she was held to be a common scold and a public nuisance. Anybody may abate a public nuisance, and she was punished by being ducked in a neighboring pond.

"To punish an old woman, whose scandalous outcries are confined to the precincts of one alley, and to overlook the ululations which are daily dinned into the ears of an unwilling but helpless public by such journals as have been described, is unjust to both her and them.

"I suggest the application of this legal principle to the habitual publication of scandalous untruths."

Appended to the Governor's message was an act suggested for passage by the Legislature, which he designated, and has since been known throughout the State, as "Exhibit A." I might add that since that time the Governor has been referred to by some of his friends of the newspaper press as "Exhibit B." The salient points of this new bill are as follows:

"Any six persons, citizens of this Commonwealth, may present a petition to the Attorney General, setting forth the designation of the publication, constituting such a public nuisance, the fact that it habitually publishes and disseminates falsehood, defamation and scandal, giving the particulars and details in at least three instances.

"Thereupon, if in the judgment of the Attorney General there shall appear to be a prima facia case established, it shall be his duty to file a bill in equity in the name of the Commonwealth in the Court of Common Pleas, praying for the abatement of the nuisance.

"Upon the trial of the case, if the evidence shall show the habitual publication and dissemination of false, defamatory or scandalous statements or representations, whether in the form of news, comment or illustration, it shall be the duty of the Court to make a decree directing the suppression of the publication."

It was undoubtedly an oversight on the part of the Governor in framing the bill that he did not provide the punishment suggested in his message to the Legislature, that editors of offending newspapers should be strapped in ducking stools and immersed in the nearest ponds.

This bill was not given consideration by the Legislature, many of the members of which had suffered sufficient odium by the part they took in the passage of the Pennypacker libel bill two years previously. So our Governor must content himself to rage in private at the press, and especially those members of it which fail to give due reverence to the occupant of the gubernatorial chair, or make any other than favorable allusion to the unsavory record of his departed cousin.

There never was a Quay or Pennypacker born who could form or invent a measure that would restrict the liberty of

the press or hamper it in its constitutional right of public utterance. If the Quays of Pennsylvania desire unsmirched biographs let them leave behind them records free from stain. If the Pennybackers of Pennsylvania or any other commonwealth in this union desire to effectually muzzle the press they must hie themselves to some other land than that in the fundamental law of which it is written, "The freedom of the press ought not to be restricted."

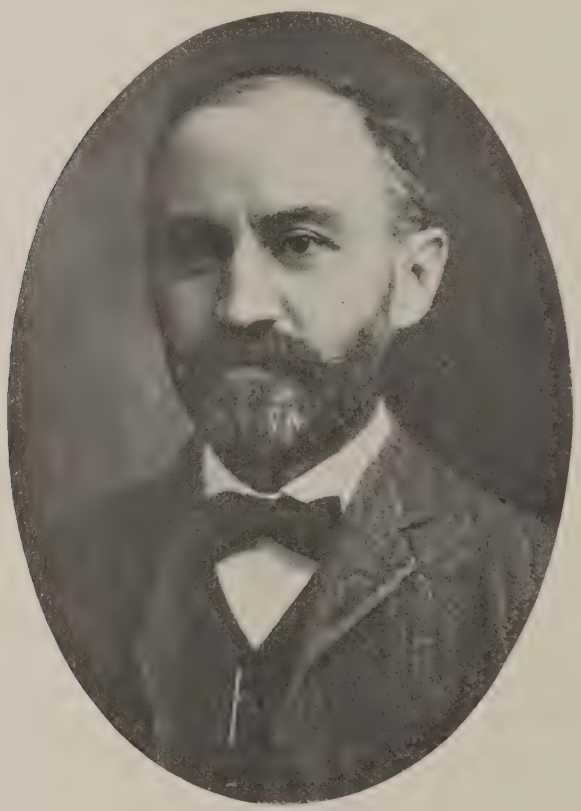
THE SOCIAL SERVICE OF THE PRESS.

BY JAMES H. POTTS, TROY, N. Y., TIMES.

THE press should feel the obligation to social service. This is self-preservation. What would the Press be without society? "As idle as a painted ship upon a painted ocean," or as a Yankee ship upon the trading ocean.

Far be it from me to concede that the Press performs no social service. Its service in this direction is vast. Its very existence is a social service that is supreme. The best thing about humanity is that it is social, and the chief witness to that society, as well as the greatest factor in preserving it, is the Press.

Conversation is the string on which the beads of society are grouped. Conversation—from the murmur of the insect through the jabbering of the monkey to the grunt of the man or the chatter of the woman. And the Press is conversation magnified—the gossip's megaphone. Lyman Abbott left the pulpit because he could talk louder through the Press. So did E. P. Roe. So did Henry Van Dyke. So have and will others.



JAMES H. POTTS.

The patron genius of the Press is not Gutenberg, although he got types ready to stand together, but Harvey, who proved circulation. Where is the man who could live without the newspaper? In my schoolboy days my teacher called attention to the psychological accuracy with which the opening chapters of "David Copperfield" were headed. First chapter: "I am born." Second chapter: "I perceive." Dickens might have followed this with a chapter entitled: "I inquire for the daily paper."

The first social service which the Press performs is to be society's champion, its mouthpiece, to tongue out a message of defiance that will penetrate the cobwebs obscuring the entrances to every mythologic cave.

The next social service of the Press is in declaring the unity of life. The newspaper's leaves are for the healing of the denominations. There is a centrifugal force trying to hurl things apart. The newspaper is Sir Isaac Newton declaring the attraction of gravitation. Why is it that the fall of the apple in Eden meant banishment with a flaming sword, while the fall of the apple in our orchards means domesticity beside a blazing fireside? It is because we barrel our fall apples. And the newspaper is the cooper. In the sheet seen in the vision as let down from heaven there was nothing common or unclean. In the sheets printed on earth everything is common, although some things are unclean. The man or woman who is to give the neck to the hangman is taught by the newspaper that he or she has a part in the social system. Even the bridge party may feel that the filmy strands of its cables have a place in human engineering, whether or no they will carry safely over Jordan. Into the Valhalla of the newspaper every deity is welcomed.

The Press is a social servant because it is everybody's servant. The objector may say: "There is so much in the newspaper that does not ring my doorbell, that does not appeal to me." But his is not the only house on the block. The sun shines into the alleys, or ought to. Ours is the motto of the old saint, and nothing human is alien to us. The first step in conversion is the recognition of individuality. How does the church recognize individuality? By inviting everybody to come to church. How does the Press recognize individuality? By inviting everybody to the newspaper office? No. By going into everybody's home. What a recognition of personal dignity to have one's name in the newspaper! Talk about the great American privilege being the ballot box? Not at all. There idiots, criminals and often women are excluded. But they get into the newspapers. Everybody's shoe, slimy or clean, hobnailed or of slippery smoothness, can tread the great white walk of the newspaper sheet. More than one dramatic press agent has said to us: "Speak well of me if you can. Roast me if you must. But, for heaven's sake, don't ignore me." We are hearing nowadays that the sovereign remedy for social ills is publicity and that the street lamp is the brightest Pinkerton of them all. And the newspaper is everybody's publicity—St. Peter at the open gate of the heaven of recognition, with his key lost.

A characteristic element in the social service of the Press is that it exalts the present time. We are told that today is "the heir of all the ages." But there is a disposition to appoint for that heir an older guardian who shall spend the youngster's money and direct his practices. No sooner has the setting sun with his face red from his contact with earth's atmosphere bowed himself out of the sky with a lingering farewell than the newspaper turns toward the east to welcome the new god of day. I know of nothing more inconsistent than for a newspaper to contribute to a monument fund. The publisher in New York who printed daily at the head of his editorial columns a text from the Bible was derided in newspaperdom. But the journal which published entire the revised New Testament as soon as the revision was completed was extolled by every paragrapher for its "scoop."

Like everything else that is great and good, the Press has a tendency unduly to magnify its office. In recognizing the individual it should not rob him of his individuality by doing all his work for him. The plea for the social scheme of government is that it protects the individual. The anti-social philosopher contends that the strong man has the right to rise. The big fellow agrees to that, knocks down his weaker brethren and makes steps of them. That is individualism top-heavy. But education is wiser. Leaving the adult alone it develops the children and saves the race. So the newspaper will make a mistake if it is too many kinds of an errand boy. It takes many units to make society, and the newspaper, though the most powerful, is only one and should keep off the others' grass. Consider then the limitations of the Press as a social servant.

The Press should be a prophet and not an organizer. The brand-new Elijah, Mr. Dowie, who preaches his people's sermons, signs their deeds and spends their money, is a social pervert. His is autocracy and not democracy. The newspaper that organizes crusades, draws bills for Congress, starts funds for one purpose or another and is the custodian

and almoner of contributions is like the mother who in excess of devotion or of restlessness does her child's work. Let the newspaper be the world's narrator, and, by generalizing from the facts, be the world's guide. But let it leave to the people the organization of their public activities, so that the newspaper proprietor may take his own part as a citizen, and no more, in the active benevolences and philanthropies of life. I do not question the motive of this diversified energy, which may be sincerely charitable or merely self-glorying. I mean that if my right hand does my left hand's work, there will be imperfect growth and atrophied power.

Nor should the newspaper in its zeal for service be a policeman. This much vaunted detective work of newspapers does not show keeness but a lack of clear vision. The mistress of the house may be able to cook better than the hired servant, but will be foolish if she dons the cap to do the cook's work. The result of newspaper bluecoatism is seen in the communications exposing or alleging official delinquency and ending: "Be sure not to publish my name." The day will come when newspapers will refuse to print communications anonymous to either the publisher or the reader.

Nor do I think the newspaper should publish the last word in the domain of the expert. Properly it may present special articles in every field of exploration, but beyond declaring first principles it should not prescribe instead of the doctor or argue for the lawyer or analyze for the chemist. "Or preach for the preacher?" When theology becomes an exact science, so that any two theologians agree as to its content, I will say "Or preach for the preacher." But in fact theology is the science of the newspaper. "The voice of the people is the voice of God," and the newspaper is the voice of the people.

Do I regard the social service of the Press as complete and satisfactory? I do not. The Press is performing for society a grand office—the grandest outside of the nursery. But, like many of the people, its daily work is as a custom regulated by the cash register and recorded by the man on the bookkeeper's stool, or is done for the lust of business. What I hope for the Press is that it may perceive its mutual relationship in society and remember that the editorial "we" is subservient to the all-seeing eye.

I shall take time to mention only one more aspiration for the Press in its social service, but that one is all-inclusive. I wish for the Press that it may cease to be narrow and learn to be broad. I am a believer in partisanship, and I believe in selfishness, but in both as means to an end, and that end the rejoicing in all things. The lawyer-like advocacy, that sees no evil in its own case and no good in the other, is petty and has come to be a sort of fetich, a thing of habit, so that the newspaper editor is much more magnanimous in his private than in his public judgment. To say that the sharply defined currents are more useful than the sea is to say that the waters are valueless when we cannot see them washing our own shores. I hope that when the recording angel takes his summer vacation his place is not filled by the shade of some political editor. I am willing that the newspaper should lie occasionally—not too often—if it will lie, as does Nature, with the grandeur of sympathy. That great editor, William Shakespeare, was always diligently searching out for the soul of goodness in things evil. The golden age will come when whatsoever things are lovely and of good report will be the stock in trade of the lovely and good reporters. As a social servant the Press should be like the sun in the sky, central to the system, a token of life's unity, every man's lamp, the light of and for today, the exposer of corruption but demanding assistance for its removal, the fountain of illumination but no peddler of matches, the medium of vision, but still the lens-maker's help and not his supplanter, as constant as the day, as genial and all pervading as the spirit of good.

NEWSPAPER DIPLOMACY—TELL THE TRUTH.

BY WM. SOUTHERN, JR., THE JACKSON EXAMINER, INDEPENDENCE, MO.

A NEW diplomacy has taken its place in the courts of the world. Its exponents are the statesmen of the United States and its cardinal principle is that truth stands first, the greatest weapon of the diplomat, the only method of dealing with nations worthy of the greatest among nations.

When Spain was pressing the hand of tyranny upon Cuba at our very doors and war was raging merciless and barbaric among those people of the West, American Ambassadors said plainly at Madrid that this war must cease, that Spain must bring peace to this colony or we would interfere. Trained in the old school, Spain measured this message by the rules of usual diplomacy. To her, words were meant to conceal the meaning of the Diplomat. Our Diplomacy meant that words were intended to express directly and exactly our purpose. The world knows the result. The American Diplomacy means what it says and says what it means. In no other country are men of usual avocations capable of filling diplomatic positions without special training. Because our policy is to tell the truth and express in vigorous language just what we mean. The usual definition of diplomacy is "Dexterity or skill in securing advantage," but we have made another definition, "The art of stating plainly and truly what is desired."

We are accustomed to agree that the game of politics, as played before us, is a game of dishonesty and fraud. Perhaps often that is true, but there is always the knowledge that the mass of the people desire that the right shall prevail, that their officials shall deal fairly with them and tell them the truth. Theodore Roosevelt was elected President of the United States by overwhelming majority, the votes being cast by members of every political party, because the people believed that he was honest, because they believed that he was true to official trust and because they believed at all times and under all circumstances he would tell them the truth. Joseph W. Folk was elected Governor of Missouri last November, an unknown and untried man, because his record as Prosecuting Attorney in St. Louis was such that the people believed he would always tell them the truth, that he would always be honest and faithful to his duty. These two men, one a President and the other a Governor, are of the new diplomacy, which represents the United States' way of doing business. They represent the overwhelming sentiment of an educated public which prefers right to wrong and is not slow to see and reward men who measure to its standard.

Men who publish newspapers are considered the proper timber from which to make Diplomats. It may be because every editor from the weakest weekly to the yellowest city daily feels entirely competent to discuss every phase of the government and to pass upon treaties and declare war. It may be also because the man who successfully conducts a newspaper must needs be a diplomat of the highest quality. The fact remains, however, that in our business, diplomacy is at a premium and tact a necessity. Not only does this apply to the editorial conduct of the paper, but in the counting room. In the business management of a newspaper diplomacy is required to secure business. I believe that the very highest diplomacy there, as elsewhere, is to tell the truth. To me it is a very simple conclusion that the man who buys advertising is entitled to know just what he is getting. The advertiser has a right to know how many copies of your paper will be printed containing the announcement for which he is paying. And at this point the diplomat of the business office has but one safe measure, tell the truth. You may lose one piece of business, but you are establishing a confidence which will be of value, you are building a character without which success in our business is impossible. We often hear that the good will of a newspaper has sold for more than the plant itself, and this good will is but another definition for character and the paper with such a valuable character has been builded by a diplomat who told the truth.

All of you understand that the discussion to this point has followed lines about which there can hardly be another opinion. But what about applying this measure of success to the editorial and local columns of every newspaper? A witness in court is sworn to tell the truth, the whole truth and nothing but the truth. The newspaper editor is not on oath, but if he tells the truth he may perhaps at times be allowed to tell not quite the whole truth. We can not always tell the whole truth, even to our wives. All of us may say of long experience, "I speak the truth, not so much as I would, but as much as I dare, and I dare a little more as I grow older." It is the rule in all city papers of standing that every reporter must write the exact truth for the news columns and any wilful variation is sufficient cause for dismissal. This is more and more the rule in the newspaper

business and should be in every office from which a newspaper is published. Then let us apply this rule in the editorial columns, the columns where the editor argues, dresses up his facts, marshals his figures and calls for a decision. Here is the diplomat at work. Even in the United States there are those who follow the old idea of diplomacy, while, I am glad to testify, there are more who follow the new and that the number is increasing.

Accepting this high standard for the editorial room will you not agree with me that a newspaper which declares itself for any political party, right or wrong, must be classed outside the high ideal desired. When I hear an editor declare that he always supports his party ticket whether he likes it or not, I look toward the source of the official printing and find out what brand of politics dominates the official power. It is no longer a mark of credit in our state for a man to declare that he never scratched his party ticket. In this country where every school boy may become the president (unless he happens to have been born a Democrat), we are entitled to the truth about everything, and especially about our politics.

WM. SOUTHERN, JR.

It is my peculiar belief that a newspaper can live and prosper without public patronage. That a newspaper cannot afford to be the vehicle of official publications at the expense of its honesty and self respect. That a newspaper cannot afford to suopress truths about men of its own party for the sake of public support paid by these same men when elected to office. That a democratic thief is no better than a republican thief; and that a democratic or republican newspaper is under no moral obligation whatever to support candidates of its party when it knows them to be dishonest or unfit.

I wish to say here that I do not agree with those party papers, published usually in country districts, or with those statesmen seeking office, who declare that all city newspapers are venal and purchasable; that the public press of the great cities of today is corrupt in the extreme. The metropolitan press is directed on the same basis as the country press. Its owners are interested in the business of the cities in which it is published and its views are honestly taken as those for the best interest of the country. Like the tariff, the newspaper policy is a local question. An honest newspaper in California might radically differ from an honest paper in New York, or Guthrie or both. I believe the metropolitan press is more nearly incorruptible now than at any time in history, and it is a coincidence, too, that there are few of the papers of great influence which are strictly party papers. They are independent papers, harking back for principles to the common sense and common good and refusing to accept platforms made by leaders with selfish motives. I am a Democrat because I believe in the principles as advanced by Jefferson as against those advocated by Hamilton. You are a Republican because you believe that the Federalist doctrine is correct. We both desire the same thing, the best interest of the country and in our present day politics and who shall say that I am the less a democrat because I refuse to support some politician who has secured a nomination to office, or that you are a worse republican because you do not agree that the blocks of five method of buying votes is justified by the victory so attained.

To make plainer the meaning I am attempting to impress I wish to illustrate the position of the strict party paper and the "Yellow Dog" party voter. In a certain township there is a political boss. He has no politics. He is a democrat because from democratic officials he secures rich contracts without competition. In his district the democrats and republicans are divided almost equally. He secures the nomination of his candidates and then in his office on bits of card he classifies every voter. Here in these pigeon holes are one hundred men who will vote the democratic ticket because it is so labeled. Here is another one hundred men who will vote the republican ticket the same way. Of the voting strength there are twenty men left who will sell their votes. The political boss rounds up these twenty, employs his speakers who preach the doctrine that it is a crime to scratch a party ticket. The republican newspaper holds the one hundred republicans in line and is put away in a pigeon hole by the politician and labeled. The democratic paper holds its honest voters in line and is sealed up in another pigeon hole as unworthy of attention. The candidate of the democrat is a boodler and the candidate of the republicans is an honest man. The twenty votes bought by the politician carry the district.

A man who has no enemies is not much of a man. A newspaper which is not hated and abused is not loved and followed. When a newspaper has followed the direct line of right and truth until it has raised so many passions that some curse and others bless it, that newspaper has found the true diplomacy. And not only does this idea apply to politics, but to those greater problems which come to men and newspapers. We must deal with affairs of every nature and through it all show bright and clear and unbroken the line of character. The things which draw us together as citizens are by far more numerous and more important than the division of politics. The lack of sympathy between men of different stations, between sections of the same country and between nations, is the cause of bitterness and misunderstanding. There is never a feud, never a quarrel, never a war, but at the foundation may usually be found a misunderstanding, brought about because of the lack of knowledge and sympathy. We measure life by what we absorb from it, when we should measure life by what we put into it. We, as individuals, and as newspaper men, would be stronger and more influential if we gave more attention to the cultivation of human sympathy, cultivating in ourselves the nature of those who suffer. It is pure selfishness which makes us try to lift ourselves up by tearing others down, instead of trying to lift others up that we may rise with them. It is Tolstoi's theory that all men should actually labor for themselves, not live by the means of the labor of others and he calls it "Bread Labor." He would have us dig in the soil before we may be called self-supporting. Mr. Bryan, who is a philosopher, as well as a statesman, adopts Tolstoi's theory of bread labor, but does not demand the actual, literal labor at the plow. He takes a broader view of life and holds that every man should labor in the field for which he is fitted and by contact with other men and their frailties and wants, discover the bonds of human sympathy which broaden the understanding and brings us closer together for mutual support and benefit and says that every citizen should draw from society the reward commensurate with what he contributes to society and that everyone holds what he does secure in trust for society.

We, as newspaper men, who touch every day the hearts of other men and mould to a certain extent their thoughts and actions, must realize that to us is given the greater opportunity, we are possessors of the twenty talents and from us much is expected. The influence of a paper guided in the counting room, the local department and the editorial utterance, by the standard of truth, is for the betterment, the uplifting, the happiness of mankind. It is for us to create a better understanding of motives and bring men into closer relations and to real sympathy with one another.

"Truth on the ocean of nature is no one track of light—every eye looking finds it own." Religion puts truth in the center of the universe and what is truth?

"'Twas Pilate's question put to truth itself, that deigned him no reply."

"To thine own self be true,
And it must follow, as the night the day,
Thou can'st not then be false to any man."

It was St. Paul who wrote, "No man liveth to himself and no man dieth to himself." Our lives must touch those of others at many points and we know not what vital influence the smallest action may have upon those who stand about us and are near us in our daily walks. Virtue goes out from contact with the hem of our garments and we know it not. Then is not our whole life's plan to so live that our influence shall work for good? The hermit departs the haunts

of men and separates himself from all who may influence him or be about him. He builds a hut at the source of a great river and that source, a little stream, passes before his door as he sits in musing, useless silence, wrapped in his egotism. He is living without the pale and influence of mankind. He is living a refutation of the message written by St. Paul.

Far off in the ocean some mysterious power moves the mighty deep. The waves rise toward the shores and the white capped waters flow in the daily tides. The waters of the river rise and carry up to its very source to the feet of the hermit at the little stream, the message that he is still beneath the eye of a mighty power and viewing its manifestation.

THE NEW STATE AND ITS NEWSPAPERS.

BY H. B. GILSTRAP, THE NEWS, CHANDLER, OKLA.

THE influence of the newspapers of Oklahoma and of Indian Territory has been an indispensable factor in the settlement and the development of these two territories, and, for that reason, the history of the territory newspapers is so interwoven with that of the constituent parts of the new state that the story of neither could be faithfully told without reference to the other.

The subject of this paper might, perhaps, have been reversed with propriety, for the newspapers preceded even the territorial form of government and have from the first led the way in the work of state-building. Their part in the creation of the forty-sixth state began with the struggle for the opening of Oklahoma lands to settlement, and since that time there has been no movement affecting the welfare of either territory in which they have not borne an important part. The first bill for the establishment of a territorial government for Oklahoma was introduced in congress by Robert VanHorn, a Missouri editor, and the measure which was finally passed and was signed by the president, authorizing the opening of Oklahoma to settlement, was drafted by Hon. Sidney Clark, now an honored member of the Oklahoma Press Association.

H. B. GILSTRAP.

The first "opening" in Oklahoma and each of the five additions which have since been made to the area of settled lands were preceded by campaigns of newspaper advertising such as no other country has ever enjoyed. Good advertising brings unfailing results, and the effect in this case was that the eyes of an entire nation were directed toward this fair land as the last and the best of the opportunities for the homeseeker, and the tide of immigration thus turned in our direction by newspaper influence has, by the same means, been continued, undiminished in volume, to the present time. In the past score of years Oklahoma and Indian Territory have been often in the limelight, and while some of the publicity has been unreliable and detrimental, the new state is greatly indebted to the newspapers of the entire country for their services in telling of the natural resources and business opportunities here and in extending our invitation to homeseekers and investors.

While the progress in this new country has been so rapid that we may seem to have reached almost at a bound the stage of development to which other states have been scores of years in attaining, every step in our advancement has, nevertheless, been the result of earnest, determined effort. There have been many obstacles to surmount and many adverse influences to combat and overcome before such a commonwealth could be carved out of the forests and wrested from the plains. People have been busy creating new cities, building homes, improving farms, establishing business enterprises, and so in all the work for the common good the newspapers have naturally led and have borne even more than their usual share of the burden. While the intrepid Payne and his sturdy boomers were invading the promised land only to be driven out by the soldiers, the newspapers along the border and in many parts of the country were fighting Oklahoma's first battle—the contest with the cattle syndicates which sought to retain possession of the land. The newspapers won, and in the first "rush," with the advance guard, came the pioneer newspaper men and their printing presses into the territory, here to continue their good work. No force has contributed more to the upbuilding of Oklahoma. There are other things which helped in an important degree—the fact that our people have come from every part of the Union, bringing with them the best ideas and the ripest experience of their several states; the age of progress and enlightenment and improved methods in which the territories have been settled; the interest that has centered in this country as the last of the American frontier and the spectacular features attending its opening—all these have done their part, but the one factor in our progress which made it possible to utilize all the other elements has been the power and the influence of our newspapers.

The commonwealth which here sprang into being in a day existed for many months without any organic law or any government except that which was evolved from public sentiment and established by public approval, yet life and property were safe, cities were built, schools were established, public improvements were made, and the march of progress never halted. The pioneer newspapers advocated order and good government; in the absence of law and executive officers they fostered and contributed to that wholesome sentiment which made the people a law unto themselves; the weight of newspaper influence was ever thrown against the dangers common to new communities.

People came here with fixed ideals of a high order, and if any labored under the delusion that they could with impunity show here that disregard for law and order and justice and decency which is sometimes tolerated in the pioneer life of new countries, they were soon undeceived and they quickly came to grief. An unrelenting and a successful warfare was waged upon outlawry and rowdyism, and it was soon made plain that train robberies and brawls and other crimes and disturbances were as much to be expected in the older haunts of civilization as in this newest of the territories. The country has developed too rapidly to remain long in that formative stage which offers to the demagogue his opportunity. Occasionally, when the people were still little acquainted with each other, unworthy men would successfully impose themselves upon the public, but whenever officials have shown a disposition to convert a public trust into a private "snap," they have been as promptly and as severely called to account here as in any state, and the newspapers have been unsparing in their condemnation of official malfeasance. It is well to

remember that when a judge, appointed to administer justice and uphold the law, became corrupt and arbitrary, the newspapers were prompt and fearless in their condemnation of his abuse of authority. Some of these editors suffered heavy fines and were even committed to jail for alleged contempt, but they have continued in honorable service, enjoying the respect of their fellow-citizens, and have seen the oppressor shorn of his undeserved authority and himself committed to jail for the violation of the laws he was once entrusted with enforcing. There have been many instances in both territories where removal from office has followed the exposure by newspapers of official crookedness.

It is almost universally true that intelligent people look upon the local newspaper as an index to the business enterprise and the social character of the community it represents, and the first step in the way of investigating any community in which they are interested is to send for the local paper. Thus our newspaper men have in a sense become immigration agents, and the character of the people who have come to make their homes within our borders is proof of the good impression that has thus gone out from this source. Almost every issue of a territory paper is a "boom" edition in the sense that it advertises the resources and advantages of its section and reflects the industry and progress of its people and is a continual exhortation to improvement and development.

Perhaps the greatest boon that has ever been given to the people of a state by a single act of legislation was the passage of the free homestead bill, which saved to the homesteaders of Oklahoma sixteen million dollars. This was only achieved after a campaign of years in which the newspapers, as usual, bore a conspicuous part.

The progress in Indian Territory has, in some respects, necessarily, been slow. While Oklahoma has been impatient at being compelled to remain so long a territory when fitted so well for statehood, our neighbors in Indian Territory can, with justice, complain that they have not been given even a territorial government. The people of Hawaii enjoy a greater measure of self-government than do these enlightened citizens of Indian Territory. They have no elective officers except their town officers. Every particle of legislation for Indian Territory must be sought at the hands of Congress, and yet the territory has not even the representation of a delegate in congress. When it becomes necessary to present to congress or to the departments at Washington those matters of great importance to the territory, the majority of the citizens, having no legal representatives chosen by popular vote and maintained at public expense, are at a serious disadvantage as compared with the interests capable of maintaining able and experienced lobbyists at big salaries. The titles to lands have all been vested in the Indians, and, under the existing restrictions, these lands are yet practically inalienable. The administration of the laws is left entirely with officials appointed by federal authorities. Whatever is done for the public good must be the result of local organization, and here again is where the newspapers have rendered valuable service. If the people of Oklahoma have reason for pride in their newspapers, much more have the citizens of Indian Territory occasion for pride in theirs. Created in the midst of lawlessness and disorder and surrounded by the representatives of greed and graft, they have done more to bring order out of chaos and to maintain a sentiment demanding a high standard of honesty and efficiency in the public service than any other force within or without the territory. The immortal Thomas Jefferson is credited with the statement that if he should be required to choose between a government without newspapers and newspapers without a government he should unhesitatingly choose the latter. If the wisdom of this utterance had hitherto lacked vindication it would now be found in the conditions in Indian Territory, where an intelligent and courageous press is doing so much to keep the country abreast of the most progressive states. Indian Territory editors have had little acquaintance with "flowery beds of ease." The rural population has been scattering and somewhat transient; official publications and public patronage are almost unknown; countless obstacles have stood in the way of these plucky publishers, but they have overcome them, and their papers would be a credit to any state—a splendid monument to their brains and business ability.

According to the latest newspaper annual, the two territories have one newspaper or other publication for every 1,800 of their population. But seven states show a greater proportion, while the average of the states and territories is one publication for every 3,951 of population. Only fourteen states, including one New England state and one Southern state, have a greater number of publications than the 530 accredited to the two territories; but fifteen states publish a greater number of dailies; only fourteen print more weekly papers; and in but thirteen states are a greater number of towns represented by publications. In point of circulation, in mechanical equipment and typographical appearance, and in the excellence of their news service as well as in editorial strength, these papers are fully up to the standard of the older states. There is good reason for this. Our population is made up of an intelligent, wide-awake, newspaper-reading people. There are thirty states and territories, including Massachusetts, which have, according to the U. S. census, a greater percentage of illiteracy than Oklahoma has. Judged by the newspaper standard, there can be no question as to the fitness of Oklahoma and Indian Territory for immediate admission as a state.

One reason why there are so many papers is found in the fact that in every town in the territories there is an intense degree of local patriotism, and this sentiment demands a newspaper as practically the first institution after the townsite has been platted. It must have been here that the printer man, with prophetic eye, took his "outfit" into the unsettled wilderness, and, as told in the rhyme,

> Men laughed at him as they looked about
> When, in the woods, they found him,
> But when he got his paper out
> They built a town around him.

One cannot read the exchanges from the two territories year after year without being impressed with the broad character, the intelligence, enterprise, and the energy of the men who make these papers. There have been undesirable publishers and unworthy publications, but under the operation of the law of the survival of the fittest, the papers of objectionable character have nearly all found their place in the newspaper graveyard, and practically all the publications of today have passed the experimental stage and are firmly established. These territory editors are men who would have made a creditable showing anywhere they might have been placed. They had the foresight to recognize the possibilities of their chosen home, and, by means of their brains and push, are witnessing the realization of their dreams. They include college professors and graduates and men of other professions, who have been attracted to the fourth estate by the opportunities it offers for usefulness. They are important factors in public affairs, indispensable in local matters, and inseparable from politics. Their services in official capacity have been so satisfactory that when President Roosevelt wanted a man for governor of Oklahoma he chose one who had "made good" as a postmaster and a country editor, and the wisdom of the selection has been proven by an administration which is a source of pride to the newspaper fraternity.

The paramount, ever-present question with the newspapers of the two territories is statehood. We have here ready and waiting all the essentials to the formation of a great and prosperous state. In area, in natural resources, in wealth, in population, in intelligence, in respect for the law, in loyalty to the Union—in all that goes to fit a territory for a place among the states—Oklahoma and Indian Territory fill the measure more completely than did any of the present states at the time of their admission. If faithfulness in small things is proof of capacity for greater responsibilities, may not the fact that these territories have accomplished so much in the face of adverse conditions be taken as an indication of the larger success that will be achieved when the limitations of territorial government or of the absence of even that are removed? The new state will be no uncertain quantity—no experiment. In the record of what has been accomplished you have the assurance of what will be done. The people who are to mould our institutions and to determine the character of our government are here now, and the conditions as you see them are the result of their efforts. It will be an injustice for congress to longer delay permission for Oklahoma and Indian Territory to jointly assume the responsibilities and enjoy the benefits of statehood. That justice may speedily be done us, the newspapers of the new state appeal to the great body of newspapers represented in this association. You speak to those whose assistance we most need, and, having verified by personal observation that we are fitted for statehood and that we deserve statehood, you can create on our behalf a sentiment that will be irresistible. Not only can you, through the influence of your papers, make effective our appeal for statehood, but you can help to secure those conditions which will make the new

state a type of the highest American civilization. To you is given the opportunity to assist in finishing the work so well begun and so faithfully carried on by our territory papers. Your past devotion to the principle of a square deal is to us an assurance that we may expect your aid, and when the star of the new state is added to the flag you may rest assured that the newspapers of the new state will not be unmindful of the debt of gratitude which they owe to the members of the National Editorial Association.

THE PUBLIC SCHOOL AND THE PUBLIC PRESS.

BY JOHN W. CARR, SUPT. OF SCHOOLS, ANDERSON, IND.

AS a member of one N. E. A.—the National Educational Association, it affords me genuine pleasure to be permitted to bear greetings to another N. E. A.—the National Editorial Association—and to be your guest on this occasion. The emblem of the organization I represent is a lighted lamp, typifying its purpose—the enlightenment of men. This emblem would be equally appropriate for this organization, for it too is primarily a bearer of light—the light of truth, the light of knowledge. In fact, enlightenment is the chief concern of both associations, and, if it were deemed advisable, they might with propriety be merged into one greater N. E. A.—the National Enlightenment Association—without doing violence to the fundamental principles and purposes of either organization. So while I do not come as the accredited representative of the National Educational Association, yet I am sure I express the wishes of all the members of that great organization when I bear fraternal greetings and assure you that the sentiments most cherished by you are dearest also to us. I count myself particularly fortunate, and I appreciate the honor, of being permitted to speak to you on a subject so dear to the hearts of the membership of both organizations—"The Public Schools and the Public Press."

SUPT. J. W. CARR.

THIS IS THE AGE OF LEARNING.

This is distinctly the age of learning. Other ages have produced scholars and made splendid contributions to the fund of human knowledge. I would not disparage their achievements nor detract from their renown. But in every other age learning has been for the few—the rich and the highly favored, while now, in this country at least, it is the heritage of all. The marvelous development of our country has not been due alone to our natural resources, but primarily to the intelligence and energy of our people. Our raipd conquest of the markets of the world is due chiefly to the genius of the captains of American industry and to the intelligence of American workingmen. We are supreme in agriculture not alone because of the fertility of our soil, but because of the fertility of our brains. The wonders of science, the marvels of invention, the triumph of mechanical and industrial arts, the substitution of machinery to do the world's work instead of man and beast, the conquest of time and space by means of steam and electricity, the improvement of food plants and the invention of new ones; the multiplication of libraries and schools and books and newspapers, the increase of travel and the wonderful interchange of thought—these are characteristic of the times and attest the fact that this is primarily the age of learning.

UNIVERSAL EDUCATION IMPOSSIBLE WITHOUT THE PUBLIC SCHOOLS AND THE PUBLIC PRESS.

Now such an age of universal learning would not have been possible without the public school and the public press. The public school gives to all the people the rudiments of knowledge and in these latter days, through the agency of the public high school, science and literature and some of the culture of the race is becoming the heritage of the common folk—reaching all of the people. The work of universal education begun by the public school is continued and extended by the public press. Our knowledge of geography and history, yes even of science and art would grow dimmer and dimmer, perhaps in many instances entirely vanish, if it were not for the public press. Questions of government and society and commerce and finance and education and religion and science and art—in short all the questions of peace and war are discussed daily in the public press, and by that means the work of universal education goes on and on.

The public school is the hope of our country; the public press, the bulwark of our liberties. The two are inseparable—the one useless without the other. They are the twin children of democracy, the embodiment of freedom and enlightenment. Each has in it an immortal spirit, but the body—let us hope that it too is immortal.

But the real purpose of this address is not to extol the greatness of either the public schools or the public press, but rather to point out their limitations and imperfections and especially to show how each may be helpful to the other and how both may render a greater service to their country and to mankind.

SOME PROBLEMS THAT CONFRONT THE PUBLIC SCHOOLS.

Great as has been the work of the public school yet there are many problems to be solved and many difficulties to be overcome before it is capable of doing its noblest work. In many localities the schools are crippled because there is not It is true that there are plenty of people willing to extol the glories of our free public school system and to insist that their particular schools are the best in the country. Yet the proper intelligent patriotic public sentiment back of them. we often find these same patriots (?) using the schools to forward their own selfish interests by "ways that are dark and tricks that are vain." The best of one generation should be the teachers of the next. This is impossible so long as teaching is regarded as a menial task and teachers are ground down by poverty and subject to dismissal without cause at the whim of any one who may be elevated to power. Good physical environments, a course of study suited to the needs of the people, competent teachers to instruct, wise and economic administration of school affairs, proper and wholesome discipline, high ideals not only of scholarship but of character, above all splendid teaching and noble living in the school room, and intelligent loyal support out of the school room—these things are essential in every community if the public school is to perform its highest mission.

HOW THE PRESS MAY RENDER GREAT SERVICE TO THE SCHOOLS.

Now the public press can render a great service to the public schools and at the same time a greater service to the country by insisting that the public schools shall forever be divorced from partisan and personal politics; by seeing to it that no man who has "an ax to grind" or a friend to reward

or an enemy to punish be elected to administer the affairs of the school; by demanding competent teachers—men and women of scholarship, ability and power—to teach the children of all, and then by insisting that the teachers receive living wages for the services rendered. The miner who digs the coal that runs your engine, the printer who sets your type, the pressman who prints your newspapers, the postal clerk who weighs and distributes them, yes even the rural mail carrier who delivers them to the farmers in the country—each of these is paid from one and a half to two or three times as much as the man or woman who teach your children! We pension the soldiers of war; we build monuments to commemorate their deeds of heroism; we honor them in every way possible while they are living and with loving hands we strew flowers upon their graves when they are dead. And it is well. I would not have it otherwise. But shall the soldiers of peace—the teachers of the nation, shall these men and women who are giving the best years of their lives to the instruction of children, who are taking hostages of the future in order to secure the peace and prosperity of their country, shall they be paid a mere pittance for their services while they can serve, shall they be dismissed in disgrace without cause and then compelled to live in poverty in their old age? I appeal to the public press of the nation.

But a better understanding between the public schools and the public press would not redound to the benefit of the former alone. As the schools improve in efficiency, the people advance in knowledge and wealth. This advancement has made the development and the multiplication of daily newspapers possible. The better educated the people are, the greater is the demand for newspapers and the greater is the power and influence of editors. A metropolitan newspaper in the Soudan or among the Igorotes would neither be profitable nor influential.

THE BETTER SCHOOLS, THE BETTER THE NEWSPAPERS.

Again, as the people increase in intelligence and knowledge they demand better things of the press. You can judge of the intelligence and tastes, yes, even the morals of a people by the kind of newspapers they read. If the news-columns are filled with pruient and the sensational, if the language is coarse and slangy, if there is a dearth of science, art, literature and religion, if the editorials are abusive or don't ring true, if the advertisements appeal to the ignorance, cupidity, infirmities and appetites of the people—if these things abound in the newspaers, they are or soon will be indicative of the intelligence, the tastes and the morals of their readers. It is a significant fact that even advertisements are graded, not only in reference to the occupation of people reached, but by their intelligence, integrity and credulity.

As the public schools improve in efficiency, the newspapers will contain fewer misstatements, fewer personalities, less sophistry, less demagogy, and more that ennobles and uplifts. As editors and teachers become better acquainted, they will understand each other better and each will have more sympathy, more respect for the other. Teachers will not regard editors as coarse, critical unsympathetic and cynical, neither will editors regard all teachers as impractical, pedantic, sentimental and soft—fit subjects only for caricature and ridicule. On the other hand, they will understand each other better, and each will have more sympathy and more respect for the other.

THE LARGER BENEFITS OF A CLOSER UNION BETWEEN THE SCHOOL AND THE PRESS.

But the benefits to the public schools and the public press arising from a closer union between the two are insignificant compared to the benefits to the country at large from such a union. It has been the dream of my life to see this union made effective and perpetual and to see these two mightly agencies of democracy, inspired by the highest motives, working side by side to dethrone evil and to exalt righteousness. I do not minimize the work of either the schools or the press in the past. But what has been done is only a sign of greater things that may be accomplished in the future. I do not expect such a union to bring about the millennium, but I do believe that it would do much to aid in the solution of some of the gravest problems that confront our people—problems which, if allowed to remain unsolved will threaten our national life.

THE DANGER OF CLASS HATRED.

As an example, take the problem of class hatred.

In the past, class hatred has been the cause of the downfall of nations. Sometimes it was the hatred between Jew and Gentile; sometimes between Greek and barbarian; sometimes it was Guelph versus Ghibelline. Again it was the rich against the poor; the pleb against the patrician—Marius against Sully and Sully against Marius. Sometimes it was the military against the civilian; sometimes it was one class or race, or nationality or religion or sect against another. But in whatever form, it was always the demon of faction, the devil of party, the enmity of class against class that proved disastrous to their country.

In America we have all races, all nationalities, all languages, all sects, all religions, every condition of wealth and poverty, all ideas of government and personal liberty—all these side by side working together, usually in harmony, sometimes clashing, sometimes rioting, but always elements of danger—the live wire passing through the powder in the magazine. It is the glory of public schools to be the chief agency in assimilating and unifying these heterogeneous elements, making Americans out of all with common ideals and a common patriotism. It is in the public schools that the children of all classes—rich and poor, white and black, foreign and American born—all are given the same opportunities, all are taught one language, all are taught to love, protect and defend one country and one flag.

But how much more effectively could this work be done if there was a closer union between the public schools and the public press—a complete understanding, a common program. The teachers would teach the children, the editors would instruct their parents. A common patriotism would be taught in the school room, a common patriotism disseminated by the press. True comradeship taught in the schools—brotherly love preached by the newspapers. Such a union and such an understanding would mean less prejudice, less faction, less strife. It would mean closer unity, more harmony and a broader patriotism. It would mean that reason would be appealed to more and passion less; justice more and selfish interests less; the welfare of all, not the aggrandizement of the few. Yes, the press would publish the news—all the news—the works of righteousness as well as the works of iniquity, but there would be greater effort not to excite hatred. We would not fondle the serpent nor play above the den of the cockatrice.

DISREGARD FOR LAW, A MENACE TO SOCIETY.

But there is still a greater problem to be solved than that of class hatred—it is the problem of obedience to law.

Disregard for law is the most common, the most insidious and the most dangerous of all our national sins. It is so widespread and affects so many classes that if it is not checked it will become a positive menace to society. It manifests itself in various ways and in all parts of our country. Children in many homes defy parental authority. Demagogues are all too frequently elected to office only to betray the people they are supposed to serve. Great labor organizations sometimes rush into unwise and unjustifiable strikes, resulting in loss of property, acts of violence and all too frequently terminating in bloodshed and murder. Some business men and socalled good citizens resort to bribery and all sorts of finesse in order to obtain valuable franchises and other public utilities without adequate compensation to the people. Great corporations sometimes rise to opulence and power by resorting to espionage, bribery, oppression and crimes of various sorts. But in whatever form, whether as riots, or mobs, or white cappings, or lynchings, or the evasion of the liquor laws, or perjury, or rebates to shippers, or tax dodging, or vote buying, or the prostitution of official position, or the purchase of legislatures, it is all one thing—*disregard for law.*

Now, gentlemen, if this national disease is to be cured, we must go to the very root of the matter. Children must be taught obedience and respect for law and constituted authority. There must be better discipline in the home and in the public schools. I do not plead for the sterness, harshness and brutality of the old time discipline, but even that is preferable to much of our soft sentimentality, that causes us to be afraid to spank Johnny for fear he will die, or will never love us any more. But Johnny will not die and he will grow only the stronger in character and love because his parents and teachers have taught him a wholesome regard for law. The public schools will fail, miserably fail, if there is not proper discipline in them. Chicago has banished the rod from the schools, but she has not done away with the policeman's club and the fixed bayonets of an armed soldiery.

The public press can assist greatly in the maintenance of proper discipline in the schools. If the press insists that there shall be proper discipline, if it refrains from giving undue publicity in magnified form to every little case that arises, if it refuses to champion the cause of every callow youth who fails to pass in his studies or has been spanked

or suspended on account of his misconduct, if it declines to give the use of its columns to Tom, Dick and Harry in order that they may air their grievances or get even with their teachers—such a policy will aid teachers and school officials not only in the maintenance of proper discipline in the schools, but in the development of citizens that will respect and obey the law after they leave the schools.

While the public press can assist teachers greatly in training *children* to respect and obey law, yet it has a still greater privilege, and a higher duty to perform—it is to demand that *adults obey the law and that no class be privileged to disregard it.* This duty and this responsibility can no more be evaded than the sentinel can evade responsibility for the welfare of the army while he is on picket duty in the presence of the enemy. It would be presumption for me to attempt to tell you how this duty is to be performed—that is your problem. But I believe this problem to be of such importance that the history of our country will be affected by the solution that is given.

THE PATRIOTISM OF PEACE.

But the greatest good to be derived from a closer union between public schools and the public press is that, united they can aid mightily in instilling a higher patriotism among the people—*the patriotism of peace.* It is a noble thing to defend one's country in time of war; it is no less noble to protect it and to cherish it in time of peace. It requires sublime courage to stand up before the bullets of an armed foe. It requires also a high order of courage to stand up before the onslaughts of the party boss, the allurements of "big money," the blandishments of office and power and to champion successfully the cause of good government. Clark of Minneapolis, Weaver of Philadelphia, Folk of Missouri and Theodore Roosevelt, President of the United States are heroes of peace and it is our duty to hail them as such. It is a great thing to accumulate property and pile up wealth; it is a greater thing to use that wealth for the highest good. Wealth should no more be prostituted than virtue or honor, or power. It is a glorious thing for the public schools and the public press to be the chief disseminators of knowledge, yet that knowledge becomes a curse if misdirected.

The patriotism of peace teaches the homely virtues of honesty, truth, justice, temperance, chastity and mercy. It teaches that all men are equal before the law and demands for every man the right to work and to enjoy in peace the fruits of his honest toil. It rewards fidelity and punishes treachery in public office the same as on the battlefield. It believes that wrong is wrong and crime is crime whether or not they are so designated in the statute books. It believes that the hard doctrine of competition and commercial intolerance should be mollified by the practice of brotherly love. In its declaration of principles, it not only includes the Ten Commandments but the Sermon on the Mount. I know that these are ideal things, but they are the things for which the world stands most in need.

J. W. Carr.

SCIENCE OF MODERN BUSINESS BUILDING.

BY WM. L. BARTH OF THE SHELDON SCHOOL, CHICAGO

THE age in which we live is distinctively an age of practical and applied science. The most fascinating chapters in the history of the ages are those which unfold to us the miracles wrought by science. Every realm has felt and responded to its magic touch. It is literally the mother of modern industry and commerce, and the successful men of the age are largely those, who, appreciating this fact, have grasped the opportunities set before them. Every great industry has its technically trained expert and so great is the demand for this class of men that frequently every student of our higher institutions of Technology is engaged a year and sometimes two years before his graduation. He is the profit maker of the institution, and sometimes the only profit maker. He has taught the manufacturing and selling world that vulgar fractions are greater profit builders than even the multiplication table; that coal tar can be transformed into hundreds of valuable dyes, medicines and commercial products; that the hair and hoof, horns and blood of the ox are as valuable as the beef; that worn out horse shoe nails may be transformed into the finest gun barrels; that fish scales make very fine brooches and bracelets; that the sewage of our cities may be made to yield millions of revenue.

The day has gone by when the graduate of science can be ignored or ridiculed as a theorist. The steel mill, the mining company, the packing house, the gas works all appreciate his worth. Even the farmer has learned to know that the agricultural graduate stands a better chance of succeeding than does he. Is it not strange when we pause to reflect that while all professions and industries have outgrown their prejudice and welcome the age of science in their respective spheres, our business builders, in many respects our most farseeing body of workers, have until now, made no effort to utilize the knowledge of science in their operations? While they of all men need it most, for they are continually dealing with that most complex thing in the universe of God, human nature, they have been content to plod along in a hapazard luck and chance sort of way with scarcely an attempt to codify or systematize the laws underlying business getting and business building. True, we have very able journals; our newspapers are replete with valuable knowledge for the business man; good books have been written on special topics, such as banking, system, etc., but no real effort has ever been made to do for the business builder what has been done for the electrical engineer or the chemist. Our great thinkers have not quite gotten rid of the old superstition that trade is vulgar, unprofessional—I predict the day is dawning when commerce will be regarded as a profession as dignified and honorable as medicine or law and that men will study the science of business building as they now study the science of chemistry or agriculture.

The modern business builder must be a technically trained man; educated in the science which underlies his art if he hopes to attain to the highest success in his calling. This is an age of brain mastery, of knowledge and law, and no man can hope to succeed who does not prepare himself more thoroughly than the fathers needed to do. I once congratulated a wealthy man on his business acumen. He replied it did not take much brain effort to buy pine land at $100. an acre and sell it for $150.00 an acre, or to pick up corner lots at $100.00 and sell them for $100,000. That may or may not be true; at any rate those days of golden opportunity are gone and will never return. The man who hopes to succeed in business these days must do so as a result of a thorough mastery of his calling. The business methods of fifty years ago, were all right fifty years ago. Those same methods, if used today, would land you in the bankrupt court.

Business methods are changing and nowhere so rapidly as in the west; and changing because business itself is changing. It has ceased being a trade; it has become a profession, a science. When A. F. Stewart had three hundred clerks in his store, it was regarded as a wonder, but there is at least one retail dry goods house in the city of Chicago that employs ten thousand clerks and its annual sales amount to tens of millions. When Greely and Bennett founded their newspapers in New York, they gloried in a circulation of fifty thousand. Today a circulation of one hundred thousand for a newspaper is very ordinary. When Robert Bonner appropriated $5.000. for advertising it was regarded as marvelous; today the advertising appropriation of the business world runs into the tens of millions.

Such are the enterprises and all who hope to compete with them require training, wide knowledge and more than ordinary education and intelligence on the part of the men who conduct them. They require training in system, credits, costs, buying, advertising, insurance, and above all, in the fundamental and basic principles that underlie business operations. No great business enterprise is the result of chance. This is not a world of chance, but of law, and the secret of the success of all great business builders is that they worked in harmony with certain fundamental principles and laws. This great truth all modern business builders must learn, that success can only come as men work consciously or unconsciously in harmony with the basic laws that underlie their calling. I say consciously or unconsciously, for I concede that men are succeeding who have not been trained in the science of business, but their success is due to the fact that they have unconsciously utilized the basic laws of business. To illustrate, here is a man who builds a safe, and into that safe he builds a combination with which to lock and unlock the safe. Here are two men who wish to open that safe; one man is acquainted with the combination; the other is not. Now it is quite within the realms of possibility for the man who does not know the combination

to open the safe. He may stumble upon the combination by chance; he may, by trying every possible combination of the dial plate, learn the combination, but he cannot, does not open the safe save by the use of the combination, for there is only one way of opening the safe, and that is by way of the combination. It will be conceded by all that the man who is in posession of the combination can open the safe in less time and do it more certainly, with less brain effort, less labor, than the man who does not know the combination. This is self evident.

Now then, if our contention is true that there are certain basic laws and principles that underlie and enter into the art of selling and business building, and that contention no one will controvert, then it follows that the man who is conversant with these laws and who applies them consciously in his business, will do the work with less friction and fret, with a greater chance of success, than will the man who does not know them or who uses them unconsciously.

We know that every innovation or new truth has had to fight its way to recognition and acceptance. Practical men in the past absolutely demonstrated to their own satisfaction that a steamship could never cross the Atlantic; that the telegraphic message could not be sent from one city to another; that the idea of talking through a hole in the wall over a wire to a distant point was nonsense; that lighting by electricity was a dream; that sending messages over the ocean or over the continent without wires was not feasible, but the facts are that all these things have been done.

In a last analysis, this question of the science of business building must stand or fall by its results. The facts in the present instance demonstrate that what was a modest business venture on the part of Mr. Sheldon a little more than two years ago has grown into a movement that promises to revolutionize business methods and ideals.

Our definition of salesmanship is as follows: "Salesmanship in the abstract is that power born of a combination of certain positive qualities and faculties which enables him who possesses it to successfully influence a high average of those whom he solicits to purchase at a profit that which he has to sell."

When we consider this abstract definition of salesmanship, we see that the relationship between the personal salesman and the salesman by the literary method which is advertising in its various forms—is maintained. Each is seeking to exercise that power to influence others, and a high average of those whom he solicits to purchase at a profit that which he has to sell. Each needs that power, and if his ambition crystallizes into the desire for more than ordinary success, he must possess it to a marked degree.

This leads to the inquiry, what do we mean by the science of salesmanship? We have already defined salesmanship, and now if we define science we shall be able to proceed with a clear understanding.

Science is knowledge. We have an art of selling, but the art of selling is not science. The art is the practical exercise of the science, which underlies it. The musician at the piano is exercising the art of music when he actually plays the piano but he will never become a great artist until he masters the science of harmony which underlies that art.

And we must remember, too, that all knowledge is not science. Knowledge only becomes science—scientific—when it is correlated, systematized, logically arranged and even severely tested. I think we may all consider Herbert Spencer a safe guide as to the definition of science, and he tells us that it is "organized knowledge." This is but another way of expressing the same idea when we say, as we do in scientific salesmanship, that science is knowledge which has been correlated, systematized, logically arranged and severely tested.

Knowledge pertaining to the heavenly bodies, when organized, gives us the science of Astronomy; knowledge pertaining to the erection of buildings, when organized, gives us the science of Architecture; knowledge pertaining to the tilling of the soil, when organized, gives us the science of Agriculture, and knowledge pertaining to the sale of goods, when organized, gives us the science of Salesmanship.

We all realize, of course, that the first step towards the formulation of a science is to arrive at a true basis for classification of knowledge pertaining to a given branch of thought or industry. So far as business building is concerned, this first step is very plain; there is but one true basis for classification, which will be all-inclusive. We find in the first place that there are but four general classes of salespeople in the world. These we may name as wholesale salesmen, retail salesmen, specialty and business promotors, and, inasmuch as all these are intimately related to business building, we must include them in the science of business building.

There is one more step to take in our work of classification, and it is this: To determine the factors which enter into each sales transaction. There are just four, and these factors are; first, the salesman, the chief factor in each commercial drama; second, the customer, to whom the first factor (the salesman) is seeking to sell something; third, the article or proposition to be sold, that which the first factor is trying to sell to the second factor; fourth, the abstract something, which we may call the sale itself the transaction wherein dwells the exercise of the practical art of selling. It will be helpful to me in the remainder of that which I have to say if you will bear these four factors which enter into each sales transaction clearly in mind, as the balance of my remarks shall be confined to a few vital points pertaining to each of these four factors.

Kindly bear in mind as you follow my remarks pertaining to these four factors that, in scientific salesmanship, we claim that there is specific knowledge amounting to general truths, general principles—indeed, we may well dignify them by the term "general laws"—pertaining to each of the four factors. According to Spencer, when they become "organized knowledge" they crystalize themselves into a science—the science of general salesmanship. Since advertising is salesmanship by the literary method it goes without saying that these laws apply with equal force to the advertising department and the personal salesman. They constitute the general laws of success.

Let us inquire what is the fundamental law of all trade, and the answer is Confidence. Confidence is the moral fiber of our whole commercial fabric. If you can inspire your customer, or the man with whom you want to do business, with confidence in yourself or your proposition, one-half of the battle is won. Upon what does confidence depend? I answer it is the outgrowth of personality. The confidence we have in any corporation in whose stocks we invest is due to the personality of the men on the directorate. Any proposition presented to you is gauged by the personality of the man or the men presenting the same. Personality is the most intangible, and at the same time the most real and potent factor in human relationship.

Upon what does personality depend? I answer upon character and health. I use these terms in a specific sense. By character I mean that central magnetic force of true manhood and real womanhood born of a combination of the positive qualities and faculties, mental, moral, spiritual and physical, the natural product of which is the power to influence.

You will note that character is defined as a force. You will also note that it springs from a development of the positive qualities. And you will note that the natural product of the development of that force is the power to influence others.

And now what do we mean by "health"? Our definition of health is as follows: "Health is that harmonious condition of the triune man which enables the physical organs to perform their functions properly and which promotes the development of the positive qualities, mental, moral, spiritual and physical, to a marked degree and promotes a persuasive personality."

Health may be said to be the character of the body, as character is the health of the soul. All these in turn rest upon the bedrock of true education.

Education we define as a twofold process, first, an eductive, or drawing out process; secondly and instructive or infilling process. The chief object of education is not to fill the man with other men's thoughts, but to enlarge the individual. Its office is to call forth power of every kind; power of thought, of affection and will; power to observe, to reason and judge; power to contrive to govern ourselves and influence others.

If, then, permanent and increasing success in modern business building depends upon education in the true sense of the term, the question now is, what should be included in the education of a candidate for permanent and increasing success in modern business? What faculties and qualities should be seek to educt—draw out—and what useful knowledge should he fill in? I answer, first, he should be taught the science of character building or the development of the mental and spiritual elements in our make-up.

We find that every positive quality has its corresponding negative, that every negative quality has its corresponding positive. And let us always bear carefully in mind the fact that salesmanship in the abstract is the power to influence others, and let us remember that that power to influence others

is born of the development of the positive qualities, not the negative. The positive stands for something, it represents force and power. The negative represents an absence of something—nothing. The development of the positive represents power. The development of the negative represents a hindrance to power.

We are here confronted with a tremendous fact, a fact fraught with vital burning interest to every individual, and it is this: That every normal individual possesses the vein of the positive qualities, and all of them. Please do not misunderstand me. The positive may be in a very obscure state of development, it may be covered deeply with the negative. Some of the positives may be developed to a marked degree. In some cases some of the positives and some of the negatives may be about equally developed. The strong man is the one with many of the positive qualities developed and those to a marked degree. The truth of the statement that every normal individual possesses the vein of each of the positive qualities will be plain to you when you consider the fact that you never yet met a man so unreasonable that he did not have flashes of reason. You never met such a fearful or cowardly man that he did not have flashes of courage. You never met such a hateful man that he did not have flashes of love. You never met such an obtuse man that he did not have flashes of intuition. And so it goes through the whole category of faculties, mental, moral, spiritual and physical. A clear comprehension of this truth that every normal individual possesses the vein of all the positive qualities is of vital importance to all of us. It enables us and our employers to work with faith in the matter of self-development.

I might employ right here, for the sake of illustration, the figure of the fruit. Let us compare the negative qualities to the unripened fruit, the positive qualities to the ripened fruit. In final analysis they are the same. It is but a question of degree of ripeness. The God of nature intended all of the latent qualities and faculties in man to mature into the ripened, the valuable, the marketable fruits, the fruits of real character. But many persist in permitting their faculties and qualities to remain in the shade—in the cellar, in the darkness and dampness of habits of life and habits of thought and habits of living, in intemperance, in eating and drinking, and intemperance in thinking, to such an extent that the fruits of those inherent qualities and faculties which God has given to us all, never have a chance to ripen. Thousands upon thousands are their own worst enemies. In the dampness and the darkness of negative conditions the fruit often not only cannot ripen, but in all too many cases it becomes dwarfed and withered and even rotten. I have known in the course of my experience, men who whined at their lack of luck—at their "hard luck," about "fate being against them," and all this and that and the other, when the simple but stern truth was that they were living in the darkenss of negative conditions. They would not permit the light of truth to shine in upon their mind and soul. In their failures they were simply paying the penalty of violation of the natural laws of success, and they deserved the punishment of the misery incident to the violation of these laws.

This matter of success is not a matter of luck or chance—and here I refer, of course, to great and lasting success. It is governed by laws eternal and immutable. To work in harmony with these laws means success, to violate them means to pay the penalty of failure.

When scientific horticulture can make a white blackberry, a fadeless rose, a thornless cactus on what had been a barren desert, and can make a pear tree produce two crops of pears in a year instead of one, it is high time to call a halt upon people drifting listlessly down the stream of life, taking themselves as God made them, letting it go at that, not seeking by any conscious effort to cultivate, develop, educt—draw out—the talent in the form of natural faculties and qualities which God has given to every normal individual.

There is a great difference in the natural ability of men and women. We do not all come into the world with equal ability by any manner of means but there is less difference in the question of natural or inherited ability than there is in the application and effort to train and develop natural powers.

As a matter of fact, every normal individual is a bundle of wonderful possibilities. He is all right, if he will just bring out the Almighty All-rightness.

The difficulty is in the seeming indifference—lack of desire—and when we come to analyze this, we find, in many cases, that it is due to a hopelessness akin to despair. The individual has not stopped to analyze self and find that every normal individual possesses the germ, we might say, root,—of each of the positive faculties and qualities from which, when developed, springs power.

The athlete going into a contest makes it his business to strengthen and develop the qualities of strength, activity and endurance upon which his success depends through scientific training.

The candidate for success in the business world goes into a battle every day. He needs to be in constant training. It is becoming more and more an age of the survival of the fittest and only the truly fit can or will survive. There are two classes of people, one live and the other exists. And those who live must be fit and be willing to pay the price of effort necessary to fitness.

It is well to remember that Luther Burbank does not create those tendencies in plant life with which he now astonishes the world, but he finds them lying latent and furnishes them with opportunities for development. What he does is simply to bestir in some way the fixed habits of a plant, surrounding it with new conditions, thus guiding the life forces into new channels.

If Luther Burbank can develop the latent tendencies of a plant and transform its life, what cannot you and I do with the latent faculties and qualities of our bodies, minds and souls? The greatest athletes the world has ever known were born weaklings; the greatest orators the world has ever known were stammerers in early life; the greatest thinkers the world has ever known were called stupid in boyhood and the greatest industrial leaders the world has ever known were handicapped in early life by poverty and poor education.

No man need to despair because he failed to secure a collegiate training in his youth. Some of the most successful men of the age never saw the inside of a college hall until they looked over some college they had endowed with their millions, but they were, nevertheless, the educated men in the truest sense of the word. They became masters of every faculty and quality of their being, mental, moral and physical. They mastered the fundamentals of their business; they dug down to the root of things and harnessed their knowledge to life and their life to knowledge; they wrested victory from defeat and success from failure; they received their diploma from that greatest university in all the world, the university of hard knocks. What other men have accomplished is only a promise of what we all may do.

What does this mean to us? It means that we are to get busy. We are to develop ourselves, to draw out and train to their highest efficiency the business getting qualities latent in us all.

I am here to say that it is just as possible to strengthen all the faculties of the mind and soul by a proper system of exercise as it is to develop the muscles of the arm by exercise. Nature is too good an economist to allow us to keep any faculty or function which we do not employ. We can have just what we use and that will constantly increase; everything else will be gradually taken away from us.

Let us now briefly consider several faculties which are valuable in business getting and business building. From the standpoint of objective mentality, we name four. First, intelligence, second, imagination, third, memory, fourth, will.

We find when we analyze intelligence that it is built up through a threefold process; first, apprehension or perception, that is, through knowledge which we perceive, through the five physical senses, seeing, hearing, feeling, tasting and smelling, and the point to remember is that every one of these senses can be trained and developed to a higher degree of proficiency, if we really try.

The second process of intelligence is judgment, which is nothing more than the comparing of two ideas. Employers often complain of the poor judgment of employes, but judgment can never be developed save as we first train the powers of perception.

The third process of intelligence is reason, which is the comparing of the two judgments to the end of arriving at a third judgment. While this may seem to be a piece of mental soil almost barren of ideas for the business men, yet if we irrigate, cultivate and fertilize it through the eductive and instructive processes of education, we shall be astonished at the crop of ideas we may raise.

The second faculty of mentality is imagination. The electric lights that illumine so brilliantly once existed only in the imagination of man. Some one imagined that electricity could be converted into light in this manner. He worked it out, through careful labor, and then his idea, no longer an imaginative thing, became a reality and of great commercial value to the world.

Our scientists are really our men of greatest imagination. Imagination is the power to reproduce, ideally, impressions

stored away in the great subjective storehouse. It is the power to call up a past impression and go it one better, improve upon it. That which impressed me at our great Exposition was not so much the winding lagoons or the towering columns as the thought of the mind of man that was able to construct that wonderful dream in his brain before a nail was driven or a boat was forged. Herbert Spencer tells us that the imaginative faculty is the most valuable of the human mind. It is certainly most practical in the work of modern business getting and business building. The employee, no matter how humble or how great; indeed the employer who goes along from day to day, simply doing his duty with no power of imagination, the power to do things without being told, who is just a treadmill man, who, never having known what the imaginative faculty is or how to use it, has never developed it, is never a progressive man, neither will become very valuable to himself or anybody else. In doing his work, he should imagine how it can be done better than it is being done today. Then through intelligent effort, work out his theory, thus converting the imaginative into the real. Of course, imagination must always be properly balanced by reason and judgment. It is, moreover, a great generator of enthusiasm and initiative, two of the most valuable faculties of the progressive business builder.

The great difference between the Chinese and the hustling American is in the power of initiative. The chinaman will reproduce any piece of machinery to the minutest detailed imitation, but he lacks the power of initiating new ideas.

The third mental factulty which the business builder should cultivate and develop is that of remembrance, the faculty, which, when developed, gives the good memory. The remembrance of facts, names, dates and figures is an important commercial asset. It may mean the difference between success and failure. When we master the law of concentration and utilize the law of association of ideas as an aid to concentration, there is no reason why we should not improve our faculty of remembrance—our ability to remember things.

The fourth objective mental faculty which I would mention as a business getting and business building asset is will—the lord and master of the whole mental tribe and kingdom. And what is will? It is nothing more nor less than the power of choice and action. We all have more or less will power. Why not consciously, intelligently, scientifically train and develop that particular mental faculty?

It is a mighty factor in the success of man. It is the man who thinks intelligently and acts, rather than the dawdlers who are always thinking a thing is all right and feeling a thing is all right, but never acting, who gets there with both feet and stays there when he gets there. What we want all along the line of business institutions, from the president to the office boy, are men and women with the power of intelligent choice and action developed to a marked degree—men and women who do it now and do it right.

Let us now consider briefly a few of the basic faculities of the subjective or the soul side of man, which are good commercial assets in business getting and business building. We will mention four; First, faith; second, ambition; third, love, and fourth, reverence.

The term subjective mentality is synonymous with the word sensibilities. It is that part of our mental life with which we feel in distinction from that with which we think, imagine, remember and act. We feel emotions of faith, loyalty and courage; we do not think those things.

First of the quartet which I mentioned is faith. Its negative is doubt. Doubt has killed more successes in the business world than the armies of the world have killed men. The business getter and business builder must be a man of faith. It must be intelligent faith, faith born of knowledge, ripened into realization. It must be properly balanced by reason and judgment, but we must have faith. It is one of the great spiritual laws of success.

Faith from a commercial standpoint—the kind of faith that counts in business getting and business building—I would define as that soul-quality of certainty, born of knowledge, ripened into realization. If we would have faith, then, we must know. We must have knowledge and that knowledge must be so thoroughly seasoned as to have ripened into wisdom. We must not only know things, but realize their truth and having gone thus far, we must act.

The next soul quality I mentioned is ambition, which, to be of commercial value, must be laudable and reasonable. It must be the real thing.

The third subjective or soul quality I mentioned is love, in a sense of brotherly kindness, a conception of the reality of the brotherhood of man. When once the business world awakens to the fact that love is the basic law of the universe, its relation to life and business operations will be seen to be more practical than it is now supposed to be.

The fourth soul faculty which I mentioned as a commercial asset in business getting and business building is reverence. I am not talking from the standpoint of religion, but from the standpoint of commercialism. The true side of reverence is a great commercial asset. I refer not alone to reverence for the Infinite, but reverence for ideals, reverence for greater men who have gone before, striving to become more and more like them.

There is a dawning and uplifting element in true reverence, which is wonderfully conducive to progress. The average young man or woman is apt to be afflicted with the disease of "knowitallitis," which is as dangerous from the standpoint of success as appendicitis is to the body. It sometimes takes very severe operations to cure the difficulty. Truly, "a little knowledge is a dangerous thing," and verily there is a vast difference between knowledge and wisdom. "Knowledge is proud that he has learned so much; wisdom is humble that he knows no more."

Those who are proud that they have learned so much, having a little knowledge, but no wisdom, soon permit the disease of "knowitallitis" to ripen into mental ossification, which is a most dangerous disease.

The human mind, to be truly progressive and eductive, must be a mental sponge, ready to receive and absorb the waters of knowledge from whatever direction they may flow.

From the instructive viewpoint, a business builder's training contemplates the impartation of useful knowledge. There are four factors in every business transaction; the salesman, the customer, the article to be sold and the sales transaction itself, and there are branches of knowledge pertaining to each of these factors, which it is well for the business man to have in mind.

First, he should be a student of human nature. The most valuable asset a business man can have, apart from sterling character, is a deep knowledge of human nature. The ability to size up men. Much of this, of course, can be learned in the school of experience, but the wise man will not neglect the scientific research of the age on this important subject.

There is a whole world of suggestion in the different types of men one meets; their mental activities as betrayed by their attitudes, their eyes and voices, their business motives and ideals as indicated by their conversation and dealings.

Some of the more prominent types we are all acquainted with: Here is the abstract thinker, the man with a bulging forehead. We all know that the only way to appeal to that man is through his intellect, by argument and reason. He wants facts, facts, facts, and he wants them stated lucidly, pointedly. There is still another type of the bulging forehead, but the development is more prominent right over the eyes. He is the looker. You must show him to appeal to him, that is, he must clearly understand what he sees objectively. He is the man on whom you will need to use the pencil, he wants to see the figures, your goods, your proposition. There is still another type, the man whose head bulges back of his ears. We all know him by instinct. He is the hale fellow well met, the social type, the man who enjoys a good story and a good time. The biggest part of that man is his heart. He has a brain and good judgment, but the way to his brain and judgment is through the door of his heart. The point to be noted is that there are two channels to the human will.

Our object as salesmen, whether personal salesmen or through the literary method—advertising—is to reach and influence the will of the one to whom we are seeking to make a sale. It does not take salesmen or salesmanship to sell goods to those who already want the goods. We must influence the will of the buyer. We must create desire where desire did not exist, if we make large sales. It is therefore important that we understand the different channels to the human will. We find in psychology that there are two channels to the human will: First, through the intellect; second, through the emotions. We might express the same thought in other words by saying that one is through an appeal to the objective and the other through an appeal to the subjective mind.

The trouble with many salesmen is that they pound away at the head all the time and forget the solar plexus of the heart. They forget that men have hearts as well as heads. It is all right to appeal to the reason and judgment, and to influence the objective mind through such appeal and through the avenues of the five physical senses, but it is a big mistake to stop there.

The subjective mind is the dwelling place of the emotions and the finer spiritual, mental and moral faculties and qualities of the individual to whom we are talking.

Let us also remember this fact, which here, you will perceive, ripens into one of vast importance: That the subjective mind is amenable to suggestion. In other words, it is the part of man, the part of the customer, which is the most easily influenced by suggestion.

Care, great care must be exercised not to go to extremes in this. Reason and judgment—the objective mind—is, after all and at all times, the controlling force, the governing power or governing board of the minds of able men. We must see to it that at all times our arguments are logical, that they are reasonable, that they are truthful, that they are in accordance with right and justice, then they will appeal to this governing board—the objective mind. But the man who stops there, and who is ignorant of or forgets the existence of the subjective side of the customer's mind will never become a truly great salesman.

I know you will agree with me that no one in the world needs to be more proficient in character reading than does the salesman, and yet there are but very few who pay any special attention to the development of their ability in that direction. We are all agreed, I know, that character reading rests very largely with the faculty of intuition, that finer cause which tells us what to do and how to do it. One of the great mistakes, which is all too prevalent, is the erroneous opinion entertained by very many that this intuitional faculty is a God-given or nature-given gift possessed by some and denied by others, and that if one does not possess it, he can never acquire it. This is all wrong. Psychology makes it plain to us that the intuitional faculty is merely one of the faculties of the sub-conscious mind. It is independent of reason and judgment. And how often have we found it true that the silent voice of intuition, which oftentimes our reason and judgment have pushed aside, was really correct in the judgment of men.

The commercial value of the faculty of intuition is almost beyond estimation. The question is: How can we develop it? Personally, I believe this to be a law of nature:

The intuitional faculty develops in direct proportion to the degree of development of the positive qualities in general—mental. moral, spiritual and physical

Within every human soul is a spring of intuition. It may be covered up by the mud and the crust and the slime of negative habits of life, negative faculties and qualities in general. Remove the debris of the negative and the spring of intuition becomes a flowing well. A realization of this fact brings home to us with tremendous force the commercial value of a development of the positive qualities. Aside from any question of ethics, morals, or religion, CHARACTER COUNTS.

And again from the instructive process of education let us see to it that we become better and better logicians. Whether he has ever studied logic or not, every good advertisement writer is a logician and every really good personal salesman is a logician. There are born logicians and made logicians. It is a faculty which can be cultivated and developed. In business a little logic is worth a lot of talk. It is through logic that we learn of analysis and synthesis, both of which are very practical in business getting and business building. It is through analysis that we divide a thing into all of its parts. The salesman should have his goods so thoroughly analyzed that he knows all about them, and there is so much in knowing all about one's work.

Again there are many salesmen who do thoroughly analyze their goods, but who do not, through synthesis, logically present the points at which they arrived in the analysis.

It is one thing to know all about one's proposition, and it is quite another thing to logically present the points, no matter how good the points may be.

"Haphazard" has no place in scientific business getting or business building. True salesmanship is the power to persuade others to purchase at a profit that which is for sale, and logic enters most potently into the power of persuasion.

The advertisement writer should pay very careful attention to this particular feature, because of the value of space. The personal salesman does not need to be as careful or as sparing of words as must the salesman by the written method. The difference between the logical and illogical speaker or writer is just the difference between order and disorder, and order is one of nature's first laws. Great men and great institutions reflect nature's laws.

Again, we should know something of the modern science of psychology. The science that treats of the laws that govern the human mind. We all concede that the electrical engineer who neglects the study of electricity would be a very unwise man. It is the dynamo of his engine, the force which propels it, and the human mind is really the great dynamic of this human engine of ours.

How essential it is then that we, as engineers of this human engine, understand the basic laws that govern the mighty propelling force of human life and human thought. Take the law of tact. What a valuable asset it is. The man who knows what to say, when to say it and when to stop, is in possession of a gold mine. The trouble with most of us is, we talk a man into the acceptance of our proposition and then we talk him out of it. We make a sale and then we spoil it because we do not know when to stop and give the party a chance to accept our proposition.

Why is it that we pay some men $500.00 a year and others $5,000.00 a year? It is because the latter has some gray matter in his brain box and knows how to use it. It is stated that the average man is worth about $2.00 a day from his shoulders down. There is nothing so cheap in the world's market as muscle force pure and simple. The difference between $2.00 a day and $5,000. a year is what we pay for the head a man carries on his shoulders and for the brain force he manifests.

There is one simple fact in psychology that I must take time to mention, and that is the mental law of sale. A law as certain in its workings as is the law of gravitation in the physical world. The science of business building is in essence really the science of persuasion; that is, your purpose is to influence your customer to choice and action, not by a hypnotic process, for that would be highly unscientific from a business viewpoint.

I refer to intelligent persuasion, resulting in intelligent choice and action. I believe in the law of mutual benefit. I believe the interest of the buyer and seller are mutual in scientific business building, but there are plenty of people, for instance, who do not want to buy advertising space when it is really to their best interest to buy it. The same is true in every line. We have to persuade them. We have to influence the will, but whether we are seeking to capture Will through advertising, or by means of the spoken word, there are three outlying forts to capture, and the first one is Fortress Attention—the mental process of attention.

And with Fortress Attention captured, there is another which we will call Fortress Interest, a mental process distinct from attention, although it is really prolonged attention, for attention properly sustained will develop. Our would-be-customer must become interested if he ever buys.

And the next is desire. We must now capture Fortress Desire. The customer must desire that which is being offered for sale, and desire it more than he desires the money with which he will have to part in order to secure it. When desire becomes strong enough our mental Port Arthur—the choice and action—the human will—surrenders.

Thus it will be clearly seen that we have a mental law of sale and it is, attention properly sustained will ripen into interest; interest properly sustained will change into desire; and desire properly intensified will ripen into resolve to buy.

In conclusion, we must not forget some of the old fashioned laws that will never be out of date. I have spoken of confidence, personality, character and health, as well as the useful branches of knowledge, and these are all of value in proportion as they are energized by an intelligent use of the law of hustling—the law of work. Nothing can take the place of work. We say of some men that they rise from nothing, but upon that nothing they build a tremendous lot of hard work.

This world was not built for sluggards. Lazy men have no chance in this life, and I hardly think they will have much of a chance in the life to come. That man is ready for his coffin. He slouches along through life content with his own stupid self, too lazy to arouse himself to the task of being some one and doing something.

We call Edison a genius, but Edison tells us that genius is more a matter of perspiration than inspiration. That if he has any genius, it is the genius for hard work.

We must get up with determination and keep at it all day long, if we expect to go to bed with satisfaction.

By work I do not mean the work of a slave, but the work that is mixed with brain stuff and soul stuff; then work becomes a pleasure because we love whatever we put our brain and our soul into.

Then there is the law of thoroughness. Nothing is good

enough if it can be made better, and better is never good enough if it can be made best. The great danger is that we shall be content with a good average rather than the best.

I like that remark of the eastern manufacturer of hammers, whose wares have become famous for their worth. "You make a pretty good hammer," said a customer. "No sir, we do not, we make the best hammer that can be made."

There is thoroughness for you. There is everything in that word thoroughness—persistence, personality, interest, concentration, close application, honest work, success.

Then there is the law of perseverance, keeping everlastingly at it. Victory such as Napoleon's belongs to the most persevering; not a stupid perseverance, but a perseverance that has mapped out an intelligent campaign, and then like Grant, never knows when it is licked, but forges on and on to Richmond and Appomattox.

"Never despair" says Burke, "but if you do, work on in despair."

Finally, let me quote a little poem from Henry Austin, that contains a world of inspiration for any thoughtful man:

"Genius, that power which dazzles mortal eyes,
Is oft but perseverance in disguse.
Continuous effort, of itself, implies,
In spite of countless falls, the power to rise.
'Twixt failure and success the point's so fine,
Men sometimes know not when they touch the line.
Just when the pearl was waiting one more plunge,
How many a struggler has thrown up the sponge!"

NEWSPAPERS AND REFORM.

BY WILLIAM ALLEN WHITE, EDITOR, GAZETTE, EMPORIA, KANS.

THIS is a day of reform. Everybody is engaged in reforming some one else. The preachers are reforming the newspapers, the newspapers are reforming the politicians, the politicians are reforming the railroads, the railroads are reforming the tariff magnates, the tariff magnates are reforming Standard Oil, and Standard Oil is reforming the preachers—so the happy circle is completed, and when the bull-dog of reform finally does catch his tail and swallow it and turn himself inside out we shall have a fine country. Generally speaking, most reformers are carrying their reform as a side line. They make traveling expenses on it. It doesn't cost the preachers anything to reform the newspapers. In fact, the preachers get a good deal of top column next to reading matter space out of it that they would hardly get if they devoted themselves to the perseverance of the saints, and higher criticism. It doesn't cost the politicians anything to reform the railroads—not that any one knows of. The politicians keep right on riding on transportation from the law department of the railroads, while whooping it up for railroad reform, and it doesn't cost the railroad presidents anything to be for tariff reform, and what's more, it doesn't seem to hurt the tariff. If the railroad magnates were as serious about tariff reform as they are to see that the trusts get their rebates, there would be some tariff reform. And the beneficiaries of the tariff aren't losing much by reforming Standard Oil. Any one can reform Standard Oil. It is the punching bag in the National reformatory that we all try our muscle on. Standard Oil and its associates form a whole carnival of pleasure—one round of joy for the reformers. In one booth are the Rockefellers and Henry Rogers, and their friends, and it costs nothing to throw at these babies and every time you hit a baby in the Standard Oil booth you get a fine cigar; two babies two cigars, and three babies a subscription to *Everybody's Magazine*.

The only place in this bright and more or less beautiful world where reform takes the hair and the hide, and the tail thereunto appertaining, is in a newspaper office. It costs a newspaper to go into the reform business. If you tackle the beef trust, brother editors, you will hear from it when you make a contract for Vigoral, and the beef extracts. If you tackle the railroads, you will get a chance to see more scenery to the square mile when you travel than you have been used to observing. If you tackle the politicians they will start another paper which won't hurt you particularly except as it is a disgrace to the honorable profession in which you are shining. If you whack away at Standard Oil there is danger of losing you Mica Axle Grease and parafine candles advertising, and if you are for Sunday closing you are in danger of losing you tobacco and cigar and malt nutrine advertising. Yet you must reform something. The people demand reform. And if they don't get it they will stop the paper. After a long session of meditation and prayer the *Gazette* has come to the conclusion that the only safe thing to reform is the Russian navy. It needs the reform and the czar only gets our valuable papers through a clipping bureau, and if he should decide to blister the varnish off several clipping bureaus no one would care much. The thing for all true reformers to do, therefore, is to go after the czar. Did you notice that our beloved president—the most exalted trust buster, the reformerissimo has this week passed a few hot ones to the czar? That means that he is merely getting his breath, sparring for position in the big home fight. He knows it won't hurt the czar, who is always for peace anyway, and it will give the president a chance to get his wind in the Panama matter.

The president is a successful reformer. He has done many useful things, in a fine way. He has had the big national stage and has been under the limelight for fifteen years. He has won the championship belt for four years and has been in the heavyweight class for a long time. More than that he gets his gate money regularly whether he wins or loses. But sometimes when the telephone in the *Gazette* office is having a fit, and the man with a firm-set mouth, and a haughty air is in the business office stopping his paper, there comes a funny thought to the editorial mind: What do you suppose Roosevelt would do if he was running the Oyster Bay *Tribune;* would he go right after the gamblers and saloonkeepers and violators of the law, who lived in his town, would he print the item that showed how the local banker was gouging in his interest account, would he dare to go to the courthouse and get the personal property tax list and run it—or would he consider the larger good and take his typewriter in hand and blaze away at the practice of polygamy in Utah, the iniquity of the fruit trust in California or the violation of the game laws in Maine? It is one thing to be a president with fifty thousand dollars a year raining on the tin-roof whether you work or not, and quite another thing to be the editor of a country paper in a board sidewalk town, dependent upon retaining the good graces of the people for your board and keep. There is something inspiring in the sweetly solemn thought that you don't fear Saturday night, that gives a president a courage in busting the trusts, which a country editor knowing that the boys are tired of taking orders for their week's wages on the clothing store—someway doesn't feel. Roosevelt is a brave man, but if he was running a country paper, and found that the chairman of the printing committee in the council was getting a good many orders for pauper groceries in his store contrary to the letter of the statute—do you suppose the president would open up in the next week's paper and print all of the news? Grover Cleveland did a brave thing in sending the troops to Chicago, but if he had been running the Buzzard's Bay Weekly *World* do you suppose he would have had the nerve to jump on the druggist for illegal sales of liquor whose wife came over to sit up with the Cleveland children when they had the scarlet fever? Joe Cannon is supposed to be indifferent to public clamor, but if he was running a little country daily down in Illinois, and a lot of advertisers came to the office to tell him that they would order out their ads if he didn't stop printing the news about the smallpox and driving trade from town—what would he do? The eternal cheerfulness of President Roosevelt is remarked the world over. A man can afford to be cheerful who doesn't have to take anything out in trade and gets all his salary in cash. But supposing, after he had plugged away for twenty years making the best possible paper for Oyster Bay he should find out that a number of his neighbors and best friends were encouraging a young man to come down from New York and start a bright, snappy paper, and were telling this youngster that if some man would just come to Oyster Bay with a little enterprise he would have no trouble in running Roosevelt out of town in a year or so! Wouldn't that take the kinks out of his grin and make his face look like an aggravated case of before taking? He can preach the simple life and have pie for breakfast in his present high estate, but if he were running a country paper there would be five thousand considerate critics in Oyster Bay and vicinity who would read the files of his paper and paste things in the scrap-books and throw them up to him every time he changed his mind.

And now all this brings up the question: What are we

here for, and if so at how much a line? Here we are American editors grunting our collar buttons off on the lever that moves the world, with the old handle flying up every few days knocking out our teeth, taking fifty per cent of the legal rate for printing, while statesmen are taking a hundred and fifty per cent of their pay; here we are galloping up and down the earth carrying other people's burdens, bearing other people's sorrow, and taking our pay in due bills on St. Peter—and all for what? For the fun of getting the smell of news ink in our noses, for the joy of ripping open the familiar old exchanges, for the pleasure of making a three days' speech every ninety days at the note counter of the bank, for the delectation of getting complimentary tickets to church socials and for the sweet satisfaction of being too unpopular ever to be asked to act as pallbearers at funerals. It is a great business—this newspaper business. And reforming the world is a mighty happy diversion, and if Andrew Carnegie forgets us with his hero medals there is some comfort in knowing that as we turn to the right when we finally go up, we have our harp check paid for by the best line of free church advertising that ever has been printed in the world.

SOME PRINTING HOUSE ECONOMICS.

BY PRESIDENT-ELECT HON. JOHN DYMOND, "SUGAR PLANTER", NEW ORLEANS, LA.

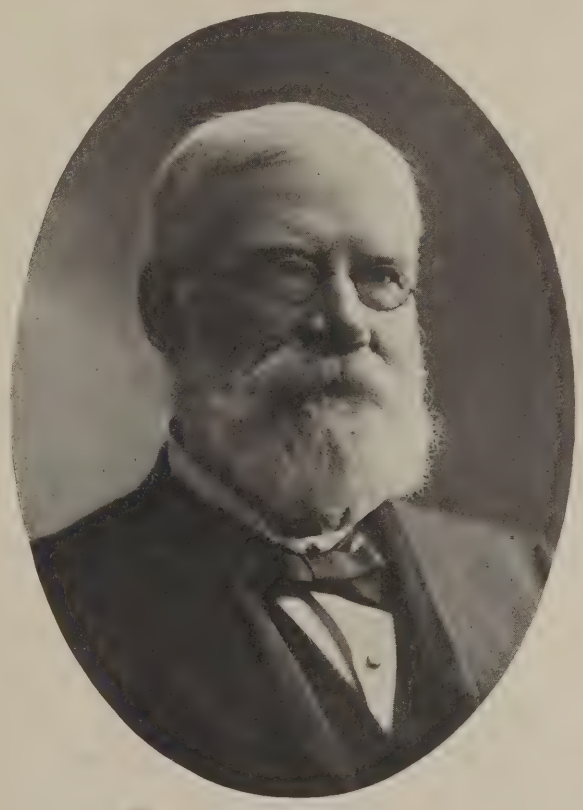
TO one who comes into the Art Preservative in later life, with no matter what literary, mechanical, commercial or scientific bent of mind, there comes, necessarily, under his observation the leading features of the new industry, resulting in a comparison of it with other lines of human activity in which he may have been previously familiar. The avenues of approach to this great business in which we are all engaged, are quite numerous, and while the orthodox way in the past has been that of Horace Greeley, to begin at the bottom of the ladder on the mechanical side of our industry, and to ascend to its highest pinnacle, step by step, there are other ways. In our great cities we now find many of our brightest newspaper men have risen from the reportorial ranks and started in the beginning as practically messenger boys to make some slight inquiry for the city editor of the journal with which they were identified, and as ability and general comprehensiveness became displayed, their sphere of action widened and finally these men became the editors of the journals with which they were identified, and yet, may have known not a single thing as to the mechanical side of a printing house, nor even the names of the type used, nor the cost of composition, the qualities of ink or of effective presswork and prompt newspaper delivery and generally effective circulation and the securing of subscriptions, of advertisements, of successful collections and prompt payments of all accruing bills, all of which features are essential to success. In other words, while the time has been when to be a successful newspaper man it was desirable to begin at the bottom of the ladder with an apprenticeship, leading up through the entire mechanical side of the industry, with final possibility of blossoming out on the intellectual, or business side, in full control, we now find that this great industry is specialized in its several departments and subspecialized into minor divisions, until we find that, as is sometimes said of the pin, it takes ten or twelve men to make a single pin, it now takes many men and many machines to make a newspaper.

THE TRUE ECONOMY.

The far reaching consideration then, that is demanded of a successful newspaper management, involves in the smaller business a sufficient knowledge, mechanical, commercial, literary and financial to cover the entire ground. And in the greater establishments, while the special horizon of those interested may be narrowed to the particular sphere in which they are engaged, there must be a broader and more comprehensive view of their own immediate functions, a greater ability and a greater intellectual comprehension to withstand the constant tides of improvement and competition that will overwhelm every laggard in this, as in every other line of human activity.

From all this we may judge that while printing house economics may include hiring all the boys at the smallest possible salaries, the purchase of supplies at the lowest possible figure, the rental of indifferent buildings in back streets, at low rates, the result in actual net gain may be less than where a more comprehensive policy is pursued, larger salaries paid to better employes, higher grades of supplies used, better buildings utilized, and a generally higher stand taken in the industrial and intellectual world. From this point of view, we may see that what would seem to a cursory observer as extravagant management, might, in the end, prove to be true economy, as bringing about, finally, by far, the most profitable results.

To take up the economics of the printer's art from this broad point of view, to show why it articulates into every phase of our lives and to suggest improvements in any, or many of those phases, is a far wider task than we can undertake here, and it would be better for us to drop the philosophic consideration of our industry and leave the young men and women who are engaged in it to seek in their own minds such inspiration as they may, to make all the efforts in their power for higher attainment. I shall restrict myself to some of the plainer phases of our industry, wherein the term Printing House Economics may seem to have an immediate or more direct application than in the wider view hereinbefore suggested.



PRESIDENT-ELECT HON. JOHN DYMOND.

HAND WORK NO MORE.

Within fifty years American industrial life has passesd from hand work and hand tools to more complex machine work and automatic tools. In no industry is this more evident than in the printing industry, and those of us who lag behind in the way of mechanical application, are simply losing time. For the purpose of driving machines in a small way, gasoline engines are frequently the most economical original motors, although where fuel supplies are sufficiently cheap, the prime generator may be steam apparatus. But with the procurement of sufficient motive power, there can now be no question but that each individual machine in a printing house should be driven by a separate motor. This is made practicable with our modern electrical apparatus, and in all the great cities an electrical supply can ordinarily be had at reasonably fair prices, and where this cannot be done, then the printing houses themselves should, with their original power, drive a dynamo, manufacture their own electricity and distribute this through individual motors to the various machines where power may be needed. The old method of long lines of shafting and connections with pulleys and belts has

had its day and is being discontinued in nearly every industry, the ready divisibility of electric power and the diminution of waste from not driving unnecessary lines of shafting affording now an economy that all familiar with the mechanical side of our industry are endeavoring to secure. All this will apply to the power consumed in the elevators in our printing houses, in driving our Mergenthalers, our presses and binding apparatus. No fireman is needed, no fuel, dust or smoke had, and the motive power of the establishment estimated in the conventional horse powers is secured by the turning of a button, the electric companies doing the rest.

There is a degree of enterprise, audacity, intellectual development and actual intelligence in the American people that is a surprise to the intelligent foreigner, who comes here examining our civilization and salient characteristics. In utilizing these peculiar qualities of our American nature we frequently surprise ourselves. It was but a generation ago that it was considered Utopian to dream of a railway across our continent, and only the military protection of our Pacific coast made the first railway practicable. Our government was concentrating its Indians from their various reservations in the older states, out in the Indian Territory and yet, today, we stand in the city of Guthrie, in the Territory of Oklahoma, recently a portion of the Indian Territory, in this beautiful city with its great buildings, its paved streets and the capital of one of the coming states of the Union, of which we shall all be proud when its star is added to those on our national flag. Nowhere along industrial lines are these peculiar qualities more evident than they are in the newspaper business. In this very city there are in operation now long lines of Mergenthaler machines, costing thousands of dollars each, presses of the best variety, editorial and reportorial skill of the highest order, engaged in turning out these splendid newspapers that have resulted in bringing this representative body of men from all quarters of our country here in convention. Truly, this Fourth Estate of ours in the splendor of its power, in its magnificent grasp upon the affairs of the country, in its capacity for the direction of the affairs of the nation and in general leadership, has today attained a far greater power in the direction of human affairs than those of older estates, the clergy, the nobility and the commons, that in modern minds have been thought to dominate the affairs of mankind.

SELF-INTEREST DRIVES THE WORLD.

Ever since men have been employed industrially the most effective display of effort is brought about by the somewhat repellent sentiment known as self-interest. And yet we know that it is self-interest that drives the world, and insofar as we can successfully utilize it in those whom we control we can secure higher and higher economic results. One would think that you could hardly estimate in hours or days of time the value of a great painting, and yet the world places its value on such by seeing in the work done the breadth of view, the touch of human sentiment, the intrinsic beauty, the care in detail, the homogeneity as a whole, the choice of the subject itself, and all these make up the artistic unit that the world values the most. Whistler's picture of his mother is one of the most beautiful, most admirable, most adorable creations of this kind, and we could hardly measure it by the hours consumed in its production. At the same time we find our great novelists produce books of so many thousands of words each for a given sum, and that some measure is put upon the work of practically every man. In our shops and factories with the automatic work of machines, it is found that the very best results from an economic point of view, are brought about in that way. In every printing house it would be desirable to develop piece work as far as is possible, without destroying the machinery or excellence of the work done. Some years back a friend of mine was engaged in the development of a great industrial enterprise and saw fit to send out many thousands of circulars. It was before the day of the various duplicating machines that are now used and in this immediate instance an employe was used to address envelopes. He was faithful, industrious and skillful, and entirely satisfactory to his employer, who commended the work he did. Still it was desired that more envelopes be addressed and another employe was sought. It occurred to the employer, however, to ask the young man engaged in this work whether or not he could increase his work to any extent taking his daily output as a measure of a day's work and to be paid for his extra work. The young man tried, and by utilizing every moment of time by endeavoring to do all that he could, or that his physical condition would permit, increased his work at once about 50 per cent, and finally doubled it. This is the history of human effort everywhere. Nearly every one of us can do double the work we do, if we are willing to make the sacrifices of time, devotion and energy therein necessary.

PIECE WORK PAYMENTS.

In a printing house it is usual to pay compositors in the standard work on the basis of whatever work they may do, and this is one of the chief expenses in all printing establishments and has resulted in a custom of payment of piece work, satisfactory alike to employe and employer. In the setting of advertisements, in the makeup of newspapers, in presswork, and in binding, piece work to the operatives is more difficult of arrangement, if not entirely impracticable. Compositors never made so much as now when they use Mergenthaler machines, and the work they do when the operators are skillful and the machines in good order, is always excellent. Again, the work is always new, new type are had for every job, and the machines generally give an adequate range of faces, and against this we know that ordinary type is quite a perishable commodity. There may be other successful typesetting machines, but thus far the Mergenthaler, or Linotype, seems to hold its place very successfully against all competitors, and practically all of the great printing establishments in this country use it.

The life of standard type is sometimes placed at 300,000 impressions. There may be some doubt about this durability, as we all know that they can be destroyed with a very few impressions in careless presswork. Electrotypes are presumed to be more durable than standard type, while Mergenthaler linotype slugs are estimated to stand 100,000 impressions at a maximum, averaging about 50,000 impressions, and of course, may be destroyed, or ruined with very few impressions. Stereotypes should have about the same durability as the linotype slugs. Therefore, it is manifest that in any large jobs of work, stereo or electrotypes should be used, and, of course, this is why all of our leading newspapers use them, the extent of their issues rapidly injuring ordinary type and the modern mechanism of web presses demanding stereocasts for their operation. In large jobs it is important to have two, three, four, or more, stereos or electros, so that the presswork can be done in larger sheets and with greater economy.

In the matter of job work composition and newspaper makeup, there have come in during recent years some very material improvements which, while expensive as to their total cost, will be found labor saving and profitable. All type should be cast upon the point system, with lining faces, and all rules, leads, slugs, furniture, etc., should be made to standard gauge, and the lead and rule cutter thrown out of business and locked up to prevent the destruction of these valuable materials, all arranged to gauge to obviate their cutting. By this point system there can be secured a delicacy and permanence of setting that is impossible where odds and ends are used to fill the spaces.

Discriminating advertisers should detect every blemish in their advertisements. Hence the necessity arises for maintaining the stock of advertising type in excellent condition. If ascenders and descenders are broken off, or other injuries occur, the effect of the display is injured and new type should be had.

In the matter of presswork, how few presses are first-class and how few socalled pressmen are thoroughly competent, and yet how much of the appearance of a newspaper depends upon the excellence of this development. A skillful pressman, by the proper manipulation of his cylinder will bring out handsome work, where a less skillful one would have his sheets too black and too light in places. Even a skillful pressman can hardly do much with ink of quality too low for the work in hand. In some large cities the daily journals use ink worth about 8 cents per pound. In the publications coming from our own printing house we use ink costing as a minimum 25 cents and from that up to $1.00 a pound, and on the *Louisiana Planter* we use ink costing 50 cents per pound. These data indicate a wide range of prices in this essential of printing and the necessity for a careful consideration of the work to be done in the purchase of the ink.

The paper problem presents the same difficulties, the competent pressman will do the best he can with the ink and paper in hand, and should not be blamed for imperfect work if the quality of either of these essentials is below the necessary standard for the work in hand. We believe that in New Orleans now we are turning out in common newspaper work and in high grade work as artistic, as effective and as generally excellent work as can be done anywhere in the world, with the same resources, and the details herein

given cover the general economic features of the work.

The cornerstone of modern newspaper work is the advertisement. It may seem a little strange, a little coarse, to load down a volume of poetry, a literary magazine, a weekly literary paper, or a daily metropolitan newspaper with advertisements. The first purpose of all these publications is to convey to the reader the ideas involved in the poems, in the magazine articles, in the weekly literary articles and in the daily newspaper articles, and yet the business world was quick to see that if their advertisements could be placed alongside of a readable article in a daily or weekly newspaper, or bound in with a monthly magazine, such advertisement would be particularly effective, and the world has availed itself of this until we now find that advertising has become the cornerstone of the periodical publication and without which support the whole business would practically sink into ineffectiveness and the entire literary world would have to be reorganized. This being the case every newspaper man should consider this corner stone of his business and endeavor to develop it to its greatest possible extent. Advertising is an art, and in many cases, a very high art. As Herbert Spencer has so well said, style in language should sacrifice all other qualities to that of conveying to the listeners or reader the ideas involved with the least possible friction. So it is in advertising. Advertisements should be effective. To be effective as a rule, they should be handsome. As we all know, the average advertiser is not well versed in the finer elements of this business and there is growing up a class of professional advertising writers who are striving to attain such proficiency in their business as to create a demand for their services. Thus far the composition of the advertisement has depended for the text upon the advertiser, and upon the printer for its artistic setting. This setting of advertisements is really a high art and the foreman of a printing house, upon whom the responsibility devolves for these settings, can't well be paid other than a weekly salary and that dependent upon his admitted ability. Many printers make the mistake of buying a multitude of faces of display, in small fonts in order to have a variety. Experience indicates that fewer, large fonts of well selected faces, will give better results from both the artistic and generally effective points of view. Floor space, cases and labor are all saved and the general results are more satisfactory than otherwise.

I might say, in conclusion, that few people in the industrial world have any idea of how close a business the printing business is. It is generally imagined that the margins of profit are very wide, that the men engaged in the work are not ordinarily very good business men, and yet, if these parties will go into the printing business they will find that it is as difficult to run a successful printing business as it is to keep a successful hotel, to run a steamboat profitably, or to make money out of agriculture.

LIBEL AND PRIVILEGE.

BY D. M. BUTLER, LEGAL NEWS, LINCOLN, NEB.

THE prospective libel suit we have always with us. No publisher of a general newspaper can feel that he is at all times exempt, it matters not how much of an effort may be made in the direction of accurate statement or fair and reasonable comment. I recall the fact that even a publisher of a legal newspaper edited by lawyers may be made a defendant and that too when the plaintiff has a good cause of action. In this particular case the editor had stated that a certain firm or corporation in St. Louis had gone into bankruptcy, when he should have stated that said corporation as creditor had forced another firm into bankruptcy.

The question then remains, and it is one of perennial interest and importance, how shall we lessen our risks and liabilities in this direction? There may be two or three things to do, some of which can be done individually, but some of which must be done by the publishers collectively. The one is to use the greatest possible care, at least as much care as is consistent with the production of a newspaper which is readable, forcible and independent in its editorial department; others, by legislation enlarging the liberties of the press growing out of the various occasions upon which statements and criticisms may be published, and making some things certain which in some jurisdictions may be deemed uncertain then require every editor and reporter to have a good working knowledge of libel and privilege.

I don't take the ground as do some writers that the law is all against the editor, or that the law is uncertain or cloudy or difficult for the editor to understand or classify. This may be true in some instances as we shall see but I believe that in most cases the editor can acquire a good working knowledge of the subject thereby enabling him to better appreciate the difficulties and feasibility and importance of securing practical legislation. An understanding of libel and privilege has a larger and broader value than that which may simply grow out of a desire to avoid litigation and what may be saved to the publisher by avoiding a libel suit.

Law is the perfection of human reason. A study of legal principles has a tendency to enlarge the much needed judicial temperament which should characterize the work of every editor and local writer. A leader of thought can better pursue his labors if there is some evidence in his work of the writer at some period in his life having taken a course in applied logic.

There has been a tendency at times on the part of publishers to complain under the claim that the law is all against them—a tendency to find fault on account of certain liabilities which they believe should not exist. Sometimes it amounts to almost a claim of special privilege on account of the public character of the work at hand. All these expressions, be they pro or con, have very little to do with the law. Such expressions being mere matters of opinion in which publishers are quite well united on the one hand, and people of other classes taking to some extent an opposite view.

D. M. BUTLER.

The law of libel to a large extent is, of recent growth, and in some respects is a separate branch of the law. This is true with respect to the interpretation of the questions of privilege which grow out of the various occasions under which libelous statements are published as well to the question as to what is reasonable and fair criticism. One writer has been known to state that there is no branch of the law which is so difficult to reduce to exact principles as the

requisites of libel. But students of the law have been compelled to recognize the fact that insofar as general common law principles have been applied they have been made to find their proper place the same in libel as in other classes of torts as well as in contracts and remedies.

LIBELOUS LANGUAGE.

For instance we have two well known legal maxims, the one *deminimus non curat lex,* which means that the law takes no notice of trifles. This is applied to contracts as well as torts. The other *damnum absqua injuria,* which means a damage without injury, or more liberally construed, a wrong for which there is no legal remedy. These maxims I believe to have been conscientiously applied to the question of libel, and in this branch of the law it is observed that it has been applied more frequently than it has in all other branches, notwithstanding the comparative infrequency of libel litigation.

For instance as applied to a remedy growing out of contractual relations, a court once held that an error of $7.50 in an equitable proceeding, when the amount involved was many thousands of dollars was considered too small for the court to take notice of the error, and the decree should be allowed to stand. As applied to torts it was once held not to be actionable when the proof showed that the defendant had passed over the plaintiff's lawn, with a loaded wagon; this may have been very annoying to the plaintiff, but the theory of the law is that there is no cause of action on account of the personal feelings of the person injured. As applied to the question of what is and what is not libelous it has been frequently applied, the cause of action being based entirely upon the question of the opinion of the public or those reading the article providing the statements are believed to be true.

There is no information so far as known as to whether it would be libelous to state that a man was a negro or nigger, if the circulation of the statement was confined to the northern states. We must admit, however, that there is more or less prejudice in that section against the race. This is true even in the western capital which takes the name of the Great Emancipator. The question however, has been settled by courts of southern jurisdiction.

About three years ago a correspondent at Baton Rouge, La., sent to the New Orleans *Times-Democrat* a news item in which was given an account of a temperance meeting held at that southern capital. The correspondent attempted to be complimentary, and among other things stated that the Rev. Thomas J. Upton who spoke at the meeting was a cultured gentleman, and his arguments in favor of the election were eloquently presented. In the course of transmission the word "cultured" was changed to "colored," and following the rule of the office the word was changed to negro, and the report appeared in the newspaper in that form. Notwithstanding a retraction and explanation in which the newspaper stated that the Rev. Upton was of the purest Caucasian blood, a jury at the trial returned a verdict of fifty dollars against the publisher, and this judgment was affirmed by the higher court. It is well to call your attention to some language used by the judge who wrote the opinion for the court: He said "The words complained of were provoking in an extreme degree. Inserted as they were in one of the daily papers, it was enough to arouse the most profound indignation of the most patient man."

Applying the principle announced, a libel has been defined to be a publication of any statement which would cause right thinking people to hold an evil opinion of one. This, of course, is applied only to the most common forms of libel, and it enables us somewhat accurately to draw the line. Courts have at times been accused of being somewhat partial to the profession. For instance, it has been held not to be libelous *per se* to publish a statement that a person had made a contract under an assumed name, unless accompanied by a statement that such contract was made with some dishonest purpose. It has also been held not libelous to state that a party had taken advantage of the statute of limitations or any other legal right which either the common or statute law allows. The principle is further illustrated by a case in which a libel is written and sent to the person who is charged with the wrong doing. There is no publication unless the libel is seen by others. There is probably a publication, however, if the libel is dictated to a stenographer or sent to the printer, or is seen by the pressman, or even though the issue of the paper containing it is entirely suppressed. This is on the theory that there is no cause of action on account of the annoyance to the individual. We must remember, however, that the measure of damages is guaged by the degree of publicity.

Following the principle still further it would not be libelous to misstate one's occupation if a lawful one, or his religious belief, or nationality. The law, however, is flexible and the whole scope of the publication ought to be taken into consideration. It would probably not be libelous in some communities to state that a named person was reputed by her neighbors to be a witch, for at the dawn of the twentieth century this might be regarded as a trivial matter, but where the statement was published in a community where the people believed in witches it would cause the party to be shunned and avoided by society, and the plaintiff was allowed to recover.

CITES A CASE.

A variety troupe which became stranded at Albany, N. Y., was quartered at the Columbia Hotel in that city. The morning *Journal,* published at Albany in commenting on the impecunious condition of the troupe pictured at some length their condition incident to their inability to pay for their board and lodging. After giving the names of the different members of the troupe, the principal allusion to the landlord of the Columbia in connection with the case was the statement that they were at the hotel without money to pay their bills; that the landlord refused to furnish food and lodging to them without pay; that the three-year-old daughter of one of the performers who had no money got no food in the diningroom, where she cried piteously for it, and that the baggage of some of the members was retained for their bills.

In an action by the landlord against the Morning Journal Co., the supreme court of New York decided that the language was not libelous. The judge who wrote the opinion for the court said, that a "hotel keeper has the legal right to hold the baggage of guests for the non-payment of their bills, and it is a matter of common knowledge that the right is frequently exercised, nor is it libelous to state that he refused food to guests who have no money to pay for it. This is as much his privilege as it is the privilege of the grocer to refuse to sell bread to those who have no money to pay for it."

Inasmuch as language is not actionable on account of the personal feelings of the individual this dicta is subject to some criticism by those who are keeping strictly within the meaning of the law. In order to fully justify himself the judge should have said "The language was damaging to the highest degree. The statement if believed to be true would cause the plaintiff to be shunned and avoided by society in every community in which the newspaper circulated, or which would otherwise through the publication be reached either directly or indirectly."

As an illustration of the difficulties which at times arise in reducing the subject of libel to exact principles, we shall now consider three or four cases, withholding our judgment as to the libelous character until all the evidence is in. Considering the fact that courts are at times controlled by the style and scope of the publication as a whole, we may be in some case at a loss to know just where to draw the line.

The Detroit *Journal* once published an article which with the headlines was substantially as follows:

"JOKE ON STYSKAL."

"BOUGHT A STOLEN WATCH TO HELP A PRISONER."

The article in effect, stated that the jailer accepted a gold watch from a prisoner as security for five dollars advanced to pay the prisoner's fine, and that the owner of the watch which proved to have been stolen a few days later identified it. The language was decided by the supreme court of Michigan not to be libelous, the court saying that it charged no criminal or immoral conduct, and that the language taken in its strongest sense conveyed the idea that the prisoner was willing to part with the watch to pay his fine, and that Styskal took it to enable him to do so.

As companion pieces to these cases are herewith presented for your serious consideration, two New York cases. The first is that of Martin vs. New York Press, and reported in 87 N. Y. Supp. The decision was to the effect that it was not libelous to misstate one's financial condition, but when such statement is made with newspaper coloring, the article as a whole is libelous *per se.* The newspaper had published the following:

CANNOT MAKE A LIVING.—Old Oxford Professor and Family in Sad Straits.—That the battle for existence is not made by brains alone is illustrated by the sad plight of Prof. Alfred Nolan Martin, at Richmond Park, Staten Island. A man of extraordinary attainments in classical learning, and once a professor at Oxford, he is now in sad straits

because his education hampers him in earning a living. He is living with his wife and two small children in a house which has not a single window or door enclosed. He is too poor to furnish his dwelling, and too proud to ask aid. His neighbors say he is starving * * *."

This case follows others, the most notable of which resulted from a publication in the New York *Sunday Mercury* in 1867. Eliminating much of the recital, the following is quoted from the article:

"In this garret or attic live, or at least breathe, two females, the one a very nice old person, evidently by birth and education if not by present position, a lady, the other younger but looking as old if not more elderly than her companion. On her face and tall and thin figure, care has done its work. Her large eyes are dilated with watching and the countenance is sallow with the weary load of anxiety and hope deferred. She is attired in brown muslin of the cheapest sort. Speaks but seldom and is entirely indifferent to society."

The article in question was many times the length of the portion quoted, and more or less in the same strain, winding up with what purported to be a history of the case, and the cause of the financial downfall of the parties, which was shown to be the neglect of a relative. The court held that although mere poverty is no crime and ought not to expose a person to ridicule, yet one may be so circumstanced, and the facts of his alleged misery be so put as to excite ridicule and nothing else; that in considering whether or not an article is libelous, it is not always necessary to consider the effect it may have on the general public but the effect it may have on the friends and neighbors of the person aimed at. The court said: "It comes to this, that the question of whether or not the matter is libelous so as to be actionable depends upon the style, scope, spirit and motive of every publication taken in its entirety."

The story of the refusal of the landlord to give food to guests in the diningroom because they had no money, could have been told in a few lines, as could also the story of the joke on Styskal, yet a full column was devoted to one and more than half of said space was taken for the other. The stories were both somewhat sensational, especially that portion which portrayed the children of the actors who cried piteously for food, yet in both these cases the courts declared the language not to be actionable.

The story of the poverty of the professor, as well as the impecunious condition of the females could have been told in a few lines, yet in both cases the language was declared to be actionable, and solely on account of the sensational character of the statements. On account of the apparent conflict of authority in these cases it may be difficult at times for the editor to know just where to draw the line when he desires to tell a story, with a degree of newspaper calumny. It may be safe enough, however, to picture with some degree of sensation providing yellow be not the color chosen in which to paint the scene.

RIGHT OF PRIVACY.

Very much germain and pertinent to the trend of discussion is the question of the right of privacy. If the law takes no notice of trifles, and there is no right of privacy, we as publishers are not subject to any sort of a censorship by those who desire personal matters suppressed, either through oversensitiveness or a feigned desire to be let alone. Courts have always held that the consent of the party was not required in order to publish matter not libelous *per se,* but some growing abuses have appeared which have caused much discussion and some litigation.

"If the courts should eventually decide that there is such a principle in law as a right of private censorship, it would seem to be difficult of application without depriving the newspaper of some of the liberties guaranteed by the constitution. The habit which some people may acquire of ordering certain matter suppressed or threaten suit in case of failure to obey, would soon place us under a much worse form of censorship than that which regulates and controls the Russian press."

There was no litigation on this question directly in point until in the year 1892, and even in this first case the question in which we are so much interested was not fairly presented to the court.

Mrs. Mary Hamilton Schuyler was in her life well known and conspicuous as a philanthropist. In 1892 some of the relatives attempted to prevent the exhibition at the Columbian exposition of a statue of Mrs. Schuyler which was intended to typify Woman as a Philanthropist, alongside and as a companion piece of a statue of Susan B. Anthony, which was intended to typify Woman as a Reformer. These relatives asserted that this proposed memorial was disagreeable and obnoxious to them because it would have been so to Mrs. Schuyler if living, and that it was annoying to have her name associated with principles which Miss Anthony professed and Mrs. Schuyler did not approve. The courts of original and intermediate jurisdiction granted the relief prayed for, the theory of the law as advocated by a writer in the Harvard *Law Review* being advanced by the courts in justification, and this was the only authority presented. The court of last resort, however, dismissed the complaint, stating that the surviving relatives of Mrs. Schuyler did not represent any right of privacy which she possessed in her life time, and that if she had any right in that regard, such rights had died with her. The court also was inclined to the opinion that the grievance was too trivial to cause any injury, which was equivalent to saying that it would not be an actionable wrong, even at the suit of Mrs. Schuyler, if living.

This decision was soon followed by another from the supreme court of Michigan, in which the widow of the late Colonel Anderson sought to restrain a manufacturer of cigars from using the name and portrait of her husband to designate a brand of cigars. The court said: "So long as such use does not amount to a libel we are of the opinion that the individual would be without remedy if he were alive and the same is true of the relatives and friends who survive."

The same question was soon afterwards to some extent considered by the federal court in a case in which the widow of Corliss, the inventor, sought to restrain the publication of a picture of her late husband. This case was ably contested on the question of the right to restrain a publication, and in the opinion of the court this phase of the question was considered at great length. The terms, liberty of the press and freedom of the press have frequently been defined to mean the right to publish without any previous license subject to the consequences of the law, or that courts of justice should not take any notice of writings intended for the press but should confine themselves to that which has already been written and published.

Although the main question was not raised until about two years ago, the principles and doctrines announced in the cases reviewed have been helpful and instructive.

FIRST REAL CONTEST.

It remained for a New York beauty a person in actual life, in full vigor of womanhood, to contest to the bitter end the real question of the right of privacy. The Rochester Folding Box Company presumed to publish without consent the portrait of Miss Robinson on a brand of their flour and labelled it "Flower of the family." The plaintiff in this case asked not only a money judgment but also an injunction restraining the use of her portrait. She claimed that she had been greatly humiliated by the scoffs and jeers of the persons who had recognized her features in the picture and that she had been made ill and put to some expense in employing a physician.

The petition made none of the averments of an action for libel which necessarily would have been a malicious and false publication and defamation of character and reputation. The relief sought was grounded entirely on the claim that the circulation of the picture was without her consent, constituting an evasion of her private rights, and on account of her own wounded feelings. The lower court held in favor of the plaintiff.

Considering the serious and prolonged consideration of this case by the court, its history and final adjudication with an exhaustively considered dissenting opinion, it would of necessity be a warning to publishers of newspapers in other jurisdictions. The question may be settled insofar as all New York courts are concerned, but one decision is not necessarily a precedent for courts of other states. Especially in cases in which principles are involved over which courts have so much judicial controversy.

In a recent case, and the opinion of the court was first officially published after the program for this meeting was announced, the supreme court of Georgia, had occasion to consider the question of the right of privacy at some length. The defendant, The New England Life Insurance Co., had printed in the Atlanta *Constitution,* two pictures, one of the plaintiff which would be readily recognized as such by his friends and acquaintances. It was placed by the side of another, that of a sickly looking person. The two pictures were as usual meant to point a moral and adorn a tale of the man who did, as well as the man who didn't. Below the two pictures were the words: "The two pictures tell their

own story." The plaintiff was quoted as saying "in my healthy and productive period of life, I bought insurance in the New England Mutual Life Insurance Company, and today my family is protected."

"The lower court held that the right of privacy did not exist, but the supreme court reversed the case, and stated that the conclusions and reasonings of the majority of the court in the case of Robinson vs. Folding Box Co. are criticised and disapproved, and the reasonings of Judge Gray in the dissenting opinion adopted and followed.

The court further held, that the plaintiff should be allowed to recover on account of the libelous character of the article, stating that a publication which imputes to one language which is known to those among whom he lives to contain statements which are false, is libelous, as such statements and accompanying picture would have a tendency to create the impressions among those who knew the facts, that the person whose picture is reproduced has told a willful falsehood, either gratuitously or for a consideration.

It is to be hoped that the courts of other states will interpret this decision more in the light of its libelous character than on account of the findings of the court on the question of the right of privacy. Based solely on the question of the libelous character of the article, this case has its analogy in the case of Squires vs. State from the court of Criminal Appeals of Texas, and reported in 1898.

Squires was a political and personal enemy of a candidate for some public office when he maliciously caused to be distributed a circular in which the candidate was quoted as stating that he believed in the principles of the party to whose members the circular was addressed, requesting its support and cautioning the parties who received the circular to treat the communication as a private one. The candidate had no knowledge of the circular and upon the trial of Squires for criminal libel, the court held that it was libelous *per se* to report one as secretly abnegating the principles of the party which he openly professed to espouse. The libel was in representing the candidate as living a lie, as telling a falsehood, or practicing base hypocracy, and not in simply misstating his political belief. Shall the courts follow this decision on account of the statements relative to the rights of privacy, there will be found in it some raw material for some legislative enactments.

SOME GENERAL PRINCIPLES.

Insofar as general principles of law are given force and effect, they have been applied to newspaper litigation the same as in cases involving other interests. This is true whether it has been a question of contract, tort or remedy. There is a rule of law that there can be no equity of contribution among wrongdoers. This rule is subject to the exception that the plaintiff was not in fault in rendering the action necessary. The rule is illustrated in a general way by the case of Bartel vs. Nutt, 29 U. S., 184. The court said: "Where public contractors attempt to commit a fraud on the government but being detected in the fraud the loss accrues to the contractor, the court refused to entertain a bill by one of the contractors to compel contribution to the loss. On the other hand where two creditors acting together attach and sell goods sold by their common debtor to a third person honestly believing that the sale is fraudulent, and a judgment was obtained against one of the attaching creditors for wrongful attachment, the creditor who had to pay the damage could recover from the other creditor. The distinction in the cases being on the question of wrongful intent.

The rule is illustrated by the case Atkins vs. Johnson, 43 Vt., 70. Atkins was the publisher of a newspaper, at Montpelier, Vt. One day he was visited by a *pro bono publico or a vox dei* who desired to insert an article reflecting upon the character of one Rev. Gregory. The article being libelous was rejected unless Johnson and others would sign a contract to indemnify against any loss occasioned by the publication of the libel. The agreement was drawn up and signed and the article was published. Gregory brought an action against the editor, and recovered a judgment for $1,000. Atkins then brought an action against Johnson and others who had agreed to indemnify, and found to his sorrow that he must bear the loss alone, as he was at fault and had full guilty knowledge of the wrong before he had committed it.

It is a well established principle of law that a principal is responsible for the acts of his agent, either for contract made or tort committed in the line of their usual employment. Who is there among us who has ever been known to find fault because the proprietor of a railroad train was not present when an accident occurred. As applied to newspapers this principle may be illustrated by the case of Hall vs. Dunn, reported in 1 Ind.

One day in the summer of 1843, Major John P. Dunn, a publisher of an Indiana newspaper left for New Orleans and was absent for some days. On the eve of his departure he told his foreman, that a correspondent would hand him an article for publication, and especially cautioned said foreman to strike out anything libelous or even objectionable, which might appear in the article. The article was handed in but the foreman evidently forgot his instructions, for some very serious and libelous charges appeared in the article as published. On his return Major Dunn was confronted with a libel suit, and a jury in the trial court returned a verdict for $500, and this judgment was sustained by the supreme court. But how about an action for indemnity in this case? Mr. Atkins could not recover from any one for he had full guilty knowledge of the whole affair and ordered its publication. On the other hand the Indiana editor did what he could to prevent the publication of the libelous portion of the article. Although so far as has been observed the question was not raised in this case, yet it would seem that the proprietor would have a right of action, either against his foreman or the correspondent for the amount which he was required to pay.

But the court of appeals held that as there was no libel there was no cause of action and the case was dismissed.

The right to punish for contempt has been based entirely upon the right of litigants to be heard without prejudice, and it was upon this theory that decisions were based for more than fifty years, with some leaning, however at times in favor of the courts which pronounced the decisions. It has been decided and probably settled that this right to punish for contempt is inherent in the court, and cannot be taken away by legislation.

Yet the old rule which applies in countries where a king or emperor is greater than a God, of *scandalum magnatum*, has never been fully recognized, at least until very recently. The process was always subject to some abuse owing to the fact that the party was not entitled to a jury, and must depend upon the justice of the judge before whom he was brought. There was always too much room for a display of hatred or vanity on the part of the judge pronouncing the sentence. You remember the judge who brought a lawyer before him on a charge of contempt of court and said:

"For your outrageous blasphemy against the name of Almighty God I fine you ten dollars, and for your contempt of this court I fine you fifty dollars, and you will either pay or go to jail."

Owing to the reason of the law there could be no contempt when the report was a fair one, based on proper evidence produced in court, nor could there be punishment administered for comment concerning cases not pending at the time of the circulation of the publication, and if by reason of the remoteness of the circulation from the jurisdiction of the court there was no probability of the same being seen by court or jury, there could be no contempt.

It remained, however, for courts sitting at the dawn of the twentieth century to revive the rule of scandalum magnatum, and this was done three years ago, when the supreme court of Missouri announced the doctrine that a contempt consisted of scandalizing the court itself, held not to relate to a pending suit.

It is necessary only to recite the main facts. The case of Oglesby vs. Missouri Pacific Railway Co. had been pending in the courts for many years, and after several trials it finally reached the supreme court where it was dismissed, placing the case beyond any apparent possibility of further litigation by any court, when the Warrensburg *Standard-Herald* of which J. M. Shepherd was editor, commented at length on the history of the case for which he was subsequently fined $500, which sum was promptly, contemptuously and indignantly raised and paid by the citizens of the place, even before the decision had thoroughly been published to the world. This proceding was severely criticised by all the law journals of the country. The able editor of the *American Law Review* suggested that the court had better let the incident drop by not attempting to give reasons for the decision. The advice however was not taken and the court attempted in an opinion of great length to justify itself, announcing the decayed doctrine of *scandalum magnatum* and begged the question by arguing again the merits of the court's decision of the case of Oglesby vs. Missouri

Pacific Railroad Company out of which the contempt proceedings arose.

This case could probably be dismissed without tears or bloodshed if it were not for the fact that it has been deemed an excuse for a precedent, and followed by the supreme court of Virginia in the case of Burdette vs. Commonwealth, 48 S. E. Rep., 878.

After disposing of a case in which a party had been convicted of selling liquor without a license, a card was published in the Nelson County *Times* in which a statement was made to the effect that the indictments were found under the influence of the judge, and that defendant had been compelled to compromise and charged the trial judge with vicious motives. No one doubts the right of the judge to an action for damages, in which the usual defense in an action by a public official would be submitted to a jury. But the judge brushed aside these little matters, fined the publisher for contempt, and the proceedings were sustained by the supreme court which announced the doctrine that notwithstanding the fact that the court had ordered an adjournment and directed a proclamation to that effect, the power to punish nevertheless existed, although the cause ended by entry of judgment and satisfaction thereof.

As law is the perfection of human reason, it is also said to be a progressive science, which means that its decrees are modified and announced to correspond with the spirit of the age and the progress of society; whether the most recent decision on the right of privacy is an instance of this scientific progression is a matter quite as much of private as of legal opinion. When new abuses arise, new questions are urged and new principles must of necessity be announced to meet the demand. The opinion, however, would seem to be unanimous that the latest decisions on the question of contempt are an illustration of the progress of the law backward. No doubt some publishers will agree with John Peter Zenger who said as early as 1735: "The people of this Province will think as matters now stand that their liberties and properties are precarious, as trials by jury are taken away when the court please * * * yet I hope for the future by the liberty of speaking through the hole in the door of the prison to entertain you with my weekly journal as formerly."

Notwithstanding some recent abuses on the part of the press and still more serious faults on the other hand by legislative bodies and courts, there is no doubt that the great body of the common law is founded on the best of reason, and the most enlightened justice. By a careful observance of equitable principles and a decent respect for human opinion, the press will no doubt grow in influence and public esteem.

WOMEN IN JOURNALISM.

BY MISS VIRGINIA C. CLAY, EDITOR OF THE HUNTSVILLE, (ALA.) WEEKLY DEMOCRAT.

Friend Editors of the National Editorial Association, and Brother Printers:

It gives me pleasure inexpressible to be with you again, to greet the dear familiar faces, and to meet new friends.

Mythology tells us that a god guilty of perjury, was, for nine years, deprived of attending the banquet of the gods. I must have been guilty of a greater crime than perjury to offend the goddesses of Fate who have deprived me of the joy of feasting with the gods of the immortal press for ten years. You men editors, doubtless, have worried your deep masculine brains over the great problem how we weak women ever managed to crowd into the mystic Royal We Brotherhood, and remain in it. Let me tell you a little story as an illustration of the how and wherefore of women as editors, being allowed to remain, and enjoy the privileges of the Royal We:

Monsieur Coquelin, père, the famous actor of France, was one of the prominent members of the Sub Rosa Club, the most exclusive club of the Latin Quarter of Paris. This story is told of his election: He was present one night at the club's late supper, a weekly feast, and having heard that there was a vacancy in the roll, applied for membership. Now the only rules of the Sub Rosa men are: "Think much. Write little. Be silent as you can." The presiding officer, with this last rule in mind, answered the applicant by placing before him a tumbler filled so full of water that another drop would have caused it to run over. Coquelin understood. He had evidently been misinformed about a vacancy; the club membership was obviously full. Over the table was suspended a rose, the club emblem. While the glass still stood before him Coquelin broke a petal from the flower and laid is so gently on the water that not a drop escaped. A silent man could join and make no trouble. Around the table ran a ripple of smiles, and the handclasps and nods of approval, and then, as if of one accord, all began making bread balls. Then the cup was passed from hand to hand, and each deposited his "ballot" in it—and all were found to be round; and not one had been pressed flat in sign of disapproval. So, Coquelin joined the Sub Rosa Club. Thus did drop into the clear, crystal waters of the journalistic sea, with the rules all topsy-turvy, thinking little, writing more and talking just as much as she pleases, the rose-leaf woman; and there is not a man among you, who would dare or desire to flatten the bread ball ballot as sign of disapproval. Besides the spirit of gallantry that should prevail among the editors, a feeling of gratitude should prompt you to encourage our sex in the field. If you editors are not familiar with the story of Deborah, the woman Judge of Israel, I would like for you to read the 4th and 5th chapters of Judges in the Old Testament. Deborah was not only a prophetess and judge, without a peer, but she was a warrior, shrewd politician, and a clever diplomat, combined with a gift as a muse of no mean ability. Barak would not go to war against Sisera unless Deborah went too. Deborah went, and to make sure that her unusual course and victories should be correctly reported, she had on the field a band of reporters from the tribe of Zebulon. After the victory was nailed through Sisera's head, Deborah composed a song of praise which she and Barak sang, and in Judges V. Chapter, 14th verse, she praises, among those who offered themselves willingly, to aid her, the people out of Zebulon, "that handle the pen of the writer." The commentaries explain that the tribe of Zebulon were not fighters, but able with their pens. I discovered this little piece of Bible history by careful research, and if there is any instance on record in the Bible of a man having reporters on the field of battle, I have not been able to discover it. Have you? Later, history tells us that:

"The first printed sheet ever published in England was founded by Queen Elizabeth, in the Sixteenth Century, to keep the people informed of the pending dangers threatened by the Spanish Armada invasion. In the British Museum are three copies of this paper: '*The English Mercurie*, published by authoritie to correct false reports,' the earliest No. 50 bearing date of July 23, 1588. This paper was published as the false rumors and occasions necessitated. England also claims the first daily newspaper to be a womanly production, with Elizabeth Mallott as editor and publisher, over 200 years ago. This was the first daily ever published in the English language. The Colonial cause was greatly advanced by the ready pen of women, and a sensation created when their papers appeared. Of the thirty-seven newspapers published during the Revolution, several were successively issued and edited by women. Besides those already mentioned, in 1772 Clementine Reid published the *Virginia Gazette* in Williamsburgh, favoring the colonial cause, and two years later Mrs. H. Boyle started a paper under the same name, advocating the royalty.

"If statistics are true, the first newspaper ever published in the United States, was edited by a woman, Margaret Croper, who took editorial charge of the *Manchester Gazette News Letter*, after her husband's death, and fearlessly kept it going for two and one-half years, it being the only paper that was not suspended in Boston when the British besieged the town. Mrs. Anna Franklin and two daughters, owned, edited, set the type and superintended the press work of the first newspaper ever published in Rhode Island, which made its appearance in 1732. And these women did their work so well, that they were given the job by the colony's government as public printer, and published the official pamphlets and colonial laws of 340 pages, winning praise and earning money for their services. Even the South was not exempt, for in 1775 Charleston, S. C., had a woman editor in the person of Mrs. Elizabeth Timothy, and Anna Timothy's name was at its head after the Revolution, and she was appointed State printer for seventeen years, holding the position on account of her ability and reliability. Charleston had another fearlessly political female, Mary Crouch, who published an antagonistic sheet to the stamp act in 1765, and continued her paper in Salem, Mass., for several years after."

Massachusetts and New England have always been literary leaders.

Sometime between 1825 and 1829, Washington City had a unique figure in the newspaper world in the person of Mrs. Anne Royall, who despite her vituperative idiosyncrasies, was a very extraordinary woman. Her history is interesting: When a child, she was taken prisoner by Indians and held captive for fifteen years. After her release, she married Capt. Royall, who had her taught to read and write. She used her pen like a sword when she obtained free use of it, as editor of a newspaper called the Washington *Paul Pry*. Mrs. Royall traveled far and wide, was observant and made use of

her observations in a disagreeably practical way. She also edited the Washington *Huntress,* and where she could not pry successfully into other folks' affairs, especially distinguished senators and representatives, she hunted indefatigably leaving no prominent statesman out. A persistent lobbyist, she was shunned by senators and representatives, especially those with a past they would rather have buried, or a present that appeared best under cover. Jno. Quincy Adams called her an "itinerant virago." Finally she became such a nuisance, and her printed and personal abuse so offensive, that she was arraigned before Judge Cranch as a common scold and was sentenced "to be ducked in the Potomac river." Although Washington society had been terrorized by *Paul Pry* and the *Huntress,* there was a decided disapproval of the ducking stool punishment, and as such a thing as a ducking stool was not at hand, the judge let her off with a heavy fine. Mrs. Royall also wrote books of Washington society and prominent citizens of the United States. I had the pleasure of reading one of her books, and enjoyed the remarkable genius displayed. She wrote pure English, and her stories of Washington statesmen and belles were bright, spicy and not near so risquè as those told every day and flashed over the world by electricity. Mrs. Royall was simply three-quarters of a century ahead of the times. I can afford to admire Mrs. Royall and praise her "Royal We" of course, as in the book I read, she pays a handsome tribute to my grandfather, Clement Claiborne Clay, then a representative from Alabama, also to my grandmother Clay, whose past and present bore the closest scrutiny of *Paul Pry* and the *Huntress.* Alabama had two practical printers in the early twenties of the 19th century. Eliza and Sarah Davenport set type and edited the Tuscaloosa *Mirror* for the support of an unprovident father whose name, Thos. M. Davenport, appeared at the head of the *Mirror's* editorial column. Eliza Davenport had many misfortunes which did not check her energies and she published the *Mirror* until 1827, with marked ability.

But all the good newspaper women are not dead yet, there are a few left. Paris has over 2,500 women in the newspaper business, and London claims 18,000 women members to press clubs and authors' societies. Edinburg boasts of 350 women compositors, who are efficient, but only command one-half pay on account of their physical inability to lift heavy forms.

The United States has many gifted women in the editorial chairs of the women's department of the most successful and popular dailies and weeklies, who can as ably report a political convention, express their intelligent, logical opinion on affairs of State as write up a social function, with sparkling touches of original wit and humor. Oklahoma up-to-date and progressive has proven her civilization by her newspaper women. Mrs. C. B. Blake, of the Edmond *Sun,* Mrs. Belt of the Edmond *Enterprise;* the bright, intellectual wife of Gov. Ferguson, who ably ran the Watonga *Republican* during her husband's campaign.

Emily Faithful opened the doors of typesetting for women in England. Women do not rush into journalistic work without some ability and intellect to back them. At least that has been my observation. I have seen men, however, who rushed in where we women feared to tread and reminded me of the old darkey who thought he had a calling to preach, and to his congregation said: "Yes, my brederen, I has had a callin' to preach, is why I is here befo' you now. In de daid of de night, I heared a voice asayin': George, go pree-each!, go pree-each!, go pree-each!" I always felt like advising such would-be editors to have their heads examined by a first-class veterinary surgeon, who could diagnose the disorder and treat accordingly. They would appear more at home before a plough in a cotton row.

"Our thoughts are shaking unmade spheres,
And like a blessing or curse,
They thunder down the formless years,
And ring throughout the universe."

In the south, we can boast of many notable newspaper women, whose success has been achieved by perseverance, energy, intellect and ambition. Her people, her sunshine, her birds, her mountains, vales and streams, have inspired poetic souls with musical rythm, and practical prose. Let me first mention Helen Kellar. Deaf, dumb, and blind, she writes as if her gifted pen had been plucked from an angel's wing—so beautiful are the thoughts she expresses. Her fame is international. Mrs. De Coltes and Miss Martha Young are doing excellent work on the Montgomery *Advertiser,* wielding graceful, forceful pens. The South is proud of the late Mrs. E. J. Nicholson, of the New Orleans *Picayune,* who was the foremost woman journalist of the South. Her first husband, Col. Holbrook died, leaving her with a great unwieldly daily, heavily in debt. With characteristic energy and perseverance of our southern women, she gathered together a brilliant staff of writers, used economy and judgment until the *Picayune* became a power in the South and financially profitable. She wrote under the pen name of "Pearl Rivers," and her lyrics breathe of the piney woods, fragrance of blossoms and melody of birds, for the beautiful southern woods on Pearl river was her earliest sanctuary. Catherine Field of the *Picayune,* died and dropped her gifted mantle on her daughter, Flora Field, who is now representing the *Picayune* in Panama. "Dorothy Dix" has a financial success to record. She is a brilliant, fascinating southern newspaper woman, whose real name is Mrs. Elizabeth Meriwether Gilmer, the happy, devoted wife of Geo. O. Gilmer, She was launched into journalism by Mrs. Nicholson, who appreciated her talent and when a mere girl gave her a position on the *Picayune* to edit the Woman's Department. She has alternately worked on the New York *Journal* with the Hearst Syndicate and the Dorothy Dix Syndicate in New Orleans, and is again with the *Journal,* sending out spicy, wholesome articles each week.

Like a sunbeam, dancing on the waves of New Orleans' journalistic sea, with untiring energy and filial love as her compass, is Miss Florence Dymond, who assists her father in his publication of the Louisiana *Planter and Sugar Manufacturer.* She is an expert stenographer, and can tell as well as her courteous senior the difference between the pure saccharine of the sugar and the sand of the seashore. Her father catches the planters with agriculture lore and the daughter holds them with sugared words. The grit of this Dymond of purest ray, is as much admired in the newspaper world as the sand in the sugar is condemned.

Mrs. Clara Jemison, formerly of Tuscaloosa, Ala., has an important position on the *Smart Set* as reader of manuscripts. Her career was begun by writing southern sketches for northern papers. Her husband was editor of the Tuscaloosa *Times,* and when he died, she continued the paper for a year, as editor, business manager and reporter until she could sell without sacrifice. Not until she had been operated on for appendicitis, had nervous prostration and other troubles, did she become a full fledged citizen of the metropolis. We southern women you see *will* succeed even if we are deaf, dumb, blind, maimed and halt with an appendix, or without an appendix, in newspaper work. Isma Dooley is a sparkling writer of versatile genius on the Atlanta *Constitution.* Elizabeth Frye Page is a forceful writer on the Nashville *American.* Mrs. Guy Crawford Hamilton of Dalton, Ga., who has given to southern literature a novel, "Forsaking All Others," which appeared at Easter, began her career as a contributor to weekly newspapers. Her articles are emphasized by a remarkable mentality and flashes of wit and originality. She is a granddaughter of the late Gen. Jones M. Withers of Mobile. The West has every reason to sing the praises of Mrs. Carrie Fulsome Cole, who, as editor of the St. Croix *Standard,* of Wisconsin, has won laurels and increased the circulation of her paper to several thousand. Helen Rowland, formerly of the Washington *Post,* is a bright, snappy writer, now with a New York press. Annie Kendrick Walker, of the *Age-Herald,* Birmingham, Ala., furnishes the reading public with delightful social and literary articles every day in several columns. The Nashville *Banner* has a genius on the Saturday edition in the person of Will Allen Dromgoole who, like the rose-leaf of the Sub Rosa, dropped into the clear waters of journalism, with a pen steeped in poesy, and a heart full of sentiment. She had only the gentlest, intellectual environments in her home life, and her mother's and father's Christian influence and encouragement in her literary work. The voice of genius was stilled for a while after her mother's death, but was awakened by the voice of filial duty to her old father. She made the money with her pen to buy a little cottage home on Elk river, where his last days were happily spent. The *Arena* and other magazines have been adorned by her gems of thought. It is natural for us to expect the very best from Boston in the intellectual line, and even the most prejudiced Bonnie Blue Flagged Southerner will acknowledge that disappointment seldom follows in the wake of those expectations. New England's women writers are not hide-bound by Puritanical conventionalities, that have "squelched" the very life out of so many women in newspaper offices. Mrs. Alice E. Whitaker, President of the New England Woman's Press Association, and President of the Boston Press Club, is an example of the highly intellectual, forceful personality of the Boston newspaper woman. For sixteen years she was on the New England *Farmer* staff, and, for the past four or five years has been doing daily syndicate work, and in addition, much miscellaneous writing. Mrs. Sallie Joy White, for thirty-five years has been doing clever work on the Boston papers, and is still active and prominent on the

Boston *Herald,* daily and weekly. The Cambridge, Mass., *Press,* an eight-page weekly, is a paper run exclusively by women, with all the modern innovations of progressive, enterprising papers. The editors, business managers, reporters, are all women, and newsgirls do active business in selling the *Press* on the street. Marguerite Magennis, Catherine Conway, Louise Davidson, and Cara B. Richardson deserve special mention, as do many others. Helen M. Winslow, editor of *The Club Woman,* has recently been urged to "Come to Georgia" by the club women of that state, to rest from her arduous labors. For the past several years, she has had charge of twenty-eight columns a week on three papers, which she filled without subordinates. She worked eight hours a day in a dingy office, and six hours a day in her "den," and attended the theatre five times a week, working on Sunday to bring up the ends. News, dramatic, book reviews, fashions, domestics, all came under her list with equal facility, and she kept up an editorial column for eight years. Do you wonder that her brain is fagged? The unbounded success of Ella Wheeler Wilcox and Mrs. Frank Leslie needs no comment. Their fame is international. Of Margaret E. Sangster's work, the famous riddle of Samson may be propounded: "Out of the eater came forth meat, and out of the strong came forth sweetness," for both strength and sweetness abound in her prose and poetry,

SUSANNA W. CLAY VIRGINIA C. CLAY

striking a responsive chord of sympathy in her readers. Elizabeth Jordan, who, for ten years, was a member of the New York *World* staff, has had, perhaps, as remarkable and successful a career in the journalistic world as any woman in America. Milwaukee has the honor to claim her, but she drifted to New York, with talent and ambition as her guide, and has won golden coin, as well as golden opinions. She "made up" the entire Sunday *World* for three years, and every Thursday and Friday nights were spent on her feet in the composing room as she directed the mechanical part of the work; and a clever friend and admirer, says of her, "She has many friends, but neither nerves, love affairs, nor headaches." Miss Jordan is now doing active duty on the *Harper's Bazaar,* and has written several sprightly, clever books, but is thankful for her valuable experience on the *World's* staff. She is only thirty-four years of age, and her non-love affair experience is sincerely doubted, as she is said to be "very human, very feminine, and full of understanding and sympathy." Under her management, the circulation of *Harper's Bazaar* was doubled by the second year she was in editorial control. Miss Ada Sterling is another editor of the *Harper's Bazaar,* who has succeeded, with talent, energy and ambition as her intellectual tonic. The past year, her greatest work was accomplished by the editing of "A Belle of the Fifties," an interesting story of the life of Mrs. Virginia Clay-Clapton, widow of the late Clement Comer Clay. The story is deeply interesting, and told by the heroine, Mrs. Clay, who was a brilliant social leader in Washington City in the fifties, was too voluminous for one volume. Miss Sterling displayed what Edward Fitzgerald would call, a remarkable intellectual metempsychosis in editing "A Belle of the Fifties," boiling down the material until it filled one volume of 377 pages, yet with the essence of individuality retained, so that the strength, wit, brilliancy of Mrs. Clay is retained. Miss Sterling's work has been remarkable in this book, and her fame is proclaimed in England as in this country by this masterpiece, "A Belle of the Fifties." *The Commoner,* Mr. Bryan's paper, has a versatile editor of the woman's department in the person of Mrs. Helen Watts McVey. Miss Marie Alice Philips, of the Atlanta *Journal,* says that Georgia is rich in women who are doing newspaper work as a stepping stone to higher fields of endeavor. Miss Philips is clever with a fascinating flash of originality in her lucubrations. She tells a story with a snap that is at once attractive and delightful. She says Georgia has one distinction that cannot be matched in any other state in the union. She has three great grandmothers in active daily newspaper work. These, are Mrs. Wm. H. Fulton, of Cartersville, who has charge of the "Home and Farm" department of the Semi-Weekly Atlanta *Journal,* and is a constant contributor to the daily editorial department of the same paper. She is a lecturer, a farmer, nurse, and companion to her invalid husband. She is also the adviser, confidante, and doctor of her entire neighborhood; and has the world's affairs at her finger's ends. Mrs. Wm. King, the mother-in-law of the late Henry Grady, is editor of the Juvenile department of the *Sunny South,* and is the youngest old lady, gentlest adviser, and merriest companion in all the world of old ladies. Mrs. Mary E. Bryan is editor of the "Woman's Realm" of the *Sunny South,* and discusses with equal facility everything, from the scientific and philosophic books to the easiest way to get fruit stains out of a pinafore. She has had a hard struggle, but as Miss Philips says, "Had she been a better business woman, she had, perhaps, been a less lovable type of newspaper woman." Mrs. Myrick, editor and proprietor of the *Americus Recorder,* is a keen politician and stands for the best in politics. Miss M. C. Bass, of Clarksville, Ga., owns her own paper, as do Mrs. Penn of Monticello and Miss Edna Cain of Quitman. They are bright, up-to-date women, thoroughly abreast with the affairs of the world. Katherine Glover, Addie, Maud and Marie Philips make the columns of the Atlanta *Journal* scintillate with social and literary gems. Other papers, the *News, Constitution, Southern Magazine* of Atlanta, have women who make the papers what they are, successfully, and attract the attention of the literary world of the South to their columns. The Rome, Ga., *Tribune,* has Mrs. J. L. Johnson, a former president of the Georgia Woman's Club, and Miss Sheibley, who are active in the work. Mrs. A. O. Granger is editor of the *Southern Woman.* Miss Mary Meade Burnell is a charming innovation in old Virginia's field and brightens the Richmond *Dispatch* with society stories. Miss Zitella Cocke of Marion, Ala., has attracted attention on both continents by her beautiful poems, stories, and sketches, with pure English as her chief characteristic.

Florida's prominent newspaper women are Miss Sara Harris, of the Ocala *Banner;* Miss Jefferson Bell, of the Tallahasse Daily *Capital;* Mrs. Neva Childs, of the Arcadia *Champion;* Miss Nellie Beck, of Pensacola *Journal,* and Miss Humphries, of the Jacksonville *Metropolis;* Miss Margie E. Neil, of Texas, owns and edits with flattering success, The East Texas *Register,* of Carthage; Mrs. E. E. Overall's magazine, *The Railroad and Industrial Journal,* is pronounced "The best magazine published in Texas." Miss Kate Field, of the Waco *Times;* Mrs. Lee, of Dallas, Tex.; Mrs. Christian, of Houston, have attracted the intellectual world of their section. Miss Myrtie Loggins, of Conroe, Tex., owns and edits her own paper. Myriads of stars shed intellectual luster from the great Lone Star State's newspaper sphere.

Madame, published at Indianapolis, "for women who think," is a splendid specimen of what women can do in magazine work. In its pages we find the thoughtful woman's pen. The artistic, scientific, domestic, dramatic, musical are handled with equal facility.

Mary Maples Dodge is a refined, lovable writer that has made her mark.

Kansas has bright newspaper women in a progressive "Women's Press Club," with Mrs Annie L. Driggs, of Kansas City, as president; Pittsburg's Women's Press Club, with Mrs. Eliza O. Denniston, as president. Mrs. Charles Van Doren, of Newark, N. J., is president of a thoroughly up-to-date press club. The League of American Pen Women is a national organization, with many brilliant women represented among its membership; Washington is headquarters for the League. Mrs. Zillah Moore Cardin, of Kentucky; Grace MacGowan Cook, of Tennessee, a popular magazine writer; Mrs. Moore Murdock, of Texas; Lillian Rozelle Messenger, Mrs. Ernest Seton Thompson, Vinnie Ream Hoxie, the celebrated sculptress, are numbered among

them. Mrs. LaSalle Covell Pickett, the gifted wife of Gen. Pickett, of Gettysburg fame, is historian of the League, which embraces authors and lecturers, who have been launched to what, they hope, is a higher calling, from the humble newspaper office.

Mrs. Ada Cable, of Bradford, Pa., is the able, energetic editor and proprietor of the Bradford Sunday *Herald;* and her genius and executive ability was recognized by her election as the vice-president of the International League Press Club.

The Blue Stocking woman is not a modern innovation. It has been 500 years since the Blue Stocking Society, composed of literary men and women, was first organized in Venice, and wore the blue stockings as a badge of membership. It existed until 1590, and drifted over to Paris and was the rage among the literateurs of the great French metropolis. In 1780, Lady Mary Wortley Montague, bold, brilliant and beguiling, shocked the propriety of London proper, by displaying her badge at the Bas-bleu Club when she entertained at her soirées. The Blue Stocking became a term of reproach, and the female pedants were scorned by those not clever enough to be associated with them. When Miss Monckton, the Countess of Cork, died in 1840, the last of the Bas-bleu Club passed over, with reproaches still flagrant. Woman's worth in man's sphere as a journalist, is increasing in valuation every year. When she maintains her position as a dignified, refined, intelligent *womanly woman,* any subject, within the pale, whether political, scientific, philosophical or social, may be handled by her with astuteness, and command attention and demand respect of a critical public without fear of scorn or contempt. The present day is fruitful of opportunities for women who are ready writers. My advice to them is from Ecclesiastes: "Observe your opportunities."

Elizabeth Cochrane, whose nom de plume, "Nellie Bly," is well known on both continents, was a Pittsburg girl, and ten years ago she became famous by her trip around the world in sixty days, twenty days less than Jules Verne's hero. Her work was in the lines of reform. Her greatest work was for the improvement of the work-house, and on Blackwell's Island, N. Y., where 1,200 mad women were confined. She was incarcerated as an insane girl, and when released, told the grand jury her experiences, and a state appropriation of $3,000,000 for the asylum was the result. She exposed the station house abuses, compelling the appointment of matrons. She exposed the bribery pest, Phelps, the notorious lobbyist, and put an end to his power. Her father died when she was in her teens, and she began work to support the family on $5.00 a week. Before she married Robt. Seaman, ten years ago, she had $25,000 to her credit, which she had earned. The Barbertown, Ohio, *Republican* is run by a clever woman, Birdie Meeks Baker, editor, publisher, reporter, collector, and manager. Ohio has reached the top-most rung of the newspaper ladder in its brilliant women writers, who have worked for reforms, and secured them in municipal and state laws. Among those prominent in the Fourth Estate, are Florence Blackford, who says she "fell into newspaper work eleven years ago," and evidently fell squarely on her feet. Miss Delia Amos, who is reporter on the Sidney *Democrat;* secretary and treasurer of the Sidney Printing and Publishing Co., besides president of the Ohio Women's Newspaper Association, consisting of sixty-three active members. Miss Ruth Locke, a niece of Nasby, is a dignified, accurate reporter for the Toledo *Blade.* Miss Georgia Hopley, who is doing excellent work on the Columbus *Journal* and *Telegraph,* as editor, is one of the most active and favorably known women in the field. She inherited the talent from her lamented father, and has not buried it, but added to it each year. Mrs. Woodward, of Cincinnati is widely known. Mrs. Elia W. Peattie, who is now occupying the important position of book reviewer and literary editor of the Chicago *Tribune,* and correspondent of the Boston *Transcript,* has made a national reputation as a newspaper writer in the Omaha *World-Herald,* various Chicago papers as reporter, besides corresponding with other city papers, and writing stories for the prominent magazines of New York, *Youth's Companion,* and has written books that have been applauded both by the American and English literary world. With this work accomplished, she has four children, who have her loving and tender care, a husband who is proud of her, and several clubs who are still prouder and revere her talent. Mrs. Mildred E. Pierce, a bright, clever writer, is editor of *The Cavalier,* a magazine published at Fortress Monroe, Va., in the interest of Hotel Chamberlin, began her career as editor and publisher of the Citronelle *Times,* in Ala., which she published for six years. She worked on the *Smart Set* in New York until nervous prostration stopped her. For the *Cavalier* she writes up historical places, taking photos with her own camera, writes social news, and solicits advertising and subscriptions. Mrs. Laura F. Hinsdale, who is now associated with the *Rocky Mountain News,* of Denver, Col., has had a career that sounds like a romance in its rapid changes and versatile genius displayed in her work. She began by sending sketches and poems to magazines, making translations from modern languages, writing stories with charming originality for eastern magazines; juvenile stories for church papers. She was musical critic of the French Opera in New Orleans for the *Times-Democrat;* and for two years was literary editor of the Los Angeles *Times.* The kaleidoscope changes have never swerved her from a never failing punctuality in her work. The Upper Iowa University recognized her ability by conferring the degree of Doctor of Literature on Mrs. Hinsdale. Mrs. Virginia Lull, of Chicago has earned a reputation with her pen as have all the women of the Chicago Press League. Winifred Black, who is now the happy wife of a Denver newspaper man, the mother of two charming children, (I suppose, from the way she expresses herself) and a "crank about housekeeping, and home-making," has a remarkable career as reporter for the San Francisco *Examiner.* She started in as a mere girl, and was enthusiastic in reporting anything of interest, from the highest social circles, to the police court stories. She entered the Receiving hospital as a patient and exposed abuses there; she visited the leper Island of Molokai with Sister Gertrude, a nurse; and started a fund to build a hospital for incurable children. In spite of her domestic ties, she is like the retired horse of a fire engine, who runs to the scene of action at the sound of a fire bell, and, when anything exciting occurs runs to report it for the Denver *Post.* She also writes for the Hearst papers. Alice R. Gossage is business manager and editor of the *Daily Journal* of Rapid City, S. D., and is spoken of as a woman of fine executive ability and a style in writing that is crisp, entertaining and clear. The Indian Territory has a number of women active in magazine and newspaper work with Mrs. Michael Conlan, of Atoka, as president of the Territory Women's Club. Kansas has her feminine newspaper Titans in the persons of Mrs. W. A. White, Mrs. Noble Prentiss, Miss J. C. Mack, Miss Cora Lewis, Anna Carlson, who edits and publishes her own paper. Los Angeles, Cal., never knew beter *Times* than when Mrs. Sue E. Munn managed the hands, and kept up its onward march to success.

My sister Susanna and I are the pioneer political women editors of Alabama, and I am the woman nestor of the Alabama Fourth Estate.

With no further boast, let me tell you a little of our personal experience which, as pioneer political women editors will not be mal apropos.

I began my newspaper career as a typesetter and devil in the fall of 1883, going from the school room to the printer's case as an apprentice. We were educated by the best, purest, most intellectual of mothers.

I fill this cup,
To one made up
Of all the womanly graces;
With form most fair,
Beautiful hair,
And the sweetest of female faces!

Her face so pure
In each contour
Is heavenly in its beauty,
My heart is taught,
In secret thought,
To love her is my duty!

Her lovely eyes,
Like tropic skies,
Smile on me in their gladness,
May naught severe
E'er bring a tear
To shadow them with sadness,

From ruby lips
To finger tips
She's made of mortal blisses,
Angels above,
Who worship love,
Would languish for her kisses.

I quaff this cup
To one made up
Of grace found in no other,
In whose true eyes
God's own love lies—
I drink it to my MOTHER!

When my father was stricken with paralysis in November, 1885, I took editorial charge, too inexperienced and excited by duty and stern necessity to realize the responsibility and work involved in the undertaking. Only two issues of the paper failed to appear after he was first stricken, and, since then, we have never missed a single issue; and only one not strictly on time, when we held the paper over until Thursday in order to insert a $75 legal advertisement sent from Montgomery; until last fall, my sister was desperately ill for eleven weeks, and two issues were missed. During that time Mr. O'Neal of the *Mercury,* and Mr. Lane, of the *Tribune,* lent me type each week to help fill up the paper. There have naturally been ups and downs in our journalistic career, as with brother editors, but never a time when we could not laugh the "downs" away up after a little while.

THE INFLUENCE OF PLAIN AND TASTEFUL TYPE DISPLAY
A good type advertisement in a newspaper or magazine is a power in the land. When symmetrically arranged and skillfully displayed, it carries its message to those interested and delivers it in a forceful manner. Type displays are, after all, the real basis of advertising 6

ADVERTISING RATES PROMPTLY FURNISHED UPON APPLICATION

The NATIONAL PRINTER-JOURNALIST is unequalled as an advertising medium in its field. No attention paid to postal card requests. Information cheerfully furnished to all patrons.

Subscribers and patrons will confer a favor on the National Printer-Journalist Company by sending in the names of responsible newsdealers who do not keep the monthly on sale regularly.

Manuscript sent in for publication must be accompanied by a letter of explanation and return postage.

CHICAGO, JULY, 1905

IN a recent issue the Chicago *Post*, which, by the way, is one of the newspapers of high character, that can well be profitably studied by every editor of a home newspaper, as an example of the best that is in newspaper making—contained an article entitled, "The Shadow of a Great Rock," founded on a text from Isaiah, that suggested to us many of the higher possibilities of the newspaper press in these strenuous times. The article drove us to the Bible—that unfailing treasury of wisdom and inspiration for all men and all callings—to read the whole text and connecting passages. The *Post* quoted only the second verse of the thirty-second chapter of that wonderful production of the old prophet, that, aside from its religious teachings, is worthy of especial study for the beauty and grandeur of style, imagery and expression, as well as for the principles taught and the patriotic fervor contained therein. For our short newspaper discourse, we quote the first five verses. "Behold a king shall reign in righteousness and princes shall rule in judgment. And a man shall be as a hiding-place from the wind and a cover from the tempest; as rivers of water in a dry place, as the shadow of a great rock in a weary land. And the eyes of them that see shall not be dim and the ears of them that hear shall hearken. The heart also of the rash shall understand knowledge, and the tongue of the stammerers shall be ready to speak plainly. The vile person shall no more be called liberal, nor the churl said to be bountiful."

The spiritual and prophetic meaning of all this is left to the divines but the practical and valuable lessons are for those who are in a calling that is kingly and princely in its power and influence; for those, who, in a free republic, stand, in no unimportant sense, in the place of true rulers as protectors of the people, as wholesome life-givers to noble human endeavors and as consolers and encouragers of the weak, weary and discouraged; for those who see for others and who, to accomplish their highest mission, must command intelligent attention; for those whose work it is to bring truth, wisdom and consideration to the rash and to inspire those in power, that hesitate, to speak plainly and to act squarely and bravely; for those whose duty it is to unmask the vile and to see to it that they do not gain power and honor for their vileness through vaunted liberality, and to thwart the selfish, stalwart churls whose self assertion is only equaled by their apparently liberal public munificence, all as the price for place, power and unholy gain.

Judgment and righteousness are the highest requisites of a free newspaper press. These two naturally make of a newspaper a refuge for all who are suffering injustice or are threatened with wrong. But the newspaper must not only stand as a protector to its trusting readers or constituents and, to that end, be as firm and as confidence-inspiring as a great rock and as dear, because of its wise tenderness and its clear understanding of difficulties, its active, intelligent sympathy, as is the grateful shade to the heated, weary traveller, to the one overcome and fainting from the strife, but it must bring life to its community—the refreshing waters of encouragement and instruction, of examples, ways, means, precepts, inspiration, and thirst-satisfying hope and optimism.

The newspaper must not see dimly but clearly and must be so clear, sincere earnest and engaging in its relations of what it sees or discerns as to command confident, interested attention. To command a hearing is not enough; there must not only be attention, but there must be the fruits of attainment, useful deeds, influencing words, and brave, noble actions. To this end the newspaper must speak plainly and courageously as it would teach and inspire plain, honest, effective speaking.

As indicated, the work of the press does not end even here, but goes further to the exposing of the vile, the dishonorable, the hypocritical and wickedly designing.

But how grand as a description of a noble, perfect character is this figure of the shadow of a "great rock in a weary land." How expressive of the kind of confidence and reliance that Horace Greely inspired in the hearts of the regular readers of the New York *Tribune* for nearly two decades of his best years.

The *Post*, in applying this text to men, says what is equally true of the newspapers, the character of which depends upon the editors;

"And this is the great need of the world today—men who are righteous and just; men who are a shelter from the wind and tempest of striving mortals; men who are as refreshing as water in dry places; men who are as comforting as the shadow of a great, cool rock in the sun-beaten wastes of the wilderness.

* * * * * *

"If this be so—and can the thoughtful doubt it?—the shortest way to a great rock is to be one. The surest and most direct road to rest and peace is to give rest and peace to others."

Herein is the newspaper man's opportunity above that of any and all other men.

Speaking of shadows; they are all right in their way and very restful, when there are great immovable rocks of truth back of them, to the one needing rest, but it is the substance and not shadows with which newspaper men must deal.

Paul, who was not only a deep Greek scholar and learned in all the philosophy and logic of the Grecians, but also a Hebrew scholar and had doubtless read, many times, the rolls containing the words of the great prophet Isaiah, while he did not undervalue the shadows and the types, it was the real, the substance, the solid rock, able to afford an unbroken shadow, that he ever sought. In his letter to the Collossians, (2nd chapter, 16th, 17th and 18th verses), he wrote: "Let no man therefore judge you in meat or drink or in respect of any holy day or the new moons or of the Sabbath days which are a shadow of things to come, but the body of Christ. Let no man beguile you of your reward in a voluntary humility and worshiping of angels, intruding into those things which he hath not seen, vainly puffed up of his fleshly mind, and not holding the Head from which all the body by joints and bands having nourishment ministered, and knit together increaseth with the increase of God."

The newspaper man, having to do with all conditions and groups of men, with all sects, denominations, creeds and individual beliefs, must, of necessity, come to have a very broad and a very practical religion but there is no reason, on that account, why he should have no religion, or why he should humble himself before or permit his faith, fixed principles of right and right living, his firm belief in all that is established in truth and reason, to be destroyed by the proud dwellers in the shadows, who pride themselves in strict observances of the traditions as to eating, drinking, keeping holy days, vainly puffed up in an assumed humility and in a knowledge, belief, observance or worship of those things which they have not seen and which, at best, are only shadows. There is little room in newspaper work for mysticism, ceremonial or the dealing with the unknowable, but there is vast room for the religion, taught by the Great Teacher, of doing good deeds, advancing the true brotherhood of men, for helping, informing and making men wiser and better; for administering nourishment of good counsels and ennobling principles and the knitting together of whole communities in noble works and uplifting ideals, until righteousness or the doing of right "increaseth with the increase of God"—the great and all-pervading good. America today is much more in need of the substance than of the shadow, of righteousness, regard for the rights of others, of the golden rule wisely lived, than of observances of rituals, holy days or new moons.

The newspaper situation at Oshkosh, Wisconsin, is unique. On May 24th, the Oshkosh *Times* suspended publication after an existence of more than thirty years. In 1898 it became badly reduced and on the point of suspension, but was resuscitated and reorganized and for several years a vigorous attempt was made to build up a circulation. The morning field, however, was found to be difficult on account of the competition of Chicago and Milwaukee papers and it gradually sunk deeper and deeper in the quagmire of financial insolvency. In September, 1904, it abandoned its Associated Press franchise and a few weeks later the *Times* was changed to an evening paper. With an unsettled indebtedness of more than $50,000 its career as an evening paper was very brief, its last issue appearing a short time since. This leaves the *Northwestern* the only daily paper in a city of 30,000 inhabitants.

There was quite an interesting episode, after the N. E. A. Convention at Guthrie, in connection with the visit of Past-President Screws to Oklahoma City. He did not go with the party when it left Guthrie on Friday evening, June 9th, but went instead to Oklahoma City next morning. He had an engagement to meet a little colored boy, whose grandmother is the nurse of his little grandchildren, and for this old grandmother he and his wife both have a very tender affection. She had told them that she had written to her son-in-law (her daughter is dead) that they would be in Oklahoma territory at a certain time, and that she wanted him to find them and take her little grandson to see them so that they could take back to Alabama personal news of him. Major Screws received a letter at Guthrie from the boy's father written at a point about seventeen miles from Oklahoma City, in which he stated that he saw from the papers that the party would be in Oklahoma City on Saturday, June 10th, and stated that if told on what train he could find him and what hour, he would be on hand. (The man is a schoolteacher.) Major Screws wrote to him that he would reach Oklahoma City Saturday evening, and could be found at the Rock Island Depot about 5 o'clock. As is well known, the special train was delayed, and did not reach Oklahoma City until 8 or 9 o'clock that night. Major Screws had taken this probability into consideration and, largely for that reason, left the party, and went to Oklahoma City Saturday morning. He could not bear the thought, he said, of going back to Alabama, and telling that old woman, who was so faithful to his little grandchildren, that he did not take the trouble to find her little boy.

About 4:30 o'clock Saturday afternoon, in company with Past-President Jos. Maccabe, he went to the Rock Island depot in Oklahoma City. He did not know either the man or boy, but he saw on the platform two people whom he at once surmised were the ones he was in search of. His surmise proved correct. He learned from them that they had walked seventeen miles, that hot June day (and all that were in Oklahoma at that time will recall that it was a tremendously hot day) in order to meet him. There was no train running from their place at a convenient hour for them, and so anxious were they about the meeting that they walked the whole distance. He took them up to the hotel in order that they might see his wife who had many messages, and a package for the little boy from his grandmother. Major Screws and his wife both feel well repaid for any pleasure they may have forgone in the trip in thus discharging what they held to be a sacred duty to one of their servants.

There is no color line to duty or affectionate, considerate treatment among the people of the South.

The Fifteenth Annual Convention of the International League of Press Clubs will be held in Detroit, July 18th to 21st, inclusive.

The Detroit Press Club is preparing a splendid program of entertainment on those dates and trusts that every press club will not only be represented by delegates appointed, but by as many club members, who are newspaper workers, as can visit the beautiful City of the Straits on those dates.

WOMEN IN JOURNALISM.

(Continued from Page 496)

Susanna began to set type under my instructions on December 10, 1885, and for nearly twenty years we have worked side by side, watching over each other with a never-failing confidence and inspiration of love. We started in with the same old Washington press in use fifty or sixty years, the very same high, old-fashioned cases in use for the same length of time; the same old composing stone and mailing table. The Alabama and National editors have been good to us, and we feel a deep, tender gratitude for their words of encouragement. In fact, editors, we love you all, and long for the arms of Briareus to embrace you—collectively.

From Maine to California, from Canada to the Gulf, the editors of metropolitan and country newspapers have thrown bouquets at our modest efforts. The Detroit *Free Press* contained a pretty notice written by Robert Barr, the novelist, who became my staunch friend and pleasant correspondent after my visit with the National Editorial Association to Detroit, in 1889. This notice was accompanied by a picture of your humble servant, which was at least not objectionably ugly, when copied in the *Illustrated American, Fourth Estate,* and other magazine papers.

The article was copied with exaggerated addenda or condensed with more exaggerated virtues until the New York *Times* had the one-half columns ground down to three expressive lines, thusly:

"Miss Virginia C. Clay, of Huntsville, Ala., edits the *Democrat* and supports a paralyzed father and five small brothers and sisters."

This accompanied by an illustration that looked like a caricature of Lydia Pinkham, or some equally famous patent medicine fiend.

This notice was copied in papers of Canada and in papers over the Union, copies coming in so fast and heavily marked, that I hid them quickly to keep the five small brothers and sisters, all of whom were older than myself, with one exception, from seeing it. This three-line article also called forth offers of marriage, and men and boys desired to correspond with view to matrimony, and requests for pecuniary aid innumerable.

Your parlor editors of woman's columns cannot realize what we printer, devil, carrier, country editors have to do. My sister and I have made our own office fire, split and carried the kindling up town to do it with; we have cleaned up our own office, brought the water from the corner of the public square hydrant to wash our type, rolled while the pressman worked the press, until our hands have been blistered from the unusual exercise. We taught every strong nigger that we could call into requisition to work that old Washington press. One day one of the strongest of our press pupils had just enough whisky in him to energize and invigorate so that he suddenly jerked the handle-bar out of the socket, the handle flew back and knocked my nigger down as cold as a wedge, blood spurting from the ugly gash cut on his forehead. Susanna and I, frightened nearly out of our wits, bathed Sol's head with cold water, brought him back to consciousness, gave him another drink, tied his wound up with turpentine and a piece of an office apron, and, in about an hour, the press was going again with Susanna and me to roll, Sawney, our roller, having vamoosed, fearing he might be killed, too, by that "darned ole press," as he expressed it.

Only once in our career have my sister and I taken a trip together, and then, we went to the meeting of the Press Association in Birmingham, setting our type in two days. When Susanna went out to Colorado on a trip of three weeks, I did all the type setting, setting up my editorials without manuscript. For the past several years Susanna has had the business management of the office and mechanical work to do almost alone, with only occasional assistance of an inexperienced cub, while I indulged in an attack of nervous prostration. I usually set a galley of primer in two and three-quarter hours, and, on one occasion, set a galley of locals without manuscript, in two hours and twenty minutes, and, save perhaps, a few typographical errors, a wrong or turned letter, there were no errors of any consequence in the entire galley.

Our experience has been varied and amusing at times. Once a handsome, gentlemanly young man, representing a paper firm, came in our office, and while he courteously made his business known, he expectorated on the floor. I stepped down from my stool, took a dipper of water and threw the water where the young man spat, handing him a broom and very politely requested the young man to sweep it up as it would soil our skirts. He did so, with a Chesterfield manner and a quizzical smile.

Wilson Brown, a well-known politician in Alabama, was guilty of the same breach of etiquette, and when I handed him the broom, he remarked that he would clean up the entire dirty old office if I would furnish him with a mop and tub of water. After that, when he desired to expectorate, he would drag a chair across the floor to the stove, climb on the chair, lift the top from the high drum of the stove and spit down in it.

Our experience with circus agents has always been pleasant. Cole Younger, the bandit, called at the *Democrat* office and courteously invited my sister to the Wild West Show. He paid special attention to her party on the grounds, and, when he introduced them to an Indian chief, the chief grunted and asked Mr. Younger if Susanna was his squaw. This incident furnished a family joke for many months.

Collecting a dollar a year is no small item in a newspaper office, and is often discouraging. We had one subscriber, H. R. Williamson, a well-to-do, substantial farmer, who failed to pay up promptly for eleven years. Susanna says: "We might just cut him off." But I knew Mr. Williamson and his forefathers had been subscribers for a half-century, so I sent the paper on. One day, just before Christmas, Mr. Williamson walked in with a roll of bills, and informed us that he had just paid the mortgage off his farm, and all other debts, and wished to pay the *Democrat.* He paid all arrears, one year in advance, and sent us a gallon of fine apple brandy for interest. But life has not been all work and no play for us; we have had many pleasant hours in our old office and kind attentions and kindest consideration from strangers as well as home people. Abroad, especially in the North, my business card has been the open sesame of many places of social diversions and public amusements. The first day I went to the Chicago Exposition, I had not received my passes, I simply handed the gatekeeper my business card and was admitted, and on that same card visited every place of interest on the Midway, and many theaters in the city. Even in New York, Boston and Cincinnati my business card was recognized at art galleries, theaters, music festivals, etc. I have often regretted that my revered old grandfather did not leave me a fortune, but of the two I am more thankful he gave me a good name, and wherever I have traveled, I have been recognized as a lady-born—without money and without price.

One day an advance agent of a large circus called, and we wrangled over the price for a display ad. He declined to give what we charged very positively. At last I said: "Look here, my friend, have you had your dinner?" "No," he answered abruptly, "and that's what's the matter." "Well, you go to your dinner, and come back at 3:30 this afternoon." He did so. I renewed my terms, which he accepted with extra courtesies extended. After contracts were signed, I told him that I never made a business contract with a man with an empty stomach. He laughed good humoredly and we parted the best of friends.

One December, just before Christmas, we went out to New Market on the 5 o'clock morning train and returned on the 2 p. m. train laden with farm truck for subscription: Turkeys, chickens, eggs and butter, a ham, and with a pleasant memory of unbounded hospitality of the good farmers and their families. For a month we lived like lords on those paid-up subscriptions. We have dabbled in politics, and retained the respect of the community and politicians. I have been the only woman in a county or congressional convention from necessity, and always received the utmost courtesy from gentlemen in the convention. In fact, have met none but gentlemen in the conventions that I attended. On September 5, 1894, Mr. Lane said in the *Tribune:*

"Miss Virginia Clay, of the *Democrat,* was the most distinguished-looking and honored representative of the press attending the Decatur convention. Indeed, she looks the 'Queen of all,' when she wields the political battle-ax of the time-honored and battle-scared *Democrat.*"

Of course, he meant "battle-scarred," but I was victim of the typo's joke.

On the same date, Mr. Boyd, of the *Argus,* said editorially: "Miss Virginia C. Clay was among the crowd who went to Decatur yesterday to witness the nomination of Gen. Wheeler, by acclamation. Gen. Wheeler has no stauncher supporter or nobler lieutenant in the entire district than this same Miss Jennie Clay of the *Democrat.*"

I was timid about going to that convention, but father urged it as important, and drove to the station to see that my courage did not fail me. When Capt. Joseph F. Johnston ran for Governor, the *Democrat* was the only paper that supported him and we did it with a will and vim. I wrote campaign songs, set them up in type and printed them sometimes on our proof roller press. I arranged the *Democrat* platform into a campaign song for the Bryan campaign, to the air of "Bonnie Blue Flag," as follows:

A CAMPAIGN SONG.

THE DEMOCRAT PLATFORM.
(Air Bonnie Blue Flag.)

We are the best of Silverites, of Democrats a band,
Bryan and Sewall in our lead, we'll go now, hand in hand!
If the naughty Goldbugs hadn't gone so far astray,
Like friends and like true brothers we would meet on 'lection day;

Chorus.

Hurrah! Hurrah! for Silverites, hurrah!
Hurrah! Hurrah! For the man from Maine
And the bright Nebraska Star!

We'll vote now for our platform,
The best Sixteen to One,
'Gainst issuing bonds in times of peace,
We'll work from sun to sun!
We demand the power to issue notes;
Circulation taken away
From National Banks; and paper notes
Our Government Treas'ry pay!

Chorus—Hurrah! hurrah! for Silverites, hurrah! Etc.

All the tariff duties shall be paid for revenue,
But till the money question's fixed, that subject we'll eschew;
We strongly favor income tax; condemn strange pauper work;
For protection 'gainst all oppressions our duty we'll not shirk!

Chorus.

All Radical extravagance; arbitrary Federal force
'Gainst mobs; the Railroad funding bill we'll surely not endorse!
For Union soldiers' honest claims our vote shall ever go;
Arizona we would have a State; also New Mexico!

Chorus.

The territory official must be a resident;
All public lands shall be reserved, says our next President;
To far away Alaska we'd grant one delegate;
And Life tenure in office to the past we'd relegate;

Chorus.

Hurrah! Hurrah! For the Standard Two, Hurrah!
Hurrah! Hurrah! For the man from Maine!
And the bright Nebraska star!

Cuba's troubles we regret, improvements agitate;
Of waterways and labor woes we fain would arbitrate;
What'er may be our platform, for the people's good 'tis meant,
And we are strongly now opposed to the Third Term President!

Chorus.

Hurrah! Hurrah! 16 to 1, Hurrah!
Hurrah! Hurrah! For the man from Maine!
And the Bright Nebraska Star!

—*V. C. Clay.*

My sister and I formed a campaign chorus of fifty or more voices and conducted the music, and I wrote the words of all the songs for public speakings during the national campaigns. I have even written essays that have won prizes and praise for others; have answered letters in rhyme for others; have written love letters for others, with the peculiar fact that my love letters never resulted in matrimony. I have written many circular letters for candidates during campaigns, and have been on terms of the friendliest feeling with candidates of both parties, though always strongly partisan in my editorials. For ten years I carried my father to the polls to vote, so the casting of a vote would not even be a novelty. While I was flying around with the politicians gathering items over the district, Susanna, ever

faithful and energetic, stuck in the office, setting type, making up forms and looking after the business end of the *Democrat*. As a reward of superior merit I added to her local fame with the following lines lovingly indicted on the train, to my dear partner in adversity. They have almost been prophetic in the last lines:

Susanna Susan Sukey Sue,
Thou art the sweetest girl I ever knew,
With the eyes of brown and cheeks of tan,
The loveliest type of American.

Susanna Susan Sukey Sue,
Well thou knowest I love thee true;
Though oft I travel the old M. & C.,
My heart, my loved one, is ever with thee.

Susanna Susan Sukey Sue,
Keep me at home if thou canst, now do;
Fain would I linger, symphony in brown,
Stern duty beckons—I must leave town!

Susanna Susan Sukey Sue,
Pray for me, lov'd one, my moments are few;
When Tyrant Duty's stern summons are still,
I'll stay at home, then, I declare I will!

'Neath our own roof-tree, then we'll be
Happy, light-hearted, joyous, free!
I'll be bedridden, dear heart 'tis true,
But ever with thee my own Sukey Sue.

Among other duties that I have performed is the carrying around my papers to subscribers in the town. One week, when father was with us, Sister Mary sent me word that she had a painting lesson to give and I must take father to drive. I walked home, hitched Dolly to the buggy and father and I returned to the office for our papers, which we carried around town. Father would drive slowly down the street while I walked and threw the papers over the fences. Every time I returned to the buggy, father would hug and kiss me tenderly, saying, "Thank you, thank you, my darling," and I was a millionaire in happiness.

Now you will wonder if I am in favor of woman suffrage; well—yes. I am like a young man of our town, whose love-affairs had been very unsuccessful. He was asked by a prominent woman suffragist if he was in favor of woman suffrage? He replied: "Yes, darn 'em!—if they want to suffer, let them suffer!" A married woman was asked if she favored the ballot for women? She replied, "I don't care one way or the other."

"If you were granted the right of suffrage, madam, who would you support?"

"The same man I have been supporting for the past ten years—my husband," she replied.

I am really, painfully apathetic on the subject of having the ballot; in fact, much prefer a first-class cook. The elections usually go my way in the south, anyway. Ten years ago I went to a big country barbecue given by a Sunday School convention. My brother was invited to deliver an address. He carefully prepared his speech and invited me to accompany him. I went! Well, he expatiated on the womanliness of woman who did not desire the ballot, that would take her out of her sphere. A country Baptist preacher came to me and said: "Miss Virginia, get up on this wagon, and tell these people that women *do* want the ballot." In the excitement of the moment I climbed up on the wagon, and, with my brain stuffed with political lore, and chafing over the small amount of legal advertising given *The Democrat,* I waxed eloquent in my counter argument. About one-half the people listened to my brother, but everybody stopped to listen to me. Even the lemonade venders closed up business for the time, and I was vociferously applauded. My brother has never invited me to go with him since, when he is invited to speak. I bribed him not to tell on me so only a very short notice found its way in the *Mercury*. The privileges of being a woman has, in my experience, far surpassed the rights she craves.

Thomas Moore, as amiable and sweet as he appears once said:

"Though an angel should write, still 'tis devils must print."

We editors can sympathize in the matter of typographical errors. History tells us that Pythagoras went to Egypt to learn three kinds of writing, the Epistolary, Hieroglyphic and Symbolic. I think that I must just naturally write samples of all three, as I have had some sad errors to occur from allowing cubs to set my editorials from manuscript. Once I wrote an obituary of a former governor of whom I said: "In his official capacity, he served with distinction to himself, and the state." Imagine my horror when the little devil of a cub, set it up and said "he served with destruction to himself, and the state." Another time I wrote a touching, beautiful obituary of a former vestryman of our church, and the devil got in the type again, and I was made to say, instead of "a Senior Warden of the Church," he was "a Serious Maiden of the Church." I wrote an able, deep editorial and spoke adversely of the course of the masses of politicians. It was not my fault that the typo made me say "them asses of politicians," by misusing a space. When we bought our first new type after father was paralyzed, and his old type was thrown aside to be shipped to the foundry, I shed a barrel of tears, and relieved my pent-up feelings by writing the following:

Ode to Our Type.

(Spelling it O-w-ed as a debt that was due, I was paying.)

For fully a fortnight it was over there on the floor, a chaotic mass of *"dead matter."* Dozens of feet passing over and standing on it, the owners ignorant of the fact that they could not find a better foundation for a firm foot-hold, than the *weekly body* of the old *Democrat*. The last of it was laid away in a long, narrow box a few days ago, and we appear in a new dress this week. Yes, we were complimented on the improvement (?) but, in spite of ourself, a feeling of sadness comes o'er us, something akin to pain, as, ruthlessly, the boy threw it all in a "pi" on the floor, laughing as he did so. It seemed almost a sacrilege, and we felt the burning tears, welling up, and our heart was heavy. It was once looked upon as the best type of a true gentleman, and now, that it is old and worn, it is thrown aside as worthless, soon to be forgotten. Ah! yes we know that on its face are marks of time, that its shoulders are bent with age, and the i's are dim; but to thus discard it, without a sigh of regret, looks unfeeling. We jocularly remark to our visitors who come in the office and lightly walk over the type: Help yourself my friend, in that *pi* you will find a "feast of reason, and a flow of soul," such as men have once, "read, marked, learned, and inwardly digested." Our friends smile and say we have a keen sense of the ridiculous. But it is like joking over the grave of a dear friend to us. Ah! what a friend in time of need it was! How many wrongs it has righted, and how many whose honor it has vindicated! Always charitable, it would accept the *lye* to its face and not resent it! Is it not an example worthy of imitation? But it was old, and our friends would find fault with it, and occasionally—indeed, very often—we would find ourself, complaining that the form was badly made up, and the face was dirty, which soiled the dress. We are sorry now that we were so cross, and it all has to go. The *caps* do not fit the new heads, and *small caps* do not suit the case; but miser-like where there were signs of a dollar or pound, and now and then a *hand* that could help us, and all that aids in *fat matter* we would cry out, "Oh! save that." How inhuman we feel! The end must come at last, and we choke back a sob which rises from the heart, and murmur:

"The bitter word which closed all earthly friendships,
And furnished every feast of love—farewell!"

My old friend, when next the gaze of curious man rests upon thy face, its brightness will dazzle him! thy body, more beautiful than ever before, will appear in a *new form* far better than the one thou hast left! And, yet does that thought ever comfort? Just one more *em brace* from the old type, and with stick in hand, we take our *e's* as best we can with the new, a little spitefully picking it up at every word. Some persons suggested a new press, but our spirit rebelled against it. No, old friend, you shall remain with us, though you do not make the same *impression* you once did; there is just a screw loose somewhere, and perhaps we can find it! We will rub your arm and joints with oil, and prove to the world, that you are as useful as of yore. It would break my heart to see *you* go; and then it looks as if the new ones coming in, were trying to set aside all the old friends of our dear invalid. If the change *must* come, let it come gradually; we shall not force or hasten it."

Mr. E. H. Butler, editor of the Buffalo *News*, would insist upon introducing me at the St. Paul convention, as a granddaughter of Henry Clay. I resented it, and informed him, I was just as proud of my grandfather Clement C. Clay, who was a Democrat, and had filled every office of importance in Alabama in the gift of the people with credit. He looked at me with an expression of pity on his face, folded his hands piously, and looked up to heaven, and said fervently: "Lord, how the mighty have fallen!"

FINALE.

Brother editors, I am sorry for you men who lack a most important article in a country newspaper office. One that has helped us out in many difficulties. It is that little instrument—yes, a hair pin, for we have used it as scissors to cut out copy, a knife to open mail and packages, pincers in making up forms and to push down spaces and leads. Hair pins and hat pins are indispensable. I mean no disrespect to Father Ryan by paraphrasing his beautiful lines, "A Land Without Ruins," in the following original lines:

AN OFFICE WITHOUT HAIR PINS.

Yes, give me an office where hair pins are spread,
And long hairs rest light on the form that is dead,
Yes, give me an office that is blest by the dust,
Shook off by a woman—the downtrodden just;

Yes, give me an office where a woman's life battle
'S fought equal with men, makes their energies rattle.
Yes, give me an office with hair pin and pin
That tells of a woman who will work and can win.
Yes, give me an office with pins on each spot
That speaks of a woman who will not be forgot.

Their hair pins and hat pins tho' rust overgrown
May yet form the weapon of Liberty's throne.
For each single pin in the office detect her—
A girl with her pins needs no other protector.

Friend Editors and Brother Printers, I thank you for your kind and patient attention, and for your words of encouragement in the past to two struggling women editors, who sought not to be your rivals, but simply your equals!

THE ANNUAL POEM.

LISPING LEAVES

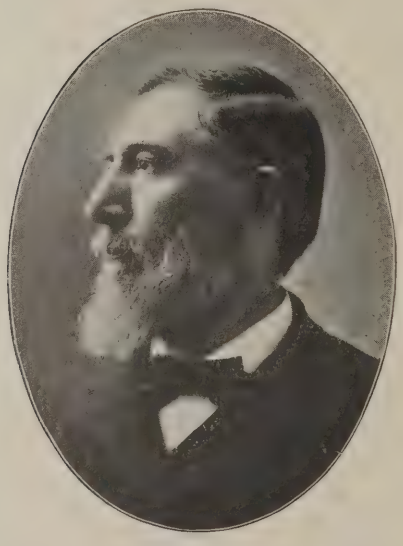
BY W. E. PABOR, Pabor Lake, Avon Park, Fla.,
POET LAUREATE.

Anniversary Poem read before the National Editorial Association at its Twentieth Annual Meeting, Guthrie, Oklahoma, June 7-9, 1905.

Copyright 1905, by Frank G. Pabor.

PART I—A NATURE STUDY.

It comes through the open casement
With the first faint flush of dawn,
Like a whisper, soft and swelling
From out of the lips of morn;
And no lilting lay sounds sweeter
Than the one the South Wind weaves,
As a gift to those who worship
At th' shrine of the Lisping Leaves.



William E. Pabor

The tremulous tones, so tender,
All tell of the unseen power,
That rules over rain and sunshine
And burgeons the woodland bower,
Where close to the heart of Nature
Lies balm for the one who grieves,
Till his soul is sensed with solace
That comes from the Lisping Leaves.

And when through the hours of darkness
Come the dreams that stab the soul—
When tides from the Isle of Sorrow
Their turbulent billows roll—
And when there's a throb of triumph
That forevermore deceives,
Then cometh the time to listen
For the lisping of the leaves;

That lightens the load of anguish
Too deep for pencil or pen,
'Till the hands of Time turn backward
And each is a child again,
And hears, as of old, the story
(The one that the Mother weaves)
Of the birds, the bees, the blossoms
And the lisping of the leaves.

Be he sage or be he soldier
With his books or battle blade—
One will hearken in the cloister
One will listen in the glade,
For the flutter of the leaflet
With its wealth of garnered sheaves
That comes in the early dawnlight
With the lisping of the leaves.

From the days of Eve and Adam
And the fable of fig leaves,
To the days of these new women
That the "co-ed" school achieves,
We find the feminine fancy
Falls less and less on the leaves
That carry the Eros message
To Eden's where wait fair Eve's.

But I think of Ruth, the Gleaner,
In the field of barley sheaves
And the sweet hope that was whispered
In her ears by lisping leaves;
For love is the crown of living
And a woman's heart a throne
Where she wields a greater scepter
Than the world has ever known.

PART II—THE PRINTED LEAVES.

There's another kind of lisping,
There are other kind of leaves,
That are green through all the seasons
Beneath hall or cottage eaves;
And, like Nature's leaves and blossoms
That bloom in the fields and bowers,
To the world they pulse the progress
And the heart-throb of the hours.

MRS. FRANK G. PABOR.
Who recited the Annual Poem.

There is one with Merlin's magic
That enfolds the world around;
That floats on a sheet of paper
Where the drops of ink abound;
With each lisping leaf imprisoned
Within Mergenthaler lines
That to some give fadeless laurels
And to others withered vines.

Is it but a passing fancy
Born of woodland lisping leaves
That from Nature comes suggestions
For the songs the Singer weaves;
For the thoughts that come at midnight
To be hearalded abroad
As a shining leaf of olive
Or a glittering crimson sword?

I recall the olden adage
"There's a soul in every leaf;"
Unto some, words with no meaning
But to me, a sweet belief,
Be they leaves of trees or flowers
Each a message has to men
Wiser than ever was written
By the Brothers of the Pen;—

As they listen to the lisping
That comes from electric leaves
While the editorial fingers
Shape the story into sheaves,
Unto some a golden harvest,
Unto some a flame of fire,
As they see a glad fulfilment
Or the death of their desire.

PART III—NEW ORLEANS, 1885, INSCRIBED TO THE HON. B. B. HERBERT.

To the land where the magnolia
Looks out where the Gulf waves flow,
Came a pilgrim from the far land
Of the North wind and the snow;
As he listened to the lisping
Of its leaves, he seemed to find
In their sound a mystic meaning
To his editorial mind.

There and then a tree he planted
Where it found congenial soil;
And beneath its spreading branches
Came th' slaves of the midnight oil;
While its branches grew and flourished
With its leaves of hopes and fears
To an editorial Banyan
With a growth of twenty years.

And no gun whose shot has sounded
Round the globe, to man's alarm,
Can rival the leaves whose lisping
Is full of a subtle charm;
Though tender the tone it reaches
The homes and the hearts of men
While the world is made the better
By the Brothers of th' Pen!

Who from ocean shore to ocean
And from inland lake to bay,
Have gathered each year together
As we gather here today,
And, lifting our blazoned banner
Be we grave or be we gay
We rally around the leader
Who founded the N. E. A.

May his heart be full of comfort
As we know it is with pride
As he grasps the hands that meet him
As he turns on either side;
But for him, we were as strangers;
But for him as scattered sheaves,
Who are now a band of brothers
Who listen to lisping leaves.

There are many gifted brothers
Who have fallen with the years;
There are many vanished faces
That we only see through tears;
When the lisping leaves sang "30"
As a sign their task was done
They went smiling to the new life
In the land beyond the sun;

Where the lisping leaves are fadeless
And the night is as the day
To celestial pencil pushers
As they walk the shining way;
And I sometimes think the twinkle
Of the stars is but a sign
From eyes that once looked lovingly
Into your glad eyes and mine.

N. E. A. BANNER—JUBILEE SONG—GUTHRIE TO PORTLAND.
AIR: STAR SPANGLED BANNER.

O say, do you know we have come from afar,
From our homes on the plains, by the lakes and the ocean,
With our sweet-hearts and wives, we're on board of this car,
And we're going to ride while the engine has motion.
We are out for a lark in the daylight or dark
And while on this trip we just rise to remark
That the N. E. A. Banner's afloat and we know
We will keep it a-floating, wherever we go!

From the moist Everglades, from the pine woods of Maine,
From the cliffs where the sands are both silver and golden,
From the shores of the gulf, from the fields green with grain,
We pushers of pencils, if young folks or olden,
With a loud voice declare, that as brothers we share
The belief that life's troubles are lighter than air,
As the N. E. A. Banner we lift up and cry
'Tis the Pharos whose beams light up Liberty's sky.

FRANK G. PABOR.

And whose was the hand, that first lifted our flag,
In the land where magnolias smile down upon roses?
Who still is our leader, whose steps do not lag,
Who, ever each year some new pleasure discloses?
Who but Herbert whose pen, has again and again,
Been placed at the service of newspaper men,
As the N. E. A. Banner he lifted in air
And yelled like a cow-boy, knock it down if you dare!

O then be it ever as brothers we stand,
Whatever our creed or whatever our station,
For our hearts and our homes and our well beloved land
And our sweethearts who beat all the rest of creation;
Then prosper we must, for our rates they are just,
And this is our motto: spot cash lest we bust;
For the N. E. A. Banner's afloat and you bet
We are jolly good fellows and don't you forget.

The mid-summer meeting of the Indiana Democratic Editorial Association will be held at French Lick Springs, July 13th and 14th. Henry Watterson will be one of the speakers. Splendid program and arrangements have been perfected.

THE TWENTIETH ANNUAL CONVENTION OF THE N. E. A.

GUTHRIE, OKLAHOMA, JUNE 7th, 8th AND 9th.

OFFICIAL REPORT, J. W. COCKRUM. OPENING MEETING—THE WELCOMES AND RESPONSES.

The members of the twentieth annual convention of the National Editorial Association met with the citizens of Guthrie in the Brooks Opera House, Guthrie, Okla., at 8 p. m., June 7th.

In the absence of Governor Ferguson—detained on account of the severe illness of his wife—Delegate Bird S. McGuire of Oklahoma called the meeting to order and after extending a hearty welcome on behalf of the territory, said in conclusion:

I hope every one of you when you go home will write an editorial in favor of statehood for Oklahoma regardless of any entangling alliances. And I hope before this body of editors adjourns it will pass resolutions asking that Oklahoma be made one of the states of this union. There will be no statehood for Oklahoma before a year at the earliest and by that time Oklahoma and Indian Territory will have 2,000,000 of people. The people of Oklahoma welcome you and know the power you represent. Your sentiment is the sentiment of the people and is more powerful than all other influences combined. Some of you have already been through a part of Oklahoma and Indian Territory and know we are entitled to statehood.

MAYOR'S ADDRESS OF WELCOME.

Mayor John W. Duke of Guthrie delivered the address of welcome on behalf of the city:

Ladies and Gentlemen of the National Editorial Association:—The occasion which brings us together is one of great pleasure to the citizens of Guthrie, here assembled to greet and welcome you. Of all the great and mighty influences that have been instrumental in making this the best government the world has ever known—none have exceeded the press. The press is almost always right, but right or wrong, I am for the press. Whenever I read anything in *The Leader* or *The State Capital*, I know it is true, because they never print anything but the truth. My faith in the press is equal to that of the old preacher's faith in the Bible. He told some boys of the Bible lesson he was going to read in the morning. The boys, finding the place, glued together the connecting pages. The next morning he read on the bottom of one page: "When Noah was 120 years old, he took unto himself a wife, who was," then turning the page, "140 cubits long, 40 cubits wide, built of gopher wood, and covered with pitch inside and out." He was naturally puzzled at this. He read it again, verified it, and then said: "My friends, this is the first time I have ever met this in the Bible, but I accept it as an evidence of the assertion that we are fearfully and wonderfully made."

GUTHRIE.

"If I could get you to hold such faith today I could cheerfully proceed to tell you of beautiful Oklahoma, and her wonderful resources and fitness for statehood. On the 22nd day of April, 1889, at high noon, these beautiful hills upon which the city of Guthrie now stands, became inhabited with 20,000 people, as if by magic; gathered from every state and territory in the Union, and from the four corners of the earth. Men, women and children came here determined to build a home and they have succeeded far beyond their wildest expectations. Guthrie today has a population of 27,500 people who are energetic, progressive and equal to any emergencies—even to taking care of the National Editorial Association. Guthrie is beautifully located, and has perfect sanitary drainage. The Cottonwood river runs through the city and the Cimarron is only one mile north. We have a Masonic temple worth $75,000; the city hall is worth $40,000; a public library worth $40,000; a government building under construction worth $150,000; six miles of well paved streets; a sanitary sewerage system worth $75,000; sixty miles of brick and cement sidewalks; and well equipped fire departments, consisting of three stations and the most perfect waterworks system in Oklahoma, costing $150,000. A $150,000 gas plant, a $250,000 electric light and power company, and two telephone systems. There are forty manufacturing establishments, covering twenty separate and distinct industries. There are twenty wholesale houses, handling eleven lines of goods. Guthrie has four banks with a total deposit of $2,000,000; eight railroads and the ninth one building; six city school buildings, valued at $150,000, and one county high school building, valued at $50,000; the first in the territory. A Catholic convent, the largest and best equipped business college in the southwest, and a conservatory of art and music; a school for the deaf and dumb, with an attendance of about seventy. During the past year about 300 buildings and residences were built. An electric street railway, which has several miles of road in operation, and three or four miles under construction. There are seventeen churches, representing all denominations.

Politically, we have steadily voted with a definite object in view, which I will explain by telling you of the political beliefs of three boys. A certain master taught a preparatory school for boys, and prided himself of his ability to correctly teach political economy. After several months of faithful work, he was desirous of knowing how his boys were progressing in political science, and wanted to test their knowledge. He told them he was gong to ask them to tell him why they held their particular political creeds. On his way to school that morning he caught a woodchuck in his orchard and took it along with him, and told the boys he would give it to the boy who would give him the best answer. He began by asking James why he was a republican.

"Because the republicans freed the negroes and saved the union," he answered.

"Good," said the master.

"Thomas, why are you a prohibitionist?"

"Because whisky kills more men than all the wars and pestilence would in a hundred years; wrecks manhood, devastates homes, makes widows and orphans and destroys governments."

"Excellent," said the master. Turning to Johnny, he said: "Why are you a democrat?"

Johnny promptly answered: "I am a democrat because I wanted that woodchuck."

Now, ladies and gentlemen, we have steadily sent a republican to congress for sixteen years because we wanted statehood. Johnny received the woodchuck, but as yet we have not gotten statehood. We sincerely hope that when you return to your several homes—those of you from picturesque and historical New England, you from the sunny south, and you of the Wabash and the Golden Gate, and the Pacific slope—each and all of you, we hope will carry pleasant memories with you of Oklahoma, and that you will do all in your power to influence your representatives and senators in congress to give us only our rights.

Now, in behalf of the citizens of Guthrie, I welcome you most cordially and sincerely hope and trust that all of your anticipations may be realized, your visit among us will be one of pleasure, that your journey to the Pacific coast may be all that you have expected.

"I now pass along to Senator O. R. Fegan, who will, for me, deliver to you the keys of the city. I welcome you."

WELCOME ON BEHALF OF GUTHRIE COMMERCIAL CLUB.

Hon. O. R. Fegan, president of the Guthrie Commercial Club said:

SENATOR FEGAN'S ADDRESS.

A close study of the biography of every great genius who has left his impression upon the intellectual life of the ages will show that while he was establishing his reputation, winning his laurels and acquiring his fame, his friends persistently sounded his praises, paraded his strength and boasted of his mental endowments, but when he had become pre-eminent in his particular field, they ceased their eulogies, assuming that the character of his genius was known to all.

The record of each of the few great commercial institutions that today exercise almost a predominating influence on the industrial world, will also show that while it was developing, reaching out and acquiring its colossal proportions, it almost exhausted the resources of genius in advertising its merits and parading its advantages, but as soon as it had reached a position of assured and acknowledged leadership, it ceased to advertise and quietly, tacitly and proudly clothed itself in the habiliments of greatness.

We of Oklahoma, believe that the development of this territory, during the closing decade of the 19th century, as shown by the last census bulletins, was the most marvelous achievement of the most marvelous century of time, and while these same census bulletins told a story of progress in Oklahoma that read like a tale from the Arabian Nights, and while this story caught the public fancy, encircled the globe and the world knows it by heart, yet we feel that our merits have not been fully recognized, that we are still in the stage of development where advertisement is necessary,—that we must still continue to exploit our advantages, still continue to boast.

OPENING OF OKLAHOMA.

The first opening of Oklahoma to settlement,—the wild rush of a quarter of a million people from the border lines, at the firing of signal guns, determined to secure free farms and free town lots,—was novel, spectacular, dramatic. Under these circumstances the question of the priority of claimants of town lots and fertile farms long remained in doubt. And upon the decision of this question in most of the tens of thousands of cases, a competency, and, in some instances, a comfortable fortune depended. Other questions arose to complicate the situation and long litigation followed. At this time, also, this was the Mecca of the outcast, the criminal and the thug. The irresponsible newspaper correspondent, in search of sensations and in the possession of a fertile imagination, too, flourished here. We had to contend with a bad condition at home and a worse reputation abroad. In fact, the outside world was soon made to believe that we were engaged principally in committing perjury in land contest cases, stealing horses and robbing trains. We had a wild country to subdue and make fit for the abode and comfort of civilized man. Obstacles dark and menacing confronted our people on every side. But order soon sprang out of chaos. The forces of virtue in every encounter triumphed over those of vice. Had the outside world at this time not been blinded by the false sensationalism that emanated from the centers of population in Oklahoma, they would have seen here an example of the capacity of a people for self-government that at that time had no precedent and has since had no parallel. Here, where a great commonwealth had been founded in a day, where substantial, permanent and populous cities sprang into existence within an hour, where during one whole year pending widespread and almost general litigation over valuable town lots and farm lands, two hundred thousand people lived quietly, orderly and peaceably together, protected by no law—where wild barbarism was soon dethroned and civilization, enlightenment and culture reigned—they would have seen not only a great state but a great people in the making.

It has been frequently pointed out that great crises in the affairs of a nation, a people or a state, always produce great men. This simply proves that his environment makes the man—that there is always some undiscovered genius equal to any great emergency—and that he in turn inspires others to greater achievement. A radical change in environment has a tendency to develop man's powers, broaden his intellect and increase his capabilities to do and to dare.

In Great Britain and the continent of Europe the members of the wealthy and the noble classes have long retained the position of leadership not only in the domain of pure intellect but in all the larger affairs of life. There, the practice has long been prevalent of sending the young men of these two classes abroad as soon as they had completed their college courses where they would have to mingle with alien peoples and hold converse in an alien tongue. In America, the farmer's boy, when he takes up his abode in the city to seek an education to enter the professions or engage in business, undergoes as radical a change of environment as does his more favored European cousin when he goes abroad and the results in each case are the same. In our country you will find that a majority of the leaders of men,—the moulders of events, were born upon the farm. I believe it will prove true upon investigation that every great leader—every great man—that has ever existed has undergone a radical change in his environment during some portion of the formative period of his mentality and has had to overcome difficulties which such a radical change always entails. While these intellectual giants are usually richly endowed by nature,— born great some would term it,— yet the fact remains that the greatest results are only possible amid an environ-

ment where the elements of evolutionary or sporadic development are in active process of seething fermentation. I have sometimes thought, too, that one of the elements that has helped to make our country great has been the diversified, the cosmopolitan characteristics of the population. Here in Oklahoma, people from every portion of America, from nearly every quarter of the globe, have met and mingled and their interchange of ideas, their clash of ideals has been an education, a wonderfully developing force in itself.

HAVE SOLVED GREAT QUESTIONS.

But a people may possess the characteristics, the audacity, the fire and intuition of genius as well as an individual. When they do, they are always, at first, misunderstood, their motives are generally misconstrued, their character is frequently maligned and even in the eyes of affection their conduct is sometimes incomprehensible. But, as in the case of an individual, when they triumph over all difficulties the world resounds with their plaudits and praise.

The people of Oklahoma have solved some of the greatest economic and social problems ever encountered by any aggregation of men. The development of this territory in the face of stupendous obstacles stands as a miracle of achievement. Within its borders civilization, enlightenment and hardy enterprise has each achieved its culminating triumph, the crowning victory of this victorious age.

Yes, the people of Oklahoma have been engaged in a grand work. They have been building a state. But the work is nearly done. The structure is almost completed. The great state of Oklahoma is here. The only thing necessary to completion is the mere machinery of state government, and that will come soon. It has fallen to the fortune of no other people on earth to witness and participate in the founding, the development and the growth of a great state within a decade and a half of time. The people of our sister territory have accomplished results, in the face of great difficulties, almost equal to those accomplished here. And today they face grave, complicated and far-reaching economic problems which will be precipitated by statehood, before the solution of which the wisest statesmen would stagger in dazed uncertainty. The confidence with which they await their coming is in one aspect of the case of a child,— alike, in another, it is sublime.

INDIAN TERRITORY PROBLEMS.

But the march of civilzation has been marked by the continuous encountering and solution of problems. In fact, it has consisted of nothing else. And grave, complicated and far-reaching problems, affecting a whole people and requiring early solution are, after all, but great opportunities for great achievement. I want to suggest to the representative newspaper men of the nation here assembled that the problems in Indian Territory growing out of Indian treaties and acts of Congress, affecting the Indian, his relation to the white man, the nation and the coming state, the restriction thrown around him and his holding of land and the exemption of a large portion of the lands from taxation for a long period of years while he retains the title thereto, are worthy of your profound consideration and earnest study. You are on the ground in advance of their solution. We of Oklahoma expect to aid in solving them and are not afraid to point them out, because we know they will be solved, solved soon, solved by the people of these two territories whom they affect and who have been accustomed to walk rough-shod over obstacles that seemed insurmountable. If you will follow the process of their solution you will, I imagine, find another subject worthy of study. You will also probably see some one citizen at least, of our coming state, rise to such heights of distinction by reason of their solution, that the fame of his achievements will ring 'round the world.

When a great issue or a great occasion arises, the people of this territory have always been able to lay aside petty jealousies and work together with a common purpose, to a common end. In a new and rapidly-developing section of the country like this, the struggle for supremacy among its larger towns and cities is usually characterized by venom, vituperation and abuse, but the people of this city have always refrained from saying anything about those of any rival community calculated to foster town contests or foment sectional strife. We have tried to make this a territorial city in the best and truest sense of the term and I believe the citizens of this territory have always felt at home while here. They united as with one voice in extending an invitation to you to hold your annual convention in this city and the people of all Oklahoma are your hosts today. They are here through their representative men and women to join with us in an effort to make your stay among us pleasant. But I am especially directed by our mayor, our city officials and people generally, to turn this city over to you and to ask you to take possession—to say to you the lid is off, so go forth, have a good time, paint the town a vermilion hue if you will, and Guthrie bids you welcome.

PRESIDENT W. W. SCREWS RESPONDS.

President Screws responded to the addresses of welcome as follows:

PRESIDENT SCREWS.

Our trains were a little late, but you see we are here in full force from every quarter of the Union, and prepared to do justice to the glorious things prepared for us by those for whom you have so ably and eloquently spoken. Those who so indefatigably urged the claims of Guthrie for our meeting place, had very much to say of the warmth of heart of the people who make up the population of this young giant of a city, and this territory which has sprung full-fledged upon the public boards prepared for all the honors, dignities and responsibility of statehood. In voting to come here, it was in the mind of that meeting at St. Louis to help you in your great ambition to have another star named Oklahoma and placed upon the national flag, and you can count upon the aid and influence of the National Editorial Association in your great undertaking. Where, in all history, can be found a greater progress than that which has marked every step of the people of this territory from 1889 to the present hour? Vast solitudes, whose silence was only broken by the songs of the birds or the migratory steps of the Indian, are now smiling villages with glorious women, lovely children and sturdy, strong-armed and big-hearted men, every hour adding to the material growth and honor of our country. History for many pages, would have to be searched, and then, failure would mark the efforts of those who would be seeking for a parallel case.

Those who cry expansion and fear that evil will follow every movement to extend American influence and, if need be, American possession, should read well what has followed from the statesmanship and patriotism of Thomas Jefferson and those like-minded who secured for us the imperial domain, covered by the Louisiana purchase. This fair land here was part of that great transaction and it is to the everlasting honor of those who brought it into the American fold.

LIBERTY-LOVING PEOPLE.

That you are a liberty-loving people here is demonstrated by the freedom from prejudice which is manifested in your daily walk and life and in many of your laws. Here, you can meet, in the space of five minutes, men from every state of the Union, and those who shed their blood while fighting beneath the flag of the Union, and the flag of the Confederacy. Those evil days are forgotten in the earnestness with which the past is placed behind us, and the cheerfulness with which faces are turned to the future.

I have read some of the laws of many states of the Union, but I have never read on the book of any of them, one which in spirit and letter is like that of one of the statutes of broad-minded Oklahoma. It was a surprise to me when one of your prominent citizens pointed out in all the beauty of bold, clear type, a law which provides for the burial, at public expense, of any ex-union or ex-confederate soldier, whose poverty otherwise would consign their bodies to the potter's field. Glorious thought it was, and worthy of immortality. This is the strongest evidence of obliteration of animosity between lately-contending people, that has ever been framed into law, and with reverence and affection, I lift my hat to those who enacted it.

STATEHOOD AND JUSTICE.

There seems to be an element of injustice in keeping over five hundred thousand people and an area greater than that of most of the states, from the advantages that will necessarily follow admission to statehood. I believe your hour of uneasiness on that score will not long continue for surely an American congress cannot treat with such rank injustice those who have shown the element of character which builds up countries and dignifies nations and empires. This is a new country to most of us, but we wear you near to our hearts all the same. Every man who has been an aider and abettor in building up in such a marvelously short time, so much in the way of moral and financial progress, will deserve the thanks of future generations.

We are glad to be in Oklahoma. We appreciate far more than feeble words can tell the cordial welcome to your homes and your hearts, the sincerity of which has been so unmistakably manifested. Those who do not know what lovely homes, what attractive women, what strong and able men, what an amount of churches and schools abound in Oklahoma, will learn of it when the members of the association return to their homes. In their behalf I return sincere thanks for the hospitality and kindness which has been extended to us.

The opera house was handsomely decorated with flags, flowers and green branches. Neatly printed signs, fastened on standards, indicated the seats for the delegates of each state and territory. Back of the stage was the illuminated inscription, "Oklahoma The Land of the Fair God." Under the illumination was the American flag with a vacancy among the stars which Oklahoma hopes to fill.

MORNING SESSION—JUNE 8, 1905.

The convention was called to order by President W. W. Screws.

The Divine Blessing was asked by Rev. A. B. Nicholas of Guthrie.

President Screws delievered his annual address (see addresses).

Past President B. B. Herbert: I wish to move that this admirable address of our President be referred to a committee of three to report such topics as may be accentuated by the formal action of this association, and, to save time, I will name Luther Short of Indiana, H. M. Wilson of Alabama, and H. D. Heller of Iowa.

Which motion was duly seconded, put to vote by Mr. Herbert, and carried.

Mr. McCoy of Ohio: I move you that all resolutions that may be submitted for the consideration of this convention, be referred to the committee on resolutions, without debate.

Motion seconded and carried.

President Screws announced the following committees:

Officers Reports—F. G. Prouty, Oklahoma; J. H. Duke, Mississippi; S. E. Diehl, Utah; H. M. Youmans, Wisconsin; T. G. Usilton, Maryland.

Resolutions—W. H. H. Judson, Alabama; W. F. Parrot, Iowa; S. A. Dowdell, South Dakota; J. R. Newman, Arkansas; A. W. Glessner, Illinois.

Credentials—J. Irwine Steele, Pennsylvania; G. C. Woodruff, Connecticut; F. H. Hall, Illinois; Jacob Pepperman, Alabama; C. E. Nevins, Nebraska.

Necrology—J. E. Junkin, Kansas; C. E. Bryan, Ohio; George T. Campbell, Michigan; L. E. Chandler, Massachusetts; W. J. Buie, Texas.

Treasurer's Books—J. F. Lanning, Ohio; R. B. McKee, Pennsylvania; B. F. Lowthiam, Indiana.

Ways and Means—C. B. McCoy, Ohio; John Dymond, Louisiana; C. W. Robbins, Maine; W. L. Jones, Illinois; Carl Jettinger, Ohio.

Legislative—Jasper Collins, Texas; F. H. Greer, Oklahoma; W. G. Purcell, Nebraska; W. C. Hamm, North Carolina; Wm. Lee, Iowa.

Constitution and By-Laws—W. O. L. Jewett, Missouri; E. C. Perry, Tennessee; W. R. Hodge, Minnesota; Ewing Herbert, Kansas; W. W. Folsom, Arkansas.

Social—Miss Edith Tozier, Wetherred, Oregon; Miss Florence Dymond, Louisiana; Mrs. Hart, Ohio; Mrs. R. E. Colby, Illinois; Miss Bess Munn, California.

Postal Laws—B. B. Herbert, Illinois; Joseph B. McCabe, Massachusetts; R. M. White, Missouri; A. W. Lee, Iowa; Clyde Oswald, New York.

President Screws: We have on our program an address to be delivered by Captain Richmond Pearson Hobson of Alabama. When Capt. Hobson agreed to be with us, I told him that our meeting would be the first week in June, as Mr. Greer and others thought it would be; it was found necessary to move it up one week. Mr. Hobson belongs to a literary bureau that controls his time, and he had no engagements which conflicted with this, but he had another engagement which is typified by reading the 14th chapter of Luke, and the 20th verse, which says: "I have married a wife and therefore I cannot come." I know it will be a great disappointment not to have Capt. Hobson, but I am sure you are all willing to extend to him your hearty congratulations.

President Screws then announced an address on "Woman in Journalism," by Miss Virginia C. Clay of Alabama. (See addresses, etc.)

Secretary Mr. Cochrum: We have letters from past presidents Henry and Baillio, and former corresponding secretary, J. M. Page, who send greetings and regret that they cannot be present.

The Secretary: Also telegram to the president, received this morning, from Portland, Oregon: "The Oklahoma Commissioners to the Lewis and Clark Exposition at Portland, Oregon, send greetings to the members of the National Editorial Association, and request their presence and participation in the exercises on "Oklahoma Day" at the Exposition, June 27, 1905. Leander Martin, Secy. Oklahoma Commission."

On motion, the invitation was accepted.

The Secretary: Also an invitation of the ministerial association of Guthrie, to attend services, on Sunday, June 11, 1905.

On motion, the thanks of the association were tendered to the ministers of the city.

On motion, convention adjourned until 3 p. m.

AFTERNOON SESSION—JUNE 8, 1905.

Selections: Miss Perle Dunham.

President Screws: The next paper is one on a practical matter that interests every publisher, I am sure, "Printing House Economics," by Col. John Dymond, of the *Louisiana Planter and Sugar Manufacturer.*

Col. Dymond read his address. (See addresses, etc.)

Mr. Burk of Pennsylvania: I desire unanimous consent to offer the following resolution:

Resolved, That the delegates to the convention of the National Editorial Association having witnessed the skill, care and devotion to duty of the train crews that brought our train in safety to Guthrie, over tracks badly washed by a recent storm, desire to express in this resolution their appreciation of the labors of the train men.

Resolved, That copies of this resolution be sent by the secretary to the engineers and conductors of the two sections of our excursion train.

ADDISON B. BURK,
Pennsylvania.

Resolution adopted.

The paper, "Press Muzzles in Pennsylvania," was then presented by J. S. Benn, of the Philadelphia *North American.* (See addresses, etc.)

Mr. Burk of Pennsylvania: Mr. chairman, the paper just read relates to only a part of the history of the relations of the newspapers of Pennsylvania to the Governor during the last few years. Mr. Benn with becoming modesty has said nothing about his own share in the battle that has been going on. He came to Philadelphia, conservative Philadelphia, from Kansas and brought with him some western energy that has stirred up the old state. It was largely his efforts that brought about the position of Governor Pennypacker to the reform of the press and I think that he deserves credit for not only having brought about a great political rebellion in Philadelphia, but of having defied the Governor, to prevent him from carrying out his intentions of suppressing the press. The *North American* when reorganized a few years ago, started out without regard to the advertising end of the paper, to serve the public. It battled under very discouraging circumstances for several years but at length the dawn has broken, the citizens of Philadelphia have risen under the leadership of the *North American* and are now establishing a free and independent government in that city. Although I have been credited to the *North American,* I speak freely on this subject, because I am only a contributor to its columns, I do not belong to its office force; I have had nothing to do with its battle, except to admire the bravery with which Mr. Benn and his associates have beaten down the corrupt politicians of Pennsylvania.

The convention was next entertained by the rendition of three selections, given by Prof. Ben Hennessey of Guthrie.

President Screws: "United States Postal Laws and Policies," is the title of a subject which is to be discussed by Mr. Castle, ex-auditor of the United States Postoffice Department. Mr. Castle is not here.

Mr. Herbert: Mr. Castle has sent his paper with the following explanatory letter:

ST. PAUL, MINN., June 4, 1905.

DEAR MR. HERBERT:—I find, as the time for leaving approaches, that I will be unable to go to Guthrie, as I fully intended and very much desired to do.

I therefore enclose copy of my address, and will ask you to kindly read it to the convention, or arrange to have some one else do so.

Very sincerely yours, HENRY A. CASTLE.

As our time is short, I move that Mr. Castle's paper, which is a very able one, be printed in the proceedings and that the reading be omitted.

Motion seconded and carried. So ordered.

Mr. Goodwin of Missouri: I desire to offer a resolution.

The President: The gentleman desires to present a resolution. It will be referred to the committee on resolutions, without reading or debate.

Mr. Chambless of Texas: I have a resolution also.

The President: It will take the same course.

A paper on "Newspaper Libel and the Right of Privacy," by D. M. Butler of Lincoln, Neb., was then read. (See addresses, etc.)

Mr. J. H. Potts of Troy, N. Y., was then introduced and presented a paper on "Social Service of the Press." (See addresses, etc.)

The subject of "The Public School and the Public Press" was presented by Mr. J. W. Carr, Supt. of Schools, Anderson, Ind. (See addresses, etc.)

Mr. Herbert: I am informed that the Women's Press Association of Washington, have delegates or representatives present in this city. I move that we extend to them our fraternal greeting, and that the representatives of the Washington Women's Press Association be granted the privileges of the floor.

Motion carried.

The President: The next paper is "Science of Modern Business Building," I do not know the character of the paper, but I want to interpolate one thought, and that is that the greatest modern business builder in this country, is the free and liberal use of the columns of the newspapers. Mr. Barth of Illinois, of the Sheldon School of Scientific Salesmen, will read you the paper.

Mr. Barth then delivered his address on "Science of Modern Business Building." (See addresses, etc.)

The President: The report of the committee on Postal Regulations will be read by the secretary.

REPORT OF POSTAL LAW COMMITTEE.

BOSTON, MASS., May 31, 1905.

To the Members of the National Editorial Association:

At your last annual meeting at St. Louis, President P. V. Collins in his opening address recommended the appointment of a committee on Postals Laws, and in accordance with that recommendation this committee was named. Widely-scattered as its membership is, we have been unable to hold a meeting which all could attend, and have therefore been compelled to carry on our communications with each other by correspondence, the work largely devolving upon Mr. Floyd, our Secretary, under the direction of the Chairman. Not only the members of the Committee, but many leading members of our Association were invited to make recommendations in writing, and a large mass of correspondence has resulted.

That grave abuses exist in the Postal Department is beyond question. That fact has impressed itself so generally on the publishers of the United States that all the organized associations of editors and publishers are profoundly interested in it. One of the strongest of these associations in its representative character, is made up of the principal weekly and monthly publications in and about New York City, known as the Periodical Publishers' Association. The Chairman of our Committee as a member of that organization, reported to this Committee that the New York body referred to had made a generous appropriation to secure expert counsel and advice in reference to the inequalities and hardships of our Postal Laws, on which to base comprehensive recommendation in favor of an entire revision of these laws as far as they apply to the circulation of periodicals. This work as your Committee early discovered, is most difficult. It requires a careful examination of all postal rulings, as well as all postal laws and their various amendments and interpretations, expert knowledge in reference to controverted facts, and a familiarity with the methods by which legislation can be best secured.

Under these conditions, your Committee deems it the best policy to recommend that the National Editorial Association either continue your present Postal Committee or appoint a new committee, as it may see fit, with authority to coöperate with any other publishers' asssociation or committee thereof in an effort to secure the postal reforms

which this Association favored. We believe that if the publishers of the United States can unite on a plan for coöperative effort the desired reforms can be much more rapidly and effectually secured than by divided efforts. Powerful influences are vigorously opposed to some of the changes we most need and which ought in all fairness and equity to be granted without opposition. The influence of this Association, we believe, if brought solidly to bear, can be made the most potential factor in securing our aims, and we have no doubt that our aid will be cordially welcomed by all the other associations that are now considering the subject. All of which is respectfully submitted by the postal laws committee.

Chairman, John A. Sleicher, *Leslie's Weekly,* 4th Avenue, New York.

B. B. Herbert, NATIONAL PRINTER-JOURNALIST, Ravenswood Park, Chicago, Ill.

W. S. Cappeller, Mansfield *Daily News,* 93 W. 4th St., Mansfield, Ohio.

J. G. Baumgartner, Pasadena *Star,* Pasadena, California.

Secretary, Robert Mitchell Floyd, *Trade Press List,* 50 Central St., Boston, Mass.

Report accepted and ordered printed in proceedings.

The convention adjourned 8 p. m.

EVENING SESSION—8 P. M. JUNE 8, 1905.

Convention called to order by First Vice-President W. W. Folsom.

Chairman Folsom: The first number is the annual poem by Hon. W. E. Pabor of Avon Park, Fla.

The poem was recited by Mrs. Frank G. Pabor.

Chairman Folsom: The next number on the program is a recitation by Mr. Ben Hennessey:

(Three selections.)

Chairman Folsom: The next number on the program is the report of the necrology committee, by Mr. J. E. Junkin of Kansas:

REPORT OF NECROLOGY COMMITTEE—By Chairman J. E. Junkins of Kansas.

COL. D. R. ANTHONY.

Col. D. R. Anthony, the Nestor of journalism in Kansas, passed away during the past year. He was eighty years of age, and died in the harness, active, forceful and magnetic up to almost the hours of his death. He was the editor and proprietor of the Leavenworth *Times* for over forty years and made his impress upon the history of the Sunflower State. He was almost an incarnation of force and assertiveness, yet his one regret in speaking of his life was that "I have not been positive enough." He was what the Psalm of Life would call "a hero in the strife" that made Kansas a free state and has kept that commonwealth in the public eye for two score of eventful years.

J. F. SMART.

At his home in Leesville, La., on Feb. 6th last, Mr. J. F. Smart, editor of the Vernon *News,* laid down the labors of earthly life. He was forty-two years of age at his death, and had been active in the work of editor, teacher and public official. From a tribute written by his contemporary we clip this estimate of the man's life and character.

"John F. Smart was a man of the day, and during his life he took an active part in all matters pertaining to government, local, state and national, and when his voice or pen was raised for or against an issue of whatever nature, it expressed the true thought of the man, and was, undoubtedly for the best as he saw it."

To his widow and to the people whom he loved and served this association tenders its profound sympathy. No higher tribute can be paid any man than that he did his duty as God gave him the light to see it. This, we understand, was the guiding star of our departed brother.

IRA L. CAMPBELL.

Ira L. Campbell, editor *Daily and Semi-Weekly Guard,* Eugene, Oregon, died at his home, Oct. 15, 1904, from a stroke of paralysis, which seized him as he was preparing to attend the annual session of his state association. Mr. Campbell was a charter member and past president of the Oregon Press Association and seven times a delegate to the N. E. A. He had been publisher of the *Guard* for twenty years. His widow, two daughters and two sons survive him, and to them this body extends sincerest sympathy. His work in the development of the Oregon country will ever stand a monument to his patriotism and his unselfish devotion to the highest ideals of the true newspaper worker.

DR. PARKER.

Dr. Parker of the Kendalville, Ind., *News,* is reported among those who have been called to their reward on the other shore. He was a member of the Indiana association, but we have no further data concerning his work.

JOHN HOPLEY.

Editor of the Bucyrus, Ohio, *Weekly Journal* and *Daily Evening Telegraph,* passed from this life, June 3rd. Mr. Hopley was one of Ohio's oldest editors and was one of the last of the old school of journalists to leave the stage. His newspaper career covered a period of thirty-seven years in the Ohio field and at the time of his death he was probably better known by the fraternity of the state than any other man.

Mr. Hopley was formerly quite active in association work and was a member of the N. E. A.

GENERAL CLARENCE L. SMITH.

Editor of *The Fairmount,* W. Virginia *Index and Lines,* died at his home in Fairmount, Feb. 9th. In all walks of life, whether in business affairs, in politics, as a newspaper editor or as a military commander, General Smith was extremely popular with those associated with him and his death was a severe loss to the newspaper fraternity of "The Little Mountain State."

WILLIAM H. RUBY.

Editor of the Maryland *Journal,* Townson, Maryland, died on Sunday. Mr. Ruby was the oldest editor in the state and belonged to the old school of newspaper proprietors. He established the Maryland *Journal* at Townson, Jan. 1, 1865, and has continued the paper ever since. During President Cleveland's second term Mr. Ruby was commissioner of immigration at the port of Baltimore. Mr. Ruby was forty years a Mason and an Odd Fellow for 52 years.

FRANK R. GILSON.

Frank R. Gilson, editor of the Benton Harbor (Mich.) *Palladium,* and past vice-president of the N. E. A., died at his home July 4, 1904, after a lingering illness of several months. There was scarcely a better known or more respected member of this association, for he had for many years been prominent in our councils; twice candidate for the presidency, lacking but one vote of attaining that honorable position.

In his editorial career, which covered the entire field of the mechanical and editorial departments, Mr. Gilson was an honor to the profession. His sincerity of purpose, his lofty ideals, his qualities of mind and heart all stamped him as a man whose loss we deeply deplore.

Mr. John M. S. Hunter of Maine, a man that we all loved, meeting him year after year for probably ten or twelve years in association work, has passed away during the year. No data has been handed to me in regard to Mr. Hunter, but Past President Herbert has been asked to make some remarks later on as to the life and character of Mr. Hunter.

Then there is Col. Craddock, whose name has been mentioned to me since I have been on the stage. Col. Craddock was one of the well known characters of the association for the last several years. Year after year we have met the genial Colonel, and we enjoyed his presence very much, and I regret very much that he and these others about whom I have spoken, are not here to be with us today.

The Chairman, Mr . Folsom: The next number on the program is a vocal solo by Miss Oliphant of Mangum.

Chairman Folsom: The next number on the program will be an address by Mr. Campbell of Michigan.

Mr. Campbell: Mr. President; I had considered, friends of the association, that when Mr. Junkin completed his remarks, that the memorial portion of this service was completed, but it has been thought that possibly an extra word might well be said in the behalf of one who is well known, well loved by the members of the national association.

For many years, those of you who have been attending these meetings, have met one who has impressed you as being a superior man, one who by the high qualities of his mind and his heart has won a place in your affection which I am sure will never be gained by another; one who was so gentle and yet so courageous; one who was so tender and loving and yet on occasion, when the occasion required, could be as bold as the necessity demanded. To those of us of Michigan who knew Frank R. Gilson more intimately, there was none who held a higher place in our minds. There was none to whom we looked more for counsel and for assistance; none whose judgment we depended upon more; none whom we regarded as being better qualified for any position in the gift of our state association, and in the gift also of the National association, and therefore it is no wonder that as we came to these meetings, we years ago asked you to confer upon him and upon yourselves, the honor of an official position, and I believe that you did reflect credit upon this National Association when you elected him to the second vice-presidency and when you gave him two years ago at Omaha such a magnificent vote for the first office in the gift of this association, where he lacked but one vote of being elected the president of the National Association, one which would not only have been deserving of him, but which he would very much have appreciated.

A little short time after that meeting and before the next meeting which was held at St. Louis, our friend and your friend was stricken suddenly with apoplexy, and for weeks, at his beautiful home in Benton Harbor, he lay upon his bed still trying to do the work of editing his daily paper and of directing his large business. But finally his weak and tired nature was obliged to give away to the ravages of disease and in time he was obliged to sell his plant and finally as he grew weaker and weaker, and on the Fourth of July last, on that great Independence Day, his noble spirit departed. Those of us who knew him in life, I am sure respect him in his death. We have appreciated his kind qualities of mind and heart; we have loved him, we have honored him. We meet today in this first association since he was taken from us, and I am sure that you, the members of this national association, are glad though I wish it might have been from some abler tongue, but I am sure you are willing to pause for just a moment and think of him and think of his memory; think of him as he met with us in the years past and of the many happy occasions and many happy reunions: the words of counsel that we have listened to from his lips, and the kindly greeting with which he has always met us.

For such lives as his, breathe fragrance as the rose; fragrance that will never be forgotten; fragrance that will never be lost, and I believe the National Editorial Association, of which he was a member for fifteen years, will always be benefited by his life and by his character.

Chairman Folsom: Past President Herbert will address you in regard to our departed brother, Hon. J. M. S. Hunter of Maine.

Mr. B. B. Herbert: Members of the Association: This life is a mystery, it is filled with struggle, and the parting is sometimes very sad, but yet there is a hope for the future, and many men leave behind a memory that lightens up the future with greater hope.

One of the grandest passages to me, ever written or spoken by that great prophet of the old testament, Isaiah, the patriot as well as prophet, were the words of the first and second verses of the 32nd chapter, where in prophesying of the future he said:—"Behold, a king shall reign in righteousness and princes shall rule in judgment. And a man shall be as a hiding place from the wind and a covert from the tempest; as rivers of water in a dry place, as a shadow of a great rock in a weary land."

"As the shadow of a great rock in a weary land" was the character of Mr. Hunter. He stood ever firm as the pine trees of his own state. He was a man of deep convictions and his neighbors could rely upon his printing in his paper the truth as he believed and as he was willing to live, and that he was willing to give up his life to maintain. He was as "the shadow of a great rock in a weary land" and what an inspiring thought it is that in our work as editors we may, in our papers, by firmness of principle, by loyalty to all that is noble and true, by planting our feet firmly upon righteousness and justice, and giving to the world that information which shall lead them forward, our papers may be as restful to our readers as "the shadow of a rock in a weary land;" that they may come to look upon us with confidence, feeling that we may never be moved or swerved from our course and that whatever we say they can rely upon, and be willing to build up their characters and their beliefs upon. That was the leading characteristic of Mr. Hunter. He was firm, it mattered not whether his own self interest came in contact with his principles or not, he never for an instant wavered, but his principle stood first at the sacrifice of his self interests.

He was a true man, a noble man, a quiet man, an unassuming man, a gentle man, and as we met him, some, probably few, a very few, really got real close to him because he was so reserved, but when we knew him thoroughly and knew of his life work and of his consistency, and of his services, and of the consistent example that he set in his calling, we then came to recognize that he was one of the rocks of our profession. One of the noblemen to whom the people could look. My mind is full of that thought, I cannot rid my mind of it, that how important it is for us to feel that we have a principle for which to strive, and that we must always be true to the line; that we never will swerve from our course for any interest or any feeling, but will treat all fairly, honestly, justly and righteously, and that in our papers we will give to the people, to our readers, such things as they can rely upon, and that when they turn to us as the old readers of the New York *Tribune,* for twenty years during the best years of Horace Greeley, used to turn to the *Tribune,* they can turn to our papers and say, we know, we believe, and we are willing to accept these as the truths believed in by the editor.

I do not wish to dwell long upon Mr. Hunter's life; he lived, he worked, he died; he occupied no high position; but his life had the true nobility, the true granduer that any life can have, the granduer of usefulness, of truthfulness, of loyalty to principle: of justice, of righteousness, and such an influence will never die, and as the ages roll on it will widen and widen from our different counties throughout all this country. Men who have read our words, if we have given them the truth, if we have instilled into them the ideas of patriotism, loyalty, truthfulness, justice and righteousness, and have laid these higher ideals before our readers month after month, and year after year, we have somewhere sowed good seed that may spring into life in some distant state and develop to the blessing of other communities. I thank you.

Mr. Junkin: One more name should be added to our report. That of J. W. Buchanan of Grenada, Miss. We all remember Mr. Buchanan, how outspoken he was when he had an opinion upon any subject, how heartily he entered into all the enjoyment of our National Association, and how faithful he was in attendance at every meeting, and I might say at every session of every meeting Mr. Buchanan was with us.

In thinking about these newspaper men who have gone before, I tried to remember an appropriate verse from Gray's Elegy, "In a Country Churchyard." There is certainly something in that remarkable poem that ought to fit the case of the newspaper man, and this is the one verse that seemed to me to state it exactly:

"Large was his bounty, and his soul sincere,
Heaven did a recompense as largely send;
He gave to Misery all he had, a tear,
He gained from Heaven ('twas all he wished) a friend."

The convention adjourned until 9:30 a. m., Friday, June 9.

FRIDAY MORNING JUNE 9, 1905.

After calling the convention to order President W. W. Screws made the following explanatory remarks:

Those of you who received a circular letter from the president dated May 9th, in reference to a request that had been made by a very few members, that the executive committee of this association be called in extra session for the purpose of considering certain matters that were outlined in the letter that was sent to most of the delegates and committeemen, will no doubt remember that in that circular letter it was stated distinctly that the program of the National Editorial Association would be carried out as published so far as our meetings were concerned, beginning on Tuesday and ending on Friday afternoon at our pleasure. There are some who seem to think that because of an invitation to attend an entertainment that has been provided by private individuals to take place on Sunday that some action should be taken by this association in reference thereto. The people of Guthrie, I am sure everyone here will agree with me in saying, are equals in refinement, in culture, in courtesy and in hospitality to any given number of people to be found in the United States. (Applause.) I venture that in no city of one hundred thousand population from the Atlantic to the Pacific, from the north to the south, can you find a greater proportion of intelligence, and ability than has been showered upon us during our three days in this community. (Applause.) The entertainments have been of their own volition. They are the entertainments of this good and cultured people. The National Editorial Association has no more to do with them than any other community one thousand miles from here. Nor have we anything to do with any entertainment that may take place next Sunday. Because the train that bears the delegates from this city at six o'clock this evening will be composed of delegates of the National Editorial Association, it does not follow in any degree this association is responsible for that train or for any place to which the people on it may go. This is a great free country. Our constitution guarantees to us freedom of religion and freedom of thought and I am in every way willing that everyone shall exercise his own conscience and his own religion in his own way. I have only to say that I want the world to know that the National Editorial Association is not responsible as a body for anything, except its own announced program, that may take place since we left home and until we return. I did not expect to refer to this matter. Some of the ministers have desired to come here and offer a protest against it. I told them that the convention as a body was not going and did not, as an association, intend to go there Sunday. Some members desired to bring in a protest. I told them I did not wish them to do that, but that in deference to their wishes I would make this statement before you all. (Applause.)

Mr. Wm. Southern, Jr. of the *Examiner,* Independence, Mo., delivered an address entitled "Newspaper Diplomacy—Tell the Truth." (See addresses, etc.)

Hon. Luther Short of Indiana submitted the following:

REPORT OF COMMITTE ON THE PRESIDENT'S ADDRESS.

We, your committee to whom was referred the President's address, respectfully report that we have carefully considered the same and most heartily endorse the entire address and are especially desirous to commend the high moral tone of the same and urge the careful consideration and general adoption of the principles enunciated therein.

Respectfully submitted,
LUTHER SHORT, Indiana,
H. M. WILSON, Alabama,
H. D. HELLEN, Iowa,
Committee.

On motion the report was adopted.

Mr. A. W. Glessner, Inland Daily Press Association, moved:

In order that sufficient time may be given the corresponding secretary for the proper provision of transportation and accommodations for delegates, be it ordered that the secretary in future require payment by delegates of all fees and assessments ten (10) days prior to date of rendezvous, but all Pullman and other expense fees that may have been paid shall be returned if notification of inability to attend shall reach the corresponding secretary forty-eight hours prior to date of rendezvous.

Motion adopted.

Moved by J. Pepperman, Alabama:

That at future sessions of the "N. E. A." the official badges of this association be distributed by the corresponding secretary of this association and then only through the executive committeeman of the respective states represented in this association.

Carried.

REPORT OF COMMITTEE ON WAYS AND MEANS.

June 9, 1905.

Hon. W. W. Screws, President N. E. A.

Your committee on ways and means begs leave to report a recommendation that the existing system of collecting revenues for the association be continued for the ensuing year without change.

C. B. McCoy, Chairman.
John Dymond,
C. W. Robbins,
W. L. Jones,
Committee.

Report adopted.

REPORT OF COMMITTEE ON OFFICERS' REPORTS.

Mr. President: The committee on officers' reports beg leave to report that there is nothing for us to do as the finance committee has examined the books and found them correct.

Frank G. Prouty,
Chairman.

Adopted.

H. G. Gilstrap of Chandler, Okla., delivered an address on "The New State and Its Newspapers. (See addresses, etc.)

William Allen White, *Gazette,* Emporia, Kans., delivered an address on "Newspapers and Reforms." (See addresses, etc.)

Past. Pres. B. B. Herbert moved to refund twenty-five dollars to the Mississippi delegation for amount of per capita tax overpaid on delegates.

Motion carried.

REPORT OF COMMITTEE ON CREDENTIALS.

The committee on credentials submitted the following report which was approved:

DELEGATES TO THE TWENTIETH ANNUAL CONVENTION OF THE NATIONAL EDITORIAL ASSOCIATION OF THE UNITED STATES.

GUTHRIE, OKLAHOMA, JUNE 7, 8, 9, 1905.

A star (*) preceding name of delegate indicates that he is accompanied by his wife or other person.
Two (**) indicates two persons, etc.

(Officers, Executive Committee, Life and Honorary Members, same as printed in the June issue.)

LIST OF DELEGATES.

Alabama—Alabama Press Association—*Ex. Com. Jacob Pepperman, *Southern Odd Fellow,* Montgomery, Ala.; Miss Virginia C. Clay, *Democrat,* Huntsville; J. H. F. Mosely, *Labor-Advocate,* Birmingham; W. H. H. Judson, *Weekly,* Bessemer; **J. H. Hard, *Journal,* Bessemer; *H. M. Wilson, *News,* Opelika; **A. W. Holstun, *Sun,* Lafayette; F. L. MacKenzie, *Weekly,* Tallassee; **Geo. W. Read, *Herald,* Ensley; *W. M. Tucker, *Express,* Demopolis; R. L. O'Neal. *Mercury,* Huntsville; J. C. Lawrence, *Breeze,* Union Springs; R. E. L. Neil, *Journal,* Selma; *W. M. Meeks, *Times-News,* Gadsden; *H. S. Doster, *Progress,* Prattville; ***R. H. Walker, *Democrat,* Athens; *C. H. Greer, *Standard,* Marion.

Arkansas—*Chas. M. Clark, *Standard,* Arkadelphia; W. B. Folsom, *Argus,* Brinkley; J. R. Newman, *Times,* Harrison.

Southern California—*Ex. Com. J. P. Baumgarten, *Star,* Pasadena; Grace Tower, *News,* Pasadena; Bess Munn, *Register,* San Jacinto.

Colorado—Ex. Com. C. E. Wood, *Telegraph,* Colorado, S.; **O. H. Wangelin, *Herald,* Boulder; C. H. Wolfe, *Tribune,* Greeley; *A. C. Newton, *News,* Grand Junction; *Geo. W. Johnson, *Call,* Longmont; *S. S. Case, *Journal,* Castle Rock; S. W. Raymond, *Herald,* Durango; *Leo Vincent, *Camera,* Boulder; Carl Anderson, *Courier,* Fort Collins.

Connecticut—Ex. Com. G. C. Woodruff, *Enquirer,* Litchfield; Arthur S. Barnes, *Press,* Bristol; W. S. Sharp, *Record,* Seymour; H. B. Hale, *Gazette,* East Hartford.

Florida—Florida Press Association—Ex. Com. C. L. Bittinger, *Star,* Okalla; *Philip Isaacs, *Press,* Fort Myers; Allan Reid Parrish, *Fruit Grower,* Miami; *Frank C. Pabor, *Pine Apple,* Avon Park

Georgia—P. T. McCutcheon, *Banner,* Nenan.

Idaho—Idaho State Press—Chas. A. Hackney, *Eagle,* Meadows; *Frank S. Harding, *Signal,* Weiser.

Illinois—Illinois Press Associationn—*L. A. Constantine, *Post,* Aurora; **H. D. Hemens, *Courier,* Elgin; *C. W. Bliss, *News,* Hillsboro; *J. M. Breen, *News,* Tulaca; *J. M. Sheets, *Oracle,* Oblong; *C. J. Lumpkin, *Enquirer,* Carlinville; Chas. B. Mead, *Republican,* Geneva; B. F. Shaw, *Telegraph,* Dixon; R. L. Davis, *Dem. Message,* Mt. Sterling; *M. H. Spence, *Gazette,* Elmwood; J. H. Stokes, *Journal,* Highland; **Miss F. A. E. Wright, *Herald,* Hinsdale; *J. W. Wild, *Free Press Gazette,* Nokomis; Anna B. Jencks, *Republican,* Henry; *E. B. Spink, *Times,* Chandlerville; ***G. W. Hughes, *Register,* Clinton.

Illinois Democratic Association—*L. B. Stringer, *Courier,* Lincoln; *C. C. Givens, *Dem. Message,* Mt. Sterling.

Military Tract Press Association—*Ex. Com. Will Curtis, *Star,* Kewanee; Geo. W. Cyrus, *Journal,* Camp Point; A. E. Stetson, *Messenger,* Neponset; *J. C. Coulson, La Harpe.

Illinois Republican Association—*Ex. Com. W. L. Jones, *Journal,* Lebanon; Ralph B. Parker, *News-Herald,* Lincoln.

Inland Daily Press Association—*Ex. Com. A. W. Glessner, *Gazette,* Galena; *P. S. McGlynn, *Dispatch,* Moline; A. W. Lee, *Courier,* Ottumwa, Iowa; W. L. Lane, *Journal,* Muscatine, Iowa; Mrs. F. S. Greenleaf, *Journal,* Savanna, Ill.; F. H. Hall, *Herald,* Joliet, Ill.

Illinois Woman's Press Association—*Ex. Com. Rose L. Colby, *Star,* Chicago; *Mrs. Estella Ryan Snyder, Chicago.

Indiana—Democratic Editorial Association—Ex. Com. L. G. Ellingham, *Democrat,* Decatur; *B. F. Louthian, *Pharos,* Logansport; *Luther Short, *Star,* Franklin; *Geo. T. Fowler, *Times,* Frankfort; **A. B. Crampton, *Citizens Times,* Delphi.

Indiana Northern—Ex. Com. Will E. Beeson, *Journal,* Winchester; M. W. Pershing, *Advocate;* Tipton; *J. E. Buchanan, *Dispatch,* Auburn; *Miss Harriet Conlogue, *Sun,* Kendalville.

Indiana Republican Association—Ex. Com. W. S. Montgomery, *Republican,* Greenfield; *W. H. Craig, *Ledger,* Noblesville; W. B. Maddoche, *News,* Bloomfield; G. H. Hamilton, *Argus,* Thornton; *Thos. J. Brooks, *Mail,* Bedford; E. O. Rose, *Magnet,* Angola; L. N. Hines, *Times,* Union City.

Southern Indiana Association—Ex. Com. W. S. Chambers, *Democrat,* New Castle; Chas. W. Thomas, *Democrat,* Corydon.

AFTERNOON SESSION—JUNE 9, 1905.

The following invitation was presented by the Bliss Commercial Club, Friday afternoon, June 9, 1905, 2 p. m.:

President of the National Editorial Association:

We have looked forward with much pleasure to entertaining the association on Sunday. We understand there is objections on the part of some to the 101 Ranch. To those who do not desire or care for entertainment at the celebration, arrangements are being made for religious services in order that everyone may spend the day according to the dictates of his own conscience. Advise how many will attend such services so we can reserve pew room.

Bliss Commercial Club.

Chairman Laning submitted the following:

REPORT OF COMMITTEE ON TREASURER'S BOOKS.

GUTHRIE, June 9, 1905.

Your committee has examined the report of the Treasurer, J. Irwin Steele, and found it correct. The sum of $2,467.25 has been collected this year. The total amount available for payment of bills, $3,910.49. The payment of the following bills is recommended:

Bill of B. B. Herbert, Printing, etc., left over from last year	$ 38.90
Recording Secretary's Salary	150.00
Treasurer's Salary and Expense	261.50
President's Expense Account	60.00
Corresponding Secretary's Salary	500.00
Expense, Stenographer, Postage, etc	425.69
Expense of Speakers	15.00
Rebate to Mississippi Delegation	25.00
	$1,476.09
Balance in Treasury	$2,434.40

Respectfully submitted,

J. L. LANING,
R. B. MCKEE,
B. F. LOUTHAIN.

REPORT OF COMMITTEE ON RESOLUTIONS.

Through Chairman W. H. H. Judson of Alabama, the Committee on Resolutions submitted the following report, each resolution having been read and acted upon separately:

For the twentieth time in annual convention assembled, the National Editorial Association is the guest of its fellow citizens. Memory goes back to many joyfully-remembered and brilliant efforts in its career, when the great hearts and loyal, generous impulses of the American people have made pleasant and strewn with roses its pathway. But no experience of its members' trips have been fraught with more precious memories of a boundless unstinted hospitality, of a more fervent heart-to-heart welcome, of a more eager, generous sacrifice to every pleasure, wish and want, than that afforded us in this beautiful, progressive, ambitious city, the marvelous product of this grand, great, almost incredible west. And in special acknowledgement of the service and sacrifice that has so largely contributed to this gracious consummation, be it

Resolved, That our deep gratitude is due, and our special thanks are tendered:

1. To Colonel Frank G. Prouty and to Bros. F. H. Greer and Leslie G. Niblack for their constant, thoughtful and tireless efforts in providing for our pleasure and comfort.

2. To the ladies, for their sweet ministrations to, and gracious reception of, our wives and daughters.

3. To the people of Guthrie, for their hospitality, typical of the greatness, grandeur, and exhaustless riches of this illimitable domain.

4. To the press, for its notable enterprise, royal greeting and fraternal and tireless interest in contributing to our entertainment, and;

5. To the Scottish Rite Masons of Oklahoma and Indian Territory for opening the doors of their marvelously beautiful home, and for so lavishly bestowing upon the strangers the rich, rare, priceless fruits of their most exquisite and indescribable hospitality.

Resolved, That the thanks of the association should be extended to the M. K. & T. railway, the Santa Fe, the Rock Island, Frisco and the D. E. & G., and other transportation lines, for the splendid service provided for our transportation to Guthrie and other points, and to the Western Union and Postal Telegraph companies, for courtesies extended.

STATEHOOD.

Resolved, That civic and impartial justice is a cardinal principle of American institutions. Its unnecessary deprivation is a political crime. The arbitrary exclusion of Oklahoma from the brotherhood of states, possessing as she does four-fold the essential requisites, qualification and resources of statehood, is a reflection on the good faith and patriotism of the national congress, and an injustice that cannot be too speedily retrieved; therefore be it,

Resolved, That the National Editorial Association express their earnest hope and conviction that civic justice to the people of Oklahoma be no longer delayed or imperiled by extraneous interests, but that she will be speedily placed in the galaxy of states which she will so richly adorn.

Be it further resolved, that a personal inspection of Oklahoma and Indian Territory convinces us that these two territories should be combined into one great state. The two have more than a million and a half population. In wealth and civilization, in all the essentials of a great commonwealth, they are entitled to statehood, and we see no reason why Congress should longer delay the passage of a bill admitting the state of Oklahoma. We urge upon the members of Congress to lay aside all personal differences, and to harmonize for the passage of a bill making one state of Oklahoma and Indian Territory.

We believe that these two territories deserve to stand upon their own merits, with no other entangling alliances.

We hereby pledge the earnest support of our newspapers and our personal influences to the accomplishment of early statehood for the people of the twin territoris.

Resolved, That whereas the impression has gone abroad that the manner in which the members of this association shall spend the Sabbath, June 11, has been officially fixed by this association, and whereas no such action has ever been taken, be it resolved, that the question of how its members shall spend the Sabbath is a matter for them to determine and answer for individually.

Whereas, The right of liberty of action in conscience, and the management of one's own affairs, under the limitations of the law, and with due regards to the rights of others are inalienable, and

Whereas, Any restrictions upon the untrammeled exercise of these rights are an assault upon personal liberty and a menace to the free institutions of this country, and

Whereas, The International Typographical Union, of America, has given notice that its membership will, on and after January 1, 1906, cease work under conditions now prevailing, and will demand and command that eight hours of labor shall constitute a day's work, and that the price paid for the same shall be that of a nine-hour day, regardless of the conditions of supply and demand, or of local environments, or of the friendly relations that may prevail between the employer and employe, and

Whereas, The right of the International Union to take this action is inalienable, but its arbitrary assertion and enforcement, if attempted, could not fail to be revolutionary and demoralizing, in its effect on business conditions and its application prejudicial and unjust to the widely-diversified interests of the craft, therefore be it

Resolved, That it is the sense of this association that such action upon the part of the Typographical Union would be arbitrary, unreasonable and unjust, and that it cordially approves of, and fraternally commends the position of the United Typothetæ, of America in resenting the imposition and declaring that the relations of employe and employer must not be menaced by combinations and conspiracy, and the interests of the latter hazarded, and of the former sacrificed.

Resolved, further, That in the interests of peace, harmony and justice, and of the good relation that now and that should continue to prevail in the craft, this association suggests to the Typographical Union, soon to assemble in annual convention, the advisability of rescinding this action and not to persevere in the attempt to accomplish by combination, menace and force what the principles of sound business, and of untrammeled justice, would not warrant.

Resolved, That it is the sense of this association in view of the almost proverbial congestion of its program and the difficulty attending the commanding attention during its formal proceedings, that those delegates and persons who accept commissions upon its program should be limited to a period not to exceed thirty minutes.

The first whereas and resolutions of thanks were adopted unanimously by a rising vote.

The other resolutions were adopted by unanimous *viva voce.*

Resolved, That the sum of one hundred dollars be and is hereby appropriated from the treasury of this association to purchase a suitable testimonial for our worthy retiring president, Major W. W. Screws.

Resolved, further, That a committee of three members be appointed to purchase such testimonial, and present it in the name of this association to the retiring president, Major W. W. Screws.

Past President B. B. Herbert moved the adoption of the last two resolutions and the motion having been numerously seconded, on request, he put the question which was carried by unanimous vote and he named the following committee from the Alabama delegation to carry out the instructions contained therein: Jacob Pepperman, *Southern Odd Fellow,* Montgomery; W. H. H. Judson, *Weekly,* Bessemer; H. S. Doster, *Progress,* Prattville.

The President: Roll call on next place of meeting is next in order.

Secretary: Alabama.

Mr. Pepperman of Alabama: Alabama yields to its sister state of Indiana.

Mr. Brooks of Indiana: Indiana presents to this convention as the location for the next meeting of the City of Indianapolis. I shall not sing the praises of Indianapolis. I am too modest, but we have with us two gentlemen who will tell you of this good city and what we shall do for you. I ask the privilege of this convention that first there take the floor a representative of the manufacturing interests of that city. A man who has been selected and sent here by the Commercial Club of that city to extend this invitation. The Commercial Club of Indianapolis represents the manufacturers, the industrial, the commercial and the professional interests of that city. It is a big organization, it is pledged in all the great reform movements not only of the city but of the state and they are asking you to come as well as we newspaper men are asking you. I ask you to now hear Mr. Allison. of the Commercial Club of Indianapolis.

W. D. Allison said:

I thank you for this privilege of addresing your convention and I promise you I will be brief.

I wish to first read to you the invitation of our Chief Executive and our Mayor, and of the Commercial Club:

INVITATION OF THE GOVERNOR OF INDIANA.

EXECUTIVE DEPARTMENT, STATE OF INDIANA.

June 1, 1905.

To the Honorable W. W. Screws, President, National Editors' Association, and Members of the Convention, Guthrie, Oklahoma.

GENTLEMEN:—As Chief Executive of Indiana, I have the honor of extending to your Association a cordial invitation to hold your next National Convention in Indianapolis, the capital city of Indiana. This city being centrally located, is easily accessible from every State in the Union, and with its ample hotel accommodations, railroad facilities, beautiful streets and parks, is an ideal convention city. We wish you to come and enjoy our hospitality.

With assurance on my part that our people will enjoy having you with us, I remain,

Sincerely yours, J. FRANK HANLY,
Governor.

INVITATION OF THE MAYOR OF INDIANAPOLIS.

EXECUTIVE DEPARTMENT, CITY OF INDIANAPOLIS,

June 2, 1905.

Mr. W. W. Screws, Pres., National Editorial Association, Guthrie, Okla.

DEAR SIR:—Having learned that the National Editorial Associa-

tion will hold its 1905 convention at Guthrie, June 7, 8 and 9, I take this opportunity, as representative of the city of Indianapolis, to invite your convention here in 1906; assuring you at this time that nothing will be left undone that will add to the pleasure and comfort of each one of the delegates, while they remain in our city.

Yours truly, JOHN W. HOLTZMAN,
Mayor.

INVITATION OF THE COMMERCIAL CLUB OF INDIANAPOLIS.

INDIANAPOLIS, IND., June 3, 1905.

Mr. W. W. Screws, President, National Editorial Association, Guthrie, Oklahoma.

DEAR SIR:—In behalf of the Board of Directors of the Commercial Club we have the pleasure of inviting the National Editorial Association to hold its Convention in 1906 at Indianapolis.

No city in the country is more beautiful or more admirably situated than Indianapolis, and none so easy of access. With its twenty-nine steam and interurban railroads it is so connected that half of the population of the United States is within a few hours' ride. This has made Indianapolis the most popular Convention City in the United States. No other city entertains as many conventions as the Hoosier Capital.

It has more than 210,000 inhabitants with 110 miles of improved streets. It is a great industrial center. There are more than 2,000 manufacturing concerns in Indianapolis which give employment to nearly 35,000 people, and have an annual pay-roll of nearly $12,000,000. It is today the twentieth city in population, having gained in the last decade, 60.4 per cent. It has the finest school system in the world. It has a number of schools for higher education, including the Winona National Technical Institute. It is the fourth city in the United States as a publishing center, and the home of many interesting literary people and famous statesmen. Its hotels are noted for their excellence and fair treatment of guests. Some of these hotels have Convention Halls capable of accommodating your entire body, with adjoining committee rooms, thus enabling you to transact all your business under one roof.

If you come to Indianapolis in 1906 we promise you an interesting program for your entertainment, including a summer festival at a "Summer Garden," which is unquestionably one of the most beautiful spots in America, a reception for the ladies at one of the most unique club-houses in the world, being conducted entirely by women, a trip around the Belt Railroad to view our chain of great industries, and other forms of sight-seeing which will be attractive, including street car, carriage and automobile rides. Our street car system is without doubt one of the best in the world, and hundreds of points of interest can be reached within a short time without change of cars. You can rest assured that nothing will be left undone which will add to your comfort and happiness while you are our guests. If you decide to leave us, (which you will be loath to do), we will land you by a short ride on the shore of one of the bordering great lakes, or if you decide to stay, will give you permanent, pleasant homes in the midst of the most agreeable people you have ever met.

Trusting that we may have the pleasure of your acceptance, we are,

Very truly yours, THE COMMERCIAL CLUB,
R. G. McClure, Secretary. Alfred F. Potts, President.

As the representative of the Commercial Club of the City of Indianapolis, I wish to tell you something about the greatest inland city in the United States and to extend to you a most cordial invitation from our entire people to hold your convention with us in 1906.

So much has been said and written of the greatest railway center in the country that I need only remind you it is still the hub of the railway wheel. "Where is another city that offers such facilities of ingress and egress? You may come not only from the north and the east, the west and the south—you may even box your compass and still get there. If a man does not desire to go any place in particular but has a fancy to travel "south by west" or "east by south," we can still furnish him a smooth road. It is within thirty-five miles of the center of the population of the United States of America.

It is a city of 210,000 population with 110 miles of paved streets, 48 miles of which are asphalt, a city of newspapers, monuments, parks, fraternal organizations, comfortable homes and churches.

Indianapolis is the city of Harrison, Morton, Hendricks, MacDonald, Fairbanks, Beveridge. It knows how to make presidents and vice-presidents, but is not superior to friendly advice and counsel when offered by its guests and friends. The illustrious living may there be seen in the flesh; the illustrious dead may be seen in the form of monuments erected by loyal citizens who revere their memories.

There capital is respected but has no temples, there the people live in homes where fresh air is not delivered in pint cups, where children can every day feel the spring of Nature's green carpet, there moral and physician sanitation have due provisions—a city to which you will grow attached and to which you will come back.

To see the great Soldiers' and Sailors' Monument is alone worth a trip across the continent; to be whisked to its top from which vantage point a panorama fifty miles in extent can be viewed is worth more—a journey over wide seas.

We promise you an attractive entertainment at one of our beautiful parks. You will be handsomely entertained at some of our elegantly equipped club houses.

Those of you who are members of fraternal organizations, will receive a cordial welcome and glad hand from the brethren there.

You will no doubt have an opportunity to see and hear the world renowned Hoosier Poet J. W. R., who is a resident of our city.

We appreciate the importance of your convention and we want you with us. Charles A. Dana once said: "Just consider the clergyman. He preaches two or three times in a week and he has for his congregation two hundred, three hundred, five hundred, and if he is a popular orator in a great city he may have a thousand hearers; but the newspaper man is the stronger because thoroughout all the avenues of newspaper communication, how many does he preach to? A million, half a million, two hundred thousand people; and his preaching is not on Sunday alone but it is every day. He reiterates, he says it over and over, and finally the thing gets fixed in men's minds from the mere habit of seeing it and hearing it; and without criticising, without inquiring whether it is really so, the newspaper dictum gets established and is taken for gospel."

As a final proof of the genuineness of our desire to extend our experience as host by entertaining this organization, next year, I point with pride to the absence of statistics from our invitation. That doesn't mean we haven't figures to create the wildest enthusiasm but merely that we want you to ask for them.

Perhaps I am restrained by the fear that you may treat me as a too explicit clergyman of my acquaintance was treated. He was preaching in a Texas town and giving his flock the details of the classification of the prophets and he talked for an hour and a half about the prophets of the first class among whom he named Isaiah. Some of the members of the congregation were a bit restless at the end of the first class, but he was not discouraged and launched bravely into the prophets of the second class. In this class he placed Jonah and his fellows in a discussion of whose characteristics another hour and a half was soon consumed.

At the end of the three hours, the congregation was scraping its feet enmasse and as individuals but the preacher did not stop. He bravely took up the prophets of the third class and at the outset found difficulty in placing Malachai. Appealing to his hearers, he asked, "Where shall we place Malachi?" There was an instant's pause and then a desperate listener rose in the rear and replied, "Say, pardner, you can put M. in my place, for I'm a-goin.'"

In all sincerity the people of Indiana cordially and earnestly bid you come while there is yet time.

J. B. Whitehead representing the Indiana editors:

Mr. J. B. Whitehead of Indianapolis, said:

Mr. President, Ladies and Gentlemen of the National Editorial Association:

As one of the committee appointed by the Indianapolis Commercial Club to invite you to hold your annual meeting in Indianapolis, in June, 1906, I can assure you that our beautiful city will greet you with open arms, will entertain you royally and will be proud to have this intelligent body meet with us in our Hoosier Capital. The previous speakers have exhausted everything that can be said relative to our state and capital, all of which I heartily endorse.

I also have the honor to represent the Hoosier members of the Fourth Estate, the Publishers' Association and the Press Club of Indianapolis, also the several editorial associations of Indiana. The Indianapolis bodies extend a hearty greeting and will entertain you as can be done only by our profession. On behalf of the four editorial associations of Indiana—the Democratic, Republican, Northern and Southern—I have the honor to extend to you an invitation to visit our state and capital city. We promise you an earnest welcome and glorious entertainment. On their behalf and through the several Commercial and Citizens' Associations, you are invited to visit the following Hoosier cities: Fort Wayne, Crawfordsville, Martinsville, Logansport, Lafayette with its historical Tippecanoe battleground, and Muncie. The Hon. Thos. Taggart extends you an invitation to his famous hostelry, French Lick Springs Hotel, where we can assure you of an entertainment not to be equaled. The directors of the Winona Assembly send you a special invitation to spend one or more days at their beautiful resort on Winona Lake, Ind. When you have visited Indiana, the Indianapolis Commercial Club will transport you to the shores of Lake Erie. The Cedar Point Pleasure Co. will entertain you there one day. By boat to Put-in-Bay where one or more days can be spent, thence to Detroit by steamer. The D. & C. Navigation Co. and the D. & B. Steamboat Co. will carry your party in their magnificent steamers to Soo Ste. Marie, Mackinac Island or Buffalo, or both should you desire to take either of these beautiful outings by water—it were needless to

speak of the delights of a boat ride on the lakes to Soo Ste. Marie and beautiful Mackinac—you have all seen or heard of them. The Canadian Pacific Railroad has kindly agreed to haul you to Toronto, Ottawa, Montreal, historic Quebec and intermediate points of interest and return. This itinerary is one that cannot be equaled and we assure you the time of your lives. All arrangements are perfected and we herewith present the official credentials. If you accept, we will, as your executive committee will testify, make good. Come to Indiana, the grandest state in the Union, and you will be "As welcome as the flowers in May."

I thank you.

INVITATION OF THE INDIANA ALLIED EDITORIAL ASSOCIATON.

INDIANAPOLIS, IND., June 5, 1905.

Hon. W. W. Screws, President National Editorial Association, Guthrie, Oklahoma.

MR. PRESIDENT AND MEMBERS OF THE NATIONAL EDITORIAL ASSOCIATION:—The Indiana Allied Editorial Association joins with the Indianapolis Commercial Club and kindred bodies in extending an invitation to the National Editorial Association to hold its next meeting in Indianapolis in 1906. We assure you of a hearty welcome and handsome entertainment during your visit to the Hoosier state. We attach invitations from the following Indiana cities and resorts: Muncie, Lafayette, Fort Wayne, Crawfordsville, Martinsville, Logansport, Winona and French Lick Springs. Cedar Point, Ohio, Pleasure Resort Co., also extend invitation and entertainment for one day. The Indiana Allied Editorial Association has perfected the following itinerary to follow the visit to Indiana. Leave Indianapolis on special train for Sandusky, where a day will be spent at Cedar Point, by boat to Put-in-Bay, where one or more days may be spent. Thence to Detroit. From that city by Detroit & Cleveland Navigation Co.'s magnificent steamer to Mackinac Island, Soo St. Marie, etc., and return, or Detroit to Buffalo and return, or both; Detroit to Toronto, Ottawa, Montreal, Quebec and intermediate points of interest and return, over the Canadian Pacific Railroad. At all these points we have personal knowledge that you will be received in a royal manner. If you prefer to go direct by rail from Indianapolis to Detroit, satisfactory arrangements will be made, but we believe you will prefer the lake route. We believe this itinerary will please your members.

We again cordially invite you to partake of our Hoosier hospitality and assure you of a generous welcome and an all-'round good time.

Respectfully submitted, INDIANA ALLIED EDITORIAL ASS'N,
J. B. Whitehead, Chairman.

ARKANSAS.

Arkansas wishes to vote for Indianapolis and in view of the fact that there are no other applicants that it be made unanimous.

President: Gentlemen, it is moved and seconded that the call of the roll be suspended and that Indianapolis be selected by acclamation.

Charles G. Overton, Brooklyn *Journal*, New York: Mr. President, on behalf of the delegates from the state of New York we wish to extend to the association an invitation to visit Conev Island, to hold their meeting there. This was the purpose of the delegation when they came here but finding that Indianapolis has made such extensive preparation and have such a fine program the committee have decided to second the nomination for attending Indianapolis and to hold back our invitation for 1907.

The following telegram was read by the Secretary:

ASBURY PARK, N. J., June 8, 1905.

R. M. White, Care National Editorial Convention, Guthrie, O. T.

Asbury Park wants nineteen six meeting. We are better equipped than ever to welcome you. On account of recent serious illness, physician's order prevents me from making trip to Guthrie, to extend this invitation in person. We secured transportation for N. E. A. last year and will do so again, providing you name Asbury Park for your next meeting place.

F. L. TENBROECK,
2 p. m. Mayor.

The President: It is moved and seconded that the call of the roll be suspended and the gentleman moves that Indianapolis be named by acclamation.

The President: Carried. Indianapolis has been unanimously selected as the place for our next meeting.

The following named persons were named by the delegates of their respective associations and duly elected as members of the Executive Committee for the ensuing year:

EXECUTIVE COMMITTEE.

Alabama—Jacob Pepperman, *Southern Odd Fellow,* Montgomery.
Arkansas—Chas. M. Clark, *Standard,* Arkadelphia.
Southern California—J. P. Baumgarten, *Star,* Pasadena.
Colorado—C. E. Wood, *Telegraph,* Colorado.
Connecticut—G. C. Woodruff, *Enquirer,* Litchfield.
Florida—C. L. Bittinger, *Star,* Okalla.
Georgia—P. T. McCutcheon, *Banner,* Nenan.
Idaho—Chas. A. Hackney, *Eagle,* Meadows,
Illinois—E. A. Snively, Springfield.
Illinois, Democratic—Thos. Reese, *Register,* Springfield.
Illinois, Military Tract—Will Curtis, *Star,* Kewanee.
Illinois, Republican—W. L. Jones, *Journal,* Lebanon.
Inland Daily Press—A. W. Glessner, *Gazette,* Galena.
Illinois, Woman's—Rose L. Colby, *Star,* Chicago.
Indiana, Democratic—A. B. Crampton, *Citizens Times,* Delphi.
Indiana, Northern—Will E. Beeson, *Journal,* Winchester.
Indiana, Republican—W. H. Craig, *Ledger,* Noblesville.
Indiana, Southern—W. S. Chambers, *Democrat,* New Castle.
Iowa—W. F. Parrott, *Reporter,* Waterloo.
Iowa, Northeast—G. P. Linn, *Gazette,* Sumner.
Iowa, Upper Des Moines—C. D. Helen, *Journal,* Webster City.
Indian Territory—A. Z. Sterling, *Tribune,* Holdenville.
Kansas—S. W. McGarrah, *Nationalist,* Manhattan.
Kansas, North Central—W. L. Chambers, *Record,* Stockton.
Kansas, Seventh District—Gerald Volk, *Register,* Wichita.
Kentucky—Paul M. Moore.
Louisiana—Chas. E. Schwing, Plaquemine.
Maine—E. A. Merriman, *Bulletin,* Madison.
Maryland—F. G. Usilton, *News,* Chestertown.
Massachusetts—Louis E. Chandler, *Journal,* Palmer.
Missouri—W. R. Painter, *Democrat,* Carrolton.
Missouri, Northeast—John W. Jacks, *Standard,* Montgomery City.
Missouri, Southwest—J. G. Newbill, *Express,* Springfield.
Missouri, Northwest—Wes L. Robertson, Gallatin.
Nebraska—T. M. Johnson, *Register,* Chappell.
New York—H. J. Knapp, *Advertiser,* Auburn.
New England, Suburban—E. H. Pierce, *Journal,* Revere.
Michigan—Geo. T. Campbell, *Argus,* Owosso.
Minnesota—H. C. Hotaling, *Enterprise,* Mapleton.
Minnesota, Northwest—W. R. Hodges, *Herald,* Sleepy Eye.
Mississippi—J. H. Duke, Scooba.
North Carolina—J. J. Farriss, *Enterprise,* High Point.
Ohio—Associated Dailies—Wm. Miller, *Press Rep.,* Springfield.
Ohio, Buckeye—Benj. F. Gayman, *Times,* Canal Winchester.
Ohio, Editorial—C. B. McCoy, *Age,* Coshocton.
Ohio, Hocking & Ohio Valley—C. E. Bryan, *Democrat,* London.
Oklahoma—F. H. Greer, *State Capital,* Guthrie.
Oregon—Wm. J. Clarke, *Star,* Gervais.
Pennsylvania—R. H. Thomas, Jr., *Daily Journal,* Mechanicsburg.
Rhode Island—Frank N. Potter, *Herald,* Pascoag.
South Dakota—R. E. Dowdell, *Advocate,* Artesian.
Texas, Northwest—W. A. Johnson, *Herald,* Memphis.
Texas—W. J. Buie, *Enterprise,* Waxahachie.
Tennessee—E. C. Perry, Columbia.
Utah—I. E. Diehl, Robinson.
Washington—Wm. A. Steel, *Nome Daily News,* Seattle.
Wisconsin—H. E. Cole, *News,* Barraboo.
West Virginia—H. C. Sample, Fairmont.
Wyoming—J. F. Mills, *Post,* Sheridan.

Mr. White, at the request of Mr. Ashbrook, I move that a committee be appointed to consider, and to audit Mr. Ashbrook's accounts in connection with the itinerary. He asks me to make this motion, and I move that the committee be appointed. Motion seconded.

President: It is moved and seconded that a committee be appointed to audit Mr. Ashbrook's accounts in connection with the itinerary. Carried.

The president appointed Mr. Parrott of Iowa, Mr. Herbert of Chicago, and Mr. Glessner of Galena, Ill., as such committee.

The President: Election for your next president. Nominations are in order.

Roll call. "Ala."

Mr. Pepperman, Ex-Committeeman: Mr. President, Alabama yields to the Hon. Joseph A. McCable, Past President of this Association.

Mr. McCabe nominated Hon. John Dymond of New Orleans.

There being no other nominations, it was moved and seconded that the rules be suspended and that the Secretary cast the entire vote of the association for John Dymond for President. Motion carried by unanimous vote. The President instructed the Recording Secretary to cast the vote of this association for the president.

Secretary: The Secretary takes pleasure in casting 389 votes for Hon. John Dymond of New Orleans for next President.

Nominations for First Vice-President.

Alabama yielded to the State of Kansas.

John E. Junkin of the Sterling, Kansas, *Bulletin* was nominated; there being no other nominations.

Indiana seconded the nomination and moved that the roll call be suspended and that the Recording Secretary cast the vote of the entire association for the candidate from Kansas.

The motion carried and the Secretary cast the entire vote of the convention for J. E. Junkin of Kansas for First Vice-President.

Nominations for Second Vice-President. On the roll call Alabama yielded to North Carolina and Mr. W. C. Hammer

placed in nomination H. B. Varner of Lexington, N. C., for Second Vice-President.

Illinois seconded the nomination and moved that the rules be suspended and that the Secretary cast the entire vote of the association for H. B. Varner for Second Vice-President. Carried.

Vote was cast by the Recording Secretary and Mr. Varner declared elected.

Nomination of Corresponding Secretary.

Under the suspension of the rules, the Recording Secretary was instructed, by a unanimous vote, to cast the vote of the association for Mr. Wm. A. Ashbrook of Ohio, for Corresponding Secretary. The vote was cast accordingly and Mr. Ashbrook declared elected. Recording Secretary Mr. Brooks moved the suspension of the rules and that the President of this Association cast the vote of the entire association for Mr. J. W. Cockrum of Indiana for Recording Secretary. The vote was taken and declared unanimous and the vote cast in accordance to the instructions and Mr. Cockrum declared elected.

It was moved that the rules be suspended and that Mr. J. Irvin Steel of Pennsylvania be elected Treasurer of this association, and that the Recording Secretary cast the vote of this association for Mr. J. Irvin Steel of Pennsylvania for Treasurer. The motion carried unanimously and Mr. Steel was declared duly elected.

It was moved and carried that Prof. Benj. Hennessey be made a guest of the association for the remainder of the itinerary arranged.

The convention then arose and all joined in singing.

AMERICA (SUNG BY ALL THE ASSOCIATION).

1.

My country! 'tis of thee,
Sweet land of liberty,
Of thee I sing:
Land where my fathers died!
Land of the pilgrim's pride!
From every mountain side
Let freedom ring.

2.

My native country, thee,
Land of the noble, free,
Thy name I love:
I love thy rocks and rills,
Thy woods and templed hills;
My heart with rapture thrills
Like that above.

3.

Let music swell the breeze,
And ring from all the trees
Sweet freedom's song:
Let mortal tongues awake;
Let all that breathe partake;
Let rocks their silence break,
The sound prolong.

4.

Our fathers' God! to Thee,
Author of liberty,
To Thee we sing:
Long may our land be bright
With freedom's holy light;
Protect us by Thy might,
Great God our King!

President W. W. Screws then declared the Twentieth Annual Convention of the National Editorial Association adjourned.

KIND WORDS AND CRITICISMS.

CHICAGO, June 6, 1905.

Mr. B. B. Herbert, 1319 W. Ravenswood Park,
Care National Printer-Journalist, Chicago, Ill.

DEAR SIR:—I have just been reading your sermonette with the Indians as a text and Strikes and Frenzied Finance as object lessons. It ought to be published everywhere and everybody ought to read it. The greed of what sometimes seems to us the majority of the white race and its mad rush for dollars and its disregard of the rights of others is the most serious problem of modern times.

I do not know how we shall overcome this tendency unless it be to all become golfers and prosecute the business of golfing steadily, as when we play golf we cannot think of business. Yours very truly,

W. H. FRENCH.

MONTGOMERY, ALA., June 6, 1905.

Mr. B. B. Herbert, National Printer-Journalist,
Chicago, Ill.

MY DEAR MR. HERBERT:—I reached home safely yesterday evening. I think that we had a most successful meeting. I want to thank you for your great assistance to me from the time I was elected president until I laid down the gavel.

Yours truly,

W. W. SCREWS.

MILTON, WIS., June 13, 1905.

Printer-Journalist, Ravenswood Park,
Chicago, Ill.

GENTLEMEN:—"Fools rush in where angels fear to tread." A newspaper man above all others should know better than to butt in. Because I believe this is a message from Garcia I take the liberty to send it. I am a close reader of your excellent magazine and get much help from it. I believe I realize some of its possibilities and it is with the idea of possible improvement that I write. I realize that this suggests criticism of the magazine but I feel well enough acquainted with you to believe you know any publication can be improved. I am glad to state that the past year has brought improvement. The addresses presented before state associations on practical subjects are of great interest and value. Give us more of them. Your question box can become very helpful. Your regular departments are good, but I sometimes feel that they are overworked. The editors of those departments, like everybody else, are inclined to get into ruts.

There are numerous matters of practical value to newspaper men which you might exploit. Advertising rates, readyprints, the combination of publishers to purchase print paper, cost systems, card index systems for printers, hints on engraving, etc. To be sure, some of these subjects have been treated, but you give us doses of the same thing every month in your departments of criticism and review of job work.

You may have a reason for avoiding some of these. I have seen but little mention in the PRINTER-JOURNALIST of readyprints. It is a subject of much importance to publishers. My experience with readyprints has been varied and I can write a mighty interesting story.

I believe a department on gathering news and preparing it would be very helpful. Ninety of every 100 local writers know or practice but few of the rules in vogue in city offices and as a result write their news stories backward and cumber them with useless words. Fraternally,

WILL K. DAVIS.

We invite communications on the subjects named, and hope our correspondent will honor us with an article on "Ready Prints." Our "Question Box" can be made more useful but we must have the help of our readers through their sending in questions. Wake up, friends. The editors of our departments invite criticisms. They are faithful and their work so far has received only highest commendation.—ED.

Hutchinson *Bee:*—J. E. Junkin of the Sterling *Bulletin* has been elected vice-president of the National Editorial Association. The choice is a wise one. No one is more enthusiastic in working for the good of the newspaper men than J. E. Junkin. He knows how to get up the most enticing excursions of any man in the state. He is a gentlemanly man, a clean newspaper worker, and, by the way, the *Bulletin* is one of the neatest and most readable weekly papers published in Kansas That means a great deal, for the Kansas newspapers are acknowledged to be the best of any state in the union.

The Twelfth Annual Meeting of the Corn Belt Editorial Association of Iowa is to be held at Sheldon, Thursday and Friday, August 10th and 11th.

NEWSPAPER CRITICISMS

BY O. BYRON COPPER, DE SOTO, WIS.

Address all Communications for this Department to De Soto, Wis.

THE editor of this department has never felt it his calling to attempt to instill within the hearts of of his readers a spirit of anarchy, much less feeling it proper to pose as a calamity howler, nevertheless, we will here allude to a little matter of grievance for which our grand and glorious government is responsible, and which directly concerns every one of the millions of country newspaper men in the land.

Last month we wrote briefly of the evolution of the American farmer, hinting at his increasing prosperity, and how he was just beginning to enjoy many of the extravagant indulgences heretofore looked upon as only for city folk. Among the most radical of these luxuries of which the American farmer has begun to partake is printed stationary. Especially has he begun to develop a taste for, and appreciate the advantage and desirability of printed return cards on his envelope corners; and the government has taken steps to encourage this propensity in the patrons of its multifarious rural mail routes.

This would naturally indicate a veritable harvest for the country printer; but here Uncle Sam steps in and offers to furnish his free delivery patrons with printed, stamped envelopes at a figure which is actually less than that for which the country printer can secure them from his wholesale paper dealer. The *result* is a falling off in the rightful patronage of the country newspaper's jobbing department. The *truth* is that the United States is usurping the bread and butter of one of her most honorable classes of business men—the country printers.

Let the American press take up this "war cry," and continue to "whoop it up," until national measures are affected prohibiting Uncle Sam's public printer from entering into such unfair competition with his country-printer contemporaries.

With this instalment of "Newspaper Criticisms" we take pleasure in announcing our fourth ad-setting contest. Since every intelligent compositor is aware of the advantages and benefits derivable from these competitions, it is therefore hardly necessary for us to rehearse them here. The following rules will govern this contest:

1. Any reader of this journal is eligible to participate, using the following copy for a newspaper ad, 26 ems square, with no instruction as to display or design:

"Don't Miss our spring suit sale. We show you suit values that will be an eye-opener to you. They include fine Worsteds, Cassimers, Cheviots and Summer Flannels. All colors, any style. Prices: $5.50, $7.50, $9.00, $10.00, $12.50, $15.00 Tomkins Clothing Company, One Price Cash Clothiers."

II. Copy must not be changed or transposed.

III. Type, rules, type ornaments, and borders, only should be used.

IV. Competitors will be restricted to but three entries, each

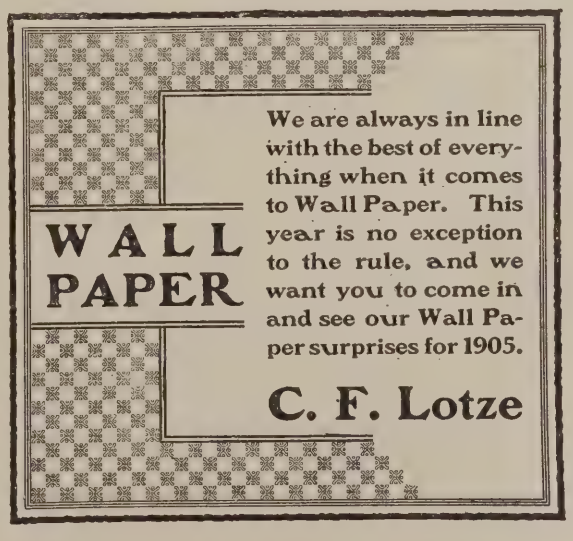
V. Two press proofs of each design must be mailed, flat, to O. Bryon Copper, Desoto, Wis., and should be labeled "Ad Contest."

VI. Contest opens with the date of this issue and closes, July 31, 1905. All entires must reach us on or before that date.

VII. Honorary positions are offered as prizes the compositor securing first position receiving a certificate of excellence from the office of publication so soon after the close of the contest as possible. Entries will be reproduced in the September instalment, as heretofore. Every printer is invited to take part.

Few country publications can show up in their columns a finer assortment of finely set ads, than does the Dakota

No. 1.



WALL PAPER
We are always in line with the best of everything when it comes to Wall Paper. This year is no exception to the rule, and we want you to come in and see our Wall Paper surprises for 1905.
C. F. Lotze

No. 2.

Republican, that grand big newspaper of Vermillion, S. Dak., of which we have previously spoken at length in these columns. In Nos. 1 and 2 we are showing two beautiful ad specimens from this paper, a study of which cannot fail to benefit any compositor.

Another unique newspaper ad is that which we clip from the Spalding, (Neb.,) *Enterprise* and show in reproduction

Spalding Enterprise

VOL. V. SPALDING, NEBRASKA, FRIDAY, APRIL 28, 1905 No. 19

LOCAL NEWS.

We do printing.

Call at this office for bills.

R. U. Richey ordered horse bills printed.

Miss Sleak has left her order for 50 calling cards.

Subscribe for the Enterprise.

J. E. Kavanaugh is editor of the Enterprise.

Miss Annie Body asked us to print her wedding invitations.

We can do the neatest and best job printing in Greeley county.

ADVERTISING PAYS.

The firm of Kavanaugh & O'Harra have sold considerable land in this county and almost every sale was the result of advertising in the Enterprise. An ad of any kind in this paper is sure to bring results and when you want to for the sale she did and the the Enterprise says the very same thing and is is true.

Stationery of all kinds at this office and printed neat and artistically. We will be pleased to do your work because we can satisfy you in

No. 3.

No. 3. It is a good imitation of the first page of a newspaper, and especial notice is called to the unique character of the "Local News."

The Semi-Weekly Arcata *Union,* published at Arcata California, is a newcomer to this department. While there are several features about the *Union* which we cannot consistently commend, yet it is quite a paper, after all. The sheet is produced entirely at home, and enjoys an excellent advertising patronage—so good, in fact, that the devotion of several columns of the first page has been thought necessary to accommodate the displayed matter. Throughout the *Union's* eight six-columned pages there is a healthy quantity and quality of news and editorials, all showing unmistakable evidence of careful editorial labors. The impression on this issue at hand is first rate but the makeup is rather unsystematic. Attention to that which has been said in this department from time to time in the past, in this connection, will, if refered to, prove highly beneficial. The character of this publication's displayed columns indicate that the typographical equipment is composed of an abundance of good serviceable material, and the ad-compositor, especially in the specimen shown (No. 4,) has demonstrated his ability to use it correctly and artistically.

J. A. SOMMERS,

—The Jeweler—

No. 5.

The Beresford (S. D.) *Republic* is another new publication which has found its way to our desk this month. It consists of eight six-column, home-printed pages inside a ready-printed six-column folio, and this edition was supplemented by an eight-sheet insert, printed on one side. The first of the locally printed pages is given over to a "Farm Department," having a special editor and dealing with the subjects of interest to the farmer, which is a feature worthy of imitation by other newspapers. The contents of the *Republic* are up to eminent standards, and the amount of its advertising is a good, big advertisement for Beresford, S. D. Page, half-page and quarter-page ad spaces are of frequent occurrence in this publication, and one ad which would never be over-looked is that announcing a piano contest instituted by one of the stores. "Who Is He?" In big type surrounded by a sixpoint bold rule and printed over an oblong tint block run in red occupies the upper half of the space, all of which makes a remarkably forceful advertisement. The composition of the ads generally is highly commendable as to design and display; however, the floral design concocted of rule and borders in the "Lundberg" ad, while a unique idea in itself, would be far more appropriate in the ad of a florist than that of a tailor. Editorial efforts and presswork are equally good.

We make a "timely" selection from the Hinsdale, Ills., *Doings,* again, represented in reproduction No.5. It is one of those suggestive pictures in type or typographical drawings, to which we have alluded before in these columns—a clock and an hour glass. "What's the use" of spending money on half-tones or etchings, when the office is blessed with such an artist as he is who produced this typographical illustration?

We have not been able to comment upon all of the many elaborate specimens of printed matter with which the American Type Founders Company has favored us during the past several months, but we have greatly appreciated them, as all other printers must have, who have in a like manner been highly favored. The latest surprises are the "Cloister" calandar, which now graces the wall of our sanctum, and "The Golden Book of Business," which contains innumerable new ideas and designs for every day print-shop work, and which is certainly "of great value to printers" for reference as a style book.

The Weekly News, of Lenoir, N. C., quotes under the title of "Compliment From High Source," the criticism given it in a late edition of the NATIONAL PRINTER-JOURNALIST, as does also the Dakota *Republican* of Vermillion, S. D. This is right and proper, and provided the criticism is favorable makes good advertising for the publication. And if the criticism be adverse, then the publisher should set about it and bring the lame features of his paper up to such standards that he may not be ashamed to give to his readers any critical comment of experts.

It was in our May instalment that we mentioned having in abeyance a copy of *The Missionary Enterprise* for review, which was given in the June number. During the interim, however, we received the following interesting letter from the *Enterprise's* young editor and publisher.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Thanks for the copy of the NATIONAL PRINTER-JOURNALIST, you sent me. I was very much interested in it, and was surprised to find the name of my paper among those to be criticised in your department next month—I really did not think the typographical work on it was worthy of notice. But, nevertheless, I should be very much pleased to have you pass a few comments upon it, and enclose a copy of the last issue (which may be a little more neatly executed than the copy you have) and a new heading for one of the departments of the *Enterprise* that I set up a few hours ago. I have a 7x11 Gordon foot-power press and an assortment of type, mostly new faces. I am now 15 years old and have had my outfit a little over a year. I have never had any experience in the printing line except that obtained in my own office. Any suggestions on the paper, on the enclosed department head, or on the above letter-head will be very much appreciated.

Yours truly, REX STROM.

ANNA, ILLS., May 9, 1905.

In the view of the above explanations, Master Strom as a printer is well-nigh a prodigy. His work in neatness and beauty transcends that of many journeymen which we have seen. The fact is, it would take a far more fastidious critic than we to find any pronounced defect in the work typographically upon his little magizine. Only one little suggestion would we offer at this time anent the magizine and that is to omit the periods in the displayed headlines. The publication would be improved if bound in some regular cover paper rather than the colored print. This can now be secured at a very low cost, and we would advise Master Strom to write

any one of the paper houses advertised in this journal for samples and prices on cover papers. The letter head is not bad, either, but might be improved by omitting the periods after "year" and "Enterprise," taking out the underscore following the main line and raising the main portion of the job from eigtheen to twenty-four points nearer the top.

BIBLE DEPARTMENT.
By M. B. Van Kirk, Eagle Lake, Minn.

No. 6.

Possibly then it would also be found desirable to transpose the line, "Published in the interest of home mission work," to a position one nonpareil below, "R. Rex Strom, Editor and Publisher." The envelope can be materially improved by closing up the two words in the last line with only a comma and a nut quad intervening. The "new department heading" as shown in reproduction No. 6 is quite defective, inasmuch as that the space intervening between the two rules forming the panel, at ends should have been equidistant with that between the rules at the sides. The three central rules should have been extended out at both ends and conjoined with the vertical rules of the panel. The period in the main line should be omitted, since punctuation in display is no longer proper, except in cases where its retention is necessary to maintain sense. This main line could be letter spaced to good advantage, and in either case double the space should be allowed between the two words. We hope our professional patrons may not condemn us for having written at such length to an amateur; for it must be borne in mind that the boys of today are the men of tomorrow, and that amateurs have more troubles than do professionals, hence are more in need of counsel.

If Leon E. Derr, foreman of the Anna, Ills., *Democrat*, could write his name as plainly and as neatly as he can "stick up ads," he would be all right, and we would never have been guilty of the mistaken pun which we tried to spring in our last month's instalment. That signature of his is a Japanese puzzle, or as applied to names, at present wouldn't it be more proper to say, "Russian puzzle?" Since our contributor writes upon office stationary, rather than upon printed paper of his own, we are even yet hardly positive as to whether the first letter in his surname is a "D" or a "W" Guess it's a "D," however. This is the latest from Mr. Derr, accompanying specimen No.7:

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Received the N. P.-J. today, containing your valuable criticism on my ads. I have sent you some of my other work, but have not heard from it yet, so presume it found the waste basket.

My most conspicuous fault seems to be bad spacing—that is, to me. It is hard to find people in this section of the country who really appreciate an ad that has been studied out and set "right;" and the majority of printers do not care as long as they please the advertiser.

The only borders I used in ads are Linotype borders and I have discarded these and gotten plain brass rule. Do you think that this was the right thing to do?

The paper is twenty years ahead of the town now; but the proprietor wants to have "the best country weekly in Illinois," and is willing to get anything necessary to push it up a notch.

When you consider the fact that myself and two girls and press-feeder do all the work on a seven-column quarto, all home-print, and use no plate, in connection with job work, you see that a fellow has to sacrifice quality for quantity very often. I am very much interested in your department and hope to send you better work from time to time.

Yours very truly, LEON E. DERR,
Foreman.
IOLA KANSAS, May 20, 1905.

It is a wise man who is a anxious to discern his faults. We had not noticed, however, that bad spacing was conspicuous in Foreman Derr's work. Anna, Ills., is not the only place on earth where the average person is indifferent to good ad composition; yet we believe there is always enough who do appreciate a good job, to make the effort to produce good work worth the while. And, of course, the pleasing of the patron should always be the primary object of every compositor. As touching upon the question of borders, good borders help to make good ads, we believe; but according to our own personal taste there are few foundry borders, if any, that excel plain brass rule, especially in newspaper advertisement composition. To be "twenty years ahead" of its town is far better than for a paper to be twenty years behind its town, yet it is best where town and paper make an even race. The *Democrat's* proprietor, according to Mr. Derr's words in the foregoing letter has the right spirit, whatever the comparative conditions of the town may be, and the description of conditions in the *Democrat* office are not dissmilar to that of the average newspaper office. Where there is a desire to progress and better the product, few newspaper plants employ such great forces that any of the hands have much time to idle away. The truth is that any worker in a print-shop, who is loafing, is neglecting a thousand and one little duties that ought to be

attended to. We are pleased to learn that Mr. Derr has found this journal of benefit to him in his daily labors, and also that he has decided to continue as a regular contributor to this department. He need not fear as to the fate of anything which he may submit, for in a department of this kind nothing is ever "waste-basketed," because no contribution can be so good that the critic cannot exercise his "most important characteristic," which, according to Mabie, "is the ability to admire greatly;" and nothing can be so bad that the critic cannot exercise another one of his most important characteristics, which, according to our own opinion, is the ability to appreciate the defects and point out a better way. This latest contribution from Mr. Derr (No. 7) is a plain, neat black and white specimen; but it is hardly an ad in which we could say a correct distribution of white space has been effected; especially is this fault conspicuous in the right hand panel. The matter in this should have been set in a narrower measure, which would have provided the much needed white margins at the sides; and some more marginal relief of white around the signature would have been commendable. The period after "Store" rather spoils matters here, and the periods after the prices are superfluous.

Unfortunately three pages of "Newspaper Criticisms" and seven pages of "More Work Through Publicity" have been crowded out until our August issue, but full amends will be made then for any deficiencies. The N. E. A. meets only once a year. The papers presented at Guthrie are able and important and the reading of the same will be profitable employment for July.

MORE WORK THROUGH PUBLICITY

BY HARRY A. WOODWORTH

Address all Communications for this Department to
349 Jarvis Street, Toronto, Canada

IT IS A RULE with the author breed that the preface of a book should always be written last. As a member of the reader tribe—especially when, among other things, I read novels for a living—I have often read the last of a book first. It's a case of the first being last and the last first. This preface is written last—after I find that the Space Limit on this monthly production is exhausted and the Time Limit is about to expire. A preface is either an apology or a blast of hot air. Like Brother FitzGerald, I don't believe in hot air in N. P.-J. departments. This is an apology.

I had no idea, as I took my samples from a huge pile which was sorted as to probable paragraphs, that I had nearly so many. But the fact is, that in all my five years of service on this journal, I never had so many specimens calling for attention as I have this month. They are from contributors old and new. I don't know which to be most pleased at—the faithfulness of old contributors, with their continued working interest in a department which they have made interesting, or the acquisition of such a surprising number of new contributors of late—so many of them new contributors with new ideas, and all of them anxious to know something about advertising, and to help others to learn what they already know.

And this is what used to be known as the approach of "the dull season" in business! The time when it was "no use to advertise!"

If you spend all seasons in advertising, and in the preparation of advertising, there need be no dull season—for you, anyway.

Just here I might say that if you have been accustomed to do a job annually in the rush days, ask the man who gives it, if he cannot let you have it in the duller period. In cases where this is practicable, it is better for the customer and better for *you,* be you employers or employed.

Perhaps I have neglected some contributors this month who had more right to be heard from than others whose work I've reviewed. Perhaps I've been too voluminous; but it is hard not to be when you wish to do absolute justice to a job. Of course, had I known that I should have missed some folks whom I really ought to have mentioned this time, I should have cut out some flowers of rhetoric, which, after all, may be only weeds. Those who have sent in matter for review five years ago or less and haven't heard from me yet will kindly pardon me—such sins of omission, if they have happened, were unintentional. My work on this department is often necessarily very hastily prepared. And it often shows it. But I'm proud of *your* work on it; and I hope we'll always continue brothers and friends.

The Fresno (Cal.) *Evening Democrat's* follow-up cards still come to hand with regularity. They are better than some follow-up cards, as they each have something to say about some feature of the *Democrat's* advertising, and are not riddles to perplex the busy man.

This is from one of the series of "Imitations of Popular Authors" issued by P. C. Darrow, Chicago, entitled "William Tonsor, the Barber. Not by Biff Hall."

"No wonder printers drink so much," remarked the barber, coming out of his trance, "considering the men they work for. Clancy was telling me of an old boss of his that used to come snooping around the pressroom any old time. One day he saw a press running a particularly bright red ink. 'What kind of red ink is that?' the boss asked Clancy. 'That's a five dollar red,' said Clancy, straightening up, for he is a proud lad.

'Merciful heavens,' yelled the main squeeze; 'stop the press! Where did you get it? Who's been buying five dollar ink in this shop?' 'I mixed it up myself," said Clancy, 'from a pound of two dollar red and a pound of three dollar red.' And the boss never thanked him!" continued the barber.

This kind of advertising would be appreciated by Friend L' Heureux, of Vermont. The last page of this "imitation" contains the following:

Imitation is the sincerest form of flattery. Don't flatter your competitors by imitating their printed matter.

A "Talk on Padding," a handsome orange-and-black folder from the Arabol Mfg. Co., 100 William St., New York, is not padded.

I spoke last month of "a wealth of blue" in connection with the Rice Press blotter. But the reproduction did not give an accurate inventory of this wealth. The actual dimensions of the blotter were 4x9½ inches. And the sloping panel was 2⅛x4⅜ inches. All of which made the blotter more of a novelty than was represented.

The Inland Type Foundry announce, by means of a facsimile wedding invitation, the new Inland French Script—a reproduction of a letter made famous by Tiffany, and therefore one that has received the endorsement of the ever-multiplying 400 of New York City.

The Guthrie (Okla.) *Daily Leader* certainly believes in using its columns for the advertising of both itself and its printshop. In the latest issue they have sent me, there are about 2,500 agate lines of display advertising exploiting these. Then there are catchy little sentences on either side of the heading, the usual announcement at the top of the editorial columns, and such a sentence as this at the beginning of its Classified Advertisements: "Once in a while a want ad finds its task too hard to accomplish in one day, so that sometimes two or six advertisements are better than one." The two-column ad concerning "The *Leader* plant" is of pleasing design, and of modern type. The panel it encloses, however, is a surprising jumble of two fonts of type—one of which must surely be "wf." Clearly this is a very great defect in an otherwise harmonious advertisement.

From one of many new contributors, Elmer W. Burrows, Harrington, Wash., comes a bunch of work which is, for the most part, very good indeed for a shop which is described as "just an ordinary country affair in a town of 800." The panelled jobs are particularly well composed. One is a slip which cannot be reproduced by means of a zinc etching, and which is meant to accompany "Printing from the Press of The Harrington *Citizen*, Harrington, Washington, Doers of Fine Commercial Printing in the Latest Correct Styles." In this wording every word tells. The job would have been improved, considering its wealth of white, if the spaces between the panels containing the ornaments and the large panel had been reduced to half of that on the outside of the scheme. In another panelled job the space between the three inch panels is twice that on the outside. The effect is good, because an ornamental tint-block, in a very light tint, relieves any impression of bareness. This particular green is in good harmony with the purple of the text, and likewise with the stock, but the heavy tint on the statement blank reminds me of the tint that is induced by an over-abundance of booze on a face naturally florid. I have never been a great admirer of those vision-of-judgment background tints, but these are about as well handled as it is possible to do with them. As to the letterhead where the sun is partially obscured by clouds, of which Mr. Burrows writes, "The above job is not mine, but 'the boss's,'" I must certainly congratulate "the boss" on his curved line "The Harrington Citizen" across the sun's rays, and also on the way the supplementary text is distributed so as to brighten the clouds. And yet I wish printers would finally decide to "push them clouds away."

Now, Mr. Burrows, I'd like to see some printing-advertising from you in the blotter line, or the booklet line, or the slip line, containing some such pure publicity as I am sure, from your letter and your workmanship, that you can furnish. You may not have any "competition;" but the people of Harrington may not yet appreciate what advertising, by means of the *Citizen* and its job office, can do for them. Tell them, Friend Burrows!

❧ ❧

Harry A. Woodworth, Toronto, Canada.

DEAR SIR:—I am sending you a Commencement Invitation, also another *Courier* cover, for criticism.

I thank you very much for last month's criticism, and assure you a regular and pleased contributor. Please criticise thoroughly.

Yours respectfully, ALEXANDER CROSSAN.

Sterling, Kansas.

The Commencement invitation will be reserved for that article on "that sort of thing" which I have promised. All I have to say about it now is this: You shouldn't use a long "s" at the end of a word, as you have done in the word "Graduates." In all my study of ancient composition, I fail to find any authority for such a procedure. In the language of the ancient Greeks, for instance, there are two styles of "s's." One looks like a grain of corn just beginning to sprout—and this "s" is never, on any occasion, used at the end of a word. The "s" that was reserved for this position is a good deal like our own, with the exception that its narrower portion is below instead of above. The long "s" has been introduced into modern old-style by all modern type-founders, but their intention was that it should never be used at the end of a word; for it was never used in this way by the printers of a century or so agone.

Mr. Crossan uses a letterhead this time which is like that indicated in the May number by the symbols 12a and 12b, with the exception that in place of the Mission Toy Files-on-Parade, and the name of the foreman, there is the scribe, forninst the words, "J. E. Junkin, Editor and Proprietor."

❧ ❧

An exceedingly neat blotter is that of the Jenkins & George Company, Chicago. It is enclosed in an envelope which is just as neat. And neatness is a much appreciated quality. But one can find room on a blotter for a taking little talk—one that will help to bring the business—and still be neat.

❧ ❧

This extract from *Light*, the clever house-organ of Gorham, Stevens and Dunham, Bridgeport, Conn., should prove a mightily suggestive piece of advertising to readers of this department. It is a kind of advertising that interests a prospective customer—that excites his business curiosity:

PROFITS FROM UNEMPLOYED CAPITAL.

Have you names on your books or in your files of firms or individuals who have been customers of yours in the past, but who for some reason or other have dropped out of sight? Have you other names of people who buy a little but not as often as you would like?

A "dead" account is never very attractive to a salesman—and the man whose orders are small receives scant attention as a rule—from the boys on the road.

But you ought to have the business that is to be represented by these names. What do you do to get it?

Did you stop to realize that every one of these "dead" accounts represents a definite investment—it represents unemployed capital—why not make it work to your profit?

Such names form the basis of a most effective mail series—they are advertising material of the finest quality—they represent prospects upon which the first impression has already been made—and—properly worked with the right kind of advertising such a list can be made to yield a splendid profit.

Have you such a list—or can you procure one from the musty, cobwebbed records of past transactions that adorn the top shelves of your storage vaults? If you can, write us about it, tell us something about the character of the names on it and how many there are of them, and we'll make you a proposition for turning this unemployed capital into a profitable investment.

How does the proposition strike you? There's money in it.

Might as well realize on your investment if you can, hadn't you?

Now some house-organs that come to this unhallowed sanctum consist very largely of general miscellany, more or less interesting—the idea seeming to be to sugar-coat the pill of publicity. But *Light* is *all* business; and although I admire the other house-organs issued by printers, I think I like *Light* best of all. For it recognizes this principle of publicity: There is nothing that so much interests a business man as telling him how he may increase his business. There is no hackneyed advertising prosiness in *Light*. It doesn't say anything without having something to say. Take the above quotation, for instance—is it not interesting to those whom it is the mission of *Light* to interest? Is it not something that a business man can read in business hours without feeling that he is momentarily neglecting his business? And is it not likely to bring business to the proprietors of *Light?*

❧ ❧

Some of the paper men know how to advertise. Take what the Old Hampshire Bond folks are doing, for instance—helping the printers by their publicity, and getting the printers to help them. And the J. W. Butler Paper Company, with their trade paper ads which are fully as beautiful as the best of those appearing in the magazines—and are, moreover, practical. Here's a folder from this concern, telling of Sheepskin Parchment—and showing it, together with its use in connection with a machine-ruled train register. "This is not a new brand of paper," they begin, "but * * * ." Now that's right in line with recent remarks I have made as to not advertising *new* products exclusively. "I'll keep kick, kick, kicking away to the *n*th time," said Tod, the persistent student in "Sentimental Tommy," when a comrade jeered at his "fourth try" for matriculation. "Which means till the door flies open," said the dogged little woman—the gallant Tod's no less gallant wife. And you can't advertise goods most successfully unless you keep "kicking away to the *n*th time," for "the period of diminishing returns" in the ad-advertising of good things is very seldom reached "by a single bound." (Continued in August issue.)

BUSINESS NOTES

This Department is conducted for the benefit of advertisers, and expresses their claims and views

In fully four-fifths of the print-shops and binderies throughout this country can be found one or more machines bearing the Sanborn name-plate, each machine a mute witness of the enduring quality of the machinery manufactured for many years by George H. Sanborn & Sons, at Mystic, Conn.

Three years ago the Standard Machinery Co., successor to the old Sanborn concern, took on a new lease of life. Mr. Charles E. Wheeler, a well-known successful salesman of printers' and bookbinders' machinery in New York and the East, became interested in the Mystic factory, and took the general managership of the reorganized company. Ever since the plant at Mystic has been undergoing enlargement and improvement, new buildings replacing old ones, and new and improved machinery replacing the old machinery, until today there is not a plant in the country manufacturing paper cutters and bindery machinery that is so completely up-to-date and equipped as the Mystic factory of this company.

By hard work, Mr. Wheeler has brought the old concern to the front again. The old line of Sanborn cutters, embossing presses and binders' machinery has been brought up to the minute, and the high standard which made Sanborn machinery famous the world over for more than half a century is manitained in the new and improved machines now going out. The Improved Keystone cutter, the ideal machine for the small printer, is proving its qualities in many print-shops; the Gem lever cutter, the original Gem, by the way, is finding ready sale wherever a high-grade lever machine at a low price is appreciated; and the Keystone Automatic-Clamp Cutter has already proved itself the automatic cutter without a single objection. The new line of heavy embossers Mr. Wheeler has brought out is meeting with an enthusiastic reception among binders, leather grainers, wall-paper manufacturers and in other lines where these machines are used.

The Standard Machinery Co. buys all its materials at first hands, pays cash for everything, and with modern machinery and methods and the best mechanics, is enabled to turn out this high-grade of machinery at the lowest possible price.

New York, June 22, 1905.

National Printer-Journalist, 1319 *W. Ravenswood Park.*

On June 18 the public printer ordered seventy-two additional monotypes for use in the government printing office at Washington. As soon as the new machines are installed there will be one hundred monotypes at work there as twenty-eight have been running for about a year. This order for monotypes is the largest typesetting machine order ever given.

Wood & Nathan Co.

The Waukonda, S. D., *Monitor* has been sold by the Chas. M. Palmer Company to Guy A. Farrington. Mr. G. W. Fitch was the former owner.

AMERICAN TYPE FOUNDERS CO. IN DETROIT.

For the convenience of customers in Detroit and Eastern Michigan, the American Type Founders Company on May 16 opened in the Murphy Power Building, 39-45 West Congress Street, a fully equipped type and printers' supply house. Mr. F. H. McClure, who has for years been the American representative in Detroit has charge of the new Selling House.

This places at the disposal of printers in Detroit and Eastern Michigan the entire facilities of the American Type Founders Company—the largest manufacturer of type in the world and the largest merchant in printers' machinery and printers' supplies. Detroit is one of the important printing centers of the country and the convenience of this new Detroit House will therefore be cordially appreciated.

This company is certainly living up to its claim to be "the leaders in type fashions" and during the past twelve months has brought out twenty or more new type faces to say nothing of the additional decorative material. The popular "American Line" now means something like sixteen hundred fonts cast on the lining system.

The attractive specimen books and the notable pamphlets and type showings issued of late keeps the American Type Founders Company in the front ranks. And now of all the resources and facilities of the company are at the disposal of Michigan printers and they are certain of prompt and courteous service through the Detroit House.

CHELTENHAM BOLD ITALIC.

Cheltenham Bold Italic is a type face which will commend itself to every newspaper man not only for use in his advertising columns but also for display headings. It is an italic face, but with very little slope and being cast from deep cut matrices the kerning letters are made extra strong with little overhang. The American Type Founders Company has been quick to appreciate the possibilities of the Cheltenham design and this latest addition will prove one of the most popular for this notable Cheltenham family. Specimens of the Cheltenham Bold Italic are shown in this number from 6 to 72 point sizes.

CHALLENGE SIDE FRAME PROTECTOR.

All users of paper cutters are well aware that one of the greatest dangers of breakage is from the paper shavings wedging in between the knife and the side frame.

Up to this time no device was perfected that would prevent this trouble. The Challenge Machinery Co. of Grand Haven, Mich. are offering their new attachment to power cutters which they call the Challenge Side Frame Protector. This absolutely prevents anything of this kind and is one of the real valuable new devices that have come out during the last few years. We advise our readers to write to them and they will send full particulars showing this attachment which is found only on their Challenge and Advance Cutters.

"THE GREEN BOOK OF SPRING."

A companion—so to speak—of the "Golden Book of Business" and the "Printer Man's Joy," which have heretofore been sent out.

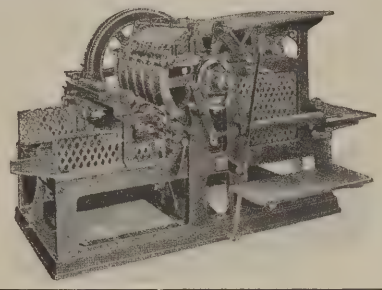
As one will note, the examples illustrated in "The Green Book of Spring" tend rather to simple forms of type arrangement than to the more decorative showings, as contained in its predecessors. Still, it is hoped and believed, from the very fact of the treatment being of a simple nature, that its contents may be equally as acceptable and attractive to all, because it deals with such forms of commercial printing as every office is called upon to produce daily.

REAL NOVELTY.

We never remember seeing so extensive a line of really unique labor-saving machines and appliances as is included in the advertisement of the United Printing Machinery Co. on page 457. This company has shown us some other inventions it will place on the market which will still further sustain its reputation for offering a twentieth century line of machinery.

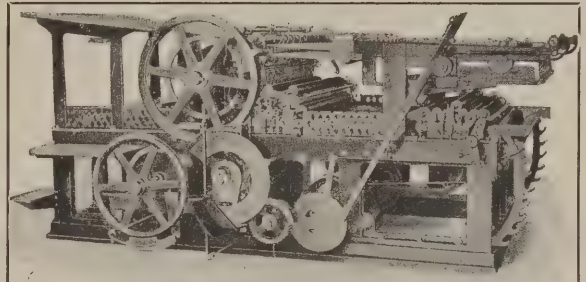
Scott Printing Presses

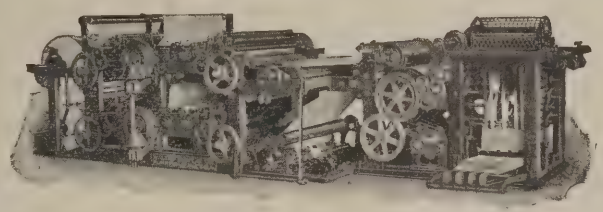
For All Kinds of Work



THE SCOTT Job Cylinder Press is the fastest drum cylinder flat bed press on the market. It is equipped with the new bed motion that has made our two-revolutions famous. It will print anything from tissue paper to cardboard at a speed up to **Thirty-six Hundred per Hour.**

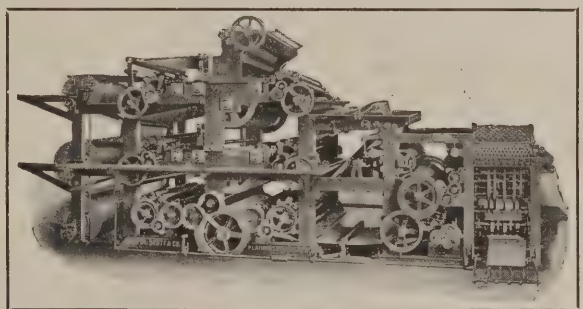
THE SCOTT Two-Revolution Press with the new bed motion has no intermediate gearing between the bed and cylinder and is an easy running machine. The machines are built with two or four form rollers, rear, front fly or printed side up deliveries as desired.





THE SCOTT Two Tiered Printing and Folding Machine. This machine will produce 4, 6 or 8, 10, 12 or 16 pages all inserted, pasted and folded to half page size at a speed of 13000 per hour.

THE SCOTT Three Tiered Straight Run Printing and Folding Machine. This machine will produce 4, 6, 8, 10 or 12 page papers at a speed of 26,000 per hour. It will also work 16, 20 or 24 pages and it is the only three tiered press two pages wide that will print a 14 or 18 page paper and deliver the different number of pages all inserted and folded at a speed of 13,000 per hour.



¶ All machines shown here and many others are illustrated and described fully in our catalogue which we will cheerfully send on request. Write to-day to nearest office for same.

Wants and For Sale.

Advertisements will be inserted in this column at the rate of 25 cents a line, ten words to the line. Copy must reach this office no later than the 20th of the month preceding date of publication. Cash must accompany order.

HELP WANTED.

MANAGER—For Southern office with local and class publications, and a good job business. Splendid opportunity for man of energy, experience and ability; must be able to invest $5,000 to $10,000. Address, "South", care National Printer-Journalist.

FOR SALE—PRINTING MATERIAL

FOR SALE—The following fonts of 2-letter Linotype Matrices: Two fonts 6-point No. 2 with Gothic No. 3; three fonts 9-point Devinne series with Antique No. 3. The above matrices are complete and practically as good as new. Will sell at $40 per font. GENEVA PRINTING COMPANY, Geneva, N. Y.

FOR SALE—Daily and job office; best proposition in Southern California. Will require $20,000 cash or good paper to handle; will not sell on time. Address, "Opportunity", care National Printer-Journalist.

FOR SALE—$1700 buys newspaper and job office in Western Washington. County seat town. Population 1200. Official county paper. Power presses, material nearly new. Invoices $2057. A snap for somebody. Between $500 and $600 in good accounts goes with it. Owner needs money in other business. Address, Tribune, Shelton, Wash.

ELECTRO COPPER-FACED TYPE. Empire Type Foundry, Delevan, N. Y.

MISCELLANEOUS

A COLD SIMPLEX STEREOTYPING OUTFIT, $17.00 and up, produces the finest book and job plates, and your type is not in danger of being ruined by heat. Simpler, better, quicker, safer, easier on the type and costs no more than papier-mache. Also two engraving methods costing only $5.00, with materials, by which engraved plates are cast in stereo metal from drawings, made on cardboard. "Ready-to-use" cold matrix sheets, $1.00. Come and see me if you can; if not, send postage for literature and samples. HENRY KAHRS, 240 East Thirty-third Street, New York.

THE VAN BIBBER ROLLER CO., Sixth and Vine Sts., Cincinnati, will give you *the best rollers* that can be made for any season or press. Our facilities are the best, and we use the latest Gatling Gun and compressed air apparatus. It pays you to have good rollers, and they count more in presswork than anything else. In writing or shipping, "Cincinnati" is sufficient. Everybody knows us.

SOUTHWESTERN WEEKLY

without competition in field reaching forty miles every direction. Equipped with five presses. Gets all county patronage as it is only paper in county. Being Independent receives both Democratic and Republican patronage. 1904 returns to owner for time and investment were $2816.85. Will be sold for $3000.00; ⅔ cash, balance deferred. Healthy location at high altitude. Proposition No. 90.

The Cottrell High Speed Two Revolution Press

Specially designed for the exacting demands of three-color printing where perfect register is absolutely necessary. New features have been added for facilitating the production of the finest work.

The press is furnished with our Patent Convertible Sheet Delivery which can be set to deliver the sheets printed side up, or it can be changed to the regular fly delivery in five minutes time. The convertible delivery is operated by a variable speed crank motion which dispenses with the fly spring, thus saving the power required to compress the spring, at the same time making the motion more simple and convenient.

THE WETTER NUMBERING MACHINE CO., 331-341 Classon Ave., BROOKLYN-NEW YORK, U. S. A.

Cable Address: "WETTER-BROOKLYN." Code used, ABC, Fifth edition.

Inkoleum is a pure colorless liquid and does not affect working properties of inks like paste compounds introducing foreign matter, wax, tallow, etc., which lessens strength of color. **Inkoleum** spreads pigment evenly and gives best results. Try it and note the difference.

Ink Reducer and Dryer

INKOLEUM

THE OLDEST AND STILL THE BEST

PRICE 50 CENTS. NO SAMPLES.

Use Inks of heavy body and reduce with **Inkoleum** as paper requires. Thin inks are reduced with varnish and color weakened. **Inkoleum** will start your presses cold mornings without washup. The only reducer **sold by supply houses** everywhere. That tell's the story.

¶ Absolute register and perfect distribution can be assured upon a Hoe Stop Cylinder Press. There are some jobs that require double rolling upon a 4 roller two revolution that can be satisfactorily run upon a six roller Hoe Stop.

¶ In a battery of four or more modern presses doing fine printing, a Hoe Stop will more than hold its own as a profit bearing proposition. High grade work cannot be fed to register beyond the capacity of a Hoe Stop.

¶ This press has six form rollers with vibrators and riders, table and cylinder distribution, roller trip, tapeless delivery, four tracks, is thoroughly built from base to feed boards. Will be erected upon your floor at our expense upon sixty days trial for $1500 (cost new $4500) with the understanding that it is to fulfill our guarantee in every particular.

EXTRA DISCOUNT TO PRINTERS

Commencing June 1st, 1905, **the following extra discounts are allowed to printers on goods of our manufacture:**

On orders of WOOD GOODS (other than Wood Type) amounting to $50.00 and less than $100.00 net, and given for shipment at one time by one purchaser, the discount will be *5 per cent.* in addition to *the present* discount.

On orders of $100.00 and less than $250.00 net, under similar conditions, the discount will be *10 per cent. additional.*

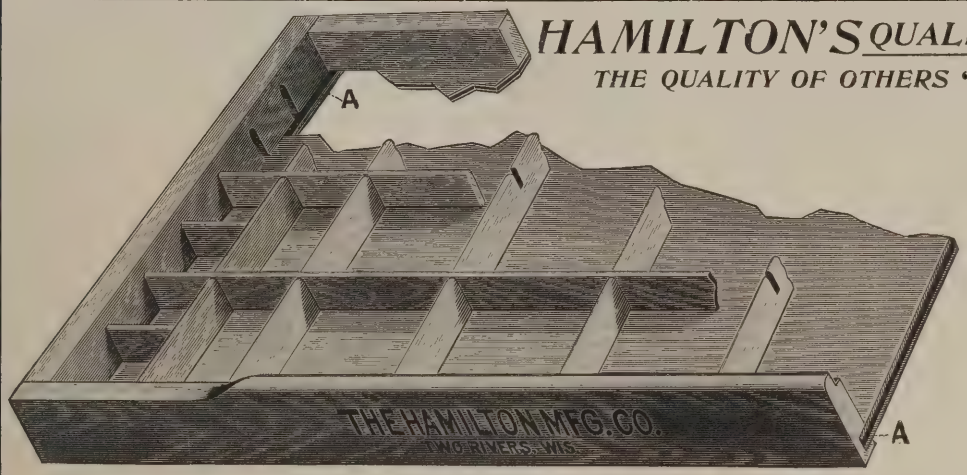
On	$ 250 00	and less than $ 500.00,	12½ per cent
On	500.00	and less than 750.00,	15 per cent
On	750.00	and less than 1000.00,	17½ per cent
On	1000.00	and over - -	20 per cent

The amounts given are net amounts after deducting *the present* regular discounts, but not after deducting the 2 per cent for cash—

Thus: If a customer orders $200.00 at list prices on which the regular discount is 10 per cent., the price to the customer will be figured as follows:

List Price - - -	$200.00
10 Per Cent Discount -	20.00
	180.00
10 Per Cent Extra -	18.00
	162.00
Less 2 Per Cent for Cash.	

THE HAMILTON MFG. CO., TWO RIVERS, WIS.



HAMILTON'S QUALITY IS THE BEST

THE QUALITY OF OTHERS "IS DIFFERENT"

AN IMITATION IS ALWAYS AN INFERIOR ARTICLE

All our Cases have 3-ply bottoms covered with the best quality of Manila paper. This is a most important feature in Type-Case construction. THE PAPER ABSORBS THE MOISTURE FROM THE TYPE AND PREVENTS IT ENTERING THE WOOD, DISSOLVING THE GLUE AND DESTROYING THE CASE BOTTOM. It also makes a clean, smooth bottom in the type compartments and prevents the possibility of slivers injuring the compositor's fingers.

It costs us thousands of dollars every year to put on this paper, but our experience of twenty-five years has shown that it is required. No printer who understands his business thoroughly will think of using any other kind of a Case.

Our 3-ply Case bottoms are as good as can be produced. More than one million "New Departure" Cases are now in use. NOT A SINGLE COMPLAINT. Every printer who reads this has our cases in use or knows where to find them. Look at the under side of the 3-ply bottom, which is not covered with paper, for defects in the wood, YOU WON'T FIND ANY DEFECTS.

We are the exclusive manufacturers of "New Departure" Cases with paper covered 3-ply bottoms, and this Case is patented. THAT'S WHY OTHERS DO NOT COVER THEIR CASE BOTTOMS WITH PAPER. They are banking on the printer's ignorance of his business when they say the paper is not required, and they are furnishing an inferior article without lowering the price. Did you ever look at it in that light, and don't you prefer an honest argument? The paper covering is a FINAL PROCESS and we could just as well leave it off and save thousands of dollars. We ALWAYS USE THE PAPER simply because IT IMPROVES AND PROLONGS THE LIFE OF THE CASE. Where do you gain when you buy the imitation Cases? You don't gain, YOU LOSE.

Don't be deceived by loud talk of superiority. We have built up the line of Modern Printing Office Furniture, now in use, almost from nothing, with the old stained Cabinet as a starting point, and we are constantly adding new articles. Why buy the second best when the best costs you no more?

Our stamp on every article. **The Mark of Unequaled Quality.**

Every first-class dealer and supply house carries our goods in stock.

BE A 20th CENTURY PRINTER

UNITED PRINTING MACHINERY COMPANY

A Company organized to manufacture and sell machines and appliances for reducing the cost of production of printing.

AUTOMATIC TYPE MACHINE.

Leased to printers (30 years, $2000), for making their own type from 6 to 36 point bodies; matrices ready for sale or rent for nearly all the standard and popular type faces and borders. The cost of type is about 6c. per lb., plus metal.

DUX FEEDING MACHINE.

The lowest priced feeding machines; effective on long and short runs of all sizes and kinds of paper.

AMERICAN ROLLER WASHING MACHINE.

A machine for washing rollers for cylinder presses. A great economizer in offices running five presses or over.

VICTOR STEEL DIE EMBOSSING PRESS.

Used by the leading steel die printers. Price reduced.

STEEN POWER COMBINATION PUNCH AND EYELET MACHINE.

The only machine that punches and eyelets at one feed. Price reduced.

SPARKS ROUND-HOLE MACHINE.

A small machine, using ⅛h.p., that does the work of five $200 punching machines, and better work.

SPARKS SLOTTING MACHINE.

Cuts slots in loose leaf paper, and card work of all kinds.

SPARKS CRIMPING MACHINE.

Crimps the binding edge of loose leaf papers, completing the operation without pressing.

DUNNING DECKLE EDGING MACHINE.

Puts a deckle edge on any kind or size of paper, after the printing. Cost of deckle edging is nominal.

MALEY IRON REGISTERING BLOCK.

Holds all sizes and shapes of electrotypes, registering them quickly and absolutely.

ELLIS FAC-SIMILE TYPEWRITER RIBBON HOLDER.

A small device ($10.00) for holding a typewriter ribbon on any job press, producing a perfect imitation of typewriter effect from type.

TYMPALYN.

A woven wire blanket filled with rubber, for use on printing press cylinders, resulting in a saving of one-third the time of make-ready.

PRINTING MATERIALS.

Everything of iron, steel, copper brass or wood, used in a printing office, at lowest prices.

EVERYTHING FOR ELECTROTYPING.

We manufacture the celebrated machinery of Geo. E. Lloyd of Chicago, and Lovejoy & Co., New York.

EVERYTHING FOR STEREOTYPING.

In this we excel. Nearly all the machinery used by Western Newspaper Union, A. N. Kellogg Newspaper and American Press Association, was made in our Geo E. Lloyd factory in Chicago.

EVERYTHING FOR PHOTO ENGRAVING.

Complete plants, cameras, screens, lenses, etc., and all the machinery.

UNITED PRINTING MACHINERY COMPANY

BARNHART BROS. & SPINDLER, WESTERN AGENTS, 183-187 MONROE STREET, CHICAGO
Great Western Type Foundry, Kansas City; Great Western Type Foundry, Omaha; Minnesota Type Foundry Co., St. Paul; St. Louis Printers Supply Co., St. Louis; Southern Printers Supply Co., Washington; A. G. Elliot Paper Company, Dallas; E. C. Palmer & Co., Ltd., New Orleans; Fundicion Mexicana de Tipos, City of Mexico. On the Pacific Coast—The Southwest Printers Supply, Los Angeles; Pacific Printers Supply House, Seattle; Pacific States Type Foundry, San Francisco.

A firm printing a certain job found it necessary, because of long runs, to provide two sets of linotype slugs to satisfactorily complete it. The contract expiring, the work was given to a firm using Optimus presses. The difference in the bids WAS THE COST OF ONE SET OF SLUGS, which was not needed.

THE OPTIMUS
THE OPTIMUS

Only on the Optimus is it possible to show little or no wear to forms on long runs. This press is not only economical in small items, but effects savings where savings count big and fast, as in the above, where one entire composition and several careful make-readies were dispensed with. This advantage (much greater than is generally understood) alone secured the work. The Optimus presses sold their own product without diminution of profit. They commanded the order. They domineered the business. Without them one firm would have had no superiority over the other.

REDFIELD BROTHERS

OF NEW YORK CITY

Indorse the Linotype

MERGENTHALER LINOTYPE CO.

GENTLEMEN:—Replying to yours, etc., * * * * * the work of the machines (Linotypes) was perfectly good and satisfactory up to the time we disposed of them. For the past two years the character of our work has gradually changed, until now we are devoting our attention almost entirely to work other than publication or book-work. We have nothing but good words to say for the Linotypes. We were always able to rely upon our machines for fast and accurate work. * * * * * We shall always take pleasure in saying good things for the Linotype.

Very truly yours,

REDFIELD BROTHERS

Mergenthaler Linotype Co., June 3, 1904.
Tribune Building, City.

Gentlemen:

Replying to yours of May 28: *We have no objection to telling you why we replaced our plant of Linotypes with Lanston Monotypes. To begin with, it was not because our work on the Linotypes was not good.* The work of the machines was perfectly good and satisfactory up to the time we disposed of them. For the past two years the character of our work has gradually changed, until now we are devoting our attention, almost entirely, to work other than publication and book work. We have nothing but good words for the Linotype. We were always able to rely upon our machines for fast and accurate work. *The Lanston is somewhat better adapted to our present needs, and that was our only reason for changing.* But we shall always take pleasure in saying good things for the Linotype.

Very truly yours,
REDFIELD BROTHERS

ABC BLACK

Of late years there has been a large demand for an

All around Book and Cut **BLACK**

suitable for general book, catalogue, circular work, etc., for type, cuts and half-tones on cylinder presses; a black which is lustrous, dense and strong in color, yet free-flowing and good-working, that dries readily when printed but not on the press, and is withal moderate in price.

WE HAVE JUST SUCH A BLACK

We have sold tons and tons of it, with such great satisfaction to all purchasers that we have decided, in order to introduce it generally and rapidly to 100,000 pounds of it, and offer it while this supply lasts, at the following prices. It is our

ABC BLACK

ABC Black in barrels containing about - -	500 lbs. -	18 cents per lb.
ABC Black in half barrels containing about -	250 lbs. -	19 cents per lb.
ABC Black in quarter barrels containing about	125 lbs. -	20 cents per lb.
ABC Black in kits containing - - -	50 lbs. each	22 cents per lb.
ABC Black in kits containing - - -	25 lbs. -	24 cents per lb.
ABC Black in case containing 12—10 lb. cans or	120 lbs. -	22 cents per lb.

50,000 pounds of the above will be kept at our factory, the other 50,000 pounds will be distributed from our Chicago branch.

The **ABC Black** will be furnished only in the above packages. Prices f. o. b either New York or Chicago—terms 30 days net, no cash discount. We reserve the right to limit the amount sold to any one customer, and to reject future delivery orders.

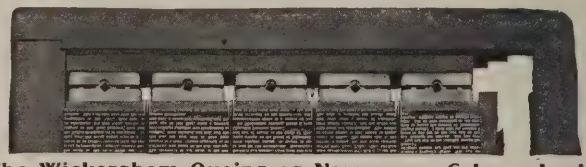
Best Locking Devices

Never Slide, Skew or Spring; Wonderful Power; Hold, positively, against wood, type or iron; Insure Perfect Register and Great Economy of Time.



The Wickersham Quoins as Newspaper Column Locks
As they do not slide when expanding, each column can be locked up independently. Thus absolute security, no working up of quads and blanks, and no delay in imposition or on press.

The Morton Lock-Up.—41 Sizes, 3-inch to 26-inch
These Rigid Locks combine Side or Foot Sticks and Quoins in one piece. They include all regular NEWSPAPER side-stick lengths and all BOOK and MAGAZINE measures.

The Wickersham Quoin is the Only Quoin
that conforms to either straight or uneven surfaces and ensures a square lock-up (also positive register) against out-of-true blocks, imperfect furniture, warped chases, etc.

2,000,000 in use, giving entire satisfaction. Printers affirm they repay cost in a few months. Think of $3,000 saving in 5 years on a $200 investment in W. Q. Co. products! See Expansion Locks and price list, also the "Good Opinions of Good Printers and Good Men," in booklet. Send for copy.

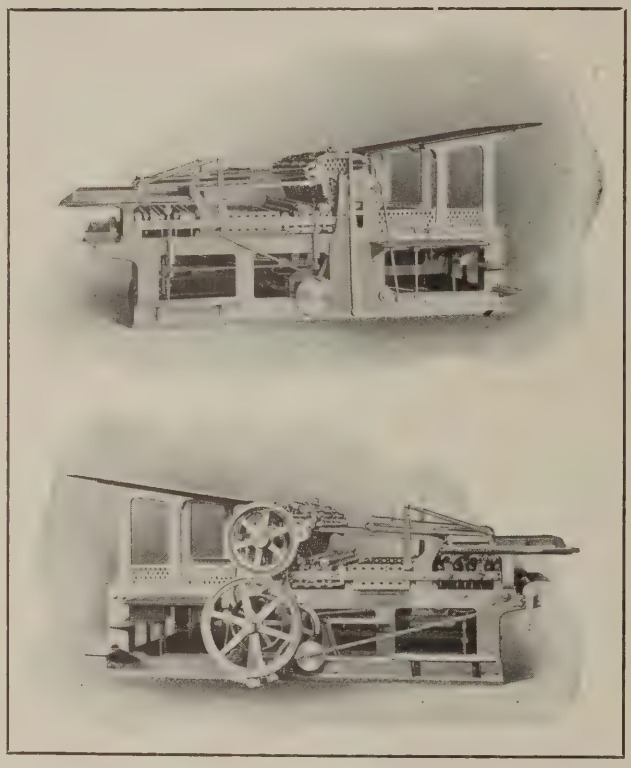
The CENTURY

To the Man who Pays the Piper



¶ Have you any greater waste than the time your presses are stopped for "making ready"?

¶ Most make ready is due to a weak impression or to uneven bed or cylinder.

¶ If your presses are not absolutely accurate and inflexibly rigid of impression day after day, you will be wasting "make ready" money, and will never know that is it a weak press that is bleeding your payroll to death.

¶ *There is a scientifically accurate and inflexible press.*

¶ If your presses, each had been able to turn off a thousand additional impressions per day, how many times during the past year could you have named lower figures upon jobs that your estimate didn't catch?

¶ *There is a press that will do a thousand more a day than any other machine.*

CIRCULATION IN ITS RELATION TO ADVERTISING.

THE CLEAN PAPER EXTOLLED AS A BUSINESS WINNER.

BY M. LEE STARKE, PUBLISHER AMERICAN ADVERTISER

IN WESTERN Canada, a few days ago, I broke off a twig from a tree and the sap oozed over my fingers. The instinctive thought came—this tree has circulation; it is alive. I broke a twig from another tree; it was brittle—no sap—and the instinctive thought came—no circulation; death. I asked a prominent physician, "If I had a poor circulation what would it mean?" He answered promptly, "Poor health." I then said, "If my blood should stop circulating what would happen?" and the answer came, "You would be a dead one." I asked a prominent financier what would happen if the great volume of money which now circulates among the masses were withdrawn, and he stated, "Business stagnation—death to commercial enterprise." You know that the same conditions apply to newspapers. Take away the circulation of a paper, and the paper dies.

Circulation is the life blood of advertising. Wherever there is circulation there is life. Cutting off a territory from a publication is like tying a string around your finger or wrist. There will be no circulation in that district. It is dead to the virtues of the advertiser's product. When one asks, "What is the circulation of this medium?" he is really asking, "How much alive is it? How good health does it enjoy?" Circulation is life, and the circulation of a newspaper is the fundamental basis on which all advertising value is computed. The mere purchase of space in a paper means nothing. The real standard of value comes from the service the paper renders in placing advertiser's announcements in the homes, and the value of this service must be measured, first, by the quantity, and second, by the quality of the medium's circulation.

There are two kinds of circulation. First—the newspaper, magazine, etc., that circulates as money circulates, from person to person, from home to home, and this is the most valuable circulation of all. It is the only real circulation which comes to you. Second: There is the circulation where the advertising is stationary and you circulate in front of it. I refer to the bill board, and practically all outdoor advertising. I cannot say that this is actual circulation of the advertisement, but it is the circulation of the readers in front of the advertisement. There are boards in New York, London and Paris in front of which, it is estimated, half a million people circulate daily.

The value of advertising, as I have stated, must be estimated on the quantity of papers circulated, but quantity does not always give the greatest value. The successful advertiser must know—he must demand to know—the actual quantity. This he has a right to do, just as good a right as though he were buying wheat, potatoes, or any other commodity. Suppose a hotel proprietor went to buy a lot of flour, and said, "Give me one hundred dollars' worth," adding, very naturally, "How many bags will that be?" and the miller replied, "None of your darn business." Such a reply would cause a sensation outside of publishing circles. It is not so often heard there as it used to be. It is coming more and more to be the good paper's pride to point to its sworn circulation, and net paid circulation at that.

Of course, the advertiser understands very well that quantity is only one side of circulation value. Quality, too, must be considered; quality, which is to a paper what character is to a man—the foundation of his influence and respect. To be sure, a paper may possess quality, be high class in every particular, and yet have so little quantity as to be practically worthless as an advertising medium. But no one will dispute my claim that a paper of quantity and quality, like the *Chicago News,* for instance, is worth more than a paper of mere quantity.

The advertiser has learned to study the average newspaper and to analyze it as he studies and analyzes his own salesmen. Would he send out a "tough" or a confidence man, or a "puller-in" off the Bowery? Would he send out an habitual liar? Not a bit of it. He is too good a business man. Investigate his pay roll and you will find that the biggest salaries are paid to the men "who know how to get an audience." Just so in regard to his paper. It must be able to get an audience; after getting it, it must be able to convince, and to do that it must have the manners and morals of a gentleman. He figures that a paper of 30,000, which possesses the confidence and respect of its readers, will sell more goods for him than a paper of 50,000 that is filled with filthy advertisements and news unfit for the home circle.

The advertiser is becoming more careful every year as to

the papers he uses to appeal to the homes. He knows that the paper with the manners and morals of a tramp will be treated just like a tramp—meet a chilly reception at the door, or at least be taken down the kitchen stairs. It will never enter the library at all; or, if it does, only to help kindle the fire. The clean paper, on the other hand, comes as an honored guest. It comes by invitation. It comes straight into the life of the family. It takes its place beneath the library lamp and spends the evening with the family. They ask its opinion before they form their own. They respect its views on all subjects. It is helping to shape the views and destinies of generations yet unborn. But, more than that, it is able to come closer than the purely intellectual side. Can you spend an evening, night after night, with a family and still talk only politics? Many a family looks to its daily paper to keep it in touch with the great heart of humanity. It is through it that they learn of the passions and sorrows on which hang the issues of life; through it that they read the births, marriages and deaths that are, after all, the supreme events of one great human family. Can any influence on earth be greater? Can we reasonably look for the same from the casual monthly guest? Or from the upstart stranger who gets in by chance and says his say in loud, vulgar tones, with no thought of the more serious meanings of life? It is not hard to believe that 30,000 paper salesmen such as I have pictured carry more conviction than 100,000 others of the cheap and flashy type.

The advertiser considers his advertisement a salesman on paper, and he knows that the cleaner and the higher grade a paper is, the more it is respected, and, therefore, makes for him a more respectable silent salesman than a cheap, flashy, sensational medium, filled with questionable advertising. The clean paper is worth just as much more to an advertiser as is the clean, respectable, gentlemanly solicitor, compared with the ordinary unclean, disreputable solicitor.

Thirty thousand honorable, gentlemanly solicitors can sell more goods than 50,000 of the unwashed. This holds true in advertising. The clean paper is a salesman, a silent salesman, with an entree to the parlor and library of practically every intelligent American family, presenting its advertiser's wares at a time when there is leisure and inclination for their proper consideration.

The price at which a paper is sold, in most cases, means a great deal to the advertiser. The public usually appreciates most the thing for which it pays most, and it usually follows the old motto, "You have to pay for what you get, but be sure you get what you pay for." If the best paper on earth were distributed free, it is doubtful whether it would ever acquire any great influence.

I call to mind a paper which is left regularly at my home. It has been left there for years. We have never subscribed for it, never paid for it, and never expect to. The paper is usually picked up by the maid and carefully deposited in the ash can. We subscribe for two papers, one a penny paper, which is read over for its sensational headlines and its bright, breezy style, but this, too, finds its way, after a brief perusal, to the waste can. We have another paper for which we pay two cents. It is a dignified, respectable, respected family newspaper. It is read, and copies of it can be found running back for weeks. This paper is clean, and the whole family can read it without shock to their finer sensibilities.

If I were a circulation manager, I would insist that the paper I was working for keep its columns clean, free from filthy advertising and filthy news. I would try to convince my publisher that his own self-respect and the respect of the readers of his paper demanded the elimination of all questionable reading matter and advertising, and show him that respectable home circulation is the one great asset of a newspaper. If I were preaching a business sermon to publishers, I should take as my text, "What shall a publisher give in exchange for his self-respect?"

Speaking of home circulation and the clean newspaper, I want to draw a picture that was so indelibly photographed on my memory that I can never forget it. I went to a city to investigate the claims of two competing papers. One was a penny paper with a circulation of about 40,000, and the other was a ten-cent-a-week paper, with a circulation of about 30,000. For a week I followed the carrier boy of the two-cent home paper block after block through the city. You can imagine my surprise when I found that this paper was delivered into over eighty per cent of the homes, and often not a single house in an entire block would be missed. What is still more remarkable, almost invariably, either on the stoop or at the window, some member of the family would be watching for the favorite paper. In talking with these people, I found that they referred to it as their paper. This paper, I noticed, was not pasted, and I was informed that this was omitted at the request of the subscribers, so that the paper could be divided and read by more than one member of the family.

I claim that this sort is the most valuable circulation and produces the most valuable advertising on the face of the earth. And there are many cities just like the one I speak of, where papers are delivered at practically the same hour every day. Its visits are paid for and the members of the families by whom it is received look forward to them eagerly.

The other paper had a large sale on the streets, a large number of copies were sent out of the city, and it had a fairly large circulation among the homes. I followed the carrier of this paper, but I saw no one watching for it. It was carelessly thrown on the stoop or in the hallway, just as if the carrier himself did not respect it. Confidence is the chief asset of a salesman, and the confidence and respect which the subscriber has for the newspaper, which to the advertiser is a salesman on paper, is its chief asset.

I want to impress upon you the importance of this statement: If an advertiser is convinced that the readers of a paper have every confidence in it, he feels certain that he will get results from its circulation. An advertiser studies circulation carefully, and the circulation manager should always bear in mind this fact when building circulation. It is the circulation that brings the advertiser the best returns that builds a paper. This is the most important phase of circulation. If the subscribers have confidence in the paper, the advertisers feel that they will have confidence in the advertising.

The circulation manager should insist that he be able to deliver clean goods and honest goods. By the delivery of clean goods, I mean clean papers containing only all the news and advertising fit to print. By the delivery of honest goods, I refer to the circulation that he delivers to the advertiser. He should state his exact circulation, and if he claims 50,000 he should deliver 50,000.

---

*From a paper delivered before the National Convention of Newspaper Circulation Managers, King Edward Hotel, Toronto, June 7, 1905, by M. Lee Starke, Publisher of the *American Advertiser*, New York City.

"The greatest art is to conceal art," is as true in advertising and printing as in anything else. Be true to Nature, simple, clear, clean, strong, well-proportioned, adaptable, with everything in its proper place and adapted to the end in view, serviceable, truthful, natural.

MY CONTEMPORARY ACROSS THE STREET.*

BY J. D. MOYER, HONEY GROVE, TEXAS, CITIZEN.

FORMERLY every newspaper man felt it his duty to fight his fellow-editors, more especially those of his home town. At that time the country editor was not accorded the respect which he is today, and depended upon, to a great extent, what was considered charity. But the fraternal feeling has spread, and is permeating the Texas press, and it is now seldom that we see these attacks. To the Texas Press Association, to an appreciable extent, is this fact due. To its annual meetings, full of fraternalism and good fellowship, can be attributed the elimination of personalities.

But personal friction between contemporaries is not altogether a thing of the past. Occasionally one will still observe it, but I believe it is more noticeable among the larger papers of the country, the great dailies, than the country press. I observed recently in one of the larger dailies (it was not a Texas paper, however), a breezy little bit of personality in which the paper was roasting its contemporary for some alleged inaccurate statement in regard to the Russian and Japanese War, and closed with the assertion that a "last year's almanac was about as serviceable and far less dangerous than the punk paper which prints pipe dreams."

But these instances are few and far between when compared with a few years ago. There is now a more generous spirit between the gentlemen of the press, which is highly commendable.

Speak only good words of your contemporary. This is a law of success that should never be disregarded. When a publisher shrugs his shoulders and tells you what a cheap, vacillating, ne'er-do-well fellow his competitor is he is to be pitied for his small, shriveled and distorted heart. Never belittle the man who works opposite you. The time may come when you will want a favor of him. If you can not speak well of him, forget him.

As I said in the beginning. I have a competitor, and I can pay him no greater tribute than by saying that during the more than six years that I have been in the newspaper business in the same town—Honey Grove, the sweetest town on earth, and the place discovered by Davy Crockett—our relations have been the most pleasant. Nothing has ever occurred to in the least mar the happy condition which exists. It is the aim and object of each to work for and build up the town, and thereby build up and better our respective papers, believing that by coöperation the result can better and more quickly be obtained.

While, of course, in the newspaper business a complete union of interests and a division of earnings is impractical, still there is much that can be accomplished by coöperation with our competitors. It is certainly time to quit fighting each other and labor for our own and each other's interests. We must, if we would live, quit the ruinous business of cutting prices on subscriptions, job work and advertising, whether legal or commercial, and by each other's help establish a reasonable and legitimate remuneration for our labor.

Hate each other, if you must, socially, and even in the church, but keep your animosity out of your editorial columns—let go of each other when it comes to business where you and your family are interested, and where the interests of the community are at stake. The theory of the "survival of the fittest" is about the hardest thing a newspaper man ever tackled. Nothing is so hard to kill as a well-established newspaper, and the scars of battle are slow to heal.

My neighbor across the street, or rather around the corner, is a man in whom I have the most implicit confidence, and I believe I have no truer friend in Honey Grove than the editor of the *Signal*, one among the best papers within the bounds of the Texas press, and I truly place an inestimable value upon his friendship.

We often think nothing but the strange fascination of seeing one's thoughts in black and white can explain the almost sublime pertinacity with which some newspaper men stick to their calling, but many of them no doubt appreciate the importance and responsibility of their rank and stick to it for the "love of the thing." Such a man as that will make a success in the newspaper world, will accomplish much good and be respected as a citizen of inestimable worth in his community.

The country newspaper is but one of a thousand small rivulets that flow into the maelstrom of the metropolis, a messenger that goes swift-winged, laden with tidings to the great herald arteries that throb throughout the world. Brave little sheets that they are, wrapping their histories in a thousand heartaches and cramped ambitions, of bitter sacrifices heroically made, without a blot upon their record of faith and purity, and not a foul, scandalous line to mar the symmetry of truth and constancy. In the fellowship of journalism it is the quiet, golden-hearted man, stainless and pure as the white soul of him who guides its cruise over the deeps and shallows of this stormy journalistic sea that achieves success and wins the love and esteem of his contemporary across the street.

*From Address read before the Texas Press Association.

SOME NEWSPAPER LAWS.

BY D. M. BUTLER, LINCOLN, NEB.

Evidence that plaintiff in his newspaper published for defendant an advertisement at a price agreed upon by defendant's agents, that he mailed a copy of the newspaper to the defendant's address for one year, and that defendant never refused or returned the same, is sufficient to make the defendant liable for both the advertisement and the subscription—that is, there is no presumption in favor of a free copy of a paper because of the advertising. Goodland vs. Leclair, 78th Wis., 176.

The fact that an advertiser is aware of the continuence of his advertising after the time specified for its publication and that he takes the paper cannot be construed into a contract for a continued publication. Dake vs. Patterson, 5th Hun., 558. This case should not be confused with a case where publisher had no contract for any particular time in the first place. In such a case the printer may prove a custom of the trade to show that an advertisement with no contract as to time was to run until ordered discontinued. Thomas vs. O'Hara, So. Car., 302.

Where a publisher of a newspaper forwarded regularly by mail directed to one not regularly subscribing but who takes it from the postoffice, but who upon demand refuses to pay at the usual time and rates, denying that he is a subscriber, but continued to take the paper as before, giving no other notice to the publisher, the law will imply a contract. In such a case the publisher can recover what has fallen due within six years. Fogg vs. Portsmouth Atheneum, 44 N. H., 115.

NOTE—The statute of limitation would run against all of the account more than six years old.

The publisher of a delinquent tax list for a county is not entitled to be paid for his advertising charges as a condition before he delivers to the county treasurer the copies and proof of publication prescribed by law, and if he refused to make the delivery before he is paid, the refusal is a good defense to his demand. Brown vs. Otoe Co., 6th Neb., 111.

A county auditor has no right to publish in a newspaper of which he is the owner a delinquent tax list without a prior request from anyone representing the county and then compel the payment of the value of the work out of the county treasury. Stropes vs. Green County, 72 Ind., 42.

The notice of the sale of land for delinquent taxes may be published in a supplement if the circulation of the same is as extensive as that of the paper itself. Zahr vs. Selby, 15th Neb., 579; 19th N. W., 645.

Where a printer having contracted to print for his employer 1,000 copies of a book and no more, printed from the same type set up at the expense of his employer 500 other copies for his own disposal, he was held liable to refund to his employer one-third part of the expense of setting up the type, no actual damage having been proven. Williams vs. Gilman, 3d Maine, 276.

A legal advertisement which the law requires to be published for a stated number of days or weeks must be published as often as the paper is, that is, daily if the newspaper is a daily, or twice a week if the newspaper is a semi-weekly. State vs. City of So. Omaha, 33d Neb., 876; 51 N. W. Reporter, 291.

WHAT ARE WE HERE FOR.*

BY B. J. E. VERNER, LAMPASAS, TEXAS, LEADER.

Surely we are not in the printing business or at work as editors with the expectation of accumulating wealth, for the same capital invested, the same amount of energy exerted, the same care in the detail of management, there are many other lines more inviting and much more productive of what the rest of the world is supposed to be striving to obtain—the almighty dollar.

We are not here to show our learning, for however learned we may be, the use of Latin, Greek, Hebrew, German, Spanish, Japanese, Russian, or even Volapuk, or obscure words in our own cosmopolitan English, would soon cause the sheriff to knock at our doors, and our learning would have the effect of giving us "infamous notoriety," instead of "immense popularity."

Certainly not to abuse our enemies any more than to boost our friends, for, while every man in this line of business has both of these necessary adjuncts to success, yet he can not afford to vent his spleen on the one nor to use his business for the special advantage of the other. Then "What Are We Here For?"

Positively to do good, to build up, to promote the welfare of the public, to teach optimism. No man who did not see roseate hue of success where darkness and despair prevail would ever venture his all in a business fraught with so many risks, environed by so many difficulties, having hundreds of "bosses" in the way of patrons, with competition in every city, and the man who can buy an office for a "dollar down and a dollar a month" liable to set up any day as his competitor. No man but an optimist could be here with such surroundings facing him, and every newspaper worker in this assembly worthy of the name is an optimist.

This is one of the reasons why we are here and one of the reasons why we succeed. The true newspaper man can see the city before it grows, really when it is but a village, sometimes before the lots are put into blue print by the promoter. He will fight for its progress, he will urge improvement, he will spend more than his earnings in the betterment of his plant that he may better represent his location. He will build flouring mills, oil mills, cotton compresses, cotton and wool factories, bore oil wells, spread artesian water over the ground, establish schools, build court houses, locate county sites, build public libraries, establish rest rooms, bring law and order out of chaotic conditions and have the entire country on a boom by the time his type and presses are brought to him by the slow-moving freight trains.

If we can increase the population, the business, the industries of our respective cities by telling of the opportunities and openings which exist for success in any line, then that is "what we are here for."

All these things come to him. He is the pioneer who leads the way to success. He drives out ignorance, fosters the public institutions of learning, encourages morality, is sometimes even religious, and now and then holds public office of trust or emolument, which he always makes subsidiary to his work as a benefactor to the country. Texas he is the only true prophet in existence. He some times must write against space, but always something that interests, that instructs, that entertains.

What are we here for? To build up, to lead the people into better, higher way of living. While many of us are too poor to own a burial lot, we believe in having the best, the most substantial, the greatest of the advanced improvements for our people. Where the newspaper flourishes, fine churches are built, good schools are established, society improves, the people become intelligent, public improvements are inaugurated, the law is enforced, business grows in volume and variety and elysian fields appear. Without the newspaper optimist in this day, life would be a burden, society would become savagery, education would decay, morality would decline, public improvements would stagnate, cities would crumble back to dust, railroads would become unnecessary, pulpits would be vacant, the schools would lose half their attendance, teachers would die of dry rot, and soon a pandemonium would exist.

The newspaper man can not afford to be a pessimist, or in the latter day language a "knocker." He must live among the most intelligent, refined and cultured people on earth. His location must be the most favored spot in the universe. Healthfulness unsurpassed, morality supreme, the finest business point and the best business men in the world. If you have not this ideal place, then what we are here for is to make it that.

If we can insipre some worthy young man or young woman with an ambition to make better citizens than their fathers and mothers have been, then that is "what we are here for."

If we can help John Smith and his neighbors to be better farmers by telling the world of their present success, then that is "what we are here for."

If we can assist the good women in their noble work for themselves and others by telling of their aspirations and accomplishments, then that is "what we are here for."

If we can increase the educational facilities, build railroads, make good streets, roads and bridges, improve the manners, moral and general character of our people, by a consistent urging of these matters, then we "are here for that purpose and should know no such word as fail."

*From Address read before the Texas Press Association.

INVITED TO FRENCH LICK SPRINGS.

French Lick Springs of Indiana, near Indianapolis, has already invited the Executive Committee of the National Editorial Association of the United States to hold its next meeting at that popular resort. It will certainly be a very pleasant place to convene, and we understand that all possible courtesies will be extended. Those who enjoyed Indiana's hospitality on the occasion of the last meeting of the Committee will fully appreciate what this means.

THE AMERICAN CHAP-BOOK.

"Just the moment a merchant demands a type arrangement containing an element of newness, just that moment he should be demanded to pay the additional figure that such an arrangement is worth: this, with equal truth, whether the newness be the result of uncommon arrangement or of the use of uncommon type. A piece of furniture, suit of clothes, or any article of merchandise made in duplicate and sold from stock brings a fixed price. The moment one demands something special, the price is increased in accordance. This line should be just as clearly drawn in printing and can be so drawn inasmuch as the demand for something special and distinctive far exceeds the supply."

We quote the above from the text of the April Chap-Book which Mr. Bradley devoted to the subject of Business Cards. This is a most quotable little volume and we can't refrain from again urging that complete files be preserved by everyone receiving the Chap-Book. Unquestionably the value will be enhanced as soon as this unique little publication is out of print, and we understand that the series will be completed with No. 12, to be issued during July or August.

In the examples illustrating this article Mr. Bradley has given both plain and decorative arrangements and the little book is full of suggestive hints which cannot fail to be of practical value as well as of exceeding interest to every reader, whether a printer or one simply interested in the subjct of publicity through the use of printers' ink.

EDITORIAL NOTES AND POINTS

BY BENJAMIN B. HERBERT, CHICAGO, ILL.

THE first and principal object of a very great deal of advertising is not directly that of selling goods, but of establishing a worthy fame—a recognized reputation—to make the machinery, the goods and the house known. Traveling men bear universal testimony to the importance of having the goods and the house that they represent, favorably and universally recognized, through thorough advertising. It is the same with the salesmen in a store. Customers must come with some idea of the goods they seek, the more knowledge the better. With confidence inspired by effective advertising, it is then up to the salesman to do the rest—to make good by courtesy and a skilful presentation of the wares which should be up to all that has been advertised.

The lawyer who carefully and thoroughly conducts his small cases, putting all his energy, vitality and all possible preparation, knowledge and ingenuity into them, will soon have plenty of large ones to conduct. It is the same with the printer who puts all possible skill, taste, care and good material into his small jobs, acting on the principle that anything worth doing at all is worth doing in the best possible manner. Small jobs well done so as to be pleasing, effective—and that is what all printing is for—soon bring large jobs, and many of them. "He that is faithful in that which is least" will readily be judged as one "who is faithful also in much"—in the greater things (See Luke xvi: 10). The printer who neglects the little jobs, is pretty sure to neglect the little things that help so much to attractiveness and productive quality in the larger jobs. Good work is the best possible advertisement.

The same holds in advertisements. Every advertisement, no matter how small, should be given the very best appearance and display possible. The function of an advertisement is first to draw attention and to leave a favorable and, as far as possible, a lasting impression. No publisher can afford to print any but the most perfect and attractive ads that types and skilled, careful workmanship can make. A neatly-set and well-printed advertisement not only pleases the advertiser but helps the appearance and character of the paper, gratifies all who see it, and does an important work toward bringing results, retaining patronage and securing other advertisements. Every newspaper and every advertisement should be works of art noted for clearness, purity, simplicity, beauty and strength. There are few things handsomer than a well-arranged, clear, informing, well-printed newspaper page. Its very attractiveness carries a winning power.

The *Monitor* of Republic, Mo., printed its outside pages on June 23rd in red and blue, making the combination of "The Red, White and Blue," and invited its readers to "Republic's Party, July 4th." It is wise for newspapers to take advantage of the approaching National anniversary each year, to preach patriotism, a genuine, unselfish love of country, and to reprove sinners against her institutions and to arraign the violators of the rights of the people as well as to review the progress of the years and to treat of the existing conditions.

This is a country worthy the love, consideration, pride and best efforts of all her citizens. Her position, her liberties, her wealth, power, opportunities and possibilities are subjects for renewed congratulations all the time, but especially when the minds of her citizens naturally turn back to the beginning of our National independence and to the consideration of the spirit that actuated the founders of the Republic and to their heroic, noble, self-sacrificing labors and struggles by which freedom was established and National greatness and continuance made possible. It is well to point out the long-established truth that "eternal vigilance is the price of our liberites," as much today as any time in the past, and that there are still wrongs to remedy and foes of individual rights, of equality of opportunities, honest government and of faithful administration, to fight. It is not well, however, to be too pessimistic and, to our way of thinking, the *Monitor* errs in this particular. The *Monitor* says:

> Today a man sees a location with possibilities, and the first thing that suggests itself to him is "if I had the capital." A hundred years ago the only consideration was strength and endurance. The young man of today is helpless without capital and crazy with it. A hundred years ago the capital required was a gun, plenty of powder and lead, an axe and saw; with this outfit he sought the frontier, and by his personal efforts made his capital, and it was these sturdy, fearless Americans who made the country what it is.

It, further on, paints, in dark colors, existing monopolistic conditions that all must admit exist and that need changing.

We do not believe, however, that newspapers should teach that opportunities are less today for aspiring young men than in the past, and of this, we feel able to speak with experience and from observation. Opportunities are different, but not less. As a boy, we were a member of a pioneer family in both Iowa and Minnesota, lived in a log cabin and a sod shanty, broke the virgin prairie in the Hawkeye State and wielded the axe, the grub hoe and ditching spade and held the breaking plow handles in the Gopher State. We know something about the pioneer who preempted his land and of the man with the axe. Later on, we had experience in forming coöperative companies among farmers and business men and the building of mills and manufacturing establishments, the forming and conducting a building association

and founding a newspaper and printing office. Neither the farms opened, the mills and factories built, the building association established, nor the newspaper and printing offices are in original hands. The members of a new generation, many of them former employes, are enjoying the work of the pioneers in all these with far less call for risk and strenuous endeavor, with less labor, larger salaries, and greater profits. The fact is that the pioneer farmer, manufacturer, printer, and publisher paid, in labor and self-denial, largely on account for the lack of profitable markets and the lack of people as customers, or subscribers, and advertisers, much more than the improved farms or plants would cost today, taking into the account the possibilities of present earnings and comforts, to be derived therefrom. A man may not now, in most sections of our country at least, though such opportunities are not yet entirely lacking, go out with a gun and an axe to make himself a home, but he can do much better, if he has received the requisite training and equipment necessary to this age, that were wisely provided for by the early pioneers and inventors. A brave heart and strong arm were almost all that the early pioneers needed, but today the young man must have the equipment of knowledge, of skill, of management and of organizing ability. Success means more today than it did twenty-five or fifty years ago. Few men today would be satisfied to begin with a log cabin or sodded-up board shanty, or with a few pounds of type and an old hand press.

Not to go out of our own calling, the journeyman is paid today double as much as the pioneer printer or newspaper publisher could possibly earn in most any of our new states fifty years ago and can afford a better house and a better living in every way. If he puts forth like effort and uses like economy and improves all the advantages now at hand, he can become an owner of a printing shop or a newspaper, or of a farm, with less labor and sacrifice than were required a half century ago to build up from nothing. We do not believe in monopolies, yet it must be remembered that even they employ millions of men at salaries that amount to much more than the earnings of the small independent owners of business, farms, factories, newspapers, or printing offices, fifty years ago, and, in great establishments, there is always an opportunity to rise, and there always will be such opportunities while men grow old and die. Even Rockefeller, whom the *Monitor* mentions, is said to give employment to a million men, and that, too, at wages or salaries that, fifty years ago, would have been considered munificent as independent incomes, and he affords his products at much less than one-half the then cost. This does not excuse any injustice that he has done to others nor justify any monopolistic practices, but we are now only talking of comparative opportunities. It is a fact that men need capital to enter into business, but capital is easily obtainable, as well as almost unbounded credit for appliances and machinery, by any well-equipped, efficient, honest young man. Population makes for wealth, provided that population is engaged in productive pursuits and no other country in the world has so great productiveness, such undeveloped resources, as has America today. When on a recent visit to Texas, the members of the National Editorial Association were told, in an address by a judge, who gave figures to back up his statement, that the whole present population of the United States could be accommodated in Texas and yet that State, though vastly richer, would not be as densely populated as is Massachusetts. There are virgin opportunities in all the great Southwest. There never was a greater demand for efficient workers than today, and while the population has increased with wondrous strides, not one-twentieth of the lands, mines and other resources are yet developed. There is a constant cry, everywhere, for reliable workers who are able and fit and, at the same time, dependable, and there is scarcely any limit to the new enterprises that await development. In all the great new Southwest, railroads are calling for colonists and for all kinds of industries in sections already supplied with railroads and markets. The whole world is waiting on American industries, commercial enterprise and State craft. There is a call in every city, every State and in the offices of the Nation for men, honest, trained and able for municipal, State and National administration.

How great the demand is in our industries may be illustrated by the salaries paid efficient civil engineers. The Government recently secured a civil engineer at $25,000 a year, and very shortly the man was offered $60,000 a year by a private company, and the Government had to secure another at $30,000 a year. These may be considered extreme cases, yet the fact is, that whenever a man's ability and honesty become advertised through Government service or otherwise, there seems to be hardly any limit to the salary that he can command. The same thing holds with regard to our railroads, manufacturing enterprises, mercantile establishments, our schools and even the churches and benevolences. The trouble is not the lack of opportunities but the lack of initiative possessed by the pioneers and the lack of preparedness and the faithful performance of work when secured. This condition has been largely fostered, in our large cities, by a spurious kind of unionism that seeks to secure and hold positions and to command large wages by combination instead of by fitness and efficiency. Indolence, stolid indifference, ignorance, general depravity and overcrowding of cities, with a determination to remain in the great centers of population, instead of striking out into other fields or being reliably useful, are the things that keep men from opportunities not the lack of them. The false ideas that have been taught that there are too many workers for the work to be done have also tended to hamper workers. We repeat, that never before in the history of the world, have any people had such opportunities as have genuine, self-reliant, young Americans of today. Never had we greater cause to be proud of our country, of her achievements, or her possibilities. We are urging immigrants from all over the world to help in the work of the development of our great resources and yet crying that there are no opportunities for ourselves. The intelligent press should not be guilty of teaching the lack of chances for advancement and accomplishment, but should investigate the opportunities and point the way. In the meantime, there should be no let up in the demand for a "square deal." Nothing is too good for the humblest American citizen and no punishment too severe for those who, through greed, take advantage of our free institutions to despoil others of their property or to rob them of their opportunities. Let every American citizen in office or out of office do his duty as a citizen and the next fifty years will so surpass the past fifty, as to make all the world wonder. It is the duty of

the press thoroughly to study and to understand and incessantly to declare the rights of the people and to insist on their enforcement, on honesty in office, and faithful administration without favoritism, graft or office-seeking subserviency. "Unswerved by gain, uninfluenced by fear."

That wrongs are being probed and attacked, violators of the rights of the people, despite their high positions, power and pelf, boodlers, and faithless public officers being exposed, accused, tried and punished for unlawful combinations, briberies and other wrongdoing, is not a matter for gloomy forbodings, except for the guilty, but a most signal cause for rejoicing and optimism. It is only when a people become too stolid or corrupt to resist, and to expose wrongs and to punish wrong-doers, however great their wealth or high their positions, that the press should indulge in gloomy forebodings and in a genuine pessimism. Horace Greeley once said said in substance, "nothing is so bad for a man as to think that he can get a dollar without earning it." This thought is what is the matter with opportunities, men have come to think that it is smart to get money without earning that money. Too many expect reward for performing what ought to be regarded only as duty and joy of citizenship. Men have sought positions not to serve the country and to see how useful they can be, but to rob the city, county, state and nation. A better condition is dawning. It is coming to be recognized that a dollar got and not earned is a dollar stolen. In government service, with the success of such men as President Roosevelt, Governor Folk of Missouri, Governor Johnson of Minnesota, Governor LaFollet of Wisconsin, and the self-sacrifice and declared, actuating principles of such a man as Secretary Taft, there is a brightening hope for the Republic and there is a great lesson as to the splendid and almost unbounded opportunities there are, even in the one line of honest public service, for true young men, with the spirit of the pioneers, bound to carve out useful careers through fearless, honorable effort.

In a "government of the people, by the people, for the people" there can be no valid objection to the Government's doing anything, everything and all things that will serve and protect the people and all their interests. There must be no favoritism, favored interests, classes or business as against the rights, prosperity, security, and convenience of all the people. It is an age of beneficial combination and of wise cooperation, but all considerations should be as to serviceableness to the whole people and subject to the control of the people. Do not do away with the modern idea of coöperative effort, but regulate it for the good of all, not for the benefit of the few. If parcel postal service will benefit all, it should be adopted.

If men are not sufficiently educated, mentally and morally, to do right, compel them to do right and do not encourage men in wrong doing, or injustice by praising them for their ill-gotten gains or positions. The press has a great responsibility in regard to the bestowing of only proper commendation where and when deserved.

The chief ends of this life are secured through healthfulness, a proper supply of all natural wants, mental, moral and physical activities and development, with security and contentment. The depriving of the people through want, or pampered indulgence, of their proper developments, activities, and opportunities of service, is on the one side, to breed unnatural greed, envy, covetousness, robbery, corruption or crime and on the other hand, vice, profligacy, cruelty, inhumanity, and wantonness, all resulting in misery. That nation is the happiest, the strongest and most enduring, where every man has his own in earnings and in opportunities and always enough to satisfy the legitimate wants of body, mind and soul. Both degrading poverty and corrupting riches are curses alike to the individuals and to the community. The man is only truly wise, in a worldly as well as in a spiritual sense, who seeks first the highest good, "The Kingdom of Heaven," and, when all other things promised, are added thereto, uses these as a faithful steward for the uplifting and bettering of others. The solitude of selfish, inherited or acquired wealth is not less miserable and degrading, than is the solitude of inherited or enforced poverty.

Appearances count. Many men have won in this world through an assumed stateliness, dignity or sanctity. This is because men naturally admire loftiness of mind, nobility of character and holiness of life, which savors of communion with the Divine, and are willing, good-naturedly, to take men for what they appear, though that appearance may only be consummate acting, or the result of their own self-deception. However, in this age of newspapers and universal information, it is more difficult than in the past for the counterfeit to pass current as the genuine coin. So it is wiser for one to be what he seems, though in the seeming there is power. To look prosperous is often a very sure way to become prosperous. There is no harm in having everything about a newspaper or printing office bear a bright, clean and prosperous look. It does not pay to be constantly displaying your poverty in appeals for business. Put on a hopeful, cheerful, bold front in your advertising. Never beg for business or advertising patronage. Never advertise yourself a pauper. This world wants value for money expended and prosperity in appearances convinces people that you must have something of value to give in return, besides, men will speak well of you when you are apparently doing well for yourself. Be proud of your business and your business will be proud of you. Humility has its place, but its place is not in winning new business.

Laudable, earnest, intelligent aspiration is half way to success, for its immediate fruits are preparation, application, industry and unfaltering perseverance.

Franklin said, "Keep your shop and your shop will keep you." This might be paraphrased into: "Keep your own business and your own business will keep you." Our attention has been recently called by a Wisconsin publisher, to a very slick scheme that is being carried on by a Chicago firm, whereby newspaper publishers are induced to sell out advertising space at wholesale rates, in one or two page lots, to be peddled out in two-dollar advertisements in the local field. If the agreement as made is honestly carried out, which our informant claims was not done in the contract with him, there is generally more lost than gained. The solicitors use glowing representations,

make all kinds of promises, and, in the wind up, the paper loses both prestige and patronage. The publisher furnishes all the influence of an established business and the power and good will of the paper, to an interloper, without a plant or any risks, for him to make out of those who are the publisher's natural patrons, twenty-fold what is paid for the space.

All this is done with the idea that it is going permanently to increase the publisher's business. The publisher furnishes the establishment, the good will, the investment, pays the taxes, and interest, stands the wear and tear and gets the low wholesale price for two pages of advertising, but more frequently pays out this amount and more in the extra composition of a hundred or so, of small advertisements. He is then tendered as pay, if he has not been smart enough to collect in advance, twelve or more two-dollar contracts or due bills on business men scattered all over the country, that is, if the contract, except as to cash payment, is carried out. Generally there is a side agreement as to cards in the shape of large hangers to be delivered, two or more, to each advertiser. The outside firm, or promoter, collects as far as possible, the ads in advance and if the hangers are not furnished the advertisers have no redress except on the home publisher to whom has been turned over the uncollected orders, for his pay, and which he can not collect until he furnishes the card board hangers. This is pretty nearly the claimed experience of our Wisconsin publisher, though there are a dozen or more similar schemes worked, from time to time, on confiding local newspaper makers. The points are: Run your own business. Never farm out your advertising space. When you deal with strangers, require cash in advance. It pays a local paper to work its own schemes, to employ a live solicitor to canvass for both advertising and subscription. You may be sure that the solicitor for an outside firm or promoter, will use all the good will of paper to the utmost limit, to work the scheme that he represents, and will make promises and representations that will arise, after he has harvested your crop for the benefit of his outside employer, to make trouble. Of course, the solicitor will represent himself as your representative, if you are foolish enough to permit this, and it is hard to prevent it in any manner.

THE TORTOISE AND THE HARE.

The tortoise won the race because the hare tarried by the wayside thinking that he had already distanced his competitor, while the tortoise kept steadily on and won. It is the same with the advertiser. The one that stops because he has so much business or is so well known or thinks success already won, loses while the one that keeps steadily at it wins in the end.

SEND IN YOUR QUESTIONS.

There seems to be a dearth of questions from readers this month. This signifies, we presume, that few among them are having any particular trouble in their offices. We hope that all will feel free to use this department and will send in questions on any and all subjects relating to the calling as well as suggestions as to how difficultie may be overcome. There is no better way to bring out practical, helpful knowledge than by asking questions.

JOHN E. JUNKIN, 1stVICE-PRESIDENT, N. E. A.

Pennsylvanian by birth; Kansan by adoption; born in Lewistown, Penn., in 1860, Mr. J. E. Junkin learned the printer's trade on the old Lewistown, Penn., *Gazette,* a paper that dated its first issue some time about the year 1800. He added to his experience by working in the leading print-shops of Philadelphia, New York, Boston and in the Government Printing Office at Washington.

His ambition fired by the opportunities of the Great West, he moved to Kansas in 1886 during the boom days. The day he landed, without knowing a soul or having a friend, and with a cash capital of $20, he purchased a small printing outfit and started the publication of *The Record* in the small but ambitious town of Chase.

After two years of building up a nice property, he sold *The Chase Record* and purchased the Sterling Kansas *Bulletin* in 1888, and has been publishing it continuously ever since. There were four papers published in the town at that time. Several of these were consolidated with the *Bulletin* and the others finally passed away.

JOHN E. JUNKIN.

Mr. Junkin believes in newspaper organizations as a means of bringing publishers together in a business and social way and to broaden their ideas concerning their calling. He helped organize his county, district and state editorial associations, and has given them almost a paternal oversight. He has served them all as President, and for a number of years has been the Corresponding Secretary of the State Association and National Executive Committeeman for the District Association. He probably has a larger personal and intimate acquaintance with the newspaper men and women of his state than any other man in Kansas. He has been attending the National Association continuously since 1893. His election to the first vice-presidency came entirely unsought.

Believing that a newspaper should be the greatest force for good in its community, Mr. Junkin has endeavored to bring the *Bulletin* up to this standard. It is known all over the counties as "The Old Home Paper."

He has been president of the city school board for ten years, a Sunday-school superintendent for sixteen years, and a director of the State Historical Society for twelve years. Was postmaster under President Harrison.

MORE WORK THROUGH PUBLICITY

BY HARRY A. WOODWORTH

Address all Communications for this Department to
349 Jarvis Street, Toronto, Canada

(Continued from July issue.

I ask no pardon for the digression. I was talking of the advertising of paper, and here is a prettily graded sample-book of "Tinted Superfines" from the Miller's Falls Paper Co., Miller's Falls, Mass. Now-a-days such a classification as in this booklet is of particular value for reference. For it is tinted stock that is the basis of many a pleasing color-scheme in the publicity of today.

Ah! here's one of those securely-locked folders from the Mittenague Paper Company, Mittenague, Mass. I thought till I was thus far in my review that the inner pages were similar to those of this firm already reviewed in this department. But the inner part consists of letterheads, with the interesting information that this firm, too, are adopting the idea of helping themselves by helping the printer. "We are," they announce, "sending a similar folder showing the same samples to every large consumer of business headings in the United States and Canada. * * * * All of these people are referred to their Printer or Lithographer for prices on stationery with envelopes made from the same. You will, accordingly, receive a large number of inquiries, and, as you will want to be fully posted in regard to the paper, we would advise that you immediately secure a sample book," etc. I have talked this reciprocal method of publicity for years, and I'm glad to see it's becoming a feature of the advertising of printing and allied trades.

The new book on "Strathmore Deckle Edge Papers" is, like previous Strathmore books, a study in composition and ink-schemes in sympathy with the uses of such high-class stock. They are therefore sure to form part of the permanent library of printers who receive them.

The most beautiful and novel paper advertisement lately received is the booklet of twice-folded cover-stock entitled "The Rainbow and the Pot of Gold," issued by Alling & Cory, Rochester, N. Y. The inner leaves consist of cover-stock of many colors so cut and graded as to represent the "triumphal arch which fill'st the sky when storms prepare to part," to use the poet Campbell's definition. At the ends of the rainbow are pictures of pots embossed in gold. The design is so handsome that any collector of high-class advertising matter would be proud to own it. And the wording in the panel beneath the rainbow is so clever in its connection that I give it as a fine specimen of ad-writing of the more poetic kind:

> Once upon a time there lived a printer who had heard, when a little boy, of the pots of gold beneath the ends of every rainbow. One day he beheld a rainbow of surpassing beauty and bethought him of the legend of his childhood, saying, "surely *this* rainbow should lead me to a goodly pot of golden coin."
>
> And so following always in the lead of the beautiful rainbow he day by day found a golden coin, and in time reached the end and saw that the coins which had come to him were now indeed a veritable "pot of gold."
>
> Whereupon he "married the beautiful Princess and lived happily ever after."

The Scarff & O'Connor Co., of Dallas, Tex., are particularly careful that the excellent stationery they send out shall be harmonious with type composition. And so they search for good compositors like the writer of this letter:

Time and Tide Wait for No Man

Everything That's Good in Paper

DALLAS, TEXAS.

Harry A. Woodworth, Toronto, Canada.

DEAR SIR:—Having been absent from your department of the N. P.-J. for some time on account of not working at the trade, I am sending you by this mail a few samples of my latest efforts, believing that they will come under your department.

Should any of the jobs merit reproduction, I hope the planer proofs will serve the purpose.

Thanking you in advance for anything you may have to say about them—for I know they will receive your honest opinion, be that favorable or unfavorable, I am,

Yours truly, W. F. MELTON.

Harry A. Woodworth, Toronto, Canada.

DEAR SIR:—Your review of my January and February blotters was so very kind and encouraging that I make bold to send you those for March and April, hoping that they will please you. Of course, the same difficulty had to be contended with in the lack of material in making these, that confronted me in producing the others. The tints on these blotters were made from a piece of patent leather that cost me a nickel at a local harness shop. The pictures used were picked up around the shop, and the rules used in composing the calendars and borders were all taken from the scrap-box and cut and mitred for the job. No labor-saving rule was used. While I cut as little rule as possible, yet I always have a few strips on hand, as I have found that where you are expected to do panel work with good corners, it is absolutely necessary to do a little cutting. Thanking you for the commendation you gave my previous work, I submit these with the assurance that I shall appreciate whatever criticism you may make.

Yours very truly, JACK EVANS.
PORTAGE, WIS.

The patent-leather tint idea is not an original idea with Mr. Evans—that is, it has been employed before, and has also been used in a country office in the manufacture of cuts. I can't say I like one of the pictures which was "picked up around the shop"—the one on the March blotter. The horse is too much of a bucking broncho and the man has too much of a jag on, to be "in the race to win." The tint is a buff, and the picture and the rules which border it are brown, as are the Sunday figures and the words "March." The surrounding rules are red, and the balance is purple. It is an admirably composed blotter, and is certainly away-from-the-ordinary. And so, for that matter, is the calendar blotter. The tint-block is printed in something stronger than a "tint"—a bright yellow. The line "Don't 'Hoodoo' Business," the word "April," and the rules below "Fine Printers," are in a

red, as is the border to the picture. The surrounding border is brown, and the rest of the job is black. Evidently the black involved two printings, because of the cut-off of the calendar. The workmanship necessary to compose the calendar and superimposing panel without ruining the type or having an electro made is certainly creditable. And that Mr. Evans is an artist as well as a mechanic (Oh; excellent combination!) is evident. The envelope in which the April blotter comes is "O. K." The words "Fourth Month" you'd think it came from Pennsylvania), the word "Calendar-Blotter," and the rule above Mr Evans' name and title are red; the rest is black. The utility of this calendar is partially sacrificed to art, perhaps; but the artistic and useful are not always combined, anyhow.

The George H. Ellis Co., of Boston, Mass., are high-grade printers with a refinement about their work which is remarkable, even in Boston. I have long been familiar with their work, especially that upon the wonderfully-printed magazine *Photo Era,* but this is the first time they have sent specimens of their printing to this department.

1a

The month-calendar shown (No. 1a) is of three different shades of brown, with the type printed in white. A white slip contains an etching appropriate to the month (the May calendar having a picture of a little Queen o' the May). This is on a slip of dark brown cover-stock, which is in turn pasted on a card with a light brown facing. I don't know why there is a perforation made above the type-panel, unless it be to give the appearance of a yearly calendar, which should not be necessary. The other side of the calendar always contains a novelly-composed advertisement, such as No. 1b. The border, and the word "Printers" and "Law Printing" are in a rich dark brown; the balance is brown of a light shade.

BOSTON

1b

Now it might not be thought good advertising to give a calendar with no advertisement on the side which is not turned against the wall. But this is from Boston; and this card will doubtless be found in many a Beacon Hill and Back Bay drawing-room while it would not otherwise have been allowed to enter there. Yet I think many a proud Bostonian would be likely to say, when the calendar is admired, "You wouldn't think it was an advertisement, would you? But it is—one of a printer." And the card would be turned round. And I think that anyway the recipient of the card would remember the name, even though it were a less-known one in Boston than that of Mr. Ellis.

"Length" is, if I remember aright, one of the elements of beauty Edmund Burke laid down in his Essay on the Sublime and Beautiful. He had the same idea as Tennyson when he speaks of

> "A daughter of the gods, divinely tall
> And most divinely fair."

The idea is now being carried into type-composition, as is evident from three pieces of printed matter just received.

The first is a booklet from Corday & Gross, Cleveland, O., on white Strathmore Japan throughout, and a little over a foot long, which is called "Eternal Fitness." At the top of the title page is a fine halftone, on stock that is possibly pebbled after printing, of a pretty young lady in a snowstorm. Possibly it is the idea of the publishers that the eternal feminine is always eternally fitting, wherever it is worked in. The two middle pages are reproduced together as No. 2a, showing the irregularity of the length of their composition. The white silk cord in the center fits the stock exactly. The paragraph-marks are green, the rest is black. The metaphor of the mouse-trap is referred to on the following page; that being, of course, a reference to one of Emerson's essays. The idea of the asterisks is somewhat different from the ordinary footnote procedure. There are fairly large margins at the top and bottom of the page, the lower being the larger.

The envelope in which the booklet comes is also of Strathmore Japan, and is peculiar because of the arrangement of the cut, made to contain the address. It is to the extreme left of the oblong envelope, and is, of course, printed lengthwise of the envelope. There is consequently a vast stretch of blank space between it and the stamp. The design of the overturned waste-paper basket, in connection with the words, "Anti-Waste Basket Printers," has considerable force.

The second job (which was the first to arrive, and is more elaborate, though fully as tasteful, as the first) is from that other shop which pays such splendid attention to every detail of its work, the Pirsch Press of Dayton, O. This is a folder-booklet, 12½ inches long, there being three folds of a light brown cover-stock, contained in a darker-brown. I forget the exact names of these stocks, as I have not my wall-hanging book of the Niagara Paper Company before me, and it hangs but loosely on Memory's wall. On the flap and on the back of what may be termed the second page, are two strong Pirsch sentences, enclosed in small panels. Pages 1 and 2 are reproduced as No. 2b. It will be understood that there's a flap, blank on this side, and 2⅝ inches wide, to the left of the first page, the cover extending beyond it about an inch. A yellow silk cord, attached to the fold of the flap, binds the brochure. The uneven lengths of the composition of the "talk" may be compared with the Corday & Gross job. The shorter text is here on the left-hand side, but the name and address, repeated, are here placed side by side on the bottom of the pages. The titles, sub-titles, paragraph-marks and rule are in orange; the balance is brown. The cover-design has the title, "Again we move—now on the ground floor," and a new but characteristic arrangement of double "P" marks, etc., running across both cover pages. The envelope which is of the cover's cover-stock and printed in brown and green, is, of course, in perfect harmony with the enclosure. Did you ever see a job of the Pirsch Press—and likewise of Corday & Gross—where this was not so? I never did. The address is written—in *brown* ink this time—in Mr. Pirsch's neat hand. It is an oft-used idea of Mr. Pirsch's—not to forget to have even the writing-ink harmonious.

As to the wording of both these jobs, it will be found to be good.

The third example of long composition is from Edward Courtright, with the *Mirror* Press, Oxford Junction, Iowa. This is a slip folder on drab cover-stock, of which the title page is half the size of the inner side when opened out. The full length of the slip is 12 inches, and the composition reproduced (No. 2c) is 9⅛ inches long. This composition has wider margins than those of the other jobs.

Eternal Fitness

¶ *What is result-bringing ability?**

¶ Every tradesman says: My mouse trap is of merit—strong, well designed for its purpose, durable; therefore economical, tho' it costs a trifle more.

¶ But he who is smart enough to make his good trap known thro' printed matter that's equally good—he *suggests goodness* by that very act; he's smart enough to use good argument, too.

¶ The quality of printing is a large part of the argument—if *that* is good, the argument most times convinces.

¶ **Conviction is result-bringing ability.*

Strong claims made thro' a weak, cheap medium—imagine the *un*fitness. Is your printing as good as your claim for your product?

To make you a good booklet, we solicit necessary detail information about your product. That equips us for a sensible, convincing talk to a likely buyer—the talk of a good salesman—studied from the buyer's side.

Eternal Fitness

¶ If you feel sure *your* printing-advertising is as good as your product, and you are distributing as broadly of the former as is deserved by the latter, that's the eternal fitness of things.

"Printing-Advertising" properly covers all stationery and every form of printed bid for business that carries your name. It is *all* tell-tale of the sender's *character* and the character of his product.

¶ What do *you* do with printing-advertising that don't impress you favorably? Think of the tons on tons of it that get back to blank paper by the paper-rags route, failing of a favorable audience because *lacking fitness* to its purpose.

2a

I might as well give the outer design (No. 2d), which is black all but the coat of the missionary. The envelope shows the same man again, but here its use is hardly consistent, though the wording in connection is clever:

> Be not a laggard, but let your search be diligent, that you may find the one whose address is writ hereon. If after many days, you fail, retrace your steps to the Oxford *Mirror* which is in Oxford Junction, Iowa.

The folder shows how Mr. Courtright utilizes what he reads in the NATIONAL PRINTER-JOURNALIST. In this connection his letter will be of interest. The opening part refers to a job reproduced in these columns lately, which, I regretted, the engraver could not entirely reproduce:

OXFORD JUNCTION, IOWA.

Harry A. Woodworth, Toronto, Canada.

MY DEAR MR. WOODWORTH:—Thank you for the notice of my card. "The answer" was: I was striving to combine the old-style of composition with a broad idea of the modern panel-effect. You guessed the interrogation-mark, which was put in as a question to myself.

I am sending you some advertising which we are circulating in five towns from which we have never had any work. We are covering the territory with one piece of advertising fortnightly, and after six

have been sent, Mr. Kenney is going into that field for work. We then feel that we will be able to trace the results of these efforts directly, I shall be pleased to tell you what it accomplishes for us if you care to hear.

I write "us" and "we" from habit, I guess, through writing and setting advertising matter for the *Mirror* Press. The fact is, I am merely working on a salary for Mr. Kenney.

Sincerely yours, EDWARD COURTRIGHT.
OLALLA, WASH.

Result of Growth

Why We Move

¶ The increasing demand for the best printing—the PIRSCH PRESS kind—has compelled us again to seek larger and more convenient quarters. This result we have thrice attained during the five years of our business existence, and as we continue to grow we shall, of course, continue to move.

Cost and Results

¶ Business men are realizing more and more the great value of having their office stationery and advertising matter as high class as it is possible to make it, and that the few dollars of additional cost is overshadowed by the better results obtained.

Why we Get the Business

¶ No other firm in Dayton is doing the sort of work that we do; nobody else is giving their minds to it as we are; and nobody else has had the training for it that we have had.

Larger Quarters

Where "We're At"

¶ After May first, 1905, we will be located in the commodious brick building on the east side of Ludlow Street, just south of Fifth—No. 210—on the ground floor. You'll have no trouble in finding us—and when you do you'll be glad of it. There's nothing obscure about the fine, new location any more than there is about Pirsch Press printing.

Work will be the best ever

¶ Pirsch Press printing will ever be what it has been—the *best* printing printed; just the sort progressive business people admire having come to their desks.

We Appreciate Appreciation

¶ As high-class printers, we are naturally interested in the success of our product, & when our patrons use it and find it satisfactory we want to assure them that we are gratified to have their good will, and will continue to prove ourselves worthy of it; and we want to assure you of our appreciation of your appreciation.

Certainly, I "care to hear," Mr. Courtright, and so, I am sure, will we all. You needn't apologize for the use of "us" and "we;" I've found that a man working on a salary is seldom much good to the business until he gets the habit of speaking in that manner when the business is concerned.

Yes, I want to see how a traveling man works in connection with advertising in your particular case. As to your other samples—they'll have consideration later.

The *Briarcliff Outlook,* that periodical which is instinct with three brands of individuality—the Briarcliff Manor kind, the Cheltenham variety and the Charles L. Powers product—comes to hand each month with pleasing regularity. And each month it is better and breezier. Here (No. 3) is one of the pages of a late issue. It shows a somewhat out-of-the-ordinary use of the Ideal Page Ornaments. It also furnishes another quotation from John Ruskin which is appropriate to a journal of the aims and scope of the NATIONAL PRINTER-JOURNALIST. I noted with pleasure that a selection from the works of the great art-philosopher given in this department lately found its way soon after into many pieces of printing-advertising. Things have improved somewhat as to the conditions of which Ruskin speaks on this page; but there is field for further improvement.

TESTING THE VALUE OF Advertising

The following is from the National Printer-Journalist, than which there is no better authority on good advertising.

¶ A firm which has made Babbitt metal, hitherto always sold by traveling men, was induced to try a mail series. To make the test thorough, a state in which they had no trade whatever was selected. To a list of prospective customers they sent a series of printed matter, one piece a week for thirteen weeks. Then they sent a bright young man to travel this territory. Order after order was sent in, and finally a request for a year's contract at an advanced salary. He got it. When he arrived at the home office he was the hero of the hour. He sat beside the old man's desk and explained how he did it. When the man who put up the money for the mail service ventured to suggest that that might have had something to do with the results, the drummer airily turned the suggestion down. He had sold the goods. The mail series had not been heard from.

¶ The company, realizing that they had a treasure, gave him a virgin territory in another state. Never a drummer and never a single piece of printed matter had gone to that state. The young drummer started out with flying colors—and fell down at the first stop. After trying six or seven towns, without getting even an audience with his prospective customers, to say nothing of an order, he was called home.

Advertising paid them. Wouldn't it pay you? We think it would, and should be pleased to figure with you if you want to test its merits. Think it over.

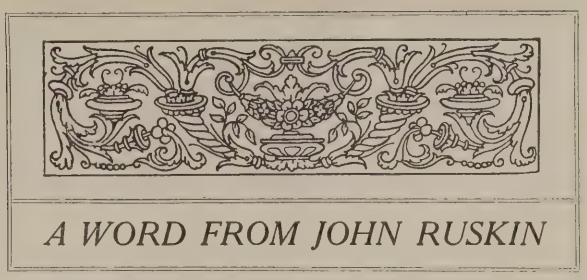
issued weekly in ye towne of Ox ford Junction, State of Iowa, U.S.A.

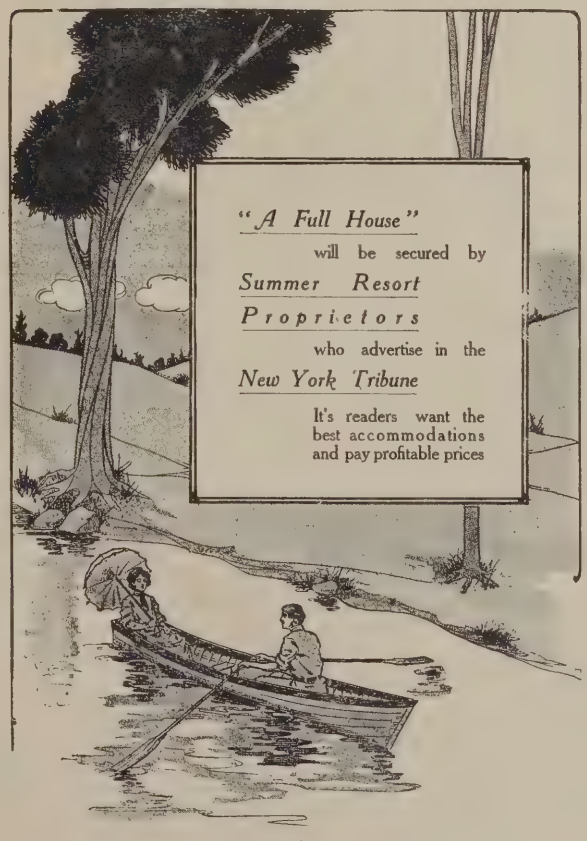
2d

Several artistic (and distinctively so) specimens of advertising come from Mr. Powers this month, of which one, the booklet called "A Full House," is especially worthy of note, not only because it is artistic, but also because it is an advertisement of that great newspaper, the New York *Tribune*. There is such good printing done in the highways and byways in these days when city and country are linked together with so many subtle ties, that it need not be surprising, though it be noteworthy, to see a metropolitan newspaper patronize a print-shop in the country. The cover is art-nouveau which is particularly artistic and especially nouveau. The "full house" represented is not that of the old lady who lived in a shoe, nor yet the one on which, in our poker-playing days, we were wont to wager our wealth. It is a fine halftone illustration in two colors, representing a very full basket of puppies. The title is even more appropriate to the contents of the brochure, which are intended to show country folk how they can fill their houses in the good old summer-time—a time which is ever new in its possibilities for recreation and re-creation. I consider that the style of illustration employed in this booklet is modern enough to justify the reproduction of two of its pages. (Nos. 4a and b). There are only two colors in this picture—brown and green, and the stock is of a very delicate shade of the latter color. But the contrasts made by the machine tooling on both the brown and the green plates, and the strong coloring of prominent parts of the figures and foliage, besides the lighting of the picture by skillfully arranged patches of white, give an effect that is superior to that of most halftones from wash drawings. The larger masses of foliage, which remind one of some of the conventional designs of



WE are always in these days endeavoring to separate intellect and manual labor; we want one man to be always thinking, and another to be always working, and we call one a gentleman, and the other an operative; whereas the workman ought always to be thinking, and the thinker often to be working, and both should be gentlemen in the best sense. As it is, we make both ungentle, the one envying, the other despising his brother; and the mass of society is made up of morbid thinkers and miserable workers.

3



4a

Will Bradley, will lose most of their outlines by being reproduced in line, as they are in two colors. But I should like to see line reproductions made of these, in order to give an idea of the whiting-out of the design. It does not seem as if Mr. Powers was as happy as usual in his composition of the type in No. 4a. There's too much white, and too much variety in the spacing. It's strange that the possessive pronoun "its," should be spelled with an apostrophe in so much of the work of good printers and writers.

THE TRIBUNE
New York

4b

One page of the booklet gives "Specimen illustrations set in *Tribune* Type," and another page, which is illustrated by a very conventional flower-pot design, is in reality a full-page ad for the Briarcliff Print-Shop, as its imprint is prominent, and there's no other wording on the page. But the whole book is an advertisement of good designing and printing as well as of the good advertising space which the *Tribune* has for sale.

This (No. 5) is the reproduction of a card on dark green stock with the word "Printers" in red, and the rest in light green. I hope the compositor or stone mason will

5

indicate the margin of the card, as that seems to be part of the intention of the gentleman who sent me the black-and-white proof. It is certainly composed in a unique style, and yet it cannot be classed as "freakish."

This (No. 6) is a letterhead which is pleasingly whited out. It has a half-inch margin from the extreme top, and a

6

three-quarters of an inch from the extreme sides, of the design. The stock is white linen bond. The text is in black, and the border is in a rose lake—a red that particularly harmonizes with black and white.

The mailing card shown as No. 7 was sent me in 1903. It is still modern. It is still individual. All of which shows that age does not wither, nor custom stale the use of a modern series of type and a distinctive style which is capable of infinite variety. The card was not reproduced before for two reasons. One was my fault: I knew that the combination of orange and green and black, where the colors ran together, would not reproduce well. So I tooled the job to some extent; but all the tool I had to do it with that night was a pin. So due allowance should be given for the poor fist I made of the preparation for engraving. The other reason was the fault of someone else: When the card came, it had a fold in the center, which broke the surface in a distressing manner, and will also probably militate against a good reproduction. And yet the work is so striking, the wording so good, that, with these apologies, I have decided to show it to my readers. I used to receive several samples from the Griffiths-Stillings Press with pleasing regularity, but I expect that upon leaving New York some of their contributions must have been returned to them by the postoffice or somebody who did not care to put up the postage required for forwarding them. However, I have seen some of the late work this eminent print-shop have done for others. And it shows them to be masters of both art and advertising.

Thomas E. Abbott, foreman of the Watsonville (Cal.) *Register,* sends some more work to this "More Work" department. The best of it is probably unreproducible, if, to change the diction of Omar Khayyam, the day be *not* fair. But let the engravers have a try at this oblong dark blue card, printed in purple ink, all but the outer panel-rules (No. 8a). If they "pass," all right, though it is certainly unique, and a good specimen of an even distribution of what might still be technically called "white," though it be blue. They can also try No. 8b, though this has not the *Register* quality exemplified on some of the work of which no engravers can give an idea. The stock of this blotter is a salmon-pink, and the border is in a gray-green tint. The halftone is in photo-brown, and the rest in dark green. The picture of the lofty monarchs of the forest gives a pleasing local touch, but its advertising value might have been increased by working some simile or metaphor concerning the trees into the text. I cannot see any use for the panel which is made by rules which do not match perfectly. A blank panel or so may have a supplementary decorative value in a bepanelled job, but it looks as though it were merely here because there was a paucity of words with which to fill out the space, once the composition was begun in 6-point. I should have preferred a blank space; this is blankety-blank. The envelope, with its lines of reading mat-

te- above which (and over which, in this case) the address is written, is a particularly noteworthy bit of publicity.

[No. 8a can not be reproduced.]

I was certainly surprised at getting such a letter as the following from the publisher of that "different" magazinelet known as *Soundview:*

Harry A. Woodworth, Toronto, Canada.

DEAR MR. WOODWORTH:—Permit me to personally thank you for your very clever, candid and capable notice of our work, which appeared in the April number of the PRINTER-JOURNALIST. Allow me to further add that *never* has any individual so quickly, thoroughly, and, *might I say,* LOVINGLY, comprehended *Soundview* and its mission, and so crisply and clearly expressed his findings on such brief testimony as has Harry A. Woodworth.

To sum it up, you have *understood!* You are unmistakably entitled to Evergreen papers, and you have been recommended for admission to the "Green Book," and I have not the least doubt but that "The Boss E." will not reject you. The Boy was delighted with your reference to him and his future, and *his face fairly beamed* when I read your complimentary sentences. You will never regret such generous praise, I am sure, for you will always have a loyal lover. I believe he has enough ballast so that praise will not injure him, but will really stimulate to more earnest endeavor in his beloved work. He has deserted all other literature for the study of the type.

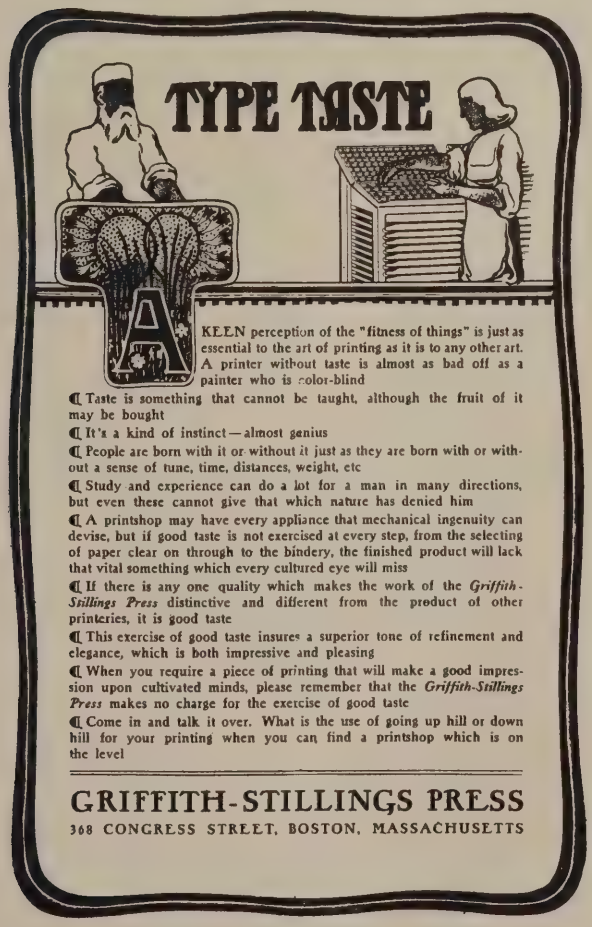
The April number goes to you by this mail. We think it is an improvement on previous issues, especially the first page of cover. I also enclose our "delinquent pusher, or persuader," thinking you might be interested in this further evidence of "cheerful foolishness." We think it beats any other plan we have yet adopted to curry favor with the slow-paying subscribers.

Please observe, also, the change in our letterheads and envelopes, which we like better than the old style.

Kindly excuse this long letter, but when I like a man's work, I like to *express* as well as *feel* appreciation.

Again thanking you, I remain,

Yours cordially and gratefully, L. E. RADER.



TYPE TASTE
A
KEEN perception of the "fitness of things" is just as essential to the art of printing as it is to any other art. A printer without taste is almost as bad off as a painter who is color-blind
¶ Taste is something that cannot be taught, although the fruit of it may be bought
¶ It's a kind of instinct—almost genius
¶ People are born with it or without it just as they are born with or without a sense of tune, time, distances, weight, etc
¶ Study and experience can do a lot for a man in many directions, but even these cannot give that which nature has denied him
¶ A printshop may have every appliance that mechanical ingenuity can devise, but if good taste is not exercised at every step, from the selecting of paper clear on through to the bindery, the finished product will lack that vital something which every cultured eye will miss
¶ If there is any one quality which makes the work of the Griffith-Stillings Press distinctive and different from the product of other printeries, it is good taste
¶ This exercise of good taste insures a superior tone of refinement and elegance, which is both impressive and pleasing
¶ When you require a piece of printing that will make a good impression upon cultivated minds, please remember that the Griffith-Stillings Press makes no charge for the exercise of good taste
¶ Come in and talk it over. What is the use of going up hill or down hill for your printing when you can find a printshop which is on the level

I was surprised at getting this letter, for I had said just what I thought about Master Rader's work, and while some of what I said was complimentary—and honestly so—some of it was not—likewise honestly so. I remember that, while felicitating this remarkable young man on the excellence of some of his work, I showed defects in some of the rest of it. That whole-souled man and able editor, L. E. Rader, thanks me effusively for the complimentary mention, but neglects entirely to thank me for my adverse criticism. I should really have preferred less thanks for the praise I could not help but bestow, provided it were combined with an appreciation of my efforts to point out the faults of the work. My endeavor in this line has apparently been overlooked

both by Mr. Rader and his son. For instance—in both the April and the May numbers of *Soundview,* the heading of "Flower Girl Foolosophy," which I criticised adversely, remains as it was before. In fact, in the May number (the only issue of *Soundview* which I have before me while I write) the "dinky" ornaments are not only at the side of the heading design, in green, but above it, in black. And in a magazine whose matter is changed every month there appears to have been ample time to have improved the design. Now, many a criticism I make in this department is, as I have pointed out many a time, despite my experience, merely "a matter of opinion." In my critiques of the work of beginners, I am always careful to mention where this is so.

A LOUD CRY. [Act I. Time, 1795.]

MANY of our customers will find that we have taken the liberty of forwarding to them the amounts of their several accounts. The great expenses attending the business, in addition to the extraordinary expenses of labor and living, must make everyone sensible of the necessity of payments being seasonably made. The editors therefore presume that their customers will attend to this weighty circumstance immediately.—From "The Independent Chronicle and Universal Advertiser," publisht in the year 1795, in the town of Boston, which is in the Commonwealth of Massachusetts—all of which is just as applicable now as then.

(OVER)

9

But concerning my remarks about the "Flower Foolosophy" headline, I have studied designing sufficiently to say positively that they are right. But no change was made in them, as has been made by many expert printers on ideas of mine which were possibly no more nearly right than their own. I am not, however, so egotistic as not to welcome expressions from them of reasons why their idea as to "a matter of opinion" is better than my own. I don't want to be misunderstood and classed as a think-he-knows-it-all; but an honest teacher who gives advice he knows to be axiomatic would find the satisfaction of having it followed greater than that which naturally arises from having his cordial praise appreciated. And Mr. Rader, whose writing in *Soundview,* and whose remarks concerning his son, show me to be a sensible man in spite of the "cheerfully foolish" form in which he dispenses his wisdom, will, I am sure, see the force of what I have said as a teacher of aspiring and promising youth, as well as of men who have forgotten more about some things than I have ever known.

I greatly prefer the change in the cover, Mr. Rader, and the pine-tree on the letterhead removed a certain bareness that was there before. The inner title of the magazine is, too, as printed over an evergreen tree, with plenty of sky-space, particularly tasteful.

One side of the "delinquent pusher" is shown as No 9. It is remarkable—and pleasingly so—in its distribution of color—the heading, the initial, and the whole of the "credit," being in red, and the balance, including the word "Over," in green. It is a quaint, and yet dignified, appeal for a settlement of outstanding indebtedness, and would doubtless be found useful by other readers of the NATIONAL PRINTER-JOURNALIST in this most important feature of their business.

The other side contains what is termed "A Horse Howl [Act. II, 110 years later]." It is a poem of the "cheerfully foolish" order with several postscripts in red. Some of it is decidedly clever—the rest of it appears to me to be lacking in a certain dignity that should always mingle with the fun of the advertisement of a publication with so many serious purposes as *Soundview.* And, mind you! I agree with Haliburton, who said: "There's nothing like fun, is there? I never had any myself, but I do like it in others. Oh, we need it! We need all the counterweights we can muster, in order to balance the sad relations of life. God has made sunny spots in the heart—why should we exclude the light from them?" And that's one thing I like about *Soundview* —the fun that tempers its wisdom.

Mr. Rader will, I know, not be offended with these strictures. I say what I think in this department, and pretend not to care if anyone is hurt by it. I think that is also the case with Mr. Rader in *Soundview.* But I am sure we each write from a friendly motive, without the desire to wound a brother's feelings in the slightest degree, unless by doing so we can help him in a way that he may appreciate in future days. I sincerely thank Mr. Rader for using his influence in my behalf with the Boss Evergreen. And as to the younger Rader—I'd like to know his name, and I wish he would write me personally, for I am especially interested in boys and their work.

IN COMPANY WITH ONE OF HIS POETICAL EFFUSIONS.

James Stewart Henderson, the newly-elected poet of the Texas Press Association, hails from the popular seaside resort on the Gulf shore, Corpus Christi. He has written much widely-quoted verse and considerable merit occasionally

J. S. HENDERSON,

Poet of Texas Press Association. Corpus Christi, Texas

shows in his songs. They are grave or gay as the occasion warrants. His first official effusion was pencilled on a card at the banquet to the editors given in San Angelo, Tom Green County, and was as follows:

It's so healthy up here in Tom Green
That none of the women are leen;
If they'd go to Corpus
To swim like a porpus
'Twould make a most beautiful sceen.

Through Oklahoma, Indian Tertitory and Texas.

NEXT to a knowledge of the calling in all its bearings, to a newspaper man, is that of his country. This is doubly true in free America with government of the people with a great undeveloped area of territory and of resources.

For these and other reasons, the members of the National Editorial Association have ever found the travel connected with each annual convention vastly useful to themselves, informing and valuable to their readers, and serviceable, through the knowledge scattered broadcast throughout the Nation, to the regions visited. It is already evident that in all these particulars, the excursion in connection with the 1905 convention at Guthrie, Okla., has never been surpassed. It is gratifying, through the extended accounts that have been and are still being given in the papers of the members in every State of the Union, to see how many useful facts were gathered.

All that this paper set forth in the issue of last March, after a careful study during a visit of several days, was fully established and was impressed by actually seeing, inquiring, and hearing, and much more. The development and resources, the broad hospitality, wealth and intelligence of the people, the splendid homes, schools, churches, and other institutions, all built within periods covering from only three to sixteen years, were matters of surprise. Not only did the editors see for themselves under the most advantageous circumstances, but they were told, by able and eloquent speakers in every city visited, of all the glorious achievements and possibilities.

The subject of Statehood was ever kept prominent, and the editors were thoroughly convinced that not only is this a right, that has been unreasonably withheld, but a necessity to good government and progress. It was made evident that an intelligent people can only be properly governed when they govern themselves, and that the people of no State of the Union excel in intelligence, in knowledge, refinement, virtue, morals, and religion, or in institutions, schools, and newspapers, for the instruction of the youth and the information of the people, the two territories of Oklahoma and Indian Territory. In face of all these facts, they are deprived of free self-government and in the Indian Territory, so-called, there is not even a territorial government. The Six Nations each have had separate governments and customs and now in the present transition state there is such a confusion of laws, that a splendid field is open for imposition and wrong. There is such uncertainty that the lawyers are reaping a great harvest from the people. In one little city of some fifteen thousand inhabitants, in the Indian Territory, there are one hundred and twenty-five lawyers, some of them making as high as forty thousand dollars a year. Only about sixteen or nineteen per cent of the inhabintants are Indians, and many of these are highly educated, bright, thrifty business men who are abundantly able to take care of themselves and to take part in the establishing and maintaining good government. There are some three hundred United States officials and probably double as many lawyers, besides speculators and tricksters, who are interested in maintaining present conditions, but the great mass of honest, intelligent people, who really have at heart the interests of the Territory and the securing the rights of the people are in favor of statehood as one state with Oklahoma. It matters not how wise, brave and honorable may be the Secretary of the Interior and the President of the United States—whose noble integrity and true patriotism, no one doubts—it is impossible to give these people, under existing status, a just and righteous government. The authorities at Washington have to depend on the information of interested, selfish persons whose positions or gains depend on the continuance of the present chaotic lack of settled laws; we were going to write "regime," but regime means "mode or style of rule or management," and there is no established mode or style to the present conglomerated conditions. All largely depends on the intelligence and virtue of the people. We have, heretofore, told at such length of this region, that we have decided to call in another, one of the ablest and most broadly-informed editors of Iowa—the Massachusetts of the West in learning and intelligence—to tell the story for the benefit of the editors of the United States as he has told it to his own subscribers and readers. The article, by A. W. Lee, is a vindication of all that we published, and appeared in the Ottumwa, Iowa, *Daily Courier*, June 24th, as follows:

There is no more interesting trip in America today nor one that is filled with greater surprises than a visit to Oklahoma, Indian Territory and the Great Southwest. The lack of real information about these sections on the part of intelligent people living in the older communities is so complete as to be almost ridiculous. For over fifty years people of the United States have thought of the Indian Territory as the hunting ground of wild and ferocious Indians, and for the past fifteen years, since land in Oklahoma was first opened to settlement, they have thought of Oklahoma as the frontier of civilization where Indians, cowboys and the hardy and intrepid pioneer were engaged in a three-cornered struggle, which might result in a state of civilization in the somewhat distant future. While it is true that fifty years ago there were wild and ferocious bands of Indians in the Indian Territory, and while it is also true that less than sixteen years ago, what is now known as Oklahoma, was open prairie or broken woodland, unsettled and known only to the Indian and cowboy, yet the mighty transformation that has been accomplished in fifteen years has developed in this region, civilization equal to the best in the United States; nowhere in the United States today is to be found a more progressive people, a higher class of citizenship or proportionately more Christian civilization than in Oklahoma and Indian Territory. Oklahoma comprises an area of 39,030 square miles and

Indian Territory 31,400 square miles, making an aggregate for the two territories of 70,430 square miles. The area of the State of Iowa is 56,025 square miles; Illinois 56,650 square miles and Indiana 36,350 square miles.

As compared with some of the old Eastern States, it is interesting to note that the area of Delaware is 2,050 square miles; Connecticut 4,990 square miles; Vermont 9,505 square miles; Pennsylvania 45,215 square miles and the Empire State of New York, 49,170 square miles. It will thus be seen that Oklahoma and Indian Territory are each amply large enough for individual states, but the preponderance of sentiment throughout the two territories is in favor of the admission of the two as one state, under the name of Oklahoma. It needs but a glance at conditions as they actually exist, with a realization of the extent of the population and the material development of these territories to say that they are entitled to immediate statehood on their own merits without reference to any other territory, section or people. Congress should no longer refrain from doing justice to the people of Oklahoma and Indian Territory. To make statehood for these people dependent upon the admission of Arizona and New Mexico is an outrage, which the people's representatives in Congress should no longer countenance or stand for. The most reliable estimates are that there are today 1,500,000 people in Oklahoma and Indian Territory. Of this number less than 5 per cent are Indians. This is a surprising fact and difficult for the resident of the north and east to realize. If we take the exact figures of the United States census in 1900, there were in Oklahoma, 398,331 persons of which only 11,945 were Indians. In the Indian Territory there were 392,060 persons of which 52,500 were Indians. The United States census figures show that in 1900 there were in Oklahoma and Indian Territory from 100,000 to 400,000 more people than there were at that time in either of the states of Maine, Colorado, Florida, Washington, Rhode Island, Oregon, New Hampshire or South Dakota. Since 1900 the population of these territories has practically doubled. How are these people governed? The people of Oklahoma are first governed by Congress, a body in which the territory has no representation save one delegate without power to vote. They have nothing to say as to the appointment of their own governor. By the grace of Congress they are permitted to elect their own legislature, but of sovereign rights they have none.

In Indian Territory there is no governor, no legislature, only the President and his secretary of interior and the federal judges. The people have no representation, no local law making body, no voice in their own government. Is it any wonder that the people of these territories are demanding their constitutional right of a republican form of government? Is it any wonder that they believe that they ought to have their case presented on its own merits, without any entangling alliance? Self-government is one of the things most highly cherished by every liberty-loving American citizen. The people of Oklahoma are entitled to statehood and Congress should give it to them at the earliest possible moment.

THE OPENING OF OKLAHOMA.

The opening of Oklahoma is one of the romances of American history. When time shall have thrown the past into perspective, the historic figure of early Oklahoma will be David Lewis Payne, who was the first "Oklahoma boomer," and the chief factor in the movement which resulted in setting aside Oklahoma from the Indian Territory. On April 22, 1889, two million acres of land lying a little west and north of the center of the Indian Territory, which had never been assigned to any Indian tribe, and which was known as Oklahoma, was opened to white settlement. Here, starting at the hour of 12 o'clock, noon on the 22nd day of April, 1889, occurred the first great rush for land and race for homes, and the entire section that had been thrown open to settlers, was settled up in a day. Cities of 10,000 or more population sprang up between dawn and dusk of that memorable day. For a year the people lived practically without law, but there was little disorder or lawlessness and little danger to life or property. On June 6, 1890, Oklahoma was created a territory by act of Congress. Other lands have been added by opening of Indian reservations or otherwise, until the present settled area of the present territory is 38,000 square miles. The growth, progress and advancement of Oklahoma in sixteen years has never been equaled in the history of the world and probably never will be eclipsed. With the coming of statehood, Oklahoma will absorb the balance of the Indian Territory and it will be, from the day it is admitted, one of the richest, most prosperous and progressive states in the Union.

The rush for free homes which was a feature of the opening of Oklahoma and which was supposed by many to be a great hardship, is spoken of today as one of the best things that ever happened to that territory. It eliminated the weak, the helpless and the unproductive person. It gave the prize of a free home to the strong, the vigorous and the actual producer. It was preëminently a case of the survival of the fittest, where the strongest won. The result was that the lands of Oklahoma were immediately possessed, and occupied by a vigorous class of actual farmers, who have made the wilderness blossom as the rose and who have been the chief factors in the marvelously-rapid development of this part of the country.

THE INDIANS.

One of the surprising revelations to the visitor in Oklahoma and Indian Territory is with reference to the Indians. The percentage of Indian population is so small in comparison to the total population and the financial and physical condition of the Indian is so different from the generally-accepted idea prevailing through the country, that these same ideas must be entirely overhauled and revised after a visit to the two territories referred to. The United States census of 1900 shows that there were in the United States at that time a total of 266,760 Indians. Of these, 52,500 resided in the Indian Territory and 11,945 in Oklahoma Territory. For a number of years it has been recognized that the true solution of the Indian problem must come through the allotment of lands, citizenship, the dissolving of tribal relations and the cutting off of government rations. In Oklahoma this work has been practically completed and it is interesting to note that those Indians whose lands have been allotted are distinctly in advance of those still holding land in common. In 1898, the Dawes commission was created by Congress to allot the land in the Indian Territory to the Indians, each man, woman and child to have an equal share not in area but of value. The task has been a very difficult one, but is now nearly completed. The amount of land realized by each Indian varied in the different tribes, ranging from forty acres up to 960. The Osage Indians, which in 1900 numbered 1,798 are not only the richest Indians but they are per capita the richest people in the world and the governor of Oklahoma in a report to the secretary of the interior, made in 1900, declares that they are also the laziest people in the world. Nowhere it is said are children better cared for than the papooses in Indian Territory, for each little Indian baby is worth at least forty acres of good land. Many of the Indians are highly educated, being graduates from the government schools and many of them, especially the half-breeds, live not only in comfort, but in the height of style, dressing as well as the best dressed whites and driving fine equipages. "Lo, the poor Indian," is today the non-producing idle landlord class of the southwest. It is right that he should be protected from his own shiftlessness in not being permitted to sell his homestead, but so far as possible other restrictions upon the sale to actual settlers of Indian lands should be removed.

AN EDITORIAL ITINERARY.

It was a jolly party of newspaper men and their families that rendezvoused at the Terminal Hotel in St. Louis on the 6th of June. There were some 500 in the party and in two special trains of Pullman coaches, they left the Union station at 1:30 p. m., for a trip over the Missouri, Kansas & Texas railway lines through Oklahoma and the Indian Territory to San Antonio, Texas. The party was in charge of Passenger Agent Knowles of the M. K. & T. line, who spared no effort that would add to the comfort and pleasure of the editorial party. The next afternoon the special trains pulled into Guthrie, the capital city of Oklahoma, where the annual convention of the National Editorial Association was held on June 7, 8 and 9.

GUTHRIE, OKLAHOMA.

Guthrie welcomed the editors with an open-hearted hospitality such as is seldom met with and never forgotten. To take care of a party of nearly 600 people for two days and nights is a big task for a city of less than 30,000 inhabitants and it is needless to say that the best homes of the city were opened to the members of the party.

Less than sixteen years ago, there was not a house standing where today is built Guthrie. The population of the city at the last territorial census, taken in the spring of 1904, was 27,729. It is distinctively a city of beautiful homes; it is a city of culture and refinement; it has six large school buildings; it has a county high school building costing $50,000 and a large Catholic convent. It has a $40,000 Carnegie library and it has a magnificent Masonic Temple erected and equipped by the Scottish Rite Consistory of Oklahoma and Indian Territory at a cost of $65,000. This is one of the finest Masonic structures in the United States. Guthrie has a new city hall, recently completed at a cost of $35,000. The Federal government is now erecting a $100,000 building for use as a postoffice and United States court. Guthrie has an excellent street car line and the editors when there were assured that within thirty days, work will be begun on an inter-urban electric line to run from Guthrie south to Oklahoma City. Seventeen church buildings are to be seen in the city of Guthrie, some of them handsome brick and stone structures that would do credit to a city of 100,000. Guthrie has nine railways, with thirty-two passenger trains in and out of the city each day. In fact, Guthrie is a surprise to everybody who stops to consider that the city is but sixteen years of age and that seventeen years ago there was not a person living where the town now is or any portion of the country adjacent thereto. All the business district and a part of the residence streets are paved with vitrified brick and the entire city is covered with a perfect sanitary sewerage system. It has an electric plant, a $150,000 gas plant that furnishes dollar gas to the entire city; two telephone systems with nearly 2,000 telephones in actual use. While Guthrie has only been designated as the temporary capital of the territory, yet the opinion prevails that it will be made the permanent capital, an honor which the progressiveness and public spirit of its people render eminently deserving.

GOOD BYE TO GUTHRIE.

The editorial party remained in Guthrie two days and two nights. During that period they were royally entertained and came to realize the full meaning of true, generous, open-hearted, western hospitality. There was a reception and a dance at the city hall; a reception and entertainment at the Masonic Temple; street car rides and drives throughout the city and an open-handed, open-hearted cordiality that was better than all these. If the people want anything of the National Editorial Association, they have only to ask for it and it is certainly theirs. At Guthrie the writer had the pleasure of meeting Arthur Kroeger, formerly of Ottumwa, who with his father, D. Kroeger, owns a 160-acre farm eight miles southwest of Guthrie. Mr. Kroeger stated that they purchased this farm five years ago at from $9 to $10 per acre and that it is worth today from $20 to $30. He is much pleased with Oklahoma and its prospects.

ENID VISITED.

Leaving Guthrie on the evening of June 9 the editorial excursionists occupying eleven sleepers and making up two special trains, started on a tour of Oklahoma and Indian Territory. The first stop was made at Enid, the county seat of Garfield county. Enid, according to a map presented to us by the enthusiastic citizens of that hustling city, is the railroad center of Oklahoma.

Just how many railroads it has, we don't exactly know, but we counted ten on the map and have no doubt but there are several more by this time (ten days later), so rapid is the movement of events in Enid and other parts of Oklahoma. Enid claims to have 15,000 people. We don't deny it, neither do we swear to it, but if they are all as delightful as the special ones we met there, Enid is made up of the best people on earth. It has 3,100 school children; $150,000 waterworks system; electric light and gas; telephone, churches, school houses, public library and the rest of the good things usually enumerated by a commercial club circular. It is located in what was known as the Cherokee strip or Cherokee outlet. This strip was originally granted to the Cherokee Indians, not for occupancy but as an outlet through which they could reach the Rocky Mountains and the vast hunting grounds of the plains. It is 60 by 220 miles in dimensions and was opened to settlement Sept. 16, 1893, nearly five years after the opening of the first Oklahoma country where Guthrie and Oklahoma City are located. At 12 o'clock noon, on that day signal guns were fired and the tens of thousands of homeseekers, who had congregated around the border, rushed in. The strip was mostly settled in a day and Enid had five thousand population before sunset. In the brief space of eleven seasons, which have elapsed since that day, the wilderness has been conquered. Homes, roads, bridges, school houses, churches and public improvements have been built. The people have successfully accomplished that which ordinarly requires a quarter of a century or more. Enid is located in an agricultural, fruit and stock region that is occupied by prosperous and contented farmers. The people of Enid enjoy school and church facilities of the highest order and its merchants have a splendid wholesale, retail and jobbing trade.

LAWTON, THE THREE-YEAR-OLD WONDER.

Leaving Enid at midnight, the editorial trains were taken over the Frisco system southwest to Hobart and Snyder. At the latter point the ruins wrought by the recent destructive and fatal cyclone were plainly in evidence. Lawton, the wonderful three-year-old city in the Comanche country, was reached at noon, where the members of the editorial party were entertained in the homes of the people. Lawton claims today a population of 10,000. It never was a village or town, but was born "grown up." It was incorporated as a city from the start. Where once the luxuriant wild grass, the Indian and the cattle had full sway, where no town, public road or fence had been known, almost with the passing of a day, the open prairie was converted into a wonderful new city. In the fall of 1901, the United States government opened for settlement the great Comanche country. The government located and platted three county seats of which Lawton was one and sold the lots at public auction. These sales were conducted by the interior department and the money received was held to be expended for court house, high school, waterworks and sewerage system, the balance to apply for bridges and roads for the county. Lawton, the capital of Comanche county, set the pace, her lot sales bringing nearly $500,000. At that time Lawton had no railway or town within thirty miles. Think of it, this vast sum of money being received spot cash in hand under such conditions. One twenty-five foot lot sold for $3,500 and every lot in the 320 acres was sold, Uncle Sam wisely platting and reserving fine sites for court house, public schools and high school. It has today over 100 stone and brick buildings and hundreds of dwellings of from $1,000 to $5,000 in value.

It has eight churches, six banks, electric light plant, two ice plants, cold storage, three cotton gins, two elevators and one mill. An $80,000 waterworks and a $53,000 sewerage system have just been completed and paid for by the government from money realized from the sale of lots. Lawton is located near Fort Sill, where the government has set aside 56,000 acres to be used for United States war maneuvers and will expend $400,000 on the same. In the beautiful Wichita mountains, which are not far distant from Lawton, there is to be a United States national park and game preserve of 47,000 acres on which $200,000 is to be expended. Lawton is in many respects a wonder and seems to have a brilliant future ahead of it.

A STOP AT CHICKASHA.

From Lawton, the editorial trains were run northeast past Fort Sill and the United States military reservation through Anardarko, Chickasha and El Reno to Oklahoma City. Chickasha proudly denomintes herself "The Queen of the Washita," and the editors were assured that it is located in the midst of the garden spot of the earth. If they hald told us that it was the garden of Eden we would have believed them just the same, for at no point was the editorial party given a more cordial reception. The town of Chickasha is just across the border of Oklahoma in the Chickasha nation of the Indian Territory. Though the city is a little over thirteen years old, its record of growth is remarkable. Five years ago its population was less than 4,000. Today it is more than $10,000. Chickasha leads as a jobbing and manufacturing center, having twenty-seven jobbing and manufacturing enterprises. It has splendid schools, many churches and excellent public buildings. The city is supplied with an electric light plant, a complete waterworks and a sewerage system, a gas plant and two telephone systems. An ordinance is now pending granting a franchise for an electric street railway and we are assured that within less than two years a splendid street car system will be in operation. Chickasha is located on the Washita river, which is one of the most fertile agricultural regions of the country, the climate being admirably adapted to all farm products. Corn, wheat and cotton are the principal products, though fruits and all kinds of vegetables are extensively grown. The price of land in the vicinity of Chickasha ranges from $10 to $35 per acre, depending upon the location and improvements. The land has been allotted to the Indians in severality. While there is a restriction upon their homestead allotments of from forty to one hundred and sixty acres each, yet practically a large share of the restrictions have been removed and by March, 1906, nearly all the lands aside from the homestead allotments to the Indians, will be in the market and can be occupied by actual settlers. It is needless to say that in this hustling, bustling Indian Territory town, which many of the editorial party had never before heard of, it was a distinct surprise to find beautiful church structures that cost over $20,000 each, four fine school buildings that cost over $65,000, and solid banking institutions with deposits on January 1st last, aggregating $1,188,050.57. It was also interesting to note that Mr. Carnegie had been there before us and had deposited one of his pretty and substantial library buildings on a prominent corner. Chickasha is all right and certainly deserves the proud name of "The Queen of the Washita."

GROUP OF MEMBERS OF THE N. E. A. IN FRONT OF THE ALAMO, SAN ANTONIO, TEX.

Miss Adena de Zavalla, President of the Daughters of the Republic of Mexico and Hon. John Dymond, President of the National Editorial Association, in the fore-ground to the right.

Greatly to the disappointment of the editorial party, Oklahoma City, the real metropolis of Oklahoma and Indian Territory, was not reached until after dark. This city is the real wonder of the great new southwest and without question is the largest city in the world of its age. Here the editors found a city of 30,000 people with almost every known modern convenience and all accomplished within sixteen years. It would seem as if only by the miraculous power of Alladin's lamp could the result now shown have been accomplished. The city has constructed and under contract fourteen miles of asphalt paved streets. It has twenty miles of street railway and a system that has no superior in the country. It has eight diverging lines of steam railways and is soon to have a belt line and a new union depot. It has already invested $500,000 in church buildings and one church building is now being erected at a cost of $50,000. It has now eight large school buildings with another one being built and bonds issued for two more to cost $30,000 each. It has a university and a military institute. St. Mary's academy is now being completed at a cost of $125,000. In public buildings it has a Carnegie library valued at $35,000, the city hall, $80,000; court house, $140,000. The wholesale business of the city exceeds $12,000,000 annually and the trade territory commanded by this southwest metropolis is gradually widening. The city boasts of three splendid parks and at one of them a chautauqua assembly will be held the present month. Oklahoma City has eight banks, with deposits aggregating in excess of $3,000,000. It has five large and modern equipped hotels and it has a $75,000 theatre, which is visited by some of the best metropolitan companies. It has large and thoroughly equipped gas and electric lighting plants and the building of Oklahoma's first inter-urban line will be begun within the present month. Oklahoma City is in truth, as well as name, a city. It is the wonder of the southwest, and her people have good reasons to be proud of the growth and prosperity which they have enjoyed. That such a city could be created and developed within the space of fifteen years is one of the marvels of the present marvelous age.

IN THE OIL AND GAS BELT—CLEVELAND.

From Oklahoma City the editorial trains again returned to Guthrie, thus completing a circuit of several hundred miles' run through the best portions of Oklahoma. Leaving Guthrie at midnight, Sunday, early Monday morning found the party at Cleveland, in the midst of the oil and gas belt. A few years ago Cleveland was but a name on the map, thirty-five miles from a railroad. One year ago, it was but a way station, practically unknown to the world at large. On May 29, last year, oil and natural gas were discovered at Cleveland. The result has been phenomenal. Since then wonders have been performed in the oil and gas business, as well as in the building of the

Pikes' Peak, Colorado.

town. The first oil well was "brought in" on July 2, but it was not until twenty days after that that well was shot. The discovery of oil soon caused the town of Cleveland to be run over with oil men from the east, west and south. The whole country was leased up and some prices were paid which were considered fabulous and the owners of real estate, some of them at least, made fortunes. The oil is found in an unusually thick deposit of sand at a depth of sixteen hundred feet. The present production of the field is estimated at between twelve and fifteen thousand barrels per day. As defined now, the Cleveland oil field is two miles and a half long and about two miles wide at the widest point. Within this radius there have been no dry holes drilled, and while the present field is small, it is being gradually widened and lengthened out. The town is supplied with natural gas for lighting, cooking and heating purposes and so plentiful is the supply that the street lights are permitted to burn day and night, because it is cheaper to let them burn than to hire some one to turn them out in the morning and light them again at night. While many fortunes have been made in oil and real estate at Cleveland during the past year, just what the future holds for this section it is difficult to predict. The Standard Oil company is already in the field and whether they can control the situation is a question yet undetermined. It would seem, however, that Cleveland's future is well assured.

As indicating how small the world is, on alighting from the train at Cleveland, the writer (A. W. Lee), was introduced to Captain A. W. Lee, one of the old settlers, who had come to Cleveland ten years ago when it was still thirty-five miles distant from a railroad. Said Captain Lee to Editor Lee, "Where are you from?"

"I am from Ottumwa, Iowa," was the reply.

"Then you know Major Tom Spilman?"

"Yes, indeed, Major Spilman is one of the best men in Ottumwa."

"Well, you must tell Major Spilman that his old army comrade, Alexander W. Lee, of Company F, Fifty-Second Indiana Infantry, is still on earth; that he is farming and practising law and incidentally going for oil; that he weighs 176 pounds and is ready for an old time wrestle with the major and is also ready to bet any amount that he can throw him yet. Also, please tell the Major that if he is hunting for the 'fountain of youth' that he should just come down to Cleveland, Oklahoma, and spend the winter with his old army comrade. I'll take care of him and don't you forget it."

TULSA, THE TYPICAL.

From the Cleveland, the editorial party crossed the Arkansas river into Indian Territory and the first stop was made at Tulsa, a wonderful and typical new southwestern town, located on the Arkansas river on the northern border of the Creek nation. A few years ago, Tulsa was a railway flag station. Today it is the home of 7,000 people, principally of eastern birth and training, with excellent schools, national banks, modern churches, daily newspapers and an inexhaustible supply of pure water. Tulsa possesses in the fullest measure the five essentials for successful manufactures—cheap fuel, raw materials, abundant water, ample railroad facilities and a growing market. It is in the center of a coal field, many miles in extent with veins of coal from thirty inches to six feet in thickness. It has natural gas, oil, timber and stone. It is located on the beautiful Arkansas river and surrounded by some of the finest farming land in the United States. It is built on high ground, where half a century ago in the shade of the trees overlooking the broad Arkansas river, the Tulsa clan of the Creek nation held its annual council, hence the name. Tulsa has sprung up as it were in a night and is the best built city of its age in the Indian Territoy. It has more pretty women and better dressed people and finer horses and equipages than any town of its size that we have ever been in. Tulsa is a hummer, whose prosperity is based on a solid foundation of natural resources and anybody who visits Indian Territory and does not see Tulsa has lost half of the benefit of his trip. The completion of the work of the Dawes commission, the discovery of oil and gas and the development of the coal fields, gives Tulsa magnificent prospects for the future. Tulsa is preeminently a typical town of the great new Southwest.

MUSKOGEE.

Muskogee was reached in time for supper and several hours were spent in this, one of the oldest towns in the territory. The development of Muskogee, however, has come within the past few years, and it is now a city of 20,000 people, prosperous, progressive and very much up-to-date. Here the writer had the pleasure of meeting Michael Conlin, formerly of Ottumwa, now in the government service. He is much pleased with the conditions in Indian Territory and believes there is a great future ahead when statehood is secured. In the vicinity of Muskogee 160 acres of land was given to each Indian, man, woman and child. It is a matter of record that one Indian proved up twenty-one children and received allotments aggregating nearly four thousand acres. A gentleman who moved to Muskogee from Illinois two years ago, speaking of the social life in Indian Territory, stated that he had more use for a dress suit in Muskogee, a dozen times over, than he formerly had when he lived in Illinois.

Cripple Creek Mining District.

A RUN THROUGH TEXAS.

A night's run from Muskogee brought the editors to Dallas, Texas. Dallas is the chief commercial city of Texas and gives evidence of being now the largest city in the State, having from 80,000 to 100,000 population. It is developing with wonderful rapidity and is destined to become the great financial and business metropolis of the empire State of Texas.

Another night on the cars and the editors woke up at Houston. Houston has a population of 75,000 and shows a school census of 12,513. It has thirty-eight public school buildings, thirty-two private schools, and ninety-three church buildings. It has thirty-eight banks, trust and loan companies with bank clearances last year exceeding $660,000,000. Over 2,000,000 bales of cotton were received at Houston last year. Houston is at the head of deep water navigation from the Gulf and it is expected that within a short time vessels drawing over twenty feet of water can load and unload from Houston docks. Houston has great newspapers, the office of the Houston *Post* being the finest in the United States, in any city of less than 100,000 population.

From Houston many of the editors ran down to Galveston to take a dip in the surf and see the great sea wall four miles in length, which the people of Galveston have erected at an enormous expense in order to protect that city from overflow by tidal waves or tropical storm in the future. The city is being raised from one to seventeen feet above the old level which prevailed previous to the great flood of five years ago, which destroyed millions of property and over 8,000 human lives.

From Houston, the editorial train was hauled in the night to San Antonio, which with the Alamo and other historic buildings and associations, is one of the most interesting places in the southwest. San Antonio by the census of 1900, was the largest city in Texas. It has become a health resort of national prominence and is visited annually by many thousands of people from all over the country.

QUESTION BOX

All Questions from Printers will be answered in this Department.

Address CHARLES A. KING, Beverly, Mass.

L. C. B., Massachusetts. Can you give me any information on the custom of charging for stamped envelopes and postal cards? Heretofore I have never made any charge for this stock above bare cost and sometimes have had to wait several months for pay. I understand that in some places printers charge 5 per cent on such stock. Of course in printing work of this kind there is bound to be some spoiled and customers expect full count of both postals and stamped envelopes. Inasmuch as these goods are spot cash it seems as if the printer should either have cash with order or get a profit sufficient to pay at least interest on the investment and loss in printing.

This letter was received some time ago and the delay in answering has been because several printers were consulted. As a rule, we find that printers do not ask any profit; put in the stock at cost, but charge enough, if possible, to cover the expense of printing and a little profit and the loss by spoilage. We also learned that in several cases printers put in stock at cost price, and one did not even add anything for express or cutting, but relied upon the profit on the printing to pay for this. Some printers make an iron-clad rule that they would not furnish postals or stamped envelopes; others limited the risk to a very few.

It would seem that a printer should add from 10 to 25 per cent to cost of stock to pay for freight and cutting and should also charge up the allowance for waste. A printer has no more business selling paper or envelopes at cost than he has to do printing at cost. It would seem to be an excellent rule to post up a notice that customers must either furnish stamped envelopes and postal cards or pay 5 per cent above cost. A prompt paying customer would save the 5 per cent, and you do not wish to buy postals or envelopes from any other. It is very easy to explain to a reasonable patron that you are allowed 30 days' credit on ordinary supplies, but Uncle Sam insists on cash with the order and what is "good enough for Sammy is good enough for you." A little backbone will be of great help to printers and especially when pay day comes, as it does pretty often.

L. C., Minnesota. Have been much interested in a department of queries. Can you tell me of a good way to keep samples of paper and card stock and printed samples? I spend much time looking up these matters.

L. C. does not state the size of his office, but judging from the locality it is not a large one. The large offices have a system and help to carry it on, and these remarks will apply to medium-sized offices. Unless a printer can afford a cabinet which is furnished at printer's warehouses, the better plan is to select a part of the office convenient and put up some shelves and have a number of strong paper boxes made to fit the space, probably about 7x10 is a desirable size, although for cards these are too large. The average printer has altogether too many samples, both of stock and printed matter. The jobbers and manufacturers are liberal with samples and about two-thirds of what they send is of no use to you, although it may be needed by some other printer with a different set of customers. In every town there is more or less work different from that done in another locality.

In keeping track of stock it would be well to have one box for cardboard, one for envelopes, one for bond paper, another for ruled goods, etc., carrying the subdivision as far as desired, and frequently looking over the box and culling the useless samples. "Job lots" may be put in these boxes, but as these lots are often quickly sold it is most desirable to cull them often and when ordering give a second choice. It would be well to have the cost mark in cipher and the price mark on these samples to show customer. You should make a profit on stock of from 15 to 50 per cent to pay for handling, cutting, waste, freight, etc. You cannot afford to charge stock at cost.

As for printed samples, the subdivision can be carried as far as the printer has room or inclination, and it is well to have boxes for address cards, business cards, tickets, envelopes, bill heads, packet heads, programs, booklets, engravings, weddings, circulars, flyers, blanks, etc. These should also be culled and those which are dirty, and many will become soiled by handling, thrown out.

Nearly every office has regular customers and the samples of their work should be kept separate, or at least duplicates kept separate. Where the work is occasionally duplicated with slight changes, it is particularly desirable to keep these samples in a scrapbook with plenty of margin where the new orders can be indicated. If possible have the customer number each job, as is done by the large corporations. It will be an easy matter to refer to the job, and if a careful record is kept it will be easy to duplicate and also to ascertain if the job is a profitable one or not. Where jobs are numbered and ordered to be duplicated by number a scrap-book is almost indispensable and a labor-saver.

In many offices posters and show cards are used to adorn the walls. Show cards can be kept in a large box and posters can be kept on a curtain, each size being separate and the tops pasted one over the other. These will readily roll up and can be kept clean and can be shown the same as dealers show wall paper.

Many printers spend much time looking for samples and lose some money by not keeping various samples of stock within easy reach. It frequently occurs that a few cents a pound can be saved on paper and the customer will be just as well satisfied. Give a customer just what he wants; do not try to substitute a lower-cost paper unless he says he is not particular, but occasionally a lower-priced paper is equally satisfactory.

THE PRESS, THE PULPIT AND THE POLITICIAN.*

BY TOM W. PERKINS, MCKINNEY, TEXAS, GAZETTE.

THE press assists the pulpit and makes and breaks politicians. The press entertains and edifies you; the pulpit strengthens and gives you peace of soul, while the politician promises you much, and gives you less. I have been on the press all my life; I have heard the sweet, urgent appeals from the pulpit, of truth and righteousness and have seen its deep and lasting lessons thoroughly imbedded into the lives, souls and hearts of the young and ungodly; I have been a candidate—and speak positively from personal experience. I have shaken the glad hands and heard the loud throbs of the boys' hearts from the "forks of the creek;" I have sung the sweet, consoling song of "overproduction," trampled upon the great, blood-sucking corporations of this Commonwealth and plainly and fearlessly pointed out to the commonality the flagrant wrongs daily being foisted upon us poor, down-trodden and defenseless people. I have seen and heard the cries of the people go up for redress of wrongs being perpetrated, but all seemingly in vain. I have run for office; I have been defeated; I am now holding office. I am not a politician; I am a patriot. A politician cares only to be elected, and not for his country. A patriot runs and holds the office for the sake of saving his country. The press made me; the pulpit saved me; the politicians almost ruined me.

A free press is the forerunner of high civilization, the backbone and sinew of this great American Republic. It stands for right as against wrong, for humanity as against inhumanity, for patriotism against graft. Without the press we would have ignorance, vice, superstition and anarchy. Show me a community without a first-class, well-conducted local newspaper and I will show you a place that is far behind in enterprise, higher education and Christian religion. The press is highly essential to the growth and maturity of our great and glorious Commonwealth. It educates the people, guards their interests and protects their rights. It educates the masses, and the continued perpetuity of this great Republic depends solely upon the proper education of the masses. Trust the common people and educate them and our Government will remain intact—for and of the people. We have the ablest and greatest press on earth today, hence we are the greatest God-loving, God-fearing people in existence. My friends, shackle and trample the press and you hamper civilization and education.

The pulpit and the Christian religion are the strongest and greatest bulwark of all our people. Without faith and hope this life would not be worth living. The pulpit is first of all. Let us reverence it; let us support it. A consecrated pulpit is the wish of the Father of fathers. By all means never let us desecrate it. It offers encouragement to the weak; further strengthens the strong, and gives peace of soul to the ungodly. It enlightens and edifies the world, assists the weak and needy, and if we will but follow its precepts and examples, we will all be better men and women. I pray the time will come some day when we will all worship one God as one people.

The politician we have had with us since the founding of this Republic. He is pre-historic. We know not from whence he came, nor where he will finally land when he shall turn up his little "pink toes to the daisies." He is a hail-fellow, well met, and he tells you a tale of woe from which you can not extricate yourself. He tells you how to run the Government and save the country. He always has a smile on his face that reminds you of the moon rising in Arkansaw. He is a bunch of sunshine, politeness personified. He gives the voter the glad hand of welcome; caresses all the babies, and while you are in his presence he makes "life one grand, sweet song." There are all kinds of politicians. Some run for office, others manage while they run. There are large politicians; there are samll politicians. Large ones are out for big pieces of "pie," the small ones for crumbs only. Some are moral; some immoral. Some are good citizens; others live and exist off what the good citizens make. This world may be better for the politicians having lived and existed. I seriously doubt this. All office-seekers and office-getters are not politicians. There are patriots holding office; but the proverbial, irrepressible, irresistible politicians—the kind we have in this country today—my friends, have them bested a whole Government block. My advice to one and all: Beware and stay clear of the progressive, twentieth century politician.

*From Address read before the Texas Press Association.

C. E. GILMORE, WILLIS POINT, TEX.

Mr. C. E. Gilmore of Willis Point, Texas, whose able address on the question, "Are Publishers availing Themselves of Improved Facilities for Production and Distribution?" was published in the June issue of this Journal, is a native Texan, born October 26, 1872. He was so fortunate as to be reared on a farm, laying there the splendid foundations of health, abundant vitality and tireless industry. After the usual education, open to every lad in this free land, he became

a school teacher for a time, getting the splendid drill in self-control and in the control of others afforded thereby, putting to the test all that he had learned and making himself more perfect therein. In 1894, at the age of twenty-two years, he entered the newspaper business in the office of the Willis Point *Chronicle*, the paper that he now owns and ably conducts. He is married and has a son now seven years of age, whom he values at a million dollars. Mr. Gilmore is active, zealous, useful and popular and what more can be desired?

THE PENN GOTHIC SERIES.

The Penn Gothic Series made in nine useful sizes by the Keystone Type Foundry, of Philadelphia, New York and Detroit, is shown on a two-page insert in this issue. This series is especially designed for Stationery and Commercial printing, and will undoubtedly be welcomed by printers everywhere. It is artistic, stylish and more durable than the letters now generally used for this class of work. The price of a complete series being but $13.40, combined with its merit and general usefulness, makes it a letter that should be found in every up-to-date printing office.

NEWSPAPER CRITICISMS

BY O. BYRON COPPER, DE SOTO, WIS.

Address all Communications for this Department to De Soto, Wis.

NEWSPAPER MEN, as well as those of other callings, sometimes fail in business. And while some of them do not fail financially, yet, so far as their newspapers are concerned, they are absolute failures. Both, however, we firmly believe, are but the result of a lack of big-heartedness, self-confidence and enthusiasm in the individual. "In the lexicon . . . . which Fate reserves for a bright manhood there is no such word as fail." We know of a certain county which is really overburdened with newspapers; and the worst of it is they still continue to spring up there, like mushrooms in the night, until it is now merely a question of the "survival of the fittest." One of the papers of that particular county recently suspended publication. It was a county seat paper, too. A few years ago, in that same county, a young friend of ours started a newspaper. Exchanges "welcomed" him to the overcrowded field with a moan. Just prior to his entrance of business there, the late Geo. W. Moss, then at the head of the credit department of the J. W. Butler Paper Company, in taking his financial statement, said to our young friend: "I do not wish to discourage you, young man, but only one man out of every hundred can succeed under such circumstances. But the boy's courage was undaunted. He went on and started his paper, amid the misgivings of relatives and friends. He got out a good paper, working day and night himself to make the thing a success. But at length, despite all his efforts, business began to lag. But instead of giving up then and there, our young friend cast his eye about for an avenue of escape. He reasoned that business would not come to him if he sat down and merely waited for it, but that it was necessary to get out and hustle for it and meet it half way. But business was such that it would not warrant the employment of a sufficiently large force to permit his services outside the office; therefore, he took in a partner. Interested exchanges then set up another groan: They had hoped, they said, that there was enough support in the town for one editor's existence, but certainly not enough for two. But our friend went on attending to his own business. He and his partner began with renewed energy, they hustled inside and out, they used their hands and their feet and their heads, they advertised. And business picked up. During the St. Louis exposition they instituted a world's Fair tour voting contest, in which they gave away a free-trip ticket to the Fair and twenty dollars' expense money. Later they gave away a forty-dollar sewing machine to their subscribers. And today they are enjoying a nice little business. At one time when business was supposed to be in its "dull season" these two friends of ours got their gray matter to working and evolved a scheme that netted them a snug little sum for only a day or two's labor. A neighboring city announced a street fair and carnival to be given in their midst at a future date. And what should our two newspaper friends do but divide one of the pages of their paper into two-inch card spaces, enter the stronghold of that carnival city and sell the whole business to merchants there at a dollar per space, making a unique and valuable carnival business directory. Thus we see that there is practically no excuse for failure in the newspaper business. If one thing does not win, there are always other resources. Use your heads, friends, use your heads, and advertise!

Continued from July issue.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Under separate wrapper I send you two copies of the Iola *Daily Register*, one a six- and one an eight-page paper. The *Register* is issued in six to twelve pages daily, the amount of advertising determining the number of pages. Being the make-up man, I send the papers to you for criticism more along that line than anything else. I am not at liberty to ask criticism on ads, news service, etc., but the management and boys of the office would not object to a little praise if these departments deserve it.

Very truly, JAY MATTHEWS.

OXFORD JUNCTION IOWA, May 8, 1905.

The making up of a newspaper is all a matter of artistic taste. A page of an even number of columns is always more difficult to give balanced treatment than is a page of an odd number of columns. The Iola Daily *Register* is a six-column publication, and in the issue of May 8, Mr. Matthews has succeeded well in putting up an artistic effect in his initial page. The first, third and fifth columns are topped by a double-deck head, while the alternating columns are begun with modest heads or straight matter. In the issue of May 12, he has also done about as well as could be done with the matter, perhaps, but the only really artistic way is to open every other column with a displayed head, as discribed above. The other pages of the *Register* are equally well put together and carefully justified. In instances there is some promiscuousness in the arrangement of the ads, which we take it for granted is due to position stipulations in the ad contracts. Our hobby in making up a newspaper page, is to collect all the displayed advertising matter to the right hand side of the form, (that is understood, viewing the form from a printer's standpoint—facing the top of the chase) with all the larger ads at the bottom and the smaller ones graduating to the top. This, Mr. Matthews will observe, is hardly as he has it; but especially with regard to the makeup is it not always possible to attain to the ideal. We consider the news service of the *Register* creditable, indeed, and the ad composition is of a good, serviceable type.

The following letter from that master printer at Oxford Junction, Iowa, whose name is becoming familiar to close students of this journal, namely, Edward Courtright, came to cheer us this month:

Mr. O. Byron Copper, De Soto, Wis.

DEAR SIR:—For many months I have owed you my sincere thanks for the splendid notice of our "Historical Edition" in your department of the NATIONAL PRINTER-JOURNALIST. Shortly after that a little girl came to live at our house, work was rushing in the office, and at night and on Sundays I wanted to do nothing but rest and play with baby. That is my only excuse.

I am sending you, under another cover, a copy of a cook book we got out containing ads. It was a "hurry-up" job, and if you can find nothing of interest typographically, perhaps Mrs. Copper may find a few gems in the baking line. The recipes are said by good cooks to be more than ordinarily good. Accept my *real* thanks for your kind and helpful words, both to myself and others.

Sincerely yours, EDWARD COURTRIGHT.

We had looked "many months," too, for this letter, or something more from Mr. Courtright, because we considered him a valuable addition to "the school" which Brother Wood used to talk so much about in his department—not as a pupil, understand, but as a tutor. The boys who are making typographical blunders are those who are to learn from these departments of criticism, and those contributors who are producing such work as that by Mr. Courtright are those who are going to teach them. Anyone who has ever had a little one of their own in the house could easily forgive any neglect, however, that grew out of a desire to "play with Bobby." But, could we find anything of interest in this cook book? Well, I guess yes! We hadn't turned a single page of it until we were fairly charmed with the cover design, and as we penetrated further we resolved to illustrate this month's department profusely; but the moment that "better half" of ours got her eye upon it, she looked at us threateningly and said: "You shan't mutilate that book!" Of couse that settled it. You, no doubt, can appreciate how it is, Mr. Courtright; our intentions were good enough. But there was that look in Mrs. Copper's eyes and that decisive ring in her voice. But we finally compromised matters and are reproducing one of the first ads in the book—one which had no printed recipes on the back of it. Fortunately, the ad which we are able to show (No. 8) is one of the best in the book, and a peerless example of real, typographic art.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Enclosed you will find three ads, which I have set, and which I wish you would criticise. I am a new contributor, but have been reading the N. P.-J. for some time. I am only seventeen years of age, and am the foreman of Lewis' *Ledger* of this town.

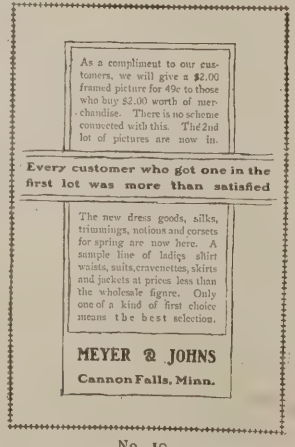
Respectfully yours, MICHAEL EDMEYER.

SHELTON, NEBRASKA, May 21, 1905.

New contributors are always welcomed to this department of the NATIONAL PRINTER-JOURNALIST and after closely examining Mr. Edmeyer's ads and considering his tender age we have become convinced that there are high places in the printing business in future store for him. Although the specimen which we discard is without material fault, we are showing but two of these Edmeyer creations. (Nos. 9 and 10.) The first is well designed and strongly and correctly displayed. The chief, and perhaps only defect is the difference of space between the panel and border at the ends and at the sides. To be right, this intervening space should always be uniform all the way around. The second is a very

Ladies Shirt Waist Suits
THIS will be a great shirt waist season. More will be sold than last summer. Our first shipment just arrived. They are beautifully made and gotten up. Made of fine suisses, blue chambrys and voiles, tan india linens and figures. All washable materials and at little cost.
Prices $2.95, $3.50, $4.50, and $5.00 for the suit
Ladies' Waists
With no exception we can show you the best and cheapest line of waists. They are made by the "Acorn" people which means a perfect fitting waist. Splendid values at. . . . . $1.00 up to 5.00
Friday and Saturday Specials
60c Reliance taffeta silk, all colors, these 2 days 39c yd.
$1.00 and $1.25 fancy silks for waists these 2 days 75c yd.
12 1-2c childrens hose, slightly imperfect, all sizes, these 2 days, ... 7c a pair, or 4 for 25c
MEYER & JOHNS

No. 9.



As a compliment to our customers, we will give a $2.00 framed picture for 49c to those who buy $2.00 worth of merchandise. There is no scheme connected with this. The 2nd lot of pictures are now in.
Every customer who got one in the first lot was more than satisfied
The new dress goods, silks, trimmings, notions and corsets for spring are now here. A sample line of ladies shirt waists, suits, cravenettes, skirts and jackets at prices less than the wholesale figure. Only one of a kind of first choice means the best selection.
MEYER & JOHNS
Cannon Falls, Minn.

No. 10.

neat, pretty example; but the rules employed are a trifle too light in face. One, or even two-point rule, would have been preferable. When we look at an ad in which hair-line rule has been employed, as in this exhibit, we unconsciously find ourselves treating said rules as white space,—that is, ignoring them, just as if they were not there. And it is not every typographical creation that can stand such scrutiny. For instance, take away the rule work in this specimen and see what you have left. Part of the ad's soul—part of its individuality is gone. This same fault might be argued as an evidence in reproduction No. 8; but it is different in this instance. In No. 8 there is a type design independent of the rule work, or in other words the one is not so closely related to the other, as in specimen No 10. In our opinion, where rules are employed in close proximity to a mass of type, both will stand out more forcibly, if the former is distinctly outlined by being of a proper bold face.

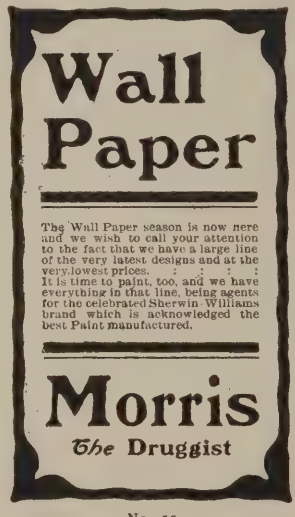
Mr. O. Byron Copper, De Soto, Wis.

DEAR SIR:—In a recent issue of the PRINTER-JOURNALIST you reviewed *The Clipper*, and while criticing the make-up, you paid the paper a very high compliment. I am taking the liberty of again sending you some copies of recent issues, including a special edition gotten out by the ladies of the Twentieth Century Club who did all except the mechanical work. The presswork on this edition, as is that on each issue of *The Clipper*, was done by a platen press one page at a time, and while I am aware that better results might have been gotten from the half tones, when it is taken into consideration that the rollers used had been in use over two years, I feel that the work is about as good as could have been secured.

While I am not sending you the papers expecting you to again review it, if you should find it convenient to do so any criticism you may make will be appreciated by

Yours very truly, F. D. REED.

In our estimation the Twentieth Century Club Souvenir edition of the Shelton *Clipper*, was a highly creditable product, both to its editors and its publishers and printers. It consisted of ten six-column pages of good heavy stock enclosed within a rich green cover, and was handsomely illustrated with over a score of large half-tone cuts of Shelton's prominent people and residence buildings. The



Wall Paper
The Wall Paper season is now here and we wish to call your attention to the fact that we have a large line of the very latest designs and at the very lowest prices.
It is time to paint, too, and we have everything in that line, being agents for the celebrated Sherwin-Williams brand which is acknowledged the best Paint manufactured.
Morris
The Druggist

No. 11.

advertising patronage accorded this souvenir edition in its liberality speaks flatteringly for the enterprise and thrift of the Shelton business men; and the fact that this paper was printed "one page at a time" on a platen press makes it represent a volume of work. As might be expected the impression is creditable, the presswork having been well executed, and despite Editor Reed's foregoing apology relative to the half-tones, these, too, we think compare favorably with the average newspaper work. The makeup is highly satisfactory on all pages but the first one, where no displayed advertising should have appeared; but rather a clean page of straight reading matter surrounding the centrally located half-tone. While the advertisement composition has been effected with credit to its creator, yet with the

Composed entirely on the Linotype and printed direct from brass rules and slugs on a cylinder press by the Unity Press of New York.

ROGERS SYSTEM

Linotype Rule and Figure Work

BY this system the appliances for this work are quickly applicable to all existing Linotype machines. The machine produces the ordinary horizontal slugs, having therein, as shown in Fig. 1, slots *a*, to receive the shallow brass rules *A*. The slugs are delivered from the machine with the slots therein, and no sawing, cutting or other treatment is necessary. After the proofs are pulled and corrections made, the rules may be inserted in an instant, and when the form is locked up **the rules are held securely in place.**

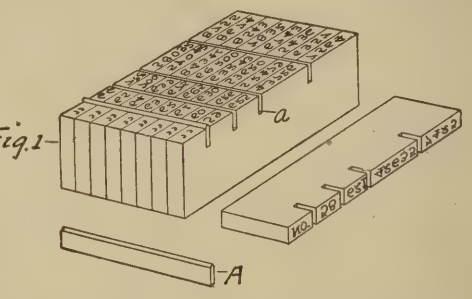

Fig. 1

Rogers table matrices, *B*, are like the ordinary Linotype matrices, except that the figure or letter is in the bottom of a slot, instead of being located in the edge as usual, so that when the matrices are assembled side by side, as shown in Fig. 2, their slots will align and constitute a mold in which to cast the front edge of the slug.

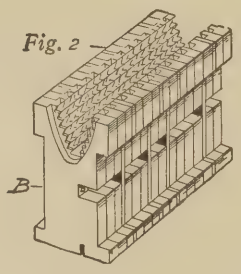

Fig. 2

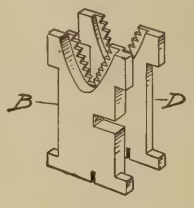
The mold, *C*, with which the matrices are used, is the ordinary U. A. Mold, except that it is of less height or thickness from front to rear. When the line of matrices is presented against the mold, as shown in Fig. 3, the matrix slot aligns with and forms a continuation of the mold slot, so that the body or base part of the slug is cast in the mold as usual, while the front edge is cast in the matrices. The slots in the slugs are formed by matrices or division plates, *D*, without slots. These plates, of a thickness corresponding to the required rules, are inserted at the proper points in the line between the matrices by means of the finger-keys, as shown in Fig. 2.



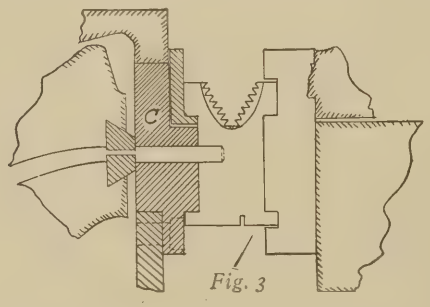


Fig. 3

The matrices are made on the point system. In operating under this system, the operator lays out or casts up his table as usual.

When the slugs are assembled the slots register as shown in Fig. 1, forming a continuous slot or groove, into which the rules may be quickly inserted.

American Type Founders Company

A Type Without Hairlines

Century Expanded

Best to Wear Easiest to Read

Sold at Body Type prices in 25 pound fonts and multiples

6 Point

ABSENCE of hairlines is a chief point of merit in Century Expanded. This insures to the buyer good service and long wear from his type, *without extra cost*. He, in turn, gives his readers the very substantial benefit of freedom from eye-weariness. Many other good qualities are strongly apparent in Century Expanded. The counters are deep, the serifs are strong, the design is well proportioned, the metal is hard, and in every character in every font will always be found the expert type founding methods that are embodied in all products of the American Type Founders Company. The face of Century Expanded is very plain and legible, more so than any other body letter.

6 Point Century Expanded 64c lb in 25-lb fonts and multiples

8 Point

CENTURY EXPANDED is the successful body type of the times. It has no hairlines nor any freaky characters. Each letter is plain and clear, making words stand out distinctly. The news story, the book of fact or fiction, the trade message in a booklet, catalogue or newspaper advertisement, will be more easily absorbed by the reader when related in Century Expanded—*the peer of all body letters*, the original and the best by every test.

ALL PUBLISHERS who buy Century Expanded for body type may be sure their readers will derive far greater pleasure from and maintain greater interest in newspapers printed from this type. The Daily Spokesman Review, Spokane, Wash., writes us that "this series combines all those good points of *a clear-cut legible type*. Our order for several hundred pounds substantially backs this statement."

9 Point Century Expanded 48c lb in 25-lb fonts and multiples

10 Point

"CENTURY EXPANDED was the type selected for body work in the *International Printer* because of its legible and well proportioned qualities, adapting it especially to good magazine work. It is indeed gratifying to us to know that in selecting Century Expanded for this magazine we have met the approbation of its readers."

10 Point Century Expanded 46c lb in 25-lb fonts and multiples

11 Point

CENTURY EXPANDED merits are gladly explained by our salesmen. Substantial orders for this peerless body type usually follow their intelligent efforts. Hairlines omitted. Not fancy or too plain. Face just a shade heavier than ordinary body faces, deep counters, well proportioned grade, no hanging letters, strong, legible, long life and *no extra cost* to the buyer. The Cleveland Plain Dealer says Century Expanded gives excellent satisfaction.

11 Point Century Expanded 44c lb in 25-lb fonts and multiples

12 Point

CENTURY EXPANDED was designed and completed by the American Type Founders Company with two objects paramount: to produce a face strong and graceful in all its lines, thereby giving it character, and at the same time making it mechanically strong so it would wear well. This type face without hairlines will give the buyer *long wear* and good service.

12 Point Century Expanded 42c lb in 25-lb fonts and multiples

14 Point

Many newspaper advertisements call for a plain legible body letter to tell the merchant's story of bargain merit. What more useful type for the purpose than 14 point Century Expanded, the type you are reading now. Better put the series in *your* cases. It has many useful purposes in every newspaper and job office.

14 Point Century Expanded 40c lb in 25-lb fonts and multiples

18 Point

Century Expanded in the office of The Philadelphia Record "has proven very satisfactory in every respect. We find also that *it stands stereotyping well*, as there are no hairlines or hanging letters to break off."

18 Point Century Expanded 40c lb in 25-lb fonts and multiples

These prices are subject to our usual discounts. Special prices on fonts of 500, 1000, 2000, 3000, 4000 or 5000 pounds, ordered at one time

ADVERTISING RATES PROMPTLY FURNISHED UPON APPLICATION

The NATIONAL PRINTER-JOURNALIST is unequalled as an advertising medium in its field. No attention paid to postal card requests. Information cheerfully furnished to all patrons.

Subscribers and patrons will confer a favor on the National Printer-Journalist Company by sending in the names of responsible newsdealers who do not keep the monthly on sale regularly.

Manuscript sent in for publication must be accompanied by a letter of explanation and return postage.

CHICAGO, AUGUST, 1905

We hope that the readers of the NATIONAL PRINTER-JOURNALIST have carefully studied the able papers that were published in the July issue. Taken in their entirety, they amounted to a complete course in practical journalism. As we have been assured by those who have observed and know, there never before were so many able papers presented before any one convention of either editors, publishers or printers in the United States. What is still more gratifying to us, is that we are able, again, this month to keep up to the high standard, in the practical value and ability of articles, that was set in our convention number. The court decisions cited this month by Mr. Butler will be found of more than ordinary value and interest. In the deparments of "More Work Through Publicity" and "Newspaper Review," to our way of thinking, Messrs. Woodworth and Copper have kept up the highest standard in their work which has ever received commendation. They teach by examples, comments and illustrations, the most effective method, and we do not believe that there is a month in which either of these departments is not worth more than the subscription price for a year to any live editor, publisher, or printer, either employing or journeyman. We have tried in our "Editorial Notes and Points" and in our talk on "Gumption in Dull Times," to be more than usually practical. "The Question Box" has some very valuable questions and answers and we hope that the readers of the NATIONAL PRINTER-JOURNALIST will help to make this department more serviceable by sending in questions. Like our other departments it can only reach the highest practical usefulness through the coöperation of live workers who seek improvement and are willing to help others that they may be helped. Our "Among the Associations," as well as the articles presented, is above the average in interest and value. We can not give accounts of all association meetings but could give many more with the aid of members and officers. If some member of every association would display the zeal and kindly spirit shown by Mr. John P. Herrick, this month, in his account of the exceedingly delightful meeting of the New York Press Association, all associations and their members would be greatly benefited and pleased and the editor's heart would be made glad. It pays an association in the interest awakened, to have its conventions fully represented in a journal that goes to its members and then also to editors all over the United States. We are always glad to get photographs of officers and prominent members to use in connection with these accounts, that, instructively presented, help other associations in their methods and work as well as the individual editors and publishers. We have given up eighteen years of our life to the work of helping editors, printers and publishers through this paper and are eighteen thousand dollars poorer than when we begun. We have no complaints or regrets. We have had a glorious time, made many friends and enjoyed our work, because, if we can believe the testimony of hundreds, we have been able to do some little good through our constant exertions. We do not count our life a failure to ourself. It has been filled with the joy of work that has met with kind acknowledgment but we do think that we have earned the right to ask the considerate coöperation of friends in this work, that is for their mutual benefit. Come friends, do not say that the editor is neglecting you, but afford the opportunity of greater service. Send in your work, tell of your difficulties, and triumphs, ask questions, send in accounts of your meetings—often copies of the papers published where conventions are held will be sufficient for the latter, though specially written accounts are better. Let us exchange knowledge and light. There are no more powerful agencies to right the wrongs of our Nation and to build for all that means prosperity, virtue, true liberty with all rights protected and all injustice and evil doing restrained and minimized, than the newspaper press and the printing office.

"He who ruleth his own spirit is greater than he who taketh a city," or than he who accumulates a billion dollars of wealth. One can never worthily rule or direct a newspaper or printing office, unless he first learns to rule himself. The whole force will, to a greater or less degree, take character or license from the control or lack of self-control in the head of the establishment. Self-restraint or equipoise is the letter "A" in the alphabet of success in management.

Next to equipoise comes wise firmness which is the first fruits of self-control. It takes a steady hand to guide any enterprise as much as to guide the course of a vessel in a storm or a warship amidst the roar of canon and the bursting of shells in close action at sea. In these strenuous times, the battle is always on in the newspaper and printing business and, thanks to a depraved and spurious Unionism, there is, too frequently, the danger of indifference, neglect of duty,

shirking and conspiracy if not of open mutiny, strikes, boycotts and violence among the men.

This is an age of freedom of thought and of independence of character, and men are restive under restraint so that there must be reasonableness in management, that is evident to all who have the power of thinking connectedly as to the business and its demands, to all who possess any principles of intelligent loyalty and conscientious honesty.

The reason is not always discernible and mind it and the conscience must be quickened by sympathy. There must be mutual confidence and the greatest possible harmony between the employer and the employes. As a writer in the *British Printer* states the case: "If the bond of sympathy does not exist, there is bound to be a leakage somewhere."

As necessary to any sympathy there must be knowledge which commands respect and is in itself power. An incompetent manager or foreman, how-so-ever skilful in his deceptions by which he is able to hold his position, will not long command the sympathy, respect or coöperation of the men under him.

We have heretofore and elsewhere spoken of tact, but it finds appropriate place here, in these paragraphs on the essentials of successful management which should be especially looked after during these August days, if results are expected during the approaching busy season. Henry Clay, the great American Premier and orator, who had all-controlling-eloquence and wonderful talents but evidently lacked in the one winning, controlling element of tact, once portrayed that in which he doubtless felt his own deficiency in the following inspiring terms: "Talent is something, but tact is everything. Talent is power—tact is skill. Talent is weight—tact is momentum. Talent knows what to do—tact knows how to do. Tact is the talent of talents, the availableness of resources, the applicability of power, the eye of discrimination, the right hand of intellect."

A management possessing these qualifications, is bound to succeed so far as internal management of the mechanical department is concerned.

It is the object of the newspaper to please and it must, therefore, keep pleasant; to inform and hence it must use every means to secure every item of importance within its field that will be wanted by its readers; to boost, and hence, it must, at all times and on all occasions, be a booster, an inspirer, an optimist and never a grouch or a pessimist It must ever be all good things to all good men, that it may win a multitude for their good and for the good of the business. It must get on the most intimate terms possible with all the people of the community served. Neglect no merchant, manufacturer or individual because too small or insignificant. It is business wisdom to help build up the struggling ones, for their success brings in the end, the best, the most profitable and most enduring customers and friends. Friends of the right kind are just as valuable to a newspaper as to a lawyer or to a physician. They help to the newspaper's popularity and prestige and bring or send in business. Hence, be friendly, considerate, polite, ever giving thanks for favors and expressing appreciation and gratitude for business and for kind words or honest commendation. If there be anything more in newspaper philosophy, it is this, be alive never say die and if business does not come, go out and compel business by well-matured plans and hard work, Mr. Copper suggests in the "Newspaper Criticism Department" this month some of the ways in which a persistent young newspaper man with the kind of newspaper we have described accomplished this. Go thou and do likewise. Much that we have said with regard to the newspaper, applies with equal force to the job printing office.

Another thing in dull times, is to look after all possible improvements in the working conditions of the office both as to convenience and as to the comfort and health of the employes. Health is one of the first items in the science of accomplishment, and of business success, next, and contributory to healthfulness, are conveniences for efficient work, a supply of an abundance of the best material, good light, perfect ventilation, sanitation and proper temperature and all other comforts.

As to the philosophy of successful newspaper making there may be many theories, but there are certain basic principles that apply everywhere. If these are understood and kept constantly in mind, efficient methods will develop therefrom, adapted to the occasions as they arise; however beneficial may be the study of the approved and successful method of others. We have frequently referred to the old and wise teaching as especially applicable to the newspaper:

"He who would be greatest of all must be the servant of all." The faithful servant is ever worthy of his hire and if his services bring returns the right of reward will be recognized and payment cheerfully made. Never imagine that position entitles any one to reward. It would be like a minister claiming pay simply because he is a minister, though he is neither helping, instructing, encouraging, uplifting, counseling, consoling or making better, wiser or happier, in any way, his church as a whole or one single member thereof. Services, not positions, win pay. Remember that the newspaper is ever to be the faithful servant of the whole community, City or State and of every subscriber and advertiser therein. The newspaper must make good, must render valuable services if any reward or support is to be honestly expected. The greater, the more valuable and the more evident the service, the greater the reward, and the more certain the well-founded assurance of permanent employment or support. It is perfectly right as well as business wisdom for a newspaper to make known its services and their value, being first sure that a real and superior value exists that will stand exploiting. The newspaper is its own best advertisement. The paper must be constantly on the alert for new ways of securing its constituency and for enlarging the number of its supporters. Stagnation means death.

(Continued from page 568.)

abundance of fine material at hand, a far more artistic cover design ought to have resulted. We are rather disappointed in that. From a copy of the regular edition of the *Clipper* which accompained this special, we select an ad for reproduction (No. 11) which demonstrates well the talent of its maker. However, a centering of the word "Wall" over the word "Paper," would be better, especially in connection with this particular border design. We are always pleased to hear the second time from our contributors—yes even to the third and fourth times. Hope Mr. Reed will write again.

Another very creditable product is the third Special Illustrated Souvenir of the *Daily Index*, of Mineral Wells, Texas, consisting of a 9½ x 12 inch booklet, printed in blue on good white enameled stock and bound in handsome buff covers, with an ornate cover design in two printings—blue and red—the outside border in dark blue, inside border red, with the type in dark blue over a jaunty tint block of vermilion or red lake. Here's what the editor says about it:

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Under separate cover we send your a copy of a special souvenir edition of the *Daily Index* for criticism in the NATIONAL PRINTER-JOURNALIST. Mineral Wells is a town of some 3,000 inhabitants, a health resort of prominence. The edition was printed on a Gally Universal, 13x19 platen press.

Fraternally yours, INDEX PRINTING CO.,
Per Newton.

P. S.—The writer learned his trade in the Des Moines *Leader* in '79; and worked for Philo C. Kenyon's job office.

Monday, June 5, 1905.

From the brief survey which we have been able to bestow upon the contents of this special souvenir edition, we learn that it deals exclusively with the city of Mineral Wells, its natural advantages, business interests and enterprising people, all of which there seems to have been an abundance as material for the editor's brain and pen. And, if we are any judge, the editor of this edition hasn't done a bad job of it by any means, couching his descriptive articles and biographical comment in a witty, free and easy, fluent style that is sure to please and interest. Two ten-inch, twenty-two-em columns constitute a page, and every one of the twenty-eight of these are neatly made up, all being elaborately dotted with half-tones of various subjects. The presswork was executed by a man of "some thirty-five or forty years' experience in making ready," therefore each page is given that correct impression in which even every hair-line stands out distinctly, without any embossing noticeable on the opposite side of the sheet, and every cut showing, up with the fullness and roundness of a photograph. But we're unable to see how such an elaborate effort could be made to pay with no more advertising support than that contained within the two inside cover pages—unless each firm contributed liberally for the lavish writeups which make up the body of the booklet.

Frank L. Winn, of Mayville, N. D., whose likeness accompanies these remarks, and who, it will be remembered, won first place in our third ad-setting contest, favors us this month with a collection of ads of his composition, two of which (Nos. 12 and 13) we are showing, while the others are held in abeyance for possible future comment. Mr. Winn says, in submitting these specimens:

"Have to keep on the right track, you know, and that is the way—by having your work criticised, that you may not make the same errors again. Also permit me, at this late date to thank you and the N. P-J. for the beautiful 'Certificate of Excellence,' duly received."

The specimens which Mr. Winn sends are all fine press proofs, and the first exhibit shown (No. 12), is doubtless one of the most perfect ad specimens ever reproduced in this department. Note its dignity and clean simplicity. The second (No. 13) while equally simple and artistic, yet shows a bad defect in the hyphen after "Mason," which throws the "mass" out of the center, destroys the sought pyramid effect and

It is Time you thought about a

No. 13

lends an unmistakeable "wapper-jawed" aspect. This hyphen should have been left off entirely and the line given probably two more points of space between letters to eke out the desired effect. The inverted Jensen ornament is hardly perfect, either, as it also adds to the one-sided appearance alluded to above. Still these are but technicalities we are

FRANK L. WINN.

grumbling about. But coming as this example does, from so fine an artist as Compositor Winn has proved himself to be, we feel as though we have a right to complain about such little things; whereas, had the ad emanated from a less deft hand we might have felt obliged to pass lightly over these defects and pronounce the specimen that which it really is—a very handsome piece of work.

Mr. O. Byron Copper, De Soto, Wis.

MY DEAR FRIEND:—Under separate cover you will find a copy of the "Blue Jay" a college annual gotten out here by the students of Westminster College, and if you remember correctly the book that I promised to send to you some two or three months ago. You see the fact of the matter is, the book is two months late coming out on account of not getting the cuts until a few days ago. I printed the ad pages some two months ago and every few weeks we would get a new batch of cuts from the house, some would be for the back of the book

and some would be for the front of it. I concluded that if I was going to get the book out I would have to start printing wherever I could and I began somewhere in the middle. At first the students thought they would not have any page numbers and then it was decided that we would have them, so you see how I was fixed. The cuts finally came and I had the book printed in ten days and ready for the bindery, making an average of printing twelve pages a day. Some days I printed as high as 18 and 20 pages a day, and it is a great wonder that the book is not offset all the way through.

Of course, the criticism of books is not in your line, I know, but I thought that if you could see any ads in there that looked good to you or any that looked rotten, I would be glad to have your opinion on same and then again, as I told your Mr. Fitzgerald, that the NATIONAL PRINTER-JOURNALIST had always been so good to me heretofore, I thought that I would send all the department editors a book to show my appreciation for what the paper has done for me, a country printer.

Thanking you in advance for anything that you can say about this book, and assuring you that the management of the Sun Printing Company is very appreciative for what you have said about them in the past and that they, as well as myself, are great friend of your paper, I remain,

Yours truly, B. RAY FRANKLIN.

While, as Mr. Franklin suggests in the foregoing letter, the criticism of books is hardly in our line, yet we, American like, are "awfully" glad he did not fail to send the promised "Blue Jay," for it is a very handsome book, and that "better half" of ours, which somehow or other is always getting mixed up irrelevantly with this department of newspaper criticisms (but no wonder, because she's always hanging over our shoulder as we write) was awfully glad, too; because she was a school-ma'am prior to her annexation, and retains an abnormal relish for anything that pertains to educational

work. Although the book arrives rather late, as we were on the point of closing this budget of reviews, therefore, we have not been able to give it the critical scrutiny which it deserves, but in the hasty examination accorded it, we conclude that as a hurry up job, Mr. Franklin has done exceedingly well. The typographical styles we consider in the main, neat and tasteful, and the ads in the back of the books are nearly all fine examples of plain, handsome composition. It takes a superbundance of nerve, our two contemporaries will no doubt concede, to slash into a handsome volume like this; but in order that we might share a little of the pleasure of our gift with our readers, we have overcome our scrupulosity in this respect, and are therefore showing two of the "Blue Jay's" handsome ad pages herewith—Nos. 14 and 15. They are both above adverse criticism, although the first of the two is lacking somewhat in that dignified simplicity which so strongly characterizes the second, being a trifle overdone with rules and panels and ornaments.

AUGUST INSTALLMENT.

Those readers of this magazine who for any length of time have been close students of both this department and that by Brother Woodworth, "More Work Through Publicity," must certainly have noticed the similarity between the two, that is, in this way, that what Brother Woodworth says one month we may say the very next, or vice versa. To suggest plagiarism would be an insult to both of us, and the only agreeable way in which to account for this analogy between these two departments is that some minds "run in the same channels." We are sure that we do not try to pattern after Brother Woodworth, and we are equally sure that he does not try to pattern after us, nevertheless, we have noticed that when we were intending to spring something in these columns, or when we had written something and mailed it to headquarters, that would be the very first thing that we would read in Mr Woodworth's instalment preceding, which it were impossible for us to have copied, since its receipt by us occurred after our MS. was written and mailed. This month, as is unusual, we have received a copy of the July PRINTER-JOURNALIST, ere we begin to write for the August issue, and therein we are surprised (and yet we are not surprised) to read Brother Woodworth's "preface," in which was voiced exactly the thoughts which we had stored as an introductory topic this month, for never before since we began to scribble these "Newspaper Criticisms," have we received in a single month's time so many specimens from new contributors, as well as many from old friends, and since much of last month's regular instalment was held in abeyance for use this month, we may, therefore, be unable to fully consider everything on hand up to date, but under the circumstances, we feel that we will be forgiven for any omissions.

We must begin by acknowledging the receipt of several beautiful pieces of printed matter, including the American Type Founders' Chap Book, their specimen book of American Extra Condensed and Compact Series, and "The Green Book of Spring," the latter being an especially pretty and useful thing. A copy of *Sagebrush Philosophy,* that comical, yet philosophical, little magazine by "Bill Barlow," published at Douglas, Wyo., by M. C. and Minnie F. Barrow, must not be forgotten; and no less appreciated is the copies of *Briarcliff Outlook,* published each mid-month at Briarcliff Manor, N. Y., "for the promotion of country life," with Arthur W. Emerson as editor and J. C. Wilcox as business manager. The *Outlook* is a handsome product and contains several choice literary gems. The printing is something exquisite.

GAYLORD, MINN., June 10, 1905.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—I have sent you under separate cover copies of the Gaylord *Hub* and Arlington *Enterprise* of the first two weeks in June and if you deem them worthy of a little shaking up, you may do so. As a reader of the NATIONAL PRINTER-JOURNALIST I take great interest in your criticism of publications which appear therein. Am at present editing and managing both of these papers. I am,

Yours truly, CHAS. WALLIN.

That's invariably the case, the publisher whose paper does not need "shaking up," is just the man to invite the critic to "wade in." But maybe it were that spirit that originally put them in a position where they do not fear criticism, or, having profited by such things before, they naturally desire more of it. Both of these two publications, the *Hub* and the *Enterprise,* are quite creditable newspapers. Both are six-column quartos on ready-prints, chock full of good, pure reading matter, and legibly impressed. The Gaylord *Hub* strikes as being a trifle the better publication, especially as regards layout and typography. The makeup on an average is fair, even commendable, but the practice of opening each column on the initial page with a display head is, as we have

often said before, erroneous—only every other column should be so begun, while the alternate columns should commence with a broken article, or, with a more modestly headed article. As intimated, the advertisement composition in this sheet is worthy of some praise, especially in point of its refined abundance of conservative white space. In both publications, but more especially in the Arlington *Enterprise,* the headings appear in a considerably too prominent face, and the stair-step style we consider unsightly, particularly where so much space intervenes between the two lines. Able editorial departments are maintained in both sheets, and all of Editor Wallin's work is highly commendable, both from a literary and news' standpoint. A man who is performing the editorial work on two such publications as these certainly has his hands full, and we do not hesitate to congratulate Mr. Wallin upon his success. He is a new contributor, but we trust we shall hear from him often in the future.

Uniontown, Kans., June 10, 1905.

O. Byron Copper, De Soto, Wis.

Dear Sir:—I send you under separate cover a copy of the Uniontown *News,* which I wish you would look over and report on at your earliest convenience. I print the paper on a 10x15 Gordon jobber. This town has a population of 300, and I have a circulation of 450.

Very truly, Shannon Jones.

Lindsay, Neb., June 10, 1905.

Well, believe us, Mr. Jones, this is our earliest opportunity to comply with your request, and we assure you that it is a real pleasure to do so. The Uniontown *News* is a four-column quarto, with four pages patent—a regular "play" paper—in the forepart of its third year. There is not a displayed ad on the front page (now, what do you fellows say, who are running six- and seven-column quartos and yet set up the hue and cry that you haven't sufficient space to keep the first page clear of displayed advertising matter?) which is commendable; and the makeup generally is creditable. We would not pronounce the line of display type in use on this little sheet as first-class, nor say that it has been judiciously used, yet in the main the ads have a neat appearance, and are usually correct in their arrangement of the larger ones at the bottom and the smaller ones at the top of the columns. The impression on the locally-printed pages has a perfectly even aspect but is all a trifle weak. As to contents, condensed within this little sheet is almost as much news as many a larger weekly gives its readers, although it seems to us that the amount of local and personal mention is detrimentally small. If we were engaged in the publication of such a miniature sheet, we believe we would present most of our news in the common unheaded local form, since in this way the greatest economy of space would be possible. And now don't offer as an excuse for this lack of local news, the meager population of your town, Mr. Jones, for we tell you that a right wide-awake news-monger can go into a town of only three hundred population and scare up enough locals to fill at least three, and possibly four, pages of the Uniontown *News!*

O. Byron Copper, De Soto, Wis.

Dear Sir:—I don't expect any compliments on the copy of the *Opinion* I am sending you under separate cover. We have just one border in the shop, which you will note is used on the largest ad. Then we have some "linotypes" and some brass rule, and two series of display type. We print two pages on a Washington, and I rather think we are justified in violating your rule of "no ads on first page." I'm the "whole smear"—do all the composition myself, and should appreciate your verdict on my efforts. I admit that I don't give a great deal of thought to ad composition, but have a bad habit of "slapping 'em up." I am seriously contemplating a reform along this line. I never read your department in the N. P.-J. but that I get excited.

Three hundred people in this town.

Fraternally yours, A. M. Church.

Kimball, S. D., June 26, 1905.

Now, here is a modest editor! For, considering the difficulties under which the Lindsay *Opinion* is gotten out, it is in our opinion, quite deserving of some compliments. In the first place the *Opinion* is a fine specimen of that kind of Washington hand press product we hear the old-timers tell about—the impression for clearness and nicety verily surpassing that of much of the product of more modern printing machines. We note that the scarcity of borders is quite a drawback; nevertheless, Mr. Church has grappled with the difficulty in a most masterful manner, and despite the fact of his above confession of giving his ad work but little thought, the displayed composition presents a very creditable appearance, as we prove by reproducing herewith "the biggest ad" (No. 1) because it is it that has the "only border"

No. 1.

in the shop around it. We are quite sure Editor Church would not desire to see any of the "linotype" creations shown here—but we are willing to stake our reputation as a fair judge of such things in the statement that there are some handsome pieces of typography among these, too, especially that ad of "Schmadeke & Boe," and that of the "Lindsay State Bank." The fact that Mr. Church has approximately eight columns of displayed advertisements, and only two seven-columned pages in which to distribute them, compels us in this instance to forgive the appearance of displayed matter on the initial page. While the pointers anent the lack of locals, meted out in the foregoing criticism might profitably be repeated here for this editor's special benefit, yet we cannot omit giving Mr. Church's editorial efforts the praise which it so richly merits. The style thereof is so genial, witty, light and airy that the reader must indeed be a hard-hearted cuss who is not charmed by it! We forgot, while speaking of the ads, to add that great variety of series, nor great variety of borders, is not necessary to good display; and that it takes a "cracker-jack" founders' border to sur-

pass plain brass rule in excellence in newspaper advertisement composition. Now, don't get excited any more, Brother Church, but get just as enthusiastic as you please.

O. Byron Copper, De Soto, Wis.

I am sending you under marked wrapper copy of last issue of the *Graphic,* not for criticism, but as a "matter of good faith," believing that you enjoy looking over neatly printed newspapers, on general principles. When we get to it, am going to do away with ads on first page and put in a full series of handsome head letters, and run double deck heads on first page. I enjoy reading your criticisms and agree with them right along, but we can't all come to *our own* ideal in hardly anything. Fraternally yours,

C. R. TINANN.

Publisher Tinan is right. First, he is right in his supposition that we enjoy looking over such "neatly-printed newspapers" as the Kimball *Graphic* proves to be. Secondly, he is right in that none of us are able at all times to attain to our ideals; but it is good to maintain high ideals, just the same, for the degree in which such maintenance helps us in great achievements cannot be accurately estimated. However, we know for a certainty that in just the degree that a man's ideals are preëminent, likewise are his achievements eminent. And lastly Mr. Tinan is right in apprising us of the fact that he agrees with us in all of our high ideals as applied to newspaper-making, for such demonstrations of approval encourages one in the maintenance of embraced ideals. The Kimball *Graphic* was, we believe, but recently reviewed in these columns, hence, a rehearsal thereof would be superfluous at this time. But we cannot refrain from mentioning the excellence of the contents, and the excellence of the editorial work on this paper. Mr. Tinan has a literary style that makes his "locals" interesting to anyone—that makes them real literature, in fact—some of his wedding notices sounding exactly like the winding up of a high-class novel.

MAYVILLE, N. D., July 8, 1905.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Under separate cover I mail you a copy of the *Tribune,* containing a lot of ads, concerning which I would like to have you pick out the faults and mention the merits—if any. These ads are fairly illustrative of what we do here in that line. The edition of fourteen pages, 1,600 copies, was gotten out by two men in a couple of weeks, aside from the regular issue; so you see the ads are probably not representative of the best we can do, had we plenty of time. If not asking too much, would like to have you show what you consider a couple of the best—that is one of the things, on occasion, publishers take the JOURNALIST for, I presume. Respectfully,

D. LARIN.

Dear Mr. Larin, didn't you know that one couldn't ask

too much of a newspaper critic? That's what we're here for—to instruct you and to please you, if we can. Since our contributor has specially requested that our attention be given particularly to the ads in the publication submitted, therefore, it shall be as he desires, but that the reader may not be entirely in the dark, permit us first to remark briefly upon the whole. The sheet before us is a copy of the "Woman's Edition" of the Mayville *Tribune,* a six-column, fourteen-page product, containing over ten pages of advertisements, besides an abundance of special articles, handsomely illustrated with fine half-tone engravings. The contents, so far as we have observed, are exceptionally good. The ads are principally in half- and quarter-page spaces, and, as a rule, are fair specimens of every-day "rush" composition. The

No. 3.

first full-page ad on the initial page was a difficult piece of composition to treat, especially in a country office, because of the fact of the innumerable number of display lines, judicious distribution thereof; the display is correct and the "balance" almost perfect. Of course, we find one or two trivial defects, namely: "Course of Study," it seems to us, should have been set in text and surrounded by the one-point rule, uniform with the other heads in these two side which has necessitated the use of too many different series of type to produce a really artistic effect. The design and arrangement, however, is serviceable and all right. To comment upon all of the ads in this special "Woman's Edition" separately in this month's instalment is hardly possible, hence we take the liberty of passing on to the matter of choosing those which, in our opinion, are the two best ad specimens in this special edition. The selection of the best ad in this paper is not a difficult task, that of the Mayville State Normal School being head and shoulders above any other specimen in the sheet (No. 2); but when it comes to deciding upon a second best, we find ourselves confronted with something more of a problem—it being practically a "toss up" with us between several of the ads; but finally we have determined upon the one shown (No. 3). Now then, our reasons for having selected No. 2 as the best ad-specimen in this copy of the *Tribune* are, briefly, because of its conspicuous beauty of design, abundance of white space and columns; the name, "Joseph Carhart, President," should have been centered, with "Mayville, North Dakota" centered beneath it, and the fact that the "Expense" head occupied a narrower panel than all the others is a defect—it looks to us that there had been plenty of room to have made this uniform with the other heads. While specimen No. 3 is less defective than No. 2, yet we have given the latter the preference because it is a much more difficult piece of composition, having occupied a half-page space, and contains an abundance of matter all of which has been admirably adapted to the space. The former, No. 3, is a very handsome specimen—plain, dignified and beautiful. The use of the one pretty series exclusively, lends to this piece of work an aspect of perfection which it is difficult to excel. The design, too, is really artistic, and the spacing and leading indicate a careful and skilful touch.

GRAVETTE, ARK., June 19, 1905.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Enclosed please find copy of paper with ads marked thus (X) which I would be pleased to have you criticise at your earliest convenience in the NATIONAL PRINTER-JOURNALIST.

Yours truly,

With the *News.* FRED F. FLATT.

We are very sorry to say, Mr. Flatt, that the ads in this copy of the *News* marked "X" are not any better than those unmarked, and that none of the ads in this publication are up to very high standards of composition. The great fault with these ads marked "X" is that the matter in them has been too much crowded by setting the displayed lines in too large faces, and likewise the body matter is invariably too large. This, of course, leaves insufficient white space. To be sure, two of the ads which have been marked for criticism, namely, those of "Lewis, the Photographer," and The Kansas City *World*," contain entirely too great an amount of matter, but even these might have been greatly improved by setting the body in smaller type. But in the "Harry Allsman" specimen was an opportunity for perfect "whiting out," and a much

more artistic effect than that secured; a suggestion of which may be realized by referring to exhibit No. 3, as shown herewith. The "Kansas City Daily *World*" ad is doubtless the most praiseworthy specimen, although in this, while the body matter has not been set in too large a face, perhaps, yet the lines are spread too far apart, rendering the display a trifle weak. The underscores in the first three displayed lines could just as well have been omitted and the body set solid, which would, as intimated, have allowed better opportunity for proper whiting out, which is absolutely necessary to good, strong display.

MUSCATINE, IA., June 19, 1905.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—By separate wrapper I have mailed you today a copy of the Muscatine *Journal*, containing four five-column ads for the Batterson Stores here, which I set about a week ago, and upon which I would like to have you cast your judgment in the NATIONAL PRINTER-JOURNALIST, of which I am a subscriber. Incidentally, I might state that the type used in the ads belongs to the customer, and that the whole selection consists of Jenson 12 pt., 18 pt. and 24 pt., and Roycroft from 12 pt. to 72 pt. Thanking you in advance for the favor, I am,

Very truly yours,

H. MAHRAUN.

This contributor, who like so many this month, is a new one, deserves high compliments upon the excellence of these ads of the Batterson Stores to which he calls our attention. From the company's types as listed in the above letter, the reader can easily imagine, we dare say, that these ads were good, but to prove it we will reproduce one of them considerably reduced (No. 4). We do not claim for these ads anything as to great originality of design or fancy fol-de-rol time-killing effects, but they are just good, serviceable and technically fine examples of ad-composition, which it were well for newspaper ad-men to duplicate. All of the quartette are about equal as to merit, therefore, the one we are showing has been selected at random. The only striking defect which our necessarily hurried examination has revealed is the bad spacing in the line "of Furniture, House Furnishings, Crockery, etc." Come again, Brother Mahraun.

The following earnest appeal from "Amateuria" can hardly be resisted:

FENNIMORE, WIS., June 20, 1905.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Am sending you a copy of the *Amateur Printer*, organ of the Mutual Association of Amateur Printers, under separate cover. Any notice you may be able to give same in NATIONAL PRINTER-JOURNALIST will be greatly appreciated.

Very truly,

LOUIS G. BRECHLER.

It is a pleasure that we are able to conscientiously preface our remarks with the statement that this official organ of the "Maap" represents as finely an impressed sheet as ever found its way to our mail box. The compliment all goes to the official editor, we presume, whose product, the *Amateur Printer* is, we take it. It is all the way through a very handsome little printed thing, excellent in all departments—make-up, typographical styles, impression and editorial. We would advise, however, the omission of periods in head lines, both as regards the title proper, and the author's name. Punctuation here, as we have oft said before, is neither useful nor ornamental. With reference to the cover page, however, we note the identical error cited in our last review of another amateur sheet, *The Missionary Enterprise*, and that is the inappropriate employment of that tiny turkey gobbler cut as an ornament on the cover of a magazine dated "June, 1905." Keep this in abeyance for use on your Thanksgiving number.

NECHE, N. D., July 8, 1905.

O. Byron Copper, De Soto, Wis.

DEAR MR. COPPER:—Enclosed are a few ad specimens clipped from issues of *The Chronotype* of the last few months, and I hereby submit them to your tender mercies for criticism in your ever-interesting and instructive department of the NATIONAL PRINTER-JOURNALIST. I thank you most heartily for what you have said of my work in the past, whether favorable or otherwise, and here's hoping that the power behind your pencil may never grow less.

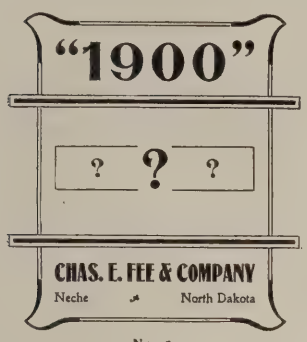
Yours truly,

REX H. LAMPMAN.

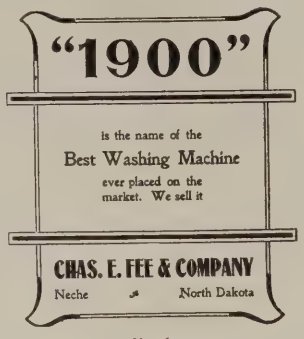
We venture, the name of Rex H. Lampman is not so unfamiliar to regular students of the N. P.-J. that we need mention the fact that he is not one of those new friends we have been "blowing" so much about this month. Since, as stated in the above letter, he sends us a budget of ads, it would seem that this instalment of "Newspaper Criticisms" was running chiefly to the review of advertisements; but, provided we do not reach our limit before then, we'll get down to the newspapers after awhile. Howbeit, it is a real pleasure to receive a number of newspaper ads for inspection, such as these from Mr. Lampman, who is, as we again decided on looking over these specimens of his, a master in

his line. We haven't the least fault to find with any one of these samples, of which we shall endeavor to show a goodly number (Nos. 5, 6, 7, 8, 9) inasmuch as that in each one of them there is something to learn—something profitable for every progressive knight of the job stick.

Here's another budget of ads, and from a compositor almost equally as skilful as that of the ads reviewed in the



No. 5.



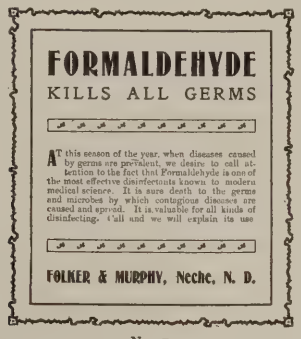
No. 6.

foregoing paragraph. He *is* a new acquaintance, however, and introduces himself thus:

MILBANK, S. D., June 19, 1905.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—I enclose herewith a number of my ads, some of which were taken from the paper and some from a book we printed for the high school at this place. These ads are the result of two years'



FORMALDEHYDE
KILLS ALL GERMS
At this season of the year, when diseases caused by germs are prevalent, we desire to call attention to the fact that Formaldehyde is one of the most effective disinfectants known to modern medical science. It is sure death to the germs and microbes by which contagious diseases are caused and spread. It is valuable for all kinds of disinfecting. Call and we will explain its use

J. LaMOURE & COMPANY
Neche, North Dakota

No. 8.

That's what we call an honest, modest letter from an "E(a)rnest" Tomowske! And, moreover, that's what we call a prodigious record—only two years' experience and the creator of Nos 10, 11 and 12! Our contributor's statement in the foregoing letter, and these three reproductions form an excellent suggestion for all printers who are dubbing along without the valuable assistance of the trade journals. These ads from Mr. Tomowske show a high degree of thought and care in their creation, and a high sense of art in their creator, and demonstrate, more forcibly than mere words ever could, how efficient such magazines as the NATIONAL PRINTER-JOURNALIST are as printers' instructors. This compositor has a natural skill that speaks big future things for him. His specimens are dainty, neat and tasteful, proving

that he has indeed "made the best of such material as he had," and that is not *bad,* by any means.

Now, our good friend, Leon E. Derr, is another one of our enthusiastic ad-compositors, who is becoming a regular co-worker in the building of this department, and he always

preludes his contributions with a letter which never fails of being worth reproducing. Here's his latest:

ANNA, ILL., June 24, 1905.

O. Byron Copper, De Soto, Wis.

DEAR SIR:—Enclosed find recent issue of the *Democrat*, which I wish you would kindly criticise. Bad rollers were the cause of the cuts filling up. Also find an ad, which I sent you in the spring. It was in the lot which you said escaped the waste-basket, in the last issue of the N. P.-J. in your criticism. I don't know where it escaped, for I never heard from the lot, and had some of my best samples in it. If you would see some of the "sows' ears" I get to make "silk purses" out of, you'd wonder that I could set an ad at all! But most of the advertisers, now, let me remodel the wording to suit the design, as in enclosed ad, so it is not so bad as in some offices. Thank you very much for your criticism of the "Kohn Clothing Company" ad last month. I'll try to be a worthy scholar, for I do want to be a printer "out of a rut." Hope you'll not think I am trying to rush too much to you, but this material was not at hand for the last lot I sent you. The N. P.-J. is certainly a fountain of inspiration to me, as there is no competition in this section of the country, and I cannot get it from other workmen near me.

Yours truly, LEON E. DERR.

The Anna, Illinois, *Democrat* is a seven-column quarto, with everyone of its spacious eight pages replete with matter of local manufacture. This copy is evidently from a sort of special edition—not in size, but in point of the character of its contents, we take it. The front page is taken up entirely with a special article relative to an annual meet in that city of the Egyptian Hustlers. This is elegantly illustrated—and the pictures are not confined alone to the first page—nor the article, either, for that matter—for all the pages are graced here and there with a halftone or two, representing the various exterior decorations manifested by Anna business men during the gala days. The *Democrat* gets a fine patronage from local advertisers, and their ads have, as a rule, been well treated at the hands of the compositor. Mr. Derr need not to have feared the consequences had we thought he were responsible for the presswork on this sheet, since that will stand a comparison with the average newspaper. The makeup on this publication, however, comes a long way from being in accord with our ideal—the ads are arranged rather too much on the "hit and miss" style, and all seem to be struggling for that position which Brother Woodworth—and all advertising men—think they ought to have—"top of column, next to pure reading matter." A commendable feature is the allotting of separate pages of special localities, and the excellent editorial department must be praised for its extent and exceptionally high character. There is an insufficient degree of uniformity in the size of the letters employed in the heads in this paper to call forth our approbation in this respect. As we have intimated, the ad composition is good, serviceable, every-day work, but we believe as Mr. Derr continues in his study of the trade journals, he will eventually improve these as to artistic treatment and design. In fact, we know he will; for true desire is prayer; and the day of answered prayers is not yet past, by any means. This in consequence of our correspondent's desire, as above recorded, relative to becoming "a printer out of a rut." The large ad which accompanied this paper under review is a most praiseworthy specimen, being well designed, well displayed and treated well as to detail (No. 13). In such examples, however, a more harmonious effect is secured by the employment of one- or two-point bold rule, in place of music face, in the panels. And, of course, where the bold rule is used, greater margins should be allowed between the type and rules to give relief to the black lines.

Being unable to finish the review of all papers and specimens received this month, we are, therefore, holding the following publications for consideration in our next instalment, which, at least in the number of interesting publications with whose reviews it shall be constituted, promises to surpass this or any of our past efforts: *The Egyptian Hustler*, Anna, Ill.; *Guard*, Council Grove, Kans.; *Journal*, Newark, Ark.; *Argus*, Albion, Iowa; *News*, Mound City, Mo.; *Enterprise*, Estherville, Iowa; *Press*, Thief River Falls, Minn.; *Independent*, Middletown, Cal.; *Socialist*, Toledo, Ohio. And before closing, we feel it incumbent to state that "at the bottom of the pile" we have discovered another copy of the Gravette, Ark., *News* in which the ads appear to be considerably better than those in the copy reviewed above, and concerning which we shall try to have something to say next month.

O. BYRON COPPER.

THE GREEN BOOK OF SPRING.

We have just received from the American Type Founders Company a copy of the Green Book of Spring which is a fit companion for its predecessors—the Printer Man's Joy and the Golden Book of Business. There was a wide divergence between the Printer Man's Joy and the Golden Book of Business, each of which were more or less of a decorative nature, but this later specimen shows illustrations of more simple forms of type arrangement, and yet it is at the same time a most notable pamphlet showing, and will, we fancy, prove equally as attractive to printers as its predecessors. It consists of thirty-two pages illuminated in colors and printed on different grades of beautiful Roxburghe papers.

Such pamphlets as these cannot fail of appreciation for they contain suggestive hints which the printer can readily adapt to treatment of the printing which comes to his own office and will, we judge, result in inducing the printer to order these beautiful type faces and ornaments to supplant obsolete and discarded types which are hardly in keeping with the present day requirements. Printing of the character indicated in these specimens cannot fail of interesting the printers' customers and thus bring profitable returns.

NEW YORK, April 28, 1905.

To the Members of all local Typothetæ and Master Printers' Associations affiliated with the United Typothetæ of America.

GENTLEMEN:—The nineteenth Annual Convention of the United Typothetæ of America will be held in the city of Niagara Falls, New York State, during the week commencing Monday, Sept. 4, 1905.

As Monday, Sept. 4, is a legal holiday in many States, the convention will be called to order at 10 o'clock on the morning of Wednesday, Sept. 6.

The Credentials Committee will be on hand at 10 o'clock on the morning of Tuesday, Sept. 5, and all delegates and alternates are requested to have their credentials in the hands of this committee at some time during that day, Tuesday. As admission to the hall will be by card only, and as the convention will be promptly called to order at 10 o'clock on Wednesday morning, the necessity for having all credentials issued on Tuesday is obvious.

In addition to the regular delegates and alternates from local Typothetæ, any members of locals will be made welcome at the convention, although, of course, such members will not have the right to vote.

Further information as to headquarters, hotel accommodations, transportation, etc., will be issued in ample season to enable members to make arrangements for attendance.

JOHN MACINTYRE, Secretary.

Among the Associations

"In Unity is Strength"

KANSAS Editorial Association will make a summer excursion to Portland, over the Union Pacific. The party will leave in special Pullmans from Kansas City, Friday, August 4th, and will be the "Dells" in Oregon. On the return there will be a stop at Salt Lake City and probably one also at Boise City, Idaho. The party is in charge of J. E. Junkin, secretary of the State Association.

The Suburban Press Association of New England met June 19th and arranged for the next meeting on July 17th at the home of the Treasurer, with a trip over the North Shore and Mystic Valley routes. Capt. J. S. Cushing of the Norwood *Press* was the special guest of the Association and delivered an address on the labor crisis among printers, timed for Jan. 1, 1906. We quote the following as to Mr. Cushing's remarks, from the report of the Recording Secretary, Mr. A. Starbuck:

He spoke of the tremendous power that rested in the country press, in its influence upon the young, and the important position it occupied in the national, state and municipal life. In his early life he had been connected with the Christian *Register*, the Boston *Journal* and the Clinton *Courant*.

UNIONISM DRIVING OUT WORK—THE EIGHT HOUR DAY CONTEST.

The work of the press, as well as of employers, is not to antagonize unions, nor to prevent the workingmen from doing the best they can, but to prevent union men from injuring themselves. In 1898 the nine hour day was quietly and harmoniously introduced. Since then nearly every master printer has annually been visited by unions demanding increase of pay. In many cases, rather than have trouble, the matter has been compromised. In seven years, in Boston printing offices the working day has been reduced from 10 hours to 9 hours. At the same time the minimum wage has increased from $15 to $18 per week. This certainly shows well for the good disposition of employers. In the meantime employes have grown bold and arbitrary. They say they will force increased pay and decreased hours until they bankrupt the employers and then see what comes. Even now six hours is looked forward to for a printer's day. In the past 100 years there has not been so much gain for the employer as to warrant such increase of pay and diminution of the hours of labor to employes. The prosperity of the country has enabled employers to raise prices to customers and so to meet the demands of employes, but the limit has been reached. He recently asked an extensive publisher what would be the effect of again increasing the cost of work to him. He replied by saying that he recently had sent abroad a book to be printed, and had paid $6,000 for work that would have cost, done in the United States, $9,000. From that you may readily see what will happen by increasing prices twenty per centum as is contemplated by the printers' unions.

The United Typothetæ, the employing printers' association held a meeting recently in Minnesota and sent around to 250 employers whose interests center around St. Paul and Minneapolis for a consideration of this matter of a further reduction of hours. The employers there are determined to resist this new demand. In Kansas City, Atlanta, Ga., and here in Boston in Faneuil Hall, similar meetings were held and the same sentiments were expressed. There was not a dissenting voice. A referendum vote taken among the 46,000 in the International Union showed 19,000 in favor of demanding an eight hour day, 6,000 opposed to it and 21,000 not voting. The 19,000 ought not to be able to enforce the misery liable to come, if the attempt is made to enforce such a demand. Capt. Cushing appealed to the newspaper editors to give to the people these facts in their papers.

The International Union has ordered that no union shall be allowed to make a contract extending beyond Jan. 1, 1906. The St. Louis Union, one of the strongest in the country, in spite of the order made a contract for three years, and had its charter revoked.

Union, today, unfortunately is largely socialism. The employer of the present is working harder and more hours than when he stood at the case. Asked what proportion of the number of printers were members of unions, Capt. Cushing said about one-third.

Most of us come into touch with our readers, and the readers at frequent intervals touch elbows with each other so that if we were disposed to be sensational or imaginative or prevaricative, our sins would soon find us out and our respective papers would suffer from loss of confidence and would cease to be regarded as reliable. I am not intending to intimate that any of us are merely honest, conscientious, news gatherers, because, forsooth, we must be, for I believe that most of our members would continue to conduct a real newsy newspaper even if it was unpopular and would go out of the business rather than cater to that which is low and vicious.

FORTIETH ANNUAL CONVENTION—ILLINOIS PRESS ASSOCIATION.

Forty years cover more than the average active business life of a man and stand, in this new land, for wonderful changes. For this length of time, the Illinois editors have met in annual conventions and discussed ways and means for mutual improvement, yet the advances in ideas and methods have been so great that there is no danger of a dearth of topics for profitable consideration during another forty years. The meeting this year was at the Lexington Hotel, Chicago, and was opened with prayer by Rev. Davidson, a city missionary of the Episcopal Church, who asked that the press might be used "for the further enlightenment of the world" and that "we may go forward with a deeper sense of that responsibility of the great work." It is the opinion of many that newspapers afford a field much in need of missionary effort. President John M. Rapp, of the *Record*, Fairfield, delivered a practical address in which he said, among many other things useful to members of the calling everywhere, and, in some instances, valuable to all the great body of citizens of the States outside of the calling:—

MUCH IMPROVEMENT NOTICED.

It is with pleasure that in looking over my exchanges I see the improvement from year to year in the appearance and quality of the papers. This Association in its yearly work has been teaching its individual members how to gather and glean out all the news of their respective communities and place it before their readers in shape that is so attractive as to bring increased circulation and influence. By all the news, I, of course, mean all the news that is fit to print. I am sure that there is no member of this Association who has attended many of our meetings who has for a moment any idea that a real newspaper should ever be a clearing house for scandal or a cesspool for mixing the filth and venom emanating from the depraved tongue and mind of the street corner loafer. The country newspaper can and should contain enough of spice and ginger and real humor to make it readable, and keep the community in a good humor. Don't be a constant growler, so as to give yourself and all with whom you associate the blues. You and your paper can do

much toward making the community happier and better by giving the readers an occasional good, hearty laugh.

It may be that I am an optimist, but I am convinced from my limited observation, that in recent years at least the appetite of the rural communities for papers and periodicals of a cheap and trashy character has been rapidly changing, and has been largely replaced by a desire for something better. As these communities come first in contact with their home papers I believe I am not claiming more than is due, to the credit of the country editor, when I state that the change for the better is largely due to your influence and efforts. If this be true, it surely stands the members of this Association in hand to guard well their columns and see that this influence for good shall continue and shall be increased many fold by inducing a stronger and larger union of forces in securing for our membership every newspaper in the State.

THE RURAL ROUTES.

The rural routes have come to stay and they will be extended and become more useful each year. Rightly used, they may be made a powerful medium for extending the circulation of the local paper. There is no doubt but that they help the city paper too, but most of the patrons of the route will prefer to read the items of their home community as printed in the local papers, if it becomes a question between the two. It is essential, therefore, that one gives the news, especially of the communities traversed by these routes, and it is well also to cultivate friendly relations with the carriers on the various routes.

KNOWN CIRCULATION FOR FOREIGN AND HOME ADVERTISERS.

I have always gone on the theory that the foreign advertisers and the home advertisers were both entitled to know the real facts concerning the circulation of the *Record*. This policy may have been induced by the fact that I was able to place the actual circulation at a figure which, for my section of the State, was a just source of pride, but I am fully convinced that no matter what the circulation, honesty in making reports is always the best policy. I have heard many complaints in past meetings concerning the conditions imposed by the directory publishers and the hardships resulting from failure to comply with all their demands. I am not here to defend all the policies of the directory men, but I have found it not hard to comply with their conditions and when I have given them a fair, truthful, itemized statement, which I do at the beginning of each year, I have found my rating correct, and this without one cent of expenditure from me. I have not been compelled to purchase their directory or take advertising in their book.

FIRMNESS AS TO PRICE BRINGS DESIRED RESULTS.

During the past few years foreign advertising has gradually grown in volume and it is of great importance to the country editor to secure his share of the business at a price that is fair and just to himself. Foreign agencies seem to be established with a view to securing as much as possible and paying as near nothing as possible and to keep the difference, unless watched with greatest care. This is a strong indictment but I believe it applies almost universally, and, yet it is true that these agencies may be dealt with on business principles. I find from experience that a firm adherence to a fixed reasonable charge will almost universally bring the desired result. It requires considerable correspondence and a vast amount of patient, yet firm explanation, but a firm adherence to the price named usually brings the desired result. Then if you have not agreed to do more than you can carry out in the matter of position, and present bills when due, matters usually work out all right.

RELIABILITY REQUIRED IN A HOME PAPER.

The President briefly reviewed subjects on legislation of interest to newspaper publishers and to the public as well, that came before the last session of the Illinois Legislature of which he was a member and commended the provisions made toward good roads in the providing of $25,000 for work by expert road builders throughout the State and the use of prison labor in furnishing the crushed stone for the roads.

"The Relation of the Editor to the Politician," was ably discussed by Mr. A. W. Charles, of the *Democrat,* Carmi. He said:

Is it surprising that the editor of a newspaper who is with his party organization, who helps make the plans; who cheers his choice to renewed effort even in the face of defeat; who assures the followers that the prospect is bright; who consoles the vanquished in the hour of defeat; who hatches out the explanations of how it happened; is it any wonder I repeat, if he falls a victim to habit and graduates into what the public regard as a politician? He would probably be a statesman but the offices are filled.

In conclusion, he gave a summary of practical wisdom for conducting a political paper:—

Keep the newspaper out of party contests. Whatever you may be personally, keep your paper unprejudiced. If your political treatment of the men in your party is fair and impartial they cannot rightfully complain at your personal attitude. If you would enjoy an amiable relation to the politician treat him with fairness and publish a strong, newsy, popular paper. Get the people behind your paper. Get the patrons, readers and friends and you will get the sensible politician. He can hear the zephyrs of public opinion as far as anyone and always knows which way the wind blows. If the editor will attend to his conduct, observe the proprieties and have a due regard for the dignity of his profession, the relations of the editor to the politician will be as happy as a ratification meeting.

Miss Mary Davidson, of the *Republican,* Carthage, discussed in a most interesting and sprightly manner "Auxiliary Press Associations," a subject that has very frequently had a hearing in these pages but has very seldom served as a topic before a State Press Association though auxiliary County and district organizations are becoming more numerous and more useful every year.

J. V. Beatty, of the *Herald,* Nunda, gave, as a rule for fixing advertising rates, the plan of ascertaining the weekly cost of the paper and then making the advertising charges cover that cost by grading the rates on that basis.

A. R. Van Skiver of the *Free Press,* Streator, argued, in a well-written paper, for placing railroad advertising on a business basis and not treating such advertising as an exchange of courtesies in which the newspaper man could only use the courtesy for himself or family.

Mr. Dudley Walker, advertising manager of the Chicago and Alton Railroad presented the other side of the subject under the topic: "The Relation of the Railroads to Newspapers." He passed high compliments to the usefulness of the press and showed some of the difficulties that confront railway men in dealing with the promoters of prosperity. He made a good showing for the present system of railway management and received a rising vote of thanks for his able paper. He and his road are known for their liberal and courteous treatment of the press. C. D. Tufts, of the Centralia *Democrat,* presented a deeply metaphysical paper on "Why Should Not a Bachelor Editor Marry." He gave humorous hits at, and cast side lights upon some of the modern ideas and practices of marriage or the married and the divorced and race suicide. He said:

"'Twere better not to be born at all than to be born to take second place to a poodle. I can not conceive of a greater misfortune that can come to a child than to be born into a family where it would be obliged to share a place in the affections of its mother with a wooly dog with pink eyes and a fluffy tail.

"I am glad to see that in some states it is proposed to tax bachelors. This is a favorable sign. It is only things of value that are taxed, and for the government thus to distinguish bachelors as compared with untaxed married men would be a reward of merit."

The following were chosen officers for the ensuing year: President—J. B. Castle, *Argus,* Sandwich; 1st V.-P.—Clarence F. Buck, *Republican-Atlas,* Monmouth; 2d V.-P.— Edwin Dyson, *Times,* Rushville; 3rd V.-P.—Miss Mary Davidson, *Republican,* Carthage; Secretary, J. M. Page, *Democrat,* Jerseyville; Treasurer—Victor Haven, *Argus,* Greenfield.

Executive Committee—M. F. Walsh, *Herald,* Harvard; A. R. Van Skiver, *Free Press,* Streator; S. K. Strother, *Courier,* Taylorville.

Auditing Committee—J. W. Wild, *Free Press Gazette,* Nokomis; E. M. Johnson, *Free Press Observer,* Pontiac; Terry Simmons, *Plaindealer,* Marseilles.

Legislative Committee—Hon. E. A. Snively, Springfield.

We have reserved some of the facts concerning the convention in order to give extracts from a report, par excellence, made by the editor of the Marsailles, Ill., *Plaindealer,* to show how a good writer, with his heart in the work, can

make the account of an editorial meeting racy and interesting, even to the laity, the readers of the home newspaper. The *Plaindealer,* in part, said:

Next Miss Mary Davidson, who is the charming president of an auxiliary press association in her section of the state, spoke on "Auxiliary Associations," tossing a bouquet to the "La Salle County Editorial Association" for which the fraternity is duly thankful. It was so able and pleasing an effort that the young lady was later elected third vice-president of the association in recognition of her merits so clearly shown. Two editors in turn talked of "Home Print ing house discussion in which the publishers learned much to their individual advantage by comparison of what their experience amounted to in comparison with that of others of the profession.

Most of the editors are up in musical matters and when the Saint Cecilia quartet of ladies sang a selection it had to be high-grade. There was no mistaking the verdict, that encore was the genuine article. The ladies kindly appeared in several selections.

Right here we are going to speak out. The editors assigned topics on the program who not only failed to be present and take the prescribed part, but also did not send in their productions to be read by some one else did the association an injustice. It's expensive

In Convention Hall, Lexington Hotel, Chicago.

versus Patents" and "Advertising Rates." Both were decidedly practical and supplied pointers of value.

It has been the practice to secure a noted speaker to deliver the annual address and out of modesty this honor has been allotted to a gentleman not of the association. This year the association came into its own estate and Hon. Morris Emerson, of the *News-Herald,* Lincoln, a veteran member, was the star of the sessions, giving an address the members could not fail to be proud of. In their order "Co-operative Buying," "Cost of Plates" and "Cost of Patents" received due attention from three editors. This was in the nature of a clear-

to attend the meetings and there should be no failures in the way mentioned. This advice has a local bearing as well. If your name appears on a program do your part personally or secure a substitute. It's unfair to the committee placing you and the audience gathered on the strength of such action to do otherwise.

And now, in the language of the preacher, "a few more words more and I will be done." Mr. Douglass Hapeman, formerly of the Ottawa *Free Trader,* was present and presented an invitation from Ottawa's mayor to the association for it to meet in 1906 at Ottawa. Back of this call stands the whole printerhood of this great county

of La Salle, thirty-five publications in all, and its organized body, the La Salle County Editorial Association. The invitation was referred to the executive committee for consideration, the chairman of the committee being A. R. Van Skiver, of Streator. Others are after the meeting, the most active competitor being Champaign, through the personal invitation of the president of the Illinois State University. If Ottawa and this county is to be honored by the presence of so eminent a body as the state association much inducement must be offered of an attractive nature. Marseilles and La Salle will be glad to join hands in the move to have the meeting at Ottawa with those cities links in an entertaining way where desirable. Starved Rock itself is an inducement of a high order. Personally, from an acquaintance of long years with the older members of the association, the writer would be treading on air fairly if the deal can be made to assemble the editors at Ottawa.

Six Chicago dealers in paper, type, machinery and rollers respectively, gave a complimentary theater party Thursday evening at McVicker's theater to the association. The best seats in the house were occupied by the large body of editors who appreciated the kindness of the firms by a thorough enjoyment of "All 'Round Chicago."

At five in the afternoon of the last day the gates of the White City, Chicago's latest and most glorious triumph in the amusement field, were opened to admit the Illinois Press Association, Chicago Press Club and Milwaukee Press Club to an opening solely for the press. The crowd was turned loose to inspect all ready for it. But few of the attractions were in shape, the regular opening being due a day later. The editors' nose for news was poked in "behind the scenes" and we fancy that the unexpected they unearthed in the rounds was little short of what the actual will be as a fund of genuine amusement. Enough was seen to bother the most adept in description to do full justice to the "City" possesses fascinations in size, architecture, decoration, lighting, attractions, etc., we will devote more space to in a later issue. At eight o'clock performances were commenced and continued for two hours, when the management provided a lunch. As the editors departed their last look down in to the "City" was taken from the L cars which bore them to outgoing home bound trains. It was a vision that entranced by its beauty, the vast and superb illumination giving to the scene the glory of a magnificent fairyland.

HON. HIRAM YOUNG DECEASED.

One of the honored members of the N. E. A. who attended many conventions and gave of his best thought and wide, successful experiences for the benefit of the newspaper editors and publishers, at their annual gatherings, was Hiram Young, editor in chief of the York, Pa., *Dispatch*. He was an earnest man of deep convictions and a clear and able speaker. He died at his home in the city where over forty years of his life had been passed, at 3:45 o'clock, Thursday afternoon, July 13th. His demise was as of one falling asleep, all life's work nobly done and its labors finished. He was surrounded by his whole family, including his four sons, Edwin S. Young, Charles P. Young, William L. Young, and John F. Young and their wives. His four sons were associated with him in business and will carry on the work, the large newspaper and job printing business which he had established and to the success of which, for many years past, they have greatly contributed. Mr. Young was of German lineage, and his great grandfather, on the maternal side, came from Germany in 1729 and founded Scheaffersburg, Pa. His grandfather was captain in the Revolutionary War, commissioned in 1776 over a company from Lancaster County, Pa., and served under Washington. Mr. Hiram Young was born May 14, 1830. His father died early in life and the boy passed his early years in the family of his grandfather in Scheaffersburg, where he obtained the basis of an education.

His earlier years were filled with varying employments and experiences, fitting him with that general kind of training, that touch with different employments, and that broad, general and practical knowledge so useful to an all-around newspaper man. At fifteen years of age he was apprenticed to the saddler's trade and served four years acquiring the habits of steady, close application and untiring industry, while he devoted every leisure hour to reading and study. He followed the trade but a short time after his apprenticeship ended and in 1850, having a growing and natural inclination for books, he became an employe of a bookseller at Lancaster, meantime pursuing a course of study in the Lancaster High school where he excelled as a pupil. His purpose of taking a college course was diverted at this period in his life by accepting a position in the large publishing firm of Uriah Hunt & Sons and later with J. B. Lippincott & Co., in Philadelphia. Having acquired a practical knowledge of the book business, he returned to Lancaster and went into business for himself. Owing to his co-operation in the educational work with the first superintendent of schools of Lancaster county, Mr. Young built up a large trade at once. This success in business led his former employes at Lancaster to invite him to join them in a new firm which became Murray, Young & Co. Desirous of embarking in business for himself, he sold out his interest at Lancaster and in 1860 moved to York, where he resided. He opened a bookstore, which he continued until 1877.

During the presidential campaign of 1860 Mr. Young was a Douglas Democrat, but after the election and at the outbreak of the Civil War in 1861 became an ardent supporter of President Lincoln's administration, since which time he had been an earnest advocate of the policy and principles of the Republican party. In 1862 he assisted in organizing the Union League at York and in 1863 was placed on the Republican State Central Committee. During the fall of that year, when Andrew G. Curtin was reëlected war-governor of Pennsylvania, he, with a number of other patriotic citizens of York issued a Republican campaign paper called the *Democrat*. This was the beginning of his newspaper career which extended over a period of forty years. On June 7, 1864, the day of the Republican national convention at Baltimore, which nominated Abraham Lincoln for his second term, Mr. Young, as publisher and editor, issued at York, the first number of the *True Democrat*, an ardent Republican paper, earnestly devoted to supporting the progress of the war and the Lincoln administration. This paper wielded a strong and popular influence in the county of York and throughout a large portion of Pennsylvania in its advocacy and support of the national government during the trying period of the civil war. It was ably edited and well conducted and soon reached a large circulation. In 1876 he founded the York *Dispatch*.

Mr. Young was at one time the nominee of his party for Congress, though receiving a large vote, he was fortunately for his newspaper career and for himself and family defeated. He was ever active in forwarding agricultural interests, was president of the agricultural society and a member of the board of the State Agricultural College. His life was a model of activity and usefulness. He improved all those opportunities, ever open to a live, intelligent, discreet newspaper man for helping to build up and to forward all the educational interests of his community and State especially along industrial lines. He leaves a splendid newspaper and printing business to his sons through which his useful life work will be continued. He was a genial companion, whole-souled and manly. Few men were better informed on all the facts and theories as to the protection of American industries. A most studiously prepared paper, from his pen, covering the history and results of tariff legislation for a hundred years, was used as a most important and effective campaign document in a National campaign.

Called out, without a moment's notice, in a discussion that was sprung at the convention of the National Editorial Association in Galveston, he presented, in a talk of ten or fifteen minutes, a breadth of information, an array of arguments and an eloquence that revealed the earnest, ready, well-equipped newspaper man ever ready to treat, instructively, every public question with convincing facts and intelligent views and favor-winning candor.

FIFTY-SECOND ANNUAL CONVENTION OF THE NEW YORK PRESS ASSOCIATION.

By John P. Herrick.

It was in the heart of the three million acre Adirondack forest, "under the trees," that the fifty-second annual convention of the New York Press Association was held. The place was the Hotel Ampersand at the north end of Saranac Lake and the time was the last three days in June. The Ampersand is a great modern hotel, set on a bluff 70 feet above the lake, with a view from the wide verandas that is ever charming, a vista of lake and sky, island and mountain, forest and glen. On the mountain side to the west of the hotel in the spruce forest and along the lake side are cottages and tents, lighted by electricity and furnished with all modern conveniences. At night the walks that connect the cottages and tents with the hotel are brilliant with arc lights and the fortunate dwellers breathe the pure ozone that is wafted from the great forest and "take their ease, under the trees."

It is an historic region. Not far away is the grave of John Brown, marked by a great boulder, the John Brown soul goes marching on. Every year his grave in the wilderness is visited by thousands. Across the mountains is Fort Ticonderoga, made famous by Ethan Allen's daring. The ruins of old Fort William Henry are over to the southeast. To the north is the scene of Irving Bachellor's "Eben Holden" and "D'ri and I," two stories of the big woods that enjoyed a wide reading. Across the inlet is Mark Twain's summer home. Two miles away is Saranac village, a trading center for the thousands of lodgers and campers in the wilderness about. There is boating, fishing, driving, tennis, golf to interest and add enjoyment to a stay in the woods, and across Saranac Lake two launches make several trips a day. In Lower Saranca Lake there are fifty islands. The Indians called it "The Lake of the Clustered Stars."

The editorial party, numbering 150, arrived at Saranac station at seven o'clock, Tuesday evening, June 27th, and were conveyed in coaches to the Ampersand. General Passenger Daniels of the New York Central provided transportation for the party over the Central lines and the other railroads in the state furnished transportation to members to reach the Central. The evening was spent in "visiting," in walks and talks with a musical program and dancing in the spacious parlors It was the second time the association had met at the Ampersand. In 1893 the first meeting was held there, and it was one of the most enjoyable in the history of the association.

Wednesday morning, June 28, the first session was held in the Ampersand parlors. President John W. Slauson of the Middletown Press was in the chair. Robert McNeil, a boy soprano of wonderful voice sang two solos, one an encore. Prayer was offered by Rev. L. W. Hones, editor of the Roscoe-Rockland *Review,* and chaplain of the association. President Slauson's annual address was full of goods things. He reviewed the marvelous changes in the world since the association met at the Ampersand in 1893. The new maps that had been necessary, the new inventions, the marvelous improvements in the gathering and dissemination of news, the improvements in preses and type-setting machines, "Wireless telegraphy," he said, "is already an old story. Only a few days ago I received a Marconigram, sent from a ship in mid-ocean. It was received by a sister ship a thousand miles away, by her transmitted to a Long Island coast station, and in my hands a few hours after it left the first ship." Continuing, he said, "With the improved means of making newspapers, the newspaper itself is stronger, abler, better; on a

higher plane today and its utterances and opinions received with more respect than ever before in the world's history. Even the yellow journals have lost something of their vivid hue. Vulgar sensationalism is not flaunted so offensively as once. On the whole the situation is healthful and encouraging."

Secretary Bunnell called the roll for the thirty-seventh consecutive time and read the treasurer's report which showed a considerable balance on hand. He told of the progress he was making with the "History of the New York Press Association" which he is writing. It is expected that the work will be completed this year. The association was organized at Elmira in 1853 with 32 members. Only two of the charter members are alive today, Col. H. A. Dudley of Warsaw, now retired from active newspaper work, and Dr. G. W. Pratt of the Corning *Daily Journal* who is still in the harness, though feeble in health. A meeting has been held every year excepting 1861, 1862, 1863 and 1864, during the war when it was not possible to get the members

THOMAS P. PETERS, Editor Brooklyn Times
Active in Securing Amendment to New York Libel Law.

together. If ever an officer of a press association was loved by the members, that man is A. O. Bunnell. After he had served 25 years he was presented with a $500 silver service and only a few years ago he was presented with a bag containing $300 in gold coin. So long as A. O. Bunnell lives, he will serve the New York Press Association as secretary and treasurer.

President Slauson appointed standing committees as follows: Organization, W. J. Kline, F. P. Hall, W. J. Pollard, W. A. Smyth, D. W. Murray; Finance J. H. Hunt, G. M. Shull, J. H. Smith, W. H. Greenhow W. H. Bayliss; Resolutions, G. A. Williard, J. A. Canfield, G. E. Marsellus, L. S. Stivers, C. H. Grose. To revise membership roll, H. J. Knapp, A. C. Kessinger, John P. Herrick. The report of the National Editorial Association meeting at Guthrie was made by H. J. Knapp, state committeeman. He gave a thirty-minute talk, describing in detail the fine meeting held at Guthrie, the hospitable entertainment of the people of the southwest, the sport at Miller's Ranch, the ride across the desert, the delights of the tour of California and Oregon "Yesterday, today and tomorrow," he said "we spent in Portland viewing the exposition." That caused a burst of laugther for many of his hearers supposed that he had actually made the trip when in reality he was only telling a fairy story. The story was told in so serious a vein that it was really delightful.

Thomas P. Peters of the Brooklyn *Times* told of the fight made last winter to have the libel law amended. Mr. Peters and Louis McKinstry of the Fredonia Censor spent much time at Albany and made a determined fight for the proposed law. The bill passed the assembly but went to sleep in the senate after receiving twenty votes. This was considered making good headway, as it is known the fight will be a long one, and plans are being made for pushing the fight next winter. Mr. Peters gave a history of the famous Annie Oakley case which originated in Chicago and has already cost the newspapers over $40,000, with many cases yet to be tried. The present libel laws he said allowed ambulance chasing lawyers to secure judgment against newspapers for innocently publishing news received by press wire or in plate form. Mr. Peters has devoted much time to the libel law amendment and a hearty vote of thanks was tendered him by the association for his good work. Mr. Peters is editor of the Brooklyn *Times* and one of the most popular members of the association. The convention adjourned to meet next morning at ten o'clock. The afternoon was spent in carriage drives, boating, tennis and walks in the woods and in the evening there was dancing in the parlors.

The Thursday morning session opened with song by Robert McNeil and a prayer by the chaplain. "Has the Press a Mission," an exceedingly able paper, was read by Duncan C. Lee, editor of the Ithaca *Daily News*. "Its mission is to educate, uplift and protect. Today it is the bulwark of the commonwealth. The new press should be accurate, fair, a safeguard of character, attractively newsy, a bulwark of right, editorially honest and forcible, 'pledged to religion, liberty and law.' The newspaper is the greatest power in our modern civilization. It has no right to do wrong and it has endless opportunities to do right." William D. McKinstry of the Watertown *Times* discussed "The Editorial Page," and his talk was full of good things, the ripe experience of an editor of many years of experience. "It is the editorial page which may be called the face of the paper and that which gives it tone and character, and the paper should be a gentleman, not a loafer or rowdy. Make the editorial page for the average man and woman, not for the scholars. The average thought is almost always right, and the editor can safely take his cue from the best average man. The page should be gossipy, enlightening and inspiring." Prof. Lee who is a college man with six years' experience in newspaper work, and Mr. McKinstry an editor of 25 years' experience who worked his way up from the ranks, combined to cover the subject of the editorial policy of a newspaper so thoroughly, completely and satisfactorily that the association was delighted to have one paper follow the other.

H. O. Elkins of the Bath *Courier* told "How to Keep Up the Subscription List." He found it important to stop every paer at the time requested and to make close collection. He found that many people liked a paper that could "be stopped." He believes that a good weekly newspaper will live and thrive despite the multiplication of dailies and the advent of rural free delivery. The newspaper that don't deserve to live might as well order its shroud.

Louis McKinstry discussed "Legislation Affecting the Press," and his talk concerned, in a large measure, the work

of securing an amendment to the libel law. Some of his experiences with legislators who were opposed to any change in the libel law were humorous and provoked much laughter. He recommended that a committee of five republicans and five democrats be appointed to confer with the leaders of the two parties concerning the desired legislation before the meeting of the state legislature. It was moved that a letter of thanks be sent to all legislators who supported the bill last winter.

By request a paper read by James H. Potts of the Troy *Times* before the National Editorial Association in Guthrie was read by John P. Herrick. It was "Social Service of the Press," in Mr. Pott's best vein and much enjoyed. A fine memorial on the late Dr. Julian T. Williams of the Dunkirk Observer was read by Louis McKinstry, and President Slauson, H. J. Knapp and Secretary Bunnell spoke feelingly of the life work of the late William C. Bryant of the Brooklyn *Times*. Both were honored members of the association and their deaths are deeply deplored. Secretary Bunnell read a humorous poem by A. E. Hoyt of the Albany *Argus*. It was hot shot for Henry James and his criticism of newspaper English. Charles C. Overton presented a resolution empowering the chair to appoint a committee on "Invitation to the National Editorial Association" to hold its convention in New York in 1907, with headquarters at Coney Island. The President appointed Charles C. Overton, Don C. Seitz, A. S. Ochs, H. L. Stoddard, Herman Ridder, J. A. Sleicher, Thomas P. Peters, William Berri, W. B. Green and J. C. Oswald. The question box discussions ended the session. It was a unanimous opinion that the weekly and daily papers were justified in accepting the advertising of mail order houses at regular rates. One of the questions brought up the matter for discussion.

The convention ended on Thursday evening with a fine banquet tendered by the Hotel Ampersand. The decorations were very beautiful, the music fine, the guests in full dress and the menu tempting. First the business of the convention was concluded by reports of the committees. Chairman Kline from the committee of organization, with witty prefatory remarks announced the officers chosen for the coming year as follows: President, Elias Vair of the Waterloo *News;* Vice President, W. B. Collins of the Gloversville *Leader,* Thomas P. Peters of the Brooklyn *Times,* W. J. Pollard of the Seneca Falls *Courier,* John P. Herrick of the Bolivar *Breeze,* William D. McKinstry of the Watertown *Times;* Secretary and Treasurer, A. O. Bunnell of the Dansville *Advertiser;* Executive Committee, H. J. Knapp of the Auburn *Advertiser,* J. L. McArthur of the Granville *Sentinel,* L. W. Hones of the Roscoe-Rockland *Review,* W. O. Green of the Fairport *Mail,* and Robert L. Forbes of the New Rochelle *Paragraph.* Chairman Williard from the committee on resolutions told of the greatness of the New York Press Association, of the good work accomplished in the 52 years of its existence. He complimented President Slauson for the manner in which he had filled the high office; Secretary Bunnell and Chairman Knapp came in for a warm word of commendation and all who assisted in making the program a success were publicly thanked. The kindness of the railroads was commented upon. A telegram of regret was read from George H. Daniels, General Passenger Agent of the New York Central who expected to be present at the banquet but was unable to come. There were happy after-dinner speeches by President Slauson, Secretary Bunnell, Dr. E. H. Porter of New York, recently appointed health commissioner of the state, Duncan C. Lee, Hon. Daniel D. Frisbie and others. At close of the banquet all joined in singing America, and the forest about, gave special significance to these words:

ELIAS VAIR, Editor News, Waterloo, N. Y.

New President New York Press Association.

L. W. HONES, Editor Review, Rome, N. Y.

He Edits His Paper on Week Days and Preaches Three Sermons Every Sunday.

I love thy rocks and rills,
Thy woods and templed hills;
My heart with rapture thrills
Like that above.

After the banquet there was dancing and singing in the parlor, walks and talks in forest paths, and it was long past midnight when "goodnights" were spoken. The early trains Friday morning carried away the great majority of the party though a number remained for over Sunday at the delightful Ampersand.

Elias Vair, the new President is 47 years old, and has edited and published a newspaper since 1884, working his way up from the case. He has long been a member of the association and was a charter member of the New York Republican Editorial Association. He was a delegate to Portland in 1899. He was a delegate to the state convention that nominated Theodore Roosevelt for governor and a member of the platform committee that year. He is an aggressive, newspaper man and enjoyed a wide acquaintance among the newspaper men of the state. The chaplain of the association,

A. O. BUNNELL, Dansville, N. Y.

Past President of the National Editorial Association and Thirty-seven Years Secretary of the N. Y. State Press Association.

Rev. L. W. Hones, is one of the most energetic members of the association. Besides editing his paper on week days he preaches three sermons every Sunday in his district, being a regularly-ordained minister. He is a pleasing speaker and in profile shows a strong resemblance to President Roosevelt. This is more marked when he is attired in the soft black hat which he wears and was remarked by the President himself during a visit of a party of editors at the White house last winter. The convention of 1905 was in every way a very successful one.

The Inland Daily Press Association held an important business meeting at the Chicago Press Club rooms on Tuesday, July 11th. The attendance was large and such a lively interest manifested as is generally secured when practical business matters are up for consideraton. The association includes in its membership the most prosperous out-of-town dailies in Illinois, Indiana, Iowa, Michigan, Minnesota, and Wisconsin. In addition to the business transacted along lines of coöperative buying, the following short program was presented: "Free Theatrical Notices," John Sundine, Moline, Ill., *Dispatch;* "When Should Fees for Legal Notices Be Paid," Andrew O. Lindstrom, Galesburg, Ill., *Dispatch;* "Rural Route Subscribers, How to Obtain Them," H. H. Fitzgerald, Flim, Michigan, *Journal.*

TREES DEDICATED TO THE EDITORS.

At the close of the gathering of the Association at Big Trees, California, the following members were appointed a committee to procure suitable inscribed plate to designate a

ALBERT TOZIER

Past President of the National Editorial Association, who Traveled Six Thousand Miles in Attending the N. E. A. Convention at Guthrie, and Returning to Portland by way of Chicago.

cluster of trees there dedicated to the Association: R. E. Dowdell, A. W. Glessner, W. F. Parrott.

"Summer or winter, day or night,
The woods are an ever-new delight;
They give us peace, they make us strong,
Such wonderful balms to them belong;
So, living or dying, I'll take my ease
Under the trees, under the trees."

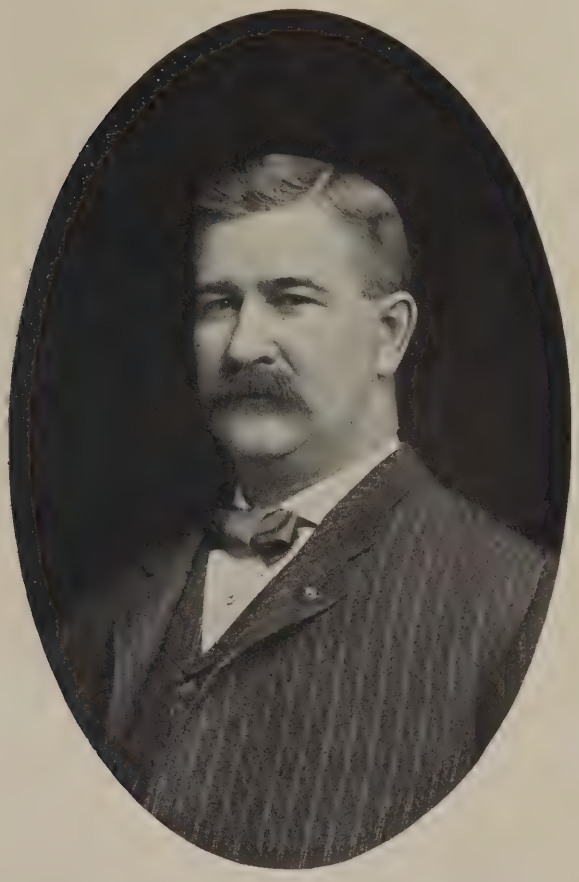
A Liberal Offer.

The advertisement of Sigmund Ullman Company on page 539 of this issue makes very liberal and attractive offers in order to introduce generally and rapidly their popular "A B C Black" ink. This ink is suitable for general book, catalogue, circular work, etc., for type, cuts and half-tones on cylinder presses. The fact that the Sigmund Ullman Company make an offer of this kind is a guarantee that the ink is not only an excellent article, but for this occasion and the purpose named, of a speedy and wider introduction, is offered at an unusually low price. The company's reputation is at stake in this and is too valuable to be sacrificed by not carrying out the liberal offer to the fullest extent. Consult the advertisement and then order promptly.

The New President of the Illinois Press Association.

The Illinois editors elect, from year to year, their ablest men to the Presidency; alternating each year the choice so that a member of one of the two great parties shall be chosen one year and of the other party the following year. As prominent editors of local political papers are frequently called to serve their constituents in the legislature, it has happened frequently that the President of the Association has been a member of one or the other of its branches. Last year, the President was an honored member of the State Senate, this year, the new President is an equally honored member of the House.

The training and the experiences of a newspaper man afford excellent preparation for service as a legislator, and experience in the legislature helps in qualifying one to preside over, and to direct in the deliberations of a body of editors. An editor fully understands the value of publicity as a means to good government and a member of no other



HON. JOHN B. CASTLE, Sandwich, Ill.

President Illinois Press Association.

calling is likely to be so well informed in all the varying wants of all the people, of all the callings and conditions or as to all the interests or needs of the public institutions. By experience in the legislature, a President of a State press association can bring to the members of the newspaper calling many things that will help to the understanding of needed and wise measures and to counsel as to the necessity of the education of the people in regard to the same; the reasons to be urged for the enactment of desirable legislation and the difficulties in the way of their enactment. This year the retiring President in his annual address gave many valuable hints and facts with regard to legislation, both as to laws affecting the press and the public, with the reasons why certain legislation was wisely defeated. His explanation of the good roads law, coming from a member of the calling, who helped to enact the law, could not be otherwise than valuable to the editors in the intelligent performance of their duties of properly informing their readers and properly directing public sentiment.

Hon. John B. Castle, the newly elected President, was born at Sandwich, Ill., in 1859; received a common school education; learned the printer's trade while a boy; and in connection with his father started the publication of the Sandwich *Argus* in 1878, which paper he still owns and publishes. He was admitted to the Bar of Illinois in 1891, and, besides his other interests, he is actively engaged in the banking business; was elected to the Legislature in 1902 and reëlected in 1904; was elected President of the Illinois Press Association at the May meeting, 1905.

Weeding Out In Dull Times.

Importance of Securing and Retaining Loyal and Efficient Employees.

Dull times too, can be made very profitable in looking after the employes, considering their methods and earning abilities and how the latter may be increased. In times of rush business, there is less opportunity for observation and one is often compelled to put on all the workmen that can be secured. In dull times, business necessity frequently compels the laying off of some members of the force, and the inefficient can be dropped at such a time with much greater ease than at any other, and without causing any ill feeling. Be sure that you weed out the incompetents. Do not let the best men go, just because their wages are higher, and you can get along with the cheaper and less efficient help during dull times. There is

Beet Sugar Factory, Rocky Ford, Colo.

nothing so important to success, as the securing and obtaining of loyal and efficient employes. One important way of retaining and securing the good-will of employes, is to show appreciation by always retaining such employes at good wages, even if it should seem that, for a time, cheaper and less loyal ones could be made to answer the purpose. Friendly relations should ever be established with those who are loyal and efficient, and steady, long continued employment helps to this. Do not run the risk of losing or offending a good man by laying him off just to save a few dollars, think rather, of the many good, extra dollars he has earned for the business.

A MODEL NEWSPAPER HOME.

Herewith is presented an outside view of the office building of The Daily *Post* at Houston, Tex., though the illustration gives but a very imperfect idea of the real beauty and elegance of the structure. It is used entirely for publishing of the *Post* and certainly has no superior, outside of the *Herald* building in New York City, anywhere in the United States, as a strictly newspaper building, devoted exclusively to the demands of the publication with no outside offices or stores of any kind. It meets, in an ideal manner, all the important demands of conveniences, conspicuous attractiveness and a prominent and central location, which the NATIONAL PRINTER-JOURNALIST has so frequently urged upon the attention of progressive newspaper publishers. A newspaper represents the highest standard of publicity in a community and is always urging the highest ideals and the greatest possible improvements in buildings as in everything else and it follows, as a corollary, that it should be, in its office as in the paper itself, the most perfect model of all for which it stands and of all that it advocates and advertises. While a private enterprise, a newspaper is in a very important sense, a public institution, serving the residents of the city, not only in all their personal and business affairs, but in all that pertains to public concerns, municipal and State Government, sanitation, improvements of streets and parks, public

HOUSTON POST BUILDING, HOUSTON, TEXAS.

schools, etc., etc.. The ideal newspaper office should be just as elegant, accessible and convenient in arrangement as the most important and most used public building. The Houston *Post's* office is, in exterior architecture, of modernized classic design which, as in a measure shown by our illustration, is particularly well adapted to a newspaper edifice.

Surmounting the roof at the east corner of the structure is an illuminated plate glass jeweled sign. It is six feet in height and the words it bears, "Houston Post," are prominent by day as well as by night, although the best effect is at night, when the brilliant electric lights have utter darkness for a background. The sign is surmounted by a flagpole.

Just below the base of this sign there is placed an illuminated dial clock, the face of which is five feet in diameter. This is regulated hourly from the observatory at Washington through the Western Union Telegraph Company, and may be relied on as one of the most accurate timepieces in the city. The clock does not strike. One of its most interesting features is afforded by the fact that the usual Roman numerals are not used on the dial, the twelve divisions of the hour being represented instead by the twelve letters in the words "The Daily Post." The clock occupies a commanding position, where it can be viewed by thousands of passersby, and will, doubtless, come to be as popular as the famous clocks in the front of the New York *Herald* building. The facade of the building is constructed of buff colored Roman tile, trimmed with native stone and surmounted by an ornamental cornice of copper. The main cornice is dropped to a point just above the windows of the third story, and the effect produced, while unusual, has been favorably commented on by hundreds who have noted it.

The space between this cornice and the street grade on the Travis street side of the building is well broken up by the pilaster treatment. The main entrance to the counting rooms and the editorial rooms is in the shape of a large semi-circular arch, which has voussoirs blocked off to neat and pleasing joints. Over this projects a swelled balcony with handsome rail and turned balusters and the soffit is relieved by a bold design of carving. Above all this is placed a balustrade of Greek design.

The loggia of the main entrance and the rotunda, are so enchantingly beautiful when a light at night with electricity as to be almost worth a visit to the city to witness in all heir glittering magnificence.

The loggia is circular in plan with Mosaic tile flooring. At eight equi-distant points around the semi-circumference are placed marble columns of modern Ionic design and pleasing proportions. Large doors and plate and art glass windows come in between the columns. All of the woodwork is of beautifully finished mahogany.

Above the columns comes a well designed cornice of marble which harmonizes with the marble below. Above this cornice is the semi-spherical dome which is divided in art glass panels by gilded copper ribs. In the lower row of art glass panels the words "Houston Post" are carried out in the art glass designs, the letters being worked in jewels. At the intersections of the ribs are electric lights, 120 in all, which illuminate the glass behind and form a particularly pleasing effect.

The loggia is handsome, but even its beauty fades when one leaves it and enters the rotunda into which it directly opens. This rotunda is surmounted by a globe ceiling highly frescoed and bearing on four opposite sides near its base line four beautifully executed designs symbolical of Art, Literature, Science and Industry. This work is not surpassed in the artistic qualities of its conception or execution by even the similiar, though of course, vastly more numerous, decorations in such buildings as the Corcoran art gallery or the congressional library at Washington. The building is five stories in height, including the basement, which is one of the most important of all, inasmuch as it contains the two giant presses on which the several editions of the paper are printed. The height of the main building is fifty-five feet, and it covers a space of 50x100 feet, or 5000 square feet. Then there is the building in which the power for the establishment is generated, a separate structure one and one-half stories in height and covering a space of 40x50 feet, or 2,000 square feet. The total floor space of the building is approximately 27,000 square feet.

The interior of the building is, in every way, in harmony with eloquence and highness of the rotunda. The arrangements for abundance of light and perfect ventilation are unsurpassed. It would be pleasing and in a great measure, instructive, to give the entire details of the interior arrangements, but as to these there are so many different conditions and limitations as to the location, size, and form of building lot, etc., that each new office has to be arranged differently.

In the rear end of the basement are the two big presses and the electric motors and controllers by which their movements are regulated. The front half is used as a storeroom for the great rolls of white paper from which the *Post* is printed. The ceiling of the compartment occupied by the presses is on the same level as the ceiling of the first floor. In other words, the pressroom occupies the rear half of both the basement and the first floor. The main business offices are in the front half of the first floor. Above these, on the second floor, are the bookkeepers and other members of the business office staff who do not have to deal directly with the hundreds who come to the main business office each day. In the rear of the second floor is the mailing room, where the thousands of labels are printed and where the various issues of the *Post* are addressed, wrapped and rushed down the chutes to the waiting wagons, in which they are transported direct to the mail trains.

The editorial offices occupy the whole of the third floor, with the exception of four rooms devoted to the picture-making department. On this floor is also the library, containing reference books accessible to all members of the editorial staff, as well as a large collection of fiction and light reading. The top floor contains the eleven linotype machines on which is set the type from which the news and editorial columns of the *Post* are printed; the "ad room," where all the advertisements are set; the offices of the foreman of the mechanical department and of the proofreaders, and, lastly, the stereotyping department, where are made the

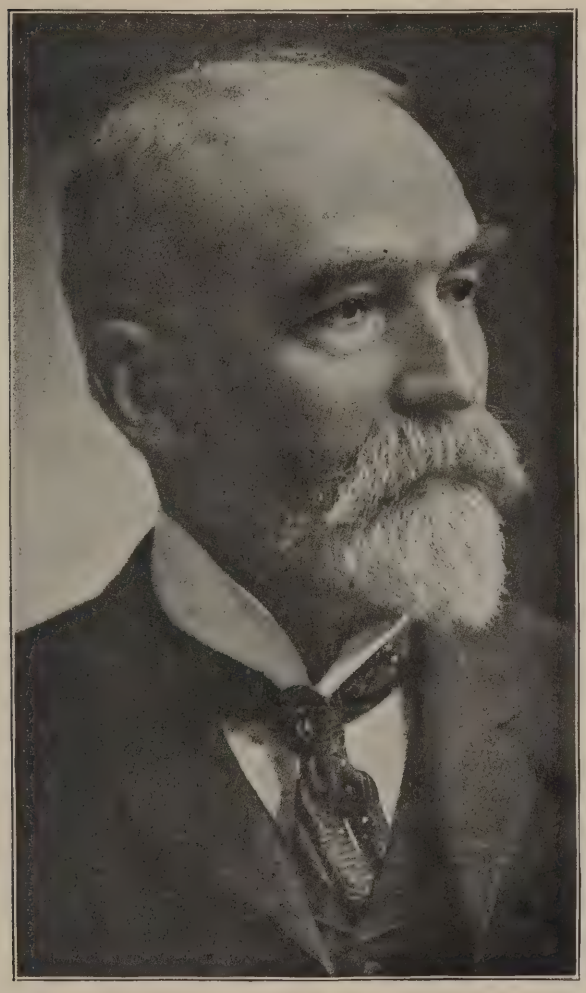
semi-cylindrical plates from which the paper is printed.

In the power building is located all the electrical machinery of the plant, together with a complete steam plant.

The building is fitted throughout with a private telephone system, by means of which the head of any department can immediately communicate with the employes in any part of the building. In addition to this there is a system of pneumatic tubes by which "copy" is sent from the editorial rooms and counting rooms to the composing room. Then, too, there is a lift by means of which heavy matter such as cuts, etc., may be sent to the top floor, two others by which papers are sent up from the presses to the mailing room, another by which rolls of white paper are lowered into the storeroom and still another which is used to send stereotype plates from the stereotyping room to the pressroom.

The building is steam heated and is lighted by electricity and gas.

During our visit to Houston with the members of the National Editorial Association, we employed no hour more pleasantly or profitably than the one given up to the inspection of the magnificient newspaper home, attended by a member of the *Post's* staff.



HON. JOHN HICKS.

APPOINTED MINISTER TO CHILE.

Mr. John Hicks, just appointed by President Roosevelt to be United States Minister to Chile, is the editor and principal owner of the Oshkosh (Wis.) *Northwestern*. He was born at Auburn, New York, April 12, 1847, came west with his family as a boy, located in Wisconsin, was educated at Lawrence University, Appleton, Wis., began newspaper work at the age of twenty on the paper he now owns, and has spent his life in the business. In 1889, President Harrison appointed him Minister to Peru where he served four years. He was given the degree of LL. D. by Lawrence University in 1890 and in 1894 he published a novel, "The Man From Oshkosh," which had considerable vogue. It appeared in Chicago and London, and the English house issued two or three editions of it. He has been something of a traveler having made the tour of Europe in 1895 and in 1899 he spent several months in Egypt, Turkey, Italy and France. His father was killed in the Union army and the son secured an education by his own efforts. His newspaper is considered the strongest in the State outside of Milwaukee.

Announcement By Secretary Ashbrook.

JOHNSTOWN, OHIO, July 24, 1905.

B. B. Herbert, Chicago, Ill.

DEAR MR. HERBERT:—I desire to advise the members of the N. E. A. who were in the party on the recent trip to Texas and Portland, that I have settled with the Pullman Co. and, so far as I am individually concerned, could make the rebate on Pullman fee at this time, but as my account is to be audited by the committee appointed by the convention at Guthrie, it will not be possible to remit before September 15th. By not later than September 20th all will receive check for rebate.

I also wish that if there are any who have not sent in their Pullman receipts to me for fares paid from their homes to either St. Louis or Guthrie for the one-half rebate, that it be done at once. Am holding all receipts received to date that one settlement may be had with the company.

Permit me here to express my high appreciation of the beautiful ring presented to me by the party at Salt Lake City, not so much for its intrinsic value but because it was given as a testimonial of appreciation of my services by some of the best people on earth. It will never leave my possession and keep the memory of the 1905 party close to my heart. I thank you, one and all, and assure you that the intent to treat all alike and as well as I know how, and conditions would permit was never out of mind. All were so kind to me that the obligations are surely mutual. If I can be of service to any of our good N. E. A. friends at any time, ask and ye shall cheerfully receive.

Very respectfully,

WILLIAM A. ASHBROOK,
Cor. Secy. N. E. A.

Stolen From More Work Through Publicity.

"Gleaming in purple and gold" is the card that was sent as an Easter remembrance this year by the Shaw & Borden Company, Spokane, Wash. The following quotation from Phillips Brooks is printed in Old Style English, with an initial, among the ecclesiastical embellishments:

O do not Pray for easy lives: Pray to be stronger Men. Do not Pray for tasks Equal to your powers. Pray for Powers Equal to Your Tasks: Then the Doing of your work shall be no miracle. But You shall be a Miracle. Every day you shall wonder at Yourself, at the Richness of Life which has come to you by the Grace of God.

There seems to be a certain method behind this extraordinary capitalization and punctuation of this fine quotation. Whether Phillips Brooks was responsible for it or not is a question. It would seem, however, that no particular rule is followed, whether of contrast between those things the preacher considers the more important things and those he shows to be inferior, or as regards any other rule of uniformity.

Some Notes by the Editor of Publicity Department.

The National Association of Managers of Newspaper Circulation met in Toronto the first week in June. The following is from a circular circulated by the Toronto Circulation Managers' Association:

Toronto is beautifully situated on Lake Ontario—not so much on it as to endanger life, but just comfortably next to it. It has miles of trolley, exceptional boating advantages, parks and drives innumerable, and some remaining ruins of a $12,000,000 fire. We will show you the sights each day after school is out.

The dominant feature will be business—after hours, pleasure.

As some of the members from small places like New York and Chicago might get lost in a big city, one or more of the local committee will meet your train.

We want you for business reasons—we want your wife for social reasons. If you haven't one, get one before June 6th.

The last sentence is surely a fine specimen of what Prof. Scott calls "the direct command." It is only equaled by the following:

"In the morning ask your servant to go to the refrigerator and get a bottle of R—R—S—. If you haven't got a servant, go and get it yourself."

The star feature of the entertainment accorded the circulation men was a banquet tendered visiting members at the Hotel Brant, Burlington. The first toast was, of course, "The King and President," whose names on the toast-list are followed by the significant line, "Daily Average, 500,000,000 subscribers."

It's the printers' turn next. They are coming from all over to Toronto next month. It will be a big convention. If this kind of weather holds, you needn't bring your furs. In any event, a warm welcome is assured.

The letter of Will K. Davis in last month's NATIONAL PRINTER-JOURNALIST contains criticism of the regular departments, such as have, I believe, been invited by the editors of all these departments. Therefore, none of us has the least occasion to be sore. We are getting what we give, and getting it, too, in all probability, in exactly the same spirit—that which has as its basis the fact that the man who tells us of our faults is our friend, if he tells of them in a friendly way—sometimes if he doesn't. But just as we welcome a defence against our criticisms by those whose work we adversely mention, Mr. Davis will doubtless appreciate an answer to his remarks concerning the repetition to which we are prone. I am quite aware that we do that which Shakespeare is said never to do, and I am sure Mr. Fitz Gerald and Mr. Copper are aware of it too. But this is the reason:

We are conducting a little school—to use the diction of a former conductor of the Review of Job work. We receive a question from a pupil concerning a certain style of work. There is just one answer to that question, in our opinion, or in our actual knowledge. We give it. Next month, or next year, another pupil asks us the same question, or sends a job for our criticism which has exactly the same fault as one which was sent by some other student. We don't give a new answer—that would be inconsistent and wrong, unless our opinion has changed. We don't ignore the question—that would be impolite, at least—or if we do, it's because there is not space. I know of one case where a job has been sent me for criticism, whose only fault was one which had been pointed out before. Being sure, in this case, that I was right, I strongly repeated my previous assertion. Now that fault never appears in any of the work this student sends me. We are not, any of us, writers of pretentious essays, in which repetition and redundancy should be avoided, unless they add to their rhetorical force. We are simply teachers—and in a class where a pupil makes the same error he made in a previous session, or does not know how to do a sum that was explained at a time when he was away, or when his attention was fixed on something else, it would be a poor teacher who would not take a little time to set this one right, even though the ninety-and-nine who know all about it might be a little bored. To be anything of a successful teacher, with anything like a large class, one simply *has* to repeat, though no doubt it is trying to the brilliant or well-posted student who has heard it all before, or who knew it long ago. He is the one who, if he has anything new or important to tell the class, will find teacher and scholars ready and willing to listen and learn.

I wish to thank C. R. Beran, of Denver, for his kindness in sending me a copy of that superb collection of the work of an artist-compositor, "Beran: Some of His Work." This splendid book calls for more comment of a commendatory nature than space permits of this month. It will be referred to again.

ORDER FOR GOVERNMENT PRINTING PLANT AT PORTO RICO GOES TO THE KEYSTONE.

Porto Rico is the second of Uncle Sam's new possessions to get a Government printing plant. The first was installed in the Philippine Islands some four years ago, and has filled an important mission in Americanizing the natives of those Islands, to say nothing of developing and facilitating the business of the Government there.

Unlike the Philippines, which received their printing plant all at one time, Porto Rico started years ago in a small way to do such Government work as could be turned out with its very limited facilities. The demand for printing and binding has steadily grown and the little print-shop originally occupying a corner in the Postoffice Building, has been added to from time to time and has increased in importance until now the Hon. Regis H. Post, Secretary of Porto Rico, has recognized the need of an up-to-date plant of sufficient size to properly meet present requirements at least, and early in June instructed Mr. Thomas Green, Public Printer of Porto Rico, to proceed to the United States and purchase type, supplies and machinery necessary to equip a printing and binding factory at San Juan for turning out the Government's printed matter.

Mr. Green arrived in New York about June 20th and after inspecting machinery, furniture, type and supplies of various manufactures called for bids, and on the 27th awarded the contract for the entire plant to the Keystone Type Foundry, of Philadelphia, New York and Detroit. He returned to San Juan the latter part of July, accompanied by mechanical experts who will assist him in installing the new machinery, and in the early fall the Islanders will see for the first time a modern printing and binding plant in full operation, and the Government will realize the convenience and benefit of its new departure there.

BUSINESS NOTES

This Department is conducted for the benefit of advertisers, and expresses their claims and views

The Oswego Machine Works send a couple of new catalogues that present in a most attractive manner the famed cutting machines of the company's manufacture. It is pleasing to contemplate how attractive and artistic advertising has become in the past few years.

The Challenge Machinery Company take a just pride in the sending out of artistic printed matter. Their latest catalogue, that has recently reached this office, is up to the highest standard. It informs by its text and shows by its illustrations all that pertains to the popular manufactures of that widely-known establishment. At the same time the booklet is a model for the job printer and speaks volumes in its mechanical finish of the perfection of the Challenge presses, on which it was printed.

The "Century Expanded," by the American Type Founders Company, this month, needs no commendation, it speaks in its own praise. The "Century" has proved to be one of the most useful types and the American Foundry can do printers no greater service than constantly to stir up their minds by way of remembrance as to its good qualities. As we have taught elsewhere in this issue, in our talk on "Gumption in Dull Times," we deem it wise for printers to be arranging for new types and machinery with which to help to secure and take care of the increased work of the approaching Fall.

"The Monotype" is a most attractive book in paper covers with embossed title, that reaches our table just as we are going to press with the last form of our August issue. The letter press is especially worthy of commendation for its mechanical excellence. It is a descriptive catalogue that describes, illustrates and shows. The illustrations on tinted plates are delicate, perfect and tasty, as are the initial letters. The matter is all set on the Monotype and the "examples" of composition are a delight to the eyes and full of suggestion and instruction for the genuine printer who is an artist in the craft.

The readers of the NATIONAL PRINTER-JOURNALIST will be interested this month in the description given in the Mergenthaler Linotype insert, of the "Rogers' System of Linotype Rule and Figure Work." The two pages of tablework shown, strikingly illustrate what can be accomplished by this system. It is not only something new but a distinct advance in machine composition. With this system the highest grade of tablework can be done on the machine and at low cost. It was invented by Mr. J. R. Rogers and adopted by the Linotype as an invention of great practical value and the appliances for this work are quickly applicable to all existing linotype machines. Study the pages mentioned.

The "French Plate" and "Wedding Plate" are two new series of type by Barnhart Bros. & Spindler. These are built on the plan of Tiffany's new text—we show two lines of the type herewith, one italic and the other upright. We are going to presume—though we have no information on the subject—that the "French Plate" is named after Mr. French, who has charge of the correspondence of the company, and who is honored by printers wherever he is known. We admire the result of the work shown in these two faces of type but no more than we admire the man in whose honor we have presumed the one face to have been named. If

National Printer Journalist
Trade Journal Issued Every Month

Tiffany Upright
The Latest American Script Design

these types prove as serviceable to printers as he has proved to his company, all who use these types may be assured of adding fortunes to prosperity.

The Queen City Printing Ink Co. of Cincinnati, in the midst of the complaint of dull business from many people, are kept very busy filling increasing orders. The printing ink manufacture and trade seems to be like the electrical business, one has to be up and at it all the time or soon be left by the wayside. Recognizing this fact, the Queen City people, who do not want or expect to bring up the rear, are always trying to make their products better than ever before and to keep the printers thoroughly informed of this fact by "showing them" through most attractive and convincing examples, specimens and advertising. Their strikingly pleasing advertisements have become a welcome feature of the leading papers of the craft. Their "Ink Beasts' Parade" that has been running several months through the trade journals are attracting increasing attention. There is in each novelty and brightness that command pleased attention every month, besides, these designs, as printed, show off colors to such an excellent advantage as to prove informing and enlightening as to the quality and possibilities of the inks

used on and exhibited thereby. The one appearing in this issue of the NATIONAL PRINTER-JOURNALIST is certainly a "cracker-jack" and deserves study.

The Giraffe, in all his altitude, will appear in the September issue and the "Parade" will continue for several months. Our experience is that these animal figures, in their bright colors, attract the laity as well as the artizans, especially is this true in advertising departments of large establishments, and we have seen the NATIONAL PRINTER-JOURNALIST passed around to a half-dozen in a business office, just for each to have a good look at the Queen City advertisement. These ads awaken curiosity and lead to inquiry by customers as to whether they cannot have some of this ink on their printed matter.

GUMPTION IN DULL TIMES.

A TALK BY THE EDITOR.

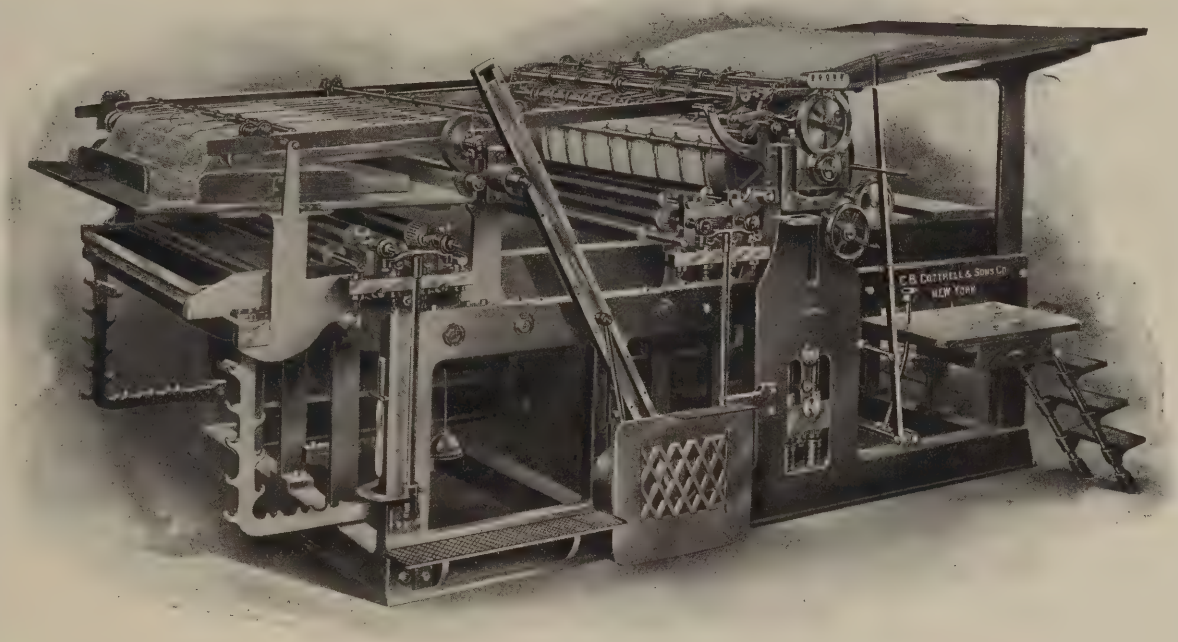
August is generally considered a dull month for business. If such should prove to be the case it is a good month in which to make plans for the future and to take an account as to causes of failures or any lack of efficiency in the past. It is the time for the use of gumption and for its cultivation and the providing means for its use.

Gumption is one of the most valuable assets in a newspaper or printing office. In tracing the derivation, or comparative words in different languages, we have from Webster, for this expressive word: "to understand," "to look after," "to regard or observe," "care," "to attend or provide," and then as the present meaning: "capacity," "shrewdness," or colloquially "address" and painting "the art of preparing colors." The newspaper man or printer is ever preparing attractive colors. Gumption, as applied to both newspapers, and printing offices, includes all that has been enumerated in its derivation, and all these are necessary to its perfection. There must be first a thorough understanding and quick judgment. Then there must be a close looking after, a careful "regard" aided by observation and experience. "Care" must follow and a wise providing in advance for performance and against accidents. From all these come the capacity or shrewdness or the ability to size up a situation quickly and then to act promptly. Gumption may be considered, in one sense a habit or faculty of the mind but it is a faculty that is cultivated and made available by all that has been indicated. One must thoroughly know his ground and understand instinctively his resources and possibilities in order to decide quickly how to take a new tact and to act wisely and successfully. He must not only "understand" himself, but those with whom he has to compete, and the possibilites that he has to meet. Just the other day, we put in a bid for a job of work in which bid, we did not exercise gumption, and were underbid. It was a job which, with the press facilities at hand, had to be run in two forms making double presswork. We figured a low price for the presswork under the conditions, but did not use gumption in the consideration of the fact that competitors had presses available on which the job could be run at one time. We did not immediately estimate our own weakness as compared with the strength of competitors. By a little gumption the job could have been secured and a little profit made in dull times. This principle of gumption is frequently a very large item in the pressroom in the matter of seizing upon the most economical manner of running a job or of combining two jobs so as to run both at the same time. Where there is close competition or when business is dull, it is necessary at times, instantly to drop preconceived notions or the old methods of figuring, get out of channels through which business has been expected to be secured and to use gumption in devising new ways; to forget the idea that every class of work must cost just so much in the press or composing room, and seek ways to aid in pushing jobs through the office so as to secure the work and the right profit even at the lowest price. When advertising is dull, gumption must be used to devise new schemes to secure more advertisements in a wider field, even if each new advertisement is very small, so that the aggregate of revenue is kept up and the advertising rates are not cut. This can sometimes be done by getting up a business directory to be run in small squares in the paper and then to furnish cardboard sheets of the directory to each advertiser to be hung up in offices or stores. The wits must be kept at work as to job department also. We once bridged over a dull time in our printing office at Red Wing, Minn., by getting up two hundred thousand letterheads for different business men in villages along a line of railroads, advertising on the back at top, the advantages presented by each village and, underneath, giving a directory of the firms using the letterheads. There are a hundred ways to secure or to increase business that will occur to the active minds of the calling, where the right kind of gumption is possessed.

This same need of gumption and its proper exercise runs through every branch of the business. Gumption must be used in meeting arguments while soliciting advertising, in plans for securing new subscribers, or retaining old ones; in keeping the paper filled at times, when there seems to be a dearth of news, with live matter that will command attention, please and keep up the interest in every issue of the paper. There are rules and underlying principles, ever useful as guides, but one must have the power to adapt these to circumstances, and even to depart from them and from the course of action seemed to be required thereby, whenever necessary to legitimate success.

To refer back to our first thought of making plans in dull times for increased business; to advertise and to make out a system of advertising for the future are among these plans. It has been said, that the months not to advertise in are the months you do not care to do business. It might have been added, that the months, following those in which you do not advertise, you will not do business or, at least, do much less business than you had hoped. An advertising campaign is just as necessary for a newspaper or printing office as for any other business or industry. While there should be no let-up in advertising at any time, dull times may be most profitably used in planning, getting up, and printing attractive advertising matter to be used later. Careful thought should be given to, and care and system be used in, advertising as in everything else. All that goes out as advertising from a printing office should be of the highest quality of workmanship, and if possible of a character that will suggest to business men the idea of getting out something of equally high character. A printing office is largely judged as to its ability for work by its own advertising matter.

It is scarcely necessary to add here, that now is a good time to look after improvements in the equipment of the office; to consider what machines have lost their money-earning ability, and may be discarded for improved machinery; what worn out type should be exchanged for new and up-to-date fonts. New type and new machinery, properly shown on printed matter in the one case, and properly exploited as to both, afford the most effective business-winning advertising.



The Cottrell High Speed Two Revolution Press

Specially designed for the exacting demands of three-color printing where perfect register is absolutely necessary. New features have been added for facilitating the production of the finest work.

¶ The press is furnished with our Patent Convertible Sheet Delivery which can be set to deliver the sheets printed side up, or it can be changed to the regular fly delivery in five minutes time. The convertible delivery is operated by a variable speed crank motion which dispenses with the fly spring, thus saving the power required to compress the spring, at the same time making the motion more simple and convenient.

ELECTRO COPPER-FACED TYPE. Empire Type Foundry, Delevan, N. Y.

MISCELLANEOUS

A COLD SIMPLEX STEREOTYPING OUTFIT, $17.00 and up, produces the finest book and job plates, and your type is not in danger of being ruined by heat. Simpler, better, quicker, safer, easier on the type and costs no more than papier-mache. Also two engraving methods costing only $5.00, with materials, by which engraved plates are cast in stereo metal from drawings, made on cardboard. "Ready-to-use" cold matrix sheets, $1.00. Come and see me if you can; if not, send postage for literature and samples. HENRY KAHRS, 240 East Thirty-third Street, New York.

ANYBODY CAN MAKE CUTS with my simple transferring and etching process. Nice cuts, from prints, drawings or photos, are easily and quickly made by the unskilled on common sheet zinc. Price of process, $1. All material costs at any drug store, about 75 cents. Circulars and specimens for stamp. THOS. DAY, Box P, Windfall, Ind. My Simplex Mailer only $2.50, send for circular.

THE VAN BIBBER ROLLER CO., Sixth and Vine Sts., Cincinnati, will give you *the best rollers* that can be made for any season or press. Our facilities are the best, and we use the latest Gatling Gun and compressed air apparatus. It pays you to have good rollers, and they count more in presswork than anything else. In writing or shipping, "Cincinnati" is sufficient. Everybody knows us.

SOUTHWESTERN WEEKLY

without competition in field reaching forty miles every direction. Equipped with five presses. Gets all county patronage as it is only paper in county. Being Independent receives both Democratic and Republican patronage. 1904 returns to owner for time and investment were $2816.85. Will be sold for $3000.00; ⅔ cash, balance deferred. Healthy location at high altitude. Proposition No. 90.

Sanders makes a specialty of Engravings for Newspapers and Publishers.—Write for our New Book of Engravings.

Hamilton's Quality is the Best!

The Quality of Others "is Different"

We are the originators of Flat Steel-run construction, and have used such runs in our cabinets for fifteen years. Our Steel-run Stands are built on this plan and always have been so constructed. Our methods and goods are being imitated and copied all over the world, but the quality of our goods is not being equaled. *An imitation is always an inferior article.* We do not imitate, we leave that to others; we originate, and our catalogues and circulars will prove this. Where do you gain when you buy the imitation article at the same price? You don't gain, YOU LOSE. Why buy the second best when the best costs you no more?

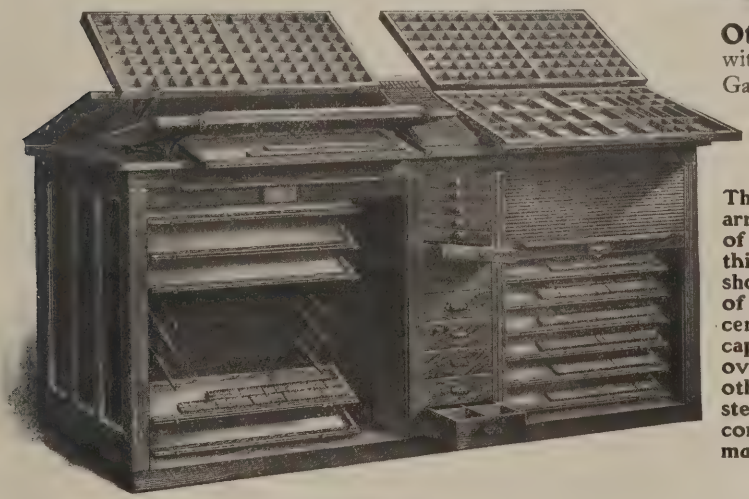
The Manitowish Type Cabinet

This is not the "common kind"

WE show here a new and greatly improved Type Cabinet which contains many *new* features, and combines all the *best* features of other popular type cabinets. One side contains *sixty* full-size California job cases, all within typesetting height. The cases are of varying depths, same as the Unit Cabinet.

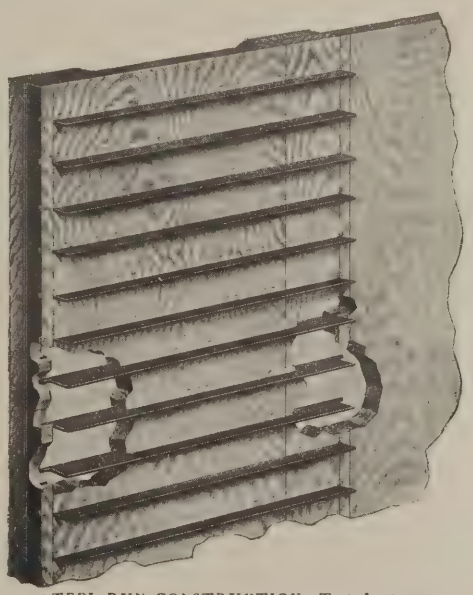
A series of six *Sort Drawers* runs through the cabinet and can be drawn from either side. Notice the six *Inclined Galley Drawers*, accessible from either side, an entirely *new* feature.

No other cabinet possesses the *new* and *novel* feature of *wiring for electric lights*. Provision is made for four bulbs to light the sixty cases in the body of the cabinet.



Other New Features—Two Galley Compartments with *Spring Roll* Curtain fronts, secured by Yale locks; Galley Dump, with *Adjustable* Lead and Slug Bank and two working spaces; Extension Front, with our new *Improved Flat Steel Runs.*

The arrangement of cases in this cabinet shows a gain of 25 per cent. in case capacity over any other steel-run construction made.



STEEL RUN CONSTRUCTION—Tested 15 years.

The Manitowish Type Cabinet comprises every feature found in the Polhemus, Porter and Unit Type Cabinets, besides several new features in type cabinet construction.

Price - - - $165.00 Subject to usual discounts.

THE MONOTYPE

SOME INTERESTING FACTS

FACT I

The Norwood Press is, beyond all peradventure, one of the most notable printing establishments in America. Indeed, its fame as a producer of finely printed books is world-wide.

FACT II

Last March Mr. J. Stearns Cushing, after having thoroughly investigated machine composition, decided that the Monotype was the machine best adapted to the needs of the Norwood Press, and ordered two Monotype equipments.

FACT III

Exactly two months later Mr. Cushing found, to use his own words, that the only trouble about his Monotypes was that he had not enough machines.

FACT IV

Mr. Cushing ordered two more full equipments to be delivered at the earliest possible moment.

FACT V

The experience of the management of the Norwood Press is the experience of every leading printer in America who has installed a Monotype equipment.

WOOD & NATHAN CO.
Selling Agent The Monotype
1 Madison Ave., New York City

Gentlemen:

We have so far found the Monotype machines entirely satisfactory. The only trouble at the present time seems to be that we have not enough of them.

Please enter our order for two more keyboards and two casting machines for immediate delivery, and advise us how quickly they can be installed.

Very truly yours,

[*Signed*] J. S. Cushing & Co.

THE OPTIMUS
THE OPTIMUS

The first form put on a new 28x41 Optimus filled a 25x38 sheet. It contained no illustrations. The impression was so uniform that not even a bit of tissue was used anywhere.

This is quick make-ready. It is a vital element of speed and economy. The quality is inherent in all Optimus presses. They possess greatest rigidity. This gives both greatest firmness and delicacy between form and tympan. Out of all comes greatest eveness and uniformity of impression, and greatest profit.

BE A 20th CENTURY PRINTER

UNITED PRINTING MACHINERY COMPANY

A Company organized to manufacture and sell machines and appliances for reducing the cost of production of printing.

AUTOMATIC TYPE MACHINE.

Leased to printers (30 years, $2000), for making their own type from 6 to 36 point bodies; matrices ready for sale or rent for nearly all the standard and popular type faces and borders. The cost of type is about 6c. per lb., plus metal.

DUX FEEDING MACHINE.

The lowest priced feeding machines; effective on long and short runs of all sizes and kinds of paper.

AMERICAN ROLLER WASHING MACHINE.

A machine for washing rollers for cylinder presses. A great economizer in offices running five presses or over.

VICTOR STEEL DIE EMBOSSING PRESS.

Used by the leading steel die printers. Price reduced.

STEEN POWER COMBINATION PUNCH AND EYELET MACHINE.

The only machine that punches and eyelets at one feed. Price reduced.

SPARKS ROUND-HOLE MACHINE.

A small machine, using ⅛h.p., that does the work of five $200 punching machines, and better work.

SPARKS SLOTTING MACHINE.

Cuts slots in loose leaf paper, and card work of all kinds.

SPARKS CRIMPING MACHINE.

Crimps the binding edge of loose leaf papers, completing the operation without pressing.

DUNNING DECKLE EDGING MACHINE.

Puts a deckle edge on any kind or size of paper, after the printing. Cost of deckle edging is nominal.

MALEY IRON REGISTERING BLOCK.

Holds all sizes and shapes of electrotypes, registering them quickly and absolutely.

ELLIS FAC-SIMILE TYPEWRITER RIBBON HOLDER.

A small device ($10.00) for holding a typewriter ribbon on any job press, producing a perfect imitation of typewriter effect from type.

TYMPALYN.

A woven wire blanket filled with rubber, for use on printing press cylinders, resulting in a saving of one-third the time of make-ready.

PRINTING MATERIALS.

Everything of iron, steel, copper brass or wood, used in a printing office, at lowest prices.

EVERYTHING FOR ELECTROTYPING.

We manufacture the celebrated machinery of Geo. E. Lloyd of Chicago, and Lovejoy & Co., New York.

EVERYTHING FOR STEREOTYPING.

In this we excel. Nearly all the machinery used by Western Newspaper Union, A. N. Kellogg Newspaper and American Press Association, was made in our Geo E. Lloyd factory in Chicago.

EVERYTHING FOR PHOTO ENGRAVING.

Complete plants, cameras, screens, lenses, etc., and all the machinery.

UNITED PRINTING MACHINERY COMPANY

CHICAGO: 337 and 339 Dearborn St. (E. C. Williams, Manufacturing Manager. B. O. Henning, Sales Manager.)
BOSTON: 246 Summer St. NEW YORK: 12 and 14 Spruce St. Factories at Chicago, Boston and Plainfield, N. J.

Everything for the Printer, Electrotyper, Stereotyper and Engraver.

A moment!

in a year.....always.....

The business problem

in every proposition, is that of economy. This is especially true in a printing office. The composing room is a source of loss more often than one of profit, one reason being increased wages without increased production. To overcome this, leading printers are adding the kind of type which saves its cost many times over. We refer to **Standard Line Unit Set** type, the original point line point set type, whose users have been saving money thru its labor-saving features, for nearly twelve years. Those who have once used it, will continue to buy the type which was made right in the first place, and has never been changed in hight, body or line.

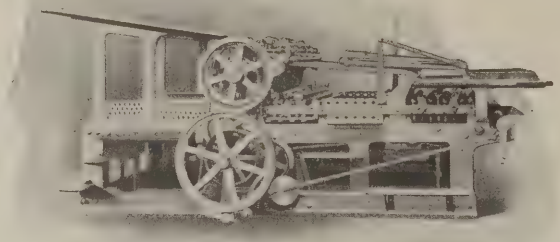
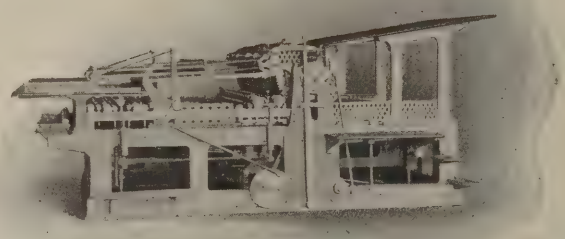
The CENTURY

How a Rigid Impression Helps a Pressman

FIRST—By saving his time and labor. With a rigid impression, between bed and cylinder, every tissue paper he places on his make-ready will count. With a rigid impression he will find that his heavy overlay will not throw out his light overlays and necessitate his continuing to make ready until he has them both equalized.

SECOND—A rigid impression, (a stiff squeeze) sets the ink to the paper quicker, renders less ink necessary, makes it possible to run the press at higher speeds on a high quality of work.





The old fashioned idea of an elastic impression, which is embodied in the principle of the side-rod construction, is becoming as obsolete in the minds of progressive pressmen as the use of the felt blanket. Therefore our claims for rigidity of impression in the Century are worthy of the attention of every practical pressman.

Our Cylinder is completely enclosed, heavily braced throughout the inside, and in larger sizes has 5 inch journals.

Our Cylinder is raised and lowered by the Eccentric Lift Impression Mechanism (the most positive raising and lowering mechanism known to mechanics) the journal boxes of which are encased solidly in the massive side frames.

Our Automatic Compensator always holds both journals against the upper or work side of their boxes. The blocks of this compensator are supported by heavy coiled springs and take up automatically any and all wear or variation which may develop. For the above reasons a Century Cylinder ***never gutters.***

The bed is heavily ribbed and cross ribbed and rests on a series of steel track rollers set closely together, after a method which precludes wear upon the ways, and these track rollers in our larger sizes run upon four 4 inch steel shod tracks.

The tracks are supported by a single cast girder under the line of impression which is at least ⅓ stronger than that of any other press.

The Century of today is the only press on which you can save so much time and work in making ready. When once made ready, it stays made ready.

Volume Twenty-two | Chicago, September, 1905 | Number Nine

A NOTABLE CONVENTION.

MAJOR W. W. SCREWS HONORED—PRESENTED WITH SPLENDID SILVER SERVICE FROM THE NATIONAL EDITORIAL ASSOCIATION.

POOLING THE ADVERTISING OF STATE NEWSPAPERS.

NO other convention of any State Press Association has won the right to prominence above that of the Alabama, at Coden, July 21 and 22. The editors went into camp and were soon on dress parade and were then ready for a battle with questions of vital and practical interest to newspaper publishers. The name chosen was "Camp W. W. Screws."

The first session began at 3:30 P. M., in an open theater built over Coden Bayou. Of this session the Montgomery *Advertiser* says:

The local committees selected Editor Rufus N. Rhodes of the Birmingham *News* to welcome the editors and the response was made by H. S. Doster of the Prattville *Progress*. Seventy-four editors answered roll call, six proxies were announced and six new members were elected. This makes a total representation of eighty-six.

The digression in honor of Major Screws began with the report of the Alabama delegation to the convention of the National Association held last June in Guthrie, Okla. With the reading of the report, Editor W. H. H. Judson of the *Besemer Weekly* was introduced to present the gift of that association to Major Screws as its retiring president.

Major Screws was plainly surprised when he was asked to go forward and editors rose to cheer him. Editor Judson displayed the silver service and spoke as follows, with Major Screws seated:

"This little incident to take place is not on the formal program. But it is eminently proper that you should give space, not alone as a matter of courtesy to the power for which the service is rendered, but in compliance to and esteem and love for the beneficiary of that service.

"It has become a pleasing and worthy custom of the National Editorial Association, which holds the same relations to the various State and district press associations that this association does to the press of Alabama, to acknowledge exceptional and notable service on the part of its high executive officials by a gift or testimonial in token of its appreciation, its admiration, its esteem and its affection.

"The National Editorial Association, which assembled in early June at Guthrie, Okla., deputized to a committee of its members, who are likewise members of this association, the pleasant and proud duty of securing and presenting that token to its retiring President. To you, Major Screws, who had the distinguished and exceptional honor of having been elected without a single dissenting voice or an adverse ballot to the presidency of that association, the representatives of the great press of this great country; to you, who in that exalted position served so discreetly and capably, so admirably and impartially, that during the whole term of service not a discordant note nor a single harsh word marred the peace and harmony of its proceedings, commanding, as you did, the esteem and love of that grand throng, we beg to report that we have been deputized by members of the National Association, in their name to make due acknowledgment to you of their deep and fervent gratitude and obligation and loving remembrance.

"My fellow members of the Alabama press, in whose ranks for decades past you have borne so honorable and distinguished a part, in whom by your singular and admirable traits of character, wise counsel, great heart, gentle courtesy and marvelous forbearance, impartiality and justice, you have aroused and commanded the highest esteem and their undying love, I know, will, with wholesome pride and hearty interest, be witnesses to the commission of presenting this beautiful and precious souvenir and token, memento of a never-to-be-forgotten and priceless association and service to you, our worthy, beloved and distinguished fellow citizen and brother."

When Mr. Judson concluded, the band broke into "Dixie" and the convention hall was a scene of joyous enthusiasm. Major Screws was brief in his reply, his voice faltered and tears were in his eyes, as he expressed the emotion he felt. It was a surprise to him, he said, as he did not expect that the testimonial from the National Association was to be formally presented to him. He half suspected, however, he said, when he saw "members of his household" in Coden unexpectedly to him, that something of the sort was planned.

He spoke of his long connection with newspapers of Alabama and made a casual allusion to the fact that he had

begun forty years ago with the *Advertiser* and his pride at serving continuously and unbrokenly with the paper until today.

Major Screws dwelt upon the influence for good of the National Association and impressed the editors that they were members of the great body.

"It has," said Major Screws, "been foremost in striking at sectionalism, factionalism and it is free of partisanship and religious fanaticism."

He paid a high tribute to the character of Alabama newspapers and said he was glad to be with his friends.

RESPONSE IN FULL OF PRESIDENT SCREWS.

MR. JUDSON, FRIENDS AND BRETHREN:

That anything of this kind was contemplated here, was kept a profound secret so far as I am concerned, and to say that it is a complete surprise, but feebly expresses my feelings. I did not know that there would be a formal presentation of this beautiful testimonial from the National Editorial Association, but to no hands could the duty of presentation have been better committed, nor could it take place in the hearing and presence of any nearer to my heart than those of you here present. Would that I could come up to the measure of kind words which you, Mr. Judson, as Chairman of the Committee have uttered. It would be glory enough for any man to be worthy of such an estimate of character as you have portrayed, and sincerely do I thank you for the words spoken, however unworthy of them I may be.

While with some of you I have been associated for more than a third of a century, most of you, because this is the day of young men, were not born when I entered into work as a newspaper man. It is a happy thought to me that, without your knowledge of that fact, this event should occur upon the day that marks the 40th anniversary of my connection with the paper to which my life, energy and whatever ability God has given me, have been devoted. From the day the Montgomery *Advertiser* was resurrected from the ashes of a long and bloody war, July 20, 1865, to this hour, I have known no other field of labor than that afforded by its columns. It has gone through many trials, surmounted many difficulties and it is a great consolation, that in spite of many bitter political contests in which I differed with many of you, your friendship and kindly consideration have ever been retained. Words would fail me if I should attempt to tell you, my friends, how greatly I appreciate the many marks of confidence and esteem of which I have been the recipient from your hands, and especially will I always cherish, the demonstration of affection made by you on this, to me, happy occasion. This beautiful silver service, which comes from the largest body of newspaper workers in the world will ever be an inspiration to better and higher resolve. Would that I could convey to each and everyone present at Guthrie, by whose action this token was ordered, how greatly that action touched me, and how much I would like to thank them all in person. To you, as their representative, I extend most grateful thanks with promise to strive never to do an act unworthy of those who have thus honored me.

You of the Alabama Press Association are an integral part of that great body and you should feel great pride in that fact. In all its existence it has striven to promote the best interests of a Common Country. Political partizanship and sectional animosity have no place on its calendar. It is the unrelenting foe of all things calculated to retard the advance of the country's glory and prosperity and its great work is being felt in every State and Territory of the Union. As the years come and go its influence and power will be felt more and more. To have been the President of such an Association and to have been the recipient of its most kindly consideration is an honor far greater than could be conferred by any public or political preferment. My tenderest thoughts will ever go out to those of the great National Editorial Association, with whom for many years it has been my pleasure and privilege to labor. Upon that organization, I hope, "will rest,—forever rest, the dews of Zion and the smiles of God."

A SECOND PRESENTATION OF A WORTHY TESTIMONIAL FROM NEARER HOME.

All of this had been happy, but the committee from the *Advertiser*, consisting of Victor H. Hanson, advertising manager; W. W. Waldo, foreman of the composing-room, and Bruce Kennedy, city editor, was yet to overwhelm Major Screws and his friends. As Major Screws was about to retire to the rear of the hall, President Greer, in the chair, recognized Mr. Hanson of the committee and General Rhodes of Birmingham pushed Major Screws to a chair.

LOVING CUP FROM MEMBERS OF THE ADVERTISER STAFF.

"I have listened, Mr. President," said Mr. Hanson, "with great interest and pleasure to the remarks of Mr. Judson and I have observed with pride the manner in which the friends here of Major Screws have received this manifestation of regard for him from the National Association. In these sentiments I feel sure I speak for the three-score and more associates of Major Screws, the employes of the *Advertiser*. They are proud of this honor conferred upon their employer and their friend. They feel deeply grateful for this evidence of your esteem for him. But, sir, your measure of regard for Major Screws is transcended by the love and esteem in which he is held by us.

Loving Cup Presented to Major Screws.

Major Screws has told you that this day marks his fortieth anniversary as editor of the *Advertiser*. In this I may say he has robbed me of my speech; it was this important occasion, this remarkable record, that moved these devoted employes to present to Major Screws a simple token of their affectionate regard, loyalty and love, a souvenir that will remind his posterity of the esteem in which he is held by us.

With this end in view a committee consisting of a representative of the three important departments of the paper has been sent here to present this token to Grandma's better half."

Drawing the splendid silver cup from a plush bag and turning to Major Screws, Mr. Hanson closed his remarks by reading the inscription on the cup.

When Mr. Hanson first exhibited the loving cup the convention broke into a storm of applause, the women gasped at its exquisite beauty, Major Screws cried, the band played "America," the editors caught the spirit spontaneously. It was inspiring. Few such scenes are ever witnessed. Major Screws hardly voiced his feelings.

"As much as I love you, the members of the Alabama Press Association," said Major Screws, "human nature compels me to say that above all others, I love those who have been with me daily and hourly." With this simple statement of sincerity Major Screws resumed his seat while the editors crowded about him.

REMARKS IN FULL OF MAJOR SCREWS.

MR. HANSON:

You and those you represent know how completely I have been surprised by this token, which you have, as spokesman so felicitiously presented. If ample notice had been given of your intention, words would fail me in any attempt to express the emotions which well up from the very depths of my heart. I have been deeply touched by what has already been done by friends and co-laborers of the National Editorial Association, but as much as I appreciate this high consideration, I know them all well enough to believe that they will understand that element of human nature, which prompts me to say that above all else I value the affection of those who have labored with me daily and hourly for so

many years past. You and those for whom you speak know how gratefully I accept this loving cup and how I will always cherish for you all the tenderest feelings of affection. To have such marks of esteem from those who know you best and understand you most thoroughly is honor enough for any man. I thank you all with all the sincerity of a gratified man and a grateful heart.

In a burst of rare eloquence Editor Rhodes of the Birmingham *News,* pointed out the importance of the occasion.

"This," declared General Rhodes, "is a red-letter day in Alabama journalism—a day when we celebrate a most memorable occasion. Forty years in honorable endeavor is the record. I thank God for such a scene. I thank God for such a grand old man as Major Screws. He is genial as the zephyrs of Coden; he is as sweet as the roses in June; he is as pure as a little girl, with a great heart and a great intellect, strong before men and before God. All the world can point to him and say 'there is a man.' This occasion is an object lesson and an inspiration. It celebrates all the fruits of labor backed by indomitable courage and a splendid mind."

Then followed a remarkable scene. Nearly everybody wanted to speak. C. W. Hare of Tuskegee was the first recognized. He said his heart was full of joy at the honor the association was paying Major Screws. Every member of the association might well follow in his footsteps.

Walter M. Grubbs of Decatur spoke with great tenderness and tears came to his eyes. He said it was a love-feast. It showed that the association had been redeemed, and was again reunited, and he was proud to be a member. This reward of forty years in journalism made a young man feel that it was a noble calling.

H. T. Wear of the Opelika *News* was very happy. He was profoundly impressed with these evidences of affection for Major Screws. He insisted that Major Screws was not such an old man as his forty years of service would indicate, and advised the editors "Not to go up against him believing that he lacks virility. For if you do," added Mr. Wear, "you will be mistaken. I know, because I have been there."

Harry Y. Brooke of Luverne quoted Shakespeare: "All the clouds that hovered about our house are in the deep bosom of the ocean buried," he said, and the association was

Silver Set Presented to President W. W. Screws by the National Editorial Association, Guthrie, 1905.

General Rhodes said that he, like other Alabama editors, had differed with Major Screws, in public politics and they had ever found him great in harmony but greater still in differences.

In his enthusiasm, General Rhodes jerked from the pocket of Major Screws a splendid Swiss watch presented to him recently by his business associate, Mr. Glass, "in commemoration of twenty years of harmonious business association." General Rhodes held the watch aloft and read the inscription, using the incident to again throw the editors into an outburst of happy enthusiasm.

President Greer spoke forcefully of Major Screw's high character as an editor, impressing the memorableness of the occasion. He said that as presiding officer he would yield the floor to delegates to make one-minute speeches on Major Screws.

now cemented by the personality of this honorable editor of forty years' standing.

J. C. Williams of Talladega declared that Sylacauga had missed the greatest treat in the history of the association, and the editors snickered. He paid high tribute to Major Screws.

Jacob Pepperman and Bruce Kennedy of Montgomery, W. M. Meeks of Gadsden, R. E. L. Niel of Selma, and others, twenty-five editors in all, spoke of the great editor in terms of devotion. The whole afternoon was given over to Major Screws. It was declared that his fine personality had cemented the organization as it had never before been united; men who have fought him hard in the political arena spoke reverently of his courage and devotion to convictions. When night was falling and with other editors struggling to get the floor to speak of Major Screws, the association,

by a rising vote, passed this resolution, introduced by W. E. W. Yerby of Greensboro, a former president of the association:

Resolved, by members of the Alabama Press Association, That we all love, honor and respect Major W. W. Screws and we trust his life may be lengthened out over many years to come."

Men jumped to their feet and women waved handkerchiefs as the resolution was adopted. The band played "America" and as the editors recessed until tomorrow with happy faces, they gathered about Major Screws and wrung his hands.

Tears streamed down the face of the veteran editor at the remarkable expression of tender devotion.

The following is the inscription, on the loving cup, that is not shown with legible clearness in our illustration:

—To—
MAJOR W. W. SCREWS,
Editor-in-Chief
THE MONTGOMERY ADVERTISER
—From—
Three Score and Ten of His Affectionate Workers in
Commemoration of
FORTY YEARS'
Continuous and Successful Labor in Developing the
Advertiser from the Ashes of the Civil War
to the Highest Type of a Modern Newspaper.
1865—July 20—1905.

The kind words for Past-President W. W. Screws, lovingly called "Major Screws," did not die out with those spoken in the convention. The echoes, with increasing volume, come up from the newspapers all over Alabama and will reverberate throughout the Nation, with instructive thoughts and added words of commendation. The Mobile *Herald,* one of the newspapers printed in the same county in which the Convention was held and hence nearest to the scene, said:

"Mobile County has as a visitor the most distinguished newspaper man in Alabama, one whose lustrous career has brought him a national reputation for integrity and broad-minded, liberal treatment of public questions.

"July 20, 1865, having just laid aside the accoutrement of war, young Wallace Screws, a Confederate officer was appointed editor-in-chief of the *Advertiser.* Serving continuously and unbroken, this great old editor has moulded the policy of that great old newspaper until this good hour. It is an enviable record and one we doubt without a parallel.

"A newspaper but reflects the character of its guiding spirit. Whatever character the *Advertiser* possesses, whatever its achievements, Major Screws is responsible. He has weathered many a storm; he has fought many a courageous fight; he has held the scales of justice and he has always been on the side of truth.

"Modestly, he has traveled on throughout these years, content to be a newspaper man and it is to the credit of the people of Alabama that he is universally esteemed as one of Alabama's truly great men.

"To have such a man in Mobile County on such an important occasion of his life is a pleasure to the newspaper profession of this section. We hope he will round many more useful years in the harness which he loves so well and we join the other editors in welcoming him to Mobile.

"Major Screws we salute you."

SECOND DAY'S SESSION—POOLING OF INTERESTS—ELECTION OF OFFICERS.

The editors put in a solid day's work on July 21st, adjourning at six o'clock in the evening.

A committee of the association made a report recommending the pooling of all foreign advertising business of the weekly papers of the State and placing the same under the management of a central office. Victor H. Hanson, the successful advertising manager of the Montgomery *Advertiser,* who had been appropriately called "the evangelist of advertising in the South," was called upon for his views, and discussed the subject from the point of a successful business man. His remarks will be of value to every newspaper publisher, advertising manager and newspaper association in the United States.

He said that the proposition to pool interests and open a central office was a thoroughly practical idea. He urged the editors to know the cost of their space as a merchant knows his goods. If foreign advertising was handled for all of the Alabama weeklies through a central agency, the papers would dictate to the advertisers, instead of the advertisers dictating to the newspapers. An expert advertising man to manage the business, Mr. Hanson said, would easily earn $5,000 a year, but he would be worth it. He suggested adopting a basic rate scaled on the circulation of each newspaper.

Mr. Hanson answered many questions. He said that during his connection with the *Advertiser* he had raised its advertising rates four times and the paper was today receiving the highest rate per thousand for its circulation of any newspaper in the Southern States. This, he said, was due to the high character of the newspaper and the character of its readers. The paper has an invariable rate and does not vary from it.

Colonel Rhodes admitted that the *Advertiser* received the best rates in the South for its circulation and spoke of Mr. Hanson in terms of the highest praise.

In closing, Mr. Hanson earnestly pleaded with the country editors to adopt the pooling plan before adjournment.

As a result of Mr. Hanson's address, which was frequently applauded, the report of the Committee was adopted, and on motion of Mr. Stevenson, of Roanoke, a special committee was raised to take further steps in the premises.

A feature of the day was a visit to Coden of Col. E. L. Russell, Vice-President of the Mobile & Ohio Railroad, and a party of his friends in his private car. The party marched to the convention hall, where Mr. Russell was warmly greeted. When he had made a happy speech he was elected an honorary member of the Association.

A number of fine papers were read. A paper by John C. Williams of Talladega on "The Relative Position of the Newspaper to the Railroads," attracted much attention. He said:

The newspaper and the railroad are among the most forceful agents of modern civilization. Each has its sphere of operation independent of the other, but both are alike essential, to the progress and permanent industrial thrift of the country. Under such conditions, these great forces of civilization should combine in their efforts to advance the intellectual, and material interests of the community, as typified by the newspaper on one hand and the railroad on the other. The mission of the two forces are much the same.

In considering the relation which the newspaper should bear to the railroad, let it not be forgotten, that there is more capital invested in railways, with more men in their employ, than in any other line of industrial enterprise in the world. Billions of treasure have been expended in their construction and millions of men find daily employment in their operation. They have penetrated every country under the sun, giving promise of profitable development. In former days the "rifle, ax and saddelbags" were the typical implements of the men setting out to establish civilization in the wilderness. All is now changed.

A new constitution was adopted. This new constitution is a business-like instrument and places the Association on a splendid basis.

Chas. H. Greer of Marion, was reëlected President. The other officers chosen were: R. E. Niel, Selma, First Vice-President; Second Vice-President, H. S. Doster, Prattville; S. H. Morris, Fayette, Treasurer; W. W. Screws, Historian; H. Y. Brooke, Luverne, Orator, and J. C. Lawrence, Union Springs, Poet. There was a contest for Secretary between Jacob Pepperman of Montgomery and J. C. Lawrence of Union Springs, Mr. Pepperman winning.

The City of Gadsden was selected as the next place of meeting of the Association and the thirty-fourth convention adjournment with a feeling among the members that a work had been accomplished which would inaugurate a new area of increasing interest and usefulness for the organization and all the newspapers of the State.

THE THIRD STAGE OF THE OUTING.

THE N. E. A. VISITS CALIFORNIA, OREGON AND INTERVENING STATES AND TERRITORIES—THE LEWIS AND CLARK EXPOSITION.

BY ADDISON B. BURK, EX-PRESIDENT PENNSYLVANIA EDITORIAL ASSOCIATION.

AT San Antonio, Texas, the National Editorial Association began the third stage of its memorable outing of 1905. The first stage comprised the convention at Guthrie, Oklahoma, and an instructive trip through Oklahoma and Indian Tertories; the second consisted of a side trip through Texas, ending at San Antonio. I have been asked to become historian of the third stage—a "side"trip of several thousand miles, through Arizona, New Mexico and California to Portland, Oregon, and back through the latter State, Utah, Colorado and Kansas, to St. Louis, Missouri. There are great difficulties in doing justice to States, cities and other communities thus hurriedly visited, for the reason that one sees relatively little from the line of a railroad and is liable to be prejudiced by unimportant scenes or incidents, or even by the accidental state of the weather at the time of the journey and the resultant comfort or discomfort under which impressions are gathered. I have always decried the attempts of authors, to give critical views of peoples or of lands derived from hurried journeys during which they have come in contact with less than one out of one hundred thousand of the

Forestry Building, Lewis and Clark Exposition.

latter and have seen only a narrow strip of country traversing a great State and only the parts of cities—usually the worst—through which a railroad runs. There have been some distinguished offenders in this regard—notably, Charles Dickens and Rudyard Kipling. That I may not commit a similar offense, I shall avoid critical comment on places or people, and endeavor to write a simple narrative of a most entertaining journey with such information about the cities visited as could be gathered from reliable sources.

As, however, the account of the journey will necessarily run through several numbers of the NATIONAL PRINTER-JOURNALIST, thus deferring publication of the description of the Lewis and Clark Exposition, if taken in its proper order, until after the exhibition has closed, the narrative of the journey in detail will be postponed to permit immediate publication of the impressions made by the Exposition.

Many of our party, much to their regret, turned homeward after our visit to San Antonio, but the remainder—a goodly number—passed under the care of the Southern Pacific railroad for the long journey to Portland, Oregon. No party of travelers ever had a better host. The Southern Pacific sent to us as its representative, Mr. C. B. Jackson, traveling passenger agent, who looked after our comfort, and so endeared himself to the entire party that when we parted from him at Portland, he was presented with a great silver platter, bearing testimony to our appreciation of his many kindnesses. Before we left San Antonio, we had been warned that we would have an awful trip across the desert lands and told that we had been foolish in selecting the southern route for a summer trip. But although we were looking for discomfort, we did not find it. The Southern Pacific railroad uses oil burning locomotives with such success that it is quite probable oil may be substituted for coal on other roads before many years have passed. Oil is not only cheaper than coal, but is preferable, because it emits no cinders or dust, and indeed presents no objectionable features. Some smoke appears, but it is so thin that it is quickly dissipated and we heard no complaints of disagreeable odors. With an oil-burning locomotive at the head of the train we were able to keep the windows wide open and for some unexplained reason suffered no discomfort from the alkali dust of the prairies which, we were told, frequently sweeps through the cars, irritating the throats of passengers. Thus favored, we passed over the great desert lands (staked plains) without discomfort of any

Agricultural Building, Lewis and Clark Exposition.

kind. The temperature was high (it was 108 degrees at Yuma and 100 degrees in the cars) but the air was so dry that the heat was not noticeable. The roadbed of the Southern Pacific is excellent throughout its entire length. With fast engines and a good roadbed we traveled at a high rate of speed and seldom failed to be on time, except when reception committees interfered with the schedule. These occasions were frequent and were sometimes annoying, because they postponed the dining hours, but upon the whole the trip was well managed and whatever we lost in the way of meals was more than made up by generous hospitality on the part of those who had kept us over time as their guests.

Leaving San Antonio in the evening of June 15 and stopping many times on the way, we reached Portland at noon, June 27th. A reception committee had boarded the train before our arrival and had provided us an ample supply of tickets, admitting us to the Exposition grounds. No time was lost upon our arrival at Portland in going to the objective of our long journey. Special cars were in waiting to take us to the Exposition, and in less than half an hour we were at the American Inn, the only hotel on the grounds. It was raining when we arrived, but the sky cleared in a little while and, between showers, we obtained our first view of the Exposition.

It is a very creditable exhibition—not to be compared in magnitude with the great World's Fairs at Chicago and St. Louis—but more like the Pan-American at Buffalo, both in size and in the general character of the exhibits. No exhibition given anywhere has excelled this at Portland in natural beauties of site. It occupies high ground at the foot of Willamette heights and about one-half of the enclosure is taken up by a natural lake. High hills surround the exhibition grounds and in the distance are snow-capped mountain ranges, including such great peaks as Mts. Ranier, Adams, St. Helens and Hood. The scenic effect is charming and it has been enhanced rather than marred by the artificial works of the Exposition. The United States Government exhibit which appears to have been removed bodily from St. Louis, occupies a tongue of land in the lake, connected with the mainland by the Bridge of Nations, which is made very beautiful at night by electrical illuminations. The Government buildings are handsome structures, covered with "staff" and the exhibits are such as were shown at Chicago and St. Louis. They show to better advantage at Portland than at Chicago or St. Louis, partly because they are isolated, but mainly because the exhibition is relatively small and the visitor, not being overwhelmed by an embarrassment of riches, has time to examine individual exhibits. A student could lay the foundation of a liberal education by a close study of the Government exhibits at Portland, but of course he could not do it in a day or a week or a month. It is an educational exhibit, however, even for those who only stroll through the buildings. The lake is utilized for an exhibit of the life-saving service and daily exhibitions are given in the presence of thousands of spectators, of the use of the breeches buoy, the unsinkable lifeboats, etc.

The chief exhibition buildings have been erected on a plateau overlooking the lake and the approaches to them from the lake front, are well wooded and highly decorative terraces, planted with tens of thousands of rose bushes in bloom, for Portland is known as "the rose city." On the flat land at their base, immediately opposite the Bridge of Nations, is "the Trail," which corresponds with the Midway of Chicago and the Pike at St. Louis. It is so much like them in all respects, though smaller and less pretentious, that it calls for no description.

The Exhibition proper has the usual main buildings—that of Liberal Arts, Agriculture, Horticulture, Fine Arts, Machinery and Electricity, Forestry and Mining. There are in addition several important State buildings, including some representing the Eastern States and imposing structures built by the Pacific Coast States. Foreign nations, with the exception of Japan, are not largely represented. The exhibits are of the usual character, the distinctive feature of the display being that of the agricultural, mineral and forestry resources of the Pacific Coast States. Similar exhibits have been made in Eastern exhibitions, but they have been less impressive than here, possibly because in the East they were surrounded by counter attractions.

Much of the architectural adornment is of the Mission style, which lends itself readily to the uses of an exhibition and is besides restful to the eye. One of the finest of the State buildings is that erected by New York, and here the delegates to the N. E. A. and their wives, were given the finest reception of the trip. The Exposition authorities with their ladies were in the receiving line, with military attaches in attendance. The scene was one of great brilliancy and nothing could excel the good taste that marked the hospitalities of the occasion. Besides its State headquarters' building, Oregon has a magnificent exhibition building built of logs, and Washington is similarly represented. We happened to be present on Oklahoma day and willingly wore badges calling for statehood for that territory, the badges having been distributed to all who cared to have them, by energetic Oklahoma "boomers."

Nothing has been omitted that would be needed to make the Lewis and Clark Exposition a miniature of former World's Fairs. Fine band concerts are given daily; there is a Stadium for outdoor sports and an experimental farm. The electrical illumination makes a fairy-like picture at night. In proportion to its size, the Portland Exhibtion uses more electric lights than any of the great exhibitions have had, and their concentrated effect is imposing. It would not be fair to advise any reader to cross the continent in order to see this display, but if any one intends to visit the Pacific Coast, he should do so while the Fair is open, for it is well worth seeing, and is an added attraction to the hundreds that are offered to travelers in the far West.

One of the special exhibits is a reproduction of Abraham Lincoln's cottage at Springfield, Illinois, which contains a priceless collection of Lincoln relics; another is the Roosevelt cabin in charge of a great admirer of the President, who is fond of telling stories of Mr. Roosevelt's strenuous life in the West as an amateur cowboy, when, as a boy orator, he was as insistent upon good citizenship as he is today.

The exhibits of Oregon, Washington, North Dakota, California and Montana deserve especial notice from visitors. That of Washington is in charge of Commissioner William Steel, son of J. Irvine Steel, Treasurer of the N. E. A., and himself a delegate to the convention.

Our headquarters while at the Exposition were in the American Inn, a very large hotel within the grounds. It is a structure similar to the Inside Inn at St. Louis, but is superior to the latter in appearance, situation, construction and appointments. The rates are reasonable, the service good, and the broad porches of the hotel provide a restful place from which a fine view of the Exhibition buildings is afforded, especially during the illumination.

The Lewis and Clark Exposition commemorates an event of great importance in the history of the country, the addition to the United States by right of discovery of the territory comprised in Oregon, Washington, Idaho and parts of Montana and Wyoming. Five nations laid claim to the territory between California and Alaska, a little more than a century ago—Spain, by right of early discoveries; Russia, by reason of visits by her seamen; France, because of indefinite westward extensions of her Canadian possessions; Great Britain, because of the discoveries of Captain Cook and the later operations of the Hudson Bay Company, and the United States by reason of the explorations made by Lewis and Clark. The country being then almost inaccessible, nobody set much value upon it. President Jefferson, however, was far-seeing enough to seek an extension of the Union to the Pacific Ocean before the Louisiana purchase had been made and the result of his recommendations to Congress was the sending out of the Lewis and Clark expedition for the exploration of the Northwest. Before its return the Lousiana purchase had been completed. Doubtful title to the Oregon country was conferred by this purchase and it might have been lost to us, but for Jefferson's foresight. Secretary Blaire based our title on the discovery of the Columbia river in 1792 by Captain Robert Gray in the Boston ship Columbia and its exploration from the source to the sea by Lewis and Clark in 1805, and on the settlement of Astoria in 1811. Back of these claims was the transferred Spanish claim. In 1818 Great Britain and the United States entered into an agreement for joint occupancy and this was indefinitely extended in 1827. It was not until 1846 that title was settled by treaty with Great Britain, fixing the northern boundary of the United States at 49 degrees north latitude. The entire country was an unknown wilderness when, in 1804, Captain Merriwether Lewis

and Captain William Clark with about 100 men started to explore it. They ascended the Missouri river in the spring of that year, spent the succeeding winter among the Mandan Indians in North Dakota, and early in 1805 resumed the journey up the Missouri. They crossed the Rocky Mountains in August and early in September reached the plains of the Western slope. In November, having followed the water courses, they reached the mouth of the Columbia river, 4,000 miles from their starting point.

On their way to the ocean the explorers had missed the Willamette river, on which Portland stands, but upon their return journey in the spring of 1806, Captain Clark explored it as far as the present site of Portland. The Willamette is a great tributary of the Columbia, entering into that river about 100 miles from its mouth and just above the junction is the city of Portland. When a schoolboy we were taught to pronounce the name of this river in four syllables—Wil-lam-met-te, but we have the authority of the Governor of Oregon for the statement that the proper pronunciation is to be obtained only by practicing on the words "Damn it."

The explorers, after many hardships, reached St. Louis, September 23, 1806, after an absence of two years and four months. They were the first Americans to cross the continent to the Oregon country and the Pacific Ocean, and their report enabled the United States to hold the country west of the Rocky Mountains south of the 49th parallel. It gave this country a coast line on the Pacific, led to the acquisition of California and remotely prepared the way for our Eastern possessions.

Oriental Exhibits Building, Lewis and Clark Exposition.

Congress rewarded Lewis and Clark with grants of public lands and Captain Lewis was appointed Governor of Louisiana and afterwards Governor of Missouri Territory. The Exposition commemorates the Centennial Anniversary of their famous expedition.

Great changes have taken place in the hundred years that have elapsed since Lewis and Clark toiled over the mountains on foot. The journey that occupied more than two years of their time can now be made in a week; railroads traverse almost every part of the Oregon country and travelers ride in Pullman cars with all the conveniences provided for those who journey between New York and Chicago. The country has been developed to a wonderful degree. In 1805 it was a wilderness. Fifty years later there was a population of 13,924; the value of the live stock was less than $2,000,000 and the value of all products less than $3,000,000. Today the population is 1,200,000; the value of live stock $83,000,000, and the value of products exceeds $400,000,000 annually.

But this is only a part of the story, for the development of the Oregon country has only been begun. It comprises 307,000 square miles of territory—six times the area of Pennsylvania—and although much of it is mountainous and unsuited for agriculture, its resources are enormous, for great forests cover the lower mountains, the hills are filled with valuable minerals and the streams provide the greatest fisheries in the world. Manufacturing interests have been so far developed that the manufactured products of 1905 exceeded in value all the natural products combined, and if trade with the East should be developed, as recent events have led us to expect, the commerce of the Oregon country may within the lifetime of a generation rival that of the Eastern seaboard.

Portland is a very prosperous and attractive city, but description of our doings there and of the side trips taken by the delegates is reserved for its proper place in the narrative of our journey, the present purpose being simply to direct attention to the Exposition while it is still open to visitors.

THE PILGRIM'S FOURTH.

(Read by JAMES H. POTTS of the Troy, N. Y., *Times*, at exercises held in the car Bolton of the National Editorial Association's train while passing through Kansas on the Fourth of July, 1905.)

Is this our country's natal day,
And we upon the pilgrim's way?
Where are the festive hours we know
In homes we left long weeks ago?

The din that rose with morning sun
Leaves us in quiet, every one;
For cannon's mouth at break of dawn,
The echoes of the canon's yawn;
For powder grains that flew like hail
The brief torpedo of the rail;
For Chinese cracker and its wheeze
The other kind, that comes with cheese;
For the revolver's warning bark
Revolving wheels in day and dark;
For proud drum major shining far
The modest captain of a car;
No blood that bids the surgeon pause,
But "bleeding Kansas'" watery laws.

And yet the glory of the sun
Is brighter than the rocket's run,
The breadth of meeting land and sky
Grander than fireworks of July;
And here, where merges South with North,
We celebrate the patriot's Fourth.

Who can with keener sight than we,
The traveler's from sea to sea,
Discern the wonders wrought for men
When flowed the Declaration's pen?
From states that know the Atlantic's surge
We crossed the Mississippi's verge;
Saw Oklahoma, peering far,
Await the rising of its star;
Like boys who from the table rise
The Texan wondered at his size;
El Paso strode the stream below
To kiss the maids of Mexico;
While Arizona's torrid beam
Proved the mirage was not a dream.

Will ever California's breath
That wooed us from the Vale of Death
Be lost to memory's deep-graved slate?
Not till Heaven opes its Golden Gate.
Midst ancient spires that seek the skies
An exposition's towers arise;
Lewis and Clark a century greets
From palace homes and busy streets.

The whisper of the Mormon's hall
Swells to a roar while pledging all
To make of Utah such a state
As, pure and loyal, must be great.
As Shasta's glistening summit high
From redwoods rose to azure sky,
So Colorado's colors true,
Soil red, white mountains, heavens of blue.
No loiterers we on foreign strand,
We're in the heart of Union land.

Nor have the giants of the past
Vanished from out the picture vast;
The fathers had their Washington,
We glory in a later son,
And all the pride those patriots felt
Glows at the name of Roosevelt.

Between his death and burial lies,
Where tinged with gloom are festal skies,
One who from our own writing guild
Was in diplomacy most skilled;
Lo! pendent from the flag today
Grief's streamer for the death of Hay!

Westward let Empire take its way,
We're going East, perhaps to stay;
But East and West, with South and North,
Proclaim an undivided Fourth.
Pacific union is our boast,
Union Pacific now our host;
And though like wise men from afar
We traveling seek home's guiding star,
The day, the place, we understand;
July the Fourth! Our own dear land!

FREE THEATRICAL NOTICE.

BY JOHN SUNDINE, MOLINE, ILL., DISPATCH.

When the Moline *Dispatch* decided to ask the members of the Inland Press Association how much the Inland Press publishers are getting for theatrical advertising and how much theatrical advertising they are furnishing free to their local opera house managers, it did not occur to the *Dispatch* that our friend Whittaker would ask for a report of these findings.

He made such a request and here are the facts: Fifty-seven newspaper publishers were heard from.

It was found that most publishers give instead of an inch rate, a price for so much per show, ranging from $1 to $8, and give from two to six inches of display from four to six times. Locals and readers are generally exchanged for complimentary tickets, in the majority of cases six.

For display advertising the price per inch ranged from 4c. to 40c.

Two papers receive 4c. an inch, three 5c., six 6c., one 8c., thirteen 10c., three 12c., three 12 1-2c., eight 15c., two 16c., five 20c., one 21c., four 25c., four 30c., one 33 1-3c., and one 40c.

In the main, the charge for display advertising, in the different papers who made a report, was in conformity with their rate card. The object of the *Dispatch* was to learn if the papers in the Inland were getting card rates for display advertising. The *Dispatch* was never able to get card rates, and we wondered what the other fellows were getting. We are now convinced that the Inland publishers are getting card rates, or better, for theatrical advertising.

Mount of the Holy Cross, Colorado.

In Moline, up to two years ago, the papers, and there are three afternoon dailies, were getting $3 for each show, and gave in return a four-inch display six times, and from 50 to 100 lines of short locals for each show. When three or four shows happened to play the same week, the papers were pretty well filled with opera house locals. The ranker the show the greater the number of locals. Once or twice during the year when a good show did strike the town the locals were cut out and so were the four complimentary tickets. The manager said that he did not need locals for such attractions and deemed it wise to suspend the free list.

No complaint was made by the newspapers on this arrangement. The openings of the season, two years ago, the opera house manager announced that he would pay but two dollars a show instead of three. He wanted the same number of locals gratis as he had received during the previous season. The other two papers in Moline accepted $2 rate, but the *Dispatch* held out and is still holding out. The manager has asked several times what rate we would make him and we have stuck to 15c. for display and 10c. for locals. We told him that he could suspend his free list forever as far as we were concerned; that when we wanted to go to a show we would buy tickets the same as any other business man. We refused to have anything to do with a lump rate per show with locals thrown in free. And still we are on the "outs."

Returning to the investigation, eighteen publishers acknowldged that they were giving locals free, advertising the show in advance. One stated that he got 3c. a line for advance locals, two 4c., ten 5c., one 7c., one 8c., seven 10c., and one 15c. a line. Eighteen did not make a report on locals. One publisher in making a report said that he furnished advertising to the local opera house manager receiving a percentage of the box office receipts.

Several publishers reported that they were receiving 50 cents an inch each insertion for circus and tent show advertising.

It seems that the opera house manager can use advertising in local newspapers to as good advantage, if not better than local merchants. The opera house manager uses space seven to eight months in the year. The merchant uses space all the year 'round. Why should the opera house manager get a better rate for advertising?

*Read before the Inland Daily Press Association, July 11.

WHEN SHOULD THE PUBLICATION FEE FOR LEGAL ADVERTISING BE PAID.

BY ANDREW O. LINDSTROM, OF GALESBURG, ILL., DISPATCH.

Our experience in collecting the fee for the publishing of legal notices is, no doubt, the same as that of many other newspapers. Of late the members of the association from Galesburg have given the subject particular attention. After investigating the condition of fees earned by us in the past, we discovered that we had accumulated several hundred dollars of uncollected accounts in a comparatively short time. It seems to me, too, that we are ourselves to blame for this situation. We have always accepted legal notices for publication and delivered the certificates whenever required without any care as to when or who would pay the fee. In the case of divorce suits and attachment suits, many times the cases have been settled out of court and the publisher's fee has been either forgotten or ignored. In estate matters, we have seldom lost any money, but the fee has been hung up in court anywhere from one to ten years. This state of affairs, we concluded, should not be permitted to continue and the several publishers of the city were seen and agreed to send out notices to all the attorneys, notifying them that in the future the notice would have to be paid for when the certificate of publication was delivered. This was such a radical change from the old, customary, slipshod method of the attorneys that it immediatery raised a storm of indignation, the Bar Association even going so far as to attempt to pass a resolution advising attorneys to send their legal notices out of the city. Some of the more reasonable and conservative attorneys, however, appreciated our situation and prevented any such action.

It appears to me that there can be no good reason why a newspaper should extend more credit on publication fees for legal notices than it would to its best advertiser. Very few newspapers would think of extending as much credit to any other class of advertisers as we have been doing in the matter of legal notices.

The cost of handling these notices is fully as great if not greater, owing to the greater degree of care required to ensure accuracy, than is that of ordinary commercial advertising. The amount involved in every instance is trivial, and the chances are that each case will have but one notice. Opening up a ledger account and following up the collection of the account, therefore, entail an expense disproportionate to the amount involved.

If the practice of collecting these fees upon delivery of certificate was once established, a litigant would no more object to it than he does now to paying cash for a railroad ticket, court costs or other incidental expenses. It would be no hardship on him whereas it is unnecessarily so on us now.

TWO BOOKS BY MEMBERS OF THE N. E. A.

EDITORS FREQUENTLY BECOME AUTHORS, AND MANY TIMES NEWSPAPER ARTICLES AND WRITINGS ARE PROFITABLY COLLECTED AND PUBLISHED IN BOOK FORM.

TWO books by members of the National Editorial Association have reached our desk within the month. The first received is entitled, "Public Speeches of Albert Blakeslee White, A. M., Governor of West Virginia."

Mr. White was President of the National Editorial Association in 1888 and presided at the Convention at San Antonio, Texas, that year. He served for four years, from March, 1901, to March, 1905, as Governor of West Virginia. This book records his public speeches during that period. It is a handsomely printed book of 461 pages. In looking through the volume, we are forcibly impressed with the number of important subjects with which a live Governor of a young and progressive State has to deal in a serious and often an authoritative manner. There is scarcely an interest of an enlightened people but that is represented in these speeches. They cover numerous matters relating to capital and labor, education, industrial training, taxation, agriculture, mining, trades, commerce, military service, duties of citizenship, patriotism, crimes, reformatory and punitive systems and institutions, laws regulating offenses, public highways, railroads, promotion and improvement, expositions, the newspaper press and so on to the end of the list.

The addresses suggest how broadly, intelligently and well a thorough newspaper training fits one to deal with all these multiplied subjects.

There is not an interest of the community, city or state, of an industry or calling that does not find its way into a live newspaper office for record, consideration and treatment. To step from the newspaper office into that of Governor of a commonwealth only puts one in the way to deal with matters and questions already familiar.

Mr. White had a splendid newspaper training through years of successful work and he made as successful a Governor as he had been a successful, conscientious newspaper man. Outside of the regular routine of matters connected with the administration of his high office, which he greatly honored, we find ourself especially interested, as will be all members of the callings of newspaper making and printing, with his addresses on the following occasions and subjects: "Bethany College Inaugural," "Commencement of West Virginia University," "Dedication A. B. White Trade School," "Golden Jubilee—Typographical Union," "Address at Bethany College," "Cincinnati Typographical Union Address," "Influence of the Press in developing West Virginia," and others along like lines. The press is an educator and anything and everything along educational lines appeals strongly to a live newspaper man. The destiny of the press, no less than that of the nation, rests upon education and the right kind of education for the people and all the people—an education that makes effective, earnest, intelligent, successful workers and good citizens, who are interested in all the affairs of the community and of its members, of society and government, of industry and commerce. The following words of Governor White on "The Influence of the Press in the Development of West Virginia" may be applied with equal force to the press of every new and progressive State and to one or a score of live editors thereof:

FRUITS OF THE LEADERSHIP OF A LOYAL EDITOR WHO NEVER HELD AN OFFICE.

"Without any intention of disparagement of any of the leaders who took part in the establishment of our statehood, I think it not only appropriate, but just, to state that in my opinion, to no one influence were we as much indebted for the success of the movement as to the Wheeling *Intelligencer*, under the editorship of Hon. A. W. Campbell. The *Intelligencer* was the head and front of the agitation for statehood, its inspiration, its guide, its counselor, its bulwark, its leader. In Editor Campbell, 'the man who never held an office,' the man and occasion met. His work was incomparable, his purpose inflexible, his vision clear, his advice sound and his spirit and leadership unconquerable. The *Intelligencer* truly made West Virginia possible, and never was the 'power of the press' more wisely exhibited and the results more gloriously achieved. Some day I trust that the people of our State will honor the memory of Campbell as he deserves. The *Intelligencer* for a half century has spoken for itself and has ever been foremost in every good work for the development and uplifting of our State. Its half century of existence is crowned with honor and praiseworthy achievement. May it continue to live long and prosper.

PROMOTION OF THE PRESS.

"These thoughts lead me to say something, though inadequate, concerning an influence, in State growth and development, which is too often overlooked and too little appreciated. The development of West Virginia in the sixties and seventies naturally came very slowly, following the ravages and reaction of war in a 'border' State, and the tide of immigration to the great West and Northwest poured past our hills and valleys without a look. Wheeling was our only city; Hutington was in embryo and just starting in the early seventies; Charleston was a small town; Parkersburg had, up to 1880, less than 6,000 inhabitants, and our other principal towns were small. The policy of the Baltimore & Ohio railroad, our only trans-state trunk line in those days, was repressive of local development.

"West Virginia entered the eighties more hopefully but still development came slowly; but all over the State they had been at work for some years, and in the eighties they became more numerous, an influence that began to reach out and be felt in the outside world—the local newspapers. West Virginia had been singularly fortunate in the character and ability of its newspapers for the past twenty-five or more years. No State has done less in its laws to encourage them, and no State has owed more to their enterprise and exploitation of the State's natural resources. The seed sown for many years, in special, industrial, trade editions, in the daily and weekly mentioning and heralding of the natural resources of our State has at last borne fruit. The outsider was attracted to settle amongst us; he came and became one of us. Others followed. Our population grew and the foothills, in a modest way, began to give forth their coal, our forests to reach out their arms for railroads to market their lumber, our hills and valleys to give forth their oil and gas. Outside capital began to come in, and the great industrial developing impulse began to be forcibly felt in the early nineties which has led on to our present proud position among our sister commonwealths.

THE LOCAL EDITOR'S WORK FOR IMPROVEMENTS.

"The town and country editor of the late seventies and eighties was doing a greater work than he or his readers knew. He was ploughing deep and sowing good seed. He was everlastingly chanting the praises of our State, lauding its resources and possibilities and welcoming the new-comer and bidding him cast his lot in this favored commonwealth. The editor helped to build our towns into cities. He was the leader in every civic improvement or enterprise. He

induced and begged his people to vote aid to railroads, to build courthouses and schools, to pave and sewer streets, to put in water-works and electric lights. He shoved, he pushed, he cajoled, and he was everlastingly at it, for the benefit and growth of his locality and State. The West Virginia editor was the hope as well as the salvation of the progress of the State twenty years ago. He has lived to see the developments he so anxiously labored for in part come to pass, and he is still 'at it.'

"I do not lose sight of the capitalist and his shrewdness in the work of developing but one live newspaper, with a live, progressive, forceful editor, can do more good and accomplish more permanent results and growth than the wealthiest 'conservative' and money-loaner you ever knew. I know that the capitalist who was building railroads in West Virginia in the eighties and early nineties leaned heavily on the newspaper brethren for aid in creating public sentiment, and that the newspapers of the eighties especially were the pioneers, 'the hewers of wood and the drawers of water' in many of the railroad developments and in the exploitation of our resources and in attracting outside capital and immigration. Their work was unselfishly and patriotically done, and their successors of today are keeping up the good work."

INTERDEPENDENCE OF EMPLOYER AND EMPLOYEE.

In his address before the Typographical Union, Governor White expounded those foundation principles as to employers and employees, that have ever been set forth and advocated by the NATIONAL PRINTER-JOURNALIST, to which he has been a subscriber and of which he has been a conscientious reader for eighteen years. These principles, however, have, too frequently, been totally disregarded by the unworthy leaders of a spurious unionism, that teaches only enmity towards, and robbery of employers, unfairness, dictation, unjust, unbearable interference, shirking, limiting production, the violation of personal and property rights, threats, violence, boycotts, assaults and assassination, in many of our larger cities. He said, "The interests of employer and workman are interdependent and not independent. Each is necessary to the other and there should be fair play and mutual agreement and concessions between them. Labor ought to be paid in accordance with the earning power of the employing plant, if the latter is intelligently and practically conducted. It should not be underpaid because by bad management the plant does not earn that which trade conditions of the locality, if properly developed and matured, will produce.

"Employers ought to be willing to pay fair wages and when they do so, they ought to receive honest value in return by faithful work. Many printers receive more than the scale wages, and why? Because they make their employers' interests their own and do not watch the clock. All printers are not alike and individual efforts for excellence, in my judgment, should be encouraged and not discouraged."

INDUSTRIAL EDUCATION.

In his address at the "Dedication of the A. B. White Trades School Building," the Governor said, "This great building so admirably adapted to the objects for which it was erected, has a singular and striking beauty—the beauty of utility. Here the educated eye and brain join the hand in the mastery of useful arts and sciences, which go to make the pupils within its walls not only good citizens, but useful ones; not only intelligent units in the busy workaday world, but bread-winners, home-builders and property-acquirers. There is beauty in utility; there is character in usefulness."

These quotations are sufficient to indicate the trend of the published papers and addresses of this editor-governor, as they are useful in suggestions to every working newspaper man and to every employing or working printer.

NEWSPAPER LAWS AND LEGAL NOTICES.

We will, however, add the following extract from Governor White's "First Biennial Message," on a subject of deep interest to all newspaper publishers, and that will be especially appreciated in States where inadequate provisions have been made by legislative enactments for newspaper publicity to properly safeguard the interests of the people:

"In respect to the requirements for legal newspaper publications, the State of West Virginia has pursued, in the past, a very niggardly course toward the press. There are many matters of public interest, and statements of financial affairs, which ought to be required to be published; and these publications, as well as other financial statements now required to be published, should be at legal rates and in at least two papers of opposite politics in each county where there are two such publications.

"The law should also provide that whenever a publication is required in a legal proceeding, it shall be taxed by the clerk of the court as part of the court costs of the case, and be collected by him at the same time and in the same manner as the other court costs are collected and by him paid to the publisher; and that no divorce be granted or judgment or decree be entered without the payment of the publisher's fee for the advertising required in such case.

"No license to sell liquors should be granted without an advertisement, once a week for thirty days in advance of the application being considered, in at least two papers of opposite politics (if there be such) in the county where the application is made. The application should state not only who is applying for the license, but where the applicant proposes to sell."

"BOONASTIEL"

The second book, received from a member of the recent convention of the National Editorial Association, is by T. H. Harter of the Pennsylvania delegation and editor of the Keystone *Gazette,* Bellefonte. The book bears the somewhat singular title of "Boonastiel," and, what is more singular yet, it is printed in "Pennsylvania Dutch," and is said to be the only prose work extant printed wholly in that language. While it is nearly all "Greek to us, it looks attractive and we judge from the few words that we can understand—our education in this particular language having been sadly neglected—as well as from the illustrations, that the volume is brimful and running over with quaint humor. The success of the book, which is now in its second edition, revised and greatly improved, is proof of its merit and entertaining quality. The "Pennsylvania Dutch" are the lineal descendants of early immigrants from Germany, and are entitled to the title *Deutch* or Dutch, while the "New York State Dutch" are descended from Holland ancestors and would more properly be called "York State Netherlanders" than "Dutch." Any thorough German Scholar will be able to read and to enjoy "Boonastiel." The sketches and stories were first published, from week to week, in Mr. Harter's newspapers and proved so popular as to lead to their issue in book form. The work portrays the peculiarities and eccentricities of this sturdy race in their own dialect, consisting of readings and character stories entirely original with the author, bringing the readers back to the long ago when "boys on the farm;" followed up by philosophic and humorous comparisons of conditions as they then and now exist.

It is the only volume of prose in this dialect now in existence, and is sent by mail to any address in the United States for $1.50. Money refunded if book is not satisfactory and returned in good condition. While we cannot read the book understandingly, we know Mr. Harter to be a genial-souled gentleman and a pleasing entertainer with stories, readings, jests and songs, and we also highly appreciate the courtesy conveyed through the remembering the editor by the presentation of this unique volume.

NEWSPAPER CRITICISMS

BY O. BYRON COPPER, DE SOTO, WIS.

Address all Communications for this Department to De Soto, Wis.

KEEP SWEET. That is the motto which every business man, and especially every newspaper man, should keep constantly before his mind. Do not allow your disordered stomach or your dyspeptic condition to arise as an excuse for the incourteus treatment of a customer, or harshness toward an employee. That you are miserable is no reason why you should make other people so. Be bigger than your business; be greater than the petty trials of the day; rise above your disease, and you will become worthy of the better things which you will thus naturally inherit. Above all things an editor should be ever affable and courteous to his subscribers whenever or wherever he chances to meet them, be that upon the street or within his private sanctum. Have your business so systematized that when a patron enters your office, you can calmly lay aside your work and easily devote a half-hour or so to his entertainment, without a bored or worried look upon your countenance to chill your manner and spoil your caller's visit. It will mean money in your pocket-book. Don't insult your guest by looking at your watch every five minutes, but be complaisant and patronizing, no matter if your caller be the village banker or an ordinary section-hand—treat all alike. If he be a rural subscriber, extend to him a firm and hearty hand-shake, enquire after the welfare of his family and his crops—and show him that you are interested in his affairs as well as in your own. And don't let this be mere deception, but get interested in your patrons. Be generous-hearted, else you will never know the richness of real success. The newspaper man with a mean, stingy, little soul may possibly lay up a little money in the bank, sometimes, but he never really succeeds, after all, for true success is not by any means all a matter of mere dollars and cents—there's something higher to be considered. Be ever kind to your employees; do not think that just because your establishment and your capital furnish them employment, that gives you license to vent your spleen upon them whenever your liver is out of order. A cheery "Good morning" and a kind word now and then from the "boss" will invariably get more work out of an employee than cold indifference or curses, because it makes him a happier man, and in just the degree that a workman is happy and contented at his work is he able to do the job justice—is he able to do his best. The writer knows, because he has worked out some himself. Be kind to your workmen; but maintain the dignity sufficient to keep the fact established that you are running the office, and the result will be greater returns for the cash you put into pay-envelopes.

Outlook, Briarcliff Manor, N. Y.—We mentioned this handsome little publication in our last month's instalment, but with the limited amount of time then at our disposal, we dared not attempt the elaboration which the specimen deserves. As we put it then, the Briarcliff *Outlook* is simply "exquisite." It is printed at Briarcliff Manor, "twenty-seven miles up the Hudson from Manhattan Island . . . in the higher altitudes of the Westchester Hills," in the towns of Ossining and Mount Pleasant, N. Y. We would like to give a more complete description of the community from which this perfect little magazine emanates, but we cannot, since all we know about it is the little we have been able to glean from hurried glances through the pages of the brochure itself; but it seems to be a select and ideally-conducted spot on the face of the earth into which no one is admitted without he possesses the required qualifications "for the safety and advantage of all to whom the place is home." Every printer with any taste and judgment has admired the beauty and daintiness of the popular Cheltenham series, and that is the dignified dress which adorns the Briarcliff *Outlook,* exclusively, both in reading matter and display; and it is one of the most forceful and convincing demonstrations of our long-advocated one-series doctrine, we have ever been privileged to inspect. The *Outlook's* compositor is a master hand, and every page of the magazine gives evidence of his skilful touch. In fact, it were difficult to find even the tiniest flaw in this Briarcliff Manor product, so handsomely and so elegantly has everything been executed. While the object of the *Outlook,* as stated last month, is the "promotion of country life," unlike that of so many devotees of the farm and field, its contents are up to the highest standards of literary excellence. The impression is perfect, and we have not used that adjective thoughtlessly as it is often used. The stock is an elegant cream enameled, which offers the greatest possible advantage in the printing of the numerous half-tones with which the pages are dotted. The displayed ads, which are in the main more on the order of those commonly seen in country newspapers, rather than on the order of magazine ads as printers have learned to designate them, have none of that grostesque, time-killing effect in them, but their typographical style is that clean, plain, pure simplicity that harmonizes so admirably with the dignity and the daintiness of the Cheltenham faces which enter into their composition exclusively. Our ad contest reproductions this month render the showing of any of these designs from the Briarcliff *Outlook* rather impracticable at this time, but we hope to be able to make some ad selections from this little publication for exhibition in a future issue.

We have a package of ads from O. H. Walters of the Albion (Nebraska) *Argus,* which for the same reason as stipulated at the close of the above paragraph, we are holding in abeyance for future review. Although we have not yet opened the packet, from past knowledge of the class of work on the forementioned publication, we feel safe in anticipating something especially fine.

Erwin B. Ault, that "artist printer" of Lewiston, Mont., is now at work as all-round man on the Toledo, Ohio, *Socialist,* and favors this department with a number of copies of the publication upon which he works, principally for the purpose of having some ads reviewed—not of his own composition, but some that he has designed for other workmen, as we understand it. Of necessity, as above explained, we will postpone criticism of the ads until a future instalment, reviewing only the paper itself at this time. The *Socialist* is a seven-column sheet, varying in the number of its pages according to needs, we take it; and it makes the error common to too many of the larger newspapers of this age, namely, the adoption of an altogether too sensational style of typography and cartoons. The writer is not an avowed Socialist, yet he can easily sympathize with much of the Socialistic philosophy; but he never could be entirely converted to any doctrine exploited by such exaggerated literature—or, more properly, such abnormal typography—as that represented in these copies of the *Socialist.* How much more weight the newspaper which maintains neat, modest styles throughout its pages must carry with the intelligent reader, than one that embellishes its columns with glaring, shocking scare-lines. We believe we have remarked before that there is very little difference between newspapers and people; it is a fact, at any rate: When we meet a person who "puts on a lot," as we say, we soon learn to have but little confidence in him; and just so it is with newspapers: The modest, unassuming sheet gets our confidence every time in preference to the loud and boldly-displayed journal. The impression on this publication is not bad, and the contents, while much of them might be termed fanatical, are in the main forensical and full of enthusiasm and force.

Here is a brief but interesting letter from a new Kansas friend, dated at Council Grove, Kansas, June 12, 1905:

O. Byron Copper, De Soto Wis.

DEAR SIR:—Having read your work in the JOURNALIST with much interest and profit, from time to time, I send you our sheet this week, and shall appreciate criticism from you in some future issue of the JOURNALIST. Of course, you will have to take us as we are, brevier and burgeoise mixed. Criticism on press-work, ads, arrangement, reading matter, or anything else that will help us improve with the material at hand will be appreciated. The copy we send is about an average issue of the *Guard*. In two weeks we get out an "Advertisers' Edition" of some 2,800 copies. Our regular weekly run is two bundles.

Respectfully, M. F. AMRINE.

Now there is an editor who not only appreciates a department of newspaper review, but also understands and appreciates the object of such a department. One writer in this magazine for July rather more than intimated that there was an inclination among department conductors to get into ruts, as well as among everyone else, and we do not know but that the hint were more than half true, howbeit there is certainly nothing "rutty" about Editor Amrine nor his Council Grove *Guard,* notwithstanding that the paper is in the eve of its twenty-second volume. The *Guard* strikes us as strictly an up-to-date product, a six-column quarto with all of its pages bearing the imprint of the home office. There is a freshness and modern aspect to the contents of this paper's forty-eight columns which convinces us that is editor is interested in his work—in the welfare of his town and the welfare of his newspaper—and that the creators of the *Guard* possess minds not only capable of incorporating outside suggestions into their work, but equally capable of generating new ideas of their own. The *Guard's* first page is made up exclusively of straight reading matter (which is doubtless one reason why it meets so strongly with the approval of this department) all neatly arranged with perfect balance and good artistic effect. A paper of an even number of columns is not so easily made up in good balance as is a five- or seven-column page, yet the make-up of this sheet cannot be criticised adversely. We would suggest, however, that the three little ornaments employed between items in the department "Of Interest to Women," were a trifle too bold, for the use of so many—one of these would have been sufficient; or better still, three lighter-faced ornaments. Mr. Amrine is conscientious with his advertisers, giving them all positions next to pure reading, where possible, much to the detriment of the appearance of his paper. We have repeatedly expressed ourselves as not in favor of this form, and so often exploited our ideal plan, that it seems almost superfluous to again repeat it here; but for the benefit of those who have not caught the hint as yet, we will say that the right hand side of the page is the only proper place for the ads, arranged according to the laws of Nature with the larger ones at the bottom and the smaller ones at the top. Where a half-page space is occupied by an ad with the other half of the page devoted to straight matter, as is the case in this paper in several instances, let the ad occupy the lower half; because in so doing you will be catering to the most important of your patrons—your readers. Certainly we realize that all will not agree with us in that the subscriber constitutes the newspaper man's most important patron, but it is, nevertheless, a fact, notwithstanding that the advertising department may show greater returns in the ledger. Without the subscriber it would be a difficult proposition to talk convincingly to the advertiser with a view to getting business. The story can best be told by stating that the interests of the publisher and the advertiser are identical, hence that which benefits one cannot help but benefit the other also. Let the reader have the privilege of perusing the news first if he wishes, and place that as conveniently before him as you can; for if you fail to do this he will begin after a while to think that your paper is no good. And he will not only begin to think so himself, but he will tell other people so, and no matter how insignificant an individual may be, there is always a certain set who "swear by him," as he would say himself, and their money in an editor's pocket-book is just as good as that of anybody's else. Don't try to force your ads upon the people by giving them the best positions in the sheet, but make them attractive as possible and then give them best available place—to the right of the page. The impression on the *Guard* will stand comparison with that of the average country weekly, but is a trifle light, and we are at a loss to determine whether this is due to too little ink, too little impression, or aged type. The advertisement composition is just ordinary, and a word like that to an editor as wise as Mr. Amrine will doubtless be sufficient to cause him to see that it is pushed above the ordinary mark. But when it comes to editorial work we are not capable of offering any suggestions for improvement, since in this respect the Council Grove *Guard* ranks among the best. One thing which especially interested us, because it is a matter upon which we, too, as a country editor have had to "drum" into our patrons, is the fight which Editor Amrine has been instigating among the Council Grove merchants against the mail order houses. A circular which he has issued evidently for circulation among prospective advertisers, constitutes an excellent argument. We have also been enclosed a copy of a little folio folder entitled, "Instructions to Correspondents," and containing some very desirable and valuable pointers to the paper's regular news-gatherers. Besides the circular above alluded to, there is an editorial in the paper dealing with the same subject of the mail order business, telling of the methods which make it a success, and advising local advertisers to fight the mail order concerns with their own implements of war—ads with pictures and prices in them. Truly, those are the things that make an ad effective—pictures and prices—the pictures to attract attention to the ad, and the prices to attract custom to the store. Judging from the healthy advertising support now accorded the publication under criticism, these "talks on advertising" which its editor has been giving his readers have succeeded well in producing the desired effect. Owing to the scattered way in which, as previously intimated, the ads are arranged, it is rather difficult, without a careful measurement, to say just how great an advertising patronage the *Guard* enjoys, but we would estimate it at not less than seventeen or eighteen columns. In some localities the only way to get advertising support from the merchants and business men is through education imparted by the paper itself. The editor has a powerful advantage in having unstinted access to the columns of a whole newspaper all his own, and happy is the editor who exercises that advantage judiciously—but there! Some of our patrons will begin to think that we are going to devote this entire department to this one contributor—however, our remarks have been somewhat rambling and intended just as much for the good of one reader as another, and as "Bill Barlow" says, "the which was written to read," and for anybody. We feel, however, that even in this somewhat long-drawn "spiel" we have scarcely done Mr. Amrine and his fine paper justice, and we sincerely hope he will not fail to remember us when the "Advertisers' Edition" is issued. In passing, we tender thanks for that handsome blotter—it will come in handy, all right.

If we remember rightly, we mentioned in our last month's instalment the fact of our having a copy of the *Egyptian Hustler* on hand for review, the same being a special edition issued from the office of the Anna, Illinois, *Democrat,* by the women of that city, in consequence of the annual meet at that place of the Hustlers' fraternity. And a grand piece of literature it is, too. Although we haven't had the time to read all, we feel safe in making the statement that the *Hustler* contains many excellent articles, profusely illustrated, and an editorial department which bespeaks careful work on the part of its lady editors, and withal, reflecting great credit upon them. Typographically the *Hustler* also ranks eminently with modern printed creations and makes an excellent advertisement for the publication of which it is an adjunct. The advertising columns are well patronized by local firms, and the displayed work, much of which was the handiwork of our familiar friend, Foreman Leon E. Derr, is worthy of considerable praise, especially in point of the tasteful whiting out in evidence in everyone of them. The heads in this paper are a trifle crowded, and the dashes employed in these would have given a better effect had they been graduated, say from seven to four picas, the longer at the top of the head and the shorter ones at the bottom. The impression on this sheet is praiseworthy and the lay-out in good form.

If we should say, as we certainly shall, that the *Journal,* published at Newark, Arkansas, is an excellent little weekly, no one could gainsay us. It is a five-column quarto, "all printed at home," as the two small, neat, boxed squibs at either side of the title proclaim. The initial page of this publication is the veritable quintessence of modesty and neatness. The title appears in caps and small caps of a Columbus face, just the right size to look well, and, as intimated, at both sides of this are little oblong panels of a single two-

point rule, containing the words as above quoted. Just below the title, and separated from it by a hair-line head-rule, is this device, in nonpareil Lining Gothic: "Published in the famous big bottom country, where alfalfa is king." Following this is the date line, which, by the way, is in a trifle too large and too bold a face. Lining Gothic and Antique constitutes the letter in the sub-headed heads on this page, while the single heads appear in plain DeVinne, and there is not a head-line stronger than brevier in the entire page. In the central column at the top there is a neat pictorial head of "Local Items," and in two of the copies of this paper at hand, the other four columns open with heads consisting of one full line, subheaded by a three-line pyramid; but in the third copy we have, only the two outside columns begin with such heads while the second and fourth columns start out with a broken article which runs about a stickful before finishing. This last scheme makes by far the most pleasing arrangement. As to contents, the *Journal* is to be highly congratulated. The news service is excellent, consisting chiefly of local and personal happenings, with considerable state news gleaned from current dailies. There is a need of more correspondence. The editorial work is extensive and high class. Many of the displayed ads are nice, but others are not, chiefly because of the fact that they are crowded too full of bold type faces. The ideal ad is set either from a bold letter for display and a lighter face for the body, or from an entire series of some of the faces of less pronounced boldness, such as Caslon Old Style, Jensen, Bradford, or Cheltenham, in which the larger sizes naturally bear a much more emphasized boldness in appearance than do the smaller sizes, which is not the case with the Post Old Styles, Gothics, DeVinnes, etc. The print on this publication while much ahead of the ordinary, is somewhat uneven, due, we judge, from imperfect ink-distribution, or from an imperfectly-adjusted ink fountain. O. F. Craig is editor of this commendable little home-printed quarto, and makes an advertising rate of five cents the line for reading notices, and displayed advertisements according to length of time and amount of space contracted for.

The Albion (Nebraska) *Argus* is a seven-column quarto, on ready-prints, with high standards maintained throughout its various departments. With the exception of approximately one and three-quarters columns, the front page consists of correspondence, twelve different localities being represented, but, unfortunately, this one and three-quarter columns, exclusive of the news matter, is occupied by displayed ads. which we can hardly pardon, since there is apparently an abundance of room for them on other pages. The *Argus* is printed beautifully legible, and there is a high degree of care in evidence in the little things pertaining to makeup—graduation of articles, justification, etc. The local news service is excelled by few country weekly newspapers of this class, and the editorial department merits our highest commendation. It is somewhat elaborate and the literary style is indicative of a cultured and well-trained mind. The displayed departments savor of up-to-dateness and more or less skill and care on the part of their creators. The mechanical and typographical equipment of this publication is evidently complete, and the work shows it. D. J. Poynter is the editor and proprietor of this fine newspaper.

The Mound City (Missouri) *News*, while a most worthy newspaper product, yet violates the instructions of this department entirely in the arrangement of its displayed ads; two of the six columns constituting the first page are given up to displayed matter, and these are made up with the biggest ad at the top of the column and the smallest at the bottom, while the ads on all other pages of the sheet are scattered here and there wherever they could be so situated as to form an island or a peninsula, considering the ad as land and the straight matter as water. Now, since we have so strongly advocated the opposite arrangement, we have taken particular pains to observe whether or not the publications following the plan of makeup contrary to ours, are accorded any greater advertising patronage than are those who have adopted the ideal method, and we are sincere and conscientious in the report that they are not, despite the fact that devotees of the other way cling to it only because of a fear that a change might cause a falling off in the advertising support. The argument that saves the theory is this: The advertiser is best benefited only when the medium is benefited, and it is certainly a decided benefit to a newspaper to have its makeup systematical, compact, and uniform. Otherwise, as hinted, the *News* is a very creditable periodical, being a ready-printed quarto, containing an abundance of news all presented in an admirably neat and readable shape. The ad patronage is liberal and each design has received careful treatment at the compositor's hands. King Bros., as the editors and proprietors of this weekly, deserve the compliments of this department upon the excellence of their editorial features, and for the commendable quality and quantity of correspondence which they are furnishing their readers. We notice also that the *News* makes a flat rate of five cents a line for local reading notices, cards of thanks, notices of paid entertainments, and wedding present lists; while ten cents a line is charged for poetry following death notices; obituaries, if recent, being published free, as are various other notices of a political, religious or fraternal character. These former things are purely advertising, as we have said before, and therefore should be paid for, at the same rate as other things of their class.

The Estherville (Iowa) *Enterprise,* published by J. J. Reardon, is several stages above the average six-column quarto weekly, especially in point of excellent impression, artistic display, and neat lay-out; and the editorial work, and news service are beyond reproach. The paper is entirely a product of the home plant, the inner four pages consisting principally of plate matter. An enviable advertising support is extended the *Enterprise,* but as regards the arrangement of this we would refer our contributor to the paragraph above in which we have covered his case exactly. The fact that no displayed matter is allowed on the introductory page calls forth our commendation, but we observe by another copy of the same publication of a later date that this is not maintained as an unchangeable rule, as is evidenced by the full page ad on the front. Had we forgotten to explicitly praise the fine editorial department in this sheet, and the gratifying amount of local items, we should never have forgiven ourselves, for in these respects the *Enterprise* is a model. As intimated, the advertisements are set after an elegant fashion, with good, strong display—its strength lying chiefly in the fact of its correctly distributed white space, and the plentifulness of the same. If we didn't have those contest designs to show, this month, we'd certainly spread a feast for our readers with selections from this publication. The ad compositor attempts but the simplest designs, and his creations are nothing if not beautiful. The great quantity of letters from neighboring localities is another point upon which this paper merits praise, but we should suggest a less prominent head-letter. In conclusion, with this contribution, permit us to state that we "admire greatly" the fine system of classification maintained in the *Enterprise,* from which we hope to hear at frequent intervals in the future. There's nothing like keeping us posted on your achievements—in fact it rests with our readers now, as it always has, whether we are to make this department worth reading or not, for our readers must furnish the material.

If all newspapers were up to the standards of excellence in evidence in the Thief River *Press,* printed at Thief River Falls, Minnesota, by two former Wisconsin lads, D. A. and J. A. McDonald, then the newspaper critic would have nothing much left to do but exercise his most important characteristic, which as quoted in a former instalment is "the ability to admire greatly." However, the makeup may yet be materially improved by the inauguration of rules extended continually in these columns of the National Printer-Journalist. This tiny hint is provoked by the observation of the first page of this issue before the writer, which, while entirely free from displayed matter, bears a rather unsystematic aspect with each of the four first columns opened with a sub-headed Gothic head, and the remaining two opening with a neatly designed double-column head, while the additional heads in this page are placed apparently just wherever they hapened to fit. To have given the page an artistic effect, the double-column design should have occupied the two central columns, while only the two outside columns should open with the headed articles. Then the remaining heads ought to have been arranged with a view to artistic balance lower down in the page. Heads in the page of a newspaper are just like the touches of color in a painting, and the makeup must exercise just as much care as to where he places his heads, as an artist must in giving his picture its necessary dashes of brighter hues. And in order to obtain the best results in the making up of a newspaper it is imperative that

a uniformity of size and series is maintained in the letters employed in the heads. This is one reason for the rather unsightly appearance of this initial page of the *Press*—there is too great a variety of sizes in the head letter used.

Talk about an enthusiastic, energetic, valuable editor, but don't forget to include this unpronounceable name in your mention, viz: Jesse D. Kuykendall, editor of the Middletown, (California) *Independent,* a red-hot little four-column, all home print quarto exponent of the best interests of "Lake County in general and Middletown in particular." The *Independent* is remarkable chiefly because of the fact that it is strenuously awake to the needs of its home town and pushes and boosts everything toward the realization of such needs. This is a newspaper's highest privilege and duty. Boost your town, and every boost will put a dollar into your pocket-book. As we have said, the Middletown *Independent* is a four-column quarto, all home print, and the print is not just exactly first class, either, but quite readable. All typographical features we consider creditable, and especially is the home set title to be admired, that being designed after the panel scheme with Jensen figuring exclusively in the typography thereof. There is a crisp, awakening editorial department, which is no less praiseworthy than the rest of the paper's contents, all of which are original, fresh and entertaining. There doesn't seem to be much of an advertising patronage, and the few ads carried are only ordinary in their composition. The makeup is generally neat and with an unmistakable tinge of push and progress in its aspect. The *Independent's* publisher last June closed a Successful Lewis & Clark Exposition Voting Contest, in which 11,375 votes were cast, and some sixty or seventy new subscribers added to the *Independent's* lists. Miss Neva Piner is the name of the young lady who won the prize, a cut of whom graced the initial page of the copy of the paper following the close of the contest. The issue of July 1 is devoted mainly to enthusiasm over the possibilities of an electric railway line for Middletown. We mention these facts because they are illustrative of the energy and enthusiasm characteristic of the true country editor—the characteristic that makes the country editor the most important factor in the town. Editor Kuykendall may not wear the best clothes of any man in Middletown, California; his pocket-book may not be the fattest, nor his bank account the biggest; but one thing we are sure of, no man in that village is doing more for its interests, and we dare say no man enjoys higher public esteem, nor would be more greatly missed by the community at large, than the editor of *their* paper—Jesse D. Kuykendall. He deserves all the esteem and all of the public gratitude he gets.

No. 4

We are more than gratified over the manifested favor with which our ad-setting contests are being received by the compositor readers of this department of the National Printer-Journalist. We had thought that our past contests were especially successful, but we believe our readers will all grant that the present competition has proved really and abundantly so. Twenty-three competitors have entered contest No. 4, submitting some forty-six different designs, an average of two apiece. Lawrence Wietlispach, of Streator, Illinois, the winner in our last competition, has again carried off first honors, and, we trust all interested will concede, has done it fairly and honestly, too, although not easily, by any means, many specimens having scored up to within a very few points less than his. The summary is as follows:

No. 1—L. Wietlispach, Streator, Illinois.
No. 2—L. Wietlispach, Streator, Illinois.
No. 3—Wm. H. Haskins, Boston, Massachusetts.
No. 4—Chester A. Lyle, Boston, Massachusetts.
No. 5—Percy A. Jackson, Middleboro, Massachusetts.
No. 6—Howard C. Hull, Asheville, North Carolina.
No. 7—Leon E. Derr, Anna, Illinois.
No. 8—Howard C. Hull, Asheville, North Carolina.
No. 9—L. Wietlispach, Streator, Illinois.
No. 10—Vance R. Noe, Estherville, Iowa.
No. 11—Leon E. Derr, Anna, Illinios.
No. 12—William W. Graham, Cambridge, Massachusetts.
No. 13—Percy A. Jackson, Middleboro, Massachusetts.
No. 14—G. M. Kerpestine, Milwaukee, Wisconsin.
No. 15—Wm. H. Haskins, Boston, Massachusetts.
No. 16—G. M. Kerpestine, Milwaukee, Wisconsin.
No. 17—William W. Graham, Cambridge, Massachusetts.
No. 18—H. P. Hurlburt, Prescott, Wisconsin.
No. 19—Vance R. Noe, Estherville, Iowa.
No. 20—Edward Courtright, Oxford Junction, Iowa.
No. 21—F. L. E. Winn, Mayville, North Dakota.
No. 22—H. A. Smith, Huntington, Indiana.
No. 23—O. H. Walters, Albion, Nebraska.
No. 24—F. A. Van Gelder, Lima, New York.
No. 25—Percy A. Jackson, Middleboro, Massachusetts.
No. 26—O. H. Walters, Albion, Nebraska.
No. 27—O. H. Walters, Albion, Nebraska.
No. 28—Edward Courtright, Oxford Junction, Iowa.
No. 29—Chester A. Lyle, Boston, Massachusetts.
No. 30—F. A. Van Gelder, Lima, New York.
No. 31—Dell D. Shaw, Mayville, North Dakota.
No. 32—H. P. Hurlburt, Prescott, Wisconsin.
No. 33—F. A. Van Gelder, Lima, New York.
No. 34—Chester A. Lyle, Boston, Massachusetts.
No. 35—Edward Courtright, Oxford Junction, Iowa.
No. 36—Ernest Tomowske, Milbank, South Dakota.
No. 37—William W. Graham, Cambridge, Massachusetts.
No. 38—Charles Welborn, Asheville, North Carolina.
No. 39—David C. Silve, New Orleans, Louisiana.
No. 40—L. E. Rader, Jr., Olalla, Washington.

No. 42—Guy E. Teeple, Wooster, Ohio.
No. 43—Guy E. Teeple, Wooster, Ohio.
No. 44—Royal B. Child, Arcadia, Florida.
No. 45—Guy E. Teeple, Wooster, Ohio.
No. 46—Royal B. Child, Arcadia, Florida.

In so extensive array of ad specimens it would be rather impracticable to review each and every specimen, as we should like to do; therefore, we must let a few general remarks suffice, while the reader by referring first to the accompanying standard score and thence to our system as outlined in last January's department, will easily be able to appreciate our findings in each instance.

The high quality of work displayed in the many contributions to this contest render an accurate decision therein no easy matter, and while the difference in excellence between various examples is but slight, we have been extremely careful in placing each design, and trust that all concerned will feel entirely satisfied with the results. Viewed from the point of mere comparison, some designs which appear lower in the list might easily be judged as better than some of those which have been given the preference; but these contests are strictly technical, and in forming our decisions, every practical point, as well as all aesthetic tendencies, have been thoroughly covered, as indicated in the accompanying score.

While generally this competition has been so successful and gratifying, the number of new contributors participating and the general excellence of the designs being especially appreciable, yet it has been not without one disappointing feature—the absence of several of our old friends,—Hood, Hooker, Bowman, Ovenden, Lytle, Lampman and others—where are they?

A study of so great a variety of ad designs as constitute this contest, constructed as they have been after identically the same copy, cannot fail of proving most profitable to all who are interested in the setting of ad-type.

The fine, strong beauty and technical advertising value of Mr. Wietlispach's winning design will at once appeal to the eye and heart of every real artist. The only defect we have been able to detect is the slight inharmonious effect resulting from the great strength of the primary display line. The worthiness of his other creation to second place will hardly be questioned, but many will no doubt marvel that we should place this peculiar design from Wm. H. Haskins third in the list. This ad (No. 3) together with several other fine specimens from the east, namely, Nos. 5, 12, 13 and 17, constitute a style of modern ad-typography to which we wish to call the readers' special attention, since it indicates a wide, and we think commendable, divergence from the more rigid and more extravagant schemes which have been in vogue so extensively of late years. But it requires a real artist to handle this style of typography, as it is more or less difficult to get the matter grouped in the allotted space in such a manner that good balance is maintained, while securing an aesthetic appearance and effecting a correct distribution of white.

No. 5

No. 6

Percy A. Jackson in his No. 13 specimen produces the most radical, yet most handsome, example of this scheme, while we cannot help greatly admiring Mr. Graham's No. 12—and Wm. H. Haskins' No. 3 is genuinely beautiful in its fine simplicity, and technically more correct as an ad, especially in point of display. Specimen No. 15 is another one of the Haskins' products of a style which ought to be encouraged among ad-compositors. It is certainly neat and pleasing, and tells the whole story which was intended to be conveyed to the reader, as simply, readily and concisely as no other construction can. However, the border encompassing this design is rather too bold to give a perfectly harmonious aspect, and in the main it might be considered somewhat commonplace. As an old-style design, G. M. Kerpestine's No. 14 deserves great praise, and in specimens 10 and 19 Vance R. Noe has demonstrated the effectiveness of a few small alterations, and the value of carefulness in little things.

No. 8

Edward Courtright, in the specimens which he submits in this contest is rather disappointing to us inasmuch as that whereas they suggest great skill and good taste, yet they are scarcely up to the high standards of other work which we have had from this same contributor, and rather indicate that job composition were Mr. Courtright's fort rather than the composition of ads. The forepart of this remark might very appropriately be repeated in reference to the design from F. L. E. Winn, of Mayville, N. D., whom we erroneously credit in our last instalment with having secured first prize in our third contest, while in reality he was only second, as every reader of this department knows, L. Wietlispach, the winner in the present competition having also attained to first position in our third contest. If through some inadvertency Mr. Wietlispach has failed to receive his full honors on this former occasion, we will gladly make amends.

Of course, we cannot mention everyone who has contributed to this mutual rivalry, but must not fail to call attention to Dell D. Shaw's forceful creation represented in exhibit No. 31. No. 37 shows how decidedly an otherwise creditable design can be virtually spoiled by over treatment. The dollar signs in this specimen are positively "too much of a good thing." Chester A. Lyle's No. 34 is an elegant piece of "Chap-Book" composition, original in the extreme, but not wholly approved. If there is a perfectly unsightly letter it is that Post or Plymouth Italic employed in David C. Silve's No. 39; we cannot commend this design, either, although it is strong in originality, but extremely low in the treatment of details. L. E. Rader, Jr., in his No. 40 has done exceptionally well for a boy of his years and experience in the trade, but commits the error so common to the novice, which is the employment of too large type for both the secondary display and body of his ad. The central portion of this exhibit, too, is considerably overdone with dashes and underscores.

No. 9

No. 10

Contrary to the rules of this contest, we are showing four designs set by Guy E. Teeple, of Wooster, Ohio, simply for what the changes in each are worth as a study for printers. And because Royal B. Child does not, cannot, or will not, profit by advice and example, and, if not become converted to "frames" for his "type-pictures," then learn how to distribute the white space in his ads in such a manner as to make them valuable and artistic creations without borders, he has attained to the lowest position in the list. Still, we believe that Mr. Child is sincere and honest, and we yet have faith in him and his works, and trust that some day the truth of the value of borders and the knack of proper whiting out will be revealed unto him. Let us hope so, at any rate. We have no objection to a man holding to different opinions than we on questions pertaining to typography or anything else, but with regard to these pointers which we have extended Brother Child we are sure that we are

right, and are perfectly willing to allow the case to rest with the jury, let that be composed of twelve of the most eminent printers in the land.

We have received many letters in consequence of contest No. 4, many of which are of such an interesting character, that we cannot refrain from sharing their contents in whole or in part with the readers of this department. First, we have one from Brother Wietlispach, in which he says:

"I am looking for quite a bunch of the 'boys' getting mixed up in this affair, therefore I'll get in early, and avoid the rush."

Then comes this courteous missive from an old friend, tried and true, who has never failed to patronize these ad-setting contests of ours, with unmistakable benefits as evidenced in the improvement in his ad composition since his introduction to us some years ago. His design No. 4 is a beauty:

Mr. O. Byron Copper, De Soto, Wis.

DEAR SIR:—I note with pleasure the announcement of ad-setting contest No. 4 in N. P.-J., and herewith enclose proofs of my entry.

Hoping this will be the most successful of any previous competitions, and wishing you personally, and the N. P.-J., success, I am,

Yours fraternally, HOWARD C. HULL.

Leon E. Derr, another good friend of ours, who has grown dear to us through our acquaintance in this department, writes a good letter; but on his request we are withholding it from publicity. We want to say, however, in answer to a suggestion therein, that we certainly do not object to the term, "friend" from Mr. Derr, nor from anyone else who contributes to this department, for we want to be a friend to them all. We consider the Derr design, No. 7, one of the cleanest, most handsome entries in this competition, and all of Mr. Derr's exhibits indicate study and progress.

Vance R. Noe writes that he sends us three different designs, but we are unable to show more than two of them, for two are all we have received. He says, in part:

"I suppose an attempt to improve the same arrangement will meet with your approval, although I imagine that different designs would make the contest more interesting."

Yes, indeed, the attempt to improve the same desgin is one of the most important ways of learning, and one of the most effective ways of teaching, typography; and different designs are no more interesting, and no more instructive, surely, than two designs of great similarity, yet one of them made so conspicuously better by such slight changes as those illustrated in these two excellent examples from Mr. Noe, Nos. 10 and 19.

No. 36

Ernest Tomowske says:

"I am sending you under separate cover by this mail two proofs of an ad, I would like to enter in your contest. This is the best I can do, and, while I expect that a number of journeymen will have better designs, that does not hinder me as an apprentice, in submitting my idea, as I hope to gain some knowledge by so doing."

No; to be sure, that fact should not hinder any apprentice from entering, and to be excelled is positively no disgrace, since it is a conspicuous fact that many of the best compositors in the United States contribute to these ad-setting contests. And it might be added that these contests are especially designed for the improvement of the "little fellows" in the trade, and we are always particularly pleased to hear from them. Howbeit, these contests can succeed in their chief object only with the contributions of the journeymen, also, as model studies for the apprentice contributors.

Any reader of the NATIONAL PRINTER-JOURNALIST is eligible to enter these contests, and we are right glad that the author of the following letter came in, since we consider his ad No. 22, with a well-deserved score of 93½ points, added no little to the success and interest of this occasion.

"While not a regular subscriber to the JOURNALIST, I induced one of the girls of our office to subscribe for it about a year ago, and I exchange the *Inland Printer* with her, thereby becoming a regular reader of the same. The department I enjoy most, perhaps, is the one conducted by yourself. The sketch of your life recently given was intensely interesting. I herewith submit an ad * * * * not knowing whether I am entitled to enter the contest, or not.

Very respectfully, HERBERT A. SMITH."

No. 38

In justice to Royal B. Child we wish to add that he writes that these ads which he submits "are not my ideal, by a long ways, but I haven't time just now to do any better." We can easily appreciate how difficult it is for a printer who is in business for himself (more so than with one who is employed by others) to find the time for preparing his specimens for such events as this, but we trust that none who has taken the time may feel that it has not been very well and profitably spent, even though he may have been lowest in the contest.

This is a letter from a new friend:

O. Byron Copper, De Soto, Wis.

DEAR SIR:—I am sending you under separate cover a couple of entries for your ad-setting contest.

I have wondered how my work would rank in the opinion of an expert, but have never before entered a contest. I hope you will not be too hard on me for the first time.

Being a newspaper ad, I took my proofs on common print, with news ink, making them look as nearly as possible as they would if printed in a paper. As you will notice, I have attempted no ornamentation, whatever, as I believe the strong, plain ad is the most effective, especially with the average compositor. I believe it takes a man of unusual ability to use ornaments properly.

Yours sincerely, H. P. HURLBURT.

No. 40

It would take a severe critic, indeed, to be "hard on" ads like these from this contributor (Nos. 18 and 38), Virtually, they are all right, and it is only under technical scrutiny that the errors are revealed, as indicated in the score. Mr. Hurlburt is publisher of the Prescott (Wis.) *Tribune,* and is correct when he suggests that the strong, plain ad is the most effective. True, again, it does take a man of unusual ability to use ornaments properly; and we believe, especially with ad composition, the man of usual ability uses them properly by not using them at all. There is another thing which Mr. Hurlburt mentions, and which several in this contest have likewise done, and that is the taking of their proofs on common print and with news ink, simply because it was a

newspaper ad. Hereafter, we wish that every compositor who sends ads to this department for reproduction would send good press proofs on a good quality white stock, for in the same degree that it is imperative to have a good photograph if a good half-tone is desired, so also is it imperative to have a good proof if a good reproduction is desired. The stock, the proof of an ad is taken on, too, is more or less deceiving to the critical eye, and, we have no doubt, has more than once prejudiced decision pro or con. A good white enameled stock is most desirable, but any good heavy white paper will do in case no enameled is available.

Guy E. Teeple, whose four designs make an interesting conclusion to the long list of entries, sends wishes for many contestants and hopes that the "best man" may win. We trust that all will agree that his wishes have both been realized.

Here are Edward Courtright's straightforward words, written on a memohead as far superior to his ads shown herewith, as is exhibit No. 1 compared to exhibit No. 46:

"I enclose my 'try' in the contest. I shall offer no apologies, and, while I have no hope of winning in competition with such splendid specimens as have appeared in the former contests, yet I receive much benefit from them, and I feel that we should all contribute our best efforts. Even should those efforts do no more than teach some novice what not to do, they will have accomplished something.

Yours, etc., EDWARD COURTRIGHT."

Mr. Courtright has spoken truly, and here is another printer who has made a good resolution that is pleasing to us, and we sincerely trust that his new resolve may bring him benefits galore.

"This is the first time I have contributed an ad or entered in any contest in your department, though my work has been frequently criticised by your brother editor, Mr. Woodworth, and I assure you that I am greatly interested in your department, and will be a frequent future contributor.

Sincerely yours, D. C. SILVE."

As Mr. Woodworth and ourselves have always maintained, the success of these departments of criticism depends largely upon the number of printers who take an interest in them and send in specimens to be reviewed, for, of course, while any fair judge of printing could write a department of typographical review, yet no one could write such a department if he did not receive enough material out of which to make it. Therefore, we hope that Mr. Silve, as well as all others who are interested in the art preservative and its betterment, lives up to his agreement and contributes often in the future.

As intimated, we have been fully satisfied with the results of this contest, and sincerely thank all those by whose combined efforts its success was made possible. We trust that all who entered this competition may feel amply paid for the time and labor thus expended, and in the event of another such occasion especially are they all cordially invited to again participate.

REVIEW OF JOB WORK

BY E. S. HANSON, CHICAGO, ILL.

Address all Communications for this Department to
E. S. Hanson, 1524 E. Ravenswood Park, Chicago, Ills.

Mr. E. S. Hanson, who with this issue assumes the editorial responsibilities of this department of the National Printer-Journalist, is in charge of the job printing department at the Chicago branch of the Western Methodist Book Concern. He is an experienced printer and his ability evident.

IN assuming the pleasant task of editing this department, the thought comes upon me with peculiar force that all through my career as a printer, these pages have furnished no small part of the education which I have received. And I feel that from this time forth their educational value to myself will be greatly increased; for it is, indeed, a position to be coveted, to come into touch with the wide-awake, aggressive, enthusiastic printers who contribute to this department. I wish I might promise as great returns to the readers of these pages as I myself shall derive from their preparation; but printerdom has been taught by my predecessors to expect large things from this department, and I dare not hope to equal them.

I shall strive, however, to make the department helpful and full of interest. I shall give my best thought to all samples which come in, and shall make it a point to see that they all receive attention in the magazine.

Mistakes I shall make, of course, and I can promise aforetime that they will be many; but my criticisms will be honestly and candidly given, and I only hope that they may serve in some small measure to make us all "work men that needeth not to be ashamed."

Send in samples; ask questions; make suggestions. Let the department be not *mine,* but *ours,* and then indeed, will its success be assured.

Grit Publishing Company, Williamsport, Pa.—We wish we might show our readers something of the beauty of your Knight Templar souvenir program. We would be glad if it were possible to delight them with a reproduction of the pleasing richness of color of the emblematic cover, as well as the refined elegance and general appropriateness of the book as a whole. The pages are printed in black on cream egg-shell paper, the display in Priory text, and around each page an emblematic border in olive green. Numerous handsome half-tones, printed in brown on India tint enamel, and stippled, are tipped onto the pages. The illuminated cover is protected by a jacket of gros grain parchment, and the whole tied with a cord of twisted white and black.

Horace M. Hickman, Coalgate, Ind. Ter.—For the most part your samples bear out the assertion in your leaflet that "we know how to put these types together so as to secure combinations that please." The only noticeable defect is the poor register of the colors on the card. One of the initials is below the line, while the other is above. On the Buckeye letterhead, there is a crowded appearance in the center. Some of this matter might have been carried over to the right.

W. F. Hill, with the *Recorder,* Westmoreland, Kansas.—The use of a better paper would, as you suggest, have given your booklet a more finished appearance. But a little more attention to presswork would have produced a much better job with the stock in hand. Blue is usually not ground as fine as many other inks, and for that reason is apt not to give satisfactory results on half-tones. Unless an office employs a skilled pressman, it is best to hold to black on such work unless the customer is decided in his preference for something else. The cover and title pages would be improved by using but one ornament in each place where two are used.

Fred Melton, with the Scharff & O'Connor Company, Dallas, Texas.—Three years ago, Mr. Fitzgerald predicted that Mr. Melton would develop into an artist of more than ordinary ability, and we are sure the former editor of this department would believe his predictions were being fulfilled could he see the splendid specimens of work which Mr.

Melton has just sent in. They are all that good taste, good material and good workmanship can make them. We reproduce the four letterheads, also a page from the book of paper samples. Shall be glad to see more of your work.

Biggers' Print-Shop, Corsicana, Texas.—Printers expect to see something really worth while every time this noted shop is mentioned, and they will not be disappointed in their two lot of samples. They have about them the real Biggers stamp of strength and originality. A novelty worth keeping in mind is an invitation to a linen wedding, printed on linen and tipped onto an ordinary card. The Biggers people have made themselves masters of the art of presswork on bond paper, one of the problems which every printer should work out for himself. People within the Biggers' sphere of influence will have no need to take their work to a lithographer.

L. Wietlispach, Streator, Ill.—The letterhead we reproduce is a pleasing variation of the box heading. It might have more strength and finish with a rule at the top similar to the one on your own letterhead, excepting, of course, that

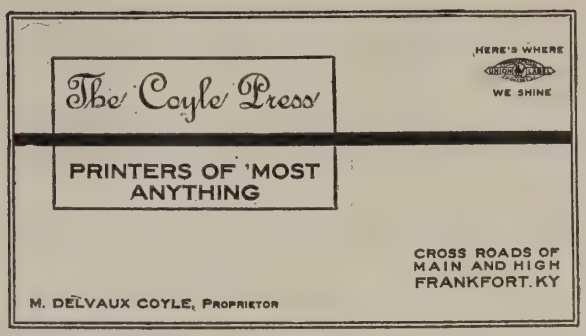
Letterheads by Fred Melton, Dallas, Texas.



Cards from The Coyle Press, Frankfort, Ky. (In Red and Black)

being printed in black it should not be so heavy. The envelope cards are neatly set, and show careful attention to presswork, something which is often lacking on an envelope. Try the Schmid statement without the ornament in the center and see if you do not like it better. The space will be sufficient to separate the two lines of business. The letterhead for the Streator Electrical Works would be made stronger by limiting the use of the text letter to the two main lines. On the lodge notehead a stronger letter should be used for "A. O. U. W." On the Haage notehead there is a suspicion of over-ornamentation. Perhaps it would be as well to cut out the palm ornaments and throw the lower lines a lead or two farther away from the box. And the type used on the main line is a face which is fast becoming obsolete. The work on the whole is very creditable, the presswork being especially worthy of commendation.

Howard C. Hull, Asheville, N. C.—A very satisfactory lot of samples. You have attacked the knotty problem of a billhead from a somewhat new standpoint, and have succeeded in getting a harmonious and well-balanced result. The large cover page, while not new, shows that the compositor is master of the design. The small cover page for the Young Women's Christian Association shows a commendable spirit of originality in breaking away from the beaten track, even though the effort in this particular instance must be condemned as injudicious. In trying to introduce a new feature into an old design, Mr. Hull has entirely spoiled the effect of an otherwise good piece of work. We refer of course to the crank-shaped rule in the center of the page.

David C. Silve, with Thiberge Press, New Orleans, La.—From what Mr. Silve tells of himself in his letter, we imagine he is young enough to break away from the careless and slovenly habits which his samples would indicate. While there are some good ideas of display in the pharmacy ads, they are almost lost sight of among defects in the joining of rule work, wrong font letters, incompetent proofreading and amateurish presswork. This office belongs to that class in which "a period is a period," a mere point suspended in the atmosphere, without individuality—a general utility character which may be dropped into any case that happens to be at hand. The consequence is that there are points above the line, points below the line, points heavy and point light—all in the most wanton disregard of the lines to which for the moment they happen to be attached. This office is sadly in need of some new faces of type; but a judicious, painstaking and workmanlike use of the faces already on hand will work a mighty change. We trust Mr. Silve will be the one to start a new order of things in that part of printerdom.

The Coyle Press, Frankfort, Ky.—We show herewith two cards from this office, which are a fair sample of a number of jobs sent in. They all have snap and business-getting qualities. The check is slightly at fault as to presswork.

Leon E. Derr, Foreman, Democrat Publishing Company, Anna, Ill.—Your poster is a very good piece of work, but would be improved by having the dividing rules not all the same. If you have no other wood rule, use combinations of brass rule. The margin outside the border might also be a little narrower. Though the use of rule with the shaded text is not customary it does not look inharmonious in your letterhead. But leave off points at ends of lines.

J. Warren Lewis, Pasadena, Cal.—You should have no trouble in holding business with such work as the samples submitted. Your mailing cards are really artistic and forcible. We should be glad to reproduce some of them were we able to do so in the original colors.

PUBLISHER BELIEVES IN CHANGE.

A. W. Lee, President of the Lee Syndicate of Iowa Evening Newspapers, comprising the Davenport *Times*, the Ottumwa *Courier* and the Muscatine *Journal*, believes in the philosophy of rest and recreation, as well as of work and strenuous application to business. He devotes several months of each year to travel and observation. With his wife and daughter, he spent February of this year in Cuba and during August and September, he is enjoying the pleasures of the highlands of Ontario, Canada, being registered with his family at the Royal Muskoka Hotel. His rest is not idleness, but energizing change. Travel and observation require strenuous activity and are useful, above most other means for improvement and advancement, to the publisher of newspapers. Idleness breeds dullness, sloth, rust or decay but change to new activities that bring different and too little used facilities into play, infuses new life, brightens the intelligence, arouses dormant energies, tends to the renewal of wasted powers, and to longevity. Moses, the great leader and law-giver of old, went off into the mountains, away from the duties of leadership and government, to receve his revelations and to work out the wonderful system of civil, moral, sanitary and religious laws which he promulgated and which are the real foundations of the laws of all the enlightened nations of earth today. He lived to be one hundred and twenty years of age, bright and active to the last, and if men, now, would follow his example, they might easily live to an equal age with all the faculties in tact. It may be suggested that an editor is not a Moses, and we presume that Mr. Lee makes no claims in that direction, but, after all, an editor is or should be an instructor, an intelligent informer of his people and an interpreter to them of all events and existing conditions and there is no other calling, the members of which need greater vitality or broader knowledge.

QUESTION BOX

All Questions from Printers will be answered in this Department.

Address CHARLES A. KING, Beverly, Mass.

B. S., Indiana. Is there any easy method of learning imposing? Am in a small office but we occasionally have book forms which give trouble.

You can find at any printer's supply house a book on imposition, and they all follow the same style. There has been very little that is new printed on this subject. Any printer who has experience can teach you more than the text books, but where a person is not at work on book forms regularly, diagrams come in handily.

If you have no book at hand, or wish some form that is not in the book, you can easily arrange your pages by substituting large figures for them and after inking arrange on a proof press and watch the result. Some makeup men would laugh at this, but it is a very good plan after all. Any printer knows enough to lay down a four page form and all other regular measuring stick, use a piece of 2-pica, reglet and spread out to put the additional pages in the center. For instance:

Four Page.		Sixteen Page.*			
2	3	2	15	14	3
		7	10	11	6
		8	6	12	5
1	4	1	16	13	4

One of the principal things to learn about imposition is to have all the pages the same length, and yet many printers are careless about this and spend a lot of time trying to make forms register. If you have no galley for this purpose, or a regular measuring stick, use a piece of 2-pica, reglet and squeeze up the page as closely as possible. It is well to tie up the pages and lay them in proper order and then fit the furniture; we have no room to go into details of making the margin, but this is easily determined: pull the stitches out of a pamphlet and note the margin, bearing in mind that the sheet has been trimmed all around except in the back. In a form of 8s or larger, the margin and the center must be double what it is on the outside, as the sheet after folding is trimmed in the middle as well as the edges.

Also bear in mind that the first and last pages in every form, be it four or 72 pages, must stand back to back and that the second and next to last must also stand back to back, and so on until the two middle pages which are also back to back; the folios of two pages which must stand back to back added, together will be one more than the total number of pages in the form: 1 and 16 are 17; 13 and 4 are 17, etc. This is as true whether the form is imposed regularly or from the center, or in some other way for convenience. Where there are blank pages it is desirable that they should be printed in the center and have solid pages on the outside. This can usually be done. In ordinary forms the first page is at the left hand the foot facing you and the second page it at the extreme right, or top, the next page is opposite the second and the fourth in the vacant corner. It is easy to determine the standing of the others.

In printing pamphlets of a known number of pages it is much cheaper to stitch through the back, than to paste on the cover, and if the edition is large, saddle-stitch is desirable, if the office can put the entire pamphlet in type at one time. In making up, the first form, say of 16s, would contain the first eight pages and the last eight pages, and so on working to the center. If the pamphlet was 38 or more pages it would be desirable to make the margin on the first form considerable more in the back than in the last form. Examine a many page pamphlet which is bound in this way and note the margin.

If the pamphlet has small pages it is sometimes desirable to print 32 or 64 pages at once, but as these cannot be folded without wrinkling, they must be cut up in sections and here is where the real study of imposition comes in: to make up a sheet of 64s that can be cut into 16s and each sheet insetted in the other, and bound up with neat margins which will appear equal, although they vary about 3/8th of an inch.

In printing ordinary pamphlets of 12 or 24 pages it is desirable to make up so that they can be folded without cutting and if a guide line is printed properly in the margin folding becomes easy presuming of course that it is done by hand.

Most of the books teach the making of margins by folding the sheet, but many makeup men prefer a foot rule which may require a little practice but saves times. Especially care should be taken in locking up the form squarely and tightening the quoins gradually in order not to twist the pages out of position especially if the chase is inclined to spring.

* The National Printer-Journalist publishes a complete practical treatise on imposition and makeup, giving full explanations, directions and examples of forms to sixty-four pages. Price 25 cents. Forty-seven different forms are shown in pamphlet.

A WESTERN MAN PROMOTED AND HONORED.

New York City is constantly receiving recruits from every State in the Union. So great is the influx, that large social organizations of former residents of other and distant States are maintained. Minnesotians, for illustration, have a large and flourishing Minnesota Club, its members being representatives of railroad and manufacturing interests and financial institutions. Recently, among the recruits from the West to the great Metropolis is Mr. E. A. D. Reynolds, lately of the Flambeau Paper Co., Park Falls Wis., formerly Appleton Wis., and then for a few years of Chicago. He was educated at Hamline, Minnesota and married one of the bright Hamline University girls.

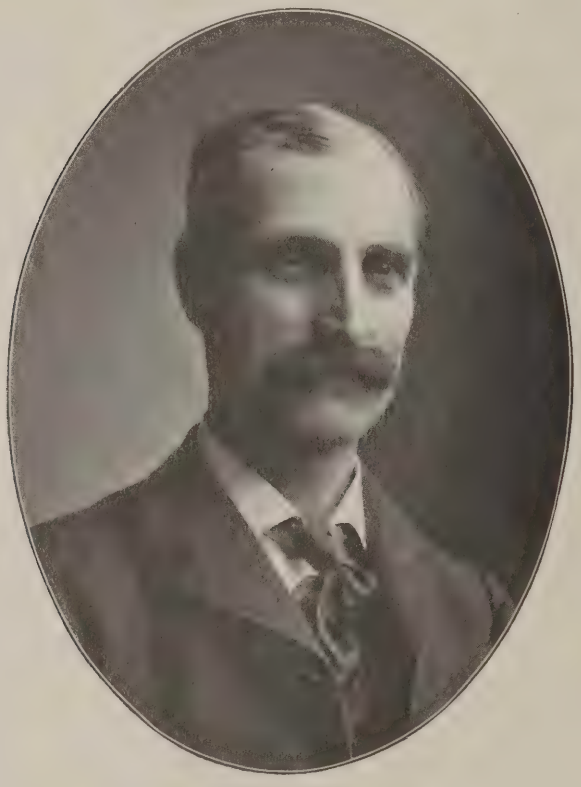
He has been connected with the paper business as a manufacturer, salesman or dealer all his life, and few men in the United States are so thoroughly and practically posted with regard to this important industry in all its branches, as is Mr. Reynolds. His thoroughness has lead to his promotion, and shows how the highest opportunites are ever waiting upon men who master a business, whether their lives begin in the distant West or elsewhere. New York, today, is being pushed forward in its wonderful growth and its unequaled strides for supremacy over all the cities of the whole world, by enterprising, hustling, well equiped western men. A little affair occurred just before Mr. Reynolds removed East, that served to show the elements that had lead to his constant promotion. He was not without love and honor in his old home where his ability had been developed and had come to be fully appreciated until his fame had gone abroad into the great business world. Such incidents are not so frequent as to be otherwise than interesting, instructive and inspiring. The affair grew out of Mr. Reynolds' last three years work in the West and the story, as told by the Park Falls Herald, is in brief as follows:

E. A. D. Reynolds, manager of Flambeau Paper Co., was summoned from his residence to the Co's office on important business. As the call was something unusual in its nature no doubt the manager was at a loss to know whether it was a serious accident or a large telegraph order which required his immediate attention. Opening the office door he was still further mystified to find gathered there the greater

number of the paper mill employes. The mystery was soon solved, however, by J. H. Kress, one of the oldest employes, reading the address which is appended. The boys wished to tender their manager an expression of their respect and good will at parting with him. They also wished him to take with him a souvenir to remind him of pleasant associations in Park Falls. This took the form of a handsome horned alligator combination Oxford and suit-case with a fine toilet set inclosed. Mr. Reynolds was genuinely and unmistakably surprised. He replied in a few well chosen words, thanking the boys for the kindly feelings which prompted their action, and voicing his regrets at leaving Park Falls and sundering the pleasant associations formed while here.

It is three years ago May 1st, since Mr. Reynolds assumed charge of his duties here. The address below tells of his success as a manager, and it is indeed very refreshing to read such words from laboring men at a time such as this when the air seems filled with talk of strikes and labor troubles.

As citizens of this city Mr. and Mrs. Reynolds and their estimable family have ever labored for that which is best. Their removal will be felt as a keen loss, and their place in our society will be a hard one to fill. In fact the employes of the company expressed the feelings of the people here in the following address:—



E. A. D. REYNOLDS,

Manufacturers Paper Co., 41 Park Row, New York City.

Dear Mr. Reynolds:

The time is rapidly drawing near when you will take leave of your present surroundings to enter into a new field of activity, far away from this little community. For a few years our destiny lay, plesantly, along the same paths with yours, but now has come the parting of the ways. We do not know what feelings fill your heart at this leave-taking, but to us it is a most painful one. We cannot look upon your departure as anything else but a personal loss to us. Our relations with you have always been so pleasant, —your uniform courtesy and kindness has so endeared you to us, that we will long miss your face and voice and presence as we continue to go to and from our accustomed labors. Never has the relation between employer and employes been more agreeable than you have made the same to us. You have always dealt leniently with our shortcomings; you were ever considerate of our feelings and comfort and never refused us an accommodation that you could reasonably grant. So free from friction and trouble of any kind have been the years that we spent at your side and under your guidance, that I am sure I express the sentiment of each and everyone of your employes when I say that we hate most awfully to see you go from our midst.

And in order that this expression of our sentiments may not seem as mere idle sounding words, but that your remembrance of our esteem for you may be often be recalled to your mind, we have taken the liberty of herewith presenting you with a slight token of our regard for you. Please accept this small gift, to which all of us have willingly and gladly contributed. When, in after years your thoughts revert back to the days you spent in your old North-Wisconsin home, we trust you will always have a kindly remembrance of us, your former employes.

In conclusion, we wish you and your family God-speed. We wish you a long life and good health and success in all your undertakings, and may you always be as dear to those with whom you are associated in your labors, as you are to the boys of the old Flambeau Paper Company.

Mr. Reynolds has accepted a situation in the sales department of a large eastern paper company.

GRATIFYING GROWTH.

Constant and signal growth has marked the career of live newspapers for the past quarter of a century, in all parts of the United States. This growth has, in many instances, called for constant hustling to keep the mechanical department up with the growing demands of circulation and enlargement to accommodate the increased advertising. Strange as it may seem, every improvement or addition in equipment seems to have added still more business. More printers are employed, today, than before type composing machines were introduced and every new type setting machine seems to add more work.

An old compositor, in Chicago, committed sucide because temporarily thrown out of work by the introduction of typesetting machines as he thought his vocation had been ruined. Had he only taken a needed vacation by going into some other work for a few months, he would have found more work in his chosen calling and at better prices than he had ever enjoyed before. This is a practical illustration of how the cheapening of the cost and bettering the quality of products through improvements increase the demand and, consequently, add to the amount of work to be done and to the number of men that must be employed. Messers W. J. Kline and Son, of the Amsterdam, N. Y. *Evening Record* have just added a new web press to their plant with a capacity of twenty thousand eight page papers per hour, and the following editorial comments thereon, have suggested these remarks and contain valuable suggestions in themselves:—

In this age of the upward and outward growth of the press—in keeping with the trend of all human accomplishment —it is with a pride which our patrons will say is natural and proper, that The *Evening Recorder* mentions the latest evidence of its own share in the general betterment. The press on which it has been printed for the past nine years, which was of sufficient capacity, when installed here, to more than answer the demands of the business, in a few years was required to its utmost to perform the increased work necessary. This enlarging demand upon its powers continued until it became apparent that the machine, still capable as ever of doing all it was built to do, would have to give way to one designed for far greater efficiency, to keep up with and ahead of the constantly growing business.

To the many people who have seen the old press in operation, the representation of the new one, given in this issue of The *Evening Recorder*, gives an idea of the advance made and the very much greater capacity and degree of perfection required in the printing of the newspaper.

The publishers have been wise in providing for growing demands, in their new press, for universal experience shows that improved machinery and facilities ever result in the increase of business.

THE INFLUENCE OF PLAIN AND TASTEFUL TYPE DISPLAY
A good type advertisement in a newspaper or magazine is a power in the land. When symmetrically arranged and skillfully displayed, it carries its message to those interested and delivers it in a forceful manner. Type displays are, after all, the real basis of advertising 6

ADVERTISING RATES PROMPTLY FURNISHED UPON APPLICATION

The National Printer-Journalist is unequalled as an advertising medium in its field. No attention paid to postal card requests. Information cheerfully furnished to all patrons.

Subscribers and patrons will confer a favor on the National Printer-Journalist Company by sending in the names of responsible newsdealers who do not keep the monthly on sale regularly.

Manuscript sent in for publication must be accompanied by a letter of explanation and return postage.

CHICAGO, SEPTEMER, 1905

To no other calling is the homely proverb of David Crockett, "Be sure you are right, then go ahead," more appropriate than to that of newspaper making. To be right is the very first requisite of the newspaper. It is the basis of all influence and power, of all confidence, is essential to the popularizing of both the editorial and news columns and to the value of advertising in its pages, to respect and to permanent business and good will. We have used the figure before, but it is equally fitting here, that the newspaper should, in adherence to truth, right and justice, be, to its readers, in the midst of conflicting statements and views, "as a shadow of a rock in a dreary land." But, while in its stand for the truth and the principles honestly advocated, consistency and reliability are essentials. The newspaper is a moving, aggressive force, and must move forward, must "go ahead." So soon as the newspaper ceases to advance, to lead, even if its leadership is a forlorn hope, the interest in and the influence of the newspaper ceases. The successful newspaper must ever be in advance of the firing line, in every battle, in every cause that it champions.

* * *

Readiness or preparedness is another essential to successful newspaper making. It is wise to trust in God, in the truth and in the people, to have faith in the ultimate outcome, but it is ever necessary to keep the powder dry and to be sure of an abundant store of ammunition; to keep all weapons cleaned and well primed, and to know every inch of the battlefield and to be on the right spot just at the time anything happens. Being there first is just as essential to newspaper victory as to the winning of a battle. The successful managing editor must have many of the qualifications of the successful general.

* * *

The services of the modern news bureaus or associations and the plate houses are an indispensable aid to the newspaper of to-day and may be relied upon for a great deal that would otherwise cost, in watchfulness, in reportorial organization and force and expenditure for news, more than would be possible to the most prosperous paper, yet, with the aid of all these co-operative agencies, there is not less need for each editor and publisher, with all their aids, to be constantly on the alert, to have the note and scrapbooks and pigeon holes, and the memories and thoughts, filled with material that may be required at any minute and will be found necessary to supplement the best news and reportorial service. There must be a wise forethought as to all coming events, and their tendencies and influence. There must be a judicious generosity in expenditure, but there can be very much saved in outlay, by having all the current knowledge of the world, as to passing or probable events within reach. To the layman the amount of information that is given in the newspaper at a moment's notice is a constant wonder. Much of this information cannot come over the wire, nor could it be gathered by reporters or writers *de novo* in a week, yet it comes fresh and sparkling, entertaining and instructive, and so dovetails on with what does come by wire or is gathered up by reporters, as to seem part of the same.

* * *

Speaking of liberality or needed generous expenditure, it is a part of the American character and is what has made the American newspaper successful above those of all the rest of the world. No amount of effort, care or cost is considered too great when it comes to the securing a complete news story and portraying it in harmony with its importance, in all interesting fullness. This has been carried at times to what the more conservative have considered rashness or extravagance, but it has been a kind of extravagance that has won. One paper may at first set the pace but all others are bound to follow. The amount of news that has been given with regard to the Russo-Japanese war and later with regard to the Peace Conference at Portsmouth and all the collateral matters of interest connected therewith and concerning the two countries involved and all their great men and their theories of government and all the laws and rights of belligerents, would have been considered impossible fifty years ago. This has been the work of the great dailies aided by the service of the great news-gathering organizations, but the same principles of giving the complete news within its sphere applies to every newspaper.

It is right for a newspaper to seek out and to print the wrongs, the things that need remedying in government, public officers, public schools, and other institutions, in sanitary conditions, in roads, parks and all public utilities and improvements, but kind suggestions and deserved commendations work reforms much more rapidly and effectively than constant criticism, however well intended. The newspapers have the right, in the interest of their clientage, the great public, to insist that all men in positions of

public trust perform their duties honestly and conscientiously and no amount of money can pay newspapers for being derelict toward their readers in these matters, but encouragement and inspiring example are to be used as far as possible, instead of fault-finding.

* * *

Can there be anything more pitiable than the revelation of the fact that men of great wealth and high position have been for years robbing trust funds through peculation and the drawing of unreasonable and entirely unearned salaries? To think of preaching to poor, hard-working, struggling men—who, with their families, are compelled to the most rigid economy and self-denial in order to pay the assessments on their policies—the duty of life insurance and then turning around and stealing their savings that are put aside at so great a sacrifice from a sense of duty. There is no wonder that the press of the country should be incensed at such a spectacle but being incensed, after the theft, is of little benefit to the policy holders. Only fifteen years ago a similar condition of affairs to those recently revealed to the Equitable was found to exist in the New York Mutual Life, and yet, though exposed at that time, the exposure does not seem to have worked a reform or awakened the conscience of other manipulators of insurance companies. In all these are arguments for strict laws and for greater publicity. Every step in the management of trust funds should be published and there should be required a complete exhibit of all doings of directors and finance committees, showing of salaries and services, as well as the nature of investments. There is nothing like the broadest kind of publicity to keep men in mind as to their duties and to quicken their consciences.

* * *

The approaching convention of the United Typothetæ of America, in Niagara Falls, Sept. 4-8—the programme of which was given in our August issue—promises to be one of the most exciting and important in the history of the organization. It remains to be seen whether the resolution adopted last year, for the nine-hour day and the open shop, will be adhered to unanimously, though as to this there seems to be little doubt. Last year's action has been ratified by largely attended meetings of employing printers in all parts of the United States and Canada. The questions at issue are fundamental, and involve questions of personal rights and liberty guaranteed to citizens by all free and enlightened governments. These are the rights of freedom of contract, freedom of labor and of using one's own, without interference, intimidation or molestation either as to person, property or reputation. A man's good name, the good-will won in his business and the free exercise of his calling, the untrammeled conduct of his establishment, are the most valuable of rights and of possessions. All these, under the present ideals and decrees of organized labor, are set at naught. Not only so, but incentives for highest and greatest accomplishments and the proper rewards therefor are assailed. For years there has been fostered among employes, by a corrupted, self-seeking unionism, a spirit of enmity and distrust toward employers that has resulted in constant interference with the proper management of business, with that mutual confidence and that friendly harmony necessary to efficiency and success. The employers have recently so far resolved that these conditions must be changed—that the employers must have the rights, guaranteed by our free government, of making their own contracts and managing their own affairs. No one disputes the right of men, whether employers or employes, to unite in order to improve themselves and their trades, to secure just laws within the guaranteed rights of all, in order to protect themselves and their callings, provided, always, that such laws do not place hardships upon or interfere with the personal or property rights of others. Laws, however, must be for the equal benefit and protection of all citizens or residents. There must be no class legislation. No trade and no group of men, whether employers or employes, can legislate for the whole people; all laws must be by the mutual consent of all, and can only be wise and beneficent when all have been consulted and considered and the rights of individuals and of the whole body politic, or the public, have been safeguarded. We can have, in this country, only one government. Men cannot rightly form themselves into unions or monopolies to govern or to dictate to others. All such kinds of government are antagonistic to the established government by the people and are, thus far, treasonable and subversive of all law and order. One body of men cannot decree that all, who do not join with them, shall be denied the right to work, to make free and uninfluenced contracts for labor. It has been claimed that unions have done much toward securing of wholesome laws regulating labor, securing better conditions, doing away with child labor and sweat shops, enforcing sanitary and wholesome conditions. This is a legitimate work for which men may well and wisely continue to coöperate, but wise and benevolent men, outside of unions and before unionism existed and since, have been engaged in this effort for securing these most desirable ends. These laws are general and widely beneficent in their action, and it is a question whether they have been helped or retarded by unionism. They have, everywhere, been advocated by an enlighted press and are founded on a growing feeling of brotherhood of all men, of broad benevolence and philanthropy, while unionism, as manifested today, is founded on selfishness or the securing of benefits, by combination and force, to the members of unions and their corrupt and violent leaders or business agents. We believe in an open, free and fair understanding between employer and employed, but we do not believe in surrendering the rights nor the individuality of any man. He best succeeds who attends to his own business, his own hire or employment for himself.

When you take away one's own individuality, his own initiative spirit and ability, you make of him a subordinate, a slave. No one can guard one's own rights as well as one's self. Let us have conferences, a comparing of ideas and experiences, a free, thoughtful deliberation among all. Then let us see that proper regulations are enacted into laws for the protection of all, but let us cease trying to dictate to others, to run their business for them, and let us ever remember that the public, every man, woman and child in this republic, weak or strong, must be protected in all and equal rights.

EDITORIAL NOTES AND POINTS

BY BENJAMIN B. HERBERT, CHICAGO, ILL.

MUCH that has been published in newspapers and magazines, for the past months, as to rich men and their methods, has been educative and ought to prove useful. It also ought to have been consoling and tending to contentment among those who have not been so successful in gathering of riches as to have been consumed with the appetite or passion of dollar-getting. The habit and appetite of money gathering seems to grow, like the drink habit or drunkenness, with over-indulgence. If men were not so forgetful, the money craze and money worship would never have taken domoniac possession, as it has for years of nearly all the people in this enlightened land. All history and all philosophy, human and divine, has taught the vanity, the wickedness and the demoralizing influence of money worship and the unsatisfying character of great possessions. Francis Bacon, the great scholar, lawyer, statesman and philosopher, the father of modern experimental science or knowledge, who, unfortunately, like some of our United States Senators and frenzied financiers, fell, through his desire for money and power, and the corrupting influences of his age until he was pronounced "the greatest, the wisest and *meanest* of mankind" wrote, over four hundred years ago,—speaking like Senator Platt of New York, from observation and experience: "I cannot call riches better than the baggage of virtue. The Roman word is better, *impedimenta;* for as the baggage is to the army, so is the riches to virtue, but it hindreth the march; and the care of it sometimes loseth or disturbeth the victory. Of great riches there is no real use, except it be in the distribution; the rest is but conceit; so saith Solomon. "Where much is there are many to consume it; and what hath the owner but the sight of it with his eyes?" The personal fruition in any man cannot reach to feel great riches; there is a custody of them, or a power of them, but no solid use to the owner."

"Measure not then advancements by quantity, but frame them by measure; and defer not charity until death; for, certainly, if a man weigh it rightly, he that doth so is rather liberal of another man's than of his own money." The press is not guiltless in this matter of the degrading prevalence of the blind, unreasoning, corrupting, money-getting passion and blasphemous, idolatrous money worship. Men are too frequently extolled in the newspapers for their accumulations rather than for their useful, helpful accomplishments. In the news and society columns, the unduly rich, who have horded through parsimony, or other ways more foul and injurious, are given undue prominence and glory, while the duty to the virtuous, struggling, industrious poor is neglected. The revelation of some of the devious and damnable ways through which possessions have been gathered in this land, where all men are, theoretically at least, born free and equal, with equal rights, opportunities, liberty and honor, is doing some good towards placing things in the right channel so that merit and worthy accomplishment, and not pelf, will receive the mede of proper praise, and the everlasting, sickening toadying to the rich will, in a measure, cease.

Speaking of Francis Bacon's views of riches, there are other things in his essays which it would pay newspapers as the creators or directors of public sentiment, to read and consider. His ideas as to "Great places," or positions of power, are as beneficial today as in the days of Queen Elizabeth, indeed, in his own life clowded by corrupt practices, he wisely left his works to the judgment of posterity and for their benefit. Read today, his words seem to be written for these times, and it is a pity that their teachings have seemingly been overlooked or forgotten. Speaking of public office he said, "Men in great places are thrice servants,—servants of the state, servants of fame, and servants of business; so as they have no freedom, neither in their person, nor in their actions, nor in their time. It is a strange desire to seek power and to lose liberty; or to seek power over others, and to lose power over man's self. The rising unto place is laborious, and by pains men come to greater pains; and it is sometimes base, and by indignities men come to dignities. The standing is slippery, and egress is either a downfall, or at least an eclipse, which is a melancholy thing: *Cum non sis qui fueris non esse cur vellis vivere.* (Since thou art no longer what thou wast, there is no reason why thou shouldest wish to live.) Nay, retire, men can not when they would, neither will they when it were reason, but are impatient of privateness even in age and sickness, which require the shadow; like old townsmen, that will be sitting at their street door, though thereby they offer age to scorn. Certainly great persons had need to borrow other men's opinions to think themselves happy; for if they judge by their own feelings, they cannot find it; but if they think within themselves what other men think of them, and that other men would fain be as they are, then they are happy as it were by report, when, perhaps, they find the contrary within; for they are the first that find their own griefs, though they be the last to find their own faults." With this truthful view of high place, that has been gained by sad experience, is it strange that Senator Platt should say that he did not know that life is worth while? Especially so when finding that, instead of having the admiration, esteem or good will

of others as an outer source of happiness, he finds that his career has been such as to bring disrespect and ill will? Public office, obtained at the sacrifice of honor or by bribery or corruption, through favors, offices or money, brings only burdens, misery and shame in the end, with not one sustaining prop on which to lean; so that when one is neither in general esteem nor what he was thought, why should he wish to live? If one in such a case, is without the sustaining power of noble purposes or a clear conscience without inspiration of honest duty and service to country; without the stimulant of doing good, of patriotism or philanthropy, he is the most miserable of men, or as Paul says, "the most miserable of creatures." As Bacon further says, "Power to do good is the true and lawful end of aspiring. Merit and good works is the end of man's motion and aspiring." How much then is the position of a worthy editor, who has, every day or every week, the power to do good, of his own motion, in the line of his calling without any real temptation to anything else and without strife for place or any degrading servitude to the whims or selfish demands of others, to be preferred to that of a United States Senator or political boss, who holds his place by plotting and conspiring, by cajoling, flattering, by corruption and servility. If there is any truth in general repute, or report, in the light of what has been recently published, what honest editor, who is his own master, would change places with either Senators Platt or Depew?

However, while learning from Lord Bacon, we would not run into the violation of another rule, that is very important to editors, which he lays down in his essay upon discourse:—"Speech of touch toward others should be sparingly used; for discourse ought to be as a field, without coming home to any man." The names mentioned have become so much public property of late, that they are the suggesting causes of these thoughts and of making these quotations and it seems necessary to give names in order to give reasons for, and to point the practical moral of these paragraphs. We do not believe that these men are bad above others. They are the victims of times, modes, customs, and of damnable systems that have been developed in business and politics, yet they are not excusable and are reaping that which they have sown. They have not been the only sowers, however. Those who have exaggerated and toadied to wealth and position and have sought favors, places and rewards for those services, real or pretended, which ought to have been freely and loyally rendered to the country or to the party in which they profess belief, for the good of the country, are alike guilty. He who receives the benefits of corruption is alike guilty with one who corrupts in order to attain to that which he has been falsely taught to believe is the highest end and glory of life, and the false teachers are not without equal blame.

Neither great brilliancy, genius, talent or profound learning are necessary to success in a newspaper career no more than they are necessary to great accomplishments and usefulness in the Presidency of the United States. President Roosevelt is far from being the most brilliant, talented, learned, eloquent or prepossessing of our presidents, yet, it is doubtful if any president, since Abraham Lincoln, has accomplished more for his country and the world or made for himself a more enduring fame or won a deeper place in the affections of the American people. Sincerity, energy, honesty, unyielding purpose, fearlessness, unflagging industry and activity, directness, a love for fair play or justice, for truth and uprightness or straightforwardness; truly democratic spirit, that recognizes the equal rights of all, and a hatred for wrongdoing, peculation, corruption, inefficiency and double dealing, are the characteristics that have led Mr. Roosevelt forward in his life and work to his present position of honor and usefulness. These same endowments are the essentials to worthy newspaper success. They should be joined to a kindliness of heart that seeks service for the good of other individuals as well as for the wellfare of community, city, state and the Nation as a whole. With such endowments no other calling in life brings greater opportunities, usefulness, true honor, and genuine happiness, than that of newspaper editing and publishing.

A man who has not active sympathies, who is devoid of what Paul designates as charity, that suffers long and is kind, is not worthy of writing a news paragraph let alone, having the responsibilty of conducting or editing a newspaper that is to go into the homes of the community, and at all times, to deal with all the people in all their doings, undertakings, and relations.

Kindness is the first law of every true newspaper as of every true man. The spirit of true kindness pervading all that is permitted to find place in the newspaper, is like mercy, thrice blest. It blesses the newspaper that gives, the people who receive, and brings happiness, and prosperity, peace, contentment and good will to the editors and publishers and to all the people. Kindness is the source of all true happiness, the angel of all progress. It is the fulfillment of the higher law of enlightened human lives.

Tell your news so as to instruct, not so as to grieve or injure; so as to inform, warn, strengthen, warm, encourage and inspire, not so as to discourage, degrade, weaken to cause suspicion, immoral thoughts, discontent, covertousness, hate and strife. Be as sincere in your newspaper pages, in the editorial column as well as in all other columns, as you would have the wife of your youth and love to be pure and sincere in your home.

There are some people of such low and depraved tastes as to act on the foolish misconceptions, that vulgarity or vileness is humor, and that wit is found in sneers at things sacred, at purity, honesty, virtue, righteousness, in profanity, and impious blasphemy, Shun as you would the plague, all such ideas, and practices in your newspaper work. Though patient, male friends may endure your vulgarity and blasphemy in private, and forbearingly, out of good nature, let them pass for humor or wit, you are not, thereby justified in pouring out your filth and wickedness into the homes of the people. Find some other outlet or drain for your filth other than the columns of your Newspaper.

President Roosevelt says many things that show his determination to be right, yet, he is not infallible or above error. He has denounced trusts and declared

that the monopolies must keep the laws or be prosecuted. Just the other day in speaking to an assembly of miners and union laborers at a Catholic Total Abstinence meeting, he not only wisely and rightly commended sobriety, but read an extract from a letter received by him from a Roman Catholic Priest which stated boldly, the very palpable and yet disagreeable fact, that fewer hours of labor and higher wages mean to many laborers only greater dissipation, more hours in the saloon, more money spent in drink, and increased neglect of home, wife and children. Still, on two occasions, recently, he has commended unionism of the right kind, and on one occasion stated that he was a member of a union. This shows that, with all his boldness he either has a little taint of the demagogue or else, he is affected with the prevailing unionism superstition, as Sir Mathew Hale was in the thrall of the witchcraft superstition in his day. Unionism has no other primary object as manifested anywhere, than that of a monopoly of labor and a monopoly not to be regulated by law or by arbitration but by the violation of law, by interference with private rights, by strikes, boycotts, violence, assasination and public murder. Unionism exists not to improve the trades but to control and advance the price of labor, to dictate not only the price, but the hours of work, the character of the work to be preformed and the output; to regulate and lessen production, to discourage efficiency, to prevent competition, to compel the hiring of only those who belong to the union and to deprive those, who do not desire to belong to or who will not submit to become members of the union, the right to work or to live. Any man of ordinary intelligence or observation, in this country, knows that hundreds are forced into the unions against their desires and that hundreds in the unions are in abject slavery to union leaders, who rule the members through browbeating, intimidation, violence and bribed sluggers. We may be mistaken, but we do not believe that Theodore Roosevelt has ever served an apprentice-ship or been admitted to any trade that would entitle him to election as member of a union. If we are wrong in this, we shall be glad to be set right. If he has been made a member of a union for any other reason than as a craftsman he carries his card and his membership as an intended bribe for his favor and good will or as a compliment for past services and an expectation of others to follow. We remember that, when President McKinley was called to Chicago to lay the corner stone of the new government building, it was publicly declared, from union sources, that he could not do this act, could not use the mason's trowel, without he was a member of a union. He was accordingly elected an honorary member of the bricklayers' union and accepted election, establishing the supremacy of unionism over the government of the United States and its honored chief Magistrate. The fact is that unionism, by using the respected name of labor—ever honored in this free land—has been able to establish itself as a new fetish, an all powerful superstition, with benighted followers who will not stop at any crime commanded by their corrupt, venal and vicious leaders. The only excuses for unionism, in this free land, are that the free, independent master workmen, who have themselves been laborers, will not treat their own laborers fairly and that the laws of this republic will not properly protect employes in their rights. Both premises are false. Self interest alone secures fair treatment, where the employes are intelligent and labor entirely free. But the real object of unionism is, as above stated, to monopolize labor and control the capital and business of those who have been sufficiently industrious, economical and thrifty to accumulate the means for establishing factories, shops or offices for giving employment to others at an agreed price on wages that ever ought to be fixed by the earning ability and the mutual free agreement between the employer and the employee

The growth and promotion of unionism are not based on any real need in this free land—where the employe of today is the employer tomorrow—where competition is free and the demand for productive labor is greater than the supply. Its growth has been promoted through the ambition and greed of unworthy leaders who seek power and pelf, positions and graft through unionism.

Unionism in its arrogance, has set up an antagonistic, treasonable government, ruling through violence and threats, terrorizing its willing and unwilling members, by fear of the loss of employment and the constant danger of assault or assasination, and the people by the fear of the loss of business, and good will, of having their establishments shut down, employes murdered and themselves denounced as unfair, to be followed up by business excommunication or the boycott, with all its terrors.

Some four months ago there came to Chicago, one of the potentates of unionism who proclaimed himself more powerful than the Mayor or the City government. He declared and carried on war for four months to establish his authority over the laws, the city and its streets. There has been a lull while this potentate has been absent in a distant city, securing a continuance on his throne—this accomplished, there is no assurance that activities will not be speedily resumed. The war, so far waged, has cost the city and her citizens, millions of dollars and a score of lives. It has shown that the union tyrant is more powerful to destroy, than the city is to protect. The city government, not able to protect the lives of her most humble citizens in their peaceful pursuits, is a defeated, humiliated government. In this land every citizen is a sovereign, and the officials are only paid servants of these sovereigns. The life of every private citizen is just as precious as the life of a Mayor or a President, and the crimes of murdering the Mayor of Chicago and the members of the City Council or the assassination of the President of the United States and his cabinet, would have been no greater, not more heinous under our laws and the whole theory of our free government, than were the murders of the twenty laborers in the peaceful pursuit of daily work. Yet, not a murderer has been brought to punishment, but the promoters of these murders go free and boast of their violations of the law. Worse still, honest patriotic men, under the delusion of this all pervading superstition, are contributing their money to the payment of the plotters of these assaults and assassinations and their paid agents. More than this, candidates even for judicial offices, bow the supple hinges of the knees to these dictators and claim membership with them and wear collars bearing their label. This too, in the face of the fact that not only have private citizens been assaulted and murdered by union sluggers, but even the official representatives of the law, members of the police and deputy sheriffs acting under orders of their superiors and of the courts have been murderously assaulted in the performance of their sworn duties.

If the officers of the law and courts are murdered, how long will the life of the Mayor or his chief who command the police or the judges who direct the officers of the court under their decrees, be safe, after the resumption of hostilities to retrieve a lost cause?

Indeed how long will the life of the governor of the State or of the President of the United States be safe when called upon to direct the military forces in the suppression of violence, murders and riots?

There is no greater power than a properly conducted newspaper press—unless it be that of the true worship of the one great All Father—to bring men to a common mutual recognition of the rights of others, and of the equal dignity and natural worthiness of all men, and to bring all into mutual sympathy and understanding. The man of wealth and the poorest laborer, the President and the farmer, and all individuals or groups of individuals, who read the same newspapers, the same facts and theories from year to year, must come into mutual understanding and sympathy.

Ohio Contingent at Colorado Springs on Return Trip of N. E. A. Members from Portland.

WONDERFUL GROWTH WELL TOLD.

Several years ago, we prophesied wonderful growth and a magnificent future for the Pacific coast States of the Union. It took no great or mysterious spirit of divination after visiting and studying that region, to make the forecast but the fulfilment has been so rapid and so grand as to be beyond human thought. As we have read the accounts, in the papers of the returning members of the National Editorial Association, our mind has been filled with amazement. The recorded wonders wrought out in a few years seem miraculous.

Now comes a copy of the Oakland, California *Herald*, in a special number, displaying, by text and illustrations, the unsurpassed growth and beauties of a city that we had looked upon as a rather insignificant, though pleasant, suburb of San Francisco. It has become a great city in itself, with extensive scenic suburbs and a still more magnificent future unfolding for the present generation. The writeup is a model, covering and illustrating every department of the city's greatness and growth. The schools and industries come in for a large space and there is a splendid marshalling of advantages, opportunities and possibilities that would be profitable to review at length. However, we must confine ourselves to a single extract from the newspaper's numerous pages, as to "The Possibilities:"

"What are the possibilities of Oakland?"

Ask that question of the Eastern manufacturer who will come here and as carefully look over the field as he did before locating his present plant and he will frankly acknowledge that it is limitless. Here, if he locates on the water-front, he can have the raw material for his manufactures taken into one door of his factory from either steamer or sailing vessel, and the finished product taken to any part of the United States or Canada from another door by rail, or vice versa. The steamer from any port of the Orient or island of the Pacific can bring to the rear door of the factory any or all of the ingredients used in his manufactory, but raised in the foreign countries, and the Southern Pacific, Santa Fe or Western Pacific Railroads will take the finished article or product from the front door of the factory and deliver it to the jobber on the Atlantic Coast or at any of the intermediate states or cities.

Here cheap fuel is provided in the oil furnished from California oil fields, and by the use of modern devices any required heat can be maintained indefinitely and at less cost and more equable temperature than by the use of coal.

With such advantages as Oakland possesses there can be no doubt that this city within the next decade will become one of, if not the principal manufacturing city of the Pacific Coast. That is one of the possibilities, and not only a possibility but a probability.

As a residential city Oakland surpasses in natural beauty and climatic conditions any city in the United States—a strong statement, you may say, but nevertheless one that can be backed up by facts and figures. Where, in all the United States, is there a city that rises gradually from the salt water of a magnificent bay to the base of a range of mountains, and having almost in the center of that city a beautiful salt water lake filled and emptied by ebb and flow of the tide?

Where, nestling in a beautiful valley, surrounded by hills that protect the city from high winds and that are as an amphitheater, with residence sites on the upper or higher slopes, that can furnish an ever-enchanting view of bay and country, as is the case in Oakland? The great metropolis of California, San Francisco—just across the bay of that name—with its streets and buildings furnishing a charming picture in itself either by day or night; for at night its thousands of lights make the city across the bay a beautiful scene from the residences on the higher sections of the city of Oakland and in Piedmont and Fruitvale.

This is but a glimpse of all that is portrayed of this one city.

This is certainly a marvelous country and still more marvelous in its development. A grand opportunity exists within the reach of the newspaper press to push forward this development and how grandly has that opportunity been improved. The point is to study your own city—make yourself familiar with all its progress, its institutions, advantages and possibilities, its wants and aspirations and then herald the facts gathered to your readers and through them to the whole world. The newspapers are city and state builders, as well as educators and evangels of good government.

LEARN THE MAIN RELIANCE OF YOUR BUSINESS.

Advertising today is at the basis of all business. It comes next to credit or capital. The success of the modern newspaper depends largely, and the job printing office depends entirely, on advertising in some form. Circulation comes first with the newspaper, but circulation has come to be especially valuable because of the advertising commanded thereby. There may be a few papers that live on the circulation, but our daily and weekly papers would die without the revenue from advertising. It is the stock in trade of the newspaper and job office. Is it then possible that publishers and printers can learn too much about this commodity and its valuable qualities and possibilities? The business has come to a time when the purchasers of advertising employ advertising experts and should those, who deal in, furnish the medium for, or produce advertising matters, be less expert than those who buy space or printed advertising, in the shape of circulars, booklets, blotters, letterheads, envelopes etc.? In all business there are the two things necessary to success; first get the commodities, then command the interest and attention of buyers or of those who may be in want or be made to desire the commodities. These principles apply just as much to newspapers and printers as to men in any other calling or branch of business.

Ideas are of incalculable value in this workaday world but unless they are materialized by being put into use for the producing of results, they are valueless to this life as intangible ghosts.

At the Portland, Oregon, convention of the Pacific Coast Advertising men's Leauge, Mr. Harry C. Whittier had the following, among other instructive things, to say about the writing of ads under the suggestive subcaption, "Make Your Ads Talk".—

An advertisement that does not talk to a community precisely as a splendid salesman would to an individual patron deserves to fail, and usually does. After, then, we have selected the right mediums, we must next turn our attention to copy. The man who tries to run his department of publicity without system is much like a flagman who tries to stop a train on a dark night with an unlighted lantern; he may know what he is trying to do, but no one else does. Copy, the matter in the makeup of an advertisement, is as vital to its success as is the air we breathe to life itself; but the best pair of lungs ever placed in a human body with all the air they can consume, cannot keep a man alive if he has cancer in his liver.

In preparing copy cultivate an individual style, an originality, yet not so far as to avoid good things first thought of by others, for none of us can evolve or copyright all the good ideas. Keep in mind eternally that business results are what we are after, the foundation upon which success is built up.

A noted American author—no less a personage than Washington Irving—once said that he would give an old coat for a new idea any time. Irving in his own day was not alone in that view. Nor is he today. The only apparent difference now is that men will give a new coat instead of an old one. Ideas are at a premium, in fact, the world over. It is the man who can originate, develop and execute that becomes the master of men. His education may be limited, his pedigree dubious, his character open to criticism, yet his ability will see him through. Not only, however, are ideas essential in modern business methods, but the ability to use them profitably. Some have ideas, but lack the ability or inclination to develop or execute them; others are good executors, but are frequently quite barren of anything even faintly resembling an idea.

A NEWSPAPER EDITOR ORIGINATES A CHRISTIAN STANDARD.

The Ottumwa Iowa *Courier* devotes a page to an article on the Christian Flag, written by Editor A. W. Lee. The new standard was the thought and design of Charles Carlton Overton, the publisher of a secular newspaper at Coney Island New York and the delegate to the twentieth annual convention of the National Editorial Association, who extended the invitation on the part of the New York Association for the National Association to meet at Coney Island in 1907. Mr. Overton, is a quiet, unassuming gentlemen, but he is full of good works, like most local editors, both inside and outside of the field of newspaper making. He is the superintendent of a Sunday School and the idea of the Christian Flag originated with him while delivering an address in Brighton Chapel, Coney Island.

Editor Lee gives the following interesting facts as to the new banner and incidents connected with its origin:

To be told that a distinctively Christian flag, which is rapidly being adopted as the banner of Christianity the world over, originated at Coney Island, N. Y., is to bring to the mind of the average Christian instinctively the inquiry, which in the days, of Christ, Nathaniel put to Philip, as related in the forty-sixth verse of the first chapter of St. John, reading as follows:—

"And Nathaniel said unto him, 'Can there any good thing come out of Nazareth?'

"Philip saith unto him, 'Come and see.' "

Recently the writer had the pleasure of meeting Mr. Overton on a trip to Oklahoma and Texas, and when told of the Christian flag there came at once to his mind the thought, "Can there anything Christian come out of Coney Island?"

To this Mr. Overton, replied, "Here are the evidences examine for yourself."

THE BIRTH OF THE CHRISTAIN FLAG.

The story of the circumstances that led up to the origin of the Christian flag is full of interest and there are those who feel that the element of inspiration is not lacking in this auspicious event. It was rally day at Brighton chapel. Coney Island, N. Y., on September 26, 1897. The chapel was filled and the address was to be made by a speaker from Brooklyn. He failed to come as expected and Mr. Overton, who was the superintendent of the school, in apologizing for his absence, was obliged to fill his place and took for this subject, "The American Flag."

This subject was suggested by the fact that on the platform was a beautiful American flag, the gift of James H. Perry Post, G. A. R. Mr. Overton, says that after making as patriotic an address as he was able, the idea of a Christian flag came into his mind, and its desirability was so strong, and asserted itself so plainly that then and there the Chrstian flag was born, full fledged just as it is in use today all around the world. Said Mr. Overton in describing this event:

"The Christian flag appeared to be floating in the air as I was speaking, and I gave the audience a description of it then and there as it stands on our platform today. I believe it was an inspiration from Heaven of a banner that should wave triumphant over the world. The American flag stands for American, the English for Great Britain the German flag for Germany and so on for all nations. The Christian flag stands for Christianity, which embraces all the people of the earth."

Since its birth in 1897 there has been a steady growth in the use of the Christian flag. A society called the Christian Flag Extension society has been formed, which sends out printed matter relating to it. An auxiliary society has been organized in England for the same purpose. Over 1,000 churches in New York State have adopted it and it is today unfurled in every state in the Union.

DESCRIPTION OF THE FLAG.

The flag is most symbolic. The ground is white, representing peace, purity and innocence. In the upper corner is a blue square, the color of the unclouded sky, emblematic of heaven, the home of the Christian; also a symbol of faith and truth. In the center of the blue is the cross, the ensign and chosen symbol of Christianity; the cross is red, typical of Christ's blood. Every sect of Christ's followers can endorse the flag and it is equally applicable to all nations. It stands for no creed or denomination. The late D. L. Moody said of this flag: "This is something we should have had long ago."

A HYMN IN HONOR OF THE FLAG.

A hymn in honor of the Christian flag has been written by Mrs. Fannie J. Crosby and the music for the same has been written by R. Huntington Woodman organist and choirmaster of the First Presbyterian church of Brooklyn, N. Y. Mrs. Crosby has written many hymns, songs and cantatas, which are familiar to Sunday school workers and church people, and has published several volumes of poems. Her beautiful hymn of the Christian flag is published, herewith, and will be greatly enjoyed by those who are musically inclined.

It is especially interesting to note, that neither the flag, hymn nor music has been copyrighted and all are dedicated by Mr. Overton to the followers of Christ the world over. Mr. Overton whose address is Coney Island Brooklyn, N. Y., is the president of the Christian Flag Extension Society in the United States.

THE CHRISTIAN FLAG.

The Christian Flag! behold it
And hail it with a song;
And let the voice of millions
The joyful strain prolong.
To every clime and nation,
We send it forth today,
God speed its glorious mission,
With earnest hearts we pray.

Chorus—

The Christian Flag! behold it
And hail it with a song;
And let the voice of millions
The joyful strain prolong.

The Christian Flag! unfurl it,
That all the world may see
The blood stained cross of Jesus,
Who died to make us free.
The Christian Flag! unfurl it,
And o'er and o'er again,
Oh, may it bear the message
"Good will and peace to men."

Chorus—

The Christian Flag! God bless it!
Now throw it to the breeze,
And may it wave triumphant
O'er land and distant seas,
'Till all the wide creation
Upon its folds shall gaze,
And all the world united,
Our loving Saviour praise.

Chorus—

TRIAL BY NEWSPAPER.

BY D. M. BUTLER.

President W. W. Screws in his annual address inserted a brief paragraph concerning "Newspaper Readers as Jurymen." The question is of interest for two reasons. The editor or reporter can be cited for contempt for things said even before the jury is called and empaneled and further the right kind of an editor does not desire to try one side of a case before the other side is ready to be heard, but the law governing contempt proceedings is reasonable and pliable and I have yet to observe but one case in which an editor was punished for a statement made before the jury was to be called. The decision of the higher court was to the effect that a wanton publication of a one-sided view of a case of which the merits of the contest were prejudged was a contempt.

But the general principles of law governing the selection of jurors do not seem to hamper the editor to any observable extent. In cases where jurors are questioned closely, the general rule is that if the proposed juror replies that any prejudice which he may have, can be removed by evidence, he is accepted. Mob law and radical newspaper work however often go together and the editors should seek to occupy more of the judicial position than is sometimes done.

CASES CITED.

In order to show that newspaper readers are not necessarily excluded from jury duty, the following from reported cases will be useful:

The fact that jurors had formed and expressed opinions as to the guilt of defendant from newspaper accounts, does not disqualify them where they state that they can give defendant a fair and impartial trial on the testimony as it may be introduced before them. State vs. Forsha Mo. 88 S. W. Rep. 746. Also 137 Mo. 125. The same was practically the holdings of the supreme court of Nebraska in Boin vs. State 51 Neb. 581 also of Ohio in Jones vs. State 14 Ohio C. C. 35. In this case the court held that where the court was satisfied from the statement of the juror that he can render an impartial verdict on the evidence he may be admitted as competent notwithstanding prejudices caused by reading newspaper accounts.

From the state of Louisiana where the courts are supposed to operate more or less under the civil law and Code Napoleon, we have a decision to the effect that impressions and hastily formed opinions, from newspaper readings, will not render a juror incompetent where he swears that such impressions and opinions will yield to the testimony to be offered. State vs. Vogel 49 L. A. Rep. 1057.

Cases could be multiplied without number; among them would be one from the federal court that of Spies vs. People 133 U. S. 131. This is the celebrated Chicago Anarchist case. In all cases however, it would seem that never more depends upon the sound discretion of the trial judge based upon the answers of the proposed jurors than upon any statements that a newspaper may have made.

D. M. BUTLER.

BUSINESS NOTES

This Department is conducted for the benefit of advertisers, and expresses their claims and views

Barnhart Bros. & Spindler make use of a two-page insert opposite page 640 to show their new French Plate and Wedding Plate, two new scripts after the prevailing styles of the fashionable engravers. French Plate particularly has received the approval of society, and is the character now most in favor for engraved invitations, announcements, and the like. It is handsome, distinctive and artistically appropriate for the purpose. It is, in fact, an adaptation of the French Rondes, and at first glance reminds one of the formerly popular Pen Text taken from the German years ago, but is a more graceful and beautiful letter.

The Wedding Plate is the italic of the French Plate and is original with Barnhart Bros. & Spindler. It is new and fully as pleasing as French Plate. It has the advantage of offering something fresh to those who must do more or less society printing.

Aside from purely social functions these faces will be in excellent taste for office stationery, bank, church, lodge and school work, cards, certificates, bonds and the endless variety of circulars. The two lower cases in both series that will be most used are cast on the same (twenty-four point) body, and each is furnished with beginning and terminal strokes after the script fashion. Logotypes are cast of the most desirable letter combination to better simulate engraving.

Everything possible to best type founding has been done to make these faces worthy of Barnhart Bros. & Spindler's line of scripts, which is acknowledged the best in America.

* * *

Mr. Copper in his "Newspaper Review Department" this month says so much and so well as to the Cheltenham series that we feel that all that is necessary here is to call attention to the page of that popular series of type shown in these pages by the American Type Founders Co. with the purpose of stirring up the progressive newspaper men and printers by way of remembrance. It is a strong, handsome, serviceable type and this is a good time of the year to install the same and to use printed samples therefrom in working up and securing new business.

* * *

For some time the firm of Chas. Hellmuth, of New York and Chicago, have had on the market two articles they call "Solvine" and "Solvine H." They are both used for removing hard ink from forms, rollers, fountains, or any other part of the press where for some reason or other the ink has dried.

The "*H*" acts more quickly, but should not be used for *composition rollers.*

Every printer knows what it is to clean out type or halftones when the ink has dried hard. With Solvine it is done better and quicker than with anything else known, and without the slightest injury to the press.

Samples with prices may be had for the asking.

* * *

"The Short Cut" is a unique catalogue published by the Curtis Advertising Company, of Detroit, promoters of direct-by-mail advertising. It has an illustrated write-up of the Curtis concern, together with little sermons on the direct-by-mail system, each one accompanied by an actual illustration in the form of a little booklet—the product of Curtis artists, Curtis adwriters, and Curtis printers. Aside from its novelty it is a very creditable piece of work. The Curtis Company claims to be the pioneer in direct-by-mail advertising.

The Keystone Type Foundry has just issued a new folder in which are displayed three gothic letters—Compressed, Narrow and Chamfer gothic. The folder is designed with special reference to the use of these faces for newspaper headings, for which they are admirably adapted. The advertising department will also find them decidedly usable.

Another Keystone product is an artistic booklet showing the many possibilities of the Lowell series. This type is sure to win popular approval, for as shown by this handsome booklet the uses it may be put to are almost limitless. Its artistic design will win it favor among critical buyers of printing, while its wide range of usefulness will make it a popular letter in their printing office.

Arranging for the Indianapolis Convention.

LONDON, OHIO, July 18, 1905.

B. B. Herbert, Chicago.

DEAR SIR:—Enclosed find clipping from the Indianapolis *News,* concerning arrangements for next summer's N. E. A. Evidently friend Whitehead is a pusher from the start.

Truly yours, C. E. BRYAN.

NATIONAL EDITORIAL CONVENTION.

J. B. Whitehead, of Indianapolis, who figures in the excursion arrangements and other affairs of Indiana editorial associations, has sought the quiet of Winona to work out some of the ideas for the convention of the National Editorial Association, which meets at Indianapolis next year. Although the convention does not open until about June 18, the editors are to be taken through such a round of gayety that this, Mr. Whitehead thinks, is none too soon to begin work on the plans for entertainment.

All the editorial associations in Indiana will join in the preparations for receiving the 800 or 1,000 editors who will come from over the United States. The Democratic Editorial Association has named a committee of two to help with arrangements as has the Northern Indiana Editorial Association; the Southern Indiana has, or will, name such a committee, and the Republican Association will also be represented by two committeemen. These committeemen will especially arrange for what will be known as Indiana Editorial day, when all the editors of Indiana will be asked to meet the visiting editors from over the country, probably at Indianapolis.

So many cities want the delegates to the national convention to drop in on them that there is going to be some difficulty to satisfy all these cities. The delegates will gather at Indianapolis, it is expected now, about Monday, June 18, next year, and they will be in the Hoosier capital until about the following Thursday.

The delegates will hold half-day business sessions, and the rest of the time will be given to visiting Indianapolis business concerns and other places of interest. It is the intention to take the delegates and their wives—a party which may reach 1,400 in number—to French Lick for a day. The crowd will come to Winona Lake for a day, perhaps two, stopping at the Soldiers' Home at Marion on the way here. The visitors may also go to Ft. Wayne for a day, since it is only a short ride from Winona. Muncie, Lafayette and several other Indiana cities, want at least a call from the visitors.

The plans for taking care of the national convention include one for reviving the old Indianapolis Press Club, which slipped out of existence some years ago. But this revival means more than something temporary. Mr. Whitehead says the effort will be made to reorganize the club on a permanent basis and give it more substantial ground upon which to build its future than it formerly had, by modeling it somewhat after the Chicago Press Club. It is proposed to ask all newspaper men of Indiana to come into the rejuvenated Indianapolis Press Club, and if this plan works out, it is further proposed to open a clubhouse in Indianapolis, where the Indianapolis fraternity may do what little "loafing" it has to do, and where the men from over Indiana may make their headquarters at any time they are in the city on business or pleasure bent. It is figured that such a State Club would have nearly 1,000 newspaper men to draw upon for membership and support. It is probable that the various Indiana editorial associations will be asked to help make this State club a permanent enterprise, and if it does not bear the name of the Indianapolis Press Club, it doubtless will wear the title of the Indiana Press Club.

MORE WORK THROUGH PUBLICITY

BY HARRY A. WOODWORTH

Address all Communications for this Department to
349 Jarvis Street, Toronto, Canada

AND STILL I am far behindhand. I'm sorry. Cato Major said, in his admirable work "De Senectute," that "old men are loquacious." The gods only know what I'll be when I'm an old man. There has been so much work on hand that seemed to call for extended notice that I have probably exceeded my space-limit before coming to some work which I really should review "this trip." Havoc hath assuredly been worked with my department lately—a large amount of matter has been lost, presumably from the inquisitiveness of the postal authorities of either the Dominion of Canada or the United States of America. I did not mean, for instance, in the case of Mr. Melton, of the Scarff & O'Connor Company, to damn with bare mention (this is not swearing, it's an adaptation of a classical phrase). I certainly wrote a nice criticism of his work, to go after the letter which was printed in the last issue—but presumably the woodbine twineth whither it has gone. * * *

* * *

Two jobs of the "announcement" variety, from Chicago, Ill., and Watkins, N. Y. The former is from the Partridge & Anderson Company, and is a somewhat elaborate folder, announcing that they will be "at home" in the Times Building, a fine picture of which is shown. The other, though a strikingly neat folder, is not so pretentious—in fact, it does not even pretend to give the name of the new daily paper whose advent it announces. But as it starts life "with a daily circulation of 1,000 copies, pledged, guaranteed and sworn"—here's additional success to it!

* * *

A good line of pleasing but unreproducible samples comes from our old friend A. K. Ness, with the McMullen Printing Company, Cheboygan, Mich. But here (No. 1) is one which is not only a pleasing example of composition, but also a good instance of advertising to a particular class, and also of timely publicity. The rulework and the nameplate are brown and the balance is black. The McMullen Printing Company have tried this kind of advertising before; and it must have paid them, or they would not have attempted it again next year. For they are shrewd advertisers, as has been freqnently remarked in this department.

* * *

When a fair is at hand, the advertiser realizes the need of prompt publicity, and so, of course, prompt printing. And the Rice Press of Flint, Mich., are advertisers who show themselves especially prompt in preparing to satisfy other advertisers who would be likely to take advantage of the fair. For this (No. 2) must have been issued in or before the first week in August. The stippling of the border is red; the rest is black.

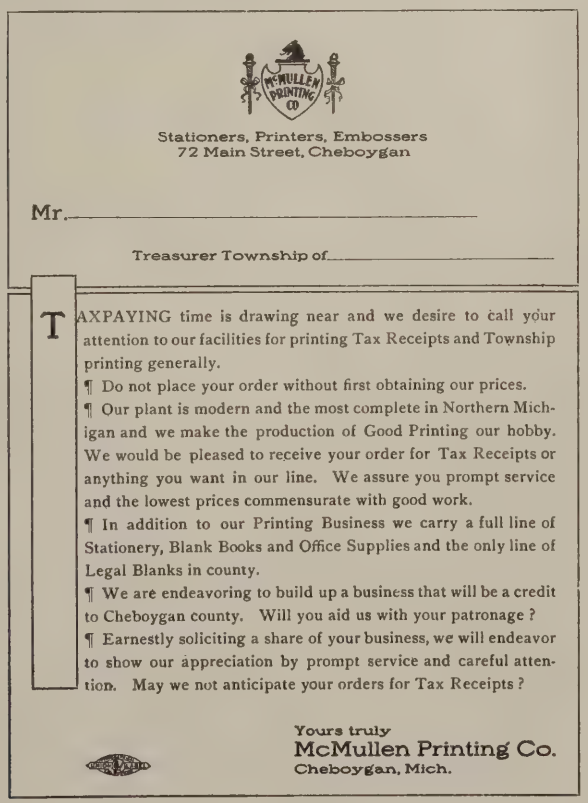
FAIR AT
FLINT
September
5-6-7-8
1905
Ready When You Want It!
We'll accept your order for Printing on that condition—
So there's no need for you to put up with the vexatious
delays that are too common with some printers.
Will you need any advertising matter to use at the Fair?
If so, we would like to have a chance to figure on the job.
The Rice Press,
Bell Phone 320. Flint, Michigan.

2

* * *

I had meant to congratulate the Keystone Type Foundry on the triumph they had achieved in the production of that beautiful face which they named after him who was first in many things. However, it is not too late, especially as I have just received a letterhead which is composed entirely in the Washington series from that maker of artist-compositors, William Carl Pirsch, of Dayton, O. The reproduction (No. 3a) is made from a black-on-white proof furnished me by Mr. Pirsch. And I consider this same proof, colorless as it is, a mighty fine letterhead of itself. The sheet which Mr. Pirsch writes upon, however, is a light brown, and the rules shown on the reproduction, which are green on the colored page, have between them on that sheet heavy rules in gold. The bands of the double "P" mark, and the three cap "P"s in "Pirsch Press, Printers," are in a green, which symphonizes most pleasantly with the brown ink which is used on the remainder of the job. There's about an inch margin at the top and bottom of the letterhead, and I note that Mr. Pirsch utilizes the last inch for writing purposes.

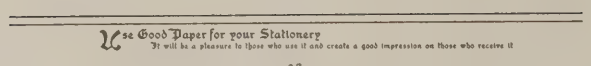
P. S.—Just before shipping this batch of matter I have received a letter (on the new stationery), which invites me to dinner next Monday with Mr. Pirsch, who is making a flying



McMULLEN PRINTING CO
Stationers, Printers, Embossers
72 Main Street, Cheboygan
Mr.
Treasurer Township of
TAXPAYING time is drawing near and we desire to call your attention to our facilities for printing Tax Receipts and Township printing generally.
¶ Do not place your order without first obtaining our prices.
¶ Our plant is modern and the most complete in Northern Michigan and we make the production of Good Printing our hobby. We would be pleased to receive your order for Tax Receipts or anything you want in our line. We assure you prompt service and the lowest prices commensurate with good work.
¶ In addition to our Printing Business we carry a full line of Stationery, Blank Books and Office Supplies and the only line of Legal Blanks in county.
¶ We are endeavoring to build up a business that will be a credit to Cheboygan county. Will you aid us with your patronage?
¶ Earnestly soliciting a share of your business, we will endeavor to show our appreciation by prompt service and careful attention. May we not anticipate your orders for Tax Receipts?
Yours truly
McMullen Printing Co.
Cheboygan, Mich.

1

trip through Canada. And along with this invitation, which I trust I shall be able to accept, comes an envelope with the corner containing these words in the Washington text, "Shut Up." I thought at first that this was an example of that advertising force named by Prof. Scott "the direct command,"



Use Good Paper for your Stationery
It will be a pleasure to those who use it and create a good impression on those who receive it
3a

but upon opening the envelope I find I was mistaken. Here (Nos. 3 b and c) are the first and second printed pages of the enclosed circular. On No. 3b the rule and initial are green; the balance is brown—a darker brown than the stock. On 3c the rule, initial "F," the line "Best Printing Printed," the paragraph mark and the heavy dash between "Pirsch Press" and "Printers" are green—the remainder is brown. An odd distribution of the green, of course, but Mr. Pirsch's oddness is generally combined with art. The distribution of "white" on 3c is also odd, but it is interesting. The Sanderses of New York seem to have set the fashion of closing their office while the "boss" went on a good time. Whether it is good business or not it is really not in my line to judge—and anyway, I'm as anxious to see Mr. Pirsch as he evidently is to have a well-deserved rest.

* Nos. 3b and 3c could not be reproduced.

* * *

TOLEDO, O.

Harry A. Woodworth, Toronto, Canada.

MY DEAR WOODWORTH: Though I have not contributed to your department for many moons you may be sure I have not forgotten your favorable criticisms of the past, and I hope to deserve more such criticisms in the future. I am sending you under separate cover some old things which I think you have not yet seen, and will send you something more from time to time.

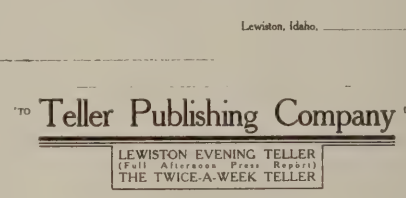
Just at present I am engaged in the Socialist newspaper business and am not working directly at the trade, but I have some things saved from past work and I will send you some from time to time.

Light into this stuff in any way you see fit. I send them to you to profit from your criticism, as I expect to get back into the trade before many moons. By the way, what do you think of my letterhead? A little loud?

Thanking you in advance for any notice you may give my work, and hoping to hear from you if you can find time, I am, as ever,

Yours sincerely, E. B. AULT.

Mr. Ault sends me some calendar blotters issued for December last "For the Holiday Trade," which will be reproduced later. Another very originally composed blotter, "The Best Printing," I cannot reproduce because of the tint-block. But I've got to reproduce something, as I haven't heard from Mr. Ault for so long a time. So here's a billhead (No. 4). The rule-work is a little out-of-the-rut, you see. Mr. Ault sends me a very telling *Teller* sheet, a sort of cross in size between a dodger and a handbill, in two colors, on news stock, with a lavish use of rule-work. "The telegraphic news," says this sheet, "is *Fresh* from the outside world. If you can find your morning paper, compare it with the *Teller* and see the telegraphic [I don't care for this substantive—H. A. W.] repeated that was in the *Teller* the night before." This sentence is dead against the advertising principle so oft promulgated—Don't run down your competitor. But really, don't we all do this more or less—and isn't it the practice with aspirants for *political* success—so why not make use of this in the warfare of business, if it can be done in a *gently* insinuative manner, as in this case? But the advertiser should be sure that any chance morning paper that might be found (how subtly the advertiser intimates that there is no difficulty in finding a *Teller* when it's even, say a day old!) would really be likely to contain the same tale that was told by the *Teller* of the eve before, and mightily little else in the way of news. Of course, it is the legitimate mission of a morning paper, which might be the only one taken by a family, to chronicle the past day's doings—even though the evening paper should have had the morning's and

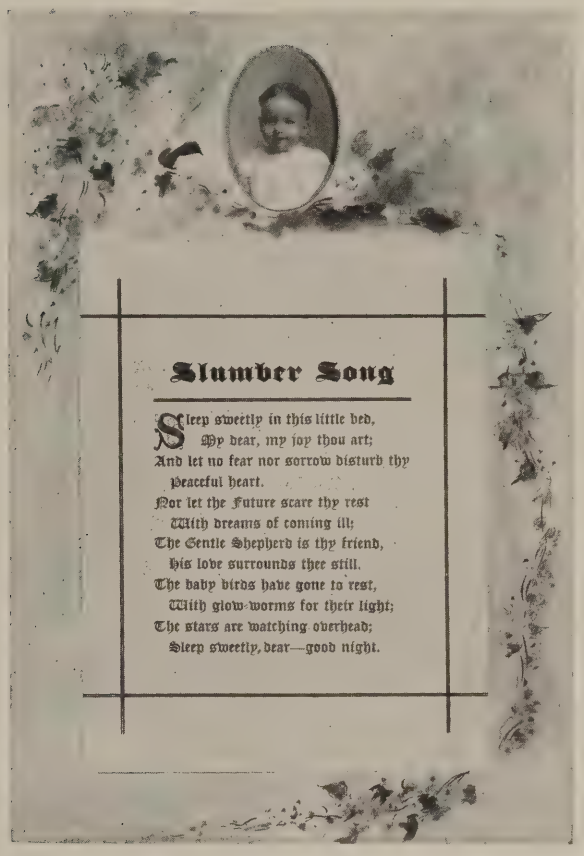


afternoon's happenings on the previous day. So should a first-class evening paper in a city like Lewiston contain much of the same news as was in the morning rival. Care should, however, be taken to have the way of telling it changed somewhat, even though both papers may get the same "flimsy" from the Associated Press. But if a morning paper contains a simple rehash of news of its evening rival—especially its local news—it does not appear to me to be reprehensible or "bad business" to call this fact to the public's attention, if done in a way that is free from the appearance of malice, hatred or envy. There's a great deal of bosh talked about the expediency of never, in advertising, admitting that you have a competitor. Why, when you say your paper is "the best," isn't that a sort of a cold crack at competitors? And many an advertiser talks glibly about his product being the best, without producing an iota of proof that this is so. And folk are looking for proof in publicity now.

I can't say I admire your letterhead, though red and black on orange is not unpleasantly loud. It has the words "Erwin B. Ault" in 24-point Engravers' Old English and "Artist Printer" in 14-point of the same face, which makes a much shorter line. There's a rule between—red, bordered with thin black rules—which extends an inch an da half or so each side beyond the longer line. The effect has no compactness—the rule looks like a stick that is too long for the stove. It is an original design with no good reason for its original feature—and I've never seen any other specimen of Mr. Ault's usually brilliant originality which called for a criticism anything like so severe as this.

* * *

The specimen shown as No. 5 was sent me some time ago. The portrait at the top is of Hal Biggers, a coming artist-printer of Texas. The photograph is attached to the under side of the very heavy cardboard on which the under side water-color painting is done. A sheet of white paper, pasted on the card, contains the printing. The initial and the space between the one-point rules are filled in with red—evidently with red writing ink. The words "Biggers' Printshop, Corsicana, Texas," will probably not be seen on the reproduction, as they are embossed without printing at the top of the paper. The



Slumber Song
Sleep sweetly in this little bed,
My dear, my joy thou art;
And let no fear nor sorrow disturb thy
peaceful heart.
Nor let the Future scare thy rest
With dreams of coming ill;
The Gentle Shepherd is thy friend,
His love surrounds thee still.
The baby birds have gone to rest,
With glow-worms for their light;
The stars are watching overhead;
Sleep sweetly, dear—good night.

5

painting on the card in its various colors, and with its chastely-toned background, is, to my way of thinking, a fine bit of impressionism, the effect being that of flowers drenched with dew. The production has interest outside of that pertaining to the photograph of the son of one of our best known contributors. For it shows how such arts as water-color painting may be even more closely allied to typography than through the medium of photo-engraving. The card has a white silk cord attached to the back by means of a Biggers wafer. So the arts of printing, paper-cutting, pen-drawing, painting and photo-engraving combine to make this card a gem.

On receiving the sample, I wrote Mr. Biggers, calling attention to some matters of punctuation, and also stating that two lines were incorrectly divided. I did this chiefly because I understood from the letter that Mr. Biggers was preparing copies for other friends. In reply I got this letter:

CORSICANA, TEX.

DEAR MR. WOODWORTH: Guess you think I am either busy as can be or else something else has happened. Well, truth is, I have been pretty busy since your letter was received. Went out to the Brownwood meeting of Texas Press Association, and had a great time. Sent you a paper; the Association has just incorporated that job department and the honor of conducting the first meeting was mine. There seemed to be a lot of interest taken and that feature has been made permanent. Think it a good scheme, and likely to result in good for the craft if kept up for a few years.

Now to come to your letter: The poem was written by a lady here and she would not have the change made in lines, but was glad to admit the others were right as you had suggested. Especially does the semi-colon and comma belong; can't you add them with pen and ink? Please remember the chief reason for not repeating this is that my font of Priory was very short and I had to make *three* runs to complete the verse.

I am leaving Corsicana next Thursday for a trip; the trip of my life. Go from here down through Mexico, then up through California—see the big trees and Yosemite Park, then to Portland, Seattle, and to Spokane where the main attraction will be Stutes; Yellowstone National Park and then on the return trip home, stopping at Salt Lake City, Denver, where I will see Beran and Auger; Pike's Peak, Colorado Springs, and the mining region. You will doubtless see but little of the shop in the meantime, so just know it is still here and in good hands.

Had the pleasure of meeting Mr. Herbert at the Press Association and liked him fine. We will think of you on the trip, and only wish it were possible to take a side trip and see you, but look out; if plans go right our way will be east next year, and Toronto won't be far from Niagara. Yours,

BIGGERS.

The punctuation has been amended as suggested. I am sorry that I cannot possibly withdraw my suggestion as to the division of the lines of the first verse, which should, I claimed, be as follows:

Sleep sweetly in this little bed,
My dear, my joy thou art;
And let no fear nor sorrow
Disturb thy peaceful heart.

By no rule of prosody of which I ever heard could the other division be justified, and I leave it to Mr. Copper, who has certainly remembered more of his studies in this line than I do, if the above division is not the logical one for a verse where the beats are distributed as in this pleasing little production of the Texas lady.

6

This (No. 6) is one of Mr. Biggers' latest letterheads, in two colors. Now that bird is one of the *Chap-book* breed of peacocks; but from its position in connection of the text, those not versed in unnatural history might think it a golden dragon. [Now here's an instance of what Mr. Copper spoke of last month—of minds running in the same channels. I wrote this critique some months ago; but I find in the latest issue of another printing journal that practically the same remark is made by another critic. But if two persons are struck in the same way by a job, it is fair to suppose that some of the great public will think likewise. I never did a job in my life which I did not desire to have criticised by two or three or more before presenting it to the one for whom it was done, or directly to the public. And I've never despised the criticism of children. Nay, I have sought it. There's where you get truly frank, disinterested criticism; and there's no truer verse in the Book of Books than that about the wisdom that proceeds forth from the mouths of babes.]

* * *

B. F. Harb, of Anderson, Ind., sends me four blotters. "A and B," he explains, "are my own ideas of a blotter; C and D are those of the proprietor and superintendent; D was set by another compositor, as well as the souvenir for the Editorial Committee. I thought the latter might interest you a little." B and D are reproduced respectively as Nos. 7 a and b. The

7a

color-scheme of the former is especially pleasing. The stock is buff, the rules are red; the remainder is black. I very much prefer it to the smaller blotter, which is of a similar style. This other blotter has the words "Anderson, Indiana," spaced between the letters, which adds more "white" than is pleasing on a job that is already so generously whited. A little less white in the body of the design would have been preferable on the other blotter reproduced, which nevertheless has excellent points. Such a job as this should be "balanced" throughout in pretty thorough conformity with the old ideas of balance.

The Abbot Old Style and the border are in good harmony, and the work-mark is worthy of note. A good work-mark always seems to me to be a good publicity investment.

7b

The booklet issued in connection with the visit of the Executive Committee of the N. E. A. to Anderson is a credit to Anderson and to the *Bulletin* Printing and Manufacturing Company. The cover has a fine colored portrait of Chief Anderson, of the Delaware tribe, to whom the city owes its name. The booklet is handsomely composed, and certainly must have given each of the scribes material on which to write as "one having authority." The only fault I have to find with the publication is the strange mixture of Roman numerals "MIXV"—which is presumably thought to be a fitting substitute for "1905."

Mr. Harb pays me some very flattering compliments, but the one I most appreciate is this: "You have a style that makes it seem you are talking in person." Now that's just the way I feel, and I am glad if my work shows it. Whatever may be said against me, I trust the element of a strong personal interest in the workers who help me with this department is not and never will be lacking.

* * *

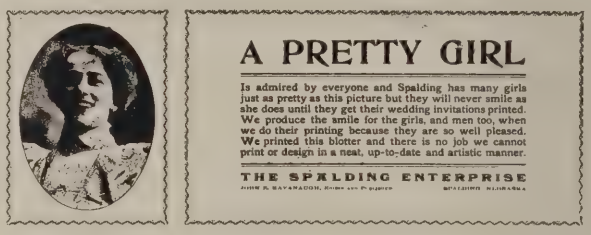
I have not heard from Will J. Cota since the first of March, when he wrote me that he had left the employ of the Sheldon Press but was going to continue to read this department, and keep in touch with what the others were doing. He said at the time that the "extra per" was a great temptation, "and we artist (?) printers sometimes have to think of something beside beautiful forms in type and look for the long green. When the green gets a little longer I shall try and get back into the job line again, where I think I really belong. (No egotism alleged.)" Well, that's one view to take of it; but there are job printing offices (in "these United States of America," I was going to say, but I'm in another country where it's going to be just as true) whose proprietors are finding that art in printing is a most prolific producer of the long green which we are all compelled to consider. And men who can produce such work as Mr. Cota should not find it necessary to leave their first love.

"Get Wise About Your Printing." Give it the careful thought it deserves. Don't invest your money in shoddy printing, it don't pay: insist upon having your work treated in a distinctive style, down-to-date, and attractive. And here's where we come in with our modern little shop, and offer you the service that can produce this kind of printing. How often have you got stuck in the matter of a mail slip, for instance? You are in need of something of the sort, and you hie yourself away to the printer—"Print me five thousand of these for mailing, something new and novel, to attract attention." You receive the printing—same old story—poorly printed, unattractive, and —well, it wasn't right. The Sheldon Press stands ready to serve you, and serve you right. We'll do your catalogue, booklet, folder, or stationery in a manner that will please you, and it won't necessarily be expensive, in fact, you get better results from good printing, which makes it the most economical in the end. "Get Wise About Your Printing." Send that next order to us, and get Wise Printing.

The Sheldon Press
Burlington, Vermont

8

Mr. Cota's recent work has been artistic both as to composition and color-scheming and also as to the possibilities in the folding of pieces of cover-stock in connection with "flats." He's done some particularly nifty work in these lines for the New Haven Mills Manufacturing Company, which I will reproduce if Mr. FitzGerald doesn't hurry and come back. One of the printing-advertising productions is entitled "Get Wise About Your Printing," and the cover has that particularly



A PRETTY GIRL
Is admired by everyone and Spalding has many girls just as pretty as this picture but they will never smile as she does until they get their wedding invitations printed. We produce the smile for the girls, and men too, when we do their printing because they are so well pleased. We printed this blotter and there is no job we cannot print or design in a neat, up-to-date and artistic manner.
THE SPALDING ENTERPRISE

Automatically fed and printed throughout in two colors on a Harris two-color 15 x 18 rotary press at a speed of exceeding 5,000 an hour. The publishers of "SPEED" will be pleased to send sample copies free of charge to any person soliciting same on business stationery.

11

wide-awake owl—for its eyes are fully open, though the sun is shining bright—with which the advertising of "The Practical Colorist" has made us familiar. A fold at the top of the cover-stock, on the inside, holds up, by means of paste, the sheet reproduced as No. 8, which, of course, was folded down the center. The rules were in brown, the text in a rich dark green. The story of the good printer is often told, but that it can still be put forth in an original and attractive manner is evident from this and many other pieces of printers' publicity.

* * *

The pretty girl—despite the remarks of some sour advertising critics—has not yet lost her value as an advertising force—and she will not. The Spalding *Enterprise* makes excellent use of a stock cut in the tinted blotter in two colors, which is shown as No. 9.

* * *

A suggestion for a subscription blank, which is not of the "stereotyped" form, is that given by Reproduction No. 10. The job is in black and orange.

* * *

This cover (No. 11) in green and orange on pale green stock is a year old now; but is still a new and most pleasing style of art-nouveau. The heavy border and the printing at the bottom are green—the rest orange. It is from *Speed*, that splendidly (though quickly) printed house-organ of the Harris Automatic Press Company. This concern has taken at least a year to answer my request for another copy of this number—in fact, I haven't got it yet; but I understand that their presses *are* rapid.

* * *

Harry A. Woodworth, Toronto, Canada. MILBANK, S. D.

DEAR SIR: I send you with this mail some specimens of my everyday work, and as I have no instructors outside the trade journals, any suggestions you may make will be appreciated. Having set type only two years (I began in June, 1903) I feel somewhat backward about sending you samples. However, I have finally mustered up the courage, so here goes!

Yours respectfully,

ERNEST TOMOWSKE.

The jobs sent by Mr. Tomowske are of varying degrees of excellence, but nearly all show that the compositor who begins his career by a careful study of the printing journals has a start which will prevent much necessity for unlearning. I am speaking in another portion of this installment about the poor effect that was produced by printing over a cut which was in a tint. Mr. Tomowske has, however, managed the bicycle on one of his jobs very creditably. Mr. Copper gave Mr. Tomowske so much praise for some of his more excellent work last month that I will give a little advice concerning the faults I observe in his work, even at the risk of making myself less popular than Mr. Copper with this particular compositor. But Mr. Copper is a teacher who is likewise not afraid of giving a little adverse criticism where it is needed—and in so criticising this gentleman's work I am also speaking to older contributors:

I. In portions of jobs that are set in ordinary newspaper body-type, and "read right along," it is well to avoid the new style of omitting periods at the end of paragraphs and sentences. Some of the modern job body-type lends itself to this mode of composition admirably, but when such liberties are taken with the type we are accustomed still to read with the conventional punctuation, the ordinary reader is likely to consider the omission of punctuation as more of a sacrifice to expediency or necessity or even ignorance than to art.

II. In a date-line such as "Milbank, S. D. ———— 190 " or "Milbank, South Dakota ———— 190 " why not place the comma before the dotted rule? Clearly if there should be a comma after "Milbank," there should also be one after "S. D." or "South Dakota." The date-line is not, of course, complete until the writer or stenographer fills the blank space, but it is not his place to put in the comma, and there would be a wrong-fontish effect if he did so. The day of the dotted rule in such typography may be said to have gone. There may be some jobs of the kind where there is no rule where the omission of a comma may seem to be in keeping with the omission of periods from the job; but the dotted line espepecially suggests a continuity which would better be lived up to, when such rule is used, by a conformity as regards punctuation.

III. Care should be taken in the juxtaposition of ads on a two-column page, where the general plan of composition is the same, to keep the advertisements so distinct from each other that there is no suggestion of their being the same ad. Now the two ads at the top on this page of the *Alpha* are each excellently composed in a style which is in keeping with such a production. But because of their general sameness of composition, their central blocks, and their full lines at top and bottom, in the same kinds of type as each other, one might get a "first impression" that Mr. Burkhardt was the proprietor of the Palace Barber Shop, and that the latter part of the two ads was intended to read "H. E. Mitchell, Prop., Milbank, S. Dakota." This effect is given more prominence because there is no dividing rule between these two ads and that of Queen Valley Flour, and because the perpendicular rule is not produced to the third ad. Many makeups consider that when an ad has a border such as that of the milling company, this border serves as sufficient division between the ad it encloses and other ads on the same page. But in these days a panel made of border material is often placed at the bottom of an unbordered ad, and so even the three ads on this page might almost be considered at a first glance as being one. Such publications as the *Saturday Evening Post*, which pay great attention to the artistic appearance of their pages, never consider a heavy rule or a border which belongs to one ad a sufficient division from another, and it seems to me that their practice of dividing each ad from its neighbors with uniform thin rules is at least fully as artistic, and much more satisfactory in other ways, than the practice which prevails in many small printing offices.

I want Mr. Tomowske never to feel backward about sending more samples. He has an individuality and an artistic taste that is going to put him on a par with the best contributors to this department. And that's why I'm taking so much space to point out some of the minor matters in connection with his work.

A NEWSPAPER'S TRIP.

The mission of the newspaper is to inform, please and instruct and as far as may be to influence or to inspire to accomplishments of needed objects by individuals and the community. This work is performed through the reading and advertising columns. However, newspapers find it profitable at times to carry on their legitimate work outside of the papers, and, at the same time, to secure valuable advertising and a name for enterprise and doing things. Along this latter line of effort the Adrian, Michigan, DAILY TELEGRAM has established the custom of giving an annual excursion for its friends and patrons. Other papers have also found a like plan wise and profitable. In this the columns of the papers are called into use to make the excursions popular and profitable and, then, to write up instructive accounts of the trips, of the enlivening and educating travel, with all that was seen, experienced and enjoyed. The excursion of the *Telegram* this year was from Adrian to Detroit and return, and a more delightful short trip by land and water could scarcely be planned. It afforded, in the account, besides all the enjoyment, the popularizing influence, and the making of friends, two columns of very entertaining reading matter for the paper.

POSING.

Posing is hypocracy, yet posing has been the curse of both the State and the Church. Politicians pose as statesmen when they are only corrupt, self-seeking demagogues—the willing tools of place seekers and grafters. Ministers pose as saints and as divinely called messengers of God when they are only lazy, stilted seekers of ease and fat places, caring only to live in elegance and as diletantes of learning, philosophy and religion on the superstitions and veneration of the people, while lacking in all spiritual fire, fervency of spirit, diligence in service, Christ-like compassion, human sympathy or burning, undying care for the souls and bodies of men. They preach in the memorized canting phrases of theology and creed. They never weep as did Jesus at the closed tomb nor create any new wine of higher life and holy obligations at the marriages they celebrate. Everything is in set phrase, conventional and wholely and repeatedly formal or ceremonial. Lawyers parade as men learned in jurisprudence, as defenders of the supremacy of the law, which is the perfection of human reason; as officers of court, sworn to see justice done, but they neglect the learning which they profess, plot with their clients for the breaking of the law and the averting of its penalties; labor with untiring energy to defeat justice and to free criminals though they be vile murderers, embezzlers or thieves, or to protect extortioners, bribe takers, corruptionists and monopolists in the enjoyment of their unholy gains. The more successful they are in shielding wrongdoers and setting the laws at defiance, the greater their fame, the larger their fees, and the more frequent their employment. There is, however, one calling, at least, that of newspaper-making, in which posing, as a rule, is an impossibility, or if not wholly impossible, always unprofitable, and, if attempted, brings ridicule and speedy disaster.

The newspaper is always in the open. It is the quintessence of publicity, nothing can be hidden that will not be revealed. Its highest and only permanent success rests in being right, open, sincere, honest and truthful. The newspaper has no secret ends to accomplish, no combinations, rings or cabals on which to depend, no sanctity or mysticism to bolster up a false dignity or power, no individual or corporate wrongdoers to serve. It is of the people, by the people and for the people or else it is not a newspaper at all.

Its clientele is in every trade, in every profession, is of every creed, is of all beliefs and unbeliefs, is among all groups of men and by every hearthstone, however elegant or however humble. It feels the heart throbs and hearkens to the voices of all the people from the hut to the palace every day. There is no aristocracy, ritualism or anti-ritualism or frenzy in its subscription list, on which all its business depends.

It is not strange, then, as was said by Senator C. K. Davis, of Minnesota, a little over two decades ago, that men of this newspaper profession, freed from all bias, "record from day to day, for the public benefit, their true convictions without its occurring to them that, in doing this, they do otherwise than they can." It is most gratifying that, even in our metropolitan cities, where there seems to be, if anywhere, gain and safety to the press, in posing as the representatives of all the people, while selling its opinions and convictions to combinations of labor or capital, of political schemers, or of official boodlers, the newspapers stand firm and denounce wrong doing wherever it appears. So united are the newspapers of the great cities in the exposure of frauds and combines against the personal, the civic and property rights of the citizen, and so united for good government and the public weal, that rogues and demagogues are able at times, to deceive the people through pointing to this natural harmony in these things, that exists from the very nature

Nature's Wonders.

of the calling, as evidence of a newspaper trust. The newspapers, however, are not swerved from their course by such misrepresentation but continue to fight, with equal zeal, the injustices of capitalistic monopoly on the one hand and labor monopoly on the other, standing ever for the rights of the people and righteous enforcement of law.

It is not too much to add that the secular newspapers, with so few exceptions as to prove the rule, teach and enforce the broadest and deepest humanity, brotherhood and charity, the purest patriotism and morals, the highest principles of personal and civic duties and the holiest religion. If the prophesied revival of religion and righteousness is to sweep over this land, it will be largely through the influence of the secular press.

Among the Associations

"In Unity is Strength"

IOWA has three or four live editorial organizations. Among these is one with the significant name of "Corn Belt Editorial Association" that held its 12th Annual Convention at Sheldon, Iowa, August 10 and 12, with the following very attractive program:

Thursday Evening, August 10—Piano solo, Mrs. C. H. Allen; invocation, Rev. W. L. Bray; address of welcome, Rev. T. S. Bassett; response, E. D. Chassell; reading, Miss Oma Button; address, "The Searchlight of Publicity," D. W. Norris, Jr., Editor Marshalltown *Times-Republican;* vocal solo, Mrs. Brink.

Friday Forenoon, August 11—Paper, "Wolf Howls," C. B. Wolf, Alton *Democrat;* paper, "One Better Than Two," Milton Starr, Algona *Upper Des Moines-Republican;* paper, "Illustrating a Country Newspaper," H. V. Cline, Cherokee *Democrat;* paper, "The Mission of the Country Press," Frank Clarkson, Ida Grove *Pioneer;* paper, "My Esteemed Contemporaries," W. A. Quigley, Hawarden *Chronicle;* paper, "How to Systemize the Work to Save Time," Chas. H. I. Mitchell, Storm Lake *Pilot-Tribune.*

Friday Afternoon—Paper, "Successful and Unsuccessful Attempts to Increase Circulation," E. G. Randall, Spencer *Reporter;* paper, "Encouraging the Home Advertiser," Geo. I. Long, Manson *Journal;* paper, "How I Fight Catalog Houses," C. G. Kaskey, *Up-To-Date Merchant,* Manson; paper, "Newspaper Critics," Miss Anna Donovan, Emmettsburg *Tribune;* paper, "Country Town Definition of News," W. R. Prewitt, Onawa *Sentinel; paper,* "Mistakes of a Newspaper Man," S. I. Frisbee, Sloan *Star;* paper, "Advertising a Newspaper and Its Business," Roy G. Caswell, Dennison *Bulletin;* question box; general discussion. Election of officers, selection of place of meeting, other business.

Friday Evening—Banquet and program provided by press and citizens of Sheldon; paper, "Gratis Advertising," W. E. Hamilton, Odebolt *Chronicle;* paper, "What Legislation Do Newspapers Need?" Emory H. English, Mason City *Times-Herald;* opening of question box; general discussion of timely topics; appointment of committees, etc.

Catalogue houses and advertising were a special feature of the afternoon program Friday. Mr. C. G. Kaskey, a leading merchant of Manson, discussed this subject in connection with a paper by Mr. Long. Mr. Kaskey believes in the coöperation of merchants and newspaper men, and he turns down every manufacturer or wholesaler that furnishes goods to catalogue houses.

His address was a practical talk by a practical and successful merchant.

"Illustrating a Country Paper" was practically demonstrated by Mr. Cline, who showed the complete process of making a chalk plate cut.

Editor H. B. Hale gives the following brief summary in his paper, East Hartford *Gazette,* of the summer meeting of the Connecticut Press Association:

"The weekly newspaper men had an enjoyable meeting at Lake Compounce, Monday. The occasion was the regular summer meeting of the Connecticut Editorial Association and pleasant memories of the day will linger long in the minds of those who attended. The sheepbake was not the least interesting feature of the exercises. The meeting opened at 11 o'clock and was presided over by President Arthur S. Barnes, of Bristol. Routine business was quickly disposed of and then Editor J. M. Morse, of Windsor Locks, gave an excellent address on 'Job Business As It Strikes a Printer in a Small Town.' This was followed by the reading of an interesting paper on the subject, 'Foreign Advertising,' by Editor E. H. Abrams, of Greenwich. An hour was spent at dinner, after which the session was resumed. Instruction and humor were well combined in the address given by 'Joe' Cone, of Old Saybrook, on the topic, 'Humor as Made by the Yard for Newspapers.' Editor A. E. Knox, of the Woodbury *Reporter,* spoke on 'The Funny Side of a Country Editor's Life,' and Editor George C. Woodruff, of Litchfield, made his report of the national convention at Guthrie, Okla., in June. The new members voted in were: L. M. Barnes, of the Woodbury *Reporter;* Charles Brainard, of the Thompsonville *Press,* and Lewis S. Welch, of the Yale *Alumni Weekly.* G. C. Woodruff offered this resolution: 'It is with deep regret that the members learn of the departure of Mr. Knox, of Woodbury, from Litchfield county and Connecticut, and that they wish him all success in his new home in California.' Mr. Woodruff also offered a resolution of thanks to Mr. Cone for his address. Both of these resolutions were adopted by an unanimous vote. A majority of those present favored taking a trip up the Hudson river some time early in September, and Mr. Hale was added to a committee already in existence to make definite arrangement in regard to the matter."

Mr. H. Taylor, a former Connecticut newspaper man and for a long time an officer and one of the active members of the Connecticut Weekly Press Association, has of later years attended to the getting up and publishing of souvenirs until he has come to be called "Souvenir Taylor." Souvenirs of legislatures, conventions, great financial, banking, commercial or manufacturing enterprise and accomplishments, anniversaries and the like, naturally come within the field of the local paper

or printing office and can often be made to afford the very best kind of advertising, winning friends and business, while bringing in handsome profits.

The Lebanon (Ill.) *Journal* and the Waukon (Iowa) *Democrat* deserve especial mention among the hundreds of papers that are writing up, thoroughly entertaining and instructively, the ever-to-be noted trip of the members of the National Editorial Association through Oklahoma, Indian Territory, Texas, California, Oregon and Colorado. The second mentioned paper is illustrating its accounts with half-tones. The amount and broadness of information given to readers all over the Union in these comprehensive and instructive notes and records of travel cannot result otherwise than in a world of good not only to the regions visited and to the hundreds of thousands of readers, but to the papers themselves. It has ever been found that accounts of travel by the editor of a newspaper are read and enjoyed with zest and interest second only to important local news. They are believed, too, as well as enjoyed.

The New York Press Association officers for 1905-1906 are as follows:

President—Elias Vair, of the Waterloo *News*.

Vice-Presidents—William B. Collins, of the Gloversville *Leader;* Thomas P. Peters, of the Brooklyn *Times;* William J. Pollard, of the Seneca Falls *Courier;* John P. Herrick, of the Bolivar *Breeze;* William D. McKinstry, of the Watertown *Times*.

Interior of N. E. A. Convention Hall, Guthrie, showing cards arranged for each association represented.

Secretary and Treasurer—A. O. Bunnell, of the Dansville *Advertiser*.

Executive Committee—Horace J. Knapp, of the Auburn *Advertiser;* J. L. McArthur, of the Granville *Sentinel;* L. William Hones, of the Roscoe *Review;* Will O. Greene, of the Fairport *Mail;* Robert L. Forbes, of the New Rochelle *Paragraph*.

The Tennessee Woman's Press and Author's Club in session recently at Monteagle, Tenn., elected the following officers: President, Mrs. Oscar T. Peoples, Chattanooga; secretary, Mrs. C. M. Grieve, Chattanooga; treasurer, Miss Flora Clash Huntingdon, Memphis; chairman of constitutional committee, Mrs. Louie Dayton Phillips, Watertown; chairman of legislative committee, Mrs. W. B. Romine, of Pulaski. Mrs. S. R. Martin, Memphis; Mrs. J. F. Miller, Adams; Miss Seela Armstrong, Chattanooga; Mrs. F. M. Frest, Nashville, and Mrs. Leonora Dimison, of Jackson, were elected new members.

The following officers were elected at the annual convention of the Missouri Press Association held last week in St. Joseph: President, William N. Southern, Jr., Jackson *Examiner* at Independence; vice-presidents, Philip Gansz, Macon *Republican;* John P. Campbell, Doniphan *Prospect-News;* E. K. Lyles, Houston *Herald;* recording secretary, J. V. Bumbarger, Memphis *Democrat;* corresponding secretary, R. M. White, Mexico *Ledger;* treasurer, Howard A. Gans, Missouri *School Journal*, Jefferson City.

Michigan editors have been noted for years for the splendid excursions enjoyed by the members of the State Press Association. They have in a high degree what has aptly been called the modern habit and spirit of "travelism," which, with the aid of newspapers, exert a powerful influence in broadening men's minds in removing provincialism and prejudice, giving new vitality to tired brains and bodies and awakening to more active mentality and sympathy and a broader understanding. This year the trip lay through Canada and New England. In its full and instructive account the Michigan *Bulletin* gives the following general outline of the trip:

At 7:30 on Saturday morning, June 17, the excursion party, 160 in number, boarded a special train of the Grand Trunk Railway for a record trip to Toronto. The route from Detroit lay by rail to Toronto, thence by steamship lengthwise of Lake Ontario; a day through the Thousand Islands and down the beautiful St. Lawrence river, with a day delightfully spent in the quaint old city of Montreal, in which everything is more thoroughly French than English, a city of monasteries and cathedrals, of towers and battlements and stupendous works of masonry; from Montreal by rail across Vermont and New Hampshire, through the White Mountains and on to Portland, Me.; then northeast across the state of Maine to St. John, N. B., on the Bay of Fundy, where the tide rises 27 feet; a trip up and back on the St. John river, one of the most beautiful scenic rivers in America; by rail across the province of Nova Scotia, by ferry over the Straits of Canso and a steamer ride across the beautiful Bras d'Or lakes and on the edge of the Atlantic ocean to Sidney, Cape Breton Island; a visit to Glace Bay, 14 miles north of Sidney, the most easterly point of land on the North American continent and the place at which is located the Marconi wireless telegraph station; thence down the western coast of Nova Scotia to Halifax, the garrison town, one of the strongest fortified cities in the world, and where the British soldiery represent a large and important portion of the city's population, thence through the land made famous by Longfellow's beautiful story of Evangeline; a day at the charming summer resort of Digby, where deep sea fishing was one of the pleasures planned; on to Yarmouth and a 17-hour voyage across the Bay of Fundy and the Atlantic to Boston, followed by two days of sight seeing, including a visit to Harvard College at Cambridge, an automobile ride over the identical road traveled by Paul Revere when he gave the midnight alarm of the approach of the British preceding the battle of Lexington and Concord, including a visit to those famous battlefields of the war of the Revolution, concluding with a day or two of sight seeing in New York City and a return home via the scenic route of the West Shore railroad, which for more than 50 miles skirts the majestic waters of the Hudson river—the Rhine of America.

ANNUAL MEETING.

AUGUST 16, 1905.

NATIONAL PRINTER-JOURNALIST, 1319 West Ravenswood Park, Chicago.

GENTLEMEN—We would be glad to have you with us at the convention of the Niagara District Printers and Publishers.

Yours most respectfully,

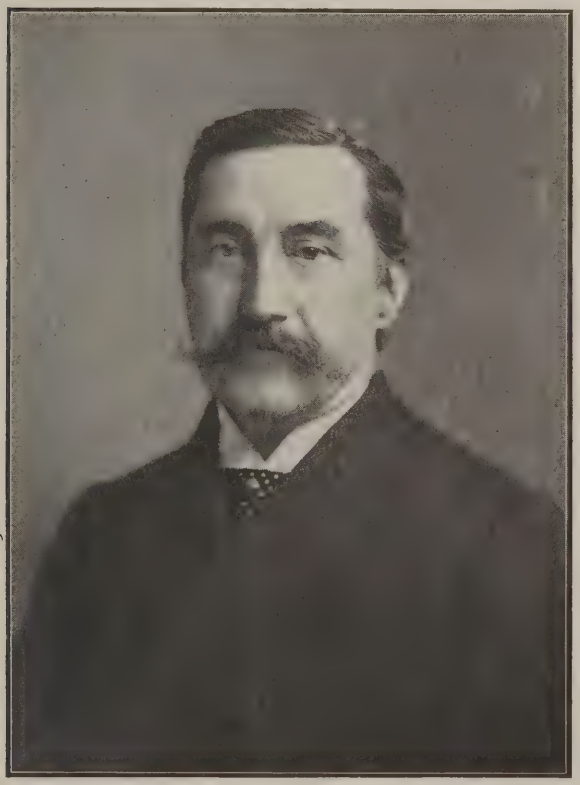
W. J. KEYES, Secretary.

The Niagara District Printers have a working price list for printing and believe the spread of its adoption by printers throughout the province would be of lasting financial benefit to all concerned, and invite you to attend a meeting to be held in St. Catherines on September 28 and 29 next.

That this meeting may be more interesting than its predecessors, we have prevailed upon Messrs. Harry Woodworth, Atwell Fleming, Frederic Flagler Helmer, Clyde Oswald and Isaac H. Blanchard to give practical lectures on questions of vital importance in the management of a printing business.

In order that all may attend and have a thoroughly enjoyable as well as instructive outing, we have arranged matters so that five dollars will cover the cost of the entire two days' outing (railway fare to St. Catherines excepted).

No employing printer in Ontario can afford to miss this opportunity to establish fixed prices for work and hear the lectures, especially those of Messrs. Helmer and Blanchard.



ADDISON B. BURK,

Ex-President Pennsylvania Editorial Association, who is writing up the Western Trip of the Editors for the N. P-J.

Kindly signify your intention of being present by filling in the enclosed blank and forwarding by return mail so that accommodation may be provided.

W. J. KEYES, Sec. Committee.

A few copies of the twelve-page price list of printing and binding used by the St. Catherines printers are in the hands of the writer. This is the most complete and practical list ever issued.

The following is the program of the convention:

THURSDAY, SEPT. 28.

Morning, at Nine.

Business Meeting—Niagara District Employing Printers.

Reception and luncheon at "The Welland."

Afternoon, at Two.

President's Address—Mr. W. B. Burgoyne, Editor *Standard*, St. Catherines.

The Benefits of Organization—Mr. Atwell Fleming, of the Atwell Fleming Printing Company, Toronto.

Newspaper Advertising—Mr. W. J. Taylor, manager *Sentinel Review*, Woodstock.

Organizing—The Employing Printers of Ontario.

Dinner at "The Welland."

Evening, at Eight.

Composition; A Possible Science, *Illustrated*—Mr. Frederic Flagler Helmer, designer, Lockport, N. Y.

(Employees are invited to attend this lecture.)

FRIDAY, SEPT. 29.

Morning, at Nine.

Trip to the Paper Mills—Montrose, writing and book papers; Riordon, pulp and print mills; Lincoln, manilla and wrapping mills; Kinleith, writing and book mills.

Luncheon.

Group of members of the National Editorial Association in front of the Masonic Temple, Guthrie, O. T.

Afternoon, at Two.

Pulp and Paper—Mr. Carl Riordon, manager Riordon Paper Mills.

Printing Office Management—Mr. John Clyde Oswald, Editor *American Printer*, New York.

How to Increase Business—Mr. Harry Woodworth, Editor Department of Criticism NATIONAL PRINTER JOURNALIST.

Dinner.

Evening, at Eight.

"Prices for Printing," *Illustrated*—Isaac H. Blanchard, New York City.

"God Save the King."

WAYZEGOOSE.

THE EDITOR acknowledges with thanks a handsomely engraved invitation from The Smith-Brooks Printing Company, of Denver, to join them and their employes on their "Seventh Annual Wayzegoose" at Dome Rock, in Platte Canon. The NATIONAL PRINTER JOURNALIST has had occasion heretofore to speak of the wayzegoose and its meaning. The Smith-Brooks Press make it an occasion of enjoyment that must tend to good feeling among all connected with the establishment, promoting kindly sentiments and friendship and contributing to the promotion of the *esprit de corps* that is as important in a printing office as in any army. A most artistically gotten up booklet, on heavy enameled stock and bound in stiff covers, gives the enticing program and the following instructive forewords:

TO-DAY.

Let's live to-day, look on to-day, and to-day only, that we may not overlook that which we are seeking—Happiness.

Real happiness consists in enjoying and appreciating the things we have. Take time to live, live one day at a time; live right, think right, work right, and happiness is yours.

It is contrary to the laws of Nature to disregard the beautiful work of the Creator—the Great Outdoors—mingled with good cheer and exhilarating and innocent fun; these are inexpensive, yet vital tonics toward the attainment of happiness. We should gather a little of this elixir every day in order to double our possibilities of health, wealth and happiness. This fact is demonstrated by the radical methods employed at some modern sanitariums, where the "victims of civilization" are forced to live in the open air, even to the point of nudeness; sleeping on the ground; burying themselves in the soil for hours at a time, hoping to coax from Mother Earth that which they had daily and unconsciously neglected and cast aside.

This mingling with Nature not only furnishes the foundation for health and happiness, it also inculcates the love of the beautiful; it inspires ideals which exalt and dignify both labor and leisure; broadens the mind and shoulders, and consequently lightens our burdens.

Therefore, it is our sincere hope that all will enjoy the day, to prove that the marvels of Heaven and Earth have been acknowledged and appreciated, and the flowers have not bloomed in vain.

This preface is followed by a concert program that includes orchestral pieces, songs, mandolin and guitar selections, monologue and funny sayings, pantomime and chalk talk. There were impromptu dances throughout the day, and when we recall the dancing of some of the mountaineer girls at a reception given to the editors in 1887 we can imagine the joys of this part of the program. The sports next enumerated include all kinds of foot races and a baseball game, without which, of course, no day's outing by a party of Americans would be complete. The rich pages, every one of which is a picture and a joy, close with the following character thoughts:

CHARACTER.

One of the greatest motive powers of the world is character; there is no asset or legacy as precious; it is the noblest of possessions, and those who attain it through the sacrifices of many momentary pleasures will find that they eventually inspire the confidence and command the respect which they really deserve.

How many of us are there who give any attention whatever to the cultivation and improvement of our character? This inestimable treasure is within the reach of all.

By a careful self-diagnosis we can see the defective spots in our natures, and by daily observing these weaknesses we can master and eliminate them through patience and self-control. From the daily incidents of life we learn our lessons; in fact, life is the only school where character can be cultivated. Some days we add a new fiber to our thread of efforts; now and then we make a mistake by speaking the harsh and hasty word, or, we may yield to the tempter, but, if we are watchful, sincere and determined in our purposes the mistake should always serve as a lesson and warning in the future. Each time the angry word is withheld or the appeal of Satan unheeded it means a step upward into a brighter and happier atmosphere.

Like Michael Angelo, who could make a thing of beauty from formless clay, we can change a vice into a virtue; like the artist, who carefully and patiently mixes his colors, and reproduces a life-like portrait, we can create a noble character by providently blending patience, duty and self-control; like the scientist, Luther Burbank, who exclaimed: "Why, oh, why are the human weeds not cared for so that the flowers in them will come out?" This man, by scientific research, studying the nature of each individual plant, weeding out the worthless and energy-sapping elements, and directing the useful ones along their proper course, can grow rare and fragrant flowers on the rankest weeds. Why can not the mental and spiritual man create a character that will be like a rose in the weeds of humanity?

Self-control is the first and most important step toward the formation of character. Without it man is like the Fuchsia vine planted in the center of a garden, deprived of trellis or wall, nothing to grasp within its outstretching tendrils to help it grow upright and upward and display its usefulness and beauty, it loses its dignity, and crawls along the ground and "just grows." Self-control is the regulating valve of passions, quick temper and irritability; it thwarts their maturity and eventually turns this misdirected energy into channels of firmness, resolution and fortitude.

Patience goes hand in hand with self-control. There may be many failures and other obstacles in the path of this much-coveted goal, but the road is smooth and straight for those who have practiced or who are gifted with patience.

Cheerfulness is a habit and can be cultivated and acquired. Every little act or duty should be performed in a spirit of cheerfulness; a task seems a pleasure when done under its influence; it leads to happiness and happy thoughts, and these are the roses scattered along the walks of life. The time for planting such seed in the garden of thought is Now; the blooming season is perpetual, and the crop is exuberant.

Work means character-building. There is nothing we can get from books or bottles that will make perspiration come to the brow. Work aids digestion and causes deep breathing; deep breathing builds up the lungs; large lungs force out the chest and shoulders; all this leads to health, another essential to character.

Kindness is elevating, and is a virtue that appeals to the heart. To speak the kind word or lend a helping hand whenever an opportunity presents itself, however small the act, in word or deed, it sounds a chord whose vibrations are reverberated by all within its influence.

Do not neglect your duty, and above all, the duty you owe yourself, that by systematic discipline and drill you can construct an armor that is impregnable to all impulses—passions, ignobility and immorality. Be you never so poor, do not despair; there are many men who are considered great in the world's estimation who have no other asset but their character. And as yet no trust has succeeded in monopolizing any one of the raw ingredients used in the manufacture of this valuable article called Character.

Try these:

Self-Control, Patience, Kindness and Duty.

ADDITIONAL EDITORIAL NOTES.

Holding your mouth open under a tree loaded with luscious, ripe pears, will never fill your mouth with the fruit. You must shake or club the tree.

Do not wait for some one to club the tree for you. Every one has his own tree to club.

If you have two presses, one busy and the other idle, and you are barely making a living, that idle press holds the ripe fruit of profit and gain. Plan to set the idle press to running. There is scarcely any end to the demand for bright, attractive printed matter or for winning advertising novelties. If you have only half the advertising that your paper should carry, club vigorously the trees of business enterprise in and out of your community and fill up that unused half of legitimate advertising space.

This world is filled with people who are holding their mouths open to receive the fruits that are above or about them and they mistake their readiness for enterprise or as doing their best and then growl of ill luck and of not being appreciated or of not having any chance or opportunity. They are always complaining because some one else does not club the tree for them. They feel that they are better prepared and more worthy of the fruits than hundreds of others who have secured all that heart could wish, yet they are still hungry and forgotten. These should find clubs to knock down the fruit and use these clubs vigorously. Honest, persistent, intelligent advertising is one of the effective clubs by which the fruits of business are made to fall into your basket and another is direct solicitation by letter and by personal appeal. It is pretty generally conceded that one who skillfully and industriously seeks business is worthy of it and will energetically attend to it when once won.

* * *

The U. S. Department of Commerce and Labor solicits the co-operation of manufacturers and other persons interested in an effort to extend the foreign business of the United States. In furtherance of this work it is proposed to establish a comprehensive card index which will enable the department, upon application, to furnish information desired by manufacturers or by intending purchasers, and it is contemplated to extend the system if the necessary authority shall be granted by Congress to our principal consulates.

To this end John M. Carson, chief of the Bureau of Manufactures, Washington, D. C., asks for names and addresses of firms and companies, location of branch establishments, description of products, capital and capacity of output per day, month or year.

* * *

The *News-Tribune* of Austin, Texas, has incorporated under the name of the News-Tribune Publishing Company, with a capital stock of $10,000. On the first of September the company moves into a new building, equipped with an entirely new outfit consisting of two linotype machines, an ample supply of type, a splendid press and all other necessary equipment and materials. The officers of the new company, on completion of the organization, rightly informed the public through the columns of the *News-Tribune* "that they will put forth every effort to give the people of Austin and Travis county the best and most reliable newspaper ever published. The editorial policy will be, as heretofore, fearless, honest and independent.

"This paper aims not only to be the best news medium in Austin, but the most profitable advertising agent. With a circulation already larger than that of any other local paper and a systematized plan for further increasing it, the management assures the business men that this paper is by far the best place to get results from advertising."

These are important items for the public to know. Fearlessness, honesty and independence are the most winning qualities of a modern newspaper and the adherence thereto is the very best business policy, however difficult. To advertise in your own paper vigorously is another commendable point.

* * *

The Missouri State University stands well at the front in giving practical education, as the readers of the NATIONAL PRINTER-JOURNALIST were fully informed a few years ago through an extended illustrated article. It is now proposed to take up a course in newspaper making.

Walter Williams of Columbia, Mo., and Dr. J. C. Jones of the board will arrange a series of lectures on newspaper making which, it is hoped, will include addresses by several prominent American editors. The making of a great modern newspaper, covering all branches of the work, will also be explained in other lectures. The necessary appropriation for the school of journalism was made by the state legislature last winter.

* * *

Some Officers and Past Presidents of National Editorial Association in front of Convention Hall, Guthrie, O. T.

Every local paper should have its county so well organized, and should have all the facts with regard to everything connected therewith, its settlement, history, resources, geography, its conditions, its people and its schools, so in hand as not only to be able to give all current events, but to supplement these at once with all interesting facts, incidents, and traditions. One event may give life, by its relation to other things, to a most entertaining story that comes naturally as a part of the news. There is nothing like a system of reference, scrapbooks of past important local events, local statistics, biographies, births, deaths, marriages, removals, and the like. The memory cannot be taxed to carry these things, that may become important at any minute, and the searching through the files of a newspaper is too uncertain and too laborious. There must be system and a generous expenditure for a system will not only save much time and money but will pay a hundredfold in results.

Wants and For Sale.

Advertisements will be inserted in this column at the rate of 25 cents a line, ten words to the line. Copy must reach this office no later than the 20th of the month preceding date of publication. Cash must accompany order.

HELP WANTED

WANTED—All round printer to act as foreman in weekly newspaper office doing good job business in city of 5,000 in Central Ohio. Must be good job compositor and able to handle cylinder and Gordon presses. A steady position and good wages to the right man. Married man preferred who is now employed in small city office on both composition and press work. Write at once, stating salary expected and when you can come. Address FOREMAN, care NATIONAL PRINTER-JOURNALIST, Chicago, Ill.

BUSINESS OPPORTUNITIES

A BARGAIN—A cash buyer with $800 can get a real bargain in the *Valley Voice* office at Muscoda, Wis. This property has been placed in my hands and must be sold. It is a well equipped country office, material nearly all new and in good condition. Just the proposition for a practical newspaper man with limited capital, who is willing to settle in a thriving town of 1,000 population. Address all inquiries to F. F. WHEELER, Atty., Muscoda, Wis.

WANTED—To buy interest in daily paper in live town of 50,000 or under; 8 years' experience on large daily in town of 150,000. I have made special study of circulation, advertising and office management; best of references, including former employer; college education; 29 years old; married. Address "THOROUGH," care of NATIONAL PRINTER-JOURNALIST.

FOR SALE—PRINTING MATERIAL

ELECTRO COPPER-FACED TYPE. Empire Type Foundry, Delevan, N. Y.

FOR SALE—Two Revolution, back delivery press made by C. Potter, Jr., & Co.; four form rollers; measurements of bed between bearers, 54x40; will take form 38x52; rack and screw vibrator; table distribution; three tracks; overhead steam fixtures; eight roller stocks and four angle rollers; in good condition; a bargain, if taken by October 1st. Address "R. P.," care of NATIONAL PRINTER-JOURNALIST.

PRINTING PRESSES FOR SALE—Second-hand, 43x56 Cottrell Two Revolution, 44x60 Potter Two Revolution, 43x56 Campbell Two Revolution, and several Drum Cylinder and Pony Presses at very low prices. Address "CHASE," 1417 Commonwealth Bldg., Philadelphia, Pa.

MISCELLANEOUS

A MONEY-MAKING SYSTEM FOR THE EMPLOYING PRINTER. A handy little volume describing a simple, economical, yet practical and comprehensive system for ascertaining the cost of printing. This system has been tried and is adaptable to large and small printing and manufacturing plants alike. Illustrates full blanks for all departments along with bookkeeping system for business office; 125 pages, 4½x7 inches, cloth, $1.00. NATIONAL PRINTER-JOURNALIST, Station X, Chicago, Ill.

THE VAN BIBBER ROLLER CO., Sixth and Vine Sts., Cincinnati, will give you *the best rollers* that can be made for any season or press. Our facilities are the best, and we use the latest Gatling Gun and compressed air apparatus. It pays you to have good rollers, and they count more in presswork than anything else. In writing or shipping, "Cincinnati" is sufficient. Everybody knows us.

ANYBODY CAN MAKE CUTS with my simple transferring and etching process. Nice cuts, from prints, drawings or photos, are easily and quickly made by the unskilled on common sheet zinc. Price of process, $1. All material costs at any drug store about 75 cents. Circulars and specimens for stamp. THOS. DAY, Box P, Windfall, Ind. My Simplex Mailer only $2.50, send for circular.

A COLD SIMPLEX STEREOTYPING OUTFIT, $17.00 and up, produces the finest book and job plates, and your type is not in danger of being ruined by heat. Simpler, better, quicker, safer, easier on the type and costs no more than papier-mache. Also two engraving methods costing only $5.00, with materials, by which engraved plates are cast in stereo metal from drawings, made on cardboard. "Ready-to-use" cold matrix sheets, $1.00. Come and see me if you can; if not, send postage for literature and samples. HENRY KAHRS, 240 East Thirty-third Street, New York.

¶ It is the printer who often spends a day cleaning his press with sand paper and benzine with whom we want to talk about SOLVINE. We carry two grades,

SOLVINE AND SOLVINE "H"

The latter works the more rapidly of the two, but must not be used upon **composition rollers,** for which the former, our regular Solvine is prepared.
¶ These are not cleaners that supplant benzine, but mediums that cut the dried up ink and bring it to such a condition that it can be easily washed away with the regular cleaners used in pressrooms, and they accomplish it without injury to rollers or forms.

ABC BLACK

Of late years there has been a large demand for an

All around Book and Cut **BLACK**

suitable for general book, catalogue, circular work, etc., for type, cuts and half-tones on cylinder presses; a black which is lustrous, dense and strong in color, yet free-flowing and good-working, that dries readily when printed but not on the press, and is withal moderate in price.

WE HAVE JUST SUCH A BLACK

We have sold tons and tons of it, with such great satisfaction to all purchasers that we have decided, in order to introduce it generally and rapidly to 100,000 pounds of it, and offer it while this supply lasts, at the following prices. It is our

ABC BLACK

ABC Black in barrels containing about - - 500 lbs. each 18 cents per lb.
ABC Black in half barrels containing about - 250 lbs. each 19 cents per lb.
ABC Black in quarter barrels containing about 125 lbs. each 20 cents per lb.
ABC Black in kits containing - - - 50 lbs. each 22 cents per lb.
ABC Black in kits containing - - - 25 lbs. each 24 cents per lb.
ABC Black in case containing 12—10 lb. cans or 120 lbs. each 22 cents per lb.

50,000 pounds of the above will be for sale at our factory, the other 50,000 pounds will be distributed from our Chicago branch.

The **ABC Black** will be furnished only in the above packages. Prices f. o. b either New York or Chicago—terms 30 days net, no cash discount. We reserve the right to limit the amount sold to any one customer, and to reject future delivery orders.

Second Order for Printers' Account Book

The following is the second order received from the Trade Journal Press, San Francisco, for the Printers' Account Book.

San Francisco, Aug. 5, 1905

National Printer-Journalist,
Dear Sirs:

We are in need of another Printer's Account Book and would be pleased to have you send one to us at your earliest convenience as we are very much in need of one. Enclosed please find our check for $3.50, which is the price of the 200-page book and the one we want.

We are yours respectfully,
Trade Journal Press.

THIS Book saves time and money; a system for entering jobs, keeping a record of paper stock, cost of all labor and material.

If a job is done for a customer, and he orders it duplicated in a week, a month or a year afterwards, you can instantly turn to your Account Book, which gives you every item of information in connection with doing the work in the first instance, even to a memorandum of where the material or paper was purchased, the grade, size and weight of the stock and how it cut, and shows how much money was made or lost in the first instance.

The Printers' Account Book is 11¾ x 15¾ inches. Price of 200 page book, 1000 jobs, $3.50; 2000 jobs, $5.00.

National Printer-Journalist
Station X, Chicago, Ills.

The Cottrell High Speed Two Revolution Press

Specially designed for the exacting demands of three-color printing where perfect register is absolutely necessary. New features have been added for facilitating the production of the finest work.

¶ The press is furnished with our Patent Convertible Sheet Delivery which can be set to deliver the sheets printed side up, or it can be changed to the regular fly delivery in five minutes time. The convertible delivery is operated by a variable speed crank motion which dispenses with the fly spring, thus saving the power required to compress the spring, at the same time making the motion more simple and convenient.

The RELIANCE LEVER CUTTER

BUILT FOR QUALITY

Strictly Interchangeable. No Adjustments.

Made in Four Sizes

Below We Give a Few Points of Distinctive Construction.

THE arch is secured to the side-frame by means of dowel bolts—that is, the shoulders of the bolts are turned to fit snugly, and extend through arch part way into the side-frame, forming dowels. The ends of the arch clasp the the entire surface of the side-frame tops, further insuring rigidity.

The lever system is simple and unusually powerful. The Lever is closer to the side-frames than in other cutters and is, therefore, more rigid.

Besides the interlocking back gauge and clamp, the cutter has side gauges front and back of knife, adapted to narrow and accurate cutting.

¶ Absolute register and perfect distribution can be assured upon a Hoe Stop Cylinder Press. There are some jobs that require double rolling upon a 4 roller two revolution that can be satisfactorily run upon a six roller Hoe Stop.

¶ In a battery of four or more modern presses doing fine printing, a Hoe Stop will more than hold its own as a profit bearing proposition. High grade work cannot be fed to register beyond the capacity of a Hoe Stop.

¶ This press has six form rollers with vibrators and riders, table and cylinder distribution, roller trip, tapeless delivery, four tracks, is thoroughly built from base to feed boards. Will be erected upon your floor at our expense upon sixty days trial for $1500 (cost new $4500) with the understanding that it is to fulfill our guarantee in every particular.

PHOTO-ENGRAVING PLANTS FOR NEWSPAPERS

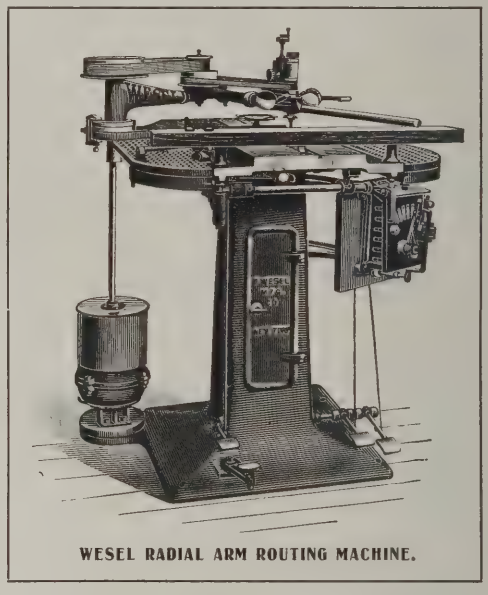
THE almost universal use of hand cameras makes it possible for the publishers of small dailies and weeklies to greatly increase their subscription lists, prestige and profit, through the use of illustrations.

¶ All publishers are a unit in agreeing that the use of illustrations will build up the subscription list.

¶ The machinery and appliances necessary in a half-tone newspaper plant are not numerous; neither are they expensive.

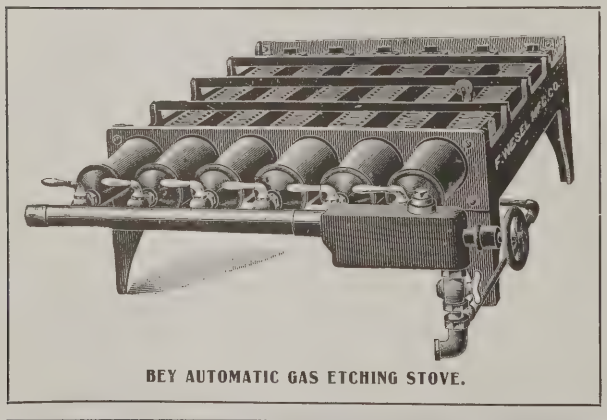
¶ We have made a specialty of providing such plants to newspapers, and their installation has always more than met the expectations of their purchasers.

¶ What is good for the big newspaper is apt to be very good for all newspapers, and a complete working photo-engraving plant for the small daily or large weekly can be installed at a



WESEL RADIAL ARM ROUTING MACHINE.

VERY SMALL INVESTMENT



BEY AUTOMATIC GAS ETCHING STOVE.

¶ We publish a separate catalogue devoted to Photo-Engraving Machinery and Supplies which we would be pleased to forward upon request. We would also be pleased to submit estimates for complete plants upon receipt of specifications giving size of largest plate desired, whether for half-tone, line work, or both, and whether any metal-working machinery is being used by the inquirer.

PUBLISHERS PRESS

ALWAYS PROGRESSIVE—ALWAYS ALERT

WHY NOT HAVE THE NEWS OF THE WORLD IN YOUR OFFICE AS SOON AS IT HAPPENS?

YOU CAN BEAT THE OTHER FELLOW IF YOU GET OUR TELEGRAPH AND CABLE SERVICE

We Beat All Rivals in Announcing the Portsmouth Peace Compact

The PUBLISHERS PRESS scored a signal triumph over its rivals in heralding the news that a peace understanding had been arrived at between the Russian and Japanese envoys at Portsmouth fully ten minutes before the Associated Press and other associations. The Publishers Press is a young and vigorous news gathering association that is striving at all times to be first, and its enterprise has brought it many notable victories over rival associations. Its growth accordingly has been steady and it is now in position with characteristic enterprise to outstip its competitors at all points in supplying a comprehensive news service.—*Rochester, N. Y. Times.*

London, Aug. 30—The Evening news, commenting on the achievement of the PUBLISHERS PRESS in getting the first news of peace to Europe, says to-day: "The news of peace was first made known in London by the Exchange Telegraph Company. Great praise is due to its alert correspondent across the Atlantic in disseminating the good tidings."

HAMILTON'S
Modern Printing Office Furniture

SPEAKS FOR ITSELF IN EVERY QUARTER OF THE GLOBE

Who Uses It?

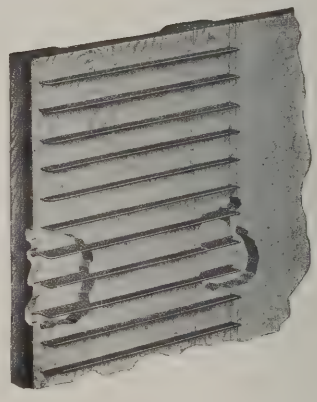
A Complete Catalogue of Modern Printing Office Furniture will be sent to every printer who asks for it.

Every printer has some of it, and most of them have no other. If you look in any printing office, from Buenos Ayres to Nome, Alaska, you will find Hamilton's Printing Office Furniture in use. From San Francisco to New York City, throughout England, France, Germany, South Africa and Australia, our Furniture is the standard by which the other makes are judged. Such a reputation could not have been acquired by any but honorable means. Merit and Progress have been our watchwords and a glance at our catalogue will show the many articles of printing shop furniture recognized as standard which originated with Hamilton

HAMILTON'S STEEL-RUN STANDS

Are built with the Flat Steel-Run Construction—THE RUN THAT WONT COME OUT

NOTE THE CONSTRUCTION — Each run is set into the solid frame and securely locked in place at each end. We use the best quality of steel and it will stand any strain.



No. 23 Steel-Run Stand. Total capacity 36 cases.

These stands provide a gain of 25 per cent in case capacity over any other style and allow the job and news compositor to work at the same stand without interfering. They are built of selected hardwood, oak finish, securely bolted together, making them as strong as any cabinet.

THE MONOTYPE

MR. ROOSEVELT DECIDES THE MONOTYPE-LINOTYPE CONTROVERSY

THE President Sanctions the Act of the Public Printer in Purchasing for the Government Office 72 Additional Monotype Machines. Claims Made by the Linotype Company in Its Petition to the President, Praying that the Order Be Rescinded, Fall to the Ground, and the Order Stands. Experts Demonstrate that While the Linotype Is Essentially a Machine Useful for Newspaper and Kindred Work, THE MONOTYPE Alone Is Adapted to the All-round Needs of the General Printing Office.

AS TO THE REASONS OF THE PUBLIC PRINTER FOR EXCLUSIVELY PURCHASING MONOTYPES, THERE APPEARS IN THE OFFICIAL RECORD OF THE INQUIRY HIS LETTER OF RECENT DATE, ADDRESSED TO THE LINOTYPE COMPANY, IN WHICH HE SAYS:

> *"There have been, since the early days of autumn last year, forty-"six (46) Mergenthaler Linotype and twenty-eight (28) Lanston "Monotype machines in continuous use in this office. A record of "the output of both classes of machines has been carefully kept, and "that record shows the superiority in quality, quantity and economy "of the Lanston Monotype over the Mergenthaler Linotype "machines. Accordingly, a contract was executed, on the 19th "instant, with the officers of the Lanston Monotype Company, for "seventy-two (72) machines.*

THE BATTLE of the Composing Machines having been won by the Monotype, and its superiority for the purposes of the Government determined in the Government's Office, the following brief history of the contest will be of interest:

In the history of printing probably there is no more brilliant chapter than that which deals with the invention and introduction of the Linotype machine, and its early triumph in the newspaper field.

That the material growth which has marked the newspaper industry during the past decade in no small part is due to the genius of Mergenthaler and his associates, cannot be denied; and if the fame of his machine be permitted to rest alone upon the fact of the invaluable service which it has rendered the industry of journalism, then the place of the Linotype in history is fully assured.

This position of supremacy in the newspaper world was not achieved, however, without effort or the necessity for constant warfare. Beset by serious mechanical defects, by the opposition

of organized labor, by threatening rivals in its chosen field, the Linotype, in common with all other great innovations, had its periods of stress and strife. But eventually, because it was logically adapted to the needs of the newspaper, it won out; and within an incredibly short space of time placed almost every newspaper in the United States under the necessity of paying it tribute.

From the dream of a maker of clocks almost in a night this enterprise had sprung into a huge monopoly, operating in one of the nation's most important paths of activity.

But at this point, out of the very fullness of its success, arose its danger. So rapidly had the Linotype filled the huge demand which was found to be awaiting it in newspaper offices that the confines of its natural field soon were seen to be approaching; and those in charge of its destiny realized that unless it could be forced into new channels of trade the demand for it in large numbers shortly would cease. This compelled a sudden about-face, and, calling it a book-and-job machine, it was presented to printers of books, of catalogs, and of miscellaneous things, as being adapted to the nice requirements of their work. But to justify such a statement was a difficult matter.

During the years that the developers of the Linotype were fitting it to the rough-handed requirements of the news printer, another man, Lanston, was at work. For him the problems to be solved were not the coarser ones of the news office, but the finer, the more delicately intricate ones of the book-and-job office. How best could he bring to bear mechanism which should be accurate enough to reproduce the type of the high-class foundry, and flexible enough to cover the range of everything, from a solid, cleanly set page of individual type to a complex statistical table?

So, side by side in point of time, worked Mergenthaler and Lanston; the first aiming at the near-by and more easily to be attained mark of setting a newspaper; the latter at the more difficult one of setting everything that could be put into type.

How Mergenthaler succeeded and occupied his field is a bit of the history of the past decade; but the success of Lanston in his Monotype is so recent, and so happily does it satisfy the urgent requirements of the day, that the performances of his remarkable machine must be considered a current topic, and treated as such; as also must the phase of its progress which is marked by the warfare that has been waged against it by the Linotype interests.

When, three years ago, as a commercial machine, the Monotype was first presented to the trade, it was promptly met by the Mergenthaler Company and singled out as a dangerous competitor. For, it was seen, this new machine had expressly been built to supply the wants of the general printer, while the Linotype—in itself but a converted newspaper machine—could neither lend itself freely to the prevailing practices of general printers, nor flexibly or profitably to many varieties of their work. This fact, and the other, that the Mergenthaler Company, largely having outgrown its original field, had come to depend for its business upon the general printer, lent a desperate nature to the defense which it was compelled to make; and seemingly required of it that all means be resorted to which would tend to defeat or delay the introduction of the versatile and therefore dangerous Monotype.

The campaign of bitter invective and misrepresentation upon the part of the Mergenthaler Company which ensued is a matter of too wide knowledge to require more than a passing reference; and it should not be mentioned here but for the need of a background upon which to set off the last, the supreme, the most desperate, effort of the Mergenthaler Company to break the hold which the Monotype has obtained upon the printing trade, and to retake for itself sufficient ground to enable it to continue to claim for its machine a place in the general commercial printery.

With merely a glance at the progress of the universal adoption of the Monotype during these three years past, in which, almost as a body, and despite the most determined opposition, the more progressive commercial printers have taken up gladly and accepted the machine, we pass to the decisive test of the old by the new which the Mergenthaler Company so desperately sought to avoid—the competitive trial of the two machines under the rigid auspices of the Government.

THE MONOTYPE

During the winter of 1903–1904 the Public Printer took under consideration the installation of typesetting machinery. A committee appointed by him, having made an investigation of the commercial uses of the Linotype and the Monotype machines, recommended that both be installed—an outcome for which the Monotype Company had persistently struggled, but which had as fiercely been resisted by the makers of the Linotype.

As a result, forty-six Linotypes and twenty-eight Monotypes were ordered by the Government, and the scene of the battles of the old against the new machine was transferred from the field at large to the floors of the Government's printing establishment.

Here, now, were lined up the machines of both competitors in the place where, all knew, their decisive ratings would be determined by actual day-in-and-day-out performance. By their respective records for quality, quantity, economy, and dependability of operation, impartially kept under exacting conditions, were they to be judged.

As to the outcome of this period of trial, which extended over many months, the official statement of the Public Printer, as made to the Linotype Company on June 21, is:

"There have been, since the early days of autumn last year, forty-six (46) Mergenthaler Linotype and twenty-eight (28) Lanston Monotype machines in continuous use in this office. A record of the output of both classes of machines has been carefully kept, and that record shows the superiority in quality, quantity and economy of the Lanston Monotype over the Mergenthaler Linotype machines. Accordingly, a contract was executed, on the 19th instant, with the officers of the Lanston Monotype Company, for seventy-two (72) machines. The testimony upon which this contract was based, furnished as it was by daily observation by practical employees in this office, was of more value than any which could have been furnished from outside sources."

It now becomes apparent why the Mergenthaler Company shunned the test for which the Monotype had been waiting; and why by every means in its power, political and other, it had sought to shut out of the Government office, where all records were public, the one machine it had reason to fear.

Stung by the comparative showings of the two machines, which it had not been able to prevent, and by the resulting contract; and filled, apparently, with the hope that through its political connections, and by reason of its standing in the financial world, in the eleventh hour it would still be enabled to strike from its young competitor the award of superiority which had been fairly earned, the Mergenthaler Company took to the President of the United States heated charges against the transaction in general and the Monotype machine in particular, and asked of him that the contract summarily be revoked.

To this the President responded by ordering a reconsideration of the whole matter; and a Committee already in existence for purposes of departmental investigation was charged with the work. Before it appeared representatives of both companies and, generally, the staff of the Public Printing Office.

After three weeks of labor, during which daily sessions were held and minute consideration was given to all factors which had entered into the tests of the two machines, a report of the findings of the Committee was presented to the President, and upon its receipt Mr. Roosevelt promptly sanctioned the act of the Public Printer, and ordered the contract to stand.

In view of the definite position of superiority in which this decision has now placed the Monotype machine, little more need be said by us in its behalf; and we close with the observation of this simple truth: *The Linotype succeeded in its particular field because the slug was adapted to newspaper work; and so, by the same token, does the Monotype succeed in its especial province because the principle of the employment of individual type is the only one logically adapted to the requirements of the general printing office.*

MANKATO, MINN., July 7, 1905

DUPLEX PRINTING PRESS CO., BATTLE CREEK, MICH.:

Gentlemen—We are receiving a great many inquiries from printers throughout the Northwest, asking us how we like the Duplex Press. We answer them about as follows:

We believe the Duplex to be one of the best newspaper presses on the market to-day for a paper with a circulation not exceeding 15,000 copies. Our press gives no trouble whatever, and is operated by a young man about eighteen years of age, who handles it to perfection.

When we purchased the Duplex, less than a year ago, we had a circulation of 2,200. To-day we are running 4,300. We do not give the press credit for all of this, but believe it has done its share towards the increase in our circulation. One reason for this is, we get our paper on the street and into the hands of subscribers from one-half to three-quarters of an hour before our contemporaries.

We find there is much less waste in the roll paper than in the flat, and, we can also buy it for a little less money.

If you have any inquiries, we give you the liberty of making the above statement.

Very truly yours, FREE PRESS PRINTING CO.
F. W. HUNT, MANAGER

BE A 20th CENTURY PRINTER

UNITED PRINTING MACHINERY COMPANY

A Company organized to manufacture and sell machines and appliances for reducing the cost of production of printing.

AUTOMATIC TYPE MACHINE.

Leased to printers (30 years, $2000), for making their own type from 6 to 36 point bodies; matrices ready for sale or rent for nearly all the standard and popular type faces and borders. The cost of type is about 6c. per lb., plus metal.

DUX FEEDING MACHINE.

The lowest priced feeding machines; effective on long and short runs of all sizes and kinds of paper.

AMERICAN ROLLER WASHING MACHINE.

A machine for washing rollers for cylinder presses. A great economizer in offices running five presses or over.

VICTOR STEEL DIE EMBOSSING PRESS.

Used by the leading steel die printers. Price reduced.

STEEN POWER COMBINATION PUNCH AND EYELET MACHINE.

The only machine that punches and eyelets at one feed. Price reduced.

SPARKS ROUND-HOLE MACHINE.

A small machine, using ⅛h.p., that does the work of five $200 punching machines, and better work.

SPARKS SLOTTING MACHINE.

Cuts slots in loose leaf paper, and card work of all kinds.

SPARKS CRIMPING MACHINE.

Crimps the binding edge of loose leaf papers, completing the operation without pressing.

DUNNING DECKLE EDGING MACHINE.

Puts a deckle edge on any kind or size of paper, after the printing. Cost of deckle edging is nominal.

MALEY IRON REGISTERING BLOCK.

Holds all sizes and shapes of electrotypes, registering them quickly and absolutely.

ELLIS FAC-SIMILE TYPEWRITER RIBBON HOLDER.

A small device ($10.00) for holding a typewriter ribbon on any job press, producing a perfect imitation of typewriter effect from type.

TYMPALYN.

A woven wire blanket filled with rubber, for use on printing press cylinders, resulting in a saving of one-third the time of make-ready.

PRINTING MATERIALS.

Everything of iron, steel, copper brass or wood, used in a printing office, at lowest prices.

EVERYTHING FOR ELECTROTYPING.

We manufacture the celebrated machinery of Geo. E. Lloyd of Chicago, and Lovejoy & Co., New York.

EVERYTHING FOR STEREOTYPING.

In this we excel. Nearly all the machinery used by Western Newspaper Union, A. N. Kellogg Newspaper and American Press Association, was made in our Geo E. Lloyd factory in Chicago.

EVERYTHING FOR PHOTO ENGRAVING.

Complete plants, cameras, screens, lenses, etc., and all the machinery.

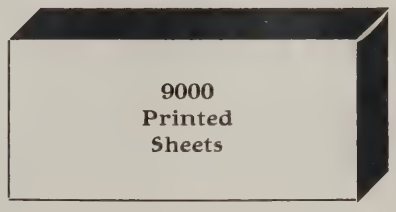
UNITED PRINTING MACHINERY COMPANY

CHICAGO: 337 and 339 Dearborn St. (E. C. Williams, Manufacturing Manager. B. O. Henning, Sales Manager.)
BOSTON: 246 Summer St. NEW YORK: 12 and 14 Spruce St. Factories at Chicago, Boston and Plainfield, N. J.

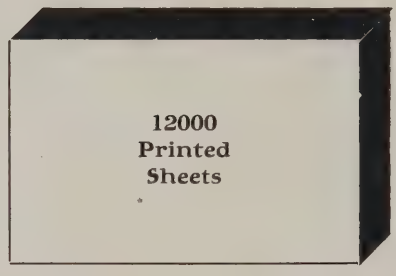
Everything for the Printer, Electrotyper, Stereotyper and Engraver.

Two Piles of Paper

Illustrating the Value of Increased Output



Pile from Press No. 1



Pile from Press No. 2

¶ These two piles of paper were printed, each upon a different make of press, in a nine hour work-day. The fixed charges for operating each press, however, were the same; that is to say, to pay the running expenses of each press per day, the same number of sheets had to be run, say 6000.

¶ Therefore the press that printed Pile No. 1 showed a net profit to the printer of 3000 sheets, while the press which printed Pile No. 2 showed a net profit of 6000 sheets.

¶ 100% increase of profit in favor of the press which printed Pile No. 2; that is to say, press No. 2 made double the money for the printer who ran it than press No. 1.

¶ NOTE THIS—We claim simply that the CENTURY will turn off a greater days work than any other press: and that it will make for you, double the money that most presses can.

¶ Remember it is the last few thousand sheets of a day's run that pay YOUR profit: the first thousands pay only your help and your expenses.

THE CAMPBELL COMPANY

HENRY A. WISE WOOD, President

334 Dearborn St., CHICAGO 1 Madison Ave., NEW YORK

THE LINOTYPE

OOK WORK OF HIGHEST GRADE, A SPECIAL FEATURE OF THE LINOTYPE

In its ability to produce composition perfect in alignment, justification, and height, with every character clear cut and new, the Linotype equals the highest grade of hand composition.

¶ Its extensive use in the most discriminating printing and publishing offices in the country is a proof of the high character of the work.

¶ The following pages from books composed on the Linotype and printed at the De Vinne Press are from subscription and de luxe editions published by Messrs. Harper & Brothers, Chas. Scribner's Sons, The Century Co., Doubleday, Page & Co., and others.

the condition of the royal treasury. He had reformed many abuses and opened many new sources of income. He had, of course, not accomplished the whole Augean task of purification. He was a vigorous Huguenot, but no Hercules, and demigods might have shrunk appalled at the filthy mass of corruption which great European kingdoms everywhere presented to the reformer's eye. Compared to the Spanish government, that of France might almost have been considered virtuous, yet even there everything was venal.

To negotiate was to bribe right and left, and at every step. All the ministers and great functionaries received presents, as a matter of course, and it was necessary to pave the pathway even of their antechambers with gold.

The king was fully aware of the practice, but winked at it, because his servants, thus paid enormous sums by the public and by foreign governments, were less importunate for rewards and salaries from himself.[1]

One man in the kingdom was said to have clean hands, the venerable and sagacious chancellor Pomponne de Bellièvre. His wife, however, was less scrupulous, and readily disposed of influence and court favor for a price, without the knowledge, so it was thought, of the great judge.[2]

[1] "Con tutti il ministri indifferentemente l' uomo si fa strada in Francia con quei mezzi che ormai mi pare che usino per tutto il mondo . . . il re medesimo lo sa e lo permette forse perchè profittando li ministri lascino di molestare la S. M. per altre ricompense del servizio che prestano ed essi per questa via pretendono riportare le giuste mercedi delle loro fatiche mentre veggono poter difficilmente sperarne altre dal re."—Ibid.

CONDUCTED to the ladies, at the Ship Inn, Dobbin assumed a jovial and rattling manner, which proved that this young officer was becoming a more consummate hypocrite every day of his life. He was trying to hide his own private feelings, first upon seeing Mrs. George Osborne in her new condition, and secondly to mask the apprehensions he entertained as to the effect which the dismal news brought down by him would certainly have upon her.

"It is my opinion, George," he said, "that the French Emperor will be upon us, horse and foot, before three weeks are over, and will give the Duke such a dance as shall make the Peninsula appear mere child's play. But you need not say that to Mrs. Osborne, you know. There mayn't be any fighting on our side after all, and our business in Belgium may turn out to be a mere mili-

be distinguished from others by his title as any man alive.

Oliver Cromwell was again returned for the borough of Cambridge. The extraordinary circumstance has been brought out that at the meeting of the Long Parliament Cromwell and Hampden between them could count no fewer than seventeen relatives and connections; and by 1647 the figure had risen from seventeen to twenty-three. When the day of retribution came eight years later, out of the fifty-nine names on the king's death-warrant, ten were kinsmen of Oliver, and out of the hundred and forty of the king's judges sixteen were more or less closely allied to him. Oliver was now in the middle of his forty-second year, and his days of homely peace had come once for all to an end. Everybody knows the picture of him drawn by a young Royalist; how one morning he "perceived a gentleman speaking, very ordinarily appareled in a plain cloth suit made by an ill country tailor, with plain linen, not very clean, and a speck or two of blood upon his little band; his hat without a hatband; his stature of a good size; his sword stuck close to his side; his countenance swollen and reddish; his voice sharp and untunable, his eloquence full of fervor." Says this too fastidious observer, "I sincerely profess it lessened much my reverence unto that great council, for this gentleman was very much harkened unto."

Another recorder of the time describes "his body as well compact and strong; his stature of the average height; his head so shaped as you might see in it both a storehouse and shop of a vast treasury of natural parts. His temper exceeding fiery; but the flame of it kept down for the most part, is soon allayed with those moral endowments he had. He was naturally

unless approached through a study of his character. We may begin by insisting that no one who has left sterling work behind him, not even Gray, had less of the professional writer about him than FitzGerald. He was a man of taste in easy circumstances, and until he was forty years of age he was nothing else whatever. After moving for a little while in the splendid constellation which revolved round Alfred Tennyson at Trinity College, Cambridge—where it is quite certain that FitzGerald adopted the friendships, the tastes, the intellectual proclivities, which were to satisfy him for a life-time—after this enchanted adolescence, to which undoubtedly we owe the whole of his later poetry, FitzGerald retired, in the strictest sense, to the country. His life became of a "gray-paper character"; he was given over to turnips. When other friends travelled to Spain, to Italy, to America, to India, FitzGerald was "pottering about in the midland counties of England." Here is his account of his adventures in his thirty-fifth year: "A little Bedfordshire —a little Northamptonshire—a little more folding of the hands—the same faces—the same fields—the same thoughts occurring at the same turns of road—this is all I have to tell of; nothing at all added—but the summer gone."

Thus, in what is called the prime of manhood, FitzGerald was dawdling through life, sedate, humorous and unambitious. To every appeal that reached him to come out into the arena of action, he responded with a dreamy negative. His mind seemed to have grown to be like one

A JOURNAL FOR PRINTING AND ALLIED TRADES

THE NATIONAL PRINTER JOURNALIST

Volume Twenty-two | Chicago, October, 1905 | Number Ten

THE EARLY DAYS OF NEWSPAPER MAKING.

ONE of the grand old men of this nation, whose influence has been felt through three generations, is Rev. Edward Everett Hale, of Boston, now chaplain of the United States Senate. We can but believe that his early connection with the newspaper press has had much to do with his broad and practical views of life as a preacher and public teacher. In the magazine of the Sunday *Record-Herald* of September 2 appeared an able article from his pen under the caption, "Early American Journalism," which will prove of so much instructive interest to all newspaper makers that we take the liberty of publishing the same here with due credit and with sincere thanks to that model American newspaper, the *Record-Herald*, of Chicago. The noble woman who worked the cradle with one hand while writing out copy for the paper with the other hand was helpmate, indeed, and a worthy mother of so noble a son. Dr. Hale writes:

My personal memories of American journalism run back to my father's printing office, when he was publisher and editor of *The Boston Daily Advertiser*. This was the first daily journal published in Boston, and from a very early period he owned the establishment. This was the fashion of those days. The publisher was the editor, the editor was the printer and publisher, in the stronger newspaper enterprises of the country. My father had not been trained as a printer, but had been a professor of mathematics at Exeter, had studied law and had been admitted to the Boston bar. But all the same he owned his printing equipment, as well for the newspaper as for an office that printed books. He introduced type-founding and stereotype work in New England, and what we then called power printing, meaning printing by water or steam power. Treadwell's power printing press marked an epoch in printing in America. Daniel Treadwell, the inventor, was my father's intimate friend, and he was glad to use Mr. Treadwell's inventions from the first.

My father was a hearty believer in the old system of apprenticeship, and brought up several fine young fellows who were always grateful to him when in their time and place they became leaders.

When I was a boy at school, I suppose in 1829, there appeared in *The London New Monthly Magazine* a bright poem on steam. One of the verses said:

> The newspapers our breakfast bless,
> No dinner talk unless we see 'em.
> "Ten thousand," says *The Times*, "our press
> Strikes off in three short hours by steam."

This was regarded as miraculous work in those times. My mother then took care of my school oratory and taught me to "speak the piece" on Saturday at school, with an alteration which said that *The Daily Advertiser* press "worked off two thousand copies by steam." This was considered a large circulation.

I wonder if the boys of to-day have such pieces to speak as we had then? Another of my addresses on speaking day was Wendell Holmes's spirited lyric which saved the Constitution frigate:

> Nail to the mast her tattered flag,
> Set every threadbare sail.

This belongs, I suppose, to 1830. It is mentioned here only because Holmes used to describe the eagerness with which he wrote the verses and carried them up to my father in *The Advertiser* office. And they saved the frigate, which the reader may see to-day. That was what a circulation of two thousand copies could do then.

The first newspaper in America had been *The Boston News Letter*, which from 1704 continued in one form or other till the Revolution. Its early rival was *The Boston Gazette*, which afterward was continued in various forms, and as *The Boston Commercial Gazette* was absorbed in *The Columbian Sentinel*, which in time became a part of the plant of *The Boston Daily Advertiser*. Indeed, my father eventually purchased all the newspapers which had existed in Boston when his career as a journalist began; so that he published *The Chronicle, The Patriot, The Gazette, The Repertory, The Weekly Messenger* and I know not how many others of the older journals. I remember that when I was old enough I hung up a good picture of Ben Franklin in the counting room and called him "our great apprentice."

All the journalism of those days, whether in Boston or in New York, bore traces of the distinctly mercantile origin of the newspapers. The very name of *The News Letter*, the oldest journal, points to this origin. The original *News Letter* was a sheet of foolscap paper of which two pages of printed news were first, the third and fourth pages being left blank for manuscript communications which a merchant liked to make to his correspondents. This custom descended to times quite late—is preserved, indeed, in some lines of industry to-day. Once a week the "price current" of every journal in a mercantile city was printed on a separate sheet in this way for the use of mercantile correspondents. Then, as now, the advertisements were a great source of revenue; and indeed in every way the wishes of the mercantile class as such were dominant in the preparation of the newspaper.

My father introduced into Boston journalism the "leader," written by some one in the office, expressing the views of the office. Before his time such expression of opinion was made by different correspondents, who would be known as "Cato," "Publius," "Junius," or the rest. I have always supposed that the name *Advertiser* on all American newspapers was borrowed from *The Public Advertiser* of London in which such letters of "Junius" originally appeared.

The finances of a newspaper published under such circumstances rested on its subscription list. Two thousand people, more or less, for whom *The Daily Advertiser* press "threw off two thousand copies" in less than an hour, were a coterie, as one might say, of Boston merchants who advertised in its columns, who relied upon its news, and who took their opinions, though they did not know it, from the editor. They

were a sort of family in which the editor was the "chosen vessel," whose business it was to keep them *au fait* on the wider relations of the world. If any important news fell in our way in the office, which could not wait, as the editor thought, till the next morning, it was put into type as soon as possible and the carriers were sent round with an "Extra" to our friends in the neighborhood.

I think my first personal touch with the politics of the day was on that Sunday in 1830 when I was told to take to my uncle Alexander Everett at his house on Summer street the "Extra" which described the three days of July in the Parisian Revolution of that year. We boys all regarded it as a sort of new Declaration of Independence. The memories of Lafayette were fresh, and we instantly hung out tricolored banners.

The dependence of America on Europe and European opinion was such as it is impossible to make any American now understand. You may buy a newspaper to-day in the Valley of the Mississippi, and perhaps it will not contain a word about England or France or Germany. If it does, it will be perhaps a word on their relations with Japan or Manchuria. But in the early half of the nineteenth century news meant largely European news. Bankruptcy or success might turn on one arrival from Europe. I recollect the traditions in our office of the arrival of the news of Napoleon's landing from Elba and the news afterward of the Battle of Waterloo, and I could tell a dozen instances of ruin to prosperous merchants which hinged on the announcement of victory or defeat published in one number of one newspaper.

The invention of the telegraph as applicable to the uses to which we put it to-day was as late as Morse's voyage across the Atlantic in 1832, when Charles Jackson told him of the experiments in that line which had already been made in Europe. The first real transmission of American news by telegraph was as late as 1844, so long had it taken Morse to perfect his invention and to persuade Congress to vote him money enough for a trial. It is curious to see that no private capitalist dared assist Morse in this adventure. Capital, as always, was timid and the Congress was in advance of Wall street.

Up till that time what we call telegraphs were akin to the flag telegraphic signal which now passes from one yacht to another; while the Napoleonic campaigns had introduced the semaphore, which figures in some of Dumas' early novels and did sometimes convey news to the French capital of matters at a distance. We had a semaphoric station in the outer harbor in Boston, so that the newspapers knew of the arrival of vessels in the offing perhaps some hours before the vessel arrived at the pier in Boston. But with that exception, an unimportant one, news came by the mail or by private hands.

Anybody connected with the press will see how the whole machinery of the newspaper varied from that of to-day. To take a single instance, the arrival of any newspaper, near or distant, in the office meant a possibility of news. In my early days in newspaper life New Orleans was ten or twelve days from us in Boston, yet to the leaders of our infant manufactures the news from New Orleans was important, as, by the way, it proves to be now when news from New Orleans can come in a minute. You did not put your paper to press, therefore, till somebody had looked at the New Orleans papers which had arrived at 9 or 10 o'clock in the evening by what we would call the "Southern mail." I was on night duty myself in 1838 and '39 when war was impending between Maine and New Brunswick, or between the United States and England, on the questions of handling of lumber in the valleys of the Aroostook and the Madawaska in Maine. We could not got to press till the arrival of the stage from Portland, a little before midnight, brought the letters from "our own correspondent" at Bangor and of the army at Maine up on the St. Johns River.

The reading of newspapers which was made necessary in this way amounted, in an office like that in which I was bred, to two hundred and fifty newspapers a day, and a little boy "tender," you might say, unfolded the newspaper and hung it on the back of a chair, and you read rapidly. I have read two hundred newspapers in four hours in my day, for somebody had to read or to look at each one of these journals.

"Our own correspondent," of course, played a much more important part than he plays today, unless his dispatch comes by telegraph. Each leading journal had a man of intelligence at each of the great seaports of the world—Singapore or Canton, or Bombay or Liverpool, and London, of course, and other such places. And their letters came, according to the foresight of the correspondent, by this or that sailing vessel. No one this side the Recording Angel knew whether that ship would have a good passage or a bad one—whether the letter to *The Journal of Commerce* in New York would get in ahead of the letter to *The Daily Advertiser* in Boston.

Steam navigation did not come in with any regularity till the voyage of the Sirius, which was a twenty-day voyage, I think, from Cork to Boston. As early as 1820 the Savannah had gone from the port of Savannah to Liverpool under steam. But the example had not been followed. Dionysius Lardner, who was a high authority in science, had ridiculed all the prophecies of transatlantic navigation by saying that they would not pay. Lardner knew as well as anybody knew that the thing was possible; but he said what was true enough, that the ships would have to be coal barges. But time runs more quickly than he thought. The Cunards made their contract with the English government in 1837, and were eager to fulfill it before their own steamers were completed. They therefore sent across the Sirius, which had been used in the Mediterranean trade, and she arrived in Boston on April 23, 1844, beating the Great Western, her competitor, by a half-day only, and the Great Western brought later news when she came than the Sirius. The Boston editors went on board the Sirius, and we welcomed the voyage, as we ought to have done, as an omen of an utter change in journalism.

While that change was going on, there were some critical moments. I think we used to say that the Great Western in one of her maiden voyages brought in news more than a month in advance of anything we had before.

It was a day or a night to be remembered when you sat with the other gentlemen of the staff writing the history of Europe for twenty or thirty days. You see you had no preparatory cable advices. Naturally you read the last papers first, and you worked back. But a journal was distinguished by the variety and correctness of its foreign news. Every leading journal of course had its London *Times*, its London *Chronicle*, its *Moniteur*, its *Journal des Debats*. But you had to rely quite as much on the skill of your news men in picking up the last paper printed which was brought over by any captain.

That is, you always needed to beat the mail. Your news collectors knew the captains; they kept on favorable terms with them.

You had a boat or two running backward and forward in the harbor to sight an incoming packet or other ship, to board her to see what she could give you. Or a friendly captain from Para or Buenos Ayres or Bombay sent a lad ashore before his vessel came up to the wharf, that he might bring you a newspaper quite in advance of the mail. Thus there was a sort of happy-go-lucky lottery business about it. You never went into the office without thinking that something might have turned up somewhere, a thought which came to you with dramatic vividness, which for some reason seems hardly to belong to the expected yellow newspaper dispatch of today.

There are dramatic situations today which belong to the world, when you recognize your son's voice though he is a thousand miles away. But there was another sort of incidents in those early days which we do not see in our twenty-story offices. In 1820 my father, while the editor of the *Daily Advertiser*, was a member of the Constitutional Convention of Massachusetts, a convention which was revising the constitution. He sat in his place, he took such notes as he liked of the speeches, and of course knew all the leaders. His house was a half or a quarter of a mile from the printing office. As evening approached the different chiefs gathered in his workroom there. At that moment he could not use his eyes, which had suffered from an accident, so that my mother, then twenty-four years of age, read and wrote for him.

She moved my sister's cradle into the basement room, and there she would sit when Mr. Webster and Judge Story and, I think, John Pickering, who was chief of our reporters there, made up the report of the convention for the day.

She would rock her cradle with one hand, while with the other she wrote to Daniel Webster's dictation; and the Colonel Phinney who afterwards figured in Massachusetts politics, or some of his mates among the apprentices, sat at the side of the room waiting to take the slips of copy down to the printing office as they were ready. When the convention adjourned she had a hundred or two of the epigrams of the constitution printed separately. She cut them out and put them in what where then called cockles in place of the verses which the confectioners had put there, and with these cockles she decorated a great convention cake which she sent down to the printing office for the men to enjoy together.

A little before, I can remember, my father's cousin, David Hale, moved into the city of New York, and with his partner, Mr. Halleck, established the *Journal of Commerce*. It is conservative enough now, and among those who swear by it are men whose heads have been whitened by the suns of two or three hundred summers; but it was a free lance then. It did

not pretend to be a political journal managing the politics of New York. It does not become me to speak of those politics either of this time or in another century. I will only say in passing that John Quincy Adams said in those days that the politics of New York were one of the devil's own unaccountables.

Hale and Halleck overstepped all partisan lines and made what was literally the *Journal of Commerce*. With them, I think, the dramatic scenes came in which belonged to the use of special news boats by the different great New York journals. There are traditional stories of news boats which ran more than fifteen hundred miles to sea and picked up information which they brought in triumph into the harbor so that their chiefs could say that no other paper had the news.

In those days expresses, run by the enterprise of separate establishments, came into being. Historically, the first great express in the history of the United States is that of the dispatch which left Brookfield in Massachusetts on the afternoon of April 19, 1775, was sent from post to post by the clubs of the Sons of Liberty, and arrived in Gadsden's hands in Georgia at the end of two or three weeks, having in its rapid flight awakened a nation which has proved to be an empire. It is interesting, by the way, to observe that literally every word in that dispatch was untrue, so far had the exaggerations improved upon the truth as it passed by word of mouth from Boston to Brookfield.

In later days there was room for private news to be sent by express messengers, and I suppose such things happened. But there was no Wall Street then, nor any stock speculation. It would happen, however, that some enterprising journal would send an express from New York to Boston, or the other way. I am sure that the first time I ever heard the great name of Cornelius Vanderbilt was when my father engaged from him a "Vanderbilt steamer," a new craft built by him, to carry our express on some occasion from New York to Norwich. It was said at the time, in the office, with bated breath, that she was steered by a tiller because the wheel had not been put in. And my early fancy imagined her as coming through Hell Gate and the Sound before she was painted. This was undoubtedly a boy's fiction. A messenger on horseback took her news from Norwich to Worcester, and somewhere between Worcester and Boston it was brought by steam again.

I do not know if the *Journal of Commerce* people will thank me for telling a story of a meek adventure of ours which did not succeed so well. A note came on from them to our office to ask if we would not send through by private hands the news which came by a Cunarder then due in Boston. It was not worth the expense of an express; but somebody had figured out the route of a carrier. I thought I should like the lark; I took the despatch and went by rail as directed to Springfield, where I took a pony-power boat to Hartford. Somehow I got to New Haven and took the night boat from there, which was to arrive at New York at four in the morning, and then I was to carry the news to the *Journal of Commerce* office, arriving two hours before the mail.

Alas for me and the *Journal of Commerce!* A heavy fog descended on New Haven harbor. My personal interviews with the captain, with promises of untold shekels if he would go out, did not avail. The fog did not leave; he did not choose to go till the next morning; and as I walked up the New Haven pier at about eight o'clock I had the mortification of hearing the newsboys announce "Here's your latest news from England!" The Stonington captain had been braver than the New Haven captain, and in my first express I arrived an hour behind the mail. And such things might happen for gain or for loss all the time.

My association with the first great northern election triumph—that of Harrison and Tyler in 1840—was of the arrival long after midnight in our upstairs office of a fine fellow who had driven with changes of horses in a pouring rain fifty miles or more with the votes of Ashburnham, Mass., in his pocket. He fished out the dispatch, and said for his first words: "I have tried to keep it dry." Think of this, young editors, when your telegraph brings in to you the whole vote of the State of New York before you go to the theater to see the last act of "Puritani."

The journal of today is comparatively indifferent to history. I wrote for a leading journal a few years ago some rather curious notes on Webster's early life and the possible changes in American history which might have followed had he returned from Portsmouth to Albany after he had entered Congress, instead of removing to Boston, as he did. But the editor, an up-to-date man, said promptly that this was history, that newspapers were not made for history but to reflect the present time. This is as if the stage, whose business is to hold the mirror up to nature, should rule out Julius Cæsar and Coriolanus and Hamlet and Richard, that it might give place to Ibsen's last or Bernard Shaw's or Mr. Jones's. I think the press is wrong about this today. As the same time, I can see that it makes a distinct difference in the make-up of the staff of the newspapers and in every daily issue.

The America of the first half of the nineteenth century was in a way much less dependent on Washington than it is now. When Samuel Hoar was turned out of Charleston by a mob in the autumn of 1844, he came immediately to the city of Washington. There he saw at once, of course, Mr. Winthrop, Mr. Grinnell and other gentlemen of the northern delegation. I saw the same gentlemen that morning, and wrote a letter to my father describing the event at Charleston. This letter was published in the Boston *Daily Advertiser* two days later. It then came back to New York, and this required another day, and then was printed in the New York newspapers, being the first announcement of this transaction which was made in this city.

Compare this against Newspaper Row in Washington at this time, where each leading journal maintains its staff of competent reporters, who telegraph to it the information in the city minute by minute. I do not think in 1844 any New York journal had a regular correspondent in Washington.

To sum up in one word these random recollections, the old era of journalism ended and the new era began with the telegraph. Admiral Remey once said to me that every weapon of offense used in the navy in 1865 had been thrown aside as useless in 1900. I might say that every tool used in a newspaper office in 1840 is unknown there today. For I was writing with a quill pen the other day in the Palmer Station, and a gentleman came to me and asked if he might see me write, for he had never seen a quill pen before. Even the paper is changed. The experts tell me that all the newspapers of the present day will be illegible in 2005 because this wood paper will have dropped to pieces. Thus does time bring its revenges.

Compared with the work of the first half of the century, the work of today in a newspaper office is, of course, different from end to end. The great central moment which marks the change was that of August 13, 1858, when the first pulse of the cable from Valentia in Ireland was reflected on the coast of Newfoundland. De Sauty was the Newfoundland operator, and for the time was regarded as a sort of myth. When in the *Advertiser* office they announced the success of Mr. Field's telegraph their editorial took the title De Profundis Te Deum.

* * *

SPURIOUS UNIONISM AND BRIBERY.

A Correspondent Tells how some Pressmen Secure Graft.

Mr. B. B. Herbert, Editor NATIONAL PRINTER JOURNALIST, Chicago, Ill.

Dear Sir—I write to express my unqualified indorsement of your editorial on unionism, in your issue for September. (Page 643.) I heartily agree with your sentiment that unionism as now controlled is directly antagonistic to free government and personal liberty, and that the question "involves personal rights of freedom of contract, freedom of labor and of using one's own, without interference, intimidation or molestation either as to person, property or reputation."

I have been a publisher, employing printers and pressmen for the last nineteen years, and have never had any friction with unions until this month. I have run an "open shop" all the time, buying labor as I buy paper, paying market price according to the grade of goods I was getting. I have never asked a "walking delegate" for his advice in the conduct of my business, but have dealt directly with my employes as man to man. Every typesetter in my employ has been with me for years. They are at liberty to seek other employment if they can better themselves, yet they appear content.

A year ago we bought a rotary perfecting press to do our own presswork, and two months ago we added a flatbed to do color work for our periodical. We require high grade presswork, and therefore have sought thoroughly competent help.

In hiring our head pressman we did not quibble about wages a minute; our concern rested first on his competency, second on his reliability for faithfulness to our own interests, third on his honesty. As to his competency we got sufficient

evidence. We asked him what wages he wanted, he named his price and we accepted it as he proposed. We explained that ours was an open shop and that we would not hire a union man as head pressman therefore feeling that a unionist at the head would be biased against free labor, or non-unionism. He agreed to remain out of the union here, although stating that when he worked in Chicago a few months he had been forced into the union against his desires.

We further explained that the manager would do the buying of all ink and other supplies, and that there would be no perquisites or bribes for the pressman.

That was when the manager was at least one year younger than he is to-day, and thought he could easily control the ink-graft by having all ink supplied unlabeled and denying access to the pressroom to all ink representatives. He has been more or less suspicious that his "system" of self-protection was not without possible leaks for some time, but about three weeks ago had these suspicions confirmed in a surprisingly direct manner.

Shipments of ink from five or six of the most prominent factories in America have been rejected as unfit for our rotary and have been returned. But while the manager was "tearing his hair," figuratively speaking, over some atrocious results from accepted ink for the flatbed, a representative of a well-known ink firm entered the office.

We had bought some lots of ink from this firm, but had not used its ink for three or four months, as we had settled down on another ink which was proving fairly good and we were too rushed to experiment.

When the representative entered the private office of the manager, therefore, he expressed gratification at getting an audience, for, he said, he had been trying for three months to get an opportunity to show the manager a letter, which he thereupon presented.

It proved to be a pen-written letter in the familiar handwriting of our pressman, addressed to the ink company. It stated that the manager refused to allow inkmen into the pressroom, but that they certainly knew that the pressman understood better than the employer the kind of ink any press needed, and that the next time their representative came to town he should come to the pressman's home and there would be no doubt the matter could be arranged. The letter closed with the significant words, "You're on."

The disclosure of the perfidy of a trusted employe hurt far more than the amount of financial loss.

When the pressman was accused of it the next day, he made no effort to deny it, but did attempt to justify himself by saying, "All pressmen do it, why shouldn't I?" He even boasted that he then held three checks from three ink factories and a post-office order from a roller factory; he had not cashed them, but he had them, he said.

I learned six months ago that he had broken his promise and had belonged to the Pressman's Union ever since he had been in the city, and when, in connection with the exposure of his bribe seeking, we mentioned his joining the union, he retorted that "The union had not hurt us any," but that if we discharged him now he would see to it that we got nobody else into our pressroom at his wages.

We notified him of his summary discharge, but at his suggestion we permitted him to continue work until we found a successor. We have been two weeks in finding a competent non-union rotary pressman, and during that two weeks we have seen the hand of unionism ungloved. Strange to say, now, no factory has been able to make good ink for us during the last two weeks. We have six shipments in storage from six companies, and yet the press had stood idle for days "waiting for ink." "Tons of ink in storage, but not one drop for use."

The result is, our work is all "balled up."

In the interim we have received various written communications from the discharged pressman, one of which included the submission of an elaborate contract setting forth terms on which he would "consent" to work for us another year, and giving an ultimatum that we must sign it or accept his "resignation," to take effect September 8. As he had already been discharged for cause, the absurdity of the ultimatum called for no answer, but a few days later an amendment to the proposed contract was delivered to the manager, setting forth that we must hereafter recognize him as a member of the union and employ none but union men and boys in the pressroom.

Still we made no answer, but kept on "sawing wood" in our search for a non-union rotary pressman.

Our weekly for last week is not yet run—a week late—because our monthly occupied the rotary, and the press was standing idle for two days "waiting for ink"—with tons of ink on hand.

The particular brand of ink arrived about noon on Friday, the press started and ran for nine hours, then stopped because nine hours had become the pressman's limit regardless of the needs of the business, unless we would pay "time and a half."

All year, prior to the exposure of the bribe-seeking, the practice had been to run extra hours pro rata during the week the monthly was on, and lay off during the idle day each week when only the weekly ran, but now the union had taken hold, had composed the terms of the proposed contract (as its correct grammar showed, the pressman being ungrammatical) and the union had assumed charge of our pressroom.

We were far behind in our work, our regular weekly, carrying nearly $1,500 of advertising, had not yet been put onto the press, and Monday is Labor Day—a holiday unless "time and a half is paid."

All through the summer we have been giving Saturday half-holidays at our own expense—paying full wages for the idle time—but now when we were crowded, with hundreds of dollars' worth of business at stake, the union declared a holiday and our interests must be sacrificed while union agitators taught antagonism to employers. Every employe in the pressroom (both presses) quit because we insisted on work on Labor Day at regular wages.

Our non-union pressman arrived on the morning of Labor Day. The wages he asks are to be "the scale," but we expect to pay above the scale if he proves competent and works for the interests of the business instead of by the dictation of agitators and bribe-takers.

We shall buy ink only from factories first giving us a bond, of a bond company, guaranteeing us under penalty of $1,000 or $5,000 not to bribe our employes and to report to us promptly in case any employe invites a bribe. We shall require a similar bond from our pressman.

Why don't we trust the one ink firm that voluntarily exposed the dishonest attempt of our pressman? The representative who showed us his letter expressed righteous horror at the pressman's wickedness. Why don't we? Because we have since discovered a letter from that very ink firm, written to its local agent, which letter instructs the agent what private marks of identification of their ink our pressman was to find on their "unlabeled" packages when they arrived in our pressroom.

Other ink representatives confess that 90 per cent of the ink trade of America is controlled through bribery of pressmen in amounts ranging from a suit of clothes to 40 per cent cash value of the ink. Of course, this bribe is added to the price and the owner is robbed of that cash. We see no difference whatever between such graft and a direct steal from the cash drawer or forgery of checks.

The ink representative pledged us not to give his firm away

for exposing the pressman (and we did not get the information about the firm from the pressman), because he said it would result in a boycott not only by the local union, but by all pressmen's unions throughout the country. All deplore the evil, but fear to attack it.

One representative said that the great trouble is that employers who know of the graft, all think their own pressmen are exceptions. He said he had formerly been superintendent of a large printing office and while he knew of the dishonesty of other pressmen, he was confident his own head pressman was strictly honest.

Later the superintendent became a traveling salesman for an ink factory, and just before he started out on his first trip the manager of the ink factory handed him a confidential list of names with the statement:

"These are our pressmen whom we take care of."

The first name on this list of dishonor which caught his eyes was that of his old pressman in whom he had had such confidence, and he was moved to agree with the Psalmist who declared, "All men are liars," but he added an amendment, "and grafters."

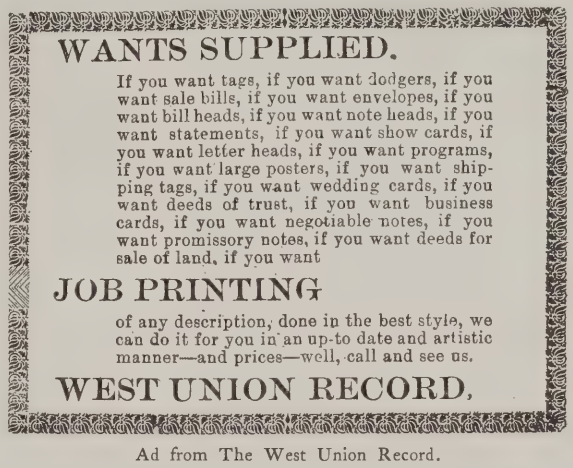
We may not help matters with our bonds, but we will be able to cover expenses of the watch in case of detection of future grafting.

And the watching will be upon the basis of the above quotation from the Psalmist, too. Nothing will be taken for granted without test, and the tests will be most diversified. Who will join in the fight for honest service and a free business? NON-UNION EMPLOYER.

* * *

A COMMENDABLE NEWSPAPER.

A copy of the West Union, W. Va., *Record* has reached the editor's desk for criticism. Without wishing to intrench on Mr. Copper's "Newspaper Criticism Department" we venture a few words of commendation for this wholesome-appearing, well-printed local sheet. The type is clear, large, legible, strong face, appropriate to a home newspaper. The first page is entirely free from advertising and the arrangement of three double-column headings represented by the two single-headed columns (see reproduction) gives a not disagreeable and a forcible and attracting appearance. The advertising on the inside pages and on the last page is well arranged in columns to the right of the reading matter. The newspaper is printed to give the news and the readers are rightly first considered, as they give all the value to the advertising space. The inside and back pages give opportunity for an even and excellent display of advertisements, in which each ad stands out with equal prominence. The ad composition is excellent. Double-column spaces, surrounded by a variety of distinct and neat borders, are much used, and the ads stand out like separate pictures in handsome frames. We give reproductions showing the arrangement of the first page and also one of the attractively set and bordered ads. The one advertising the second job office is given not because it is the best but because it suggests that a newspaper should be liberally used to advertise the job office. However, what particularly attracted our attention and is entirely appropriate to this department was the signed announcement by the editor, heading "A Word to *Record* Patrons," at the beginning of the first column of the first page. There is a kindliness, a pathos and a manifestation of the loyal, devoted, genuine spirit of the true newspaper man running through the short article that will touch a sympathetic chord in the heart of every worthy newspaper worker. Verily knighthood is not dead and newspaper editors, writers and reporters still deserve the title, "Knights of the Pen and Pencil." There is no attempt at fine writing in the article nor is there a word set down for effect, or the stirring of the emotions, or to make any claim for the heroic, for praise or for sympathy. In the simplicity of the statements, evidently written without any thought on the part of the editor that he has done other than he could, rests their power. It is the unadorned statement that unconsciously reveals a tragedy in human life, a story of duty done and victory won, despite disease and pain. We give it with these remarks, believing that the narrative of this disease-wounded soldier, who takes up the march and enters the battle with no complaint, while still enduring the pains of the bodily hurt or disease that must close in death but not in defeat, will encourage others. It is as follows:



WANTS SUPPLIED.
If you want tags, if you want dodgers, if you want sale bills, if you want envelopes, if you want bill heads, if you want note heads, if you want statements, if you want show cards, if you want letter heads, if you want programs, if you want large posters, if you want shipping tags, if you want wedding cards, if you want deeds of trust, if you want business cards, if you want negotiable notes, if you want promissory notes, if you want deeds for sale of land, if you want
JOB PRINTING
of any description, done in the best style, we can do it for you in an up-to date and artistic manner—and prices—well, call and see us.

LOCAL NEWS NOTES

Your Friends Where They Are and What They Are All Doing

All Carefully Compiled for the Readers Of The West Union Record Who Reside in Doddridge and Elsewhere.

First Page of The West Union Record.

Nearly twenty years have elapsed since the undersigned, in his humble way, assumed charge of the *Record*, and it has been edited during that entire period, with the exception of about twenty months, by the same person. During this brief period it was edited by Mr. Homer Strosnider, who now severs

his connection with the paper for the purpose of finishing his education. How well he has done his work, the present popularity of the paper, and its readers attest. It is, of course understood by all that our temporary suspension was necessary on account of impaired health. This state has continued through a period of three years, but it made no difference where he went to seek health and strength, whether in the sunny South or the hurrying North, on the briny shore of the Atlantic or on the mighty Western plains, the paper and its readers among the hills were ever uppermost in our mind, and there have been very few issues that we did not contribute at least something to its columns.

In short, though our strength has not fully returned, we again take up the "quill." It seems to be our inheritance. With your kind indulgence, we promise you the very best we are capable of giving. Its readers shall ever be recognized as one big happy family with a common interest, and that interest shall ever be uppermost in the mind of the manager.

The *Record* has made great improvements in the past twenty years, and has certainly more than kept pace with its surroundings. It has grown from a six to an eight-column paper and its circulation has increased from a few hundred copies until now it is largely sought after and read by thousands of persons every week. It has risen from a humble position to one among the foremost local newspapers in the state.

These improvements must go on. We must keep pace with our surroundings. This can only be done by the united support of all of its patrons, who have stood so loyally by it in the past.

Again asking your kind indulgence and your continued hearty support in the future, we remain,

Very sincerely,
S. P. Smith.

A WELL ROUNDED LIFE.

A Veteran Newspaper Man Celebrates His Golden Wedding.

For forty-five years Mr. Daniel Sinclair held a prominent and honored position among the newspaper men of Minnesota. He was the first president of the Minnesota Editorial Association, and gave dignity and honor to the position, which he filled with ability, aided by a conscientious loyalty to this high calling. He was ever serviceable to the press of the State by his counsels, his example and his influence. He served his city and State with a like faithfulness. He was clean, upright and honorable in all his newspaper work. He was the friend and counselor of the leading men of his section, more than one of whom attained to national reputations and services. He was loyal to his principles, while ever considerate of others, and conservative in the expression of his views and the measures that he advocated, which he ever strove to advance by well considered arguments and an honest presentation and array of facts.

Four years ago he retired from his position of editor of the Winona *Republican*, a position held continually from 1856, but he did not retire from that activity in affairs that becomes a part of the very life of every conscientious newspaper man. He has continued to serve his community that has grown during his residence, and in no small degree through his influence and that of his paper, to a prosperous and most attractive city from a village of a few scattering frame buildings on the river's bank. We know of its appearance that first year of Mr. Sinclair's residence, for that spring, then a boy of thirteen years, in passing with our parents up the river in the old steamer York State, we viewed the town from the hurricane deck of the boat. It seemed to consist of a few wood houses almost, if not entirely, surrounded by water and scattering dead trees and stumps. It has become through the persistency and industry of its enterprising citizens and the fostering, advertising, upbuilding power of the press, a municipality worthy its people and the State, with magnificent schools and churches, that were the first care of the intelligent pioneers, with great manufacturing establishments, extensive business blocks and elegant homes and delightful parks. Since his retirement from the newspaper Mr. Sinclair has found most congenial employment as secretary of the Board of Park Commissioners, and, as is stated by the daily with the predecessor of which he was so long connected, "is an active mover in a project which, if carried through, will mean much to the city of Winona." Here is the point and the manifestation of the spirit of the true newspaper worker: Get so identified with your city's welfare, that though you retire from the paper you will, from habit, still continue working for that which "will mean much to Winona," to your city's attractiveness and welfare.

fifty years that are now golden contained so much of all that try that one feels that volumes ought to be written instead of a few paragraphs. Mr. Sinclair could not have lived his sweet, useful life alone, and early chose one who proved a helpful companion, to aid, to cheer, and to encourage. For this part of the story, however, we give the pleasing account contained in the Winona *Republican-Herald* of August 26:

The golden wedding anniversary of Mr. and Mrs. Daniel Sinclair was celebrated by them today in a quiet manner at their home at 73 West Broadway. All of their children were present, as was also Gordon Smith, of Minneapolis, one of the grandchildren. While the event has been observed in a quiet manner, it has been none the less enjoyable, and in addition to the pleasures of a family reunion Mr. and Mrs. Sinclair have received the congratulations of a number of their friends who knew of the anniversary.

The married life of Mr. and Mrs. Sinclair is closely connected with the growth and prosperity of Winona, as more than forty-nine out of the fifty years have been spent in this city, and each of them have contributed their part to the upbuilding of Winona, particularly Mr. Sinclair, who for forty-five years was the editor of *The Republican*, and with his pen and otherwise was ever ready to help along projects that were for the best interests of the people here. Daniel Sinclair and Melissa Jane Briggs were wedded on August 25, 1855, at Conneautville, Pa., where Mr. Sinclair was at that time the editor of *The Conneautville Courier*, a paper that had been established by George W. Brown, who figured extensively in the doings of the early days in Kansas, and whose office in that state was once wrecked by border ruffians. The next spring after their marriage Mr. and Mrs. Sinclair removed from Conneautville to Winona, Mr. Sinclair disposing of his interest in *The Courier* at Conneautville and very shortly after his arrival here buying a half interest in *The Winona Republican*, and assuming its editorial control, which he retained without interruption until he retired from journalism in 1901 at the time of the consolidation of *The Republican* and *The Herald*, since when he has been enjoying the more leisurely life which is fitting after years of hard and successful work.

Mr. Sinclair's qualities of leadership were early manifested in his residence in Winona, and recognition of this was not confined to this city but embraced the state at large, as was evidenced when he was chosen the first president of the Minnesota Editorial Association, a position that he filled with ability, setting a high standard for those coming after him to follow. Mr. Sinclair was among the prime movers in many projects that were for the best interest of Winona, but always worked in a quiet and unobtrusive way, having a valuable helpmate in all his work in Mrs. Sinclair. Since his retirement from active newspaper work Mr. Sinclair has rendered valuable service to the city as secretary of the board of park commissioners, a position which he still holds, and is at the present time an active mover in a project which if carried through will mean much to the city of Winona.

It is the wish of hosts of friends of Mr. and Mrs. Sinclair both in and out of Winona that they may live to celebrate many more anniversaries, and that the sunset years of their lives may be their best years.

REASONS FOR GROWTH OF NEWSPAPER ADVERTISING.

The Boston *Globe* gives the following three sound, good and sufficient reasons for the growth of newspaper advertising:

In the first place there is no cheaper or quicker medium than the daily press for informing the public concerning the prices of commodities of all kinds.

Secondly, the public has contracted the sensible habit of looking into its favorite journals to learn current prices and what novelties have been placed upon the market. Many a salable and much desired article has not profited to its owner because the public never learned of its existence and merit through an advertisement.

Thirdly, the circulations of newspapers are now so large and constantly growing that enterprising merchants will not fail to advertise for the purpose of obtaining new customers in the far distant territory the press now covers.

The strongest reason why advertising will increase is because business men have learned from experience that it always pays large dividends on the investment.

Now advertisers are sometimes puzzled to determine the size and location of their advertisements. This is arranged easily by the managers of newspapers, who always desire to have them reap the fullest benefit from their investment. In early times the great art in writing advertisements was supposed to be the finding of a proper method whereby to catch the reader's eye. That difficulty is now obviated by the use of better paper, larger and handsomer type, and proper classification of advertisements.

REVIEW OF JOB WORK

BY E. S. HANSON, CHICAGO, ILL.

Address all Communications for this Department to
E. S. Hanson, 1524 E. Ravenswood Park, Chicago, Ills.

AT THE bottom of this page I reproduce a specimen which has come to me for criticism. I have decided, however, to ask criticism upon it from the readers of this department instead of passing judgment upon it myself. I will not, for the present at least, give the name of the one who sent it in. He will recognize it, and will watch more closely than anyone else for the comments upon it. I want candid, thoughtful criticisms upon the work, with suggestions as to how it may be improved. And I should be glad if each one sending a criticism would send a resetting of the work in conformity to his own ideas. The original is printed on a sheet of paper 7¾x5¼ inches, with a half inch margin all around, and I judge is designed for distribution as a hand bill. Send your criticism and resetting to the editor of this department not later than October 25. Some, at least, of the replies will be published in the December number.

Rex H. Lampman, Neche, N. D.—A fair lot of business cards and envelopes. We reproduce a few of them. The Howell & Nelson card is a really neat piece of work, marred only by the use of the plain roman lower case in the lower left-hand corner. If a small size of the gothic could have been used it would have been much more in keeping with the rest of the card. I am decidedly opposed to this style of "Gretna, - - - Manitoba," on the Queen's Hotel envelope, but in this particular instance it is not an easy thing to overcome. See if you can work it out. The Donovan envelope is decidedly too large and showy for a physician. The envelope for Moir & Walker should have some variation to break the monotony of straight, full lines. The one for McFadden & Capitan is a much better piece of work.

Republican Publishing Company, Hamilton, O.—It is a delight to look over your two recent pieces of work, "A Souvenir of Quality" and "A Few Proofs." It is seldom one sees a piece of printing so pleasing and absolutely faultless in every detail. The plates have the "speaking" quality which shows the touch of a master hand, and the mistake has not been made of working them on anything less than the very best coated paper. The text, the decorations, the cover reproductions—in fact, everything about the books has such an air of superiority as to make it seem akin to desecration to tear out two pages for reproduction. I wish that we might show more of them, and in all the force and beauty of the original. Work

like this pays; for any man whose business is worth anything to him will pay a little more for his printed matter for the sake of getting such work as this. And then, too, it pays in the satisfaction of work well done. I take the liberty of clipping an extract from one of the books:

CHARACTER IN COVER DESIGNS.

A cover design is the key to the success of a catalog or booklet.

It is only by long experience and close touch with commercial illustrating that an artist can portray in an artistic sense the practical requirements of the modern cover design. The many activities of industrial pursuits readily lend themselves to representation by symbol.

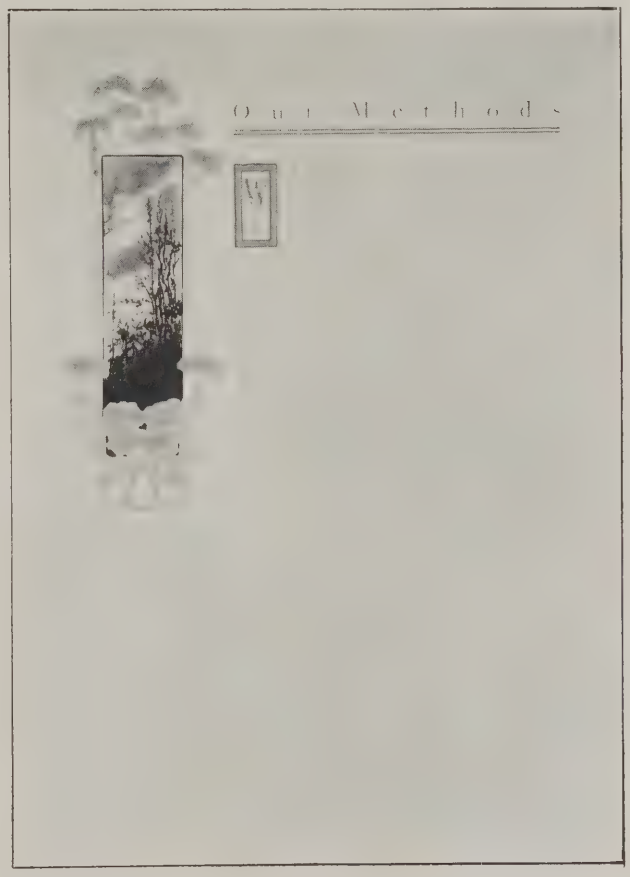
"Art is the external manifestation of the idea, the revelation of the invisible reality through the senses." It is this comprehensive, yet simple, definition of Lilly's which we apply to our cover designs, portraying by symbol or allegory the theme of the work in a manner simple, effective and artistic, adding the touch that gives it value.

A cover design should, in our opinion, not only be a work of art, but an exact expression, independently in itself, of the general argument the book itself is intended to express. But it requires great skill and care to evolve such a design. A too flippant idea may tend to degenerate it into an absolute absurdity, when its true strength should lie in its artistic dignity and the subtle force of a strong suggestion portrayed in some unique manner.

Originality of expression attracts attention immediately and if the remainder of the design possesses sufficient force to hold the mind from wandering to other subjects while the eyes are engaged in viewing it, the cover design is a success so far as its attracting qualities are concerned.

The best cover designs made can be easily ruined in the printing if great care and taste is not exercised. Even a poor design can be much improved by adopting the most suitable color scheme.

Erwin B. Ault, Toledo, Ohio.—Did you ever watch the construction of a steel building? If so, you have seen the workmen put in sections of brick and terra cotta in different places about the building, beginning maybe way up at the eighth or tenth story. These sections apparently stand there alone. They look well enough in themselves, yet they have no particular beauty, and apparently no connection with anything about them. Some of my own work has often struck me as very much resembling these sections. They seem to have no beginning, no ending, nothing to hang to, a first attempt at evolving a form from raw material, like the jelly fish. I have said my own work often looks this way, so I hope you will not consider it too harsh a criticism when I say that some of your specimens strike me as having the same fault. Especially is this true of the debate program. In looking at it one longs to see a line of capital letters, a piece of rule, a word in italics, or anything to take away the dread that the words will fall together in one unintelligible jumble. This applies to some extent also to the cover of the bank statement. The Prophylactic card is the best one of your specimens. Do not send first proofs for criticism, as they are not satisfactory for reproduction, and aside from that the presswork is a large part of a job. Be careful of the proofreading on Old English. A great many readers get caught on it. Your specimens contain at least two errors.



Two pages from work of Republican Publishing Company, Hamilton, Ohio

C. A. Jackson, Foreman, Sparta Printing Company, Sparta, Ill.—Two blotters of average workmanship. The larger one would be much stronger if the Cosmopolitan face had been used only for the main line, filling in the panels with something plainer.

Dell D. Shaw, Mayville, N. D.—Your work is fair work for a town of your size and with the limited facilities which I judge you have. I think you must have made at least some improvement since the time that you were so severely criticised. The letterhead of the Jones Wheat Farm is the best of your

Specimens by Rex H. Lampman, Neche, N. D.

samples. If the main line, and the lines immediately under it, were thrown at least a pica lower on the sheet, I think you would see an improvement.

Lennis Brannon, Talladega, Ala.—I take pleasure in showing several specimens of your work. They are work of a very high grade, as our readers can see for themselves, but are in no way superior to a large number of other samples that came with them. It is a pleasure to look over your work.

A. K. Ness, Cheboygan, Mich.—Your work is, in the main, characterized by good taste, good type and good presswork. The Mazarin type is a face I have never liked, but of course that is merely a matter of taste. Your letterheads—shown herewith—are original and tasty.

Matthews-Northrup Works, Buffalo.—This noted firm of printers and bookmakers is already in the field with its little vest-pocket "Daily Reminder" for 1906. This is the seven-teenth consecutive year. It is a handy reminder, constantly worrying legitimate publishers with hard propositions, but it is a splendid example of completeness, beauty and favor with advertisers each year.

A. Evan Lamkin, foreman *Rooks County Record*, Stockton, Kansas.—It is the easiest thing in the world to promise a customer that a job will be rushed out for him "just this once," especially if he is a good customer that we are desirous of pleasing. Very often, however, the only occasion for rush work is that the customer has been negligent in preparing his copy, and if the job is rushed out for him once, he is very apt next time to postpone writing his copy until the last minute, depending on you to do the rushing again. It is this practice that should be discouraged. Of course, at times, unforeseen occasions arise which necessitate rush work; and for these we have to do simply the best we can. This may have been the case with the little folder in two colors, which you say was done in less than a half day. On work that does not have time to dry thoroughly I always try to induce the customer to use egg-shell stock, as it has something of the quality of a blotter in taking up ink.

INSURANCE AND INVENTORIES.

BY CHARLES S. BROWN.

Mr. President and Gentlemen of the United Typothetae of America:

MANY years spent in the printing business as a printer, proprietor, selling and buying printing materials of all kinds, making appraisals for courts, partners and receivers, settling fire insurance losses and placing values on printing outfits, has given me experience with, and information of, the sound value of printing plants, kind of insurance policies and schedules, methods employed by insurance adjusters in settling losses, and rate benefits to the assured derived from complying with Underwriters' Rules.

CHARLES S. BROWN.

A fire insurance policy complying with the insurance laws of the State in which it is written is the condensed wisdom of long experience of fire insurance companies, who employ the best talent in the preparation of a policy that is technical, designed to protect the interests of the companies. These policies do not protect the insured to the fullest extent.

The Board of Fire Underwriters fix the rate of premium to be paid by the assured. This rate is determined in accordance with the surroundings and conditions of the risk.

A clean composing room, press room and bindery, with benzine in safety cans, rags in metallic receptacles, zinc under presses, waste paper in bins or pails and removed every night, floors kept clean and free from oil spots and ink, gives the printer the low rate premium.

SCHEDULES FOR PRINTERS, LITHOGRAPHERS, ETC.

Schedule of charges and addition to schedule rate on buildings occupied by Printers and Lithographers:

Buildings occupied by printers or lithographers using hand or foot power, add..... $0.25

Buildings occupied by printers or lithographers using other than hand or foot power (all presses in basement), add ..... .25

Buildings occupied by printers or lithographers using other than hand or foot power (all presses on grade floor), add ..... .50

Buildings occupied by printers or lithographers using other than hand or foot power (presses on second or third floor), add ..... .75

Buildings occupied by printers or lithographers using other than hand or foot power (presses on fourth or fifth floor), add 1.00

Buildings occupied by printers or lithographers using other than hand or foot power (presses above fifth floor), add 1.50

Where book-binding, lithographing, electrotyping, stereotyping or similar specially hazardous industries are carried on under one firm or management, add for each additional hazard ..... .10

For each additional specially hazardous tenant, add.... .10

To above charges add as follows for the following deficiencies:

Benzine. For the use of benzine, gasoline, carbon spirits, benzone, petroleum spirits or mineral turps, by either hand, foot or power printers, the same to be kept in approved metal can, limited to one gallon for any one firm, add..... .25

If not in approved can and supply limited, add..... .50

Presses. In all buildings, presses to have metal under them to receive all drippings of oil (except when presses are on concrete floor), if not on metal, add.. .50

Oily Waste, Rags or Paper. To be removed daily; all oily waste, rags or paper to be kept in approved metal receptacles during the day, and burned under the boilers or removed from the building before closing for the night; if not, add..... .50

Oils. All oils for oiling machinery must be kept in metal cans, the cans to be kept in metal pans and not allowed to drip on floor or any wood; if this rule is violated, add..... .25

Waste Paper. All waste paper to be cleaned up daily and kept in pails or bins and removed from building daily, unless kept in metal lined or fire proof room, then to be removed once a week; if not, add..... .25

Note. The placing of oily rags or paper with waste paper is strictly prohibited.

Paste and Glue Heating. To be done by steam.

If by gas, add..... .10

If by oil, add..... .25

Water Pails. In all rooms or floors occupied by printers, book-binders or lithographers, a sufficient number of pails filled with salt water and marked USE ONLY IN CASE OF FIRE, shall be placed in conspicuous places, to be approved by the Surveyor of this Association; if not, add..... .25

Smoking. No smoking to be allowed on the premises and signs forbidding same to be placed in conspicuous places about the building. If this rule is violated, add .25

Stocks. For all stocks or contents of building occupied by printers or lithographers using hand or foot power, or where presses are in basement or on grade floor, add .25

For all stocks or contents of buildings occupied by printers or lithographers using other than hand or foot power when on grade floor or in basement, provided that the basement stocks are placed on skids not less than 4 inches from the floor, add..... .25

For all other stocks or contents, add..... .50

When a building is charged 25 cents for the use of benzine or other petroleum product, and a warranty forbidding its use is inserted in the policies, and a guarantee also filed with the Superintendent of Ratings of this Association prohibiting its use by all tenants in the building, the charge may be taken off and a rebate allowed.

Sprinklers and fire-alarm systems reduce the rates of premium from 10 to 25 per cent.

It is a well-known fact that the printing office is considered an extra hazardous risk by insurance companies. This keeps the premium rate high. I am told by one of the leading men in the insurance world that one of the reasons for this is that the printer, as a rule, is not prepared to show and prove sound values and furnish proof of loss. There is a doubt in the minds of the companies as to printing office values. There are very few adjusters for the companies who are well enough informed on printing materials to make an intelligent adjustment of sound values and determine the extent of damage. The adjustment of a fire loss of a printing office is work for an expert who makes this class of business a specialty.

I believe this lack of confidence on the part of the insurance companies can be dispelled by the assured and the printing office hazard placed on a plane with the high-class and most desirable risk.

Let it be known to all insurance companies that you are following the instructions and complying with the rules of the Fire Underwriters as to buildings you occupy, their location and surroundings, and the clean condition of your plant, that you have a first-class perpetual inventory system open to them for investigation every day.

The insured should be prepared to show what his plant is worth at the time of a fire. If he can show the companies what his sound value is at the time he insures, it will tend to lower the rate; and it is certainly best for both the assured and the companies to have their liabilities fixed when the policy is written, that both may know what to expect in case of fire, that there may be no dispute and that the insurer will get what he has paid for after the fire. Insurance should be reduced to a science, to an indisputable fixed basis, on which the company must settle, and thus the amount to be paid would be a known quantity to all parties concerned.

The blanket policy is the safe and correct policy; it gives the assured an even chance for a just settlement. A divided schedule is to the advantage of the companies, viz: If your policy reads:

$ 500 on office furniture and fixtures,
5,000 on composing room,
10,000 on press room,
4,000 on bindery,
3,000 on paper stock,

and you happen to have $10,000 worth of paper stock on hand, and the loss or damage is in your paper stock only, the companies will not transfer any of the amounts from the other departments to your stock room to help make up the deficiency between $3,000 and $10,000. If you have a blanket policy covering your entire plant, you will get whatever the amount of damage is to any department, providing you are carrying that amount of insurance required.

I recently asked twenty printers, in as many States, for a copy of their policies and schedules, and those received convinced me that many printers are deficient in the knowledge of insurance matters. Your policies and schedules should be carefully and properly prepared, especially so when you are insuring under 80 per cent and 90 per cent co-insurance. A divided schedule with a co-insurance clause is greatly to the advantage of the company, unless your sound value in each item is known.

The following schedule, or one similar, would seem to me sufficient to cover a blanket form:

$..... On CONTENTS of the premises occupied by the assured in the principally brick, stone, tile and iron buildings, situate and known as Nos. 141-147 and 149-155 Plymouth Place, CHICAGO, ILLINOIS.

IT IS UNDERSTOOD AND AGREED that by the use of the term "CONTENTS" this policy extends to and covers all fixed and movable machines and machinery, including spar parts, attachments and connections, shafting, belting, gearing, hangers, pulleys, millwright work, motors, presses, typesetting, casting and sorting machines, all printing, binding and illustrating machinery, apparatus, equipment and supplies, engravings, electrotypes and stereotype plates, cuts, type, shop and all other furniture and fixtures, advertising matter and office supplies, together with stock of merchandise, consisting chiefly of publications, printed and blank books, stationery, paper and binder's stock and materials, including merchandise manufactured, unmanufactured and in process of manufacture, and all materials and supplies entering into the manufacture thereof, or used in packing and preparing the same for shipment or delivery; it being the intent and meaning of this policy to insure hereunder all of the property of the assured, located as described, and not specifically excluded herein, and also the property of others, held by the assured in trust, on commission or assignment, sold, but not delivered or removed, or for which the assured may be liable in the event of loss; liability being hereby specifically assumed on tools, implements, dies, drawings, manuscript, patterns, pictures, casts, bullion, models, sculpture, scientific apparatus, signs, awnings, office furniture and fixtures, and on property held on storage or for repairs; and it is further understood and agreed that said "CONTENTS" are covered while contained in, on or attached to the buildings above described, in basements, on and under sidewalks, and on platforms adjacent thereto.

IT IS, HOWEVER, UNDERSTOOD AND AGREED that property enumerated in line 38 of the New York Standard form of policy is not covered hereunder, and that this policy does not cover property held by the assured for others, which is specifically insured in the name or names of the owner or owners thereof.

IT IS FURTHER UNDERSTOOD AND AGREED that this policy shall attach in each building in proportion as the value in each bears to the value in all.

IT IS UNDERSTOOD AND AGREED that this insurance does not cover any loss or damage to electrical machinery, apparatus and connections in use, caused by electric currents, whether artificial or natural.

PRIVILEGES.

PERMISSION GRANTED for other insurance; to make ordinary alterations and repairs; to work at all hours; to cease operation as occasion or necessity may require; to generate and use electricity; to use steam, kerosene oil, artificial and natural gas, and for the use of the premises as at present and for other purposes not any more hazardous, and to keep and use all articles and materials usual to the business conducted therein, but the use, handling or storing of benzine, benzole, gasolene, naphtha, calcium carbide, or fireworks is prohibited unless special permit is attached hereto.

SPECIAL PERMIT.

Permission is granted to keep and use benzine, benzole, gasolene, naphtha and other light products of petroleum, provided the quantity of either or all should not exceed five (5) gallons in each of the press rooms on first (1st) and third (3d) floors; two (2) gallons in press room on fourth (4th) floor of building, situate and known as Nos. 141, 143, 145 and 147 Plymouth Place, Chicago, Illinois, and two (2) gallons in press room on the second (2d) floor, and five gallons in press room on third (3d) floor of building situate and known as Nos. 149, 151, 153 and 155 Plymouth Place, Chicago, Illinois, and one (1) gallon in each of the other departments in both buildings, all to be contained in approved metal safety cans, the capacity of each not to exceed one (1) quart, and to keep the main supply of same, not exceeding fifty (50) gallons in quantity, on the premises outside of the buildings and adjacent thereto.

EIGHTY PER CENT CONTRIBUTION CLAUSE.

In consideration of the rate at which this policy is written it is expressly stipulated and made a condition of this contract, that this policy shall be liable for no greater proportion of any loss than the amount hereby insured bears to eighty per cent (80 per cent) of the actual cash value of the property described herein at the time when such loss shall happen, nor for more than the proportion which this policy bears to the total contributing insurance thereon.

LIGHTNING CLAUSE.

This policy shall cover any direct loss or damage caused by lightning, except loss or damage to electrical machinery and apparatus and connections in use (meaning thereby the commonly accepted use of the term lightning, and in no case to include loss or damage by cyclone, tornado or windstorm), not

exceeding the sum insured nor the interest of the insured in the property and subject in all other respects to the terms and conditions of this policy. PROVIDED, however, if there shall be any other fire insurance on said property, this company shall be liable only pro rata with such other insurance for any direct loss by lightning, whether such other insurance be against direct loss by lightning or not.

STANDARD TIME CLAUSE.

Wherever in this policy mention is made of any hour of the day or night, this same shall refer to Capital Central Standard Time.

ATTACHED TO AND FORMING PART OF POLICY NO. ..... of the .....INSURANCE COMPANY OF .....

..... Agent.

"The 80 per cent insurance clause," as adopted by the Chicago Fire Underwriters' Association, provides that the established rates are based upon insurance being carried to the amount of at least 80 per cent of value of property, and is as follows:

It is a part of the consideration of this policy, and the basis upon which the rate of premium is fixed, that the assured shall maintain insurance on the property described by this policy, to the extent of at least 80 per cent of the actual cash value thereof, and that failing so to do, the insured shall be a co-insurer to the extent of such deficit, and to that extent shall bear his, her, or their proportion of any loss; and it is expressly agreed that in case there shall be more than one item or division in the form of this policy, this clause shall apply to each and every item.

It has no effect whatever when insurance is carried to the amount of 80 per cent of value or more. In this case, insurance pays the entire loss, not exceeding the amount of policy.

Example: Value $10,000, insurance $8,000, loss $6,000; insurance pays $6,000. Loss $8,000; insurance pays $8,000. Loss $9,000; insurance pays $8,000.

It has no effect whatever when the loss equals or exceeds 80 per cent of value, no matter what the insurance is. In this case also insurance pays entire loss, not exceeding amount of policy. Example: Value $10,000, insurance $6,000, loss $8,000 or more; insurance pays $6,000, which is the total amount of insurance.

When both insurance and loss fall below 80 per cent of the value the assured becomes a co-insurer—that is, stands as an insurance company—to the amount of the difference between 80 per cent of the value and the actual insurance in force at the time of fire.

Example: Value $10,000, insurance $7,000, loss $5,000; 80 per cent of the value, $8,000, amount of contributing insurance required. Insurance company or companies, insures $7,000; pays $4,375. Assured insures (co-insurance) $1,000 and pays $625.

If your policy schedule reads

$ 1,000 on office furniture and fixtures,
5,000 on composing room,
20,000 on press room,
10,000 on bindery,
8,000 on paper stock,

and you are not insured to 80 per cent on one or two of the items, you are a co-insurer on those items. If you are carrying more than 80 per cent insurance on the other items the companies will not transfer a loss from the under- to the over-insured items. A blanket policy avoids this unnecessary risk on your part.

Do not depend upon your insurance agent to write your schedules. They know very little about printing plants and may be partial to divided schedules.

Your local agent solicits your business. He is glad to accept your risk and writes for you all the insurance you want because he gets his commission. The fact that he will write for you policies amounting to more than the value of your plant and accept the premiums paid him without asking for your inventory before a fire is not, in my opinion, a just business transaction, especially when we know that the companies send shrewd and sharp adjusters to settle with you after a fire. The solicitor of your insurance has nothing to do with the settlement of your loss. Solicitors are paid for getting your business, while adjusters are paid for getting depreciations and buying your plant as cheap as they can. If your material is scheduled properly, in every department, under their own discount headings, in the composing room, press room, bindery, engraving plant, electrotype plant, stereotype plant, proof room, mailing room, shipping room and engine room, with prices carried out at list where discount prevails—not where you buy net—and you hand your inventory to an insurance adjuster, it is up to him to figure off the discounts and bring your plant down to its net market cash value. Then he will ask you for a depreciation. You are prepared to meet him on an equal business footing. You have not already depreciated your property and given him an opportunity of asking for further reductions in order to keep the cash payment, which he expects to pay for your loss, as low as possible.

There are several values to be placed on a printing office—value as a running business, value for tax assessment, value if sold under the hammer, fire insurance value.

A printing office sold under the hammer will bring only what the auctioneer knocks it down for. It will sell as a business investment according to the dividends it is paying and the good will it carries. It should be taxed according to the appraised value less good will and with depreciations deducted. The insurance companies reserve the right in their contract with you to replace your plant at whatever the market value shall be. An up-to-date printing plant, the owners of which are continually buying new to replace the old material, should be as good at one time as at another. The object of taking on insurance is to guarantee yourself against loss; it is not a speculative proposition with you. Your plant was not for sale before the fire; you insured and paid premiums as a guarantee to yourself that you would continue the business.

If your plant inventories $10,000 net value and burns, and you are carrying policies of $10,000, and it will cost you $10,000 to replace your plant to do the same volume of business that you did before the fire, is it not fair to expect the insurance companies to either pay you $10,000 or buy a plant for you that is equally as good as your $10,000 plant?

The public adjuster of fire losses charges 5 per cent of the amount of the damage sustained, or $25 per day, for his services compiling and arranging your inventory after the fire occurs. The better way is to prepare your inventory before the fire and make your own settlement with the insurance adjusters after the fire. A perpetual inventory system informs you of your plant value every hour of the day, every day of the week, every week of the month and every month of the year. Insurance companies will accept it as proof positive of loss; commercial agencies will accept it as a means for fixing a customer's rating; officers and stockholders of corporations will accept it as proof of their asset value, and managers will accept it as a guide by which to order material to match and supplement what they already have.

A correct inventory will tell how much insurance to carry and save expense of appraisers and time lost in the disputes which always arise if the assured is not prepared to show insurance companies what his plant value was before a fire. It protects you on the 80 per cent co-insurance plan and puts you in good standing with all insurance companies.

Taking, compiling, pricing and recapitulating an inventory of a printing plant is not the easiest and most pleasant job,

and no man but he who has had unlimited experience as a printer and is familiar with printing material names, sizes, schemes and values in all departments can make a correct inventory. A perpetual system of inventory prepares you for a fire insurance settlement, gives you information of the actual amount of your purchases, the name of the manufacturers of the goods you buy, the size and name of the article, so that you are enabled to match and supplement any material that you already have on hand. As your bills come in you charge them to whatever account they belong. If it is leads and slugs it goes to the lead and slug account; if it is brass rule it goes to the brass rule account; if it is body type it goes to the body type account, and so on, and you are not compelled to run through your journals, ledgers and day books to inform yourself of what you bought, where you bought it and how much you paid for it. At the end of every business year, instead of going to the large expense of making a new inventory and trusting your employes to make it correctly, you need only add up the different lines of material, carry them forward to recapitulation, take off the prevailing discount and bring your plant down to a net cash value as a new plant. You are then prepared to make your depreciations from the recapitulation, but the inventory book itself has not been disturbed. You know it is correct because you have taken it direct from the bills and catalogue and have taken off the discounts in your recapitulations. You have a perpetual system. You are prepared to make your inventory every night. It saves you time, expense, worry and bother and prepares you for any and all kinds of valuations.

There are four propositions in fire insurance that are of greatest financial importance to the insured.

First: Place your risk with the companies having the highest standing financially and endorsed by the insurance commissioners of the different States.

Second: Secure a low rate of premium if possible by working as an association, showing the underwriters and companies that your risks are reduced to the minimum because the conditions of your manufacturing plants are kept within the requirements of the insurance rules.

Third: Have your policies and schedules correctly written so that technicalities may not allow adjusters or appraisers to shirk responsibility and payments of certain parts of a loss because of a divided schedule.

Fourth: A correct inventory is proof of loss and must be furnished the fire insurance adjuster before he can proceed with your settlement.

In conclusion, gentlemen, I earnestly thank you for your patience and kind attention.

Mr. Brown was given a unanimous vote of thanks by the convention.

"Education is intended primarily to develop systematic habits in a man; to give control of his intellectual powers; to fit him in such a manner that he may be able to direct those powers successfully in any special direction."—*President Harper, of The University of Chicago.*

N. E. A. JOURNEY.

AS NARRATED in the September number of the NATIONAL PRINTER-JOURNALIST, the third stage of the journey of the National Editorial Association in its 1905 outing, began at San Antonio, the most interesting city in the Southwest. It is interesting not merely because of its historical associations, but because it is one of the largest of the old Spanish settlements, the site of a great military establishment, and to-day a most enterprising and flourishing American city. So much has been written about the brave defenders of the Alamo that I might be excused for merely mentioning that the Alamo still stands, the Mecca for all visitors to San Antonio, but its story is so inspiring and has so much to do with the history of the country about to be visited, that I cannot resist the temptation to tell it again. Spanish explorers, traders and missionaries, moving northward from Mexico nearly two centuries ago, established a chain of missions in the Southwest and on the Pacific coast, the ruins of which we shall see as we journey towards Portland. San Antonio was one of the chief settlements, and the ruins of half a dozen missions remain in the city or vicinity. The Alamo was the Mission of San Antonio de Valero, which was secularized by the Spanish government in 1793 and became a fort occupied by a military garrison. After the Louisiana purchase Texas was settled largely by Americans who, under Austin, sought the admission of Texas as a state of the Mexican Union. But Austin was imprisoned and a Mexican army was sent to Texas to quell the turbulent American pioneers. The Americans rose in armed rebellion and after defeating the Mexicans proclaimed Texas a free and independent Republic. Santa Anna collected an army of 7,500 men and marched against the rebels. His massacre of a Texas command captured at Goliad led to the heroic defense of the Alamo. One hundred and fifty citizen soldiers, led by such men as Travis, Crockett and Bowie, were beseiged in the Alamo by Santa Anna in command of 5,000 Mexican regulars. They had opportunities to escape, but decided to remain and fight to the death; in fact, thirty-two others fought their way in, that they might share the fate of the original band. The battle lasted for eleven days, during which the skilled defenders killed 1,500 of their assailants. But they could not stand out against the overwhelming odds. Travis, the commander, was killed while on the wall; Col. Bowie, sick in bed, was bayoneted where he lay, and the famous David Crockett fell behind a rampart of assailants he had killed. One woman, a child and a negro servant alone survived. The woman lived to a great age and until ten years was an object of interest to all who visited San Antonio. The Alamo, sufficiently restored to preserve it from the elements, but in much the same condition as during the siege, is an object of very great interest. The fight there inspired the Texans to renewed efforts for freedom. Sam Houston annihilated the Mexican army at San Jacinto, capturing Santa Anna, but desultory warfare continued for years. The independence of Texas, which included, besides the state of that name, the greater part of New Mexico, parts of Colorado and Kansas, and No Man's Land, was acknowledged by the United States in 1839. Upon its own motion the Republic was admitted to the Union in 1845 as a single state, but with provision for its ultimate division into five states. Texas was paid $10,000,000 for the territory beyond its present boundaries. Disputes regarding the Mexican boundary line led to the war with Mexico.

San Antonio is the headquarters of the United States Army in Texas, and the military reservation, with its great barracks, is one of the show places of the city, overlooking the latter and presenting a splendid view. The old Spanish quarter remains and is of special interest to visitors from the North, but about it has been built an up-to-date American

city, with fine stores, hotels, office buildings, etc., and trolley lines that carry one to every place of interest. The United States Post Office is a very handsome building, in the Mission style of architecture. Prior to its erection government buildings had been designed in Washington, usually from classic models, without regard to their location. The success attending the employment of local architects to design the San Antonio post office led to the adoption of a system that has given local character to many other government buildings. The influence of Spanish culture upon the architecture of the Southwest and of the Pacific slope should not be overlooked. The missionaries were cultivated men and brought to the new land knowledge of architecture and the arts of design wholly foreign to the "practical" pioneers who settled upon the eastern seaboard. The Spaniards built chapels or mission houses that are still beautiful in their ruins, and they decorated their churches and cathedrals with good taste. The influence of good example is seen to this day throughout the region occupied by them. Even the cheap seaside resorts are much more picturesque and tasteful than similar resorts in the East. There is scarcely a city west of the Mississippi river that is not architecturally superior to its Eastern rivals, chiefly because the people have had good examples before them, instead of being dependent upon the imagination of uncultured country carpenters. The mural decorations of the churches also exhibit good taste, and fine sculpture abounds; but the West seems to have little judgment respecting pictures, and few paintings are to be seen even in the art galleries that would pass muster in the East, nor is there any exhibition of local talent for art, except in its crudest form.

One of the curiosities of San Antonio which every one is expected to visit is a saloon decorated with thousands of horns and antlers. There are some very fine and rare specimens in the collection, including the horns of animals now nearly extinct. They are used to decorate the walls of the saloon and prove very effective ornaments, as well as a drawing card.

After a pleasant day in San Antonio we left in the evening over the Southern Pacific railroad, as heretofore narrated, and the next evening, June 16, arrived at El Paso. The part of the trip made in daylight was through a high table land with bleak-looking mountains on either side, but they were capable of taking on picturesque forms and colors when the sun was low. The elevation at San Antonio was less than 600 feet, but when we awoke in the morning we were more than 3,000 feet above sea level, and continued to ascend until we were nearly a mile high. Then we descended gradually—El Paso being about 3,700 feet above the sea. It was formerly Paso del Norte—the pass of the North—and the Indian town occupied both sides of the Rio Grande. Three hundred years ago the Spanish missionaries erected a church in El Paso that is still standing. The Rio Grande having become the boundary line between Mexico and the United States, the city on the northern bank has been Americanized and is known as El Paso. The Mexicon city known as Cinudad Juarez retains its old characteristics to a marked degree. An electric car line joins the two cities, customs offices being established at each end of the long bridge.

When our train rolled into El Paso we found the whole populace awaiting us, with a fine brass band and a reception committee of the Elks, who escorted us to the Plaza, where a speech of welcome was delivered by a brilliant young attorney, Zach Cobb, grandson of Howell Cobb, of President Buchanan's cabinet. The Elks were preparing to attend a convention at Buffalo and were attired for the first time in their new uniform. It was of black cloth, tight-fitting trousers and short Mexican jackets, both trousers and jackets decorated with a profusion of silver coins, from ten-cent pieces to dollars. Costly sombreros completed the costume. The Elks had arranged to take with them the Mexican band that entertained us, and estimated the cost of their trip at $20,000.

As we did not reach El Paso until late in the afternoon we were hurriedly taken by electric cars to Juarez, where the Mexican officials, with the aid of their wives and daughters, had arranged a reception for us in the handsome custom house. Refreshments were served by Spanish beauties, attended by gallant young men. They presented a charming picture. The young men carried the trays and the ladies handed out the liquid refreshments and the cigars. The visiting editors and their wives had too little time to do justice to this very elegant entertainment. They hurried out to see the old church, the post office, whence they sent out hundreds of souvenir postal cards and the stores where they bought vast quantities of drawn work, jewelry, cigars, etc.

Upon our return the United States Customs officers stopped the cars and went through the form of examining us for dutiable articles, but did not find any. The ladies did all the buying and turned over what they had bought to their husbands. The polite customs officers, knowing this, asked the ladies whether they had any dutiable articles, and were truthfully answered in the negative. Then they turned to the husbands and asked them whether they had *bought* any dutiable articles. The husbands could also answer no with a clear conscience, and thus we passed the Customs House with a delay of not more than ten minutes. The light of day was rapidly failing, but we found time for a trolley ride about the city, which seems to be very prosperous, and, upon our return, filled in the rest of our time in the handsome stores, where more purchases were made, to be sent home to friends. The next day many of the editors and some of their wives and sweethearts appeared in Mexican sombreros, which became a great nuisance before the trip was ended.

Mission at El Paso, Texas.

Water Color Sketch by A. B. Burk.

Eastward from El Paso the railway time is Central and two hours faster than Pacific time, which governs from San Francisco to El Paso. Further north, mountain time makes another division between Central and Pacific. Leaving El Paso at 9 p. m., Pacific time, June 16, we traveled for nearly two full days before we reached Riverside, California. The journey was over high table lands for several hundred miles. In the morning we stopped at Tucson long enough to get some rolls and coffee provided by the enterprising Board of Trade of that place. By the way, every little town in the West has its Board of Trade, and the merchants join heartily in booming their home town. In the older Eastern cities it is difficult to get rival merchants to co-operate, but in the West all seem to recognize the fact that they should, first of all, bring business to the town and then hustle to get their share of it. Every place we visited had its board of trade, with illustrated literature to distribute to travelers. Tucson is a well built American city, with traces of its old career as a Mexican

mission, and has a great reputation for curing the sick. In the immediate neighborhood are rich ore-bearing mountains, which are tributary to the city. The Santa Cruz river, which flows from the Sonora mountains through Tucson, disappears soon afterwards and is supposed to flow one hundred miles underground to the Gila river. At Maricopa, 86 miles west of Tucson, a branch line, which we did not follow, runs 34 miles north to Phoenix, the capital of Arizona. Soon after leaving Maricopa the road begins to descend from the high table land and at Yuma the altitude is only 140 feet. Beyond Yuma the road, now in California, continues to descend until Salton is reached, 263 feet below sea level. Yuma is supposed to be the hottest place in the United States. When we arrived the temperature was 108 degrees in the shade and the day was considered delightful. As a matter of fact we had suffered no discomfort in our journey. The air was perfectly dry and there were no cinders from our oil-burning locomotives, so that we traveled in comfort with wide-open windows. Sometimes, we were told, travelers suffered greatly from alkaline dust in crossing the desert lands, but for some reason we escaped this experience. We were also told of wonderful mirage effects produced by the hot sun beating upon the white sand and giving rise to chlorine vapors, but we saw nothing of the kind, or, if we did, failed to recognize it. At Yuma the railroad crosses the Colorado river on a steel bridge, and soon thereafter enters the dried-up bed of an inland ocean, formerly the head of the Gulf of California. This ocean bed is a great producer of salt. At Salton there are great salt works and a short distance south are the fields, so to speak, where the salt is gathered. The concentrated brine rises to the surface by capillary attraction and there the liquefying water is evaporated by the sun's rays, leaving a crust of almost pure table salt. It is scraped up by plows into windrows and taken by cars on tramways to Salton to be purified and packed. Leaving Salton the road rises out of the ocean bed, and at Indio, a health resort, is only 20 feet below sea level. Twenty miles beyond, Palm Springs forms an oasis in the desert at an altitude of 584 feet. From this point onward the character of the scenery improves. We were climbing the mountains again, and 1,350 miles west of San Antonio we crossed the mountains between the San Bernardino and the San Jacinto ranges, by San Gorgonia Pass, and descended into the valley ruled by Los Angeles.

Our journey from Texas had carried us through New Mexico and Arizona to California. We entered the latter state when we crossed the Colorado river at Yuma, and for many miles traversed a great desert, which may be made fruitful in time by irrigation. Means have been devised to wash the alkali out of the earth so as to prepare it for the growth of vegetation, and whenever land in the West becomes valuable enough to justify the effort, these lands will be reclaimed. There is another project—that of breaking down the barrier between the Gulf of California and the dry bed of the inland sea, and thus changing the climate of the region, but it is too late to make such an experiment. Property interests to be affected by the inundation are too valuable to permit such an undertaking. While traveling through the desert our attention was called to the movement of the sand towards the Northeast, forming what are called hog-wallows. The sand drifts in well marked hills and furrows, the former several feet in height. The only remarkable thing about the hog-wallows is the size of the hills. Precisely the same movement of sand on a small scale is to be seen on the New Jersey coast. In Arizona the winds blow in only one direction, from the Southwest, and there is very little rainfall; consequently the sand movement is continuous in one direction. On the New Jersey coast a similar movement is repeatedly broken down by contrary winds or by rainstorms. Nevertheless, the hog-wallows on a small scale can be found on the New Jersey beaches. In Arizona the movement of the sand is formidable, and some day in the future it will give great trouble to the Southern Pacific Railroad Company unless in the meantime some means should be found to arrest it.

We entered California in the afternoon and saw little of the state, except the desert portion, until the next morning, June 18, when we awoke at Riverside. We had passed Colton about midnight, and Colton is the center of the citrus fruit-growing region of California. Within a few miles are such noted places as Riverside, Redlands and San Bernardino, all of which can be visited in a day by train or trolley. The whole region has been redeemed by irrigation and almost fabulous stories are told of the profits realized from orange culture in Riverside, Redlands and the neighboring country. According to the boomers of these places a net income of $2,000 a year can be obtained from ten acres set out with oranges, and the ten acres cost only $2,500. Be this as it may, the country is undoubtedly rich and the agricultural returns are made reasonably certain by the absence of heavy rainfalls and the certainty of results achieved by irrigation. The cost of water per acre ranges from $2 to $10 per annum, being rather less than the cost of fertilizers. The yield of an orange grove in its prime is about $250 per acre.

Our schedule did not permit us to see much of this interesting region. We landed at Riverside after midnight and when we awoke it was Sunday morning, and most of the stores were closed. We had until noon, however, to view the place, and our first move was to the trolley cars. A local committee had arranged to escort us over the lines, and we had a delightful trip on well shaded avenues lined with the so-called pepper trees and immense palms. Our headquarters were at the Glenwood, a very attractive modern hotel built about the old Adobe or Casino beside the stately Campanile, with its chime of mission bells. The Glenwood is a remarkably picturesque structure in the Mission style of architecture, decorated simply and with good taste. On the Glenwood grounds is the original navel orange tree, parent of all others in California, which was replanted by President Roosevelt when he visited Riverside, and is now preserved as a curiosity behind an iron railing. Our introduction to California was delightful, for Riverside is a beautiful city, and from the heights about the city splendid views are obtained of the great orange orchards. The climate is delightful, and if change is desired, the mountains or the ocean are within a few hours' ride. But we had no time to tarry even at this delightful resort; at noon we were off again and in a few hours reached Los Angeles, where we were booked to stay three days. Thus far we had lived on the cars, but at Los Angeles our train was turned over to the cleaners, while we removed to hotels.

Wherever we went in the far West we found people from our home towns hungry for news of the East. It did not seem to matter how prosperous they had been or what their social and family ties had become—home, to them, was east of the Mississippi river, and they were grateful if one could introduce them to an editor who had come from some place within a hundred miles of "home." Some members of our party had prepared in advance to meet old neighbors. Thus one of our Pennsylvania editors had made out a list of the Western addresses of all the people who had removed from his home town and vicinity during the last thirty years, and it appeared from the size of the list that everybody who could afford it had emigrated, and he spent the greater part of his time telegraphing ahead to his relatives and friends that he was coming and then receiving them at the various stations. It was a pleasure to meet these former Pennsylvanians. They all pretended to be enjoying life on the Pacific coast, but their evident hunger for news of home in the hills of Pennsylvania was pathetic. The delegates from other states had similar experiences, but not, we believe, to the same degree—for there

is only one Pennsylvania.

Los Angeles gave us good entertainment. It is a rich and beautiful city and offers many side trips of interest. In the morning after our arrival we started out as the guests of the Chamber of Commerce, the Pacific Electric Railway and the Board of Trade of Pasadena for a trip to Mount Lowe. Electric cars carried us through Pasadena, one of the richest towns in California, peopled chiefly by millionaires, to the fort of Mount Lowe, upon whose steep sides a scenic railway has been built by Professor Lowe, a Pennsylvanian who made a fortune by his invention of so-called water gas. The railway nearly bankrupted him, but is now a good investment. The first stage of the ascent of Mount Lowe is by an inclined rope-haul railway, from the summit of which a fine view may be obtained of the surrounding country, extending on clear days to the ocean. From the summit of the inclined railway a trolley road is built on the precipitous sides of the mountain to Alpine heights, where there is an Inn, at which we dined. The railroad looks extremely dangerous, though no accidents have occurred on it, and it provides delightful views of the valleys beneath. There is little to be seen from the Inn, although it is near the summit. The adventurous go from it on foot or on the backs of burros to the summit, from which there is an unobstructed view of all the country roundabout.

On Mount Lowe.

Water-Color Sketch by A. B. Burk.

Returning from Mount Lowe the editors were taken on a drive through Pasadena, which boasts of having 52 millionaire residents—one for each week in the year. Electric cars, carriages and automobiles were pressed into the service, and at the end of the ride a dainty luncheon was served. Finally each member of the party was given a handsome souvenir of Pasadena in the shape of a volume of photogravures showing the principal residences and public buildings. No more tasteful or generous entertainment was given us anywhere than at Pasadena.

Returning to Los Angeles a reception awaited us at the elegant residence of Mr. Warren Wilson, a journalist whose lines have fallen in pleasant places. He has a fine home in the suburbs of Los Angeles, two acres of land set out with fine shrubbery, great palm trees and beautiful flowers. The grounds were decorated with a profusion of electric lights and an orchestra concealed in the shrubbery discoursed excellent music in the intervals of speech-making. The speeches were extremely interesting, as they told the story of the development of Los Angeles and the surrounding country and the immense rise in values of real estate that followed the introduction of capital and the development of irrigation. The hospitality extended to the delegates was as tasteful as generous, and all who attended the reception left with pleasant impressions not only of Los Angeles, but of the angels who reside there.

But the crowning feature of the visit to Los Angeles, and to the writer the most enjoyable of the entire trip, was the journey to Catalina island the next day, June 20. Abandoning our Pullman cars we made the journey to San Pedro in regular coaches and there boarded a fine ocean steamer for the voyage to Catalina island, about twenty miles away. The sea on the outward trip was as smooth as a duck pond and there was no reason why anyone should have been disturbed by the motion of the vessel, but very few of the editors or their wives had ever been to sea and nearly all of them were alarmed by stories of the sea sickness that was sure to attend the voyage. The influence of mind over matter was seen in the result. There were many cases of sea sickness and each one provoked another by example. The result was that nearly all the editors were sick on the way out, and those who escaped in going fell victims on the return voyage, when the sea was rougher and the steamer encountered long swells. For those who managed to keep their feet and control their stomachs the voyage was one of great delight. The scenery as the vessel passed up the coast was extremely picturesque and the trip was enlivened by the appearance of hundreds of flying fish disturbed by the passing of the steamer. The flying fish protects itself from enemies of the deep by leaving the water and sailing off to a considerable distance before it re-enters the water. As it

Sugar Loaf, Catalina Island.

Photo by Ironmonger.

emerges from the water it flaps its wings violently to get a start and then sails through the air gracefully until it sinks again in the waves. Its flight is usually for a distance of about one hundred feet, but it can on occasion maintain itself in the air for at least twice that distance. Those that we saw were evidently frightened out of the water by the boat and appeared off the bow, flying away from what was to them no doubt a monster of the deep.

The feature of chief interest at Catalina island is the view to be obtained of the submarine gardens from glass bottomed boats. The water at this place is extremely clear, being free from sediment, and numerous boats of all kinds—rowboats, sailing craft and steamers—are provided with glass bottoms through which the wonderful sub-marine gardens may be viewed. We chose a steam launch which had two cockpits, about which a score of passengers were seated. The bottom of each cockpit was made of plate glass, through which one could see the bottom of the sea at depths as great as 100 feet. Near the shore nothing was to be seen except clean white sand, but within 100 yards of the beach we came upon the famous gardens, and moved about them for an hour, enjoying a scene of exceptional beauty. The depth of water varied from 20 to 100 feet. The scene disclosed baffles description. The submarine garden has a great variety of foliage, all in graceful motion, the plant of chief interest being the Iodine

kelp, from which iodine is extracted. Mosses, sea weeds and other vegetable growths added richness to the color scheme, and in and through the great marine garden passed fishes, large and small, entirely oblivious of the curious eyes gazing at them from the glass-bottomed boats. The sun was shining brightly and it passed down through the clear waters to light up caverns containing strange creatures of the crab and lobster tribes, here to be studied in their native habitat. The waters in this neighborhood teem with animal life, and from the glass-bottomed boats one may view the fishes without disturbing them. But the chief charm of the submarine garden lies in the beautiful form, exquisite coloring and graceful movement of the plants. It is worth a trip to California to see the submarine gardens.

Stream at Shasta Springs.

Water Color Sketch by A. B. Burk.

This, however, is not the only attraction of Catalina island. The fishing is unsurpassed, the favorite subject of the sportsman's skill being the leaping Tuna, which reaches a weight of 250 pounds, and is taken with rod and reel. The hunting also is excellent, with the wild goat as the chief prey. There are several tent settlements on the island, this being a favorite method of housing summer visitors on the Pacific coast. A floored tent is provided with single or double bed, bedding, table, rocking and folding chairs, washstand, looking glass, clean linen and towels, and is rented at low rates. Nearly all of the tenters take meals at restaurants or hotels, but if they desire to do so they can rent cooking tents and cooking utensils and dishes. The entire cost for four persons, except for food, in one of the tent cities, including kitchen utensils, need not exceed $14 per week. The climate is such that life in a tent is thoroughly enjoyable.

With pleasant recollections of Catalina island we started on our return voyage, but the Pacific on this occasion belied its name and forced nearly all of those who had not already yielded tribute to "seek the seclusion that the cabin grants."

In the evening we attended a reception at the Board of Trade rooms, which contain a fine exhibit of the resources of California, and the next morning started on our trip northward, which will be the subject of our next chapter.

* * *

SUCCESS THROUGH SYSTEM, DISCIPLINE AND HARMONY.

The following from an article by Nathaniel C. Fowler in *Human Life*, with regard to the career and success of Governor Douglas, of Massachusetts, is so filled with the principles of practical business wisdom, put into practice, that, we deem, no greater service could be rendered to printers and publishers than the reproduction of the same here:

A FACTORY RUN LIKE A MAN-OF-WAR.

The factory is run like a man-of-war. Each man is at his post. Discipline is everywhere, but it is not obnoxious. No one is allowed to do less than his duty, and when he does more than he is hired to do a better position and more pay await him. Douglas is one of the few captains of industry broad enough to admit that an officer without men is as badly off as would be the men without a commander. Douglas alone would have been a failure. Douglas' men without Douglas would have made only moderate success. The combination of Douglas and his men has built up the greatest business in its class in the world, and has established upon an everlasting basis one of the largest factories in the catalogue of accomplishment.

The shoe factory is a great big, entirely modern, sunlighted, pleasant, healthy, homelike workshop; and every worker, from the superintendent to the boy at the door, is a member of the Douglas family. The atmosphere radiates good will and happy harmony. There are no strikes or lockouts there. A grievance is not allowed to become permanent and dissatisfaction can never become chronic. All are allowed to talk it over with Douglas; and when they do, Douglas is not their employer, but their friend and counselor. A committee of employees form a harmony board, and respectfully invite malcontents and strike-breeders to become conspicuous by their absence.

The Douglas factory is an institution, not a mere workshop. It is a combination of well built, well inspected materiality, with an atmosphere which breeds and develops the better part of man.

The Douglas employee is a favored man. He is envied by the workers in other factories. It means something to be a Douglas worker, to have stayed in the factory for a number of years. It means that a man is faithful, prompt, quick, willing and thoughtful of the interests of his employer. It means no shirking, no slipshod workmanship, no half-hearted endeavor. It means intelligent work of brain and hand and heart. To be a Douglas man is to be a man with a recommendation worth its face value anywhere. The Douglas employee is in a class by himself.

Douglas is not an extravagant man. He has neither summer palace, nor stables of horses, nor barns of blooded stock, nor yacht, nor other expensive fads. He lives in two houses, and in only two—his comfortable and commodious home house at Brockton, and his rather modest and by no means palatial summer house at Monument Beach.

* * *

SUGGESTIVE REPROOFING.

Let all newspaper criticisms and reproof be given in all humility and good feeling for the general good and not for the purpose of displaying the editor's superiority. Let all efforts for improvement or righting of wrong be in the form of suggestions, not of dictatorial pronouncements, or commands.

NEWSPAPER CRITICISMS

BY O. BYRON COPPER, DE SOTO, WIS.

Address all Communications for this Department to De Soto, Wis.

TO BE successful at anything one must be a successful thinker, and especially is this true of those interested in newspaper-making. It is so with the publisher, it is so with the editor, it is so with the reporter, with the compositor, the pressman—in fact, with every member of the force. The act which is preceded and accompanied by careful thought is like a well-aimed blow—it is effective. But the editorial of the editor, whose whole mind is not in his work, is worthless; or, the work of that editor whose writing is done while his mind wanders amid "estates in sunny France," is not what it might have been, nor what it should have been. It is all right to build air castles, for we must certainly always have castles in the air, or in our minds, ere we can possibly have them on the ground, but these joyful little "raisings" of the imagination should not be allowed to break in upon the work at hand.

The printer who puts in his day at the shop with one eye constantly on the clock and his mind hovering o'er prospective outside pleasures, invariably turns out an inferior product, because it is a *thoughtless* product. He makes his work a veritable drudgery, because to him his work is a menace to his happiness—a barrier between him and immediate pleasure.

The whole truth about this problem of the making of a successful career is this: Be thoughtful in the execution of the duties of the present hour; and during leisure moments study—think—learn—how to accomplish the tasks of the next hour. The lives of great men all teach us this; but we do not have to go beyond the common, ordinary circles of life to see it demonstrated. Have we not seen thoughtful, studious printers' devils evolve into prosperous, progressive publishers, whereas many a plodding, *thoughtless* compositor grows gray at the case simply because he sticks type mechanically, with his mind lingering fondly o'er the plot of a half-read novel, or preceding its owner to the card table at the corner saloon? His sole aim is merely "to put in his time," hence that is as far as he ever gets.

Success is, after all, merely a matter of mind development. And mind is exactly like muscle, inasmuch as that its strength increases with use. And as one's mind develops his individuality is likewise strengthened, and with that in a like degree comes strength of originality.

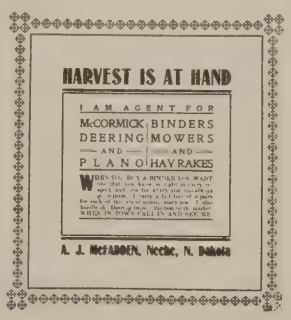
If you are an editor and wish to enhance your success, then, when you read, whether that which has attracted you be the columns of an exchange, an article or book of fact or fiction, read it with a purpose—*the* purpose of learning something that will benefit you in your calling. Read the columns of your own paper, even, study them from all points of view. Do not glance over them carelessly and thoughtlessly, but *think* while you act, and see that your thought is riveted to the act. It is a good plan for the head of a newspaper, after the rush and worry of press-day is all over, to take a copy of his sheet and sit calmly down to study it, scrutinize it, criticize it, in every conceivable detail, so that the following issue may be made better. That publisher will be successful. And very much the same advice might be extended to all other members of the force. Let the pressman study and compare the pages of his own sheet with those on the exchange table, for a possible hint for improvement; let the make-up do likewise; let the ad-compositor study the details of every piece of composition with which he is confronted, with a view to the perfection of his education. And most important of all, mix some thought into this scrutiny, for it is not the sight of typographical specimens that benefits, but the thinking which the sight suggests, the study which the specimen deserves. Deep meditation along the lines upon which more knowledge is desired is one of the greatest schools on earth. This was the school from which Jesus of Nazareth was a graduate, so that when He answered the questions of the doctors and scribes they were astonished at his great wisdom and understanding.

The great number of contributions and communications which have come to us this past month is a gratifying assurance of the growing popularity of THE NATIONAL PRINTER-JOURNALIST among the progressive members of the calling, and a material demonstration that our conscientious efforts to do its department of "Newspaper Criticisms" justice is also being appreciated. The first we come to is this from our artist-friend, Rex H. Lampman, of Neche, N. Dak.:

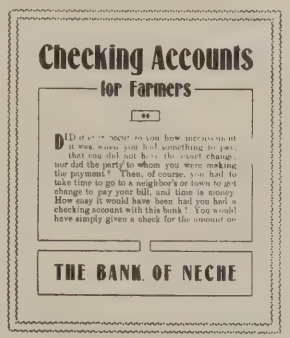
DEAR MR. COPPER:—The last issue of the NATIONAL PRINTER-JOURNALIST to hand, and I write to thank you for what you have to say of my ad efforts. While scarce hoping to be again favored as I was in the August number, I send under separate cover some more ad specimens. We change the two larger general merchandise ads each week now, also some of the smaller ones, for instance, the Bank of Neche ad, of which I send you two specimens.

Yours truly, REX H. LAMPMAN.

Brother Lampman's ads are not in the least disappointing—they are quite as good as we had expected, before opening the package—just as good as those received from him on former occasions, and some of them perhaps even better. Mr. Lampman has one enviable predominating faculty as an ad-compositor, and that is his ability to always maintain ample room in his creations for all the reading matter which they are intended to hold and yet have an abundance of white embellishment. Many ad-setters are prone to hold the ad-writer responsible for any crowded effect in the completed ad; but more or less experience teaches us that whether an ad is well proportioned in respect to its typography and white space depends (except, of course, in extreme cases) entirely upon the good judgment of the compositor in choosing the type.



No. 1



No. 2

But this faculty of reserving sufficient white space is not Compositor Lampman's only enviable talent, by any means, as is demonstrated by the exhibits shown herewith, in which there is manifested a high standard of art. His display is invariably correct and forceful, while his treatment of details is generally perfect. The contemplation of his creations reproduced

No. 3

with this intallment ought to prove an invaluable lesson for our readers. Specimen No. 1 is without fault, in our estimation, and while so much can hardly be said of No. 2, yet the originality of this specimen redeems it from our waste basket.

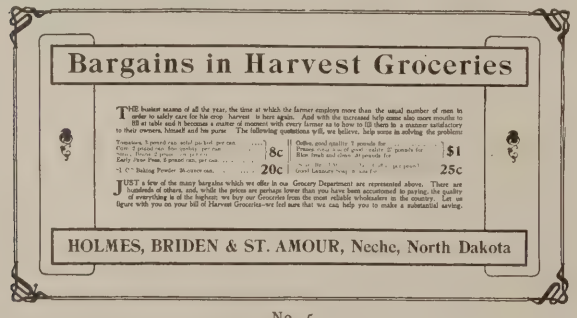
No. 4

We have no adverse comment to make anent Nos. 3 and 4, either, for naught but praise is merited, and while in point of design and general treatment No. 5 is even superior to its predecessors, yet there is that damaging flaw of those two initial letters out of alignment at the top with the following



No. 5

capitals. We hope Brother Lampman will understand that there is a standing invitation to him to contribute to this department, as we consider his ad-products an inestimable part of this "school."

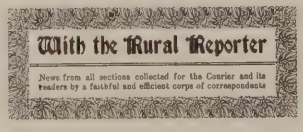
* * *

Here is something from our fraternal friend, A. B. Wood, of Gering, Neb., which is especially interesting to us, and gratifying, too, because it tells of the inauguration of a big improvement:

BROTHER COPPER:—Seated in my easy chair (easy because another week's work is over) I run up against a thought that I've not sent you a copy since we changed our first page to conform to the ideas of yourself and other connoisseurs. Hence, though this is a dull season, and we are not wallowing in business, I'll send you one of today's under separate cover. Do your worst—I'll try to stand for it. Always assuring you of my personal interest in your remarks, I am, Respectfully,

A. B. WOOD.

We have reviewed so many newspapers since we were last privileged to examine the Gering *Courier*, that we cannot for the life of us remember just what it was at that time nor just what we said in commenting upon it, but be that as it may, the paper now merits our coming forward with hearty congratulations upon the material improvement above mentioned and general excellence in evidence in various respects. With a front page of straight reading matter a newspaper cannot help gaining prestige. But this is not the only commendable feature about the *Courier*. The typographical dress is of good faces and in good condition; the impression is first-class; the displayed work savors of up-to-dateness, and the contents are up to creditable standards. Another admirable feature which has attracted our attention and receives our instant indorsement, is the fact that all paid reading notices are collected in a department by themselves, entitled "People's Exchange Column." Beneath a sub-head on the fifth page we get the information that the *Courier's* advertising rates are as fol-



With the Rural Reporter

Happenings of the week gleaned from varied sources over the prosperous territory that the Courier claims as its field

No. 7

lows: "Reading notices, 5 cents the line; black type, 10 cents the line; notices of entertainments for making money, at the above rate, chargeable to the person ordering the same; displayed advertising on contracts of four issues or more, 10 cents the inch; extra for shorter contracts; cards of thanks, 50 cents; resolutions of respect and obituary poetry, etc., regular line rate." But the most pleasing feature, after all, is the make-up of the introductory page. Over the first two columns is the heading shown in reproduction No. 6, and over the fourth and fifth columns appears the heading shown in reproduction No. 7. The heading of the paper itself appears in a text, hence the use of the Tudor in the news heads. But now since this is a six-column publication, why, may we ask the make-up, was not the second head placed over the last two columns in the page? We first thought that it were because the subject of the heading extended into the sixth column, but it does not. If this second head occupied the last two columns with the first head where it is, over the first two columns a much more finely balanced effect would result. We are not in favor of those dashes between the local items, either, but this is a mere matter of personal taste.

* * *

B. Ray Haughton, with the Hall County *Herald*, Memphis, Tex., is a new friend, and writes us as follows:

DEAR SIR:—By this mail I am sending you a copy of the *Hall County Herald* for ad criticism. Please point out my worst faults. My experience has been mostly in country offices with a limited amount of type, and what city experience I have had has been on straight matter, as I have never had confidence enough in myself to apply for a position as job or ad man. Any criticism you make will be appreciated. Yours very truly,

B. RAY HAUGHTON.

This sounds like the letter of an exceedingly honest person, and those are the kind of letters we like to get. Mr. Haughton, honestly desiring benefit from his contact with this department, therefore naturally asks citation of his worst faults. Well, that is just exactly what we will give you, then, dear friend, and we'll give it with the best intentions possible. The worst fault we can discern in this contributor's work, or rather in himself (which, after all, is all one and the same thing, for a man simply puts himself into his work, no matter what his calling), is a lack of sufficient self-esteem and self-confidence, which is one of the most deplorable deficiencies in human nature. Self-conceit is a despicable propendency in an individual, whereas self-confidence is in a like degree admirable. A man may be full of self-conceit yet decidedly

lacking in self-confidence, and vice versa. Self-confidence is absolutely necessary to self-success, and in just the degree that a man is confident in his own abilities to succeed at any certain thing, is he successful. This explains why some men of less ability frequently occupy higher positions than other men whose abilities are conspicuously superior. Many men, especially printers, labor under the false impression that opportunity, environment, associates, and one thing and another have a tendency to hold them down to insignificant positions and insignificant salaries, but this is all a sad mistake. In nine cases out of every ten, the individual himself is wholly responsible for the degree of success which he is enjoying.

No. 9

And one of the first requisites to success is self-confidence—a belief in your own innate powers and an undauntable courage to attempt. That's what keeps men down—fear to undertake great things. Fear always invites the thing feared, hence those who fear failure are those who fail. The lack of self-confidence puts a type-setter down into a rut, and that is what is the matter with our new friend, B. Ray Haughton. But fortunately for humanity, self-confidence is a quality that can be acquired—a quality that can be cultivated and developed the same as any other virtue. The first thing necessary to grasp is that fact which the sainted Emerson proclaimed, namely, that that which one man has accomplished lies within the possibilities of all his brothers. But we would not wish our readers to infer that Mr. Haughton's work is of a bad class, for, on the contrary, it is quite creditable, only, as suggested, there is a lack of originality about it and a monotonous sameness to each design that bespeaks a weakness, not in the materials employed, but in the workman's latent powers. For instance, nearly every one of this contributor's creations is built after the head and tail scheme, with a couple of brass rules dividing the head and tail from the intervening body matter. As may easily be imagined, this does not make a bad ad, but while there is a tendency among nearly all printers to get "rutty," yet each should endeavor to diversify his individual creations. This can best be done, we believe, by studying the work of other compositors, and therefore these departments of review in which the work of compositors all over the United States is reproduced, cannot help benefiting. Another serious fault with our correspondent's ads is that he seems hardly to understand how to properly "lead out" his work. This defect is strongly in evidence in exhibit No. 8, where only a nonpareil is inserted over the first display-line, whereas there most assuredly should be greater space here than between these two lines, which in this instance, inclusive of the type's shoulder, approximates a pica. Since it is the most effective way we can benefit our contributor in these "absent treatments" we are offering him, we are therefore showing the ad as we believe it should be set. (No. 9.) Now, the reader will please take notice that in resetting this ad we have employed practically the same material that was used in the original example, and with the exception of substituting Jenson for the Mazarin, constituting the first two lines, and capitalizing all the principal words in the body, no change has been perpetrated. Nevertheless, no good judge of typography can escape noting the fact that a big improvement has gone on within the ad somewhere, and to many of them the "where" will be readily discernible. It simply illustrates that which we have so often hinted, namely, that the secret of good ad composition is not so much in being able to conceive intricate designs, nor so much in being able to concoct elaborate, grotesque and expensive schemes, as it is in knowing how to correctly treat the details of a simple design. The compositor can immediately see how we have improved this example better than we can consume valuable space in telling it; but we wish to impress this one point, that the whole metamorphosis has been accomplished practically and simply by spacing—that is, by spacing both ways, as one might say, both in the type and between the respective lines of type. In nine cases out of ten that is all a *bad* ad lacks of being a *good* ad. A great many compositors have familiarized themselves with the term "whiting out," but many of them have failed to grasp its correct technical meaning. Some seem to think that if their type possesses plenty of white space between the lines, it is correctly "whited out," and that is exactly where they are mistaken. Proper "whiting out" ofttimes necessitates even the setting of certain lines solid so that adequate white space may be gained for distribution in places where it is needed to give the desired force to the whole. Now, then, a parting word to you, Brother Haughton: First cultivate greater faith in yourself and your powers to succeed; second, take greater pride in your work, remembering that your present position is but a stepping stone to something better, and that that "something better" will be realized in just the degree that you do justice to your present position; remember, also, that Abraham Lincoln "made great occasions of small occasions;" study the specimens of typography which accompany this sketch, read and heed the introductory remarks of this installment of "Newapspers Criticisms;" thirdly, learn that to make a line or a body of type forceful, or to make them "stand out," as we say in the vernacular, you must have the line or the body of type surrounded with the proper amount of white space, and just what the "proper amount" means must rest entirely with your own sense of art, which we are satisfied, by looking over your ads in the Hall County *Herald*, is just as large as anybody's, only it lacks development—it lacks exercise. Try these few suggestions, all of which have been kindly offered, and report to us again.

* * *

Our good friend, Geo. S. Murphy, of The Kelmscott Press, located at Downers Grove, Ill., "where the flowers are blooming, the grass is growing and everything is looking beautiful and natural," sends us a dainty little booklet in a mottled green cover, entitled "Have it Done in the Country." The fact that the little brochure itself, together with the other printed matter accompanying it, is all finished in the neatest manner imaginable, and as the last words in the booklet testify, "This was done in the country," ought to be sufficient to persuade anyone that to have his printing "done in the country," and at The Kelmscott Press, is quite the proper thing for him to do.

* * *

Our readers have certainly not forgotten Compositor H. Mahraun, of Muscatine, Iowa, of whom we had occasion to remark complimentarily in a recent installment. Here is another welcome communication from him:

DEAR SIR:—In this month's issue of THE NATIONAL PRINTER-JOURNALIST I find a reproduction of one of my "Battersen" ads and your flattering criticism. While you say, "Come again," I feel that I am welcome, and for that reason I have mailed you last night's *Journal*, in which I wish to call your attention to the ad of the Boston Store, on page eight. Unfortunately, some of the linotype border does not show up as well as I expected, and I think this was done by stereotyping the page.

Very truly yours, H. MAHRAUN.

Mr. Mahraun's ad is shown in reproduction No. 10, and aside from the defective border which he mentions, it is fairly creditable, although there are one or two other little details

out of kelter. The first we will mention are the little oblong panels in the four corners of the ad, composed of music-face rule and the corners evidently not mitered, which is a practice we could never "stand for." The same defect is in evidence in this design, also, that has been cited in Mr. Lampman's specimens—the initial letter is out of alignment. The two ornaments at the ends of the line, "The Boston Store," are objectionable, as is also the fact of no space between the displayed figures and the abbreviations, "cts.," in the left-hand panel. Thus, again is it demonstrated that the art of creating first-class ads lies principally in the ability to properly treat the details—the little things in the design.

Look for the White Ticket!

THE LAST CALL

Look for the White Ticket!

THE last day of the White Ticket Sale will be Saturday. It has been a grand success from every point of view. The many customers have come and gone, being well satisfied with the prices on all articles, and found that the Boston Store always did just as they advertised. To make Saturday a grand finale of the Great White Ticket Sale we have marked goods even lower than ever. We will close out these remnant lines of Summer Goods, cost or profit lost sight of.

No. 10

The following letter came to us as a pleasant surprise some days ago, emanating from an old employer of ours, now identified with the Eldora (Iowa) *Ledger*, as editor and manager:

FRIEND COPPER:—Just received a copy of the NATIONAL PRINTER-JOURNALIST, which I find especially interesting because of your autobiography and the sketch of H. J. Metcalf. Glad to hear that you are prospering. You will observe by the letter head that I still keep the ink on my fingers. I am sending you a specimen copy of the *Ledger* under separate cover. Wish you would especially observe the advertisements of The New Store on page 2, and of Brown & Jepsen on page 4, and let me know what you think of them. Would be glad to hear from you.

Yours truly,
PAUL C. WOODS.

Editor Woods' paper is quite a creditable six-column quarto weekly, printed entirely at the home plant. One of the features most pleasing to us, as all old readers of this department could easily surmise, is the absence of any boldly displayed ads on the *Ledger's* first page—there is one ad on this page, however,

WE ARE HERE FOR BUSINESS!

To Give You the Best and Latest Goods for the Least Money Possible.

A LARGE SHIPMENT OF

DRESS GOODS!

FROM BROADHEAD MILLS.

When you see them you will say that we are right.

Just received, the Finest Line of Ready-Made Dress Skirts that ever struck the town, made to fit. Also have quality and style. Prices from $2.50 up.

Eggs and Butter Wanted, for which we pay the Highest Market Price.

Geo. H. Jepsen's Department Store,

On the corner, head of Busy Street, ELDORA, IOWA.

No. 11

but fortunately it is not a very "loud" one. The styles and make-up of this publication, while not exactly flawless, are, nevertheless, neat and all right generally, and the contents are highly commendatory, Mr. Woods maintaining the same healthy department of live, keen editorials that we knew of him of old. It seems to us, however, that a greater number of correspondents' letters could be used to good advantage. Turning to the ads to which our friend has especially directed our attention, we regret very much that we are compelled to state that we cannot particularly praise any of them. "The New Store" ad is what we term a discordant effect—meaning that there are too many different kinds of type mixed up in it, and too little agreement between the mixture. The border is quite too bold for an ad of its size and character. While this design is well balanced and correctly displayed, with proper masses of white intervening, there is nothing especially original or really attractive about it, and the useless punctuation of displayed lines is a thing we most seriously object to. We consider the Spire series a very undesirable face for advertising purposes, especially in all-cap lines as employed in the specimen under scrutiny. The "Brown" ad lacks originality. It strikes us as an ad without a design. It is well whited out, however, and will perhaps do good service. The "Jepsen" ad (No. 11), while doubtless the best ad of the trio, yet possesses some of the faults observed in the other two, namely, too many different kinds of type, punctuation in the display, etc., and a trifle more white margins around the inside would have been a desirable improvement. This design is well displayed, however, and pretty well balanced. Trust Brother Woods will let us hear from him often in the future.

* * *

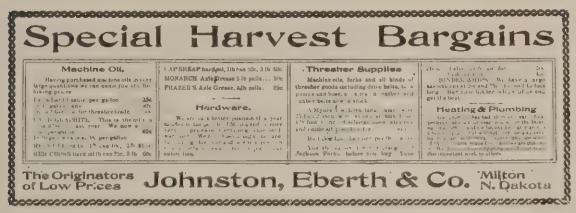
North Dakota is making her importance felt as the producer of good newspapers, and in the number of them reviewed in this department in these latter days. Here is a letter from Publisher O. T. Rishoff, of the Milton (N. Dak.) *Globe*:

MY DEAR MR. COPPER:—Under separate cover I mail you a recent issue of the *Globe* for your inspection and criticism. This is my first contribution to your department, but I am a constant reader of "Newspaper Criticisms" and find them interesting as well as instructive. I am my own foreman and realize the *Globe* has many shortcomings, from a mechanical as well as editorial point of view. However, these are more easily observed by others than by oneself, and I trust you will find time to give the *Globe* and a few of its ads at least a brief review in next issue of the N. P. J.

Cordially yours, O. T. RISHOFF.

There Editor Rishoff expresses a worthy thought, which, while not by any means new, yet is not always kept in view by those who enter the province of critics, that other people are more able to judge the merits of our work, as well as of our personal characteristics, than we are ourselves. And doubly blessed is the laborer who ventures into the aforesaid province possessed with the consciousness that the attainment of perfection in anything is most difficult, and that therefore his product may not be entirely flawless. Now, the Milton *Globe*, as its liberal publisher has surmised, is not entirely flawless, but it compares favorably with the average newspaper, for all that. Let us state by way of introduction, that the *Globe* is a six-column quarto, with ready-printed inner pages. The first pleasing impression that we receive in our scrutiny of this sheet is its "pleasing impression," and even exceeding this is the excellence of the contents, both in abundance and character. There are many headed local articles, an ably and wittily conducted editorial department, occupying a colmun and a half or so of space, besides a creditable amount of locals and country correspondence. But the *Globe* has several features which cannot be accorded this department's approbation, and if we are to benefit Brother Rishoff at all, it must be through direct reference to these points. Our correspondent's confession, as above recorded, to the effect that he is a "constant reader of 'Newspaper Criticisms,'" would seem to render almost superfluous a repetition of our dictates concerning displayed matter on the front page; nevertheless, we cannot refrain from again emphasizing the undesirability of that practice. A newspaper's first page should hold the cream of its contents, for, as we have intimated before, newspapers are quite similar to men. We know a man who is cursed with the

propensity of always presenting the evil side of his nature first to those with whom he chances to come in contact, and he is naturally limited in the number of his friendships, since not many people have the time and patience to search the further depths of his soul for the richer qualities that are surely latent there. We know another man, however, who has all his life cultivated the habit of agreeableness, of being affable and pleasant to those whom he meets, of always first presenting the best side of his nature to his associates. And the friendships of this man are legion. This illustrates the situation with newspapers exactly. That publication which presents an initial page made up of cull matter and overrun with displayed ads will not make friends very readily, because the moment a person picks it up, he is impressed with the suggestion that "there's nothing in it but ads," and he therefore throws it down without investigating the inner pages, either because he thinks he is too busy to do that, or hasn't the patience to search for the interesting parts; whereas, that publication which presents an introductory page composed of the best matter in it, and entirely free from advertising, makes a lasting friend of the reader at first sight, so much so that a profound respect is entertained for all its other pages. Many country publishers worry and wonder how they are to get the people to reading and believing in the advertising columns of their respective publications, and as a special inducement they frequently place their ads in the choicest and most conspicuous positions in their sheets, which, of course, is always on the front page, which is scientifically the very worst thing they can do; because before a publisher can reasonably expect his subscribers to read the ads in his paper, and have faith in them,

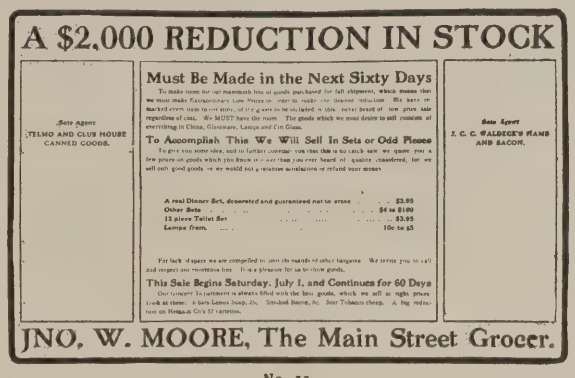


No. 12

he must put out such a newspaper that they will all read and have faith in it first; and the faith in the displayed columns will naturally follow. The make-up of the inner pages of the *Globe* is hardly correct, either, in that the ads are "scattered to the four corners" of the pages, whereas the only proper way is to have them all collected to the right-hand side. Mr. Rishoff has some very good material in his shop, however, and the manner in which he has used it is generally creditable. We reproduce one ad from this sheet (No. 12), which we consider the most praiseworthy of any of the ads in this issue. Its creator has put up a neat design, and displayed excellent judgment in the choice of his type. This is the only kind of a design that an extended letter looks well in, one that is long and narrow, the De Vinne Extended conforming to the ad in a most pleasant manner. The design is in the main nicely whited out, details carefully treated, and perfect balance maintained. The periods after two of the heads in the panels are objectionable, and the lines at either side of the address are of entirely too large a face. Twelve-point here would have given a far better effect. There is another thing about Mr. Rishoff's composition that we must not forget to commend, and that is the fact that he is not "in a rut," as is evidenced by the fact that each one of his ads bears an individuality of its own inherent in its design. This ability to give each piece of work an entirely different aspect by virtue of its different design is something every compositor (and especially every ad-compositor doing all the composition on any periodical) should endeavor to attain. It is that which relieves the monotony of this single series age.

* * *

We believe that Leon E. Derr, of Anna, Ill., once requested that we should not publish his personal letters to us, but unfortunately for that request, his letters always contain such interesting suggestions that we cannot refrain from offering to share them with our readers. Following is the latest we have from him:



A $2,000 REDUCTION IN STOCK
Must Be Made in the Next Sixty Days
To Accomplish This We Will Sell In Sets or Odd Pieces
This Sale Begins Saturday, July 1, and Continues for 60 Days
JNO. W. MOORE, The Main Street Grocer.

No. 13

DEAR SIR:—Enclosed I send ads marked No. 13 and No. 14. The first was set with the second as copy. Please criticise. Also find two other ads run this week (Nos. 15 and 16). The "Kerth" ad *had* to be set in bold face. Do you think the "Salvage Company" ad would have been improved with about eighteen points more light at top and sides of head? Guess you wonder why I send in such commonplace ads (to me), but the advertisers are so extremely well pleased, thought I'd send them in. Can hardly wait for the N. P. J. to get here. It is as welcome to me as pay-day. The "Salvage Company" ad was set by my wife. I use the I. T. F. lay-out sheets, so anyone else can get my ideas of spacing and proportion, and the result is all that anyone could expect. They are the greatest possible help to me, because otherwise the ads get the *compositor's* treatment, which is sometimes just what is undesirable. Yours, etc.,

LEON E. DERR.

It would be difficult to find a more convincing example of what education will do for a compositor than that represented in these two newspaper ads from Mr. Derr. Exhibit No. 14 bears every evidence of typographical ignorance. It is crowded full of displayed faces and is dead, absolutely dead. It is lacking in originality, in artistic treatment, is without force, and is shown only as a demonstration to beginners of what not to do. Please note and ponder a moment upon the vast dif-

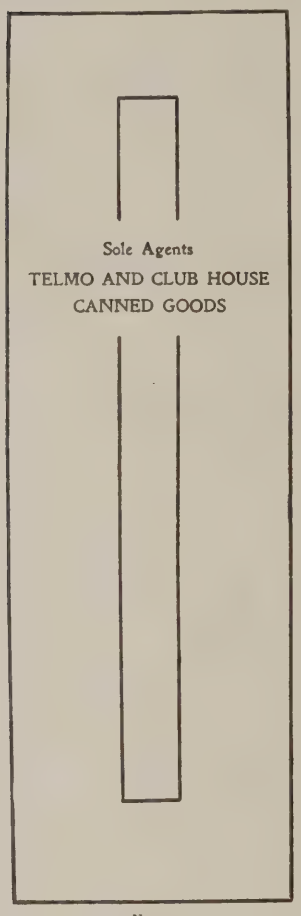
China and Glassware, Lamps and Cut Glass in Sets or Odd Pieces.
A real dinner set decorated and guaranteed not to craze, for $2.95
Other sets from $4.00 to $100.00. A 12-piece toilet set for $3.95.
This sale begins Saturday, July 1, and continues for 60 days.
Jno. W. Moore THE MAIN STREET GROCER. "Always Something New"

No. 14

ference between it and No. 13. Without one stopped to peruse these two specimens he could scarcely be convinced that they were set one from the other as copy and each containing the same matter. The one is crowded and uninteresting, the very thought of reading it producing a feeling of weariness, whereas the other does not appear to have much in it, and the matter is so arranged as to be readily grasped and relished. The design has a touch of real art in it, the display is rather hypnotic

in its captivating force and charm, and the whole aspect is restful and inviting. To the writer, however, the two vacant panels at the right and left of this design have somewhat of an unfinished appearance with them—we have been wondering how it would have done to treat these panels something as illustrated in Exhibits Nos. 13a and 13b. Notwithstanding that the "Kerth & Company" ad "*had* to be set in bold face,"



No. 13a

No. 13b

the compositor has relieved his masses admirably with the proper amount of space, and has given us a serviceable metropolitan-like effect. We do not wonder that the Anna merchants are "extremely well pleased" with their ads in the *Democrat*, for they are of an exceptionally pleasing character,

A GREAT MAJESTIC EXHIBIT
AUGUST 7 to 12
RANGE
AUGUST 7 to 12
TO THE LADIES
We have decided to give another of our popular Majestic Range Exhibits and will have a man from the factory to demonstrate why the Majestic Malleable Range is the best range made—why it will bake better and quicker and with half the fuel you are now using and will last a lifetime.
REMEMBER THE DATE, AUG. 7-12.
GIVEN AWAY
We will give free during the week of exhibit only, a complete set of Nickeled Copper and Enameled Ware worth $7.50 with each range sold. Come in and get a Cup of Coffee, and Hot Biscuits baked brown in three minutes on a Great Majestic Range. Watch our show window.
SEE THE BEST RANGE ON EARTH.
Majestic Ranges were awarded the Grand Prize, the Highest Possible Award by the Louisiana Purchase Exposition Co., at the St. Louis World's Fair.

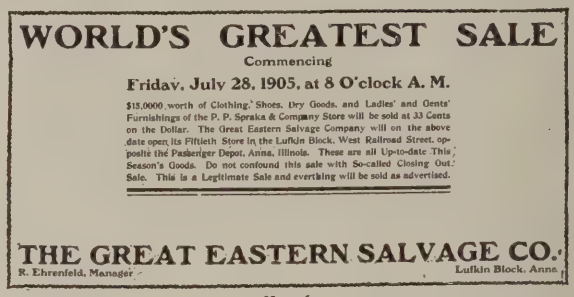
Anna, Illinois

No. 15

and somewhat above the "commonplace." And if by virtue of the I. T. F. lay-out sheet, Foreman Derr rightfully gets credit for the excellent "Salvage Company" design, then Mrs. Derr must be complimented upon her ability of at least being able to successfully carry out her lord's idea. Howbeit, there is something technically wrong with this design, which our correspondent has evidently felt himself, but just what it is is not easy of discernment, because this is a very high grade piece of composition. Some sort of ornamental pyramid tailpiece following closely upon the deep underscore might have finished this example, although we are not particularly in love with ornamentation in advertisement composition. It might



WORLD'S GREATEST SALE
Commencing
Friday, July 28, 1905, at 8 O'clock A. M.
$15,0000 worth of Clothing, Shoes, Dry Goods, and Ladies' and Gents' Furnishings of the P. P. Speaks & Company Store will be sold at 33 Cents on the Dollar. The Great Eastern Salvage Company will on the above date open its Fiftieth Store in the Lufkin Block, West Railroad Street, opposite the Passenger Depot, Anna, Illinois. These are all Up-to-date This Season's Goods. Do not confound this sale with So-called Closing Out Sale. This is a Legitimate Sale and everthing will be sold as advertised.
THE GREAT EASTERN SALVAGE CO.
R. Ehrenfeld, Manager
Lufkin Block, Anna, Ill.

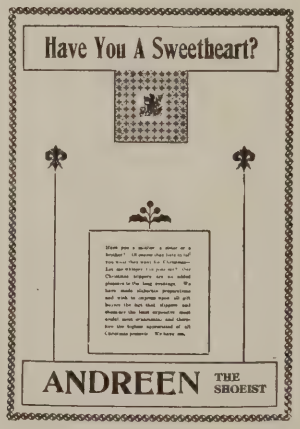
No. 16

have been a better plan to have set "Commencing Friday, July 28, 1905," etc., in one line, leaving out the word "o'clock" if necessary, inserting a rule similar to that at the bottom between this and the body; then the manager's name, together with the address, could have been centered under the name of the firm. And in this case, as Mr. Derr suggests, possibly a little more space above and at both sides of the first line would be appropriate—in fact, we are sure it would; and it is understood, of course, that in setting this ad, as we have indicated, the body mass would naturally be dropped to a more central position than that which it now occupies.

* * *

We next present a welcome letter from another new friend, Charles J. Waehlte, of the Willapa Harbor *Pilot*, South Bend, Wash.:

> For over three years I have anxiously awaited each month the arrival of the P.-J., and have found it a valuable and welcome friend in my work. From time to time I have noticed the criticisms passed on the work of a number of my friends, but never yet have I submitted any work of my own. This I will do, however, at once, and hope to see it in your next issue, and, of course, it is needless to mention, hope the criticism will be favorable.
>
> Fraternally, CHAS. J. WAEHLTE.



No. 17

No. 18

Mr. Waehlte has favored us with twenty-five of his ad specimens, ten of which have been found entirely too good to be engulfed in our "yawning waste basket," and under ordinary circumstances it would have grieved us more than it does to lay the residue aside. Never has the product of a more skillful ad-compositor reached this department, as we are conclusively proving by Exhibits Nos. 17 to 26. These ads demonstrate that their creator is a real artist, possessed of the finest sense of typographical fitness, correct distribution of white,

thorough treatment of details, and perfect balance. They show further a correct conception of proper display, an absolute knowledge of typographical harmony, a strong development of originality, a fine taste for appropriate ornamentation, deep

beautiful specimens, for they speak most forcibly for themselves. Let it suffice to add that we are extremely well pleased with this contribution from Brother Waehlte, and that henceforth we shall number him as one of the faculty of this great school.

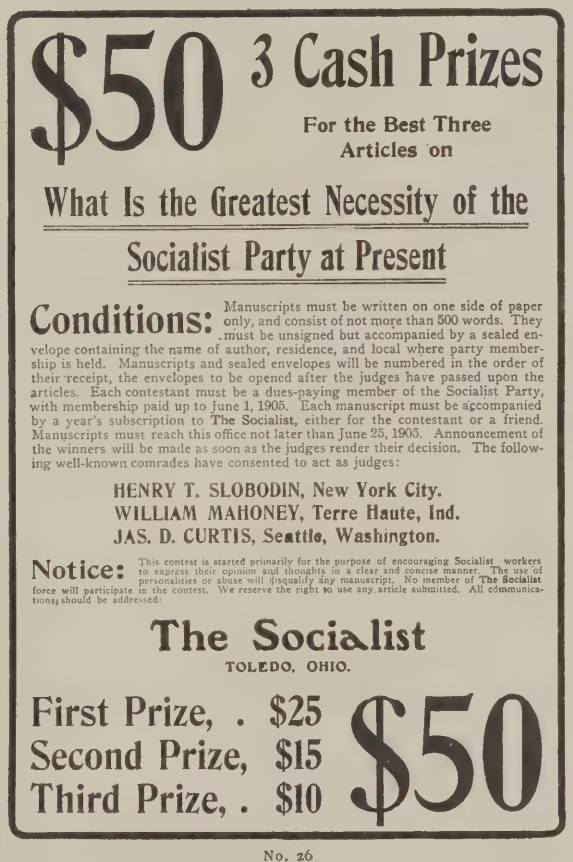
* * *

Mention was made briefly in our last installment of a communication received from E. B. Ault, of Toledo, whose friendship is a relic of amateuria. Brother Ault says:

DEAR FRIEND COPPER:—Suppose you won't object to being called friend by me at this late date. Had expected to write you before this, but moving around has kept me too busy. Left Lewiston last April and have been on the *Socialist*, of this city, working as general all-round man. Am sending you a few copies of the sheet. While I did not set any of the ads, those I have marked were designed by me, and I want your criticisms of them in the N. P.-J. We are compelled to make up the paper in about an hour in the morning, in order to get it out of the way of the daily issued in the shop in which it is printed, so, of necessity, it is sometimes out of balance. Will be pleased to consider carefully any criticism you may have to offer. I remain as ever,

Yours sincerely, E. B. AULT.

No, to be sure, Brother Ault, we do not object to being addressed as "Friend" by anyone, because to our way of thinking it is much more preferable than "Foe;" and especially not from one with whom, despite the fact that we have never had the pleasure of meeting personally, we have been able to keep in touch for years. We reviewed *The Socialist* last month,



$50 3 Cash Prizes
For the Best Three Articles on
What Is the Greatest Necessity of the Socialist Party at Present
Conditions: Manuscripts must be written on one side of paper only, and consist of not more than 500 words. They must be unsigned but accompanied by a sealed envelope containing the name of author, residence, and local where party membership is held. Manuscripts and sealed envelopes will be numbered in the order of their receipt, the envelopes to be opened after the judges have passed upon the articles. Each contestant must be a dues-paying member of the Socialist Party, with membership paid up to June 1, 1905. Each manuscript must be accompanied by a year's subscription to The Socialist, either for the contestant or a friend. Manuscripts must reach this office not later than June 25, 1905. Announcement of the winners will be made as soon as the judges render their decision. The following well-known comrades have consented to act as judges:
HENRY T. SLOBODIN, New York City.
WILLIAM MAHONEY, Terre Haute, Ind.
JAS. D. CURTIS, Seattle, Washington.
Notice: This contest is started primarily for the purpose of encouraging Socialist workers to express their opinion and thoughts in a clear and concise manner. The use of personalities or abuse will disqualify any manuscript. No member of The Socialist force will participate in the contest. We reserve the right to use any article submitted. All communications should be addressed:
The Socialist

No. 26

so will turn our attention at once to the ads. Having found them, we are not surprised to see that they are all good, plain, substantial designs, sane and sensible, well displayed and neat. We especially like the "$50 Prize" ad shown in reproduction No. 27. Come again some time.

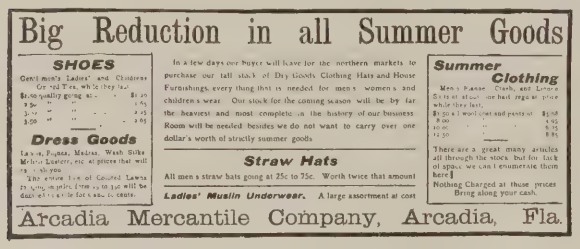
* * *

Here is an interesting communication from our Frater Child, of Arcadia, Fla., one of the publishers of *The Champion:*

DEAR SIR:—I am sending with this, under separate cover, copy of the *Champion*. The man you criticised, at my request, in the May N. P.-J. asks that you criticise his ad marked on page three. He likes this—is an old printer, who gave up the newspaper business for merchandising, but still has good ideas on typographical style, and surely appreciated your former criticism. You are at liberty to tear up, or commend, anything that deserves it in this issue, and we will appreciate any hints you may give us that will be of use to us. With best wishes, Yours fraternally,

ROYAL B. CHILD.

It is a pleasure to us, indeed, to look upon this copy of the *Champion*, for in it is to be seen the incorporation of many of the suggestions of this department. Especially is this fact conspicuous in point of make-up, which is now up to the highest standard of neatness and correctness. In fact, aside from some incongruity of displayed work, all that this little publication now lacks of meriting an eminent score is the improvement of its press-work, the impression on this copy at hand being sadly deficient. Mr. Child, face to face with his printing machine, is better able to locate the trouble than we are at this distance—"a word to the wise is sufficient." The Arcadia Mercantile Company's advertisement in this issue shows, too, that our southern friend is gradually catching on to that which is correct and proper in ad composition. (No.



Big Reduction in all Summer Goods

SHOES

Dress Goods

In a few days our buyer will leave for the northern markets to purchase our fall stock of Dry Goods Clothing Hats and House Furnishings, every thing that is needed for men's women's and children's wear. Our stock for the coming season will be by far the heaviest and most complete in the history of our business Room will be needed besides we do not want to carry over one dollar's worth of strictly summer goods

Straw Hats

All men's straw hats going at 25c to 75c. Worth twice that amount

Ladies' Muslin Underwear. A large assortment at cost

There are a great many articles all through the store but for lack of space we can't enumerate them here

Nothing Charged at those prices Bring along your cash.

Arcadia Mercantile Company, Arcadia, Fla.

No. 28

28.) This ad, not unlike the average, is all right except in point of the treatment of details. It would have been much better to have finished the two-point rule panels at either side and have allowed a trifle greater white margins inside of these panels. The advertisement to which Mr. Child has called our attention in particular, which is the "Gore & Scott" ad, shown in specimen No. 29, does not impress us as anything especially attractive or commendatory. We are sorry to have to say this,

You Take No Chance On

SELZ

ROYAL BLUE

AND

Perfecto Shoes

They are doubly guaranteed, Selz Schwabb & Co., of Chicago, back us up and we personally back up our customers Buy a pair, give them an honest trial, and if they are not all we claim bring them back and have your money returned What more can you ask?

Gore & Scott,

Arcadia, Florida.

No. 29

but that is our honest, conscientious conviction. While we are certainly not an advocate of crowding the space chock full of type, just because it costs money, yet it seems to us, somehow or other, that it is a shame to pay out one's hard cash for advertising on newspaper space which in area is quite adequate for the exploitation of something extraordinary, and then in the end to realize something so ordinary as this design. It is our opinion that in order to pay, an ad in the columns of a paper containing so many ads as grace the pages of the *Champion* must of necessity partake of the uncommon or remarkable. Still, in attaining this margin of remarkableness, we do not advise excessive or grotesque elaboration, for that is not wholly necessary. For instance, to more definitely illustrate our point, let us suppose that this ad had been designed something like Mr. Waehlte's No. 19. Suppose we make the upper panel the full width of the inside measure—that is, corresponding with the width of the lower panel, and of sufficient depth to contain the words, "Selz Royal Blue And Perfecto Shoes," in two lines of even length; within four points or a nonpareil of the top of this panel suppose we set in modest caps, letter-spaced if necessary to make the line equal in length to the width of the panel, the words, "You take no chances on;" in the lower panel then we will set the name and address, "Gore & Scott, Arcadia," in one line, of an appropriate size type; the little box panel at the left will contain the first paragraph in Roman, and that at the right the second paragraph, while right between these about half a pica from the top rule of the lower panel we will insert in one line the words, "What more can you ask," which is exactly what we would say to Messrs. Gore & Scott et al. after the job was completed. Mr. Child, to become a successful ad compositor, must exercise more thought in designing his creations and more care in the execution of details—for instance, note those gaping corners, that half-pica gap in the border of the left-hand side of Exhibit No. 29, and also the half-pica overlap at the upper right-hand corner of the same design. But don't become discouraged, Brother, for you have made great progress within the past year, and we heartily rejoice with you over it. Please continue to keep us posted on your further achievements, for we assure you that we are interested in you and your work on the *Champion*.

* * *

Ernest Tomowske, of Milbank, S. Dak., writes us again as follows:

DEAR SIR:—By the *Review* which I mail you today you will see how your criticism of my work in the August PRINTER-JOURNALIST took with "boss." I have been with the *Review* some four or five weeks, and, therefore, have marked some of the ads I set to distinguish them from the work of others. Those marked (x) were not written by myself, I only set them. I also enclose two ads upon which I would also like your criticism. It may seem as though I stretched my imagination a long ways when I used the exclamation point in the Nelson ad, but I rather like it; what do you think? Guess I'd better qu now and give someone else a chance, or you will think I'm trying to get all the benefit from your "school." I thank you for the above mentioned comment.

Yours respectfully, ERNEST TOMOWSKE.

The comment of the Grant County *Review* on our late criticism of Mr. Tomowske's composition is very creditable all around, reflecting favorably upon its editor for his liberality, upon Mr. Tomowske for his ability and energy, and upon this journal as one of the leading trade papers of the United States. We are indeed pleased to note that Mr. Tomowske is employed in a shop that fully appreciates his worth. We learn further from this little article in the *Review* that our correspondent is also taking a course in ad writing, which further confirms our first opinion of him. That's the sort of printer that makes a success at the business (and we hope these few conscientious praises will not make their subject vain), one that keeps eternally striving to perfect himself and his education in his chosen calling, and thus making himself more valuable to his employer, whereas that boy who puts in his whole time out of the shop flirting or "hiking" around in attendance upon the hundred and one trivial social functions with which every community, large or small, is blessed, or cursed, whichever the case may be, and then puts in the rest of his time inside the office dreaming sleepily o'er those pleasures, both retrospective and prospective, will invariably find slow progress on the road upward, provided he ever stops to think of it at all, which he seldom does until too many milestones have been passed in the opposite direction. But we would not be interpreted to mean by this that we do not believe in the social mingling of the sexes in society, or in social functions, for, on the contrary, we believe in the good of both of them,

both for the employer and the employed, both for the hirer and the hireling; but just as with all the other pleasures of life, one should be temperate in his indulgence. But there! again, like Artemus Ward, we are making these lectures remarkable chiefly for their (?) irrelevancy. Criticism of the *Review* has not been requested, therefore we defer, and will conclude by adding that Ernest Tomowske as an ad compositor has the rare ability of creating exquisitely beautiful designs out of merely type and borders, as we can demonstrate with his specimens

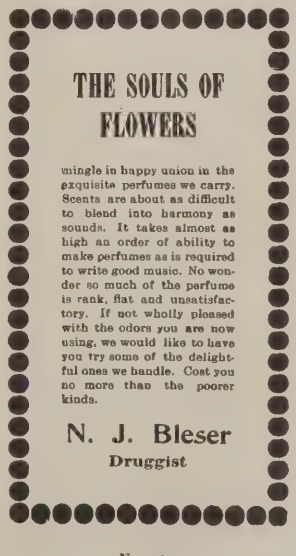
Not one will escape death
when a liberal use
is made of
PARIS
GREEN
and other Insect-destroying Preparations that we carry. Don't neglect your plants now. Spray frequently and copiously and the bugs will cease to exist
!
NELSON'S
DRUG STORE

No. 30

Nos. 30 to 32. And, oh! yes, we came near forgetting to say that it is sometimes quite necessary for a printer to stretch his imagination to get good results, for, like any other faculty of the human mind, it has to be exercised to be kept in health.

BETTER
SPICES
For your canning and pickling recipes you need the kind of Spices you get here. Spices are drugs and we buy them as carefully as we do any other item of drugs. We buy Spices on the basis of quality. Our first effort is to get the very best, our next to get them as cheaply as possible. You will find that these good Spices go so much farther and give so much better results as to be far more economical than the grade that is cheap in price only.
N. J. Bleser
Druggist

No 31



THE SOULS OF
FLOWERS
mingle in happy union in the exquisite perfumes we carry. Scents are about as difficult to blend into harmony as sounds. It takes almost as high an order of ability to make perfumes as is required to write good music. No wonder so much of the perfume is rank, flat and unsatisfactory. If not wholly pleased with the odors you are now using, we would like to have you try some of the delightful ones we handle. Cost you no more than the poorer kinds.
N. J. Bleser
Druggist

No. 32

The "screamer," as used in specimen No. 30, is not bad, although a De Vinne exclamation point would have been more artistic as a tail-piece. We wish you the success as an ad writer which we dare say you will attain, basing our prophecy on the specimens with which we have been favored. In reference to the words in the foregoing letter about "quitting," if it refers to patronage of this department, it is entirely wrong, for this "school" is a great deal like that which Admiral Schley said of the battle of Santiago, "There is honor enough in it for us all."

* * *

Foreman Leon E. Derr, of the Anna (Ill.) *Democrat,* is one of our most interesting and interested contributors. During the month of August he favored us with the following communication:

DEAR SIR:—Thank you for your criticism of the *Democrat,* in last month's N. P.-J. I am afraid it will be a long time before I can reach your ideal in makeup, because most of our advertisers have yearly contracts and require position for cash consideration. See! Would like to know how *you* would set heads under similar circumstances. Should I use the eight-point De Vinne all the way through? It comes the nearest matching the headings on plate matter. Expect to go to Chicago for presswork course in *Inland Printer* technical school in about six weeks. Guess I'll learn a few new wrinkles in composition, too. Yours respectfully,
LEON E. DERR.

My good gracious! Brother Derr, we could never complain of the makeup of the *Democrat,* if it were always as good as that of this copy at hand. You have done exceedingly well in carrying out our suggestions, especially so when you were handicapped, as you confess, by the advertisers' contracts. In point of makeup your paper is now as good as any that comes to this department for review, and we congratulate you upon your good sense in making the improvement. One has some patience in offering advice to one who will accept it so admirably as has Mr. Derr in almost every instance, but how often we notice those who have been criticised in this department for conspicuous errors, which would be found quite as conspicuous after the criticism as before. It is to be presumed that when a printer appeals to this department, or any other department of criticism, he seeks advice; and while, of course, to accept or reject that which is offered, is the contributor's indubitable privilege, nevertheless, it is doubtless a gross incourtesy to ignore proffered counsel, after having asked it, and yet keep coming for more. The heads in this issue of the *Democrat* are strictly all right, eight-point De Vinne making an admirably neat head letter, especially so since it matches the plate heads and the sheet's title. Just omit the double advertising rule following the double-column department headings, and also the monkey-dashes after single line heads, in all of which there is no use or reason for periods. Mr. Derr is another one of these progressive modern printers, and we wish him success in all things. The Kerth ad in this issue is a fine one.

* * *

Unfortunately, two ad-designs submitted in our ad-setting contest last month were overlooked, and are therefore being shown in this installment. They are the product of Jas. M. Osborn, proprietor of "The Quick Print Shop," of Daytona,

Fla. Neither of these specimens (Nos. 33 and 34) would score very highly, since, while fairly neat, they lack the necessary force which an ad should have. This weakness is due principally to the faces employed, none of them being good ad-

type. But as Mr. Osborn says, these are economical creations inasmuch as that the cutting of not a single piece of material was required in their construction. Details denote careful treatment.

* * *

Owing to our contest last month, we did not show any other ads received, confining ourselves to the newspapers alone, consequently we have an abundance of ad reproductions for this installment. O. H. Walters, of the *Argus*, Albion, Neb., has sent a packet of quite creditable specimens, accompanied by the following welcome note:

Summer Clothing
We have an exceptionally fine stock of medium and light weight clothing that in fit, style and quality are not excelled. We especially invite your inspection of our
New Outing Suits
with the coats half lined, made with a shape retaining front in the home spun crash and other light weight fabrics in the light brown and grey effects, from $8.50 to $10
We have a new line of NECKWARE for the Fourth of July trade, also everything in working men's garments.
Jos. Papez The Clothier

No. 35

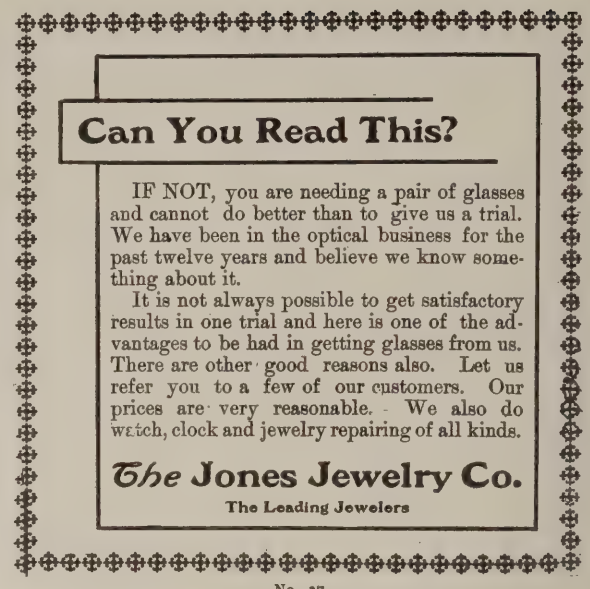
DEAR SIR:—Have mailed you under separate cover a few ads clipped from the *Argus* for criticism. Will appreciate any suggestions you may offer. The N. P.-J. is a great help to me and I think each issue alone is worth the price of a year's subscription.

Yours truly, O. H. WALTERS.

29c Special
We are closing out 200 pair
Boys' Knee Pants
Sizes 4 to 14, worth from 50c to $1 per pair. These are good goods, well made and are just the thing for the boys. Look at west window for them.
Gunther & Shirley

No. 36

As intimated above, and as indicated in the accompanying reproductions, Mr. Walters ranks considerably above the average in setting of ads. (Nos. 35, 36 and 37.) The joining of the corners in No. 35 is somewhat defective, and where a line is enclosed in a panel, as at the top of this ad, it never looks well if there is greater space between the words than at the ends of the line. In displaying "New Outing Suits" it would doubtless have been better to have set "New" as the first line and "Outing Suits" as the second. By the way, "Neckware" is a new commodity to us, yet we note by this ad that Jos. Papez had a new line of it "for the Fourth of July trade," which might indicate that it were some sort of new-fangled fireworks. There is no special fault to be found with specimen No. 36, and specimen No. 37 is an especially neat little ad, its wording being as catchy as its design.



Can You Read This?
IF NOT, you are needing a pair of glasses and cannot do better than to give us a trial. We have been in the optical business for the past twelve years and believe we know something about it.
It is not always possible to get satisfactory results in one trial and here is one of the advantages to be had in getting glasses from us. There are other good reasons also. Let us refer you to a few of our customers. Our prices are very reasonable. We also do watch, clock and jewelry repairing of all kinds.

O. BYRON COPPER.

VALUE OF NEWSPAPER TRAINING IN PUBLIC LIFE.

Mayor Geo. B. McClellan, of New York City, has had enough to do with the press to know something of the value of a newspaper training as a means to fit one for public life. He recently said:

The best possible preparation for a political career is a few years' experience as an active, conscientious reporter on an American newspaper. Such an experience rapidly develops in any young man the best qualities that are in him. Presupposing him to have enjoyed the advantages of a fair education, he learns to apply all the knowledge he possesses and to ardently hunger for more. Instead of poring over ledgers in a business office, he is studying in the great school of human life. He constantly broadens his intellectual view and gains a comprehensive grasp of public affairs. The variety of his work sharpens his intelligence; his enthusiasm grows with his development, and he perforce becomes a critic of men. This is the primary essential in a public man's career, and no other preliminary training affords it, and the other advantages mentioned, to any degree comparable with practical journalism.

SOME VALUABLE "KEEPS AND BE'S."

Keep calm.
Keep your temper.
Keep everlastingly at it.
Keep awake.
Keep interested.
Keep cool.
Keep your mind concentrated.
Keep from envying those who appear to be more successful than yourself.
Be progressive, but not reckless.
Be business-like.
Be courteous to all.
Be accurate in keeping accounts.
Be prompt.—*William E. Towne in The Hustlers' Magazine.*

1319 WEST RAVENSWOOD PARK, CHICAGO, ILLINOIS

EASTERN OFFICE:
150 NASSAU STREET, NEW YORK CITY.

WILLIAM E. HERBERT . . . . . Resident Manager, Chicago Office
BENJAMIN S. HERBERT . . . . . Secretary

SUBSCRIPTION RATES:—In the United States, Canada and Mexico, $2.00 per year, in advance; single copies, 20 cents.

Orders for subscriptions will be received by all dealers in printing material in the United States and Canada.

Remittances may be made by draft, money order, or registered letter. Make all remittances free of exchange and payable to the order of the NATIONAL PRINTER-JOURNALIST COMPANY.

FOREIGN SUBSCRIPTIONS:—To Countries within the Postal Union, 10s. 6d.

FOREIGN SUBSCRIPTION AGENTS:—International News Company, Breams Buildings, Chancery Lane, London, E. C.; F. O. Strong, 111 Fleet Street, London, E. C., G. G. Turri & Co., Melbourne, Australia; The India Printers' Agency, 249 Mint St., Madras, India; Successful Advertising Co., Bangalore, India; John Dickinson & Co., Ltd., Cape Town, South Africa.

ADVERTISING RATES PROMPTLY FURNISHED UPON APPLICATION

The NATIONAL PRINTER-JOURNALIST is unequalled as an advertising medium in its field. No attention paid to postal card requests. Information cheerfully furnished to all patrons.

Subscribers and patrons will confer a favor on the National Printer-Journalist Company by sending in the names of responsible newsdealers who do not keep the monthly on sale regularly.

Manuscript sent in for publication must be accompanied by a letter of explanation and return postage.

CHICAGO, OCTOBER, 1905.

Be kind and thoughtful of your employees and ever recognize loyal or superior service.

* * *

The health, comfort, good feeling, and well being in every way is as important to the employer for effectiveness and desired results as to the employee himself.

* * *

Be on good terms with your men. The bane of spurious unionism is that it destroys the *entente cordiale* between the employer and his employees.

* * *

The wonderful and constant growth of newspaper advertising is the strongest proof of its efficiency, and this growth is a compliment alike to the enterprise of business men and newspaper makers.

* * *

Trained judgment, quick discernment, good nature, and generosity are four things in which an editor should not be lacking, and a fifth that should never be wanting is broad, deep sympathy that brings one in touch with all humanity and is a very important part of what is known as news sense.

* * *

Do not be afraid of exhausting your powers or your knowledge by using or giving. All the faculties of the mind, soul and body are strengthened by use. The more knowledge you impart the more you acquire. Life comes by living. Pour out your life freely and each day it will come back to you enlarged and glorified.

Do not overpraise a man unless you wish to do him a personal injury. Even overpraise of a great President will, in the end, do him more harm than good. Do not praise the unworthy, for it is worse than casting pearls before swine, for pearls fed to hogs give them no additional power to injure. Praise bestowed on the unworthy may place them in positions of power where you cannot escape them.

* * *

Reciprocity is as much the rule to success in newspaper publishing as in business. We must give, in order to receive. We must confer benefits to expect benefits. There are hundreds who seem willing to receive at the hands of the newspaper without making any returns and are only alive to the power of the press when, in the performance of duty, the newspaper comes in contact with their selfish interests, schemes, pet theories or institutions or publishes their wrongdoings.

Such need an occasional strenuous lesson and when such a lesson is given in all sincerity, with fearlessness and vigor, it generally works good both to the individual and to the newspaper. It results in awakening a wholesome respect, yet it is the mission of the press, above all else, to serve, and valuable service will bring recognition and reward.

* * *

The convention of the National Photo-engravers, the National Electrotypers and the United Typothetæ of America organizations this year have been noted for strict attention to business and the prompt attendance on the sessions. There was an air of sober earnestness and of deep conviction that augurs much for the success of these three associations of progressive, up-to-date business men—engravers, electrotypers and employing printers. There is a time for everything in this world, but when men unite to advance the knowledge and to improve the conditions of their craft, the time for recreations, excursions, fun and frolic is not during the sessions of their conventions. Absenting oneself from meetings is an offense to the officers, to those on the program and to the whole organization. Attendance is the duty of every member and ought to be a pleasure. Observance of this duty and privilege shows a higher standard and suggests accomplishments of value and importance.

* * *

The United Typothetæ of America, at its recent convention, did the wise and just thing in placing its contention with Typographical Union on this high plane of personal liberty, of freedom of contract and labor. To our way of thinking, it does not so much matter whether a working day is eight hours or nine hours, so long as the workmen are paid a fair wage in proportion to their ability, efficiency and earnings. There is an incontrovertible argument or self-evident truth, however, in the existing conditions, showing that, without the power to reduce fixed expenses, such as are the permanent investment, the cost and wear of machinery, rent, interest, soliciting, bookkeeping, management, supervision, etc., it is impossible to go on reducing the output or the hours of labor and increase wages without resulting in bankruptcy. This is made doubly impossible when the man who owns the business and must make it profitable in order to pay wages is deprived of the control of that business or the direction of those in his employ. Above all business considerations are the principles of right involved. While the members of the United Typothetæ stand

firmly on the recognized principles of personal liberty and contend for the recognized right or privilege of conducting their own business, of making their own contracts for labor and the right of every man in this free country to work, free from the dictation of others, they will command the sympathy and support of all intelligent, liberty-loving people.

* * *

The movement inaugurated by the United Typothetæ of America, to establish schools of typography, should be given every possible aid and encouragement. As has been frequently stated in these pages, industrial education is the increasing need in this country. Its growth in the past few years has been very encouraging, yet the demand for trained workmen has not been begun to be met. Every one knows that under existing conditions the proper training of craftsmen in our printing offices is next to an impossibility. The loss from incompetent workmen in this craft, if it could be estimated, would astound even careful employers. It goes without saying that a printer should have a thorough education in all the elementary branches of learning. His knowledge of the meaning and use of words, of spelling, punctuation and capitalization should be as nearly perfect as possible. Beyond this, typography presents a vast field for study and practice. Printing is not only a trade, but it is an art, and an art that is approaching, in the artistic results demanded, that of the painter on canvas. An artistic printer must understand the laws of proportion, of perspective, of color, of artistic touch and effect. He should be well informed, too, in history, biography, and all current knowledge. We believe that the mission of our public schools should be broadened into the idea of preparing the youth for healthful, useful, successful lives, as well as for intelligent citizenship. A man is worth very little as a citizen who cannot first make a living, who cannot so use his hands, his eyes and his mind as to be effectually helpful in his work, instead of blundering along and retarding work and hampering results by having constantly to be shown, helped and corrected by others. One-half the expense or loss in many printing offices comes from the correcting of blunders that never ought to have been made, or the permitting of these blunders to slip through, uncorrected, necessitating the doing work over again or else destroying the reputation of the office and entailing not only worry but loss upon patrons. A thorough training and knowledge of the art pays both the employer and employee. This is strikingly exemplified in machine composition. Thirty dollars a week and more are frequently paid to the expert machine operator, and such an one is more profitable at that price to the employer than is an incompetent operator at one-half that price. The per cent of loss on the work actually turned out in no less on the incompetent printer at the case than on the incompetent operator on the machine, and often much greater, though the loss is not so evident. The education of printers at the expense of employers would be an investment that would pay a hundredfold the amount of the outlay or investment required. When a goodly number of thoroughly trained printers were ready to take their places in all our offices, all others would be compelled to come up to their standard, unless, forsooth, an overbearing, dictating unionism should have the power to prevent the employment of the trained and efficient, and force the incompetent into the offices. This, however, need never be feared, so long as the employers stand together and insist on the rights of personal liberty and managing their own affairs.

* * *

In the *Century Magazine* for April, May, June, July and August, Melville E. Stone, Manager of the Associated Press, told an interesting story of news gathering over all the world. The Mansfield, Ohio *News* used this story with the consent of the writer, in a most effective manner, that made it not only a splendid advertisement for the *News,* but transformed it into a most interesting local article, filling a full page of the paper. We reproduce the page to show how this was neatly accomplished. It only required three etched plates, showing, first, telegraph wires from all over Ohio, and then, second, from all over the world, and, third, from all over Richland County, centering in the upper story of the splendid *News* building, with appropriate headings and a brief introduction to the article. We commend the appropriate declarations printed "under the wires" in each illustration:

(1) The *News* makes a special feature of Ohio news. Besides covering larger State happenings, special correspondents, in the important news centers, furnish in brevity form, the day's events by telegrams, making each day a department of news notes of Ohio towns.

(2) In Mansfield the *News* controls the Associated Press franchise. The report is taken over a local wire by its own operator direct to the *News* editorial rooms. Few papers, in cities of Mansfield's size, employ so expensive a service.

(3) No other paper so thoroughly covers Richland county happenings as the Mansfield *News*. It's the "Home Field" to us and we realize its importance to our subscribers. By means of forty special correspondents, the *News* keeps in constant touch with every section of Richland county.

Besides sending out copies of the paper containing this illustrated and very convincing article, the *News* followed it up with postal cards to residents of Richland county who were not subscribers of the paper. This is an illustration of one of the many methods by which Capt. W. S. Cappellar and his associates keep up the circulation of this splendid local daily, in a comparatively small interior city, to the high mark of some twenty-five thousand copies and more and constantly growing.

* * *

The representatives of the news bureau and the reporters for the great dailies made a signal record of success in reporting the doings of the peace commissioners at Portsmouth. They established a reputation, not only for being men of broad intellects and knowledge, of conscientious industry and devotion to duty, but as reliable gentlemen worthy of all confidence and trust. Mr. Witte, who, whatever may be thought of the ruling class in Russia, proved himself to be a broad, liberal minded man, rightly paid these newspaper workers the following deserved compliment, in his speech of thanks:

"Now, gentlemen, that we are about to part, I should like to say I owe you a debt of gratitude which I openly acknowledge, and, were it possible, would gladly repay. I fear that from stress of work or indisposition I may at times, perhaps, have spoken to you less freely, less attentively, less often than you and I would have liked. If so, I now apologize frankly, and assure you that every such act greatly misinterpreted my intention, which was to show you all the consideration due from one honest worker to another. Gentlemen, accept for yourselves and convey to your colleagues throughout the States my heartiest thanks and my best wishes."

"Read all the literature you can bearing upon the pursuits you mean to follow and you will succeed."
—*Herbert Vreeland.*

A WORTHY SILVER ANNIVERSARY OCCASION.

It is natural for men to mark time by epochs or the rounding of some fixed cycle of days, months or years. The completion of the period of twenty-five years, when observed, has come to be known as the "Silver Anniversary" and is an important milestone in the life of every human undertaking or enterprise under the direction of one man, copartnership or company. If signal success has been attained it is an appropriate time for rejoicing by the parties immediately concerned as well as by friends and patrons. Twenty-five years ago, in New York City, two men, under the firm name of F. Wesel & Co., commenced the manufacture of brass and steel rules, stereotype blocks and galleys.

The growth of the business through good workmanship, industry and promptness, at any cost or trouble, to accommodate customers was, from the very first, rapid and substantial and today the factory, at 70-80 Cranberry street, Brooklyn, N. Y., "just across the bridge," is the finest in America for the manufacture of printers' and plate makers' specialties.

The same man is at the head as in the beginning, while his son, F. Wesel, Jr., thoroughly educated and trained for the work, occupies the position of Vice President of the now great corporation. To celebrate the worthy accomplishment of twenty-five years, invitations were extended to all friends and patrons to attend a reception in the splendid new building on September 13, 14 and 15, followed by an outing and picnic on Saturday, the 16th, of all the employes and invited guests.

Many hundreds each day availed themselves of the opportunity to inspect this model establishment, to study the perfect arrangements, to examine the wonderful machines and appliances representing the highest achievements in the particular branches of inventions of scientifically constructed machinery, and to watch the construction of the hundreds of devices of varying sizes and patterns in the process of making, and last, but not least, to participate in the congratulations and felicitations of the occasion, to partake of good cheer with the generous hosts, all the members of the great Wesel Manufacturing Company, and to indulge in sociality. The occasion was filled with instruction as well as pleasure. The perfect system, the cleanliness, brightness everywhere, the adaptation of everything to the accomplishment of the ends designed, the rapid forwarding of work, the absolute perfection of production, were everywhere noticeable.

As a model for other establishments, we shall have more to say in detail later. One of the things that particularly attracted our attention was the modern, up-to-date electrical equipment. There are over two hundred individual motors and six hundred incandescent lamps of sixteen candle power and ten arc lights of 160 candle power. The individual electric drive shows a saving of room, a great economy in the power consumed, an increase of output and a more perfect and uninterrupted diffusion of light. Every attention has been paid to this great desideratum of good light, as well as to ventilation, sanitation, brightness and cleanliness and to the convenience and comfort of employes. The business offices are well and tastefully furnished and in every way the establishment is a worthy home of a great modern industry, where intelligence and good will reign.

We were impressed, by meeting different visitors as well as members of the company, with the fact that New York is drawing men from every State of the Union as well as from the progressive nations of Europe. Here were men whose homes had been in Minnesota, Iowa, Illinois, Indiana and we know not how many other western States, as well as New Yorkers and New Englanders. But this is another story.

In this commemorating of the twenty-fifth anniversary of the founding of the F. Wesel Manufacturing Company the affair took largely the form of an enthusiastic celebration on the part of the large force of employes of the company. The large factories and warerooms, at the corner of Henry and Cranberry streets, Brooklyn, had been handsomely and artistically decorated throughout the different departments; the buildings had also been patriotically decorated outside, American flags, and bunting in festoons and drapery were everywhere.

It is a well-known fact among the employes of Mr. Wesel that he is a very early riser, and in order to be on hand early enough to escort him from his residence at 78 Hicks street to the factory, the factory employes gathered at his residence with their band of music at 7 o'clock in the morning of the day opening the celebration. After serenading Mr. Wesel, they formed in line and escorted him to his office in the factory. The heads of the mechanical departments presented Mr. Wesel with a large group picture, in which was shown each individual factory foreman. This was also accompanied by a set of beautifully engraved resolutions. The presentation of these occurred in the general offices of the company. Mr. Gutekunst, the oldest present employe of the F. Wesel Manufacturing Company, was the first speaker, and said:

"Mr. Wesel: "Twenty-five years ago today you laid the foundation of this business, which now shines as the brightest star in its line, not only in our country but in the whole world.

"I may say in the name of my fellow employes that we

SILVER LOVING CUP PRESENTED TO MR. F. WESEL.

recognize, that although we have tried to do our share, it is due to your business acumen, energy and perseverance, that the business has grown from a very small start to be the largest in its line in the comparatively short time of twenty-five years.

"We, as your employes, wish to offer you our heartiest congratulations, and hope for continued success, and assure you of our love and high esteem, and in offering you this token of our affection express the sincere hope that the company may continue to prosper and grow."

Mr. Winter, Superintendent, in behalf of the Executive and Engineering staff of the establishment, spoke as follows:

"Mr. Wesel: As the representative of the Executive and Engineering Staff of your establishment, I beg to offer you our heartiest congratulations upon this occasion of the 25th anniversary of the establishment of your business, and at the same time to express our high esteem and thanks for your uniform courtesy and fairness.

"I also desire to express the hope that the past pleasant relations between yourself and us will be continued in the future.

"In conclusion, I may say as a personal reminiscence, that the first thing I did when entering your employ was to help

enlarge your manufacturing facilities, and all of us, believing in expansion, hope that we will keep on doing the same forever.''

Mr. Renken, Assistant Superintendent, added the following words of congratulations and best wishes to President Wesel:

''Mr. Wesel: In presenting this picture, showing you surrounded by the heads of the various departments, we wish to offer our best wishes upon this occasion, and hope it will be received in the spirit in which it is given.

''We also sincerely hope that you will further prosper and live to see the 50th anniversary of the business and a continuous growth of the same.''

Following this was the presentation of a loving cup by the financial, sales and advertising departments, with a presentation speech as made by Mr. Brands, as follows:

''Mr. Wesel: We have chosen this opportunity as a fitting time to carry out a cherished desire on the part of each and every one in the departments here represented, to attest our esteem and personal regard for you as an employer, as a citizen, and as one of the foremost men in the ranks of the captains of industry of this country. We congratulate you upon your achievements during the past quarter of a century. The business that you have built up in that period is a monument to your ability, energy and honest purposes. We are proud of you—proud of the institution you have so successfully and ably managed. We will not attempt here to review what you have accomplished. The results of your untiring energy and keen perception of thorough business methods is reflected in every part of this great institution. The name of F. Wesel is a household word in every printing office of any note throughout this land. And that name has crossed the waters to foreign lands, until ''Wesel Quality'' is known the world over. We also congratulate you upon the fact that at the close of this crowning period in your business career that your mental and physical strength is in no way impaired. And it is our earnest desire that you may live long to enjoy the fruits of your labor. As further evidence of good will we present to you this loving cup, which we wish you to accept as a slight token of our lasting friendship and esteem for your personal worth. May this cup ever be filled to overflowing with happiness and good cheer as your reward.''

To these speeches Mr. Wesel responded briefly in his usual hearty and sincere manner, expressing his appreciation of the good will shown, and took occasion to review in a few well chosen words the past history of the business of the company. He assured all present that he would never forget what the workmen and all other employes have done in helping to build up the business, which has now grown to such grand proportions.

* * *

STILL FORGING AHEAD.

THE PUBLISHERS' PRESS ADD ANOTHER TO ITS LIST OF NOTABLE ''BEATS.''

The reputation which the Publishers' Press Association has achieved as the foremost news gathering association of the world was greatly enhanced by its recent news beat at Portsmouth, when it succeeded in distancing all competitors by several minutes in announcing to the world that the Russian and Japanese plenipotentiaries had agreed upon peace terms. As a result of this achievement the Publishers' Press has been the subject of much favorable comment editorially not only throughout the United States, where it serves hundreds of enterprising dailies, but also in Europe, where it has a constantly growing clientele. A letter received from Wilfred King, managing director of the Exchange Telegraph Company, of London, by President J. B. Shale, of the Publishers' Press, expressing the appreciation of the company for the beat given it on the Portsmouth announcement, concludes as follows: ''As far as I am able to judge you were about twenty minutes ahead of Reuter and everybody else.'' The Meriden, Conn., *Journal* commenting editorially on the Portsmouth service said: ''It was quick work and good work. But then it's a habit Publishers' Press has and hardly worthy of special notice.''

This notable beat at Portsmouth is only one of a number of instances in which the Publishers' Press has scored a distinct triumph over all its contemporaries. These include the shooting of President McKinley, the death of Queen Victoria, the assassination of King Alexander and Queen Draga of Servia, and a score of other events of worldwide interest.

The Publishers' Press recently took over the Union Associated Press of New York, which supplied a number of papers in the South, under a lease for a term of years with an option for the purchase of the concern at the expiration of that time. The Publishers' Press is now serving 58 per cent of the evening dailies taking a telegraph report in the South. The news gathering field, so far as press associations are concerned, can now be said to have narrowed down to the Publishers' Press and the Associated Press, and this concentration of news gathering facilities can have none other than a good effect upon the newspaper business in general. There is need for but two press associations and newspaper publishers are beginning to realize this fact more now than ever before.

* * *

ENTERTAINMENT OF NATIONAL EDITORIAL ASSOCIATION AT INDIANAPOLIS IN JUNE, 1906.

A meeting of the committees appointed by the several Indiana Editorial Associations was held at the Grand Hotel, Indianapolis, September 15. All of the associations were represented. Mr. R. S. Truitt, of the Noblesville *Ledger*, was elected permanent chairman; J. B. Whitehead, of Indianapolis, secretary and treasurer. On motion of ex-Lieutenant Governor W. S. Haggard, of Lafayette, the chairman and secretary were instructed to appoint committees on finance, transportation and entertainment, the chairman and secretary to be ex-officio members of all the committees. The secretary was instructed to prepare a circular to solicit subscriptions to a fund for the entertainment of the national editors on what is to be known as the Hoosier Editors' Day, to be held on Thursday of the week of the meeting of the National Editorial Association in Indianapolis. The organization is to be known as, and all checks and money orders are to be made payable to, the Indiana Allied Editorial Association. The following towns to be visited by the national editors were selected, as they would show the diversified resources, manufactures, educational institutions and resorts of the state: Franklin, Columbus, Seymour, Madison with river trip to Louisville, Ky., Bedford, French Lick Springs, Lafayette, Logansport, Marion, Winona, Culver and South Bend. The committee on transportation will at once make arrangements with the railroads to haul this special train to these points. Towns en route between these points will probably entertain the editors for a short time if arranagements can be made for stopovers. The Hoosier Editors' entertainment will be held at the most central point, or where transportation facilities to handle a large crowd can be guaranteed.

ESTABLISHING CIRCULATION.

MARION, IND., Sept. 5, 1905.

Editor National Printer-Journalist, Chicago, Ill.

DEAR SIR: Enclosed you will find a pass to our press room. Should you ever visit Marion, use it and you will find that the *Leader* has all it claims.

The passes are issued to both local and foreign advertisers and we want every one who receives one to make use of it. The *Leader* maintains an ''Open Door'' policy and believes that the buyer of advertising space has a right to know the quantity of his purchase.

Detailed monthly statements of circulation are made and sworn to and every facility is extended to patrons who desire to verify our claims.

I believe that you will agree with me when I say that the *Leader* aims to give every advertiser a square deal.

Yours very truly,

THE MARION LEADER,

By H. Van Trump.

We fully agree with the *Leader* in its claims and give a reproduction of the ''pass'' as a new and ingenious method of calling attention to the merits of a newspaper, its open and fair business methods and its business commanding circulation.

MORE WORK THROUGH PUBLICITY

BY HARRY A. WOODWORTH

Address all Communications for this Department to
349 Jarvis Street, Toronto, Canada

MY department was counted too voluminous last month, especially (I suppose) because of the lateness of its arrival at Chicago. So the remainder of what I wrote last month goes in when the melancholy days are come. It seems as if I'd have a hard time catching up to some of you; but please don't think your turn is not coming, unless your matter has been lost in the various accidents which have occurred to my stuff of late. "You had probably," writes the home office, "better write an introductory paragraph so that we shall be able to use a cap or initial letter for a starter." That's the reason for this introduction. Ah! how many poets, for instance, realize that the reason for the prompt acceptance of some of their effusions by magazines is primarily because the verses just filled the bottom of a page? Ignorance is blissful—sometimes. But what a pang it gives one to realize that one's introductory paragraphs are not sought for by the editor because of their erudition, or their wit, or their logic, or their style, but simply because they give the printer a chance to make the paper look pretty!

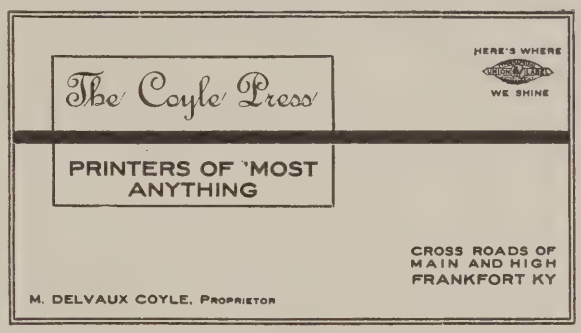
* * *

M. Delvaux Coyle, of Frankfort, Ky., is still doing good work at the cross-roads, and original work, too. This card (No. 1a) has the words "Printers of 'Most Anything" in red. The "balance" is black. That new script looks well in combination with the Gothic. In the other job (No. 2b) the heavy rule is in red, and a warm, cheerful red it is, too. Mr. Coyle uses the union-label with "Here's where we shine,"

2a

without the usual rays this time. I never particularly cared for Mr. Coyle's use of "Frankfort Ky" without any punctuation. But he's evidently abandoned the old "M Delvaux Coyle Prop," so I'm comparatively thankful. A letterhead on orange stock (hence unreproducible) is an elongated specimen of the same style of composition. It's an example of excessive whiting-out, but as the white is orange, the effect is good, and the thick red line helps to make it so.

I wonder if Mr. Coyle ever received a personal letter I wrote him months ago in answer to a request of his. I fear not; for he is generally prompt in answering any criticism, favorable or not, which I make in these columns, with a long and most entertaining, even though generally blarneying, letter. I am such a miserably poor private correspondent at best that it seems too bad that a reply to a courteous request should be lost, and that I should possibly get the credit of being uncourteously remiss—which I really try never to be.



1b

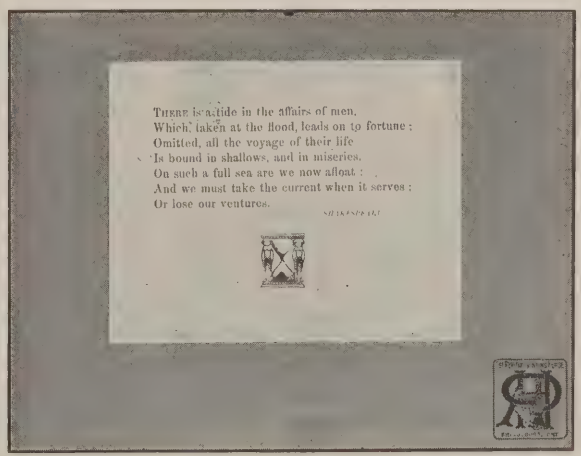
BRIDGEBURG, ONT.

Harry A. Woodworth, Toronto.

DEAR SIR:—I enclose a few specimens for your criticism in the NATIONAL PRINTER-JOURNALIST. I am greatly indebted to you for your suggestions regarding our "work-mark," and would like to know what you think of the final effect.

Yours very truly,
E. W. JOHNSTON, JR.

My suggestions as to the work-mark were made (by request) through the medium of a letter. I forget just what they were, but I think that between us we have produced a rather creditable "standing advertisement." And I regret very much that Mr. Johnston did not send me black and white proofs of some of the very distinctive jobs upon which he used it. But there's too great a proportion of light blue, which looks very nice, indeed, in the original, but which would be lost in the reproduction. The work-mark has been made in a variety of sizes, and with and without a surrounding panel containing the name and address of the firm. I'll let the



There is a tide in the affairs of men,
Which, taken at the flood, leads on to fortune;
Omitted, all the voyage of their life
Is bound in shallows, and in miseries.
On such a full sea are we now afloat:
And we must take the current when it serves:
Or lose our ventures.

3c

engravers see what they can do with two slips on brown linen-finish stock (Nos. 2 a and b). The work-mark and the word "Printing" on the long slip are red; the balance is black. The other slip is 3½ x 4¼ inches, and is meant for memoranda. The line "Review Printing House" and the rule are red; the rest is black. Here is a wall-hanging card (No. 3c) from which I hope the N. P.-J. will have a half-tone made, in order to show its size and arrangement. It comes in an envelope inscribed, "A Dictum Worthy of Wall Space in Office or Den." The base is a bit of cover-stock of a soft cadet blue, with the work-mark in gold. The quotation is printed on a glazed flat paper with a blue tint. The wording is in black with the appropriate ornament in blue. This design is also made with black cover-stock as a base—and with a white deckle-edge antique slip pasted on.

By the way, I once made this same quotation in a job I designed, with the text printed thus:

THERE I$ A TIDE IN THE AFFAIRS OF MEN,
WHICH, TAKEN AT THE F£OOD, £EAD$ ON TO FORTUNE;
OMITTED, A££ THE VOYAGE OF THEIR £IVE$
I$ BOUND IN $HA££OW$, AND IN MI$ERIE$;
ON $UCH A FU££ $EA ARE WE NOW AF£OAT;
AND WE MU$T TAKE THE CURRENT WHEN IT $ERVE$,
OR £O$E OUR VENTURE$ —$HAKE$PEARE.

Well, here's $UCCE$$ to the publicity obtained in connection with the new work-mark!

(The engravers have tried their most weird incantations over numbers 1a and 2b without effect.)

* * *

Alvin E. Mattson, of Warren, Minn., sends me some work which shows tastefulness and originality. The letterhead of the U. S. Post-Office at Warren is in a style that is in keeping with the dignity of such a place, and the tint-block is admirably colored, in connection with the text, to give a governmental-official look to the job. I show a billhead design (No. 3) which will not reproduce so as to show the effect properly.

1

The heavy rules which form the border are in a green tint, which is set off on the outside by yellow rules. The sheaf is likewise yellow; the remainder is blue. This job seems to me a good example of the obtaining of a striking and somewhat elaborate effect by simple methods. A larger cut of a sheaf is used on a letterhead. It is printed in a tint, and the words "By John P. Mattson," in another color, are printed over the cut. Don't do this again, please; the effect is not good, and hurts an otherwise simply strong job. Printing over pictures in a tint is something that has spoiled many a job. Of course, much depends upon the size, shape and character of the picture.

* * *

"I see," writes L. A. Ewing, of St. Louis, "that FitzGerald has finally awakened and is dishing out his usual good advice. Good!" And yet, since Mr. Ewing wrote that letter none of us have heard anything from Mr. FitzGerald in the columns of this journal. I forwarded him a query some time ago as to the more preferable of two jobs, but as he seems to be taking a little vacation, I answer the following query, though I well realize that my opinion on the matter—unless it should happen to be the same as Mr. FitzGerald's—would certainly not be as sound:

GALLATIN, Mo.

Harry A. Woodworth, Toronto, Canada.

DEAR SIR:—Enclosed find three styles of a letterhead; and we should like to have your criticisms and judgment as to which is preferable. Yours truly,

ROBERTSON & BALL.

Now here are three jobs, which each have their good points, and are each composed in modern type and in modern styles. No. 4a is in a panelled style which has been popular for several years past. There are just two faces of type, neither of which is very old—one of them being essentially modern. It is one of those new type-forms which mark a distinct advance in type-founding. With their long ascenders and other characteristics, they are, in fact, what might almost be termed "self-leading" type. The rules, especially those of the smaller

panel, are not especially well joined, and the old-fashioned ornament does not seem to be in particularly good keeping with the job, though it has a certain harmony with the Cheltenham. There is some reason for the names of the lesser lights of the board being in smaller type than that of the others, but it does not seem as though there were a good reason (outside of expediency in such a design) that they should have a panel to themselves, or that the residences of these persons should lack the state abbreviation, whereas St. Louis and Gallatin, and (in one instance) Jefferson City, are

thus distinguished. No. 4b is a neat job, and the name of the board is perhaps more easily "read at a glance" than in either of the other styles. But why should the bulk of the board have their names and addresses in Roman, while the titled members have theirs in a heavy Gothic? It seems that an extra type-face is here introduced without a good reason—in fact, when there is a decided reason against it. The most modern and original job is undoubtedly No. 4c. The arrangement of the board name, with its large initial letters, is pleasing, and the lines are well divided, and have a pleasing alignment. Here, too, the composition of names and addresses is more uniform than on either of the other letterheads. But why fence off those other members with the strips of rule? The rule-work seems out of keeping with the job, anyway. If the names of Mrs. Thorp et al. were sunk somewhat, I should unhesitatingly pronounce in favor of No. 4c. In this job I should also suggest commas after the words "President," etc.,

rather than periods, making the punctuation of the job uniform, as in No. 4b. By the way, I don't know why, in 4b, the word "Vice-President" was alone abbreviated, unless there were not sufficient sorts. I have never heard from Messrs. Robertson & Ball before, but I hope to do so again, as I see their own letterheads, etc., are such as call for no such strictures as I have made concerning the jobs submitted for criticism.

* * *

"Well, what in thunder will they get up next?" was the exclamation of the postman as he threw a missive—which I

dodged for fear it might be even more striking as a missile—upon the table near me. This particular specimen was a private postal-card of the ordinary size, containing part of that quotation of John Ruskin, "All works of taste," etc., which has been so freely used in printing-advertising since I gave it in this department a year or less ago. The most remarkable thing about the card (No. 5) is that it is a strip of burnished brass, which was somewhat dented on the reverse side by the post-office stamp, whose imprint was, however, illegible. After a few stamps are broken on this species of post-card, I fear me the postal authorities will put it under the ban. But it is undoubtedly handsome. It comes from the Randall Printing Company, St. Paul, Minn. I'd like to see a half-tone of the message, which certainly looks "swell" in red and white and black on the shining metal. On the address-side is this paragraph:

Novelty, enterprise and effectiveness characterize Randall advertising creations. Printing on brass is a sample of our originality. Let's exchange ideas. To express them intelligently is our specialty. Come to us.

(The engravers are unable to reproduce No. 5 by either the half-tone or zinc-etching processes.)

* * *

That rule at the top (being, like the other rulework, green) is a pleasing feature of this characteristic creation of Edward

6

W. Stutes (No. 6). The word "Printers" is red, the rest is purple; and the nice disposition of white space helps a lot.

* * *

Every now and then there's a typographer of whom I never before heard—frequently from a place of which I never before knew—who sends me samples, for the first time of course, which entitle him to the highest praise which I am capable of bestowing, right away. I have had such samples from Lennis Brannon, of Talladega, Ala., for some time, and since then I

7a

have noticed that he has been given a seat among the top-notchers by abler critics than I. How he utilizes this criticism is shown by Specimens No. 7 a, b and c. Gin ithers gie a wee toot to your horn, let the warld hear; it's publeecity, ye ken. But I never before knew that Mr. De Vinne was the *publisher* of the *Century Magazine*. Those sticks in No. 7a are suggestive of Beran: Some of His Work; but they are always pleasing to the fraternity; and I trust they are appreciated by the general public. By the way, that same general public, even those of it who are not of German extraction, must be getting quite proficient in reading Old English letters; for some of the beautiful new Old English faces are becoming very popular, even when used in the 6-point size. Suppose they are a little hard to read—the effect is undoubtedly pleasing to persons of taste. No. 7a is whited-out in an admirable manner, and most pleasingly balanced. It is all black but the initial B, which is red; and this continence in connection with color is clearly commendable. No. 7b is a style of composition which is frequently employed by Mr. Brannon; and the long lines will likely prove suggestive to others who are looking for remarkable effects with less expenditure than was induced by excessive panelling. The three initials are red in this job. The third job is odd, but not wantonly bizarre. The heavy rule is orange, and the "P" of the initial, and the space next the border, is orange, too, which is hastily etched with a pin

7b

for the purposes of reproduction. The remainder seems to be purple in this light. If so, it may not suit the camera; though I have known purple to reproduce nicely. 7d is a job that is mightily pleasing to me, because of its red Missal initials in connection with the Engravers' Old English, and also because of its admirable balance. This is a fine example of a balance which is something more artistic—and likewise far more difficult—than the old-fashioned arrangement which once prevailed in parlors and printing-offices. The word "Printing"—the one without the initial—is wonderfully well placed. Mr. Brannon has designed another letterhead of this style for a customer which is, if anything, rather more imposing than this.

7d

I shall reproduce more of Mr. Brannon's work in another instalment. But I cannot forbear this time to give the envelope corner (No. 7e), which is a smaller bit of composition than is generally thought to be suitable for a large envelope, but which for this very reason has an additional effectiveness. The "B"

Brannon:
Typographer
Talladega, Ala.

7e

is red. There's an artistic reticence about this job which is worthy of study. Mr. Brannon is an artist with an originality that is made particularly effective because he tempers it with the best in the ideas of others. He has a genius for proportion and, although he undoubtedly gives considerable study to any effect he strives for, he has an artistic appreciation of the exact moment when a piece of composition is finished.

This is a very gentlemanly letter from one whom the NATIONAL PRINTER-JOURNALIST is always glad to hear from, whatever he may have to say:

MILTON, WIS.

Harry A. Woodworth, Toronto, Canada.

DEAR SIR:—I want to express to you my appreciation of your reply (in the August number) to my criticism of the NATIONAL PRINTER-JOURNALIST. Yours is an able defense and I honor you for it. A newspaper man should be the last to criticise harshly. I only intended to give Mr. Herbert my views of the possibilities of his paper. I did not write for publication. The PRINTER-JOURNALIST is doing a grand work in which I take an interest. Hence my letter. Success to you in your work.

Yours truly, WILL K. DAVIS.

* * *

THERMOPOLIS, WYO.

Harry A. Woodworth, Toronto, Canada.

SIR:—I once more am tempted to trust to the fates and ask you to give your opinion on some of my "sage-brush" job work. Kindly criticise this letterhead and envelope and the enclosed statement. Remember that we have not the modern facilities for turning out good work out here, and are obliged to do about as we can. Respectfully,

A. L. DUHIG.

The use of note paper of a color which reminds one of sage is appropriate and the tint used for the large general view of the Big Horn Hot Springs at Thermopolis is in a color that admirably harmonizes with the stock. Mr. Duhig has a good eye for color harmonies and selects just the right red to go well with gold. He employs a style of composition with heavy straight and curved rules from which he makes some very original combinations. Those on the letterhead and billhead are rather pleasing; that on the envelope is, perhaps, a trifle too freakish. I believe I criticised the use of those ornaments with five irregular dots a year or two ago, when Mr. Duhig wrote me before. I don't like them any better now. In a job so profusely ornamented by a rule-design a dinky ornament takes away from it its effectiveness, and these ornaments are, to my pure mind, a little bit too suggestive of fly-specks. I should like the effect of the statement better were the big "M," which looks as if it fell from the upper line, left out entirely. "The newest place in town" is a good catchline for a newspaper office. "Prompt Payment Pleases Practical Printers" is a rather pleasing statement for a statement. "$1.50 per" is rather too slangy for such a serious thing as a billhead, according to my idea, and some might think a word had been unintentionally omitted. I'm glad Mr. Duhig remembered my desire to have him write again, though it is long since I have heard from him.

* * *

It is quite possible that a moral may be discovered through a very short consideration of the following extract from the letter of a valued contributor to this department:

By the way, do you remember the man I wrote to you about once as swiping my ideas, samples, etc.? He has gone; closed up shop and left for greener fields, as has also one other competitor since my last letter.

* * *

Blanchard's Red Book, with a red, red cover embossed without the accompaniment of ink, is a particularly good "illustrated magazine of original thought" of the house-organ variety. It is issued by the Blanchard Press, New York. It has some editorials written in a very entertaining style, and some superb engravings, of which the most interesting are, perhaps, the "X-ray" mechanical reproductions—surely one of the most excellent means for explaining machinery pictorially that ever was devised.

* * *

The secretary and advertising manager of the NATIONAL PRINTER-JOURNALIST forwards me the following letter, with the endorsement: "Mr. W.: Might be a good idea to use this." As it shows the admirable spirit in which a frank criticism was taken and gives an amusing picture of an office where employer and employed are in heavenly harmony and as Mr. Silve gives permission to print the whole letter, here it is. The "boss" is so evidently of the broad-minded variety that he will doubtless pardon the little "skit" contained in the opening part of the letter:

AT THE SIGN OF THE STICK AND RULE, NEW ORLEANS, LA.

DEAR SIRS:—It is with the idea that you may be interested in a little incident which occurred "at the sign of the Stick and Rule" that I write this narrative, all true—here she goes:

THE EXPERIENCES OF AN AMBITIOUS TYPOGRAPHER.

In time gone by the Boss was against the trade journals in general, that is to say some department editor on a particular journal had "roasted" him in criticising his work and he did not know how to take it because he had a way of throwing bouquets at himself, and felt injured when his faults were pointed out to him in black and white—and that's where it all comes in. When the first copy I saw of the N. P.-J. reached me I turned to Mr. Woodworth's department and took in all the criticism and studied all the specimens, with the result that I decided to send him a few specimens of my work on which to pass his opinion.

In the batch I included among other work a blotter in blue and red, which was an odd specimen, the jingle of which was gotten up by the Boss and the composition by Me, Myself and Co., a long while back. As luck would have it, this particular specimen was taken by Mr. Woodworth as the one on which to base his opinion of our labors, and was shown in the May number, with the criticism belonging thereto. But when my copy reached me I was so anxious to see what he said that I took the copy out of the envelope and began reading it. Then I looked up and there was the Boss looking over my shoulder, as interested as I was.

Well, before I could catch my breath, he began, "Dave, I'll be damned, but you are the cleverest man in the shop—for it's a fact that you have learned and convinced me of something that I have always doubted since I have been in the biz—that a good, sound criticism, whether favorable or adverse, is more helpful and should be more sought after than thousands of self-praises."

After I had convinced him the credit was not all due me, he began again: "That's all right, but for your part here's a fiver, and I'll see you get a raise, and a good one at that, because you deserve it; but, by the way, I'll take this copy; you can get another for yourself; for I cannot lose any time in reading its contents to my satisfaction."

The above is the manner in which the old man changed his own convictions about technical journals—and here finishes the extravaganza of The Experience of an Ambitious Typographer, or The Boss and the Press.

And so please forward me a copy of the N. P.-J. for May, 1905, that I may keep a complete file of such a valuable magazine as the N. P.-J.

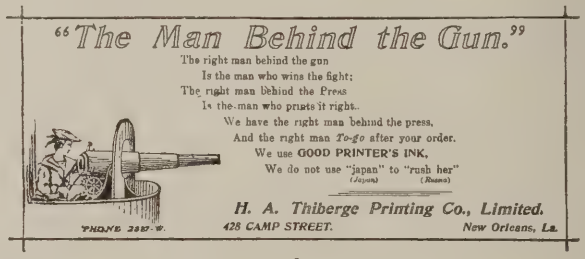
Also please forward this letter to Mr. Woodworth, after noting its contents. It is "not for print," but should you find any good in it, you are at liberty to use any or all of it, changing portions of it, of course. With the best wishes, I beg to remain,

Sincerely yours,

D. C. SILVE, care Thiberge Press.

P. S.—Enclosed you will find 20 cents in postage stamps for the copy asked for above.

There's another humorous thing in connection with this letter—at least it struck me so, and I think it will Mr. Silve when he hears of his inadvertence—and that is the endorsement of the business office: "Sent May 05. 8/23/05. No stamps enclosed. B. S. H." "The Boss" will have the laugh on "Dave" now. But it seems to me, and I guess it did to the NATIONAL PRINTER-JOURNALIST office, that this letter was well worth the extra copy.



"The Man Behind the Gun."
The right man behind the gun
Is the man who wins the fight;
The right man behind the Press
Is the man who prints it right.
We have the right man behind the press,
And the right man To-go after your order.

8

Just before sending this matter in there comes a bunch of samples for reproduction, and I've only space left for one specimen (No. 8). It has plenty of daylight in it and is printed in red on white stock. The jingle is presumably the boss's, and the first four lines are undoubtedly catchy. I think the word "runs" instead of "prints" in the fourth line would be more suitable. It would be more alliterative, too. "Order" and "rush-her" do not rhyme particularly well. If "push her" could have been worked in somehow it would have been somewhat better, but I have not time to figure it out, and I abandoned the poetry business some time ago. But this job was a timely one before "the cruel war was over," and its timeliness should make it an attention-attracting advertisement—one that will be handed around by the recipient.

It is not a bad idea to advertise one thing at a time, if it is done well. This ad particularly calls attention to the qual-

ity of the ink used by the establishment. The composition speaks for itself—the use of an outline display letter is particularly in keeping with the abundance of white space. The "H" is not of the outline series, and so is "wf." But the weak point about the ad is this: The ink, to which especial attention is called, looks rather pale and blurry. I don't think it's the fault of the ink so much as the porous stock; and the presswork, too, is inferior to that of the other jobs, which are on stock that does not require such careful presswork. If you talk about good ink and good press manipulation in an ad you should certainly use especial pains to have them good on that job. This is an extremely important point in printing-advertising.

* * *

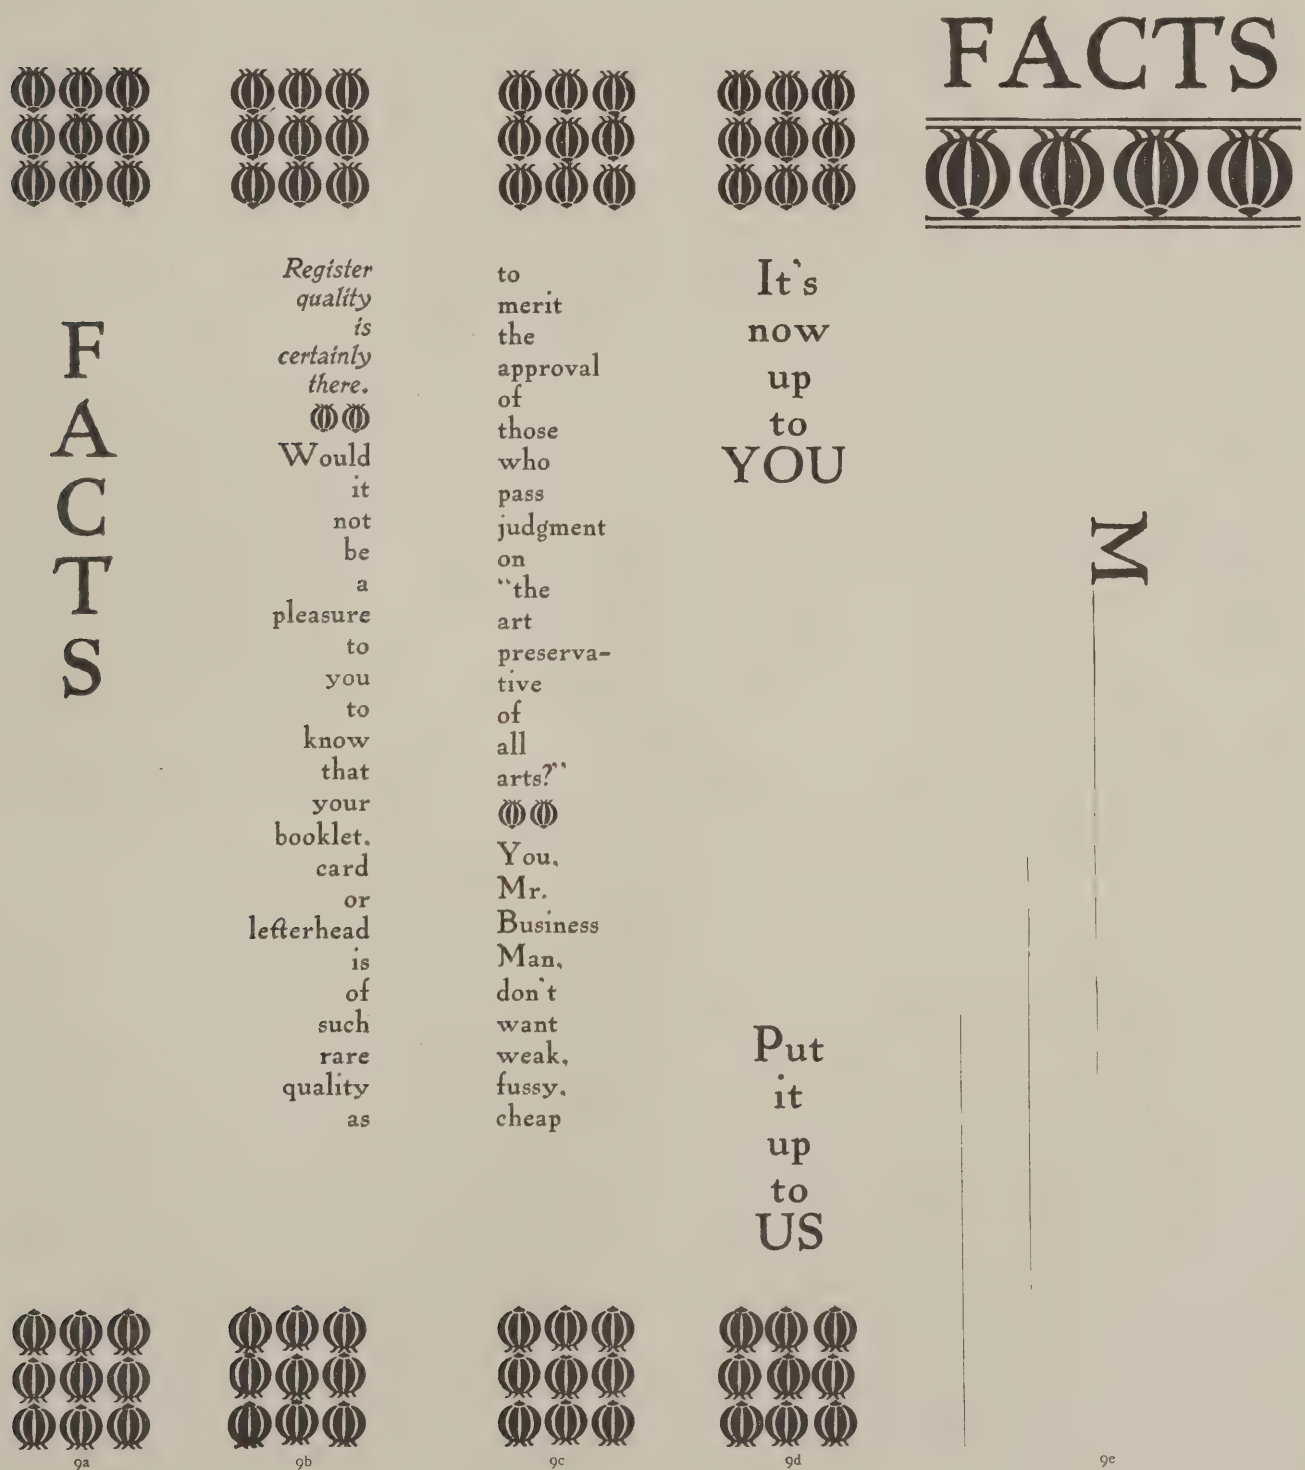
WATSONVILLE, CAL.

Harry A. Woodworth, Toronto, Canada.

DEAR MR. WOODWORTH:—With this letter am sending you three or four specimens of my late work, which I think are somewhat better than those sent before. The booklet is not presumed to be anything elaborate. It was gotten up entirely from scraps which were to have been thrown away. It will probably strike you as being somewhat odd in shape. * * * Very truly yours,

THOMAS E. ABBOTT.

The booklet referred to is long and narrow, and the cover, which is of cadet blue stock, has two ornaments such as those shown in the reproduction but very much larger. It also has an oblong hole through which the word "Facts" on the inner title page, which page is reproduced as No. 9a, is seen. The stock is blue linen-finish in one book—another copy is on white—all far too valuable to throw away, especially as the long piece of job work is right up to date, as I showed by various

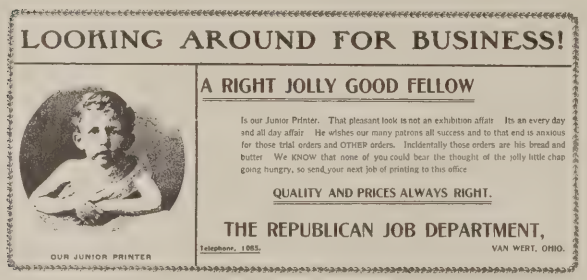


FACTS
FACTS
Register quality is certainly there.
Would it not be a pleasure to you to know that your booklet, card or letterhead is of such rare quality as
to merit the approval of those who pass judgment on "the art preservative of all arts?"
You, Mr. Business Man, don't want weak, fussy, cheap
It's now up to YOU
Put it up to US
M

9a 9b 9c 9d 9e

examples in the August issue. Two of the reading-matter pages are shown as Nos. 9b and c. The ornaments at the top and bottom of the pages are arranged thus: First and third lines, one red between two black; middle line, black between two red. The balance of the page is black. In some parts of the book there are two pages together where the smaller sizes of the ornament are not used as paragraph marks. The last page is No. 9d. There's not going to be much of what used to be called "scraps" in printing offices after this. Art and Economy in printing go hand in hand as never before. Some of the text of the booklet is here quoted:

Do you still adhere to that old fallacy proverbial among so many merchants, "that the product of one printery looks as good as that of another, just so it's printed"? You know *original and attractive* printed matter when you see it. You also know that *such* printing *is effective*—the point you wish to reach. Again, you are aware that the *attractiveness* and *effectiveness* lies in the idea [this is, I presume, an example of the figure of speech known as *hendys*, by which Rudyard Kipling is said to have justified his line "The tumult and the fighting *dies*," but the dead straight fact was, he wanted a rhyme to "sacrifice."—H. A. W.], the handling of cuts, the selection of appropriate type, harmonious inks, suitable paper and proper arrangement of what you have to say. The business men of this city should appreciate the fact that Watsonville enjoys the distinction of having among her citizens a commercial printing artist of exceptional ability and reputation, whose everyday productions are sought for and reproduced in the leading printing magazines of the day and commented upon by the world's eminent authorities as being "original, beautiful and instructive specimens of art," which is indisputable proof that *Register quality is certainly there.* Would it not be a pleasure to you to know that your booklet, card or letterhead is of such rare quality as to merit the approval of those who pass judgment on "the art preservative of all arts"? You, Mr. Business Man, don't want weak, fussy, cheap looking printing, do you? You want the *best!* We *do* the *best;* the high-grade, snappy, business-fetching sort of printing, the kind that brings dollars and success; the kind that critics say is destined to make Watsonville famous as the home of good printing. And, believe us, the prices are reasonable when *quality* and *effectiveness* are considered. * * *



LOOKING AROUND FOR BUSINESS!
A RIGHT JOLLY GOOD FELLOW
Is our Junior Printer. That pleasant look is not an exhibition affair. Its an every day and all day affair. He wishes our many patrons all success and to that end is anxious for those trial orders and OTHER orders. Incidentally those orders are his bread and butter. We KNOW that none of you could bear the thought of the jolly little chap going hungry, so send your next job of printing to this office
QUALITY AND PRICES ALWAYS RIGHT.
THE REPUBLICAN JOB DEPARTMENT,
Telephone, 1065.
VAN WERT, OHIO.
OUR JUNIOR PRINTER

10

There seems to be a little bit too much wording for such a method of composition, but it should be remembered that it is not always the most easily read advertisement (outside of a newspaper ad, which is often seen in the hurry hours) that gets in its work well. The very effort made to read an oddly composed booklet often helps to impress its message on the memory. But the composition must be pleasing and not too much of a Chinese puzzle. Mr. Abbott's work has an originality of the pleasing kind—and that's the only originality that is really worth striving for. By the way, the envelope containing the booklet shows another phase of this originality (No. 9e).

* * *

D. J. Evans, editor and manager of the Van Wert (Ohio) *Republican,* sends some blotters in two colors on variously colored stock. One of these is reproduced as No. 10. Of course, no printer should, in earnest, make the fact that he needs the money a prominent feature of his advertising; but surely there is none so dense as not to appreciate the joke. The portrait is that of Mr. Evans' three-year-old son, and he assuredly does not look as if he were dying of starvation. This half-tone is also used on a blotter advertising an insurance concern, in which the child is supposed to be giving "Papa" some pretty straight though not particularly childish talk about the necessity for provision for one's family.

THE LANSTON CHARGES.

From the Journal of Commerce, New York, Sept. 12, 1905.

We have no doubt that the general public, in common with ourselves, will hail with satisfaction the finding of the Keep Commission and President Roosevelt's brief statement concerning it. The Commission finds that the most serious charges made against the Lanston Monotype Company are not sustained. At a time when much corruption is being uncovered, in the public service and elsewhere, it is matter for general rejoicing that this corporation should have been able to maintain its integrity. That the Lanston Company did try, and not without success, to sell its machines to the government; that it kept them prominently before the principal officers of the public printing establishment; that it extolled their merits in season and out of season; that it pushed them to the front with untiring persistency—these are charges which the company's officers may bear with equanimity. With such matters the public has no concern. But the real accusations, while including all of these, went much further. They were explicit and circumstantial. They included, not only certain technical irregularities in the contract under which Lanston machines had been purchased, but also a distinct allegation that "the contract in question was made corruptly."

The public had previously had much reason to believe that the Government Printing Office was managed with undue laxity in many respects; and thus when these definite charges of actual corruption were made the ground was already prepared for them. The charges were fairly met by the accused and thoroughly examined by the Commission. There was no disposition, on the one part or on the other, to belittle the gravity of the matter or to dodge the real issue. The finding, accordingly, is entitled to the fullest credence. And the most important item of that finding, an item quoted with approval by the President, is that no evidence was brought forward from any source, or discovered by the Committee, "tending to show any promise, payment or consideration of any kind whatsoever made by the Lanston company, or any of its officers or agents, to any person in the Government service."

This we regard as a conclusion in which all good citizens should rejoice. It is not the Lanston Company only, or mainly, which is to be felicitated upon it. The whole community is to be congratulated upon the fact that a very important branch of its public service is guiltless of this serious charge, at least, and that, in spite of the fierce rivalries of modern business and the temptations often extended to those bidding for public service, this large and important corporation is found to have gone straight to its ends, and achieved them, by means which could stand the test of a public investigation.

CIRCULATES EVERYWHERE.

NEW YORK, September 6, 1905.

Publisher National Printer-Journalist,
Chicago, Ill.

DEAR SIR: From various press clipping bureaus I have received articles which have been republished in daily newspapers from my speech at Toronto, and credit invariably has been given to the NATIONAL PRINTER-JOURNALIST.

Will you kindly send me a copy of the publication containing this article and I shall be glad to remit for same upon receipt of bill. Your paper certainly must be widely read by publishers all over the country, as no address I have ever delivered has been copied to such a great extent.

I am also a publisher and take pleasure in sending you by this mail, under separate cover, a copy of the *American Advertiser.* I should like to receive your frank criticism on this publication. Very truly yours,

M. LEE STARKE, President,
Starke Advertising Agency.

* * *

CONCENTRATE.

When I have worked for a long time upon one thing, I make it a point to bring all the points regarding it together before I retire, and I have often been surprised at the results. What is dark and perplexing to you the night before is found to be solved in the morning. We are thinking all the time. It will be found that it is impossible not to think."—*Alexander Bell.*

Among the Associations

"In Unity is Strength"

UNITED TYPOTHETAE OF AMERICA.

Annual Convention at Niagara Falls, N. Y.

THE nineteenth annual convention of the United Typothetæ of America convened at the Cataract-International Hotel at 10 a. m. June 6. The attendance was large and the interest general on account of the importance of the questions to be considered. The officers, executive and other committees had been in session Monday and Tuesday and their reports showed thorough consideration and careful preparation.

An address of welcome was delivered by Mayor Cutler, of Niagara Falls, in generous terms of hospitality and was most kindly received. He referred to the fact that he had himself been for fifteen years an employing printer. A fitting response was made by Rev. W. R. Frank, of the Dayton (Ohio) Typothetæ. President Ellis, of Boston, then delivered his annual address, in which he said:

The emergency fund, contributions to which under the new constitution became obligatory upon the members, has increased beyond the most sanguine expectations, as your Treasurer's report will show.

Your educational committee appointed under the constitution has been busily at work and its chairman, Mr. Blanchard, will report for it.

Your insurance committee has given a great deal of time to this important question and the report of that committee will be made by its chairman, Mr. Donnelley.

Acting under authority conferred by the constitution, a committee was appointed in the early spring having in view the establishment of schools for the instruction of linotype and monotype operators.

This committee will report through its chairman, Mr. Franklin Hudson. The subject is a very important one, and the committee should have the hearty coöperation of every member of the Typothetæ.

The apprenticeship question and trade schools also demand much more consideration than has yet been given them. The Boston experiment has been carried a step farther than when the previous report was made, and its chief difficulty now is to secure boys of sufficient intelligence and education who are willing to learn a trade.

At a recent conference with several of the masters of high schools in and around Boston, it developed that practically no boys who reached the high schools were willing to give the time required to learn printing or any other trade. The question is not alone, then, the limitation of apprentices by the trade unions, but where to find the proper materials to make intelligent printers for the future.

But overshadowing these (in a measure) routine matters, because they can be taken up at any time, is the one question uppermost in the minds of all today: the demand of the International Typographical Union for a shorter work-day to go into effect January 1, 1906, and the threatened strike on that date "in all union establishments under the jurisdiction of the I. T. U. where existing contracts do not prevent," if the eight-hour day is refused.

You are all familiar with the action taken by our own convention in St. Louis last year, which was followed by the action of the I. T. U., as quoted above, in convention assembled in August, and later confirmed by referendum vote.

Your officers had no alternative but to prepare to carry out the resolutions adopted by the United Typothetæ of America in St. Louis, and to this end their efforts have since been directed.

Several months since, the printers in the Northwest, led by the local Typothetæ of St. Paul and Minneapolis, held a mass meeting of employing printers in that section attended by your President, Secretary and some members of the executive committee. So successful was this meeting and so unanimous was the sentiment that the eight-hour movement must be checked at any cost that it was deemed advisable to hold similar meetings in various parts of the country. These were held in Kansas City, Atlanta, Boston, New Haven, Philadelphia and Milwaukee, and in all there was the same unanimity of opinion and the same determination to resist the demand at any cost.

Your officers were charged as being walking delegates going about stirring up trouble. As a matter of fact, in no case was a word required from them. For once the employing printers of the country were unanimous, and it only remained to organize, so far as possible, this opposition.

How effectively this was accomplished (largely through the efforts of our efficient Secretary, with the assistance of local employers), the Treasurer's report of receipts will show. But the increase in membership does not begin to indicate the value of these meetings. The coming together of these employing printers, largely strangers to each other, separated in some cases by hundreds of miles, to confer on a matter so largely affecting their common interests, resulted in a determination to stand together, even if not officially organized, against this demand.

A few days previous to the recent meeting in Toronto of the International Typographical Union, your President received a letter from Mr. Lynch, which will later be read by the Secretary, calling attention to a vote of the I. T. U. under which there could be heard on the floor of their convention representatives of the Newspaper Publishers' Association or of the U. T. A. on matters affecting their interests and extending an invitation to so confer, and also suggesting a conference between a committee of the U. T. A. with the eight-hour committee of the I. T. U. during the convention. Your committee, consisting of Messrs. Green, Donnelley, Macintyre, Nunemacher and your President, met the committee from the I. T. U. at Toronto, Monday, August 14, but, as was inevitable, made no progress, as will be seen by the report of our Secretary.

Your President, accompanied by your Vice-President, addressed the convention on Tuesday, August 15, setting forth as best he could, having the assistance of the committee in preparing the address, the employers' side of the eight-hour question.

Your representatives were courteously received, and the address was accorded the closest attention of the delegates, but that it had no effect is clearly shown by the action of the convention as embodied in the report of the eight-hour committee, which was unanimously adopted and which closed as follows:

"Concluding the report, your committee desires to reiterate the declaration of the International President that 'We do not want the eight-hour day by reason of charity or philanthropy. We do not want it in order that our physical or mental well-being may be improved. We refuse to abandon our eight-hour demand because we may under present conditions be more fortunately situated than other artisans. We want the eight-hour work-day because we are convinced that it suffices for the work there is to do, the work that is to be done, the demand of society for the product of the press. We propose to sell to the employer eight hours out of twenty-four, and we will do as we please with the remaining sixteen.'"

This statement, made first by the President, considered and reported by the eight-hour committee, and unanimously passed by the convention, would seem to settle emphatically the position of the I. T. U. That it does not reflect the views of a large number of the members of that union who are employed in the book and job printing branch, those of us

who are familiar with the views of our employees are well aware.

Secretary Macintyre then submitted his annual report, showing the work that had been accomplished during the year and an increase of twelve new Typothetæ organizations, an increase of membership and a general expression in favor of the open shop and the continuance of the present nine-hour day.

The reports of the following committees will be found of general interest:

REPORT OF THE COMMITTEE ON CRAFT EDUCATION AND PRICE MAKING.

Your committee would report as to the work carried on during the past year, as follows:

1. That, through the various boards of trade and price-making organizations existing throughout the United States, the detailed study of costs in printing has been given steady attention, with the result that the majority of the membership in our organization in each of the large centers have practically unanimously adopted the plan of figuring composing room costs on the basis of a charge by the hour for all the time of composing room employees spent in every operation on each individual job except the operation of distribution; that in cylinder and job pressrooms the uniform custom has been adopted of basing all charges on the cost per hour of each individual press, exclusive of the cost of the ink used on the individual job; that in binderies the most approved practice embraces the charge of the actual wages paid operators, plus the actual cost of any machines for the time operated on the individual job, plus the pro rata percentage to cover fixed charges for supervision and handling in the bindery.

2. Your committee further report that they have furnished to various cities throughout the country the necessary blanks and tables for the figuring out of individual costs in the respective cities; that through their chairmen they have held meetings in various localities, and have given blackboard talks, as a rule, at such meetings; that they have installed in thirty-one offices scattered throughout the United States a comprehensive and accurate cost figuring system.

3. Your committee recommend to the incoming committee a continuation of this work to such extent as may be deemed advisable by the executive committee, suggesting for that purpose that the executive committee place at their disposal at the beginning of the year some stated limit of funds for such purpose.

4. For the future good of our craft they recommend that the incoming committee seek the aid of every member of the United Typothetæ who has made a study of the cost problem, in order that our uniform methods of estimating and price-making may be extended to every office throughout the country.

REPORT OF THE COMMITTEE ON DISTRIBUTION OF TOPICS.

Your committee on distribution of topics beg leave to submit for your action the following recommendations covering the reports of your President, Secretary and chairman of the executive committee:

1. Concerning the extension of the scope of the executive committee, they recommend to the convention the favorable consideration of the amendments proposed by the Jersey City Printing Company, with such safeguarding as may be deemed advisable by the convention.

2. Concerning the future composition of the executive committee, they recommend to the favorable consideration of the convention the amendments proposed by the Typothetæ of the city of New York, but suggest that the entire membership of said committee be elected annually.

3. Concerning the work of schools of instruction in the craft, they recommend that a committee on this work be appointed to continue the work during the incoming year.

They further recommend that the suggestions contained in the individual report of Mr. Franklin Hudson, chairman of this committee during the past year, referring to the training of apprentices in each individual office throughout the country, be printed separately and distributed to every individual member of the Typothetæ.

4. Concerning the policy of the United Typothetæ of America in regard to the eight-hour day and labor questions in general, they recommend the appointment of a committee representing every section of the United States and Canada for the purpose of immediately drafting such a statement and resolutions as will accurately explain the present situation to the public at large, and defining the attitude of this organization at the present time, this committee to report to this convention at the earliest possible moment, and to incorporate in said report the "Declaration of Policy" approved by the convention of 1904.

5. Concerning the existing contract with the International Printing Pressmen & Assistants' Union, they recommend that this contract and the relations of the United Typothetæ with the said union under the contract, be referred to the present executive committee for its consideration, consultation with the representatives of such union and final report to this convention for its action.

6. Concerning the better information of the Secretary's office in regard to the local situation in each local Typothetæ they recommand that the incoming executive committee be instructed to prepare uniform by-laws as the basis of the by-laws of each individual local Typothetæ; and that this convention order that, to maintain membership in the United Typothetæ of America, each local Typothetæ must within six months from the time of receiving a copy of such uniform basic by-laws from the Secretary's office, adopt and incorporate same in their local by-laws designed for the specific conduct of their individual organization; that such basic by-laws shall contain specific instructions as to the frequency with which uniform and detailed reports of the labor conditions existing in each local Typothetæ shall be sent to the Secretary's office; and shall further provide for the forwarding to the secretary's office of certified copies of any labor contracts made by the local Typothetæ—all for the inspection of the executive committee.

7. Concerning the following subjects: (1) The question of the further extension of local organization; (2) the question of the plan of procedure in industrial controversies; (3) the question of national legislation; (4) questions concerning our relations toward employers' and citizens' associations, they offer the following:

Resolved, That the following subjects: (1) The question of the further extension of local organizations; (2) the question of the plan of procedure in industrial controversies; (3) the question of national legislation; (4) questions concerning our relations toward employers' and citizens' associations, be referred to the executive committee for their action, and after this convention adjourns and until our next meeting or convention with full power to take such action as they deem best.

ISAAC H. BLANCHARD,
Chairman.
E. LAWRENCE FELL,
HOMER P. CLARK.

ACTION OF THE CONVENTION ON THE COMMITTEE'S RECOMMENDATIONS.

1. Adopted, after being amended to read as follows:

SECTION 5. The executive committee shall have general supervision on all matters connected with the interests of the association; shall have power to pass upon and to accept new members; shall grant and issue charters to new local Typothetæ which are accepted as members, and shall have power by a two-thirds vote of its entire membership to suspend from membership any individual member or any local Typothetæ taking action contrary to the expressed policy of the organization in its constitution or at its conventions; and shall have power to fill vacancies in its own numbers caused by death or resignation.

2. Concerning amendments offered by the New York Typothetæ. This was taken up by sections as follows:

SECTION 1. The officers of this association shall be a President, a Vice-President, a Treasurer and an executive committee of eighteen members, who shall be elected at the regular annual convention.

Adopted.

SECTION 2. The executive committee shall be elected at the regular annual convention, and shall hold office as follows: Six for a period of one year, six for a period of two years and six for a period of three years, respectively; and thereafter at each annual election there shall be elected six members of said committee to hold office for three years, to replace the outgoing members.

Rejected.

SECTION 3. The President, Vice-President and Treasurer shall be members of the executive committee, ex-officio.

Adopted.

SECTION 4. Immediately after the adjournment of each annual convention the executive committee shall hold a meeting and organize by the election of a chairman, and shall from its own number elect six members, of which the chairman shall be one, who, with the President, Vice-President and Treasurer, shall be an executive council for the current year.

Adopted.

SECTION 5. The executive committee shall appoint a secretary and fix his salary. He shall be under their control and

supervision.

Adopted.

SECTION 6. All elections of officers shall be by ballot and in open convention.

Adopted.

3. Adopted.

4. Adopted.

5. Laid on table.

6. Taken up by sections, as follows:

SECTION 1. Adopted.

SECTION 2. Rejected.

SECTION 3. Adopted.

SECTION 4. Adopted.

SECTION 5. Adopted.

7. Adopted.

On Thursday morning a very instructive address, which is printed elsewhere in this issue of the NATIONAL PRINTER-JOURNALIST, was delivered by Mr. Charles W. Brown, of Barnhart Brothers & Spindler, of Chicago, on the subject of "Insurance and Inventories." Mr. Brown was accorded a unanimous vote of thanks.

The convention then listened to the report of the committee appointed at the evening session on Wednesday to prepare a series of resolutions to set forth the position of the Typothetæ on the open shop and eight-hour day. This committee was composed of F. C. Nunemacher, of Louisville, Ky.; I. H. Blanchard, of New York; A. R. Barnes, of Chicago, Ill.; B. S. Hubbard, of San Francisco, Cal., and E. A. Kendrick, of Buffalo.

The resolutions—a new declaration of personal rights as applied to the honorable craft and business of printing—were adopted by a unanimous rising vote, and are as follows:

WHEREAS, The members of the United Typothetæ of America, an organization of the employing printers of the United States and Canada, having been notified by the officers of the International Typographical Union, an organization of compositors employed in their respective establishments, that on and after the first day of January, 1906, eight hours shall constitute a day's work of members of said union; and

WHEREAS, The officers of said International Typographical Union have stated by official notice that all work on the part of the members of said union will cease immediately on the date named in all establishments under the jurisdiction of said union where existing contracts do not prevent, unless said employers concede the demand of the said union compositors, said union by vote of its members and action of its executive council having so determined to force on the employing printers the inauguration of the eight-hour day; and

WHEREAS, Said proposed shortening of the work-day would necessitate advances in charges for printed work which employing printers could not possibly obtain from their customers, thus destroying and demoralizing the printing industry wherever the shorter work-day might be inaugurated; and

WHEREAS, Said proposed reduction of hours is not a necessity for the health and comfort of said compositors, and its proposed adoption having arbitrarily been decided upon by the International Typographical Union without due consideration of its disastrous effect on the printing business and the general manufacturing industry throughout the country, and the present demand being under such conditions that no true American citizen who is a lover of liberty can honorably concede; therefore, be it

Resolved, That the United Typothetæ of America, in convention assembled, does hereby reaffirm its position in relation to the proposed attempts to inaugurate the eight-hour day and its members again pledge themselves to resist individually and collectively any and all efforts on the part of the International Typographical Union to reduce the present hours of labor, believing as they firmly do that under existing conditions any reduction of the hours of labor in the printing trade would be most disastrous to employer and employee alike, and in order that the attitude of the United Typothetæ of America in relation to its members and their respective employees may be thoroughly understood and known to all men, it is again

Resolved, That the following declaration of its policy, adopted at its last convention, be reaffirmed:

1. The United Typothetæ of America maintains the right of every firm comprised within its membership to conduct an "open" office, employing whomsoever such firm may choose, with due regard to existing contracts.

2. The United Typothetæ of America maintains the right of its members to employ whomsoever they see fit in the management of their respective offices.

3. The United Typothetæ of America maintains the right of every firm comprised within its membership to sell to or to purchase from whomsoever they may see fit, without prejudice. It being understood that the laws of demand and supply and of credit alone should govern transactions of buying and selling.

4. The United Typothetæ of American aims to secure uniform action of its members and of the local Typothetæ upon subjects of common interests, and invites united and uniform action to resist any unwarranted or unjustifiable encroachments of labor organizations upon the rights of employers. The United Typothetæ of America, therefore, requests that when a demand is made by a labor union upon a local Typothetæ, such local body should communicate with the National Secretary before conference is had in regard thereto.

5. The United Typothetæ of America is opposed to any further reduction of the working time to less than 54 hours per week for day work. The local Typothetæ are urged not to enter into any contract whatsoever, except upon the lines laid down in the sample contracts prepared by the U. T. A., and all contracts should, before execution, be submitted to the national organization for approval.

6. The United Typothetæ of America is opposed to any agreement between local Typothetæ, or individual members thereof, and employees' unions for the control of trade or membership.

7. The United Typothetæ of America deprecates the use of the union label, and requests local Typothetæ to urge their membership to refuse the use of said union label.

Thomas W. Cadick, of Washington, D. C., presented a short resolution, unanimously adopted, which calls on the Typothetæ all over the country to fight the union label, especially on political printing.

At the afternoon session President Lynch and Vice-President Hays of the Typographical Union went before the Typothetæ and stated their stand. The purport was that the demand framed at the Toronto convention would have to come, but that the officers were willing to arbitrate as to how to make it come as pleasantly as possible. Chairman William Green of the executive committee did most of the talking for the Typothetæ. He summed up his words by saying the stand of the master printers could best be understood from the newly adopted resolutions, a copy of which was then given

to the labor leaders, who at once left. The executive committee was empowered to fix the time and place of the next annual convention. The committee was re-elected, except that E. B. Woodward, of St. Louis, took the place of E. S. Hart, of that city, and William Golder, of Pittsburg, took the place of H. P. Pears, of Pittsburg; also these new members were added: Samuel Rees, of Omaha, Neb.; Fred Smith, of Minneapolis, Minn.; W. O. Foot, of Atlanta, Ga.; F. I. Ellick, of Dallas, Tex.; George H. Buchanan, of Philadelphia, Pa., and E. A. Kendrick, of Buffalo. The four general officers were reëlected as follows: George H. Ellis, of Boston, President; William Green, of New York, Vice-President; Mr. Macintyre, Secretary; Thomas E. Donnelley, of Chicago, Treasurer.

The Buffalo *Express* gave the following with regard to the closing work of the convention and of the executive committee and of statements made by the officers of the Typographical and Pressmen's Unions:

The last meeting of the convention ended late in the afternoon. The executive committee at once went into session, which did not end till 7 o'clock. Having been authorized to receive the message of the International Printing Pressmen & Assistants' Union, the officers of that union went before the committee about 5:30. They were Martin P. Higgins of Boston, President; Edwin H. Randall of Toronto, Ont., First Vice-President; John G. Warrenton of St. Louis, Mo., Second Vice-President; F. P. Ranagan of Boston, Mass., Third Vice-President. They laid before the committee the resolutions adopted at their San Francisco convention last June, calling for the eight-hour work-day at the end of the present contract, which runs till May, 1907. The committee said it would consider the matter.

Mr. Lynch said: "We came here of our own accord. The Typothetæ listened to our report of the Toronto convention. We are firm in our stand. They said they had decided on their stand, and informed us that they could not accede to the demands. We are determind to win."

Mr. Hays corroborated the words. Mr. Higgins of the Pressmen said: "Our contract runs so long yet that the situation is not acute with us. The stitches are healing in the coat we sewed on not long ago and we came on here to find out how the sewing is to be done next time. We want to sew it up when the present contract is out so that we'll have the eight-hour day."

One of the Pressmen's Vice-Presidents said: "The Typographical Union claims about 47,000 members, whereas we have about 19,000, but it is easier to get compositors than pressmen."

* * *

Subjects proposed for discussion at editorial conventions are full of important suggestions and in that way educative in themselves. The mere analysis of a business and writing out the different matters that must be covered or given attention sets the mind to work as to their importance and the methods best calculated to accomplish the ends had in view and to promote the business through these. In giving the programmes herewith of two very active associations, one in Iowa and the other in West Virginia, we furnish live publishers with food for thought on lines that involve the success of newspaper making.

* * *

The Upper Des Moines Editorial Association, of Iowa, has made a record of successful and useful meetings. Its Thirtieth Semi-Annual Convention was held at Des Moines September 14 and 15, and this was the "bill of fare":

Thursday evening, 7:30 p. m.—Meet at Auditorium; meeting in charge of Hon. P. C. Kenyon, President of the Des Moines Commercial Club; address of welcome, Hon. A. B. Cummins, Governor of Iowa; response to address of welcome, Editor Elmer E. Johnston, President of the Association; address, Hon. J. P. Dolliver, United States Senator from Iowa; appointment of committees, Resolutions, Finance, Officers and next place of meeting.

Friday morning, 9 o'clock sharp—Paper, "Relative Importance of News and Editorial Features," F. W. Beckman, of the *Register and Leader;* paper, "The Newspaper and the Public," Miss Anna Donovan, of the Emmetsburg *Tribune;* paper, "The Correspondent," Frank W. Bicknell, of the Des Moines *Mail and Times;* "Frolics of the Types," a dissertation on the "Life and Prominence," "Rise and Fall" of George Fitch, of the Council Bluffs *Nonpariel,* by E. N. Bailey, of the Britt *Tribune;* Fitch is not able to be present, so we all expect to get the facts; paper, "Getting News for a Country Paper," general discussion led by H. L. Rann, Jr., of the Manchester *Press,* and John L. Powers, of the Carroll *Sentinel;* business meeting, reports of committees, election of officers, selection of next place of meeting, etc.

Friday afternoon, 2 p. m.—Street car trip to Fort Des Moines to witness cavalry drill by U. S. troops under Col. Thomas.

Friday evening—Street car ride to Ingersoll Park to accept the courtesies of park managers.

* * *

The West Virginia convention was held at Webster Springs, September 20 and 21, when the following topics were discussed by the parties named:

"Newspaper Ethics," Lamar C. Powell, of the Fairmont *West Virginian;* "Newspaper Legislation from the Standpoint of the Legislators," John J. Cornwall, of the Hampshire *Review;* "From the Standpoint of the Editor," S. S. Buzzard, of the Berkeley Springs *Messenger;* "The West Virginia National Guard and Its Usefulness," Capt. Earl Smith, of the Fairmont *Times;* "The Relation of the Editor to the Politician," Stuart F. Reed; address, "West Virginia and Its Future," Hon. S. B. Elkins; address, His Excellency Hon. W. M. O. Dawson; "Should Newspaper Men Hold Office?" George Byrne, of the Charleston *Gazette;* "The Business Management of a Newspaper," Col. F. Young, of the Morgantown *Post;* "Making a Weekly Newspaper," R. Ad. Hall, of the Weston *Independent;* "Dead Beat Subscribers," J. Slidell Brown, of the Kingwood *Argus;* "Development Along the Line of the Norfolk & Western Railroad," W. C. Hedrick, of the Mercer *Republican;* address, "The Newspaper Man in Business," Charles Burdette Hart, of Wheeling; "Blue Grass and Why It Grows in Pocahoutas," Andrew Price, of the Marlington *Messenger;* "How to Increase Your Advertising," G. A. Bolden, of the Grafton *Sentinel.*

* * *

NATIONAL ELECTROTYPERS ASSOCIATION.

This association convened at Niagara Falls during the same days as the United Typothetæ of America, June 6 and 7. At the opening session President Ferguson, of New York, delivered an able annual address and Secretary Partridge, of Chicago, presented an instructive report, showing many statistics as to this important industry. The organization decided to stand by the members of the United Typothetæ in strikes that ensue from their decision in favor of the right to regulate their own business and to conduct open shops, to the extent of receiving and doing their electrotyping, the same as from other offices. An agreement was reached also to unite with the photo engravers in the employment of John S. Taylor as their representative or agent. The following named persons were elected to the respective offices for the ensuing year: President, F. O. Cunningham, of New York; vice-president, L. F. Eaton, of Detroit; secretary, C. S. Partridge, of Chicago; treasurer, John J. McErlain, of South Bend, Ind.

* * *

ERRATA.

There is nothing "racy" about hypocrisy, yet our good friends of the Warren, Ill., *Sentinel-Leader* call our attention to the fact that our types made the NATIONAL PRINTER-JOURNALIST to spell it in that way last month and ask if this is a new spelling reform. It is not a reform but an aberration, though the article in which it was used suggested the need of reform.

BUSINESS NOTES

This Department is conducted for the benefit of advertisers, and expresses their claims and views

The Keystone Type Foundry has expanded from Philadelphia and New York to the Pacific Coast and opened a branch house at 565 and 567 Mission street, San Francisco, Cal. The new house is under the direction of Mr. N. R. Baker, with a full force of assistants of experienced and capable men, and the printers and publishers on the Coast are assured the same excellent services as have been afforded by eastern houses and selling agencies. San Francisco is to be made one of the most important distributing points of this great type foundry with its home office and factory in Philadelphia.

* * *

The half-page advertisement presented this month by the Globe Engraving and Electrotyping Company, of Chicago, deserves especial attention. The plate printed from is a nickeltype, from a halftone, from a zinc etching, from a proof, from an electrotype, from a wax engraving, from a pen drawing and a photograph of a globe. Every process except wood engraving was used in the operation of producing the plate for this advertisement, and the white lines around the large letters in the center panel are engraved by hand. It is an instructive curiosity in the engraving art, the possibilities of which have become almost unlimited.

* * *

We have received from the Mergenthaler Linotype Company a splendidly gotten up bound volume that contains a complete showing of Linotype faces as well as all the hundreds of accents and special characters, of many varying designs and uses, designed and cut for the Linotype machines. The book is an excellent specimen of the highest grade and quality of typographic art and furnishes convincing proof of the wide field in every branch of printing successfully covered by this machine. The book is worthy of careful attention and study as indicating all the broad range of work made possible, as well as for the choice of new and attractive type faces and designs presented.

* * *

The Barnes-Crosby Company *Budget* is an artistically designed and gotten up monthly booklet showing selections from the company's daily work. These designs are not only attractive but educative, for they are practical, showing results from actual work in catalogue and other commercial work. Accompanying these selections, or specimens, are informing remarks as to the art of illustration that has now become so large and indispensable a feature not only in book, newspaper and magazine making but in every branch of business publicity. The Barnes-Crosby Company give superior service as the result of a combination of unsurpassed equipment and the large force of artists and engravers under capable management.

* * *

The "Chandler & Price Pyramid" presented in this issue of the NATIONAL PRINTER-JOURNALIST is a well-earned monument of continued and remarkable success. An increase of nearly eight fold in the yearly output of a great manufacturing establishment in nineteen years would be wonderful in any line, but that this showing should be made in one line of printing press manufacture is not only surprising but is proof positive of superior merit. One would think that the market for machines, that lasted for many years beyond the one in which the first were turned out would in a measure be supplied, but with the Chandler & Price Gordons this is not the case. In 1887 there were 311 Chandler & Price presses sold and delivered, and up to and including 1904, 21,552 had been sold and were in use, and yet the sales in 1905 were 2,393, making a total of Chandler & Price Gordons sold, in nineteen years, 23,945. There can be nothing more convincing than such facts and figures.

* * *

The Salisbury, N. C., *Sun* has sold, through the newspaper brokerage office of C. M. Palmer, 277 Broadway, N. Y., by H. B. Varner, of the Lexington, N. C., *Globe*, to William Geppert, of the *Musical Courier*, this city, and his son, William L. Geppert, formerly associate editor of the Clarksburg, W. Va., *Telegram*.

Mr. A. N. Lawson, for seventeen or eighteen years with the McKeesport, Pa., *Daily News* and of late managing editor of that paper, has bought the *Daily Herald* property of Norwalk, Ohio. C. M. Palmer, the newspaper broker, conducted the negotiations.

* * *

CLEANING REGISTER HOOKS.

At the present time cleansing register hooks after a long run of color work is a serious matter. In spite of the greatest care dust and ink will accumulate in the openings of the hook which is necessary for the operation of the clutches and screws, and the only way to thoroughly clean them now is to dismantle the hooks and have each part washed separately in lye or benzine.

The accompanying illustration shows the way the Challenge Machinery Company now make all their hooks. The opening is at the bottom of the hook and does not in the least weaken or impair its use, while at the same time the working of the screw and the clutch is open so that by using a brush with hot water and lye, or with benzine or by forcing steam through this opening, the hook can be cleaned perfectly and quickly. There is not only a great deal of time saved, but the register hooks are also kept in better shape and the length of wear materially increased. For any further information send to the Challenge Machinery Company, Grand Haven, Mich.

INTERNATIONAL PUBLICITY.

SPECIAL EDITION OF PROFITABLE ADVERTISING WILL COVER THE WHOLE INDUSTRIAL WORLD.

A notable event in the history of advertising journalism is the forthcoming publication of an International Edition of *Profitable Advertising*, Boston. This unique special issue of the magazine of publicity is scheduled as the November number, and will appear about October 25th. It will be totally different from anything that has heretofore been published, covering practically the whole wide world from the advertisers' and publishers' standpoints, and presenting the subject interestingly and comprehensively.

The International Edition will consist of nearly 300 pages, making it the largest advertising magazine ever issued.

It will contain valuable information on advertising conditions in Great Britain, France, Germany and America by men who have had extensive experience in their respective fields. Among the articles from abroad are the following:

"Tariffless Great Britain: Some Suggestions to American Advertisers," by Frank Colebrook; "Continental Advertising," by Wm. Hy. Beable; "America's Foreign Trade Opportunity," by Paul E. Derrick; "Advertising in the British Colonies and India," by Edwin Pugh; "Advertising in English Newspapers," by Edmund Street; "Mail Order Advertising in England," by Philip Smith; "Advertising in France," by John Fred Jones; "Advertising in Germany," by C. H. Phillips; "Advertising in Holland," by J. H. De Bussy.

Wants and For Sale.

Advertisements will be inserted in this column at the rate of 25 cents a line, ten words to the line. Copy must reach this office no later than the 20th of the month preceding date of publication. Cash must accompany order.

HELP WANTED

WANTED—All round printer to act as foreman in weekly newspaper office doing good job business in city of 5,000 in Central Ohio. Must be good job compositor and able to handle cylinder and Gordon presses. A steady position and good wages to the right man. Married man preferred who is now employed in small city office on both composition and press work. Write at once, stating salary expected and when you can come. Address FOREMAN, care NATIONAL PRINTER-JOURNALIST, Chicago, Ill.

FOR SALE—PRINTING MATERIAL

ELECTRO COPPER-FACED TYPE. Empire Type Foundry, Delevan, N. Y.

FOR SALE—Two Revolution, back delivery press made by C. Potter, Jr., & Co.; four form rollers; measurements of bed between bearers, 54x40; will take form 38x52; rack and screw vibrator; table distribution; three tracks; overhead steam fixtures; eight roller stocks and four angle rollers; in good condition; a bargain, if taken by October 1st. Address "R. P.," care of NATIONAL PRINTER-JOURNALIST.

PRINTING PRESSES FOR SALE—Second-hand, 43x56 Cottrell Two Revolution, 44x60 Potter Two Revolution, 43x56 Campbell Two Revolution, and several Drum Cylinder and Pony Presses at very low prices. Address "CHASE," 1417 Commonwealth Bldg., Philadelphia, Pa.

MISCELLANEOUS

A MONEY-MAKING SYSTEM FOR THE EMPLOYING PRINTER. A handy little volume describing a simple, economical, yet practical and comprehensive system for ascertaining the cost of printing. This system has been tried and is adaptable to large and small printing and manufacturing plants alike. Illustrates full blanks for all departments along with bookkeeping system for business office; 125 pages, 4½x7 inches, cloth, $1.00. NATIONAL PRINTER-JOURNALIST, Station X, Chicago, Ill.

THE VAN BIBBER ROLLER CO., Sixth and Vine Sts., Cincinnati, will give you *the best rollers* that can be made for any season or press. Our facilities are the best, and we use the latest Gatling Gun and compressed air apparatus. It pays you to have good rollers, and they count more in presswork than anything else. In writing or shipping, "Cincinnati" is sufficient. Everybody knows us.

ANYBODY CAN MAKE CUTS with my simple transferring and etching process. Nice cuts, from prints, drawings or photos, are easily and quickly made by the unskilled on common sheet zinc. Price of process, $1. All material costs at any drug store about 75 cents. Circulars and specimens for stamp. THOS. DAY, Box P, Windfall, Ind. My Simplex Mailer only $2.50, send for circular.

A COLD SIMPLEX STEREOTYPING OUTFIT, $17.00 and up, produces the finest book and job plates, and your type is not in danger of being ruined by heat. Simpler, better, quicker, safer, easier on the type and costs no more than papier-mache. Also two engraving methods costing only $5.00, with materials, by which engraved plates are cast in stereo metal from drawings, made on cardboard. "Ready-to-use" cold matrix sheets, $1.00. Come and see me if you can; if not, send postage for literature and samples. HENRY KAHRS, 240 East Thirty-third Street, New York.

The *Newspaper Transient* publishes all the latest propositions. Tells how and where to buy a newspaper. Don't invest until you see the *Transient*.. Copy free. Meritorious propositons wanted. H. F. Henrichs, Madison St., Girard, Ill.

FOR SALE—At a bargain. A simplex setting machine with 700 pounds of brevier type, as good as new. Daily Journal, Webster City, Iowa.

MISCELLANEOUS—Continued

EDITORIAL for any publication. Exclusive. Luxury for busy publishers. Price you can afford. Full information cheerfully given. "X," NATIONAL PRINTER-JOURNALIST.

SOUTHWESTERN DAILY

With established business of $16000.00 yearly on good paying basis, located in fast growing city of 20000, if sold within short time is available at $8000.00. But one competitor. An excellent opportunity. Proposition #98.

PRACTICAL JOURNALISM

A Complete Handbook of Modern Newspaper Methods

By EDWIN L. SHUMAN
Author of "Steps into Journalism"
Literary Editor of the Chicago *Record-Herald*

Illustrated, 12 mo. Cloth $1.25 net; postage 12c additional

THIS is the most comprehensive treatise on newspaper work that has thus far appeared. It explains the organization of a newspaper staff, the best way to enter journalism, the usual steps of promotion, the salaries paid, etc. There are practical chapters on how to start and run a country newspaper, and for workers on the country press there are valuable suggestions on how to make connections with large city papers. There is a chapter for the country correspondent.

Mr. Shuman's method in regard to the large journals has been to tell what each department does, and the best methods of doing it. We get a view of the reporter at work, coupled with clear instructions on how to write a news story. The question of how to get a start is answered in regard to every department. For the experienced editor there is much valuable information in the chapters on errors, libels and copyright. There are chapters for artists, ad writers, women and special writers. The book covers the whole field of journalism with a thoroughness never before attempted.

CHAMPLIN & SMITH

121 PLYMOUTH COURT, CHICAGO, ILL.

¶ No matter how cheaply a job is printed, there is always somebody ready to do it still cheaper and still poorer, but quality is a question of ability. Therefore progressive printers are studying to-day not so much how to do cheaper printing, but how to do it better.

¶ And, as a sure and powerful lever to that end, they are using

ULLMAN'S DOUBLETONES

AND **ULLMANINES**

increasing their business incomes and educating a willing public to finer effects.

Second Order for Printers' Account Book

The following is the second order received from the Trade Journal Press, San Francisco, for the Printers' Account Book.

San Francisco, Aug. 5, 1905

National Printer-Journalist,
Dear Sirs:

We are in need of another Printer's Account Book and would be pleased to have you send one to us at your earliest convenience as we are very much in need of one. Enclosed please find our check for $3.50, which is the price of the 200-page book and the one we want.

We are yours respectfully,
Trade Journal Press.

THIS Book saves time and money; a system for entering jobs, keeping a record of paper stock, cost of all labor and material.

If a job is done for a customer, and he orders it duplicated in a week, a month or a year afterwards, you can instantly turn to your Account Book, which gives you every item of information in connection with doing the work in the first instance, even to a memorandum of where the material or paper was purchased, the grade, size and weight of the stock and how it cut, and shows how much money was made or lost in the first instance.

The Printers' Account Book is 11¾ x 15¾ inches. Price of 200 page book, 1000 jobs, $3.50; 2000 jobs, $5.00.

National Printer-Journalist
Station X, Chicago, Ills.

The Babcock Optimus
The Babcock Optimus

¶ A press slow in make-ready is usually one where the owner does not know it. It is one where an overlay counts for little; where the last bears off the impression from all around, and patch after patch is needed to bring it up; where, if proper strength be given to foreground and deep shadows, make-ready seems never to cease; where the high lights are muddy, and the middle tones lost; where, after the hardest work for double the time figured in the estimate, the result is not good, and where the patching must continue throughout the run. ¶ It is the best that can be done. The press is weak, a fault the pressman cannot correct. It gutters, and proclaims its weakness. Weakness makes work. It may be a so-called high-speed machine. It is in fact slow, and a time waster. With competition it is unprofitable. ¶ The reverse of this is the Optimus. A tissue patch shows for full value. There is no lifting around overlays. Not many are needed. On some forms none. It is strong—rigid—the very strongest. Its strength gives delicacy, evenness, uniformity. Solids can be made solid, deep shadows strong, high lights clear, with least effort and little time, on a lasting tympan. It is fast in make-ready. It will print fast, surprisingly fast, and easily.

¶ Absolute register and perfect distribution can be assured upon a Hoe Stop Cylinder Press. There are some jobs that require double rolling upon a 4 roller two revolution that can be satisfactorily run upon a six roller Hoe Stop.

¶ In a battery of four or more modern presses doing fine printing, a Hoe Stop will more than hold its own as a profit bearing proposition. High grade work cannot be fed to register beyond the capacity of a Hoe Stop.

¶ This press has six form rollers with vibrators and riders, table and cylinder distribution, roller trip, tapeless delivery, four tracks, is thoroughly built from base to feed boards. Will be erected upon your floor at our expense upon sixty days trial for $1500 (cost new $4500) with the understanding that it is to fulfill our guarantee in every particular.

Conner, Fendler & Co.,
New York City.

The Printer who makes his own Tints

can depend on uniform results if he uses *Tintolene.* This is *almost impossible* when Mixing White or Magnesia is used.

Tintolene besides being more economical to use than the old tint-makers, prevents ink from drying on the rollers and forms, yet causes it to lay nicely and dry out on the paper with that desirable smooth effect. It prevents the old trouble of mottling, and *will not pick.*

Send for samples and circular giving further particulars

SPECIMENS OF CALENDARS

MANUFACTURED BY THE HAMILTON MANUFACTURING COMPANY

PERPETUAL CALENDAR SETS

WE present herewith our new assortment of Calendar Figures. It is impossible to show complete sets, but it can be borne in mind that a full calendar month is 7 blocks wide and 5 blocks deep. The full size of the Calender can be thus easily ascertained. Likewise we will explain that a Calendar Set will increase or decrease in size in the same proportion that the size of a single block is increased or decreased. For example, if a 6-line Calendar Set is 9 inches wide by 6 inches deep over all, the 8-line will be one-third larger, or 12 by 8 inches. This page shows the most complete assortment of Calendar Figures ever offered. The surrounding rules are brass and are not supplied by us.

The Babcock Optimus
The Babcock Optimus

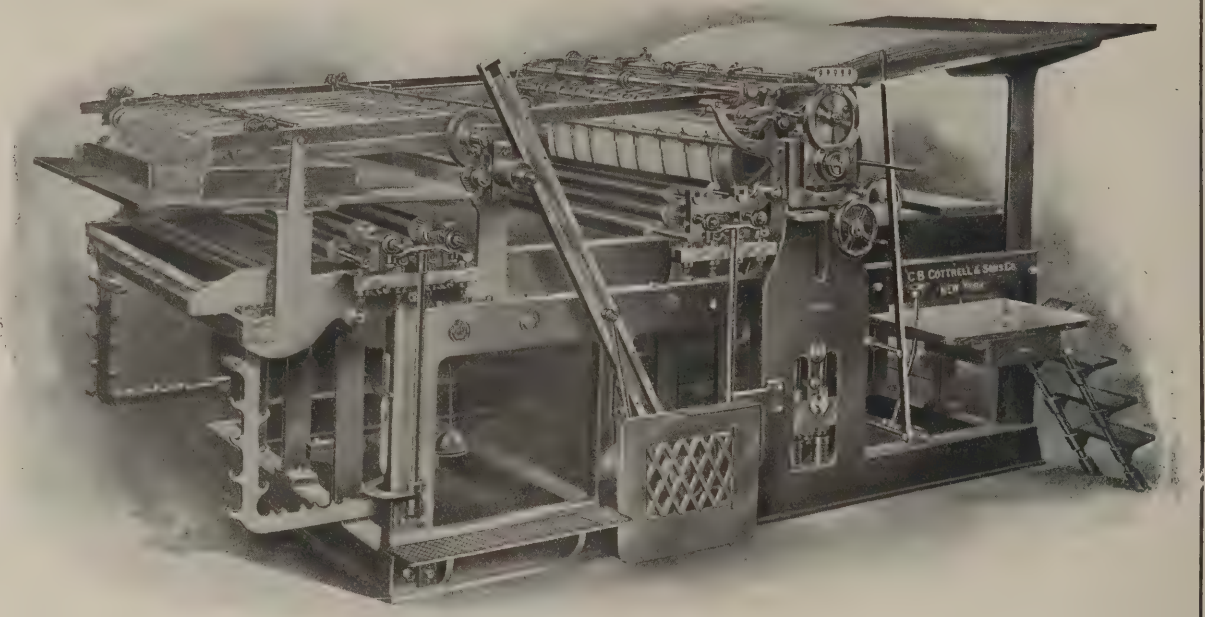
Quads and spaces working up? Excepting electricity in paper nothing so hampers the pressman with delay, or costs more in spoilage, damage to form and loss in time. The two make the chief evils of a pressroom.

A positive cure has been found for electricity in paper. The Optimus prevents the other.

Quads, spaces, leads and furniture are not brought to the surface on an Optimus through fault of the press. Its construction is with special reference to preventing this, and prevention is better than impossible cure.

The Babcock Optimus

SET IN BARNHART BROS. & SPINDLER'S OLD ROMAN CONDENSED



The Cottrell High Speed Two Revolution Press

Specially designed for the exacting demands of three-color printing where perfect register is absolutely necessary. New features have been added for facilitating the production of the finest work.

The press is furnished with our Patent Convertible Sheet Delivery which can be set to deliver the sheets printed side up, or it can be changed to the regular fly delivery in five minutes time. The convertible delivery is operated by a variable speed crank motion which dispenses with the fly spring, thus saving the power required to compress the spring, at the same time making the motion more simple and convenient.

PRINTERS!

The President of the United States

in the following language has officially stamped the Mergenthaler Linotype Company as a calumniator, as an assassin of character; he says:

> *"Second only to corruption in a public officer in point of iniquity comes making a baseless charge of corruption, and this is what the committee finds the Mergenthaler Company has done in this case, its comments being in part:*
>
> *'In the light of the failure of the Company to produce evidence of such corruption, it must be held that the charge was made recklessly, and the Mergenthaler Company should be condemned severely for including such a charge in a formal communication to the President of the United States, made as a basis for official action on his part.*
>
> *'It is fair also to the Lanston Monotype Company to say that no evidence was presented by the Mergenthaler Company, nor was any obtained by the committee in the course of its hearing, tending to showing any promise, payment, or consideration of any kind whatsoever made by the Lanston Company, or any of its officers or agents, to any person in the government service.'"*

This will sufficiently indicate the nature of the methods we have had to combat; but it does not reveal the extent to which the unseen agents of misrepresentation have sought to injure the name of Monotype.

We are fighting your fight, and we want your co-operation in a campaign for clean business methods, and for truth-telling in competition.

[Continued on next page]

[Continued from preceding page]

As purchasers you have the right to know the truth about every machine, every pound of material, every sheet of paper that is offered you for sale.

As purchasers you have the right to expect the truth of every concern, or its agents, which seeks of you trade; and you have the right to expect the truth not only about the things it has to offer, but just as truthfully is it bound to answer you about its competitor's goods.

If any concern does not so answer you it attempts to deceive, and the deception is aimed directly at you. Not only is deception sought to be practised upon you in a matter which affects your livelihood, but an insult is offered your business acumen.

Therefore, when we emphasize the scathing rebuke which has been put by the President upon our competitor, whose goods we have no need or desire to rate at other than their just value, we do so solely for the purpose of awakening you to the kind of campaign that has been waged against you, and against us, a campaign conducted amongst you for the sole purpose of keeping from you correct knowledge of a new tool which it is feared you may wish to employ.

But we intend that you shall learn of that new tool, and truthfully. We have nothing about it to conceal; on

the contrary we have an immense number of profitable facts to lay before you, which you will be glad to know.

To these we shall ask your attention; we shall ask you to weigh them, and to compel us to demonstrate them.

But—and here is the point of the demand we are about to make upon you—whoever in your hearing decries the Monotype immediately place under your suspicion; he is one not to be trusted.

Almost infallibly either he does not know, or is purposely attempting to mislead you for his own profit, because no man can demonstrate the falsity of a single claim we make for the Monotype, nor can he produce a single machine being properly run that is not giving its owner utmost satisfaction.

Therefore we say to you: if you find the Monotype not what you have been led by us to believe it to be, under no circumstances purchase it; but let your opinion be based upon your own investigations, not upon the kind of prejudice that so often is born of the whispered calumny of those whose profit it is to mislead you.

WOOD & NATHAN CO.

Sole Selling Agent.

New York, September 20th, 1905.

THE MONOTYPE

On June 19th, 1905, the Public Printer ordered for the Government Office at Washington, 72 Monotype Machines.

Upon learning of the purchase, the Mergenthaler Linotype Company made to the President allegations of corruption on the part of the Lanston Monotype Machine Company and sought to induce him to revoke the order.

On September 10th, after a thorough investigation of the charges, the President issued the statement from which we have quoted, and ordered the contract to stand as made.

When these are installed there will be in the Government Printing Office 100 Monotypes, the largest plant of composing machines in the world.

BE A 20th CENTURY PRINTER

UNITED PRINTING MACHINERY COMPANY

A Company organized to manufacture and sell machines and appliances for reducing the cost of production of printing.

AUTOMATIC TYPE MACHINE.

Leased to printers (30 years, $2000), for making their own type from 6 to 36 point bodies; matrices ready for sale or rent for nearly all the standard and popular type faces and borders. The cost of type is about 6c. per lb., plus metal.

DUX FEEDING MACHINE.

The lowest priced feeding machines; effective on long and short runs of all sizes and kinds of paper.

AMERICAN ROLLER WASHING MACHINE.

A machine for washing rollers for cylinder presses. A great economizer in offices running five presses or over.

VICTOR STEEL DIE EMBOSSING PRESS.

Used by the leading steel die printers. Price reduced.

STEEN POWER COMBINATION PUNCH AND EYELET MACHINE.

The only machine that punches and eyelets at one feed. Price reduced.

SPARKS ROUND-HOLE MACHINE.

A small machine, using ⅛h.p., that does the work of five $200 punching machines, and better work.

SPARKS SLOTTING MACHINE.

Cuts slots in loose leaf paper, and card work of all kinds.

SPARKS CRIMPING MACHINE.

Crimps the binding edge of loose leaf papers, completing the operation without pressing.

DUNNING DECKLE EDGING MACHINE.

Puts a deckle edge on any kind or size of paper, after the printing. Cost of deckle edging is nominal.

MALEY IRON REGISTERING BLOCK.

Holds all sizes and shapes of electrotypes, registering them quickly and absolutely.

ELLIS FAC-SIMILE TYPEWRITER RIBBON HOLDER.

A small device ($10.00) for holding a typewriter ribbon on any job press, producing a perfect imitation of typewriter effect from type.

TYMPALYN.

A woven wire blanket filled with rubber, for use on printing press cylinders, resulting in a saving of one-third the time of make-ready.

PRINTING MATERIALS.

Everything of iron, steel, copper brass or wood, used in a printing office, at lowest prices.

EVERYTHING FOR ELECTROTYPING.

We manufacture the celebrated machinery of Geo. E. Lloyd of Chicago, and Lovejoy & Co., New York.

EVERYTHING FOR STEREOTYPING.

In this we excel. Nearly all the machinery used by Western Newspaper Union, A. N. Kellogg Newspaper and American Press Association, was made in our Geo E. Lloyd factory in Chicago.

EVERYTHING FOR PHOTO ENGRAVING.

Complete plants, cameras, screens, lenses, etc., and all the machinery.

PRACTICAL JOURNALISM

A Complete Handbook of Modern Newspaper Methods

By EDWIN L. SHUMAN
Author of "Steps into Journalism"
Literary Editor of the Chicago *Record-Herald*

Illustrated, 12 mo. Cloth $1.25 net; postage 12c additional

THIS is the most comprehensive treatise on newspaper work that has thus far appeared. It explains the organization of a newspaper staff, the best way to enter journalism, the usual steps of promotion, the salaries paid, etc. There are practical chapters on how to start and run a country newspaper, and for workers on the country press there are valuable suggestions on how to make connections with large city papers. There is a chapter for the country correspondent.

Mr. Shuman's method in regard to the large journals has been to tell what each department does, and the best methods of doing it. We get a view of the reporter at work, coupled with clear instructions on how to write a news story. The question of how to get a start is answered in regard to every department. For the experienced editor there is much valuable information in the chapters on errors, libels and copyright. There are chapters for artists, ad writers, women and special writers. The book covers the whole field of journalism with a thoroughness never before attempted.

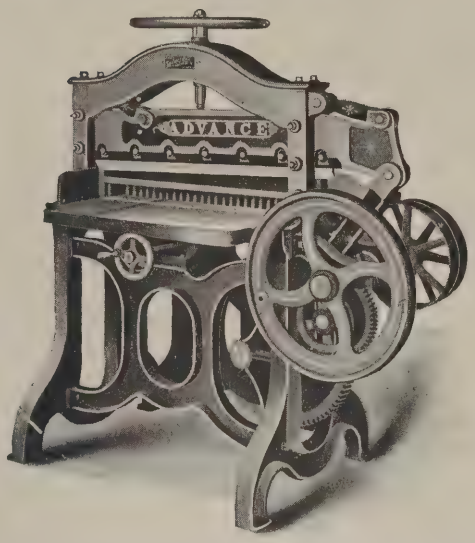
South Africa: John Dickinson & Co., Cape Town. Others elsewhere.

There is a Reason



Why the users of the

Advance Power Paper Cutter

Have next to no Repair Bills to pay.

THE REASON lies in the way this cutter is built, and in the material that is used in its construction. The best iron and steel is used. The large gear wheel is cast from a special grade of iron and the teeth are extra strong. The other gears—three in number—as well as the clutch, are turned and cut from solid steel. This Cutter costs no more than the other kind. You can get full information from your dealer.

DO WE SELL KEYSTONE TYPE?

Well we should say we did

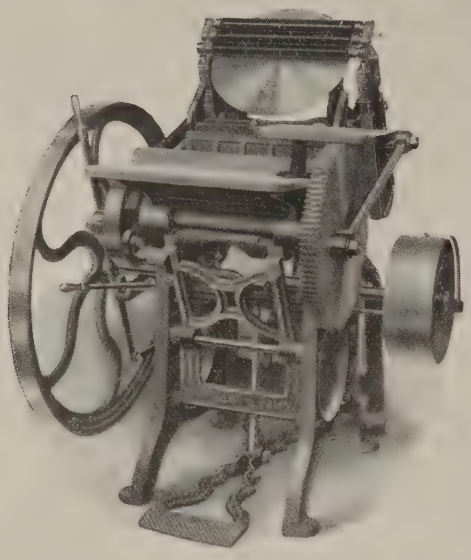
More Keystone is used by Up-to-Date Advertisers than any other make. It always fits the spot. New Faces are coming out all the time and they are making the other people sit up and take notice.

Prompt Service is given by their Western Agents

CHAMPLIN & SMITH

121 PLYMOUTH COURT, CHICAGO, ILL.

Across the Sea



Comes the expression which is echoed by other dealers in Chandler & Price products:

"We may say that your line of machinery has been handled by us with the most complete satisfaction we have ever experienced in dealing with Printing Machinery. We never receive any but the highest testimonials from all purchasers of your Gordon Machine and it is most satisfactory to us to deal in a line about which we can give such a report."

Thousands of friends have been won for Chandler & Price machinery because the rule, "It is better to detect than to have to correct," has been followed in the making of each machine. *The factory inspection is most rigid, and neither new nor standard designs are left with defects to be disclosed by the printer.*

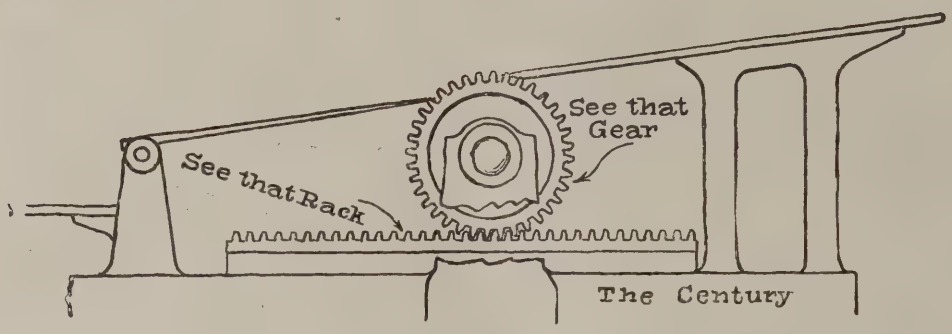
The CENTURY



FRICTION, ROSIN AND PROFANITY

could be entirely dispensed with in operating your presses, did they possess *Immovable Continuous Register Racks and Gears* locking bed and cylinder together throughout the entire printing stroke.

When properly made-ready and printed on a press mechanically accurate between bed and cylinder, a cut cannot fail to register with its overlay—nor can a slur—that bane of the pressman—creep into the tail of the form.

No press can be mechanically accurate between the bed and cylinder, unless the bed and cylinder are locked together by rack and gear throughout the entire printing stroke.

The CENTURY is the only press not dependent upon the time losers *"Friction, Rosin and Profanity"* to produce accurate work between bed and cylinder.

THE NATIONAL PRINTER JOURNALIST

Volume Twenty-two | Chicago, November, 1905 | Number Eleven

EDITORIAL NOTES AND POINTS.

REMEMBER that quality of circulation, as against quantity, is coming, more and more, to be recognized by intelligent advertisers. The paper that reaches, and is welcomed, with affection and read with interest, by the thoughtful, industrious and enterprising, by the most thrifty and progressive people, or in the best homes; that is believed in and respected for its reliability and its entertaining, instructive, helpful matter, is worth a hundredfold more to advertisers than is the paper that is wanting in these qualities. The trivial, dull or sensational publication appeals only to the weak, the non-progressive, the trifling, the dissipated or the immoral, among whom are to be found very few profitable buyers of manufactures, machinery, improved appliances or articles of real value.

* * *

The editor to his community should be like the true painter to his subject, as nobly told by the poet Tennyson:

"As when a painter poring on a face,
Divinely thro' all hindrance finds the man
Behind it, and so paints him that his face,
The shape and color of a mind and life,
Lives for his children, ever at its best."

The editor should see all the best possibilities of his city, county or State and so print these as to be ever an inspiration, a pleasure and incentive for greater efforts and noblest deeds to all the inhabitants. There is always more that is good and ennobling in every community than there is of evil and debasing. The one who is able to discern the good, the true and the beautiful, by portraying of these, wins much more of even business success than he who sees and prints what leads to demoralization and neglect instead of that which gives joy and hope; which encourages and ennobles. Show your community or city "ever at its best," and it will grow better still.

* * *

It has been the tendency to exaggerate the functions of government, to overextol public offices and office holders as of supreme importance, power and worthiness. The fact is that governments and government officials have but little power to advance the prosperity of a people, to add to their happiness or even personal security. Oliver Goldsmith showed himself no less a philosopher than a poet, when he wrote:

"How small of all that human hearts endure,
That part which laws or kings can cause or cure;
Still to ourselves in every place consigned,
Our own felicity we make or find."

It is the right and duty of a free press in a free country to aid in every way possible the cause of good and efficient government, and to insist on a proper, loyal and honest administration of its affairs by its paid servants, the office holders, to whom no more consideration or honor is due than men in any one of the other more successful callings of life. The wrong is in constantly looking to, or teaching others to look to, the government for favors or positions instead of enforcing the ideas of self-reliance, independence and the making of one's own career in business or in some useful pursuit, trade or profession, as containing the greater promise of real honor, contentment, usefulness and permanent success.

* * *

In writing under the caption of "Diplomacy and Journalism" in *Harper's Weekly*, Robert Martin Larner gives some very interesting and instructive facts with regard to the late Secretary Hay's attitude toward newspaper correspondents. He gives as the creed of Mr. Hay, "Honor and patriotism should be twin brothers in diplomacy and journalism." Honor and patriotism include very many essentials, such as truthfulness, accuracy, candor, kindliness, discretion, impartiality, high principles as regards all confidences and the carefully guarding the same; a controlling sense of duty and loyalty to principle and of all that is for the country's weal.

* * *

"Ask and ye shall receive. Seek and ye shall find." Nothing comes, not even religion, in this world without asking and seeking. As in grace, no less in business—and grace often depends in a very practical way on some measure of business success—the thing desired comes only from asking and seeking. One must know and advertise his wants before he can expect these wants to be supplied. There is no dishonor in this asking and seeking. The way to get advertising is to ask for it, and this asking is itself legitimate advertising. It might be very pleasant if in this world people would seek us and ask for our

goods or for our services, but such is not the law or rule of human nature.

* * *

Paul says that all scriptures or writings are by inspiration. When a man puts his pen or pencil to paper to write news, arguments, theories, criticisms or the thoughts coming therefrom, he should be inspired with the fervor of a love for the work, for the truth and for his fellowmen, and with a burning feeling of responsibility and intelligent zeal for the right exercise of the power and the improvement of the opportunity.

The soul should break her slumber and thought be quickened and awake. The newspaper writer or editor who speaks to the people every day or every week in their homes and in their places of employment has an opportunity for influence that is not elsewhere equaled

"In the world's broad field of battle"

and he certainly should be an inspiring hero to his readers.

* * *

To attract attention, to awaken interest, to inform, to convince, to persuade, to win and to cause people to act are the elements of good advertising.

* * *

We talk a good deal about the sinking the individual in newspaper work yet it is human heart and personality back of the press that wins every time. Personality secures the entree that makes possible every step in business.

* * *

Advertising is cumulative. To quit advertising is to throw away all that has been previously invested therein. It is the letting go, the ceasing to ask or to seek that bring ultimate failure .

* * *

The buyer is the best judge of the efficiency of advertising, and advertising should be viewed from the standpoint of the prospective customer whose patronage it is sought to win. Put yourself in his place and then tell that in which he would be most interested and by which he would be instructed and influenced through knowing or being told.

* * *

When the interest in your paper lags and subscribers drop off, act on the plan of the famous divine who when asked by a country preacher what to do when his congregation went to sleep, replied, "Wake up the preacher." Wake up the editor and the whole force.

* * *

The *Inland Empire* of Moore, Montana, starts its No. 1, Vol. 1, "with the hope that it may be the means of assisting in the advancement of the varied industries of its section of Montana." It is to be devoted to the moral, social and material welfare of its locality and county. The very excellent platform proclaimed by Geo. H. Beasley, Business Manager, and Butte H. Tipton, Editor, is worthy of general adoption:

"In our news department we will endeavor to give all the news that is true and fair and kind, pursuing to the best of our ability the motto of doing by others as we would be done by, believing that a newspaper should stand in the light of a peacemaker rather than as an agency for turmoil and strife, unjust and bitter criticism, personal enmity and spite.

"We are not straining for elusive plums that hang high up on the tree of politics. This is a newspaper 'with a mission and without a muzzle.' All we ask is a 'clear field and no favors.'"

* * *

We have had frequent occasion to speak of the excellent newspaper work and of the conspicuous success of Frank H. Hall, of Joliet, Ill. The inevitable has come. He has been promoted to the position of business manager of the Dayton, Ohio, *Journal,* and has moved with his family to that prosperous Ohio city. Illinois loses and Ohio gains an able newspaper man, a royal, kind-hearted gentleman and a patriotic loyal citizen. The Joliet Daily *Republican* says of him:

"Mr. Hall, during his long residence in Joliet, has made a host of friends, in both business and social circles, and they will all wish him the greatest possible success in his new field. He is a thoroughly capable newspaper man, from the business-office standpoint, and the *Journal* is to be congratulated on securing his valuable services. He is joining the forces of one of the oldest papers in his newly-adopted home and his friends may be assured that he will 'make good.'"

* * *

Many members of the National Editorial Association will regret to know that the genial C. B. McCoy, of the Coshocton, Ohio, *Daily Age,* is to be lost to the newspaper calling. As an earnest working member, and as a friend, comrade and associate at the annual conventions, few have won a larger place in the respect and high esteem of the editors than has Mr. McCoy. He has been always genially devoted to the interests of the calling and to all worthy members thereof, and it has taken no small inducement to cause him to arrange to give up, on January 1st, 1906, his newspaper work. In a little over thirteen years, Mr. McCoy has built up one of the most progressive and prosperous newspapers in the United States for a town of the size of Coshocton, but, in the meantime, he had also become interested as a stockholder in the Meek Advertising Specialty Company, that is now the largest company in the world engaged in the manufacture of advertising specialties and lithograph signs, and that has still the prospect of greater growth and increasing usefulness in the future. He makes the change to accept an important and lucrative position in the executive management of this company. The proposition was so tempting that it could not, in justice to himself, be turned down, though its acceptance requires that he retire not only from the newspaper, but from the postmastership and the chairmanship of the County Executive Committee. He finds the hardest pull at his heart strings in giving up the newspaper work and severing himself from the fond associations enjoyed in fraternizing with editors in the State and National associations. We prophesy that he will return to the calling after he has made a fortune.

As a point to this note, a word with regard to this matter of the manufacture of advertising specialties. We understand that the Meek Co. first had its origin, some sixteen years ago, in a successful effort to keep an ideal job press in a newspaper and job office profitably employed. The plan succeeded to such an extent that the factories now occupy a floor space of six acres and employ six hundred operatives.

Mr. Meek, in a very few years, had to give up his newspaper work for this vastly more profitable and extensive part of his business. Not every owner of a paper and print shop can reap so signal a success, but, in every community, a profitable demand can be

found for well gotten up advertising matter or specialties, and every printer should avail himself of this opportunity to keep his presses profitably employed. The manufacture of something that is salable opens the way for securing liberal profits. The manufacturing printer is not compelled to rely entirely on bidding for work against competitors. It is good business to turn out something for sale for which a demand can be found.

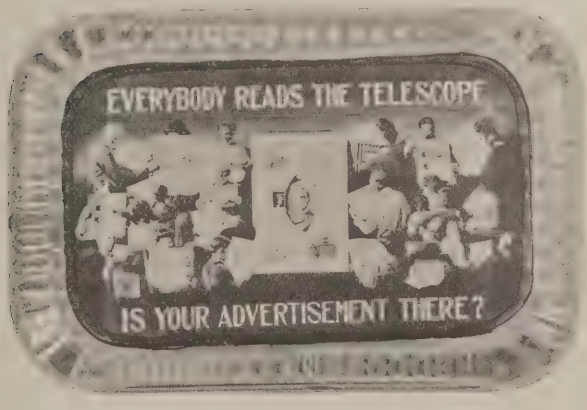
* * *

The name of J. E. Junkin, of Kansas, First Vice-President of the National Editorial Association, is being mentioned by the newspapers in connection with the office of Governor of his State. Well, why not? Newspaper men have proved to be the very best of governors. Their calling fits them to understand the wants of the people and puts them in touch with all public institutions. The papers say that Mr. Junkin is not an active candidate for the place and will probably have to be drafted, though he would no doubt stand the draft in case of a "free-for-all" contest, though he would not permit his name to stand out alone against Governor Hoch, who is also a newspaper man. Only one thing is presented in the papers against Mr. Junkin's candidacy, and that is his popularity and usefulness as an officer of his State Press Association. The Kansas City *Journal,* under the caption "Can't Be Spared," says:

"Some of the country editors are knocking on the J. E. Junkin gubernatorial boom. If Junkin were governor, what would the editorial association do without him to arrange excursions?"

* * *

This office acknowledges the receipt of a handsome



Ingenious Paper Weight, Showing Home People Reading the Paper.

souvenir paper weight from A. R. Miller, of the Belleville (Kansas) *Telescope.* It presents such convincing advertising features that we show herewith a halftone reproduction of the same. It is handsome and unique and makes a very pleasing and useful ornament for the table. It is good advertising. The *Telescope* can be rated among the first class local dailies of the country. Its local news and neighborhood news are given the attention and space deserved, the other departments are properly handled, and the paper is ably edited. The only criticism we have is the admitting an advertisement on the first page, and the lack of systematic arrangement of ads. It is only a 4-inch, double-column baking powder advertisement, in the upper right-hand corner of the initial page, but it mars the otherwise very attractive page. A four-page circular, printed on rose-tinted paper, inclosed in a letter from the *Telescope,* advertises the paper in an effective way by giving quotations of the good and well-deserved compliments paid it by different newspapers throughout the State. It is gratifying to have a paper concerning which State contemporaries are constrained voluntarily to publish such complimentary opinions. The *Telescope* is in its thirty-fourth year and the Kansas City *Journal* gives the following interesting item joined to a compliment:

The Belleville *Telescope* prints a list of 278 subscribers who have read that paper continuously for thirty years. A country newspaper that can hold that many subscribers that long certainly must give all the news all the time.

Here is an item from the *Telescope,* that we have not seen elsewhere, that tempts quoting, although hardly coming under the matters in hand:

According to an exchange, the man who went out to milk and sat down on a boulder in the middle of the pasture and waited for the cow to back up, was a brother of the man who kept a store and wouldn't advertise because he reasoned that the purchasing public would back up to his place of business when it wanted something.

* * *

We have received an especially artistic and handsomely illustrated pamphlet describing the Culver Military Academy of Indiana, to be visited by the members of the National Editorial Association on the itenerary following the coming convention at Indianapolis. The location of the school is evidently one of Earth's beauty spots and the beauties of forest and stream, of land and lake, have been enhanced by the work of the landscape gardener, the architect and the builder. Everything indicates the cultivation of order, manliness and a taste for the beautiful in nature and art. The illustrations, showing the students at drill or on parade, indicate all that can be obtained, by military discipline and training, in noble bearing, dignified, manly carriage and appearance. The curriculum of study is broad and embraces all the branches of a practical, liberal education. Both the mind and body are symmetrically developed and principles of moral heroism inculcated. Gymnastics find a proper place and include rowing, cricket, baseball and other outdoor sports. The military course includes rough riding, as a preliminary to cavalry drill, infantry training, gun drill as artillery, and field engineering. In addition to all these, they go through a course of instruction in naval duties afloat on the lake during summer months.

A writer in the London, England, *Graphic* says of the boys, whose drills he witnessed:

"As rough riders they are able to acquit themselves like men, and their cavalry drill is marked by a precision which even British troopers would approve. At field-engineering and the construction of bridges they

labor like sappers, bearing with cheerfulness burdens that seem all too heavy for their lithe forms."

We hope to say something more later on, of this school and its model instructive features and to illustrate the many attractions. The institution will well repay a visit by the editors.

* * *

System, that magazine par excellence for the man of affairs, prints on the initial page of its October issue in Great Primer text, the following important truisms as to self-confidence, which is but another name for a well-founded, unwavering faith:

A faint heart never won fair dividends; and the man who does not believe he *can* do—seldom *does.*

Self-confidence is the general manager—the pusher—the director of the master mind. It decides that the thing can be done—and spurs, drives, inspires the man to do it.

It is the breeder of courage; the foundation of resolve; the stimulator of energy and genius.

It revels in competition; sneers at gibes; pooh-poohs the unsurmountable; gives the weak the strength to oppose the strong, the one-man business the COURAGE and determination to outclass the giant corporation.

"Impossible?—There is no such word in the dictionary!" That's self-confidence and almost—SUCCESS.

* * *

Simplicity, boldness and clearness are three essentials in ad composition. Do not mix different faces or styles of type in an advertisement. Do not use ornamental faces that are difficult to read. An advertisement is simply a news story about goods so told as to carry conviction of its truthfulness and to win assent and lead to action. It is important, on account of its business winning power, and hence demands display. The beauty is to be secured by artistic and harmonious arrangement and the use of borders and of appropriate and attractive illustrations. The use of borders is to cause the matter to stand out bolder and clearer and the use of the illustrations is to convey the central idea at a glance as well as to attract and hold interested attention. There must be nothing that tends to obscure the text or to make the advertising statements secondary or difficult to read. We once heard Christine Nilsson sing "Home, Sweet Home," and every word came out as clear to the ear as do apples of gold in pitchers of silver to the eye. So, in advertising, let every word stand out clear, round, full and beautiful. There is no less of harmony or beauty in this no more than there is any less of sweetness of harmony in music when every word is clearly enunciated. Whatever may be said of operatic music with the entirely lost words in bringing out the high notes, anything similar to difficult operatic singing has no place in an advertisement. Avoid difficult type gymnastics, over ornamentation, rule twisting, black art or sleight-of-hand performances in your advertising position. You want to get right down into the understanding and the sympathy, the confidence and the very heart of readers. This cannot be accomplished by difficult type and rule performances that are neither understood nor appreciated and that tend to veil the text.

* * *

In the December issue of the NATIONAL PRINTER-JOURNALIST Addison B. Burke, of the Philadelphia *North American,* will give the last of his series of instructive and entertaining articles on the 1905 journeyings of the National Editorial Association. This month Mr. Burke takes us from Los Angeles to Portland and next month he will describe the return trip. This has been a work of love on his part for which the editor and readers of the NATIONAL PRINTER-JOURNALIST are sincerely grateful. Our heart has burned within us, as we have read his account, and the accounts, in their own papers, given by other members of the party. From start to finish the editors found no end of entertaining subjects of which to treat and facts to record that have proved not only increasingly engaging, but vastly educative, to their readers in every part of the United States. This has ever proved true of editorial stories of travel "in this" (as Mr. Woodruff of the Litchfield, Conn., *Enquirer,* states it) "greatest nation, inhabited by the finest people that the world has ever known."

It required no little self-sacrifice on our part even with the pleasant duty before us of getting out the July issue of the NATIONAL PRINTER-JOURNALIST, continuing the proceedings and papers of the extremely useful and successful convention at Guthrie—to deny ourself the pleasure of this trip and the comradeship that it promised and afforded those who went. The regrets that we felt were heightened by the fact that it had been our part to be at Portland and to take part with the early movers in the enterprise for holding the Lewis and Clark Centennial Exposition.

This has passed and our pleasure has been almost as great in reading of the delights enjoyed by others during the unequaled itinerary and in contemplating the splendid success enjoyed by the people of Portland, of Oregon and of the whole Pacific Coast, in this exposition that not only did a work for patriotism by the celebrating so grand and far-reaching an event, but in calling the attention to, and informing hundreds of thousands, in a most impressive and practical way, of the grandeur, magnificent extent, unsurpassed beauties and boundless resources and possibilities of the Pacific States. The accounts given by the members of the National Editorial Association to millions of readers will help all this as well as bringing all the people of the States to a better understanding, and to have an affection that binds and cements, for the great West that has been too little known and not half appreciated. But these points are not what we started to mention. We had only thought to again, as often heretofore, call attention to the importance to readers of these accounts of travel in their own country, given by an editor to the readers of the home paper. That this is pretty well understood by those who have taken part in these annual excursions is evidenced by the fact that the editors who enjoyed this last journey are still telling the story to interested readers who are asking for more, though the travel ended on July 4, or nearly four months ago. Mr. Woodruff, of Connecticut, has sent copies of his paper up to Oct. 12, each containing an installment of two columns or so of the story as to what was seen, enjoyed and learned, and yet has only reached, in his account, a partial outline of the wonders and experiences at Los Angeles. What he said in the introduction of his first article leads to the writing of this "editorial note."

It was as follows:

Since his return the editor has been asked, among others, two classes of questions. One is, "I suppose now the *Enquirer* will have all about your trip for the next six months?" The other, "How soon are you going to tell us all that you have seen and done and don't cut it short."

In the twenty years since the editors commenced touring this land, the universal testimony has been that next to home news the accounts of travel by the

CATCHING THE NEWS

How the Associated Press, Which Serves This Paper, Covers the News Field and Informs Many Millions of Readers of the Doings of All Countries.

INTERESTING STORY OF WORK

News Readers Informed of the Agencies Through Which a Panoramic View of the Happenings of the World is Provided—A Description of the Workings of the Greatest News Gathering Association in the World—The Division of the Work and How All That Human Knowledge, Pluck and Perseverance Can Accomplish is Brought to Bear to Supply the Demand.

THE MANSFIELD NEWS, SATURDAY, SEPTEMBER 9, 1905.

Be accustomed have the people of the world become to picking up their daily newspaper, expecting, of course, to find the happenings from every corner of the earth set forth, that few stop to realize what tireless effort from thousands of brilliant writers, what ceaseless energy and what magnificent organization it takes to produce it all. But how the world would pause if some great world event should happen and the newspapers of the country, for once, should fail to cover it.

In the Century magazine for April, May, June, July and August, Melville E. Stone, manager of the Associated Press, the greatest news gathering agency the world has ever known, tells in a most entertaining manner what the Associated Press is and does. The following interesting extracts are taken by special permission from Mr. Stone's Century magazine article.

THE ASSOCIATED PRESS.

"As its name indicates, the Associated Press is an organization of newspapers for the purpose of gathering news on joint account. It is purely mutual in its character, and in this respect is unique. It issues no stock, makes no profit and declares no dividends. It does not sell news to any one. It is a clearing house for the interchange of news among its members only. Its membership consists of 700 newspapers published in the United States, each of which contributes to the common budget all news of national interest originating in its vicinity, pays a weekly assessment representing its share of the general expense of conducting the business and has its vote in the election of the management.

The annual budget is divided thus: Salaries—executive, editors, correspondents, operators, messengers, etc., $1,-631,000; leased wires and telegraph tolls on outgoing matter, specials, etc., $152,000; foreign cables, $182,000; contracts with foreign agencies, $15,900; general expenses, including rents, telephones, typewriters, legal expenses, etc., $174,000; total, $2,258,000. To meet this, each member is assessed a sum which is paid weekly in advance.

The association is several times greater in magnitude and in the importance of the work than any other institution for distributing news. It serves, for instance, all but six of the morning daily newspapers of the country which take telegraph service. Its wide is the influence exerted by this service in a land where readers demand the facts only and form their own judgment, no one may estimate. The association certainly plays a most important part in our national life. Yet, if one may judge from inquiries that come to the general office, it is little understood either by editors or readers.

HOW OFFICERED.

Annually the members gather in convention in New York and elect a board of directors of fifteen members. By common consent the members of this board are chosen from different parts of the country so that each important division is represented. They are trained newspaper men who bring to the discharge of their duties an intimate knowledge of the business and a high sense of responsibility. The present roster of officers is as follows: Frank B. Noyes, Chicago Record-Herald, president; Charles H. Taylor, Boston Globe; first vice president, M. H. Cabanias, Augusta (Ga.) Chronicle, second vice president, Melville Stone, secretary and general manager; Valentine P. Snyder, treasurer. The directors are: Whitelaw Reid, New York Tribune; Clark Howell, Atlanta Constitution; W. L. McLean, Philadelphia Bulletin; Albert J. Barr, Pittsburg Post, George Thompson, St. Paul Dispatch; Victor F. Lawson, Chicago Daily News; Charles W. Knapp, St. Louis Republic; Harvey W. Scott, Portland Oregonian; Frank B. Noyes, Chicago Record-Herald; Thomas G. Rapier, New Orleans Picayune; Herman Ridder, New York Staats-Zeitung; M. H. de Young, San Francisco Chronicle; Charles H. Grasty, Baltimore Evening News; A. F. Lindsley, Springfield, Mass., Union; W. R. Nelson, Kansas City Star.

DIVISION OF FOREIGN FIELD.

The world at large is divided for the purpose of news gathering among four great agencies. The Reuter Telegram company Ltd., of London, gathers and distributes news in Great Britain and all her colonies, China, Japan and Egypt. The Continental Telegraphen company of Berlin, popularly known as the Wolff agency, perform a like office in the Teutonic, Slav and Scandinavian countries; and the Agence Havas of Paris operates in the Latin nations. The field of the Associated Press includes the United States, the Hawaiian islands, the Philippines and Central America as well as the islands of the Caribbean sea. Each of these agencies has a representative in the offices of the others. Thus the Associated Press bureau in London adjoins the Reuter office. The telegrams to the Reuter company are written on manifold sheets by the telegraph and cable companies and copies are served simultaneously to the Associated Press bureau, the Wolff representative, the Havas men and the Reuter people. A like arrangement obtains in Paris, Berlin and New York, so that in each of those cities the whole panorama of the day's happenings passes under the eyes of the representatives of each of the four agencies.

But the scheme is much more elaborate than even this arrangement would indicate. Operating as a tributary to the great agencies are a host of minor agencies—virtually one such smaller agency for each of the nations of importance. Thus in Italy the Stefani agency, with headquarters in Rome, gathers and distributes the news of Italy. It is the official agency, and to it the authorities give exclusively all governmental information. It is controlled by the Italians, but a large minority of its shares are owned by the Havas people of Paris, and it operates in close alliance with the latter organization.

But the Associated Press is not content to depend wholly upon these official agencies. It maintains its own bureaus in all the important capitals and reports the more important events by its own men who are Americans and familiar with American newspaper methods. These foreign representatives are drawn from the ablest men in the service and the offices they fill are obviously of great responsibility. They must be qualified by long training in the journalistic profession, by familiarity with a number of languages and by a presence and bearing which will enable them to mingle map of the highest station in the countries to which they are accredited.

EXCHANGE OF DOMESTIC NEWS.

Such are the means used for gathering foreign news. For the exchange of domestic news the methods are not very different. Each of the 700 newspapers whose proprietors are members of the association, is obliged to give the representative of the Associated Press free access to its news as soon as received. Many times a day the Associated Press man calls at every newspaper office in the large cities and is given the latest local news. If it is sufficiently important, he instantly puts it upon the leased wires, and in a few seconds it is in the hands of hundreds of telegraph editors throughout the country.

THE TELEGRAPHIC CODE.

Three of these leased wires are operated between New York and Chicago at night and two by day. The telegraph operators use men of exceptional skill and receive higher salaries than are paid by telegraph or railroad companies. To expedite their work, they use automatic sending machines, which greatly exceed hand transmission in speed and employ a system of abbreviations which can be sent with surprising rapidity. The receiving operators take the letters by sound and write them upon a typewriter, and since no one is able to manipulate a Morse key as swiftly as he can operate a typewriter, there is a constant effort to hasten the sending in order to keep pace with the ability of the receiver. The following example will illustrate the system of abbreviation. A message is sent thus:

t scotus tdy dcdd 5 pw f potus
ds n xtd to t pips, ogt all pst
cgst xgn q sj is uxl.

And it is rendered thus by the receiving operator:

"The supreme court of the United States today decided that the power of the president of the United States does not extend to the Philippines, on the ground that all past congressional legislation on the subject is unconstitutional."

A bulletin wire connects the Associated Press office with every evening newspaper in New York and the bulletins are flashed over it by operators of the highest skill in emergencies. When the result of a great race arrives the receiving operator shouts the news through a megaphone and every sending operator in the room flashes it over his circuit.

EMERGENCY EXPEDIENTS.

A storm is a serious thing, and there are often interesting. During the great blizzard of 1888, in which Senator Roscoe Conkling lost his life, all communication was cut off between New York and Boston, and messages were sent from New York by cable to London, thence back to Canso on the Nova Scotia coast, and from Canso to Boston. In 1902 every wire between Boston and Philadelphia went down and then special messengers were sent by train with the Associated Press telegrams. Last winter the wires between New York and Utica were swept away along the Hudson river. Then messages were transmitted by way of Baltimore to Chicago and back to Utica by way of Buffalo.

Thus, with its alliances with the great foreign agencies covering every point of the habitable globe, with its own American representatives in every important foreign city, with special commissioners to report events of great moment, with the correspondents and reporters of virtually all of the newspapers of the world laid under contribution, and with official recognition in a number of countries, the Associated Press is able to comb the earth for every happening of interest and to present it to the newspaper reader with almost incredible speed.

THE MARTINIQUE DISASTER.

An illustration of how the machinery of the Associated Press works may be gathered from what Manager Melville Stone says in his Century article concerning the Martinique disaster:

"On the night of May 3, 1902, a brief telegram from St. Thomas, Danish West Indies, reported that Mont Pelee, the volcano on the island of Martinique, was in eruption, and that the town of St. Pierre was enveloped in a fog and covered with ashes an inch deep. Cable communication was cut off. The following morning I set about securing the facts. We had two correspondents on the island, one at St. Pierre and the other at Fort de France, nine miles away, but clearly neither of these could be reached.

Fortunately, investigation disclosed that an old friend, a talented newspaper man, was the United States consul at Guadeloupe, an island only twelve hours distant. I instantly appealed to the state department at Washington to give him a leave of absence, and, when this was granted, I cabled him to charter a boat and go to St. Pierre at once, and secure and transmit an adequate report. The Associated Press men at St. Vincent, St. Thomas, Porto Rico, Barbados, Trinidad and St. Lucia were instructed to hurry forward any information that might reach them and to endeavor to get to Martinique by any available means. St. Thomas alone was able to respond with a short telegram, three days later, announcing the destruction of the Martinique sugar factories, which were only two miles distant from St. Pierre. The dispatch also reported the loss of one hundred and fifty lives and the existence of a panic at St. Pierre because of the condition of the volcano, which was now in full eruption and threatening everything on the island. Mr. Ayme, the consul at Guadeloupe, found difficulty in chartering a boat, but finally succeeded, and, after a thrilling and dangerous night run through a thick cloud of falling ashes and cinders, arrived before the illfated city. The appalling character of the catastrophe was then disclosed. Thirty thousand people, the population of the town, had been buried under a mass of hot ashes; one single human being had escaped. It was enough to make the stoutest heart grow faint.

But Ayme was a trained reporter, insured by long experience to trying scenes; and he set to work promptly to meet the responsibility which had been laid upon him. Our St. Pierre man had gone to his death on the common pyre, but Mr. Ivanes, the Associated Press correspondent at Fort de France, survived. With him Mr. Ayme joined effort and with great courage and at serious risk, they went over the blazing field and gathered the gruesome details of the disaster. Then Mr. Ayme wrote his story, returned to the cable station at Guadeloupe, and sent it. It was a splendid piece of work, worthy of the younger Pliny, whose story of the calamity at Pompeii has come down to us through two thousand years. It filled a page of the American newspapers on the morning of May 11, and was telegraphed to Europe. It was the first adequate account given to the world.

Mr. Ayme returned to Martinique and spent three weeks in further investigation, leaving his post of duty only when the last shred of information had been obtained and transmitted. As a result of his terrible experience, his health was impaired, and although he was given a prolonged leave of absence, he has never recovered. It cost the Associated Press over $30,000 to report this event.

THE POPE'S DEATH.

Again, when the eyes of the world were turned toward Rome watching with anxiety the last illness of the pope, it was the Associated Press that flashed around the earth the first news

To meet the emergency, we arranged a code message to be sent by all subscribers, which should be addressed, not to the Associated Press, but to the general manager in person, and should read: "Number of missing bond —, (signed) Montefiore." This bore on its face no reference to the death of the pontiff, and would be transmitted. The blank was to be filed with the hour and moment of the pope's death, reversed. That is, if he died at 2:58, the message would read: "Melstone, New York. Number of missing bond, 852, (signed) Montefiore." The object of reversing the figures was, of course, to prevent a guess that it was a description in order to convey the news. If the hour had been properly written, they might have suspected the purport of the message.

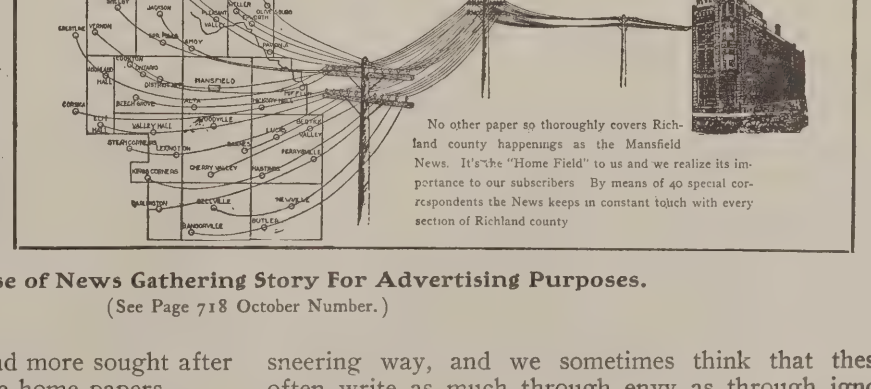
When, finally, the pope died, although his bed was completely surrounded by burning candles, an attendant hurried from the room into an anteroom and called for a candle to pass before the lips of the dying man, to determine whether he still breathed. This was a signal for another attache, who stepped to the telephone and announced to our correspondent, two miles away, that the pope was dead. Unfortunately, the hour of his death was four minutes past four, so that which ever way it was written, whether directly or reverse, it was 404.

Nevertheless, the figures were inserted in the blank in the bulletin which had been prepared, it was filed with the telegraph company, and it came through to New York in exactly nine minutes from the moment of death. It was relayed at Havre, and again at the terminal of the French Cable company in New York, whence it came to our office on a short wire. The receiving operator there abstracted the news to the entire operating room of the Associated Press, and every man on every key on every circuit out of New York flashed the announcement that the pope had died at four minutes past four; so that the fact was known in San Francisco within eleven minutes after its actual occurrence.

The Reuter, Havas and Wolff agents located in our office in New York transmitted the announcement to London, Paris and Berlin, giving those cities their first news of the event. A comparison of the report of the London Times with that of any morning paper in the United States on the day following the death of the pope would show that, both as to quantity and to quality, our report was vastly superior. The London Times had a column and a half, the New York Times had a page of the graphic story of the scenes in and about the vatican. The New York Times story was cure. This was so notable an event that it occasioned comment throughout the world."

The News makes a special feature of Ohio news. Besides covering larger state happenings, special correspondents in the important news centers furnish in brevity form the day's events by telegraph, making each day a department of news notes of Ohio towns.

In Mansfield the News controls the Associated Press franchise. The report is taken over a leased wire by its own operator direct to the News editorial rooms. Few papers in cities of Mansfield's size employ so expensive a service.



No other paper so thoroughly covers Richland county happenings as the Mansfield News. It's the "Home Field" to us and we realize its importance to our subscribers. By means of 40 special correspondents the News keeps in constant touch with every section of Richland county.

Ingenious Use of News Gathering Story For Advertising Purposes.

(See Page 718 October Number.)

editors have been more popular and more sought after than anything else published in the home papers.

The cry has never been "cut it short," but give us more. Only those who have not enjoyed these pleasing experiences with their readers and noted the profitable results have talked of editorial "junkets" in a sneering way, and we sometimes think that these often write as much through envy as through ignorance.

* * *

There has been no small gratification in the past eighteen years to witness the growth of good feeling

were proud, as well as pleased t[illegible] of the paper the Red Wing *Daily Republican,* which we established as President and Manager of the Red Wing Printing Co. in 1885—twenty years ago—the following kindly words with regard to a rival local paper that is suffering from financial embarrassment:

We regret to note that our contemporary, the *Daily News,* has financial troubles, something, however, which is not uncommon among newspapers. Notices of mortgage foreclosure were posted this forenoon. The paper and plant will be sold at public auction October 24, to satisfy a mortgage of $2,500, held by C. F. Hjermstad. The two men in charge of the *News,* Mr. Pardee as editor and Mr. Schmied as business manager, are splendid fellows and thoroughly competent and the fact that they have been unable to make better success is in no sense a reflection on their acknowledged ability, but chargeable to the lamentable fact that a city of this size cannot support one daily paper as it should and impossibly two. And when two men of the popularity of Schmied and Pardee cannot win out who can? We hope that the difficulties now encountered by them may be only temporary, however, and that we may be convinced that we are in error as to our opinion of two dailies in Red Wing, for there are surely no more cordial gentlemen to meet in a social or business way than the owners of the *News.*

Such words do honor to a newspaper and to its editor. How much better this than a sneer or an ill-natured fling at the assumed meanness, ignorance or folly of its editor or publisher, or the calling of bad names or the indulging in ill-mannered boasting with a humiliating "we told you so." Truly the entente cordiale has been established even between rival newspapers in the same city.

* * *

The growth and increase of libraries have called into existence, in this country, a new profession—that of the trained librarian—the members of which are highly and professionally educated and are of more than ordinary intelligence and literary taste and of broad information. The librarian must not only know much of books but in our smaller cities especially, must know much of the people, their needs and tastes and how to reach and influence them. In the close relations to the people, the successful librarian must be much like the editor of the home paper. We have been much pleased this month in reading the proceedings of the Minnesota State Library Association at Red Wing, as published in the *Daily Republican* of that city, to note the variety of subjects treated that affect the interests of the community, the preservation of local history, the social influence, etc.

One paper on the topic of "Popular Advertising," by Miss Lydia M. Porrior, librarian of the Winona public library, was especially able and practical and naturally holds especial interest to the members of the newspaper calling. She said among other things:

"Advertising is one of the recognized departments of business. It is not a business side issue or experiment; it is a business necessity to be studied and experimented upon as one studies and experiments upon the other departments of business economy. The importance of judicious advertising should suggest itself to every wideawake librarian in the endeavor to reach every man, woman and child in the city. Nine-tenths of the world would rather be interested than educated, and the other tenth likes to be interested, too. The librarian, then, must first interest the masses to bring them within her doors, and then attempt to educate them.

"The local newspaper is doubtless the best advertising medium. People will read the newspapers—that is what they buy them for.

"The larger the library the more necessary it is to cultivate the newspapers. As influential and wealthy a library as the Chicago Public informs me that they do everything in their power to keep in touch with the newspapers and in every scheme for advertising the newspaper comes first."

[illegible] by the ne[illegible]wspaper try for the edification of many business men these words not seem to take time to think intelligently of the one thing that lies at the basis of all business success. "People will read the newspapers—that is what they buy them for," puts the whole newspaper advertising question in a very terse and convincing form. It is axiomatic, an aphorism that states a self-evident truth and could well be run under the title or at the head of the first editorial column of a newspaper as a most important, convincing and powerfully influencing maxim.

* * *

We have often remarked the value, to a newspaper, of a reputation for entire reliability. The New York *Tribune,* the other day, remarked editorially on a case that shows how highly the London *Times* "The Thunderer" values the reputation of always being accurate in its statements:

Some months ago Colonel Morgan, director of supplies at Woolwich Arsenal, brought a libel suit against "The London Times" in consequence of charges made against him in the cable dispatches from Africa to that paper, to the effect that he had been guilty of gross inmocpetence and maladministration, resulting in the loss of millions of dollars. During the course of the trial it appeared that although Colonel Morgan had been cleared by a court of inquiry at Pretoria, yet "The Times" refused to make any correction, and Moberly Bell, the manager of "The Times," in the witness box, explained that during the hundred years or more of its existence "The Times" had steadfastly adhered to the policy of never, under any circumstances, making a correction or retraction, preferring to pay whatever damages might be awarded by the courts in proceedings for libel brought against it, rather than take back a single one of its utterances in print. This policy was condemned from the bench.

But yet "The Times" has now, as in many other instances of the same nature, been justified by the course of events. For Colonel Morgan, to whom it refused any reparation, except such as he might obtain through a court of law, has been suspended by the War Department in consequences of the extraordinary disclosures made concerning his administration, first of all by General Sir William Butler's committee, and now by the Justice Farwell commission, which has not yet completed its labors. Had "The Times" made the retraction demanded of it in the early part of the year, it would, in view of subsequent developments, have found that it had needlessly humiliated itself.

Of course, this policy on the part of "The London Times," unique among the newspapers of the world, has the inestimable advantage, that its writers, knowing that it can not and will not retract anything, are exceedingly cautious and conservative in all their statements, which endows the paper with a degree of reliability in the eyes of the public, not only at home, but also abroad, which probably no other journal, English or foreign, enjoys. For this reason French as well as German and Russian statesmen have on several notable occasions made "The Times" the means of the communication to the public of things which they wished to be known and of opinions which they desired to proclaim rather than through the channels of the newspapers of their own country, the most notable instances being those of the late Prince Bismarck, of the Duc Decasse, when French Minister of Foreign Affairs; of Thiers, when President of the French Republic, and of the late Prince Lobanoff, when Minister of Foreign Affairs of the Czar.

Although there is a manifest injustice on the part of a newspaper in declining to repair a wrong, the course adopted by "The Times" for more than a century past has contributed to its prestige and authority. It takes the ground that it is up to the injured party to secure redress in the courts of law by disproving in a libel suit the charges made against him. It has paid hundreds of thousands of dollars—possibly millions—in damages and legal costs, rather than retract statements made editorially or by correspondents in its columns. No one will ever exactly know how colossal was the sum of money which "The Times" spent in connection with the great libel suit known as the Parnell commission, where its principal witness, a man of the name of Pigott, was shown to have committed perjury and forged the evidence upon which the

paper, believing it to be authentic, had based its charges against Charles Stewart Parnell.

The fact is, that a newspaper is frequently certain as to facts which it would be difficult to establish by legal evidence in court, and where public interests are seriously involved, it is justified in taking some chances, both as a duty and as a vindication of its claims for enterprise, independence and public spirit. Juries are generally pretty lenient in their verdicts where newspapers are able to show that what they published was founded on what seemed to be entirely reliable information and was without any other object than the giving of legitimate news, free from prejudice or malice, for the public good. While a newspaper need not claim to be infallible and should be ready to right a wrong when convinced of error, it should never show the white feather, but ever boldly stand by its assertions, and by its reporters and correspondents until the fact of deception or mistake is clearly established.

There can be nothing more humiliating to a newspaper than that of being compelled to apologize for an apology—admitting an error that later evidence or revelations of fact prove to have been no error at all.

* * *

Faith in business can remove mountains of difficulty, but faith must be well founded. The master mind, the one who controls and directs, must be able to give the reasons, to himself at least, for the faith that is within him.

* * *

"Concentrate all your thoughts on the work in hand. Never try to show off in your newspaper. Simple, straightforward statements of facts and arguments, in all clearness and sincerity, with natural touches of sympathy and honest feeling, are wanted by the busy readers of newspapers.

* * *

To keep everlastingly assailing a man or cause, criticising and assigning bad motives or disastrous results, tends to advertise, to awaken interest and sympathy for the man or cause so constantly hounded or assailed. Candor, with praise or blame tempered alike by reason and justice and supported by facts and the public good, is the winning power in all newspaper discussion or criticism.

* * *

To gather the pure, wholesome honey of enlightening facts, inspiring aspirations and worthy efforts from the open chalices of useful human lives, is the wise and grateful work of true newspaper men.

* * *

No education is more essential to a newspaper man than that which develops system and the power instantly to direct all one's powers in any desired direction.

* * *

"Success requires individuality of thought, cool, conservative judgment, honesty and courage."—*Henry Clews.*

* * *

The Dakota Republican, that big Vermilion, S. D., weekly, gets an enormous advertising patronage, and her compositors know pretty well how to treat it. There is a tendency in some instances, however, to overdo the thing in superfluous panels, etc., but, on the whole, good results are obtained. The news service is excellent and the editorial work first-class.

POOR ADVERTISING.

By E. A. Davis, New York City.

Probably three-fourths of the advertising matter sent out is ineffective. Doubtless one-half the money paid out for advertising purposes is wasted. The writer is led to make these statements by a particularly atrocious lot of advertising recently received. It consisted of several circulars folded together and fastened with a wire staple in such a manner that they could only be opened by tearing the sheets. When opened, the first thing to greet the eye was a picture of a dejected-looking individual trying to saw wood with a hammer. The display line—the only one in sight—read "You can't saw wood with a hammer!" I was disgusted, and the waste-basket received the circulars without more ado. Probably this alleged advertising is the work of some graduate of an "advertising school;" at least it bears all the ear-marks.

Why *will* advertisers send out such rot? There is only one way to do good advertising. That way is to follow the lead of a successful salesman. Did you ever go into a stationery store and meet with the reception that met the writer when he opened the package of ad matter mentioned above? If you should be met by a salesman with the greeting, "You can't saw wood with a hammer," you'd think him crazy, wouldn't you?

To be sure, a salesman sometimes offers a customer a cigar; but that is not the thing that interests the prospective buyer in the goods. The salesman tells of his wares, and his "display line"—if I may use the expression—is a short, concise statement of what he has to sell. The argument comes later. I presume it came later in the circular that inspired this article, though I'm not at all sure. Even if the circular was meant to advertise saws, or wood, or hammers, or saw-bucks, it was mighty poor advertising.

When you have something to advertise, say it out loud in big type and in as few words as possible—that is, the display part. But, whatever you do, don't get the notion into your head that you must see how short you can make the descriptive matter. *Do not* spare a single word that will add to the force of your argument or make your meaning clearer. When a man tells you that you must trim your language until a mere skeleton is left, and not a healthy skeleton at that, tell him he don't know what he is talking about. My word for it, he don't. I've tried both ways, and experience beats theory all to Hoboken. As a case in point, I was up against a mighty hard machine proposition a few weeks ago, and won out because I used enough words to make my meaning clear. My handicap was that a rival company had sent a man to see the party, while I had only looked after him by letter. The salesman of the rival concern is rated pretty good—I think him so good that there's a place waiting for him if he ever needs it, even if I did beat him out. Naturally, he made a strong case for his machine, and didn't tell any of the good points about mine. Well, the customer wrote me that he had decided to buy the other machine unless I could explain away the objections the competitor raised against mine. I took a grip on myself and determined to get that order, for it was a $3,550 spot cash sale. I dictated a letter taking up the objections in detail, and when it was written out on the typewriter it made eight solid pages, letter size! No, the man didn't fall dead; *he sent his order by return mail.*

But in the display one *must* be brief—a single word, if possible. Have you noticed the way the type-founders are advertising these days? The big display line is the single word "type." They have the right idea, I believe, and I may be pardoned for thinking so because I was first to use that style of display in type advertising. If a man is interested in type he's quite likely to notice that word prominently displayed; but you could fill a yellow Sunday paper with type ads headed with the statement, "You can't saw wood with a hammer," and, no

matter how great the interest, no one would read them.

Make your display as brief as possible, and as big; in it tell what the ad is about; tell your story in small type—and tell it *all*, no matter if it does cover about four acres of costly space. If a man is interested in your wares he will read your argument, provided, of course, it is well written and sincere.

* * *

THE BROADENED FRATERNALISM.

The New York *Journalist* gives the following item and poem that will be read with pleasure by all newspaper men, especially by those accustomed to meet in annual national editorial conventions, from year to year, North and South:

It is a well-known and recognized fact that the two men who have done more to bring about a fraternal feeling between the Blue and the Gray than any other two living men are the new commander-in-chief, Corporal James A. Tanner, and Capt. Jack Crawford, "The Poet Scout."

Two years ago "Captain Jack" was the substitute for Gen. John B. Gordon, the great southern orator, in his home State at the Georgia Chautauqua, and captured the Governor and his staff and the 6,000 people assembled in his splendid audience.

Capt. Jack Crawford brought about the first real fraternal reunion of the Blue and the Gray twenty-seven years ago in San Francisco, when he organized a benefit for Gen. John B. Hood's eleven orphan children, when the General and his devoted wife died of yellow fever at New Orleans, and over $1,000 was the result.

Within an hour after Corporal Tanner was elected commander-in-chief, Captain Crawford had written the following letter, which went in the mail on the same train with the new commander with Mrs. Tanner and their daughters, Ada and Nettie, to San Francisco, where they are to meet the Corporal's youngest son, Lieut. Earl Tanner, on his way home from Manila.

This poetical letter is characteristic of both men and their big heartedness and fraternal devotion.

DENVER, COLO., September 8, 1 p. m., 1905.

Hon. James A. Tanner, Commander-in-Chief, G. A. R., San Francisco, Cal.

DEAR COMMANDER:

Let me be first to write and say
How gratified I am today
That you are Chief, and ain't it good
To know that love and gratitude
Are yours in overflowing measure.
No purer, grander, greater treasure
Than gratitude can man bestow.
Dear Jim, in one great overflow
I fling it out to you today,
A rustic, rugged, wild bouquet,
To you who well can understand,
As free as kiss from baby hand,
And thus I voice from rank and file
The love and gratitude, the while
Of every honest man and true,
Not only of the loyal Blue,
But let me emphasize and say,
Of every man who wore the Gray,
And stood before the cannon's mouth;
For I, while in the Sunny South,
Have felt the pulse of men who stood
Against us on those fields of blood,
And he who pulled the lanyard when
Your limbs were left in yonder glen,
If in the flesh could stand by you,
Would show a loyal spirit too;
Thank God for this. I prophesy
That loyal Blue and loyal Gray
In grand convention soon will stand,
And Grant and Lee in that Command
Beyond the stars, are standing now
With honest laurels on each brow,
And smiling as our loves increase
For Justice, Truth and lasting Peace.

Fraternally yours, CAPT. JACK CRAWFORD.

* * *

WHENCE THE POSTAL DEFICIT.

We hear a great deal about the annual postal deficit, because of the second-class mail matter and the rural free mail delivery. The fact is that express companies will carry newspapers at half a cent a pound and magazines at a cent a pound, pay the railroads out of this and make a profit for themselves. Yet postal officials declare that the government pays the railroads five cents a pound for carrying this second-class matter, and then resorts to all kinds of ridiculous devices to transform legitimate papers, carrying supplements, into merchandise so as to charge a higher rate. Why can there not be a move put on foot to make fair, reasonable contracts with railroads instead of constantly worrying legitimate publishers with hard and ridiculous rules to the injury of advertisers and the limiting of business?

The New York *Journal* in treating on this constant cry about a postal deficit tells some useful and wholesome truths in the following paragraphs:

The managers of the postoffice announce tearfully that the rural free delivery system will cause a deficit.

Rural free delivery enables farmers to get mail regularly. It enables a good many people to make a respectable living—and, above all, it keeps the inhabitants of the nation in touch with each other and with civilization.

Where the rural free delivery goes there is no more of the hideous country isolation, no more of that dreadful, unbroken monotony which fills Western insane asylums with farmers' wives.

Postoffice officials and others more or less interested attribute to the rural free delivery system the national postoffice deficit, and attack rural free delivery by implication. They are wrong.

In the first place the rural free delivery system should be constantly extended—even if it does cause a deficit.

In the second place it is not rural free delivery which is at fault, but the national system of allowing the railroads to swindle the Government through the postoffice.

The fifteen millions deficit is a very small fleabite compared to the enormous sum that the railroads steal every year from the Government by connivance with public officials and with dishonest men in Congress.

The Government hires its mail cars from the railroads and pays for a year's rent as much as the car costs to build.

And those cars, outrageously overpaid for by the Government, are such flimsy death traps that no company will insure the lives of the postal clerks that work in them.

For hauling those mail cars on the same train that hauls private express cars the railroads charge the Government anywhere from 1,000 per cent up in excess of the rate that they charge the express companies.

The trouble with the postoffice department is this:

Those who represent the people are in league with the railroads to rob the people.

And, in spite of that, the national postoffice gives an infinitely better and infinitely cheaper service than is given by any private corporation of any kind whatever.—*New York Journal.*

The "Ink Beasts" parade of the Queen City Printing Ink Company—which has commanded an increasing interest because of its novelty and educational value with regard to colored inks—as is usual with parades in this crowding, busy world, has been temporarily interrupted, but will begin again this month and will command still greater attention by reason of the interruption and added new features.

NEWSPAPER CRITICISMS

BY O. BYRON COPPER, DE SOTO, WIS.

Address all Communications for this Department to De Soto, Wis.

IN our first reproduction this month we aim to illustrate that which we have long contended, namely, the possibilities of the panel-scheme in connection with newspaper advertisement composition and by the exclusive use of labor-saving material.

As proprietor of a print shop during the past few years, in which capacity we were compelled to "foot all bills," we have learned to look upon the wholesale slashing of leads and brass rules with more or less dread and disfavor; hence, history has repeated itself and necessity again given birth to inventions which in many instances obviate the mutilation of material.

By studying specimen No. 1 any bright compositor can easily figure out how its composition were possible with labor-saving material exclusively. All that is required for the perfection of such designs is a little forethought—a little preliminary thinking.

However, we do not wish to be interpreted as wholly condemning the cutting of material, nor as advocating the abolition of the lead and rule cutter entirely from the appurtenances of well regulated printing offices, for the fact of the matter is the equipment of no composing room is complete without a reasonable supply of strip material and a machine for cutting it; because there is many a typographical idea whose exploitation is otherwise quite impossible, and which in the perfected state is, after all, worth more than the loss accruing from the mutilation of the material required for its perfection.

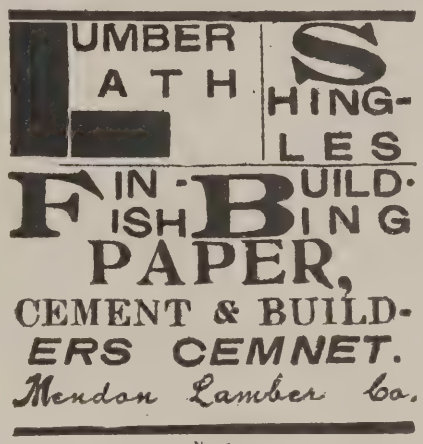
INTER-STATE FAIR
FEATURES OF THE FAIR
THE officers of the society have taken pains to arrange the grounds as conveniently as possible for the public. The largest and best arranged Art Hall in West Wisconsin is on the grounds; the best barns for horses, and the very best cattle sheds and sheep barns are ready for use. The grounds are supplied with water from the city water works, affording a bountiful supply of the purest water for all purposes. The premiums have been increased; and horsemen will find good box stalls for their use. Entries can be made at any time from now on.
FEATURES OF THE FAIR
THE display this year will surpass all former years. We expect the largest crowd ever seen on the grounds, and will leave nothing undone to please and entertain our patrons. Many special attractions will be provided for the pleasure and amusement of visitors. This is a Farmer's Fair and we are very anxious that any one who has anything desirable in any department shall enter them at the fair. Remember we charge nothing for making the entries, and hereby assure you that exhibits, large or small get the same careful consideration.
La Crosse, Wisconsin, September 25-30, 1905

No. 1.

We have found by experience that the cutting of leads and rules can be judiciously and economically executed, as well as anything else in the composing room, and where such careful attention is given the matter, the loss through waste is comparatively small. We show exhibit No. 1, therefore, simply as a lesson in economical composition.

—o—

The next reproduction (No. 2) is of a rather different order, and looks as if it had been constructed from the lumber, lath, shingles and building paper which it was meant to advertise, and stuck together with builders' cement. Editor George R. Kinder, of the Rockford (Ohio) *Press*, is responsible for the appearance of this specimen with this installment of Newspaper Criticisms, and says that this ad beats anything ever showed up in THE NATIONAL PRINTER-JOURNALIST. Guess he's about right.



No. 2.

—o—

It has been the policy of this department ever since we assumed control of it to offer praise only where we felt praise was due; therefore, when we receive communications such as that which follows, we feel that the efforts which it costs us to make this department a success have been amply paid. This clipping is from the Anna (Ill.) *Democrat*, and the following explanatory letter is from our familiar friend, Leon E. Derr:

Mr. Leon E. Derr, who has been employed as foreman of *The Democrat* for the past eighteen months, will leave in two weeks for Paducah, Ky., where he is offered a more advantageous position as head job compositor in B. J. Billings' job shop, one of the best in the central states. Samples of his work done in this office, reproduced and praised by the best printing trade journals, led to his advancement. Mrs. Derr, who is also employed in *The Democrat* office, will remain here a few weeks before going to Paducah."

No. 3

Dear Friend Copper—Enclosed clipping refers to your kind words mostly—Billings told me so. I'll be in a job office now, so you will not get ad samples from me often. Enclosed ad was set in three hours. Pretty fair speed for an amateur? In the next ad contest would suggest that you print an ad in good modern style, and have contestants reset it. That is a phase of work we have to do a great deal of, especially like the enclosed bank ad. And it makes a great deal of difference what ad it is reset from, too. Thank you for your generosity to my specimens in contest. Yours,

LEON E. DERR.

We most assuredly congratulate Mr. Derr upon his good fortune in securing a new and, we take it, a better position. We are confident he will be successful, because he is an earnest worker, and hard work is, after all, that which makes success. The ad for the Sanford Company, as shown in specimen No. 3, is, we believe, the best sample with which Mr. Derr ever favored this department, and, considering the fact that it is wholly hand-set, three hours for its construction is good

time. It is nicely balanced, well whited out and properly displayed. The innovation calls forth but one regret from us, and that is that we are consequently to be deprived of one of our most worthy students and of his monthly contributions, which have contributed so greatly to the interest of this department of the NATIONAL PRINTER-JOURNALIST; but we know that our loss in this instance will prove Mr. Woodworth's and Mr. Hanson's gain, so there is nothing lost, after all. Our best wishes attend you, Brother Derr. "Make good"—that's what made Governor Johnson, of Minnesota, famous.

———o———

The Meriden Britannia Company, of Meriden, Conn., manufacturers of the famous "1847 Rogers Bros. Silver Plate that Wears," have inaugurated a very neat contrivance for the advertising of their wares, in the shape of a miniature newspaper published in fac simile of the newspapers of 1847, and entitled "The Silver Standard," a copy of which they have kindly mailed this department. The pages measure 6¾x10 inches, each containing seven columns of approximately five picas in width. This edition, which is a double one, consists of a quarto and folio, the one dated August, 1847, and the other September, 1847. The inside pages are given over to circular advertising of the aforesaid wares, handsomely illustrated with the finest of half-tone engravings. The outer pages, too, are profusely dotted with illustrations reproduced from such sources as *Gleason's Pictorial*, New York *Herald*, *Sun*, etc. The reading matter on these outside pages is evidently also taken from newspapers issued during the period of August and September, 1847, and make a very interesting study. It ought to make an effective ad.

———o———

Here is a letter, which, together with the accompanying magazines, we esteem highly. It comes from an old-time contributor to this department, M. E. Ellis, manager of the Union College Press, College View, Nebraska:

Dear Sir—I am sending you under separate cover three numbers of our little college paper, and will be glad to have you say anything about them that you have a mind to, only so it is true; and, by the way, I've never seen any comments

in your department of the N. P. J. but what I heartily agree with.

Perhaps you may think from the specimens sent that I have not profited much by the reading of your department, but I do feel that if I could squeeze out a little more time on my ad-setting, I could make a presentable ad. But the copy, the setting, the printing, usually arrive to be done the same day, and the care for details, which is absolutely essential for finely finished work, thus becomes missing.

I believe your department is doing much in the line of stimulating honest endeavor to do good work, and artistic work, in the making of newspapers, and, as "one of the craft," I appreciate your endeavors to raise up a higher standard of ad composition and general makeup of small newspapers. Sincerely yours,

M. E. ELLIS.

The half-apologetic tone of the above epistle is entirely uncalled for, since, if our memory does not fail us, the *Educational Messenger* has improved since we last saw it, and the typographical styles therein are now all quite commenda-

Especially is the cover page neatly arranged, each issue enjoying a change. Some of Mr. Ellis' ads do show the mentioned lack of time, however, while others are good in spite of that. For instance, specimen No. 4. We like the face employed in the *Messenger's* dress, and the omission of punctuation in the heads shows good taste. The plain rule dashes between articles beats any ornament, to our eye, and the general makeup is neat and all right. Just one more word about the advertisement shown herewith: Those two ornaments at both sides of the illustration are superfluous and add nothing to the beauty of the design.

———o———

Our new friend, David C. Silve, of New Orleans, writes us an appreciable letter, which we reproduce below, penned upon one of the most radically original, yet somewhat inappropriate, letterheads we ever beheld. Just beneath the cut of ancient harp (which looks as if it might have been the property of the sainted Timotheus, or even Apollo himself) appears the statement, "At the sign of the Stick and Rule."

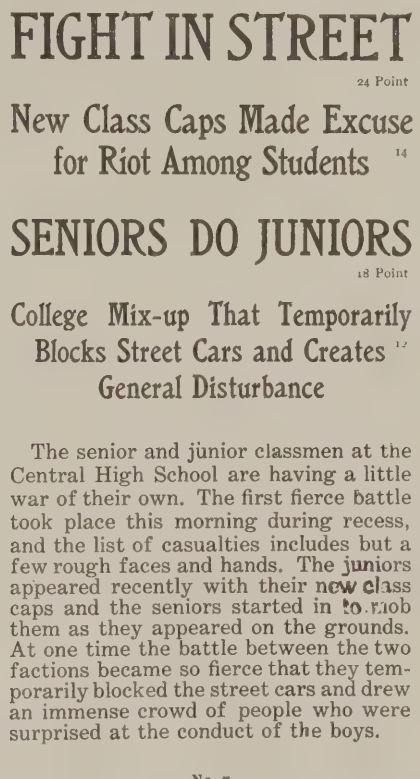
No. 6.

Some of Mr. Silve's correspondents, uninitiated in the secrets of the art, might easily mistake this pictorial ornament for the representation of a "stick and rule." But here is the letter's contents:

Dear Sir—The N. P.-J. is at hand and wish to thank you personally for giving such prominence to my specimens. Enclosed herewith you will find a three-column magazine ad, which was required to be presented each issue in an individual style of its own. Your opinion on same would be appreciated, especially on the three proofs submitted. Wishing you everlasting success and prosperity (well deserved), I am, sincerely yours, D. C. SILVE.

Our readers will be able to judge for themselves as to the merits of these three ads from Mr. Silve, as we are reproducing the trio (Nos. 4, 5 and 6). Whatever may be said of them, no one can help agreeing that each one of these specimens is highly marked with originality, just a little rough yet, but smoothness will come in time. Exhibit No. 4, as an antique model, is quite creditable; but just imagine what an improvement it would have been to have allowed about two more picas of white space between the matter and the border. We could never approve of the sort of typography represented in specimen No. 5, for we're just old-fashioned enough to still keep right on insisting upon good balance. This design is one of those extremely original ones in which, however, less originality would give better results. We understand thoroughly that the compositor was making special efforts to produce "individuality," but let us state that good individuality is best achieved by adhering to sane methods of composition. We make no complaint against the upper portion of this specimen. That is all right. Suppose, however, that immediately following the ornament the street address had been inserted in two lines, both centered; then the announcement could have occupied a central position in the space below. Or a better plan still, perhaps, would have been to set the body to the center of this space and then have stretched the address line across the bottom. All too ordinary, do you think? Well, perhaps so; but it is ordinary only because the world is full of good ad compositors and their taste



FIGHT IN STREET
24 Point
New Class Caps Made Excuse for Riot Among Students
14
SENIORS DO JUNIORS
18 Point
College Mix-up That Temporarily Blocks Street Cars and Creates General Disturbance
12
The senior and junior classmen at the Central High School are having a little war of their own. The first fierce battle took place this morning during recess, and the list of casualties includes but a few rough faces and hands. The juniors appeared recently with their new class caps and the seniors started in to mob them as they appeared on the grounds. At one time the battle between the two factions became so fierce that they temporarily blocked the street cars and drew an immense crowd of people who were surprised at the conduct of the boys.

No. 7.

and ideas naturally run (for some distance, at least) on a parallel. The arrangements we have briefly suggested, too, would obviate the necessity of the use of that original, yet unsightly, home-made paragraph mark, which is too "chapbooky" to suit us. No. 6 is much better, and we can see that Brother Silve is one of the coming printers, all right. Come again to this department, anyway.

———o———

We are quite well aware that it is not the object of this department to advertise anything other than the merits of the men and papers which may be submitted for review, but in this instance we feel moved to diverge from our customary course, inasmuch as that the information which we wish to convey will be received with pleasure and profit by all those progressive members of the craft who make it a practice to keep in touch with the best there is in the land in way of literature pertaining to matters of their calling. *The Printing Art,* issued by the University Press, Cambridge, Mass., which has been termed "the fashion-plate of printerdom," by virtue of its having secured second-class postal privileges,

will herafter be sold at $3.00 per domestic subscription, or thirty cents apiece. The pages of *The Printing Art*, with their colored reproductions, together with reproductions of composition and instructive technical articles, form one of the most valuable courses in the art of printing, and the change in its price will doubtless cause a big increase in its circulation.

a large pamphlet illustrating the "Type Faces for Newspaper Headings" made and sold by them, which is more than interesting to a newspaper man. The faces shown are: Globe Gothic Condensed, Pontiac Series, Lining Quentell No. 2, Lining Schoeffer Oldstyle No. 2, Adver Condensed, Post Condensed, Adtype, Jenson Condensed, Lining Cushing Oldstyle No. 2, Herald Extra Condensed, Cheltenham Bold, American Extra Condensed, Compact Series, ... No. 2, Florentine Bold Condensed and Extra Conden... out of all of these faces Jenson Condensed stands head and shoulders above the rest for the purpose intended. Adver Condensed is not a bad face for newspaper headings, but lacks "the pleasing effect which is Jenson," simply because the black in it is "too extremely black," and the same might be truthfully said of the Schoeffer series. A paper adopting Herald or American Extra Condensed for its headings would never be able to put up a pleasing aspect, because it isn't in those faces. What is required for neswpaper headings is a plain, legible, serviceable, yet not too bold a face, and, of course, one with more or less beauty, or as much beauty as it is possible to combine with these other requirements, and the Condensed Jenson comes the nearest to filling these requirements of any other letter in the catalogue (No. 7).

I am sending under separate cover a copy of the "*Industrial School Courier*," of which I am editor and instructor. We have here only apprentices—a good boy leaves us in less than two years after his arrival, so you can readily see the disadvantages to which an instructor is subjected. Nevertheless, I desire an unbiased opinion in your columns of what we are doing, judging from the results obtained.

Hoping the N. P.-J. continued success, and I might also inform you that the N. P.-J. is one of the most welcome journals we receive—the boys and the instructor being equally anxious to review its contents. Most sincerely,

D. A. PORTER.

Under the circumstances it is quite difficult to pass an accurate opinion on *The Industrial School Courier*. We find many things about the publication which we are unable to

commend, but without a full knowledge of the conditions under which the magazine is created it is impossible to say whether condemnation, either, would be entirely just. Typographically the *Courier* cannot be spoken of too adversely, for in the main the styles and arrangements are neat and correct. The *Courier* consists of a thirty-two page magazine, with pages 8½x12, all bound in a heavy purple cover with title page in bronze. The stock used for the inner pages is of a good weight enameled white paper, and each page is enclosed within a double rule of a one-point face. The styles, we have said, are all quite neat, but we do not approve of the original (but undesirable) method of running the headings to one side of the page. Try as they may, no one will ever be able to improve the old way of in the center. It looks odd at the side, but that is about all a true artist would say for it. If the boys do the press-

No. 12

work, then it is quite commendable; otherwise it is not, as the print and register of several of the pages are very bad. The same remark applies to the proofreading and the editorial work—interpreting that word, "editor," in its true sense of meaning a person who revises, corrects and prepares manuscript for publication. Of course, it is clear that "D House Notes" is originally written by Horace Heinzman, one of "the boys," we take it; but then it would seem that the editor-in-chief, and, if not he, then the proofreader, should have prevented such blunders as appear in these items:

"We have had three sewing machines in the last two weeks but the last machine is the one I think we will keep for this detail it is a tailor machine and a singer it sings a new song every time Jones goes to run it.

"The D house boys has the honor to say that they have the best looking dormitory on the hill.

"The playroom was scrubed and paraffined last week.

"Mrs. Fairchild had D house job a week and Miss Whitlock had us a week during Mrs. Saunders' vacation."

It would also seem almost necessary in a school of this kind, where it is proposed to fit boys for printing and editorial work, to correct all such mistakes as appear in the foregoing clipping, and point them out to the perpetrator, that he might not so err a second time. We have deemed it unnecessary to name the mistakes to which we refer, for they include errors in language, punctuation and spelling, and are too conspicuous to escape notice. Another suggestion which we would offer in view of improving this publication, would be to have all of these items written by the various members, graduated, with the shorter items at the top and the longer ones at the end. It would be found worth the trouble, all right. To be sure, we can easily imagine that the job of issuing the *Courier* is *"a job,"* indeed, with a lot of inexperienced boys

to watch and keep a-going, and this alone is an ample excuse for all the errors cited.

———o———

The *Enterprise*, published at Estherville, Iowa, with D. R. Carlson as editor, strikes us as a very creditable sheet, with a front page almost free of displayed ads and all of its eight pages printed at home. The contents are certainly fine, consisting of an abundance of local news put up in attractive headed articles and a pageful, or such a matter, of brevities; several columns of local correspondence, approximately a pageful of brief personals and much miscellaneous matter, besides carrying a liberal amount of advertising. This latter is set in the most pleasing fashion imaginable, the compositor thereof appreciating the advantages of simplicity and lots of white space. Few compositors could do it better than he has done, as we are proving by making a few selections for reproduction (Nos. 8, 9, 10, 11 and 12). Nos. 8 and 9 make an admirable example of how uniformity may be maintained in the ads of a newspaper, and yet each separate specimen re-

ceiving an individuality of its own. Nos. 10 and 11 demonstrate the efficacy of economy in newspaper advertisement composition, and likewise No. 12 illustrates the unsurpassable elegance and dignity of simplicity. But the *Enterprise* is not praiseworthy alone in point of its advertisement composition, for the makeup is strictly right all the way through, and the presswork is highly commendable. The editorial work, too, is of an exceptionally high order, the territory being thoroughly covered and the happenings all presented in readable shape and in language that is even edifying. The editorial department proper is clean, up-to-date and full of high-class wit, and, withal, we pronounce this an exceptionally fortunate, because an exceptionally good, country weekly.

———o———

The Beresford, S. D., *Republic* is another publication which we have had the pleasure of examining before, but for the life of us we cannot remember just what conditions were at that time. Howbeit, the paper now deserves commendation for its excellent contents, good editorial work, clean, legible print and well-set advertisements. The *Republic* is made up of three folio sections, of six columns each, the two inner sections being home printed, while the outer one is evidently ready printed. The great amount of ads renders the making up of this sheet rather problematical; nevertheless, the contents are very well arranged and classified. Half-tone cuts of prominent business places of Beresford seem to be a regular feature with this publication, and it has the appearance of being a first-class advertisement for the town.

———o———

The *Jacksonian,* from Heber, Ark., is doubtless the product of a hand press, and not a bad product as regards impression, either. It is a seven-column folio with patent inside, and there's various little things about it to caution a critic to be "easy," for they suggest that it is gotten out under difficulties, such as help to put "silver threads among the gold" in the heads of country printers. Typographically we cannot brag much on the *Jacksonian,* for the styles of composition and makeup are extremely ordinary, and the best we can do for the present is to recommend that the mechanical man on this publication study this department for a few months and carefully adopt such suggestions as suit his requirements.

———o———

A copy of the Hall County *Herald,* printed at Memphis, Tex., from which we made a few ad selections for review in last month's installment, is before us, and we must introduce our remarks with the statement that, considering all points, it is quite a creditable country weekly. It consists of a seven-column folio, all printed at home, with an abundance of news within its four pages. Of course, we do not approve of those two displayed ads on the first page, nor can we discover any excuse for them. The makeup is usually pretty fair, although there seems to be but very little attention paid as to where the articles are placed, and more or less negligence is in evidence with reference to justification, a number of the column rules hanging as much as a pica below the type. The editorial work is pleasing, Editor W. A. Johnson's individual department being especially well attended to. We are pleased to note in passing that the *Herald* enjoys a liberal advertising support, too.

———o———

The *Sun,* Waukegan, Ill., is a creditable little daily—that is, it is creditable in point of news service and contents in general, editorial work, etc., besides having an excellent adman at work upon its force, but there is a defect in some of its pages that seems to have been due to defective stereotyping, rendering the matter, or some of it at least, partially illegible. So much of the straight matter is out of alignment, too, which must be the fault of the linotype, but as we never learned to operate one of those machines, we cannot very well recommend a cure. In exhibit No. 13 we are showing a typographical selection from this publication worthy of admiration.

———o———

The Rice Lake (Wis.) *Chronotype* is a newcomer to this department and a valuable addition to our "school." It is a seven-column quarto weekly, with a whole lot of wholesome reading matter crowded into its massive pages. It seems a shame, though, that that otherwise elegant initial page could not be kept uncluttered by displayed advertising matter. Aside from the defect cited, the makeup on this sheet is fairly good, and the editorial work ranks up with high standards. Much of the advertisement composition shows genius, some of it is good, especially in single-column instances (Nos. 14 and 15), and all of it denotes study and interest, which in time will lead to perfection. Where paneling is attempted, however, there is a tendency to overdo it. The presswork is excellent.

———o———

The Thief River Press, of Thief River Falls, Minn., is not a stranger to this department, nor to our regular readers, but we note from the copy of the *Press* of the issue of September 1 that the paper, plant, good will, etc., has passed into the hands of new proprietors, namely, Messrs. Carr & Clark. We make the following interesting extract from the "farewell address" of past publishers, Messrs. D. A. and J. A. McDonald, in this same edition of the *Press:*

FOR FINE

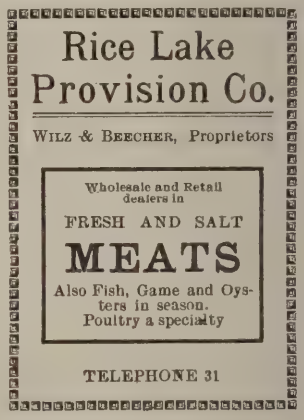
Call and see my new fall and winter goods. Order a new Suit or Overcoat and be happy. Prompt service. Cleaning and Repairing at reasonable prices. ¶ Burby building
A. O. ERSTAD

No. 14



No. 15

"The purchasers, Greely E. Carr and Sam H. Clark, are known to many of our readers. Mr. Carr is a bright young attorney, and Mr. Clark, who will have active management of the paper, is a newspaper man by birth and he will be able to hold his own with any paper in the northwest. They have our best wishes for success.

"As to our future, J. A. McDonald will remain with the *Press* as foreman for a short time. D. A. McDonald will remain until all accounts are collected, after which he will return with his family to southern Iowa."

We have no doubt but that the *Press* will continue to succeed under the new management, and we hope to be favored with information regarding its achievements from time to time in the future, as well as regarding that of the McDonalds.

———o———

We are willing to thank "someone" for a big bundle of copies of the Hopkinton (Iowa) *Leader,* upon which is written, "Not intended for criticism; just a paper with clean contents and no foreign advertising." That doesn't nearly tell it all—but we dare not go further, lest our remarks verge upon criticism, and we have plenty of papers on hand whose publishers desire criticism, without forcing our strictures upon anyone who does not desire it, so we pass abruptly on to the next.

The Pueblo (Col.) *Sunday Opinion* is a queer publication. A seven-column folio with a front page of five wide columns, all cram-jam full of matter of more or less interest. The title is in a ten or twelve line shaded text. The greatest objection we can find about this sheet is anent the makeup. There is considerable displayed matter on the introductory page, and the inner pages are made up with the ads to the right on the left-hand page and on both sides of the right-hand page. That looks "bad." The back page seems to contain the only local matter in the paper. The advertisement composition is of a lower order, lacking originality of design and skillful treatment.

———o———

The *Inland Empire* is a bright little six-column folio, hailing from Moore, Mont., and, by the way, we have No. 1, Vol. 1, before us. The pressman gets a very clear print on this little sheet, which enjoys a very liberal support from local advertisers. The ads, however, are made up principally to the top of the pages, which renders the attainment of good artistic effects in the makeup very difficult, if not impossible. The ad man is doing pretty well with the material at his disposal, but

No. 16

we dare say he will improve with study and practice. His work looks somewhat amateurish. Geo. H. Beasley is business manager of this new publication, and Butte H. Tipton editor, and he is a bright editor, too, as we propose to prove by quoting a portion of his editorial introduction *verbatim*, as follows:

"We whose names appear at the head of this department are sole owners and proprietors and are, therefore, unhampered by directors or stockholders. We are engaged in no other business, being dependent solely upon advertising and subscription patronage for support. The fine display of advertising and the large list of substantial subscribers upon our books is evidence of the encouragement thus far received.

"In politics this newspaper is republican, but we are subject to no embarrassing obligations because of that affiliation. We are not straining for elusive plums that hang high up on the tree of politics. This is a newspaper 'with a mission and without a muzzle.' All we ask is a 'clear field and no favors.'

"In our news department we will endeavor to give all the news that is true and fair and kind, pursuing to the best of our ability the motto of doing by others as we would be done by, believing that a newspaper should stand in the light of a peacemaker rather than as an agency for turmoil and strife, unjust and bitter criticism, personal enmity and spite."

These are good principles expressed and the ideal policy for a newspaper, and we have no doubt that Brothers Beasley & Tipton will meet with the success which this department wishes them. The *Empire*, let us add, looks like a paper that will succeed, too.

———o———

The Brighton (Col.) *Blade* comes about as near to meriting our praise in "big packages" as anything we have run across in this month's batch. Its front page is entirely free of displayed faces and the makeup thereof is strictly neat and all right, although don't you think, brother, that a trifle lighter face for the correspondence headings would be more in tune with the rest of the page? The editorial work and the general character of the contents of this five-column quarto strike us most favorably, and, while the displayed faces which enter into the composition of the ads are all of a bolder design and series than we particularly admire, yet they have all been used appropriately and with more or less skill. No. 16 is selected as our favorite among the ads in this publication, but it might have been materially improved had the main central portion been relieved of its haphazard aspect by setting it in a neat mass with every line thereof centered, else squared with an abundant white margin about it. The presswork on this little paper (we call it "little" because it is a five-column sheet, but in reality it is spacious enough) is the veritable "pink of perfection," and the only real fault that we have to complain about with reference to this paper is the same as that mentioned in our review of the preceding contribution: The ads, or too many of the larger ones, are shoved topward in the page, which lends a top-heavy appearance—we believe in *balance* in the pages of a newspaper, you see, as well as in the pages of a circular, or even in an ad itself; and we believe further that good balance in typography of any kind is just as desirable and every bit as admirable in this day and age of the world as it ever was, numerous fearless violations notwithstanding.

———o———

And here is a representative of the east, the Providence *Register*, and what a distinctive eastern aspect it bears, too. Didn't you ever notice the difference between the papers of the east and those of the west? Well, it's even amusing; but we don't know whether we can verbally express it or not. The typical eastern paper is usually on a better, finer grade, sized stock, and the typography is almost invariably of a lighter, more dignified type (more "old fashioned" we western printers would be most prone to dub it). The presswork, we believe, is always a little better, if anything, than that typical of the west, but in the main, while the eastern product is "staid and steady" and built more according to long-established rules, it seems to lack the spicy life, the variety, the push and fearless originality seen so strongly exploited in the typography and makeup of the western publications. We came near forgetting, however, to remark that the *Register* emanates from that well-known Pennsylvania city of Scranton and possesses all of the earmarks of the eastern newspaper. It is a seven-column folio, all home-print, neat and clean and dignified beyond description. The editorial work is refined and elegant, right in keeping with the rest of the paper, while the impression is even better than that seen upon much of the Wisconsin commercial work. The advertisement composition, though, is away behind the times. J. U. Hopewell is editor and proprietor.

———o———

The Macoupin County *Enquirer*, of Carlinville, Ill., has

something almost as dignified and almost as excellent in point of presswork as that of the publication whose review occupies the preceding paragraph, in the shape of "An Old Settlers' Edition," which was issued away last August. It consists of two quarto sections, six-columned pages, and is about one of the finest things in way of special editions to which we have ever had our attention called. It is profusely illustrated, exceptionally well edited, printed beautifully, made up artistically, and withal a very pretty and, we venture, a very profitable (although expensive) thing. The special edition was well patronized by the local dealers, and the whole shows a high degree of energy and earnestness of purpose on the part of Editor C. J. Lumpkin, the *Enquirer's* proprietor. All mechanical ends of the edition have been held well up to the level of eminent standards, and we trust that the undertaking was fully appreciated by the *Enquirer's* readers.

———o———

If there is any one thing in this life that the conductor of this department of the NATIONAL PRINTER-JOURNALIST abhors, it is the making of apologies, and if he were a great man and were to leave a quotation for those who were to follow him on down the sandy trail of Time, it would be this: Never do anything that may necessitate an apology. Albeit, we must state by way of closing that this installment of Newspaper Criticisms has been written under rather more trying circumstances than ordinary and necessarily in great haste just prior to our departure westward, and we dare say the work shows it, hence these apologetic remarks—and that reminds us: Readers will please note the change in our address as it appears at the head of this department, and see to it that we are supplied with ample material for next month's department, which we feel safe in promising will at least surpass this. Don't forget our new address. O. BYRON COPPER.

———o———

A QUICK NEWSPAPER SUCCESS.

MONTREAL, Sept. 28, 1905.

NATIONAL PRINTER-JOURNALIST, Chicago, Ill.

Dear Sir: It might appear boastful to say that the *Standard,* of Montreal, the new weekly paper, is the greatest of all the successes on the American continent for a newspaper. The demand is simply bewildering. We enclose copies of notices of the new paper that appear in the *Star, Gazette* and *Herald,* of this city, papers whose interests are not promoted by the success of the *Standard.* Yours truly,

GEORGE MURRAY PUBLISHING CO., LIMITED.

THE STANDARD.

The first number of the *Standard* was issued early this morning. The paper is not only fully up to expectations, but it is a pleasant surprise to the public in being better than the expectations which had admittedly run pretty high.

The prospectus of the *Standard* as published in its columns is particularly robust and foreshadows the working out of a great paper. The illustrations are most attractive and easily suggest the idea that the *Standard* will be known as the *Graphic* of Canada. The features of the *Standard* are varied and popular. The paper will bear inspection, and inspection is almost certain to result in universal approval. The colored plates of Old Canada scenes and incidents, particularly of old Montreal and Quebec, to be presented to *Standard* readers will form a most valuable collection, and it can readily be imagined that there will be very few citizens indeed who will not prize these extraordinary premium plates. The George Murray Publishing Company is to be congratulated.—*The Herald, Montreal, September* 23, 1905.

THE COOPER LIBEL SUITS.

BY D. M. BUTLER, LINCOLN, NEB.

No volume of newspaper history or law reports would be complete without a review of the various controversies which J. Fenimore Cooper had with Horace Greeley, Thurlow Weed and other publishers of his day.

In 1839 when Cooper published his Naval History of the United States, the New York *Advertiser,* of which Colonel Stone was editor, published a review of this history in which appeared statements which imputed to the author a disregard of justice and propriety as a man, representing him as infatuated with vanity and with passion, and charging him with publishing as true statements and evidence falsified and encomiums retracted. The case was decided on demurrer to the petition to be libelous. Subsequently on this point the Supreme Court sustained the decision of the trial court. The case does not seem to have been retried in the lower court, but Mr. Stone was subsequently required to pay an arbitrators' reward of $300.

When this case was finally disposed of, Colonel Stone was the editor of the New York *Spectator,* and on July 6, 1842, the *Spectator* said regarding this award:

"Mr. J. Fenimore Cooper need not be so fidgety in his anxiety to finger the cash to be paid by us toward his support. It will be forthcoming on the last day allowed by the award, but we are not disposed to allow him to put it into Wall Street for shaving purposes before that period; be patient, there will be no blacksmith necessary to get at the ready."

For this publication the novelist began a new action and in the lower court recovered a verdist of $250. The higher court, however, reversed this finding, holding that this statement about putting money into Wall Street for shaving purposes could not be libelous per se, 1 Denio 293.

In the year 1845 there was a case threatened by Mr. Cooper against Horace Greeley, of the *Tribune.* Concerning this threatened suit the *Tribune* said:

"Mr. Cooper will have to bring his action to trial somewhere. He will not bring it in New York, for we are known here, nor in Otsego, for he is known there. The statement was the cause of a libel suit and it was held that the statement "He is known there" was libelous as charging that Cooper was in bad repute. At the same time the court outlined the proper defense to a statement of this kind which would be proof that Cooper was known in Otsego and sustained the reputation there of being a proud, captious, censorious, arbitrary, dogmatical, malicious, illiberal and litigious man."

Thurlow Weed was the writer of this article and Mr. Cooper also brought an action against him and recovered a verdict of $400. Mr. Weed began at once to taunt the novelist on the smallness of his verdict. He described Cooper's character as worth just $400 under this decision, repeated the libel in saying that Cooper was despised, and professed himself ready to respond in another suit for $400. The suit was immediately begun and the controversy continued until suits had multiplied to the number of seven, in all of which Thurlow Weed, of the Albany paper, was made defendant. Cooper won in all these suits, but the amount of the verdict was small, yet the expense of defending so many was considerable and the annoyance was undesirable. These cases are not reported, none of them having reached the higher court. In each of them Mr. Cooper acted as his own attorney. In the first one of Mr. Greeley's suits William H. Seward acted as attorney for Mr. Greeley. In one of the suits Mr. Greeley appeared as his own counsel, but he was no match for the novelist. The last case between Cooper and Greeley was pending at the time of the death of the novelist in 1851 and consequently was never brought to trial. These controversies were certainly more characteristic of journalism at that time than they are of that of the present day.

THE EDITORIAL JOURNEY.

By Addison B. Burk, Philadelphia *North American*.

THE account of the trip of the National Editorial Association to Portland, published in the October number of the National Printer-Journalist, ended with the entertainments at Los Angeles. Upon leaving the latter city the party was better organized than before. Each car elected a captain, who acted as an aide to the secretary, and through the captains information about the itinerary was transmitted to the individual members of the party. The captains prepared a list of the occupants of the several cars and this list is as accurate as any that can be made of the party that journeyed to Portland from San Antonio. Two or three editors dropped out on the way and two or three joined us after the list had been made up, but, with these exceptions, it is correct and is as follows:

Helvetia—C. B. McCoy, captain. C. R. Callaghan & Son, *Gazette,* Bellevue, O.; Mr. and Mrs. F. A. Rowley, *Times,* Lorain, O.; Mr. and Mrs. C. W. Bloom, *Mirror,* New Paris, O.; Mr. and Mrs. Edward T. Wetzler, *Eagle,* Lancaster, O.; Mr. and Mrs. John M. Goeke and Mrs. H. L. Harvey, *Westbote,* Columbus, O.; Mr. and Mrs. John L. Tranger, *Semi-Weekly Westbote,* Columbus, O.; Mr. and Mrs. William Miller and son, Victor, *Zanesville Press-Republic,* Springfield, O.; C. B. McCoy, *Age,* Coshocton, O.; Mr. and Mrs. B. F. Gayman, *Times,* Canal, Winchester, O.; Mr. and Mrs. W. A. Ashbrook, *Independent,* Johnstown, O.; Mrs. J. F. Baning, *Law Bulletin,* Norwalk, O.; H. D. Campbell, *Republican Gazette,* Lima, O.; J. P. Mahaffey, *Herald,* Cambridge, O.; J. S. Wilson, *Beacon-Record,* Ashtabula, O.; W. W. Scott, *Beacon-Herald,* Ashtabula, O.; Miss Maame Hutchins, stenographer to corresponding secretary, Johnstown, O.; W. J. Aleshire, *Derrick,* Gibsonburg, O.; H. R. Snyder, *Republican,* Springfield, Mo.; Mr. and Mrs. George E. Wood, *News,* Bellevue, O.; Mr. and Mrs. C. C. Fowler, *Dispatch,* Canfield, O.; Mr. and Mrs. H. P. Burke, *Gazette,* Centerburg, O.

Rome—R. H. Thomas, jr., captain. Mr. and Mrs. W. H. Hodgson, *Local News,* West Chester, Pa.; Mrs. H. C. Buffington, *Advocate,* Ashland, Pa.; Mrs. B. S. Thomas, *Farmer's Friend,* Mechanicsburg, Pa.; W. P. Church, *Enterprise,* Newtown, Pa.; Mr. and Mrs. R. N. Thomas, jr., and Miss Keefer, *Journal,* Mechanicsburg, Pa.; G. M. Heilman, *Echo-Pilot,* Greencastle, Pa.; C. R. Griffith and daughter, Miss Mona, *Independent,* Marion Center, Pa.; R. B. McKee and wife, *Journal,* Freeport, Pa.; Mr. and Mrs. A. D. Gould, *Eagle,* Eldred, Pa.; Dr. and Mrs. A. M. Brumbaugh, *Juniata Echo,* Huntingdon, Pa.; J. S. Sanders and daughter, Mrs. Waller, *Leader,* Wilkesbarre, Pa.; Mr. and Mrs. I. O. Nisley, *Press,* Middletown, Pa.; Mr. and Mrs. Addison B. Burk and daughter, Miss Ethel, *North American,* Philadelphia; Mr. H. A. McFadden, *Standard,* Hollidaysburg, Pa.; Mr. and Mrs. H. H. Wray, *Advance,* Leechburg, Pa.; Mr. and Mrs. F. S. Phelps, *Times,* Erie, Pa.; H. C. Steinman, *Record,* South Fork, Pa.; Mr. and Mrs. J. Irvin Steel, *Telegram,* Ashland, Pa.

Bolton—Malcolm Jennings, captain; Mr. and Mrs. E. B. McKee, *Review,* Towanda, Pa.; Mr. and Mrs. H. E. Butz, *Globe,* Huntingdon, Pa.; Mr. and Mrs. Harry Step, *Mirror,* Altoona, Pa.; C. P. Mead, *Republican,* Geneva, Ill.; C. P. Sperry, *News,* Clarksburg, W. Va.; J. H. Potts, *Times,* Troy, N. Y.; T. H. Harter and wife, *Gazette,* Bellefonte, Pa.; Mardy D. Carter, Mabel J. White, Lucy White, M. E. Malloy, special correspondents, Washington, D. C.; Mr. and Mrs. Malcolm Jennings, *Gazette,* Lancaster, O.; John M. Amos, *Jeffersonian,* Cambridge, O., accompanied by Mrs. Robinson, Frank Robinson, Mrs. Woodrow, Mrs. M. E. Amos; Mr. and Mrs. F. G. McCracken, *Examiner,* Bellefontaine, O.; W. T. In anticipation of a famine while crossing the desert lands each car organized a commissary department, but the commissary was not very successful and was abandoned after we reached the more populous part of the Pacific coast. Here indeed we had, as a rule, more fruit than could be disposed

VIEW AT PASADENA, CALIFORNIA.

Water color sketch from memory, by A. B. Burk.

of, for at nearly every stopping place boxes of cherries or oranges were distributed through the train by local committees, which gave us a surfeit of fruit.

We left Los Angeles about 8 o'clock in the morning of June 21, bound for Santa Barbara, where we arrived an hour before noon. Our route carried us into Santa Clara valley, a rich fruit country, and through the one-time summer resort, called Summerland, where the novelty may now be seen of oil wells driven in the sea. The railroad runs along the shore for some miles and affords pleasant views of the ocean, with outlying islands. Santa Barbara itself is on the seashore and has a pier from which steamers make the voyage to San Francisco. At Santa Barbara we were met by a committee of the Board of Trade and escorted to the Potter Hotel, one of the largest and finest on the coast.

It is situated on high ground, overlooking the sea, and is surrounded by magnificent flower gardens and lawns. The hotel is six stories in height and has accommodations for 1,000 guests. Its appointments are of the best and the table unsurpassed. The Potter maintains its own poultry yard, squab ranch and dairy farm and one does not have to leave the hotel to obtain any of the luxuries or conveniences of a modern city. Soon after luncheon, a committee of the Board of Trade of Santa Barbara, led by a former Philadelphian,

Dr. Stambach, appeared with tally-ho coaches, carriages and other conveyances, sufficient in number to take the entire party, of more than 300 guests, on a delightful mountain drive of about twenty-five miles. Our first stopping place was at the Santa Barbara Mission, which is more than one hundred years old, but is well preserved, and continues to this day its religious services. The brothers cultivate the soil of the mission lands and render the mission itself self-sustaining. The roads are excellent and afford fine views of mountains on one side and the sea on the other. Far up on the mountain-side we came upon the country seat of a landscape artist, Mr. Eaton, who, although not advised of our coming, welcomed us with the most generous hospitality, invited us to despoil his orange trees and, with little delay, served the entire party with lemonade. Mr. Eaton's scheme of landscape gardening, which is very effective, is, by judicious trimming, to open up vistas in the natural forest of oak. To keep the trees and shrubbery in fine condition he has provided pipe lines, carrying water into the trees, and from their branches he can turn on sprays of water that spread over a wide area. The orange groves are irrigated and very productive, while the scenes about his mansion excel in beauty any artificial creation of the gardener's art. The trees and shrubs are of nature's planting; what Mr. Eaton has done is to assist nature by judicious trimming and cutting away of underbrush and obstructing trees, so as to form pleasant vistas and promote the growth of the trees allowed to remain. From Mr. Eaton's place we descended toward the ocean, passing many other fine residences and viewing, in the distance, the Hotel Potter and the sea beyond. We returned to the hotel in time for dinner and left Santa Barbara in the evening for Del Monte and Monterey.

California is such a big state and is so cut up by mountain ranges that it has a great variety of climatic conditions, and what may be true with respect to the climate in one section may not be true of a place only a score of miles away. Santa Barbara enjoys an exceptional climate, for the reason that the coast line at that part of California faces the south and the city is sheltered from the cold trade winds that blow from the northwest, over the upper part of California, by a high mountain range. The Santa Barbara channel, 25 miles wide and 70 miles long, formed by outlying islands, carries a return current from the south that is quite warm, ranging from 60 to 74 degrees. There are seldom any breakers on the coast and the temperature is remarkably equable. In ten years the temperature reached freezing point on only one day, and in the same period there were only 14 days in which the temperature exceeded 90 degrees. On an average the temperature is above 80 degrees on only 23 days in the year, and the warmest nights in ten years (two in number) registered 67 degrees. The average velocity of the wind is 3½ miles per hour, and the humidity is also very low, the annual average being 71 per cent, and that of the winter months only 67 per cent. The sunshine record gives an average of 240 clear days per year, and of the remaining days 65 are partially cloudy, with sunshine part of the day. A large section of Southern California enjoys a climate free from great variations of temperature between summer and winter months, but no other part has as equable temperature as Santa Barbara. A little to the north of Santa Barbara, the coast line begins to run almost due north and south, and, being without sheltering islands, is exposed to the cold and fog of the northwest trade winds, which prevail two-thirds of the year. Even in that part of California, however, there are rich valleys sheltered by the coast range, which have delightful climatic conditions, but nothing to compare with those of Santa Barbara, Los Angeles, Pasadena and other noted resorts in Southern California.

Our trip from Santa Barbara to Castroville, and thence by a branch line to Del Monte, had been made at night and we missed seeing many points of interest. The road follows the coast line to San Luis Obispo, and thence northward traverses Salinas Valley, back of the coast mountains. There are many famous springs and mountain resorts accessible from stations along this part of the route, chief among them being Vancouver's Pinnacles, a great mass of rocks and boulders discovered by Vancouver in 1794. Our objective, however, was Del Monte, where the famous hotel of that name stands in a magnificent grove of live oaks, surrounded by wonderful gardens, a cypress maze, and other features of interest. From the train we passed through the grounds of the hotel, some of the party stopping for breakfast and others hurrying off to a trolley line that carried them in a few minutes to Monterey, the oldest city on the California coast. A few continued their journey to Pacific Grove, a new seaside resort, mainly settled by Methodists and a center for Chautauqua lectures and conventions of religious bodies. Del Monte, Monterey and Pacific Grove form practically one settlement on the shores of Monterey bay, each with charms of its own. The old city is picturesque and contains many places of historical interest. Here is the first custom house built in California—the first frame house built in the state—now moss-covered and in a dilapidated condition; the first brick house, the monument to Father Junepero Serro, who founded Monterey in 1770. The monument is erected near the trunk of an old live oak, which stood there at the time of Serro's first visit and lived until a year ago, when it was killed by an irrigating dam. At Monterey there are great fisheries, and glass-bottomed boats carry visitors over the marine gardens, as at Catalina islands, but we had no time to make a second excursion of this sort. The stores of the fishermen engrossed our attention. Here we bought abalene shells, from which large pearl buttons are made. They are five or six inches in diameter, nearly round, and very thick. The interior of the rough shell is of a fine pearly luster and the backs may be polished to produce mantel ornaments, but the shell in its natural state is itself an ornament. The fishermen say that the bivalve is very good to eat. Here, also, we bought skins of the grebe, a water fowl with extremely fine feathers so thickly grown over the breast as to present the appearance of fur. They are lustrous white, shading into grey, and sometimes into brown. Some remarkably large and fine specimens were obtained. Other skins were of the loon, and some of these, of a deep bronze green color, were as beautiful, in their way, as the skins of the grebe. When we left Monterey we were pretty well loaded down with spoils, and the shells were so heavy that we packed them in trunks for the amusement of baggage masters.

Returning to Castroville at noon we resumed our journey, traveling by the coast line to Santa Cruz, which is directly across the bay from Monterey. This is a beautiful seaside resort with a large casino on the beach and an abundance of amusement features. Back of the casino is a large tent-city, where families spend their summer vacations at little cost. Adjacent thereto are large and well appointed hotels. After a night of entertainment at the casino, which included dancing to the music, vocal and instrumental, of the Hawaiian band, we retired to our cars, with promises of entertainment the next morning at the grove of Big Trees. Our cars could not be carried over the narrow gauge line leading to Big Trees, seven miles away, so a special train was provided to carry one-half of the party, while the remainder made the journey in carriages, over a beautiful mountain roadway. Returning, those who had gone by train returned in carriages, and vice versa, so that we all had a fine view of the beautiful country, traversed at different levels by the two roads.

The big trees form a magnificent grove and are inferior only to those at Mariposa, of which they are cousins. The big trees of the Sierra Nevadas are Sequoias gigantea; those of the station called "Big Trees," near Santa Cruz, are Sequoias sempervirens. In the hollow butt of one of these trees, now known by his name, General Fremont camped in 1846 and fifty years afterwards revisited his old home. In this tree twelve of our party gathered at one time without discomfort. The giant of the grove is 65 feet in circumference and 306 feet high. There are many others of almost equal magnitude. One group of the trees formed a clump of such magnitude that fifty-two people clasped hands to encircle it. Many of the trees have been set apart to honor distinguished visitors to the grove, such as Fremont, Grant, McKinley and others, and during our visit one was dedicated

NATIONAL EDITORIAL ASSOCIATION TREE.
Water color sketch by A. B. Burk.

to the National Editorial Association, and will, hereafter, bear a tablet to that effect. Some of these big trees are estimated to be 9,000 years old and the roots apparently never die, for when one is cut down another grows from the stump. They furnish the famous redwood of California, but the larger specimens are, of course, preserved.

At Big Trees we were entertained by the ladies of Santa Cruz with a fine luncheon, made more attractive by the table decorations and the graceful service. Upon our return to the cars we were greatly surprised to find that another committee of ladies had taken possession during our absence. Each Pullman was profusely decorated with flowers, festooned from the fixtures and trailed over the backs of the seats. Each had its own combination of flowers, with due regard to color effects, and so much good taste was exhibited that it would be invidious to make comparison. We can, however, say that the decorations of the car Rome, with sweet peas, carnations and asparagus, made a particularly pleasing combination. We did not have a chance to thank our generous entertainers, but were hurried away to San Francisco, leaving a few of the tardy ones behind. We made the four hours' run by daylight, through a most attractive agricultural country, a feature of which was a field of sweet peas in bloom, stretching as far as the eye could see. On the way we passed San Jose, famed for its flower and fruit culture, and Palo Alto, reputed to be the handsomest city on the coast. This is the site of the Leland Stanford, Jr., University, one of the greatest educational institutions in the country. Menlo Park, a popular country residence place, has a familiar name, because of another Menlo Park in New Jersey, where Edison had his laboratory at the time he perfected the incandescent electric light that bears his name.

Reaching San Francisco late in the afternoon of June 23, a committee of the Chamber of Commerce met us at the depot and escorted us in trolley cars to the St. Francis Hotel, a new hostelry, and one of the finest on the coast, where we were very well entertained during our brief stay in the city. Blindly following tradition, many members of the editorial party wasted their time in a trip through Chinatown, which, at present, is a commonplace quarter of the city. The Chinese have become so far Americanized that they no longer present the novelties of life that once made their quarter an attraction to tourists. Moreover, the health officers and other officers of the law have so well performed their work of purifying the quarter, physically and morally, that it has ceased to offer inducements to the prurient or morbidly curious. There is no longer any reason why tourists should go to Chinatown, except in daylight, to visit the magnificent stores of the Chinese merchants. Here the souvenir fiend may find an abundance of curios worth carrying home and at all prices, from a few cents to hundreds or thousands of dollars. The Chamber of Commerce committee was on hand early the next day to escort our party in trolley cars for a ride through the city, including a visit to the Cliff House, where a view is given of the entrance to the bay. This bay, by the way, is not fully appreciated, except by those who study the maps. It would be a great bay if it extended only to the wharves of San Francisco and Oakland, but it stretches north and south of San Francisco for many miles, forming a kind of inland sea, receiving at its upper end the waters of the Sacramento river. Seen from the numerous hills, upon which the city is built, or from the neighboring mountain tops, the view of land and water is unexcelled. Because of its hills, San Francisco built the first cable railway; but the cable has given way to the trolley and now San Francisco has entered upon a new era of growth, because the facilities for communication have been greatly multiplied by the building of trolley lines. Our tour of the city included a view of Golden Gate Park, one of the most attractive pleasure grounds in the country.

In the afternoon the party divided, some going to Oakland, for a visit to the University of California at Berkeley, and others making the trip to Mount Tamalpais. The feature of chief interest reported by those who visited Berkeley was an amphitheater, seating 8,000 persons, which is nothing more than a hole in the mountain side with seats around a perfect circle. There is no roof, but persons talking in an ordinary tone of voice on the stage can be heard throughout the auditorium. The seats and steps are of stone.

The trip to Mt. Tamalpais was one of the most enjoyable of the entire journey. The boat crossed the bay to the north side and the tourists were then carried by the North Shore Railroad from Sausilito, the landing place, to Mill Valley, six miles distant. Here the mountain railroad begins. It is advertised as "the crookedest railroad in the world." It is between eight and nine miles long and rises to a height of 2,500 feet. It has 281 curves, the longest piece of straight track is only 413 feet in length and one of its features is called a double bow knot, the road describing the letter S four times. Near the summit is the tavern of Tamalpais, a

favorite resort of San Franciscans on warm nights. The view from the summit is indescribably grand. Spread out before one are not merely the cities of San Francisco, Oakland, Berkeley and the great bay of San Francisco, but the ocean itself on one side and the encircling mountains, including Mt. St. Helena, on the other. The views change with the shifting light and visitors find at Mt. Tamalpais that variety of aspect which is one of the characteristic attractions of mountain and sea views to the observant. The character of the view from Mt. Tamalpais is such that the visitor to San Francisco could not do better than visit Tamalpais first of all, for he would thus obtain at the outset a clear understanding of the topography of the city and the surrounding country.

We were to leave San Francisco the next day (Sunday), taking our train of Pullmans at Oakland at 1 p. m., so that we had little time for sightseeing on Sunday morning, but some of us managed to climb Nob hill, crowned by some of the finest residences on the Pacific coast, and from which we had another fine view of the Golden Gate and the harbor. We were all glad, however, to get back home, which, for the time being, meant the Pullman cars, and to find, when we arrived, that the house cleaning season was over. The cars were as clean as when we started, but the floral decorations had disappeared. Our route from San Francisco to Sacramento led us across the Sacramento river, the train being carried over bodily on an immense ferryboat 424 feet long and 110 feet wide. The train was divided into three sections, all being easily accommodated on the one boat, which is capable of carrying 36 large freight cars at one time. The boat carried us from Porta Costa to Benicia, the latter place being chiefly distinguished as the birthplace of John C. Heenan, the "Benicia boy," a prize fighter who won distinction in his engagement with the British champion, Tom Sayer, as far back as 1860, when prize fights were fought with bare knuckles. This fight lasted over sixty rounds, although Sayer's arm was broken early in the contest, and ended in a draw because the crowd broke into the ring. A few of our party remembered the excitement attending the fight, but, such is fame, the majority had never even so much as heard of the Benicia boy.

Our route, after crossing the river, followed its banks and we passed a long section quite slowly, because the track has a bad habit of disappearing into sink holes—a quicksand formation that gives a great deal of trouble to the engineers.

The Sacramento valley is a beautiful farming region and the pastures in sight of the train were filled with cattle and sheep. But the sink holes spoiled our programme. They delayed us so much that when we arrived in Sacramento darkness had set in and we had to view the capital city by electric light. This was the more to be regretted because Sacramento is worth seeing and its citizens had prepared for us a generous reception.

The committee of citizens which met us on our arrival would have been glad to have taken us at once for a ride about the city, but we were too hungry for that, and not until we had been more or less refreshed at the restaurants and hotels, did we accept the hospitality of our entertainers. It was then too dark to permit us to see much, but we managed to get to Fort Suter, an old outpost which has been restored and is now in good condition; visited the art gallery presented to the city by Mrs. Crocker, and, late at night, attended a reception in the capitol building, a brilliant function which most of us were too tired to enjoy.

The night was spent in travel, during which, we were told, we crossed the Sacramento river nearly a score of times, but we were not aware of the fact and morning found us at Dunsmuir, where we took breakfast, a few in hotels, but the greater number in the streets, where improvised eating stands had been erected.

After leaving Dunsmuir we learned that our train had been the cause of a bad wreck on the road. It had been mistaken by the engineer of a freight train for the second section of a passenger train and, as a result of his mistake, he had pulled out of a siding and crashed into the second section of the regular train. From Dunsmuir our route carried us through a mountainous region leading to Shasta Springs and beyond, and all day long, snow-capped Shasta was in sight.

A stop was made at Shasta Springs, a mountain resort, with mineral springs, a fine hotel and innumerable scenic attractions.

The road from Shasta Springs over the mountains to the Rogue river valley is one of the most picturesque in the west. The grade is very steep and the road doubles upon itself many times before the summit is passed and it begins to descend into a picturesque valley—that of the Rogue river. Our first stopping place in Oregon was at Ashland, where we began a week's experience with the most delicious cherries grown anywhere. At every stopping place baskets or boxes of cherries were presented, until we were surfeited with the fruit. Our doctor had several cases of illness to attend during the journey, but he alleged that the sickness was due to nibbling at the fruit, not to excessive eating. According to his theory, and it is plausible enough to deserve attention, indigestion is more likely to be caused by occasional indulgence than by gluttony. According to his theory, one should (if he eats at all), consume a considerable quantity of fruit at a sitting—enough to start the gastric juices, and thus provide the means of digestion. Evil results follow only when one eats a few cherries at a time, a quantity insufficient to excite the digestive apparatus. In such a case the food taken lies in the stomach undigested, and gives rise to stomach troubles; whereas, a sufficient quantity would set in motion the processes of digestion and relieve one of trouble by the natural processes of assimilation. This theory is sufficiently rational to deserve consideration.

Our other stops on the way to Portland were unimportant. We got a glimpse of Medford at nightfall and of Albany the next morning, and at both places received gifts of cherries, but did not stop long enough to do more than acknowledge the courtesies of the citizens. Breakfasting at Salem on June 27th we had time for a ride about the capital city of Oregon and before noon arrived at Portland, as described in the September number of the PRINTER-JOURNALIST.

* * *

WISDOM FOR WORKERS.

Bacon said every man should consider himself a debtor to his profession, and in proportion as he gains profit from same, should labor the more diligently to become a help and ornament to it.

Remember that when a competitor attacks you, he attacks the weak spot in your business. Be thankful, therefore, and strengthen the weak point. Don't ever make the mistake of showing your competitor his weak points by a counter attack.

Prune expenses carefully, but don't drive the ax into the heart of your business.

It is a good thing to say what you mean and mean what you say, but best of all is to mean right and do right.

Merit is a good thing to possess. Merit may be found out, but it will be quicker known if you let the people hear you. A man who has a tin horn and blows it gets more credit than the man who has a golden horn and blows it not.

There is a time to criticise, and there is a time to encourage; the editor who knows when to do each is a world benefactor.—*Star Solicitor.*

REVIEW OF JOB WORK

BY E. S. HANSON, CHICAGO, ILL.

Address all Communications for this Department to
E. S. Hanson, 1524 E. Ravenswood Park, Chicago, Ills.

WORK for the job printer is now coming on apace. The business man, the professional man, the manufacturer, are all keenly engaged in the struggle for their share of the things of this world. And they cannot get them without the help of the printer. And just as the lawyer who can win cases for his clients is the one who will have the most clients to work for, so the printer who can by intelligent, effective, workmanlike treatment win business for his customers, will have the most customers. "So run that ye may obtain." Do not allow a rush of work to make you careless of the quality of your output. Better turn away one job when you are crowded than have two customers leave you because of hastily executed work.

And through all your busy days, do not forget this department. You will be turning out a large variety of work. Let us have samples. And will our friends remember, please, that this department is written the first of the month preceding the date of publication, so do not be disappointed if your specimens are not always reviewed as soon as you had expected. We aim to mention every specimen which comes to our desk just as soon as practicable. Some specimens which come to us are not securely wrapped, and it is very probable that some which are sent out for this department never reach us at all.

I trust we may have a little contest in the line of job composition before long. And I suspect it will be along the line of just the ordinary run of every-day work. For printers will be too busy for some months to come to spend time on any special "copy" for a prize competition. So if you do any work as you go along that you think is unusually worthy, just save a few copies in case the call should come. And in the meantime I shall have a talk with the publishers as to what the prize may be.

F. A. Van Gelder, Lima, N. Y.—Your little booklet, "Our Hobby Is Printing," is a catchy idea, and well gotten up from a mechanical standpoint. The most I have to suggest is that your office needs a few new fonts of type of latest design. Our customers all over the country are keeping closer watch of styles in type than they used to do, and it is up to us to keep in style. So when you are buying, be sure to buy the very latest thing that will serve your purpose. A customer of mine recently came into the office for about $15 worth of work, and in the end left an order for three times that amount, just because I showed him a tasty job we had just completed in a new series of type. The Allen statement is a neat piece of work, though many people object to ornamentation on a statement. If the points were left off the ends of lines in the center panel, and the lines squared up, the effect would be better. I do not like the straight metal border which you use on several of your jobs. Think a brass rule used in connection with the metal corner pieces would be preferable. The brown ink which you use on your own billhead and one or two of the other jobs should be improved in working qualities. The O'Neill letterhead would look much neater if the outer rule and border in tint were taken away. The Prospectus cover is neat and appropriate, as is also the cover of the Quaere Club program. The program itself has a bulky, crowded appearance. It would be improved by having the dates and names of hostesses in much smaller type and set in about two ems, allowing the program proper to stand out as the most prominent part of the page. We should have been glad to show this cover to our readers, had we a black and white print to reproduce from.

Folder and Envelope by Meyer-Rotier Printing Co., Milwaukee.

Meyer-Rotier Printing Company, Milwaukee—While belonging to Mr. Woodworth's department, I cannot refrain from making comment upon a piece of advertising matter from this celebrated firm which has come under my notice. And I shall try to reproduce it if the engraver can come anywhere near doing it justice. I trust Mr. Woodworth will see this folder, for it contains some wisdom which other printers might profit by.

Stutes Printing Company, Spokane, Wash.—A number of samples evidencing the real Stutes touch. One of them is a blotter telling of a large order completed for a New York insurance company, clear across the continent. But we don't wonder at it. A lady in Chicago recently wanted an artistic piece of work executed, and after spending the larger part of a day in getting estimates, at last went back to the highest bidder and left the work, remarking, "I know I can depend on you to get it out right." That is undoubtedly why Stutes got the insurance job. The club program does not look as well machine set as it otherwise might, but we are all getting to do it. It is so easy to give the whole thing to a linotype operator and get it up in a hurry. And as a rule woman's club treasuries are never burdened with a surplus, and they

are best satisfied with the cheapest method of composition. How pleasant our work would be if we could consider every job from a purely artistic standpoint, without limitations of time or expense. An architect told me joyously a few days ago of a piece of work then on hand in which he was given almost carte blanche to design a building as nearly ideal as possible. But such opportunities, he said, are rare indeed. The Stutes choice of ornamentation is a thing to be admired. The ornaments have the appearance of being designed especially for the jobs in which they are placed. In the job which is here shown, notice how nicely the ornament "jibes" with the rest of the job. It is a part of the job, without which the work would be incomplete, and not merely something to fill up space.

H. W. Osgood, Olean, N. Y.—Some samples showing taste and the artist touch. The Wight School announcement is an exceedingly well executed piece of work. All samples are above criticism, with the exception of the Barnard statement, which has something of a clumsy appearance, owing to the large size of type used for the name. As I think I said last month, much ornamentation is not usually desirable for a statement.

M. E. Ellis, College View, Neb.—Much of your work is open to criticism. On several of your jobs you use two different styles of text letter, which is always to be avoided if possible. Many of the lines for which you use text would look much better in a plainer letter—for instance, the names of the staff on the *College Messenger* envelope. The letterhead for the *Messenger* contains a glaring typographical error. The letterhead for the Good Health Café has the appearance of overornamentation. It is disastrous, as you can see in the Union College letterhead, to try to work a half-

THE Continental Distributing Company begs to announce a change in management in both its Seattle and Spokane houses. ¶ Mr Chas. R. Brown has assumed the position of vice president and general manager, with headquarters at Seattle, and Mr. D. S. Cowgill that of secretary and treasurer, with headquarters at Spokane. ¶ Both gentlemen having been connected with this company since its organization need no further introduction. The same policy of liberal treatment to the trade will be pursued by both houses, and patrons are assured of our usual courteous attention to their interests, which we have always accorded in the past. ¶ Expressing our appreciation of the many favors we have received at the hands of the trade, we beg to remain,

Yours respectfully,
CONTINENTAL DISTRIBUTING CO.

Announcement, printed by Stutes Printing Co., Spokane, Wash. On heavy white deckle-edge paper, wide margins, rule and initial in orange red, balance in black.

tone in any kind of a metallic ink. I am inclined to take somewhat kindly to the cover for the Church School Benefit. It is decidedly German in its design, and your customers would perhaps not want many jobs in that style; but an occasional one is a pleasing change. And the presswork on it is so much better than on your other jobs as to make it very noticeable. This opportunity for criticism will no doubt disappear when your new press is installed.

Carl Samuelson, Chicago—I judge from your specimens that you are using rule in strips, cutting it yourself, and your cutter is perhaps not as accurate as it should be. This makes a roughness in the joining of rule which detracts from the appearance of your work. In your leaflet you have

FIRST
ANNUAL MEN'S FALL FESTIVAL CONCERT.

If you had changed the display to

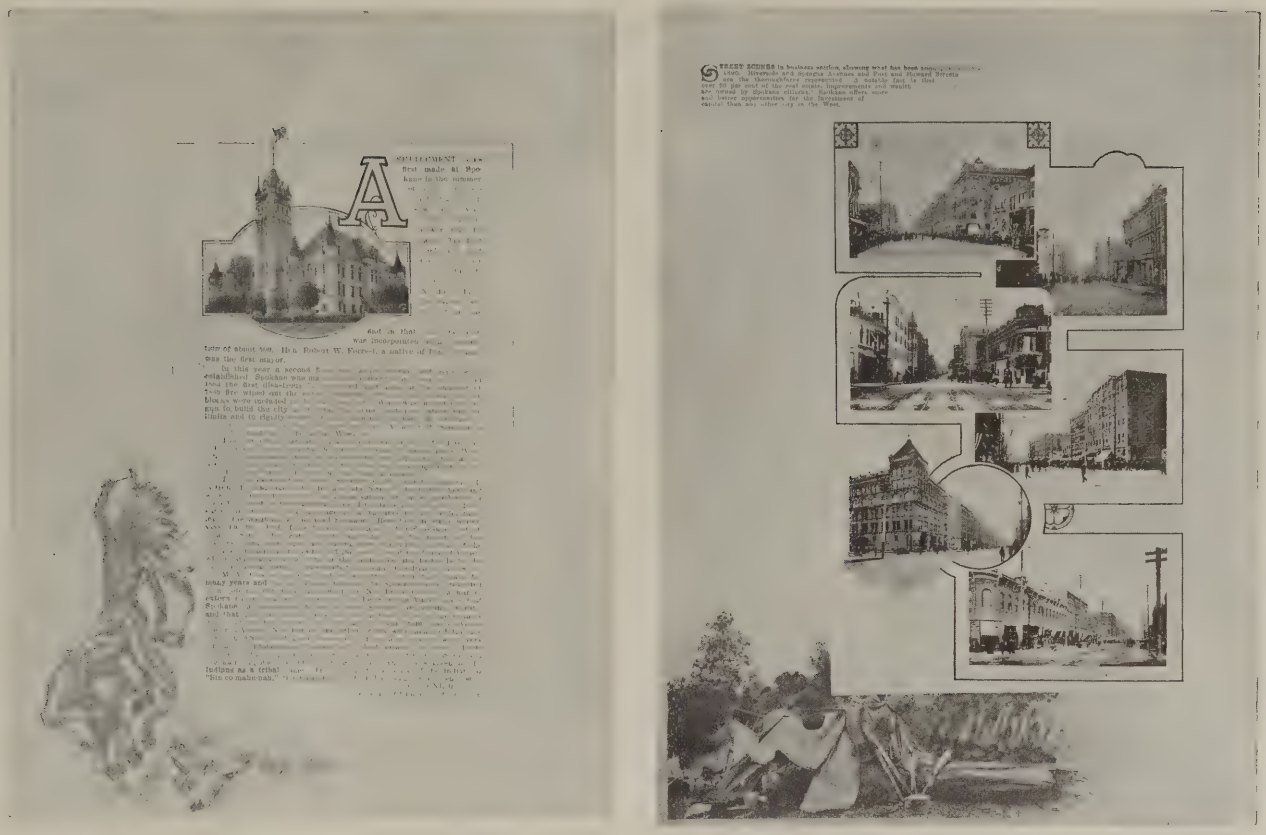
FIRST ANNUAL
MEN'S FALL FESTIVAL CONCERT

it would have been more appropriate and would have allowed you to use a stronger line. As it is, there is no strong line to give identity to the leaflet. The Gibbs folder would be greatly improved by using the gothic with which you start out for the subheads on the third page.

Union Bank Note Company, Kansas City, Mo.—The prospectus of the Monegaw Club is a handsome specimen of business-bringing art.

Chas. C. Metcalf, foreman Munising Publishing Company, Munising, Mich.—Your program, entirely in Caslon Old Style, is to me one of the most striking specimens of the lot you have sent. It is nicely displayed and well printed. I do not understand, however, why the explanatory paragraph under No. 2 is in italic and that under No. 5 in roman. In the folder, more space might have been given between the numbers. And great care should be given to the correct spelling of musical names. I am afraid you are wearing out your shaded text unnecessarily by a too generous use of it. It is decidedly out of place for anything but the most delicate uses. Printing a half-tone over a map in tint, as you have done in one of your jobs, is not conducive to the usefulness of the map or the clearness of the half-tone; but we have to do a great many odd and outlandish things if our customers insist upon them.

C. N. Ironside, New York—Even if you do not "stick type" as a regular thing now, you certainly have not lost your ability when it comes to a neat piece of composition. Your letterhead is one that would suit me exactly.



Two pages from "A Tale of a Modern City," by the Inland Printing Co., Spokane, Wash. White coated paper, halftones and text in black, cover decorations in light olive green.

McQuiddy Printing Company, Nashville, Tenn.—We reproduce the Smith Hotel letterhead, just to call your attention to the improvement you might have made by leaving the point off the main line. By means of the comma, and the unduly wide space before it, the line is thrown entirely out of center. The points might also be left off to advantage from the letterhead for the Department of Education, giving it a much better balance. In my opinion, too, the script of the date line (I believe it is Myrtle script, though I confess I am not sure as to the name) does not harmonize with the Stationers' text. The lining gothic which you use on several of your jobs would have been very suitable for your cover, though the cover is very neat as it is. Your draft set without blank lines makes a fairly neat appearance, though there are few commercial houses which care to have them that way. The letterhead of the Southern Advertising Agency is a very commendable piece of work.

Inland Printing Company, Spokane, Wash.—We wish each one of our subscribers might see "A Tale of a Modern City," the book you have published in honor of your own Spokane. And, indeed, such a piece of work does credit to any city. Photography is a poor makeshift at reproducing such work, but we shall try it on a page or two.

M. D. Billing and A. S. Bennett, Cranbrook, British Columbia—Am pleased to see your work, and glad to show one of your jobs herewith. About the only criticism I can make on this job is that you have used more colors than really necessary. The ornament, I imagine, would have looked fully as well in black. The same might apply also to the show card of the *Herald;* the job is, if anything, weakened by the use of the green. Trefoil ornaments should always be set with the stem downwards, except when used in a border. The rules which separate the three panels of this job should also be reversed, having the heaviest part of the rule next to the heav-

NATURE'S HOLIDAY RESORT

TOURISTS' PARADISE

ROOSVILLE, BRITISH COLUMBIA

An Ideal Resort Where Nature Has Been Lavish In Her Gifts

THE ST. LOUIS HOTEL

A Large, Comfortable, Homelike Place, Where Men and Women Can Enjoy an Outing Away From the Cares and Anxiety of Business and Social Life.

Man was created to work and rest, and to properly rest he must get away from his scenes of labor and worry. "Where is the best place to go for a week or more vacation?" is often asked, and it is our business to answer the question. If you want pleasure and recreation amidst scenes of beauty, where the magnificence of the scenery appeals to all that is grand and noble in the human heart; where nature still glories in her pristine wildness; where civilization seems lost in the mountains and streams, lakes and valleys; where care is unknown and the song birds carol their melodies from sunny morn to dewy eve, then come to Roosville. It is near the boundary line of British Columbia and the United States and yet only five miles from the Great Northern branch of railway, running from Jennings, Montana, to Morrissey, B C. It is within a short distance of the celebrated coal and oil fields of the Flathead valley, and the fertile valley known as Tobacco Plains. Perhaps in all British Columbia, where so many beautiful spots can be found, there are none that possess the attractive features of Roosville. The grand waterfalls, the beautiful drives and mountain trails, the great cattle ranges, the fruit farms, Wolverine basin, Paradise valley, the famous Fish lakes, where the trout are so large one is inclined to accept the story of Jonah and the whale. The eye never grows weary or the senses tired of the romantic loneliness of Roosville and the surrounding scenes, happily named the Switzerland of the Kootenays.

FRED ROO,

Proprietor and Manager St. Louis Hotel

iest lines of type. In the Dezall Bros. job the border is so prominent as to draw attention from the matter of the job, rather than attracting attention to it, as it should. The lecture announcement, I imagine, brought you up against the proposition of getting up a respectable display on a large card with small type. I have been there many times myself, and know how handicapped one feels. You have certainly come out of it very creditably. Your own announcement folder is very neat, indeed. The initials look somewhat small for the setting which is given them, and the wide blank space under the one on the inside of the folder detracts from the appearance. This was, no doubt, the result of leading out the page after it was set. But a little more time in running over the paragraph would have been well spent. For a new town of only 2,000, in the heart of the Rockies, your work is certainly creditable.

* *

Rex H. Lampman, Neche, N. D.—It is with much interest that I have examined your envelope printed in nine different color schemes, each of three colors. That others may get some idea of them I will try to tabulate them, though for convenience of tabulation I may not get in all the fine distinctions of color that I should:

The Chronotype

ADVERTISING RATES PROMPTLY FURNISHED UPON APPLICATION

The NATIONAL PRINTER-JOURNALIST is unequalled as an advertising medium in its field. No attention paid to postal card requests. Information cheerfully furnished to all patrons.

Subscribers and patrons will confer a favor on the National Printer-Journalist Company by sending in the names of responsible newsdealers who do not keep the monthly on sale regularly.

Manuscript sent in for publication must be accompanied by a letter of explanation and return postage.

CHICAGO, NOVEMBER, 1905

Coöperation of capital and labor is always beneficial. Combinations of either capital or labor, one against the other, or against individuals or firms, the people in general or public interests, are always hurtful and often criminal. There should ever be made a distinction between selfish, unjust, tyrannical, oppressive, dishonest combinations and helpful, uplifting, honest coöperation.

* * *

A speaker at the Inland Daily Press Association, a few days ago, stated that the proprietor or employer who signed a contract for a closed shop violated the laws of his country. He was right in this. The signing of such an agreement is a conspiracy against the legal rights of others and the parties thereto are liable to punishment by fine or imprisonment. Unlawful trusts must go.

* * *

The approach of the Holidays and the New Year, brings new business to the newspaper and the printing office. It is the time of the year of active buying and of parties and all kinds of social events, hence of increased news and advertising. Home news becomes more plentiful and more important. It is high time to commence work on Thanksgiving and Christmas editions and the annual numbers showing the building, the manufacturing, the commercial, educational and other statistics, progress and accomplishments of the year. Every newspaper should have an annual edition. It should be kept in mind and planned for during the whole year but the real work falls in November and December. These special issues bring new business and bring new friends. We have often urged that the newspaper and the printing office should ever keep in touch with the spirit of the people and the seasons. They should lead in all that tends to social enjoyment and good feeling. The home returners should receive proper notice at Thanksgiving and it is a good practice to devote a liberal space to the whereabouts and the doings of former residents, among whom every home newspaper ought to keep up a good list of subscribers.

People like to read about old friends and neighbors who have found homes elsewhere.

There should be reading matter, editorials, stories, poems and illustrations appropriate to each general holiday, and a special effort be made to chronicle all the events pertaining thereto.

The newspaper should be seconded by the job office. Souvenirs, programs, diaries and all kinds of attractive novelties should be provided and urged upon the attention of business men and society officers. November and December are the natural harvest months for newspaper publishers and printers. We can only suggest in a general way, but lessons should be learned from the stationers, the plate and ready print houses, who show a world of enterprise in putting forth all kinds of specialties for this season.

* * *

A square deal and equal opportunity to each and all are again becoming more and more the controlling principles and sentiments of the American people, after a period of seeming submergence by greed, pride in wealth and position, monopoly of both capital and labor, selfishness, cruelty, violence, dishonesty, imposition, bluff and graft. Bankers, transportation and financial corporations, insurance companies and those controlling and conducting public utilities or handling the world's necessities, are now being forced to make good. The press has had a glorious part in this revival of these tenets and sentiments of the religion of liberty, and has much work yet to do before an entire return, in practice as well as in theory, to the fundamental principles of our free American government. The great advance that has been made is well illustrated in the victory of the United Typothetae for the open shop and equal opportunity for all workers and the right for every man to make free contracts and to control his own business.

The reports in this contest, received up to October 23 from the office of Secretary Macintyre in New York City, establish the fact that all the Typothetae offices are running with nearly the full quota of men and in many places the strike so far as the employers are concerned, is reported a thing of the past.

To quote from the last bulletin, "not only are the offices getting the men, but they are getting on an average and in many places a better quality and a higher standard of men than those who went out."

The courts, too, have stood right by the fundamental principles of this government; have enjoined all interference of strikers with the business of employers and their employes and, rightly, have held

picketing, boycotting, bribery, intimidation and all like acts that annoy others or interfere with their personal rights and independence, illegal.

* * *

We have been reading, again, about the lack of opportunities for making a living, today, as compared with the past and it has made us reminiscent. Reminiscence is presumed to be permissible to one who has reached the age where gray hairs have turned to white. We have, in our three score and more years, lived on the frontier, grubbed out stumps, split rails, cut grass for hay with a scythe, and harvested wheat with a cradle and bound it by hand; have taught school and practiced law; organized and helped conduct manufacturing corporations; edited and conducted, first, a weekly, then a semi-weekly and then a daily newspaper; run a job printing office and bindery; met men of all employments and positions from the man with the spade and the hoe, to the banker, financier, members of Congress, Governors of States, United States Senators and Presidents of the United States; have lived on the farm, in a country village, a small city and in the larger sized cities of St. Paul, Indianapolis, Chicago and Greater New York and traveled over every portion of the United States. We have witnessed the change from hand labor and the crude implements to the machines in all callings, from farming to printing. In these somewhat extended observations, and during these wonderful changes, we have never lacked the opportunity for profitable employment. We have met with losses but not because of lack of profit from the work in hand, but because of reaching for something outside, in the hopes of greater or speedier gains. We have not seen, in more than three score years, opportunities decrease, on the contrary, they have constantly increased. We are convinced both by observation and experience that never before, in the history of our country, was there such a wealth of opportunities for both young, middle aged and even so-called old men, as in this year 1905, provided, one has strength, health, intelligence, honesty, courage, industry and perseverance and does willingly whatever his hand finds to do with his whole might and skill. There were never before in the history of this country so many opportunities in publishing, newspaper making, printing and allied trades, as today. To be convinced of this, one need but read the pages of this one issue of the NATIONAL PRINTER-JOURNALIST and see how newspapers, trade journals, printing, advertising and advertising specialties have increased. Take merely the accounts of the meetings of the Inland Daily Press Association, of the Chicago Trade Press Association, of the employing printers at St. Catherines, Canada, of the great advertising show in Chicago, and the description of the model plant in New York City, how they speak of the wonderful increase of multiplied opportunities, in every line of publishing and the typographical art and allied callings. In 1873, when we graduated from law into the newspaper business, we found that in the then new State of Minnesota, a man of broad learning, a graduate of Harvard, who had been a colonel in the Union Army and had served as State Secretary and held other prominent offices, was content with, and honored for, running a weekly paper with a circulation of five hundred copies printed on a hand press. He was a fair sample of others in that State.

There were two such papers in the county then with job offices to correspond. Now there are six or seven weeklies and two dailies in the county and, besides the job offices connected with all these newspapers, there are three or four other exclusively job printing offices, two engaged principally in printing advertising specialties and employing in the aggregate some twenty or thirty traveling men and over a hundred work people. The successor to the paper, that was run on a hand press and set by two compositors, has latest improved power presses and three linotype machines and a force to match, yet the population is only about sixty per cent greater than in 1873. Newspapers have increased four fold and printing more than twenty fold.

It is the same throughout the whole country in nearly every trade or calling. The development of our industries has much more than kept pace with the increase of population, and wages have increased with the increased opportunities.

* * *

ORGANIZATION FOR SELF-PRESERVATION.

By A. W. Lee, Courier, Ottumwa, Iowa.*

Self-preservation is the first law of nature, and I am frank to state that practically the only newspaper organization which I am prepared to advocate, is organization for self-preservation. I am an individualist. I believe in individual initiative. I believe in the survival of the fittest. I believe in the Emersonian philosophy that if a man can do a thing and do it better than it has been done by anyone else, he has a sure guarantee of the recognition of that fact by all the world. I believe in trying to run a newspaper upon that basis, being firmly confident that if a publisher can, in a measure, succeed in this effort, he will make a newspaper that will take care of itself without reference to competition. I read recently a statement emanating from a Tammany Hall leader, Mr. Louis Nixon, who goes straight to the point of individual responsibility, and to individual initiative. What Mr. Nixon says is well worth consideration:

> In every relation of life, private and public, I believe thoroughly in the doctrine of personal responsibility.
>
> It is a good doctrine and yields splendid results all around.
>
> Let a man be willing to stand for his actions, either as a private citizen or a public official, and be able to say: "I ordered that," or "I am responsible for this," and the tone of citizenship will be elevated.

What Mr. Nixon says of the individual man is equally true of the individual newspaper. Hence, I do not know just why I was asked to address this association upon the topic of newspaper organization, unless it is because of the fact that the newspaper organization, which I do believe in most is a thorough and complete organization in my own business, carefully worked out in every detail. I am going to be very frank about this matter. There may be cases and local conditions where it pays to have an understanding and working agreement with one's local competitor in the newspaper business, but I doubt if, in the long run, it pays. I much prefer to go it alone and stand or fall on the intrinsic merits of my own organization and my own methods of doing business. But mind you, gentlemen, when I say, "*Go it alone,*" I mean exactly what the words imply. In my mind, so far as local conditions are concerned, this means to let my competitor entirely alone to work out his own destiny and to succeed or fail upon the merits of his proposition, while I succeed or fail upon the merits of my own. Let your competitor alone and see to it that you devote yourself mightily and all the time to attending to your own business. Stand always for what you believe is for the best interests of the public at large. In a word, stand for what you believe to be right and don't be afraid when you find your opinions and policies are opposed by powerful interests. On

*Delivered at a meeting of the Inland Press Association

the other hand don't act on the assumption that an infinite and all-wise God has extended to you a special dispensation to assist Him in running and regulating the universe. In a word, see to it that no corporation or other outside influence has, in fact, any hold upon you that can swerve you from the path of right and duty, and then give to the public and to every patron, the greatest possible value for every dollar they spend with you. Push your business all the time, keep careful double entry books and know where you are at, financially, politically and morally every day and every hour of the day, and then you can afford to let your competitor do the worrying *both about you and himself*. You will find that you need very little stand or fall, it will succeed or fail upon its own innate merits or demerits. Hence, in my judgment, there are only rare instances where the question of self-preservation requires or warrants any local organization, combination, understanding or agreement.

Of social or good fellowship organizations, I am not speaking. It goes without saying that whatever tends to promote a better feeling and better conditions along these lines, without sacrifice of principle, or interference with business methods, is good at all times and in all places.

However, in these days of trusts and combines, organization on a large scale becomes necessary at times, in order to fight organized greed and monopoly, so as to secure the natural, competitive commercial conditions that belong to a great country and a free people. I need not tell you that for the past three years the newspapers of the United States have been in the grip of the paper trust. I need not tell you that they have charged us an enormous price for paper, much more than was necessary to return to them a fair and reasonable profit on their investment. It is probable that every one of you has had the same experience in receiving, last year, and the year before, and the year before that, either directly or indirectly, representatives of the paper trust, who informed you, in a more or less menacing manner, that the price of paper would be so much, and that you had better make your contract immediately, as in all probability, if you did not do so, the price would be summarily advanced upon you at an early date. When you suggested that you would look around and see what you could do elsewhere, they smiled a smile that was childlike and bland, and gave you to understand that you were up against a condition and not a theory, and that you would buy paper at their prices and upon their terms, or you would not buy it at all. This is distinctively organization for self-preservation, and while the Inland Daily Press Association is a small affair, in proportion to the entire newspaper business of the United States, it has done more to bring about competitive conditions in the paper market in the west, than any other organization, combination or influence. What has been accomplished through this organization is but an indication of greater things that may be accomplished in the future. I sincerely believe that if this organization will come into the paper market next spring with a signed proposition on the part of its members to agree to enter into a contract to buy paper of the lowest responsible bidder to the aggregate amount of several hundred cars, that we can not only get a competitive proposition to which we are entitled, but we will get a price which will save thousands of dollars in the aggregate to the members of this association, over and above what we can accomplish in any other way.

I am in favor of enlarging, perfecting, strengthening and cementing the Inland Daily Press Association to the fullest possible extent.

In conclusion, gentlemen, let me say that in my opinion there are other important things that can be accomplished by this association and kindred forms of newspaper organizations. The American Newspaper Publishers' Association, which is made up of the largest newspapers in the country, has an annual meeting at which general topics and matters of importance and interest to the newspaper publisher are brought up and fully discussed. We are all disposed to think that the so-called "big fellow" is a wonderful individual until we come into close contact and association with him. I belong to the American Newspaper Publishers' Association and have attended a number of their meetings, but have not found that their discussions of practical newspaper questions are of any more value or exhibit any deeper knowledge of the subject than those of the Inland Daily Press Association. However, the American Newspaper Publishers' Association has, through organization during the past five years, accomplished something that has been of immense money value to its members. It has brought about an arbitration contract and agreement with the typographical and pressmen's unions that has practically eliminated labor difficulties and strikes from the offices of the members of the A. N. P. A., greatly to the financial welfare of all concerned. What the A. N. P. A. has done in this matter can just as well be done by this association for its members and I present this as something that the Inland Daily Press Association could well take up, consider and act upon.

There is very important work along the line of self-preservation to be accomplished by *state* newspaper organizations. The laws with reference to libel and official publications need attention and, using my own state as example, I believe it would well pay the newspapers of Iowa to employ a high-priced man, with a legal education and of executive ability, to make his headquarters at the state capital and devote his entire time to the general interest of the newspapers of the state. Not only should he be there when the legislature is in session, for the purpose of suggesting friendly legislation, as well as for the purpose of warning the members of the association against unfriendly legislation, but he should also watch the papers of the state and see that boards of supervisors and other public bodies comply with the law with reference to official publications. I am confident that in our state there are many counties where the boards of supervisors and other official bodies do not begin to comply with the law in this respect. The public does not get what it is entitled to and the newspapers suffer financial loss. I believe that there should be united action on the part of newspapers to bring about legislation requiring school boards to publish their proceedings and an itemized statement of their expenditures for each and every month in the year. The school boards in Iowa expend vast sums of money annually (in my own city the school expenditures are almost equal to those of the municipality), and yet beyond the mere matter of publishing a condensed statement once a year of total receipts and disbursements, the public knows little or nothing of how all this money is expended. I do not know what the law is in Illinois, but I assume that if that state had a law requiring an itemized monthly publication of school expenditures, *the late* Hon. N. C. Dougherty, of Peoria, would not have been able in five years to steal several hundred thousand dollars from the public school fund.

State organization of newspapers along right lines can accomplish many things of importance, not only to the newspapers themselves, but to the public generally. It seems to me that if the members of this association would organize *state sections* to take up, in their respective states, the work which I have outlined and other matters, it would be a start in the right direction, and would at the same time assist greatly in increasing the prestige, membership and power of the Inland Daily Press Association. We have, in the Inland Daily Press Association, a good thing. We can make our membership in the association a really valuable asset to our properties. It is up to us, gentlemen, individually and collectively to do this and I believe we have started along the right track.

Among the Associations

"In Unity is Strength"

MASTER PRINTERS OF ONTARIO ORGANIZE.

THE result of the meeting of employing printers at St. Catharines, Ontario, Sept. 28-29, was the formation of a permanent organization, under the name of "Master Printers' Guild of Ontario."

The objects stated in the constitution are "To cultivate a fraternal spirit, to ascertain the cost of printing and to reform the abuses in the trade"—all highly commendable.

If the organization can ascertain the cost of printing and establish that cost in a way to be convincing to all employing printers, a work will have been accomplished of inestimable value to the craft. This, so far, has seemed more difficult than any of the famed tasks of Hercules. To merely bring printers to a conscientious consideration of cost will prove no small benefit. There are methods by which an average or approximate cost can be reached in every printing office, but really the only entirely reliable way to fix the cost of a job of printing is to estimate general expenses, as a basis, and then to keep account of every expenditure in time or wages, stock, etc., and add thereto the proper percent of the general expenses, made up of interest on investment, wear and tear of type and machinery, cost of soliciting, bookkeeping, rent, taxes, insurance, superintendence, collecting, light, heat, power, proofreading, changes in copy and so on to the end of the list.

To ask one to estimate accurately in advance the actual cost of a job of printing, is a good deal like asking a physician to estimate in advance the cost of attendanec on a patient ill with a fever, or an artist to tell just how much it will cost him to paint in a satisfactory and artistic manner a landscape with innumerable objects and unknown possibilities and possible hindrances and accidents. Yet it has become the law by custom for printers to furnish ideas, plans and specifications without charge, and then to give a price at which the work will be turned out to the satisfaction of a customer who has no or, at least, a very vague idea of what he wants. Such being the established law of the trade, there is ever an open, unlimited field for study of all the conditions that possibly may enter into the accurate quantity unknowable in advance, to be dealt with when the work is completed. The convention at St. Catharines brought out several valuable and suggestive ideas.

One feature was the display made of specimen printing, and of paper, type and machinery. That so complete and instructive a display was made reflects much credit on the officers and committee having the arrangements in charge. The *Evening Star* said of the exhibit of typographic art and its materials and tools:

Everything conceivable in the art may be seen. There are many exhibits, and one might well spend hours inspecting and viewing the fine workmanship and delicate finish of the various designs and exhibits.

As to the quality of the different displays it would perhaps be out of place to contrast or to compare one with the other, but it is a conceded fact that Messrs. Miller & Richard, having offices in Toronto and Winnipeg, have the leading display. The display is principally composed of various catalogues, folders and designs printed upon the "Optimus"—the high-grade and valuable press, manufactured by the Optimus Printing Press Company. Mr. Charles Creighton, of Toronto, has charge of the exhibits, and he is very courteous and does his best to explain the process of printing as done by means of the "Optimus." Of course, no machinery is on view. In such a case the only way to judge of the merits of the machine is by its work. The work is there in profusion, and the quality is such that upon inspection of it one would be tempted to doubt that it was really the output of a press and not the work of a skilled painter or an expensive camera. A small pamphlet of the American-Hamburg line of steamers contains a couple dozen views of the steamer and it is an exact imitation of photographs. Then again a rainbow is depicted, and so on throughout the whole display.

Messrs. Miller & Richard have also on view samples of work done on the "Colts Armory" platen press, and these also are very pretty and attractive.

The Ault & Wiborg Company has a very neat display of finely illustrated designs completed by the use of its inks.

The display of paper is very large, and the quality is excellent. The J. W. Butler Company, of Chicago, has an elaborated stock of fine linen and other grades of paper. The exhibit attracts considerable attention.

The faces of type are also quite prominently displayed. John Haddon has an exhibit. So, too, has Toronto Type Foundry, and the Inland Type Foundry of St. Louis. The Cox Duplex Company, of Battle Creek, Mich., has an exhibit. The Huber Press Company also occupies space near by the Duplex.

The various other exhibitors have neat and pretty displays, and the whole is most attractive and instructive.

The various other companies displaying work are: The Hamilton Manufacturing Company, Two Rivers, Wis.; United Printing Machinery Company; Dick Matchless Mailer Company; W. O. Hickok, Harrisburg, Pa.; Brown Folder Machinery Company, Erie, Pa.; Oswego Machine Company, Paul Shnidewend Printing Press, Chicago; Wesel Manufacturing Company, New York; Van Allens & Boughton, New York; Dexter Folder Company, Providence, R. I.; H. C. Hansen, Bostou; Inland Printer School, Chicago; Canadian Newspaper Syndicate, Montreal; Review, Peterboro; Monotype Company, New York; Canada Paper Company, Montreal; Royal Engraving House, Toronto; Peter Paul & Son, Buffalo; J. L. Morrison Company; *American Printer*, New York; *British Printer;* Seybold Machinery Company; T. J. Vallentine, New York; Tubbs Manufacturing Company, Toddington, Mich.; American Type Founders; Barnhart Bros. & Spindler, Chicago; Campbell Press Company; McLean Publishing Company, Toronto; Niagara Paper Company, Lockport, N. Y.

This is little more than an enumeration, but suggests the very wide interest displayed and the possibilities and educational value of such exhibits in connection with conventions of newspaper publishers and employing printers.

Of the papers and addresses the St. Catharines *Evening Journal* gave brief outlines:

OF ORGANIZATION.

Mr. Keyes said that the master printers of Ontario felt the need of organization. The Canadian Press Association deals largely with questions that affect the publisher rather than with those of the master printer, and, in fact, the printer who does not publish a newspaper is not eligible for member-

ship in that body, which already has more to deal with than it can handle. St. Catharines was the birthplace of the electric railway, and of the sewing machine, and the first place to export salt, and now, he hoped, would become the birthplace of a national guild of master printers that would stand for power, energy, industry and the vitality of the printing business.

The art of printing has not made very marked progress since the Bible which is now in the British Museum was printed by Guttenburg, a fact that may be attributed to trade jealousy, distrust, lack of harmony and lack of collective effort.

The competitive price problem is a serious one that a national guild would help to solve and likewise the apprentice question.

NEWSPAPER ADVERTISING.

Mr. W. J. Taylor, of Woodstock, read an able paper on "Newspaper Advertising."

He said in part that newspaper advertising is the easiest medium by which the business man can reach the public. Advertising that runs from day to day in the same form without changing is valueless, and will not bring the advertiser proper returns from his investment. The advertisement in which sporting people are interested should appear on the sporting page and that which attracts women on the women's page. Position is important also, and should be arranged to give each advertiser equally. He would pay more attention to the position occupied by the small advertiser than the big fellow. The question of price and a uniform rate to every advertiser was strongly insisted on by Mr. Taylor.

A very vigorous discussion followed this paper and on motion a hearty vote of thanks was given to Mr. Taylor, after which the meeting adjourned.

COMPOSITION A SCIENCE.

Mr. Frederic Helmer, designer, of Lockport, N. Y., treated of "Composition a Possible Science." This gentleman is an expert designer. He traced the growth of language, both written and spoken, defining modern printing as an art "preservative."

The printer today is the orator of yesterday, spaces having superseded pauses, and gestures having given place to designs and devices.

Display has two aims, viz., to attract attention and to interpret the copy, so that all classes of readers may understand through the first impression.

PRINTING AS A BUSINESS.

Mr. J. Clyde Oswald, of New York, gave an interesting address on "Printing as a Business," giving reasons why the business does not pay as it should on account of the great risk involved owing to the work being done entirely to order, making it impossible to manufacture goods ahead in dull times, and the fact that when completed the work has no commercial value to anyone but the person or firm by whom it has been ordered. He also dealt with the question of "Getting Orders," "Producing Work," and "Looking After Finances." His address was full of sound advice to master printers and was thoroughly appreciated.

KANSAS EDITORIAL PARTY.
Enjoying the hospitality of Boise, Idaho, August 12, 1905, on their return trip from the Portland Exposition.

ADVERTISING.

Mr. Harry A. Woodworth, of Toronto, gave a short address on "Advertising," but he managed to crowd some good, sound advice into his remarks which the delegates would do well to follow.

The president, vice-president and secretary were appointed a committee to prepare a code of by-laws to be submitted to the annual meeting in May.

The following named officers were elected:

President—W. B. Burgoyne, St. Catharines.

Vice-President—R. H. McBride, Toronto.

Secretary—W. J. Keyes, St. Catharines.

Treasurer—F. H. Dobbin, Peterboro.

Directors—A. C. Woodward, Chatham; H. J. Jones, London; R. A. Robertson, Hamilton; A. E. Bradwin, Blyth; W. J. Taylor, Woodstock; H. P. Moore, Acton; Geo. H. Wheeler, Toronto; M. Esdaile, Ottawa; Mr. Jackson, Kingston, and M. Williams, Collingwood. The elections were all by acclamation.

Toronto was unanimously agreed upon as the next place of meeting.

THE TRADE PRESS.

The Chicago Trade Press Association, of which J. Newton Nind, editor of the *Furniture Journal,* is president, is one of the most model, useful and successful of local organizations of publishers and editors. Monthly meetings are held at the Hamilton Club, Chicago. The members assemble at 6:30 p. m., break bread together in the way of table d'hote dinner, and then proceed to business and discussions.

At the September meeting each member was requested to write out questions to be read and to be answered by other members and to form the basis of discussions. The questions were numerous and practical and brought out many valuable answers and animated talks that showed these trade paper people to be enthusiastic and thoroughly up to the highest standard in the publishing business. The trade or class papers have advanced wonderfully in the last decade of years, and they are doing most efficient work for the different callings. They are the evangels of progress, gathering useful knowledge from all available sources and disseminating the same, with helpful views and comments to the progressive members of the various callings. The man who takes and reads the papers devoted to his calling proves himself wise and is the one who succeeds. He keeps up with the times and is most valuable to the community and to all whom he serves, as well as to the manufacturers and dealers who furnish the best material, paper, types, presses and all other appliances for successful accomplishment. There is, now, not a single worthy industrial calling but that has its trade paper, representing its best and highest interests and keeping its successful up-to-date readers posted as to all the improvements, inventions, profitable experiments, theories, practices and all the best methods of profitable service, production and business management. These papers have not only come to be of incalculable value to their readers, but many of them have developed into splendid properties for their owners, giving large and substantial returns and worth many thousands of dollars. Their proper conduct requires broad knowledge, wide experience, careful training, great ability and untiring industry. It is not strange, then, when the men at the heads of a number of these publications for the several leading callings of life, as editors, publishers or business managers, get together for mutual improvement, through the exchange of experiences, views, methods and theories, that great profit to each and all should result.

Thought elicits thought, as steel sharpeneth steel, so do active, earnest minds, brought in contact, sharpen each the other.

On this occasion members were requested to bring copies of their several publications for examination and comparison. The questions covered a wide range, as to circulation, the use of sample copies and their value to advertisers, and the sending of papers to prospective advertisers, postal rules, general advertising, etc., etc.

The leading topic before this association at its October meeting, "The Daily Trade Newspaper," is an illustration of how trade journalism has expanded. Hugh M. Wilson, president of the Railway Age Company, related his experiences attending the publication of a daily edition of the *Railway Age* during the conventions of the Master Car Builders' Association and the Railway Master Mechanics' Association, and publishers of other daily trade papers gave a resume of their experiences.

* * *

A man may be a cynic, but the man who delights in saying cynical things is not a cynic. He is a conceited ass.

In life we cannot always strike the dominant chord, but we can vibrate in sympathy when the right note is struck by others, and in this way swell the grand harmony.

INLAND DAILY PRESS.

This association had an exceedingly profitable meeting at the Chicago Press Club Room on October 17. One of the first topics discussed was as to the accepting of plate matter sent out by political party managers to be published in the newspapers. Mr. A. H. Lowrie, of the Elgin, Ill., *Daily News,* introduced a resolution opposed to this system of party advertising at the expense of the newspapers. After an earnest debate the resolution was adopted. The members were pretty evenly divided. One side argued that when publishers, with no little labor and expense, had built up a newspaper until the columns had become valuable for advertising purposes, to advance either political or commercial interests, that the publishers should receive proper compensation for their use, and that it was not fair for this money to go to plate and ready print houses with no reward to the newspapers. Others claimed to be glad to receive any acceptable political matter, in plates, such as they desired, favoring their own party, and saving by them the cost of composition. It was argued against this view that plate matter was not carefully scrutinized by publishers or editors, and for that reason matter found place in newspapers that the editor would not otherwise have permitted or used; that the editor ought to write political matter from his own standpoint and of his own initiative and not take the stereotyped, ready prepared expressions of politicians or political managers or committees. The action taken was treated only as an expression of opinion, and not as binding, as to any course that might be chosen by individual members.

A number of new members were elected and communications of inquiry from other publishers contemplating membership were read. The membership is now the largest in the history of the association and rapidly increasing.

A very advantageous contract has been made for paper. Some of the members claim to save $1,000 a year through this organization, while membership only costs $5.

Mr. A. W. Lee, of the *Daily Courier,* Ottumwa, Iowa, read an able paper on the topic, "The Benefit of Newspaper Organization for Self-Preservation." The address was well received and, on motion of Past President A. W. Glessner, of the Galena *Daily Gazette,* duly seconded and carried by unanimous vote, was ordered published in the NATIONAL PRINTER-JOURNALIST, with the consent of Mr. Lee. The paper appears in full elsewhere in this issue. Mr. George Olmstead, of J. W. Butler Paper Company, read an address on "The Paper Market," in which he said:

Judging from the topic you have selceted for me, I infer you are anxious to become possessed of some of those secrets which it is popularly believed surround the making of the market on white newspaper stock. If I am correct in this inference I can only plead for our company the school boy's excuse, "not prepared," for, being an independent institution, and outside the charmed circle, business courtesy forbids our divulging any of the inside workings thereof with which we might be familiar. None of us, of course, will lose sight of the fact that there are certain natural conditions and fundamental principles which regulate the market price of any commodity, the chief of which is the unalterable law of supply and demand. The strenuous times in which we live have resulted in a tremendous increase in the consumption of white newspaper stock, but the production has kept full pace with the consumption—in fact, at the present time, somewhat exceeds it. We must remember that, in addition to the many new and modern mills built in recent years, most of the old mills have found it necessary to rebuild, throwing out their small, old style machinery and installing wide, fast-running machines, producing twice the paper possible under the old conditions.

The demand for paper made upon us by foreign countries, or, in other words, our export business, has in a large measure taken up whatever of overproduction there may have been

in the past and will undoubtedly continue to be the safety valve protecting the interests of the American manufacturer.

Two very important factors, which will appreciably influence the future situation on news, are the lack of available waterpowers and the shortage of raw materials. These are the all-essentials in the newspaper making industry and unless some suitable material other than wood is found, the future looks dark and our posterity may have troubles we know not of. Right in this connection, I might add, that had we imitated the Germans and some of the other foreign nations, and taken steps early in our history to preserve our vast tracts of timber, we would not now be on the verge of bankruptcy, in that, one of nature's greatest and most beneficent gifts. Possibly it is not surprising that our forefathers, seeing at every hand their apparently unlimited resources, should have become prodigal in their development of those resources, but the responsibility must rest on this and succeeding generations to practice that strict order of economy and regard for the future which experience teaches is our only safeguard against worry and want. I was pleased to notice in last Sunday's papers that the Canadian government has called a convention, to which our various forestry commissions are invited, whose duty it will be to advise and outline drastic measures for the protection of growing, and the production of new timber.

The present prevailing price of newspaper is low—abnormally low—considering the cost of material and manufacture and when you are reminded that today's price is lower than that of five years ago, with material and labor much higher, you will understand why some of the less favorably situated mill owners are wearing "A scowl that won't come off." Competition is the life of trade and when wholesome, and not demoralizing in its effect, establishes a market price that is both legitimate and equitable to all concerned. The newspaper publishers of the country, as large consumers of white paper, are entitled at all times to a just and reasonable rate of cost, based on actual and natural conditions, and not on fictitious influences seeking to control a product in which we are all so vitally interested. At one time it was contended that so many abuses had crept into the news print trade as to make some order of salutary control necessary. Whether this be so or not, we do know that there was a time when a manufacturer, after selling his paper, hardly knew what he would get for it. Those were the days of allowances for white waste and when paper was paid for on a production basis, figuring the exact number of papers to the pound. The publisher must appreciate that papermaking is not an exact science, and probably never will be, and this is sufficient excuse for paper not always being uniform in color, finish, weight, etc. What the consumer of paper, or publisher, should try to do is to place his business in the hands of one who will be ever watchful of his patrons' interests and who is appreciative of those nice points in the detail of manufacture which alone insures a high class and satisfactory product.

We should all strive to promote a closer relationship and a better understanding between the publisher and the manufacturer, and this accomplished some of our troubles certainly will fade away. I think you must share this same feeling, as otherwise you would hardly have invited a dealer here to discuss with you these subjects of mutual interest.

Mr. W. H. Fitzgerald spoke on the subject, "Rural Route Subscribers and How to Obtain Them." His paper brought out many valuable remarks, from which it appeared that, by placing the daily to rural route subscribers at a low figure, by the year, the list of daily subscribers could be increased almost to the extent of the previous circulation of the weekly edition, and the increased price for, and the greater amount of, advertising secured for the daily, on its increased circulation, would result in increased profits. The free daily rural route delivery has resulted in a very great increase in the demand for daily papers. The farmers are especially interested in reading the daily markets, both local and general.

BARNES-CROSBY COMPANY'S EXHIBIT AT THE ADVERTISING SHOW.
Monogram sign represents a metal base cut. This elaborate sign was painted on burlap by the Barnes-Crosby art department, and showed great care and artistic ability.

Other topics came up for consideration. Among these, the open shop. It was argued that any one who signed the closed shop agreement became a party to a monopoly and was a violator of the laws of the land. One publisher, operating Linotypes, had conceded the eight-hour day on the striking out of the closed shop clause, and had entered into an agreement with printers for the open shop.

A committee was appointed to prepare subjects for the next meeting, which it is expected to make an especially interesting and profitable occasion.

THE ADVERTISING SHOW.

The wonderful advance of, and the universal interest in, the science and practice of advertising had a striking illustration through the first annual advertising show in the great Coliseum, Chicago, October 11-18. Tens of thousands of people thronged the great building to look at the ingenious and artistic advertising displays and, on the last night, the throng was so great that it was difficult to move in any direction. Over 9,000 people were admitted the first day. The interest was kept up and seemed to grow each day and night until, on Tuesday night, the attendance reached 36,000 and on Wednesday, the closing night, this record was broken by the admission of over 50,000 visitors and thousands were turned away.

The attendance showed the value of good advertising, for the exhibition had been thoroughly advertised. Mr. Charles H. Jones, president of the National Federation of Advertising Clubs, said, among other things, in speaking of the reception given to this model exhibition and its results:

The show accomplished much more than bringing the crowds to see the exhibits. Above all, it accomplished this: It advertised advertising with unprecedented force. It did much for the advertising profession. At the same time it popularized and elevated advertising. It showed what advertising really was doing and what it was accomplishing in the business world.

A strong feature of the exhibition was the fact that it showed to the advertising pessimist, who always has said, "You don't sell me anything when you sell me advertising," the real value of such publicity. By seeing the exhibits he is compelled to recognize the tangible "isms" of advertising. I have talked with all the exhibiters of the show, and they have only praise for it. Many have taken orders for advertising. One "ad" firm sold one bill for $15,000.

The show struck a distinctly popular vein. Many women visited the Coliseum. I asked one young woman what interest she had in looking at the exhibits. She told me that she was a stenographer and that she wrote letters about advertising, but knew little concerning the real importance of it. "I came to learn something of the advertising work—to see what it is," she said to me. That is the way with thousands of people who came to the Coliseum during the week.

The exhibitors have shown that advertising is a commodity and that it is worthy of consideration. The show has brought the various forms of advertising together, so that buyers might have a chance of comparing them. This is an important point in favor of the annual exhibition, for it brings all kinds of advertising before the eyes of the people, that they may choose their season's buying. The show also brings into harmony all alleged conflicting advertising interests. It demonstrates that there really are no conflicting interests in advertising. Each kind has its place.

That the show has been a great success and will be a greater success next year is proven by the fact that 50 per cent of the floor space for the second exhibition already has been sold.

The National Federation of Advertising clubs promises to be phenomenally successful, too. We have over a thousand members now, including the clubs of all the large cities. We are believers in the advertising show and we intend it to become a great factor in promoting all advertising interests. The strong point of the federation is that it will unite all classes of business men in one common cause. No other organization ever made this possible. Thus the national society presents a great opportunity to the business men of the country, and to advertisers everywhere. It will bring out the sectional advertising interests all over the country and will help bring American products before the American people.

In a "Model Printing Office," A. F. Wanner & Co. made a very attractive exhibit that drew much attention and was inspected by thousands of members of the craft. Our half-tone illustration gives a pretty good idea of the arrangement and the articles displayed. It was an operating plant, things being done, and hence held interested attention. Among the exhibits of especial interest to members of the printing and allied trades were the exhibits by designers, illustrators, engravers and electrotypers. These held first place by reason of numbers, beauty, variety and completeness. No adequate description can be given. They were made up of thousands of samples of work. Among the prominent exhibitions in these lines were the following:

Barnes-Crosby Company, 215 Madison, Chicago; Binner-Wells Company, 309 Michigan boulevard, Chicago; Farkas Bros., 822 Schiller building, Chicago; the Franklin Company, 346 Dearborn, Chicago; Hemsberger Bros., Railway Exchange building, Chicago; Osgood Bros., 66 Sherman, Chicago.

Illustrations of two of the most important of these exhibits, those of Barnes-Crosby Company and the Franklin Company, are given herewith. Both were very complete and attracted flattering attention and favorable comment. The souvenirs given out were much sought after. The reduced views, however, give poor ideas of the many designs and illustrations printed in colors—many of them as handsome and artistic as fine oil paintings.

The Franklin Company people were wise in the recognition of the fact that people like to be showed, and, hence, installed a complete electrotyping plant, carrying on all the phases of electrotyping from start to finish. Engraving was shown in all stages, giving an opportunity to advertisers to become familiar with the various effects to be secured and the most suitable screens to be used for printing on the various grades of paper. Another interesting feature was a printing press upon which many varieties of attractive calendars were printed. Two fine souvenirs, one a pocket piece medal, produced by the electrotyping process at this exhibit, and a half-tone print of Benjamin Franklin on copper, were given out.

R. R. Donnelly Sons Company made a very complete and satisfactory exhibit, as is well shown in the illustration presented in this article. Advertisers' journals were well repre-

DISPLAY BY R. R. DONNELLEY & SONS CO.

ENGRAVING PLANT EXHIBIT OF THE FRANKLIN COMPANY.

A. F. WANNER'S MODEL PRINTING OFFICE.

sented, *Profitable Advertising* and *Ad Sense* making especially large and artistic exhibits. The last named publication conducted a most creditable daily paper during the exposition, called the *Daily Advertiser*, in which interesting reviews were given of the exhibits and many catchy points and valuable ideas were given. All the Chicago dailies showed commendable enterprise in their displays.

The Y. M. C. A. Institute made a good showing of the School of Advertising Design and Commercial Arts. It would be pleasant and profitable not only to mention but to describe all the exhibits, but this is impossible.

Incidental to the exposition was the formation of an association under the name American Federation of Advertising Clubs. Article 2 of the constitution, which defines the objects, and is as follows, might well be used as a model of statement for many other organizations:

"The purpose of this organization shall be to unify the advertising clubs and associations in a central body for the purpose of furthering the best interests of advertising; to assist in the development of new advertisers; promote harmony and good fellowship between different advertising interests; to disseminate information regarding the business of advertising; to harmonize conflicting interests, and to assist in the formation of local clubs; and, in general, to bring about, by co-operation, a better acquaintanceship between different interests, and the best possible results for all concerned."

The following suggestive and instructive objects were enumerated in the prospectus and will repay study and thought:

"First. To advertise the power and value of advertising.

"Second. To advance the advertising profession.

"Third. To assist in the formation of local clubs.

"Fourth. To encourage the interchange of courtesies between various local organizations and their members.

"Fifth. To disseminate information regarding the possibilities of non-advertised enterprises and to promote the best interests of buyers of advertising.

"Sixth. To exchange creative ideas in advertising.

"Seventh. To promote increased co-operation between the sales and advertising departments.

"Eighth. To endeavor to harmonize conflicting interests.

"Ninth. To assist in the development of the small advertiser.

"Tenth. To bring about a greater realization of the importance of advertising departments."

Those two go together.

"And lastly—to gather statistics for the uses of local organizations."

Many, if not all, of these objects would be appropriate for all organizations of newspaper makers or publishers. Advertising and its proper understanding, conduct and exploitation are the basis of all worthy modern newspaper success.

* * *

Dr. Wm. J. White has for fifty years been identified with his chosen field of work in Georgia, either teacher, preacher or editor, and all three combined, for who has a greater opportunity to teach and preach than has the editor? On Oct. 11 past he celebrated the twenty-fifth anniversary of his paper, the *Georgia Baptist*. The anniversary of his fifty years of service and his twenty-five years as an editor was made a great event by his numerous friends, with songs and addresses. They did not wait until his death to say kind words about him, but spoke in terms of eloquent eulogy of him "as a citizen," "as a minister," "as a pastor" and "as an editor," and which was more substantial, if not more grateful, presented him with a well filled purse.

The best way to disappoint a person who is trying to make you mad is not to get mad.

A MODEL PLANT.

He who builds up a useful manufacturing establishment is a much more valuable member of society than he who merely amasses a fortune or than one who holds some public office, merely exercising the official functions of administration in the affairs of a city, state or nation, however much opportunity for good influence high position may afford. Political positions may come largely through fortunate circumstances, through combination, through unworthy personal political services to others, or through a score of other methods that indicate little merit. The establishing of a great factory or useful industry that affords profitable employment and produces real wealth or the means for increasing useful products, requires, first, ability and training, then industry, persistency, honest purpose and systematic management, planning and orderly work. Great success in every industry is the product of highest worthiness and great merit. The man must make good every

BUSINESS OFFICE.

time. The history of the F. Wesel Manufacturing Company, of the celebration of the twenty-fifth anniversary of which we spoke at some length in the October issue of this journal, illustrates these facts and principles.

HISTORICAL.

A history of the F. Wesel Manufacturing Company is a history of the business career of its President and General Manager, Mr. Ferdinand Wesel, for the company and its success is due alone to Mr. Wesel's thorough mechanical training, business acumen and the pertinacity he has shown in conducting the affairs of his company.

Mr. Wesel is a native of Germany, having been born in Frankfurt a. M. in 1846. He learned the trade of a printing machinery machinist and came to this country in 1866. For two years he worked in various shops in New York and in 1868 was employed by R. Hoe & Co. His work here attracted the attention of Colonel Richard Hoe, who recognized Mr. Wesel's mechanical and executive abilities by placing him in charge of one of the manufacturing departments. He continued with R. Hoe & Co. for twelve years and left them only to go into business for himself. In 1880 he entered into a co-partnership arrangement with Mr. F. Schley, under the firm name of F. Wesel & Co. The business was conducted and goods manufactured in a small loft at No. 12 Elm street, Manhattan, the entire floor space being under 800 square feet. The list of articles manufactured consisted of brass and steel rule, stereotype blocks, chases and galleys, although a general line of printers' goods was carried and a specialty was made of repairing printing machinery. In 1881 it was found necessary to obtain larger quarters and the business was moved to 178 William street. Growing business again caused a removal to 18 Spruce street in 1883, where it remained until a fire caused its removal to larger quarters at 11 Spruce street in 1885, and by May, 1887, the business had grown until it occupied the entire five floors and two basements of this building.

In 1889 the business was incorporated under the laws of the State of New York with Mr. Wesel as President and General Manager and Mr. Emil Stephany as Secretary-Treasurer. From this time on Mr. Wesel devoted most of his time

VICE PRES'T & ASS'T. MGR.
EMIL STEPHANY
SEC. & TREAS.

to the manufacturing and selling end of the business, Mr. Stephany relieving him of the arduous duties connected with looking after the financial department.

Mr. Stephany was born at Darmstadt, Germany, in the year 1853, and came to this country in 1870. He first became identified with the company in 1887, and by practical business methods, constant attention and indefatigable application has won for himself the entire confidence of his company, and of its many customers.

At a meeting of the stockholders of the company held in May, 1904, the office of Vice President was created and Mr. F. Wesel, Jr., was elected to fill the position. Mr. Wesel, Jr., is a native of this country, having been born in New York in 1876. After graduating from public school he continued his studies at Worcester, Mass., and at the Pratt Institute, Brooklyn. He then put in three years in the factory, afterwards taking a mechanical engineering course at the Technicum Holzminden, Hanover, Germany. Returning to this country

DYNAMO AND ENGINE ROOM.

he entered the draughting department as head draughtsman and from here he went into the factory as Assistant Superintendent. He served in this capacity until elected Vice President of the company.

In 1892 the Spruce street building became entirely too small for the proper conduct of the business and the company purchased the old 23d Regiment Armory at the corner of Cranberry and Henry streets, Brooklyn, very close to the Brooklyn entrance of the Brooklyn Bridge. The building was entirely remodeled inside, and with the increased manufacturing facilities thus offered the volume of business took a forward bound. In 1896 the premises at No. 11 Spruce street, which had formerly been sufficient for both salesrooms and factory, were found to be inadequate for salesrooms alone, and the ground floor and two basements at Nos. 82 to 84 Fulton street were leased. In 1899 a four-story building having two basements, standing on the corner of Cranberry and Henry streets, directly opposite the first factory, was purchased, thus increasing the manufacturing floor space just 50 per cent.

In 1901 a Western branch salesroom was opened at No. 310 Dearborn street, Chicago, and by the spring of 1904 the volume of business had increased to such an extent that it was determined to more than double the floor space of the

SMALL TOOL DEPARTMENT.

old armory building, and contracts were let for the present commodious building. The improvements were practically completed by February, 1905, and the several manufacturing departments which formerly occupied the smaller building on the other corner were moved into their new quarters.

During the fall of 1904 a branch store was opened at 124 South Eighth street, Philadelphia, thus placing complete stocks in the three most thickly populated centers of the United States.

At the present writing the floor space occupied, including Philadelphia and Chicago stores, amounts to 104,000 square feet, every inch of which is used to its full capacity.

The factory has lessons beyond this record of the life of its founder, and the demonstration of this well founded opinion, demonstrated by the thorough industrial training of his son and the giving to him the best possible education in the

ELECTRIC WELDING DEPARTMENT.

mechanic arts. Everything in the methodical, orderly arrangement and conduct of the establishment has an important lesson. We have sought through illustrations to call attention more forcibly to the up-to-date, perfect system and the appliances used. We need to add to these but little by the way of descriptions.

A passenger elevator gives quick service between the different departments. A spacious court furnishes an abundance of light for the interior of the building; thus every room is lighted on from three to four sides. Located on the second floor in the new west wing are the general offices and counting room. The visitor steps from the hall into a large waiting room furnished with show cases, chairs and a special table with writing materials, trade publications, etc. In this room is the private telephone exchange which is served by three trunk lines from the city exchange. Every foreman and department has one or more telephones, each quickly connected with the local and long distance service of the city and country.

The president's private office, as well as the main office and counting room, opens off from the waiting room. The secretary-treasurer's desk is located in this room and the department is under his personal supervision. The counting room is partitioned off from the main room and everything arranged in the most simple manner possible in order to facilitate the rapid handling of business. The president's private office is entered from the general office room, and also from the waiting room. At the rear of the general offices is located the draughting department and the superintendent's office.

The illustration of the main dynamo and engine room shows it under actual conditions. Each dynamo and engine is used on alternate days, the maintenance of a double equipment in this department insuring the plant against a shut-down in event of any accident or the necessity arising of making repairs to either one of the units. The current generated here is distributed to the different manufacturing departments through eight marble switchboards, there being slightly over 200 motors in use, their combined indicated capacity being somewhat in excess of 400 horsepower, in addition to 600 incandescent lamps of 16-candle power each and ten arc lights of 160-candle power each.

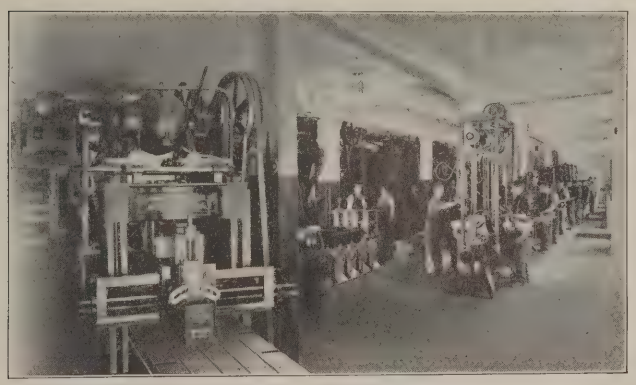
At one side of the dynamo room is located a small storage battery where the surplus current is stored for use in the lighting system after working hours. The battery has a capacity of forty amperes for eight hours, or sufficient to

run 160 16-candle power incandescent lights for that period of time.

The mind of the average manufacturer has become so used to the appearance of belt-driven plants that the exact reproduction of an individual electrical motor driven plant produces an impression of emptiness, although there may be 50 per cent more machines in use by the latter system. The uninterrupted and well diffused light permitted by the individual electrical drive is not the least of the economies of the system. The principal economy gained by using the individual electric drive is the great saving in the amount of power used and the increase in output permitted by the large speed variations of each machine. Although the motors used throughout the factory are in excess of 400 indicated horsepower, the average load carried by the dynamos is somewhere in the neighborhood of 150 horsepower. From previous experience it would be safe to say that the same machines driven by shafting and belts would require the constant consumption of power equal to 300 horsepower. The individual electrical drive, therefore, shows a saving of about 50 per cent. It must be remembered, however, that at times, say with a heavy run on electric welded chases, the power consumption may run as high as 300 horsepower, but the machines causing this increase being intermittent in their use, the consumption of power is not constant.

Individually motor driven machines run steadier and at a uniformly higher speed than when mechanically driven, the increase in output being variously estimated at from 10 to 30 per centum.

Modern research has made electrical engineering such an exact science that the individual electric drive is admitted to be the most reliable. It permits of the subdivision of the plant in such a manner that only a small portion can at any time get out of order; machines automatically adjust themselves to the work, thus eliminating all chances of breakdown from sudden or overload; the control of machines is absolute and instantaneous, each machine is a unit, independent of its fellow, and can be placed in any position desired or be changed to suit varying requirements. In this connection special attention is called to the view of the small tool department, shown



PLANER DEPARTMENT.

This view shows the line of milling machines and shapers in the Planer Department, and also the rear of the long line of planers.

on page 798. The arrangement of the milling machines in this room provides the best possible light on the work and at the same time permits seven machines to be operated in the space otherwise necessary for the operation of but five machines of the same size. This feature alone is equal to an increase in floor space of just 40 per cent over a belt driven plant. It will therefore be realized that a manufacturing equipment as illustrated herein certainly gives immense advantages.

* * *

There has come to our desk a souvenir booklet illustrating and describing French Lick Springs, Ind., in a way to show the place to be a very Eden of loveliness and delight. It has been proposed to hold the next meeting of the executive committee of the N. E. A. at this fascinating resort. It will be delightful there during the first week in February. The place is easily accessible. It is in southern Indiana almost within sight of the Kentucky line and is located amidst most charming and picturesque surroundings of hills and dales, billowy forests and purling brooks.

REPORT ON NEBRASKA LEGISLATION.

During the session of the Nebraska legislature a number of bills were introduced affecting newspapers. Some of these were more or less friendly and some particularly unfriendly. The one which passed, however, was rushed through at the closing hours and was meant to be most unfriendly of the bunch. It was also the shortest and was as follows: "That no person in this state shall be compelled to pay for any newspaper, magazine or other publication which shall be mailed or sent to him without having subscribed for, or ordered, the same, or which shall be mailed or sent to him after the time of his subscription or order therefor has expired, notwithstanding that he may have received the same." No attention should be paid to the opening clause, for no publisher can have a legal or moral right to send a newspaper to an individual and try to collect for same unless he was a bona fide subscriber in the first place. So this bill could not alter the general common law principles in that regard. The clause, "or which shall be mailed to him after the time of his subscription or order therefor expires" demands attention. When does a subscription expire! Not necessarily when the time comes to which the party has paid. Not necessarily at the end of the first year. It is for the publisher, however, if he desires to do a credit business to have an understanding with his subscriber in particular and his subscribers in general, and to some extent that understanding should be from the beginning:

First. It is barely possible that if the publisher with his present established list has been receiving at irregular intervals a year or more subscription, at times when the year expires and at times a few weeks or months after that, he could establish the fact that the contract was made that the paper should continue until ordered discontinued and no legislature should or could attempt to interfere with the right of private contract.

Second. With new subscribers the understanding should be had at the time the subscription is taken that he was expected to remain a subscriber until the order came to discontinue.

Your committee would suggest that on every receipt and on every dun should be placed something about as follows:

"All contracts are made with the express agreement that the subscriber is to continue in that relation until the publisher is requested to discontinue the same unless such request is made at the time the paper is ordered. We do not object to extending a reasonable credit to proper parties, but all accounts should be settled at least once each year."

Of course the latter sentence can be omitted or the language could be changed to suit the idea of the publisher. If this could be printed in the newspaper where the subscription price appears it would be simply to fortify the publisher in his claim and no honorable subscriber would probably contest the matter. It will be some time before a large percentage of the subscribers find out that the statute exists, but publishers should begin at once to have their contracts so made and to educate the public so as to reduce the trouble to a minimum.

The State Press Association will probably never care to make a test case where the circumstances are less favorable to the publisher than can be made by following these instructions.

Yours for the Nebraska Press Association.

D. M. Butler,
F. O. Edgecomb,

Legal Committee Nebraska Press Association.

MORE WORK THROUGH PUBLICITY

BY HARRY A. WOODWORTH

Address all Communications for this Department to
349 Jarvis Street, Toronto, Canada

The system under which I am compelled to labor—in various workshops, and not in a fine home library, where every piece of printed matter is held as sacred by the guardian spirits of the domicile—is indirectly responsible for a regrettable happening this month. During my absence from an office, when I was indulging in the luxury of a brief illness, a large box which contained the most of the matter I intended to review for this and the Christmas issue, was wantonly emptied—I understand by one of those good women who do not see any use in keeping stray pieces of printed matter which are nothing but mere advertisements, even though they are evidently regarded as being of sufficient value to be placed in a box, even though it have not the outward appearance of a treasure chest.

The box contained a large amount of Christmas and New Year work held over from last year, through which it was thought some advance holiday suggestions might be given in this number.

It also contained all the work I had on hand (with the exception of one or two specimens which arrived later, and are treated of in this number) of new contributors, whose work has never been reviewed in this department, all of whom I wished to be represented in the next two or three issues. I like to treat the work of new contributors as fully as possible, and so sometimes delay giving them attention. While saying this, I also wish to record my thanks to those who have been such faithful contributors, many for several years, and who have consequently done much for their fellows by the excellent suggestions to be obtained from this work. I should hate not to be able to acknowledge the work of any contributor to this department, and I would wish to state that, in regard to any one who has sent work in to me which has not been reviewed, that I simply have not their work on hand, chiefly because of this accident, partly because of a former loss which was the fault of the postoffice department either of Canada or the United States. I have also received letters stating that jobs had been sent which never came to hand.

It would, therefore, be a very graceful act on the part of any who miss comment on their work up to the present time, to see that the department obtains the missing jobs, or others in their place, if it is not possible to duplicate them. And your petitioner will ever humbly pray—especially that there be no more such losses, which would try the patience of one of the old-time martyrs.

* * *

Some excellent work comes from the Bishop Press, of Kansas City, Mo. That a calendar which has no picture whatever may be such a thing of beauty as to rejoice the eyes of those who love pretty things, is evident from the commendations made of a small calendar issued by this firm by a number of ladies who saw it. "How pretty!" they all said. And yet its beauty depended solely on a plain initial, a good color scheme (including the tint furnished by an oblong tint block) and really tasteful straight-along composition in two sizes of capitals. Art in typography attracts, even though not accompanied by art in illustration or fantastic ornamentation.

A very neat little booklet, which comes in a very neat little envelope, is issued by The Regan Printing House, Chicago. It is entitled "Small Work," and contains a pleasing essay on "Small Things." As they say:

> There is scarcely any necessity in this little booklet to refer to the unsurpassed facilities for large work of the house; it is generally known and understood, but our adaptation for small work is not so well known. That is the reason for issuing this little booklet.
>
> Though we want your small work, there is nothing small about the Regan Printing House.

This should give an idea to some of the larger printing houses who would be thankful for small favors.

* * *

The Matthews-Northrup Works, of Buffalo and New York, send a copy of *Academy Notes*, which they print and publish. It has to do with the Buffalo Fine Arts Academy. The press-work on this publication may aptly be called magnificent, for it *magnifies* the artistic qualities of the art work it is its mission to reproduce. A particularly fine bit of printing-advertising is that on the "back page of cover." Below a fine picture of Rembrandt are these words, which are so suggestive and so good, in connection with work that bears them out, that I am sorry that a cut would far fail to do justice to the Rembrandt style of printing, and so would better not be used, though it would serve to show the taking arrangement. The initials of the Old English words "How Rembrandt Would Print" are in a light brown; the rest of the text is a very dark brown, which two colors combine perfectly in the picture of Rembrandt, and also of the tower of Madison Square Garden, where the New York offices of the firm are. The stock is brown likewise—and so everything about the job has the harmony of complement.

The following is the text of the advertisement, which is an example of a very interesting description of art printing:

AS REMBRANDT WOULD PRINT.

"You print just as Rembrandt painted; you should call your new process the Rembrandt process," said the professor of painting in the Buffalo Art School to the head of *The Complete Press*. Thence the name. The great possibilities of the process in reproducing the strong modeling and rich effects of oil paintings as they have never been reproduced before is shown in the engraving of the great painter above. As artists say, the values are kept by these reproductions on dark paper as they have never been kept in reproductions where the thin cold effect of white paper showing through black ink was ever present.

But the field of a process which would only reproduce a certain type of oil paintings better than ever before would be but limited. It gives a reproduction of a photograph which is stronger and better even than the photograph itself. This verdict was given by a highly-skilled photographer.

The Rembrandt process is so new that its full capabilities are not yet possible of statement. Some things are quite definite in the minds of its originators. It permits of the use of material in printing halftones which has never before been available. Beautiful covers can be made by it on dark paper of rich texture. Photographs can be reproduced by it with the full sepia or platinum effect, and at very moderate cost in quantities.

The "prismaprint" is another process owned by The Matthews-Northrup Works at Buffalo and New York. A prismaprint is so called because it uses the brilliant colors of the prism in printing, and thus gets light and brilliancy and atmosphere into its effects, as is shown by the specimens on the inside pages. The prismaprint has bright light greens and blues and grays and violets. No three-color print can have all of these. Something has to be sacrificed, for one, at least, of its colors is heavy and dense, and generally both the red and the blue are heavy and dark.

Any advertising that is likely to be considered—by anyone—an unwarrantable intrusion on a man's—or a woman's—time, is bad advertising for a printer, or anyone else.

The other day I received a letter inclosed in an envelope whose corner bore the printed address of a Pennsylvania dentist. I opened it, and found the inclosed letter a reproduction of a testimonial sent to the Philadelphia *Evening Bulletin*—a paper which does some of the best advertising of a newspaper done anywhere—by a dentist who had been benefited by advertising in its columns. Now, even I, to whom such work is naturally sent for my criticism, felt the unpleasant sensation of being fooled by this bit of advertising. And an advertisement should never be designed that is likely to give rise to such impressions.

* * *

There appears to be a Texan typography—a distinctive style that pertains to the better class of the print shops of Texas. And it seems that there is also an Alabaman style—for note how like to the work of Brannon of Talladega is that shown as No. 1! This letterhead was executed by Walter K.

No. 1

Trechsel, of Birmingham, Ala., and is an essentially modern production. It might seem to some to be a trifle out of balance, because of the shortness of the line which gives the firm name as considered in connection with other parts of the job. The initials in this line are red, as is the large "P." Work done for others by Mr. Trechsel is especially pleasing because of its striking originality—pleasantly odd without being freakish.

* * *

The Blanchard Press, of Worcester, Mass., impressed their new address on the mind—6 Walnut street—by sending the announcement on a shipping tag, to which a genuine walnut was attached. But there should have been six of them, possibly, to pattern after the George P. Rowell & Co. mark of "9 Spruce."

* * *

Year before last—dear me, I had not thought the Cheltenham face was that old—Erwin B. Ault, now of Toledo, O., then of Lewiston, Idaho—prepared this very neat and directly forci-

FOR THE HOLIDAY TRADE
You will want a special line of advertising in the way of announcements and you want the printing right. We have the men and material to do THE BEST PRINTING in that line and also in general commercial stationery, such as cards, letter-heads, bill-heads, statements and envelopes
Teller Publishing Company, Corner 3d and C 'Phone 261 LEWISTON, IDAHO

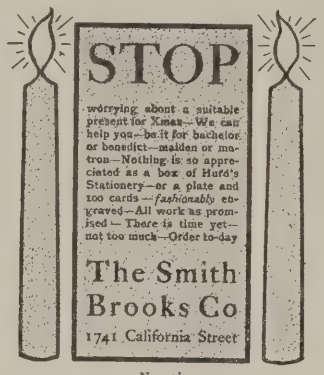
No. 2

ble blotter reminder (No. 2). It is in various color schemes—the one before me now is yellow as to the inner rules.

* * *

Here are two ante-holiday ads from the Smith-Brooks Company, of Denver, Col. They are examples of very effective combinations of engraving and composition. The Ben-Day tint on No. 3 a—and the stipple effect on No. 3 b, probably produced by rubbing over the rough surface of the paper on which the drawing was originally made, are each excellent methods of securing an effect with a zinc etching which rivals that of a half-tone.

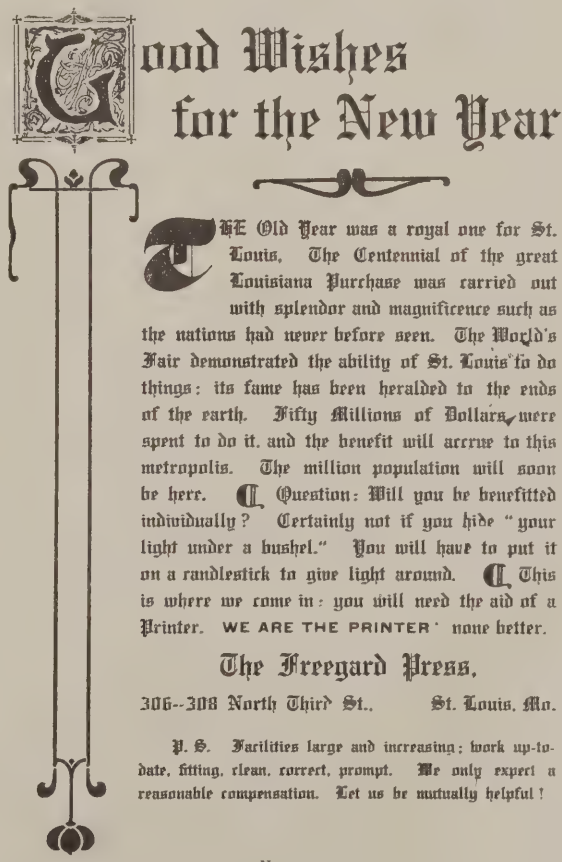
No. 3a



STOP
worrying about a suitable present for Xmas—We can help you—be it for bachelor or benedict—maiden or matron—Nothing is so appreciated as a box of Hurd's Stationery—or a plate and 100 cards—fashionably engraved—All work as promised—There is time yet—not too much—Order to-day
The Smith Brooks Co
1741 California Street

No. 3b

The Freegard Press, St. Louis, sent last year a multi-colored sheet of modern "parchment," the shades being brown and red and black and green and gold, on which are good wishes for the New Year (No. 4). The initial will not reproduce well because of the color scheme. The thistles in the ornamentation at the side are in green, the remainder of the ornamentation being in brown. I like the short line in the display in connection with the line that is nearly full. These lines are in brown. The initial and the paragraph marks and the words "We are the printer" are in bronze red. The Cathedral text does not seem to be out of keeping with the Engraver's Old English, but the use of Gothic in this job seems somewhat out of keeping, doesn't it? Such work as this has to be beautiful as to color scheme and stock in order to hold the attention

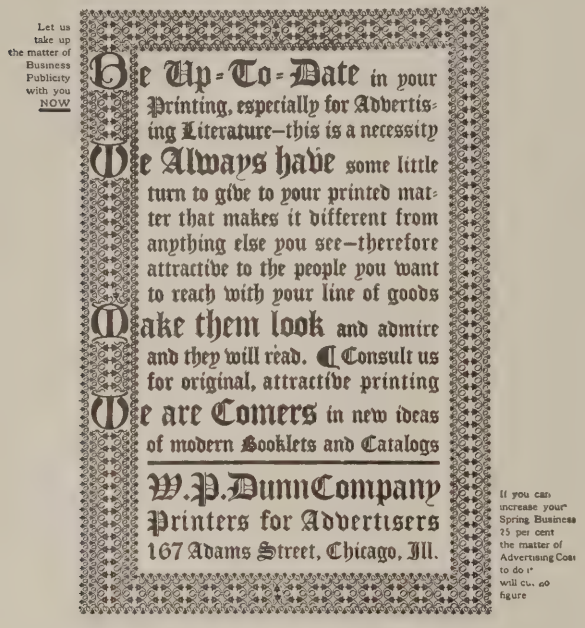


Good Wishes for the New Year
THE Old Year was a royal one for St. Louis. The Centennial of the great Louisiana Purchase was carried out with splendor and magnificence such as the nations had never before seen. The World's Fair demonstrated the ability of St. Louis to do things: its fame has been heralded to the ends of the earth. Fifty Millions of Dollars were spent to do it, and the benefit will accrue to this metropolis. The million population will soon be here. ¶ Question: Will you be benefitted individually? Certainly not if you hide "your light under a bushel." You will have to put it on a candlestick to give light around. ¶ This is where we come in: you will need the aid of a Printer. WE ARE THE PRINTER: none better.
The Freegard Press,
306-308 North Third St., St. Louis, Mo.
P. S. Facilities large and increasing; work up-to-date, fitting, clean, correct, prompt. We only expect a reasonable compensation. Let us be mutually helpful!

No. 4

long enough for it to be read. In these days Roman is the type which we English-speaking races read most easily. It is, however, sometimes advised to have all advertising matter in

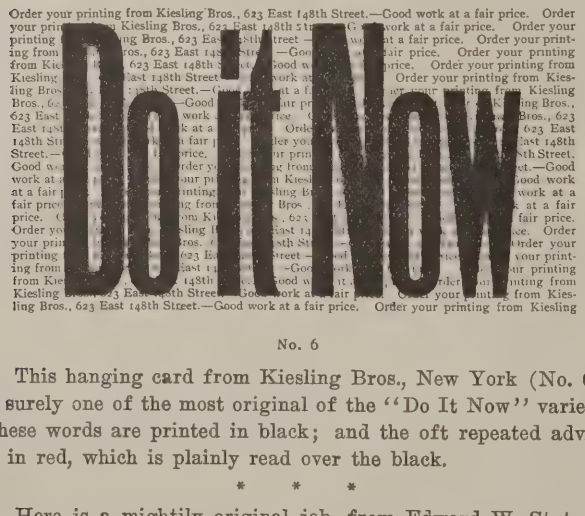
caps and lower case Roman, and even not in caps alone, because of the difficulty in reading. This difficulty, however, does not seem to me to be of necessity a defect in the advertising. If the job is tasteful and handsome any slight difficulty in reading it should only serve to enhance its value as an advertisement, because it would serve to impress the words on the memory. It is a different matter from the puzzling and illegible scrawl such as lawyers—and some editors—used to write before the introduction of the typewriter. This would be liable to create a feeling of annoyance, but beautiful work is not likely to have any such effect on the temper.



Let us take up the matter of Business Publicity with you NOW
Be Up-To-Date in your Printing, especially for Advertising Literature—this is a necessity
We Always have some little turn to give to your printed matter that makes it different from anything else you see—therefore attractive to the people you want to reach with your line of goods
Make them look and admire and they will read. Consult us for original, attractive printing
We are Comers in new ideas of modern Booklets and Catalogs
W. P. Dunn Company
Printers for Advertisers
167 Adams Street, Chicago, Ill.
If you can increase your Spring Business 25 per cent the matter of Advertising Cost to do it will cut no figure

No. 5

This slip (No. 5) is an example of some of the admirable Bradleyism. The initials, the paragraph mark and the line "W. P. Dunn Company" are red, the 36-point is light blue, and the remainder is black. It is indeed a handsome job—one that will be looked at long enough for it to be read.



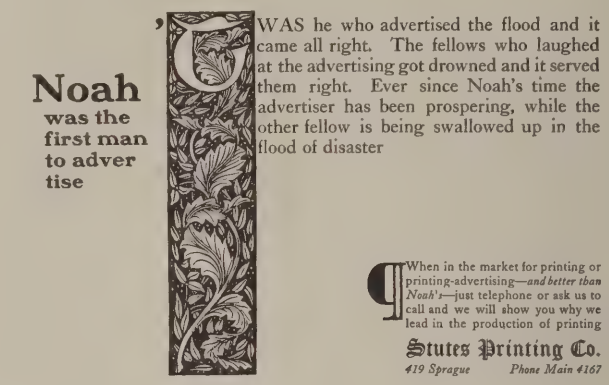
No. 6

This hanging card from Kiesling Bros., New York (No. 6), is surely one of the most original of the "Do It Now" variety. These words are printed in black; and the oft repeated advice is in red, which is plainly read over the black.

* * *

Here is a mightily original job, from Edward W. Stutes—original both as to arrangement and wording (No. 7 a). The large initial and the large paragraph mark are each red—the rest is black. It is a mailing card, of a size and consistency that makes it easily broken in the mail—the copy that first reached me looked as if Noah's two elephants had stepped on it.

No. 7 b has the rules and the initial in orange. The dash—or the bit of rule which serves as a dash—is also in the color. This placing of dashes in color is getting to be quite popular now. I noticed one in a street car the other night. The wording of the card was white on black stock. About the center, at a very important place in the wording—was what might be termed with two meanings a dash of color. It was one of a rich red which glistened in the light. It was one of the most effective bits of display that I have seen for many a day.



Noah was the first man to adver tise
'TWAS he who advertised the flood and it came all right. The fellows who laughed at the advertising got drowned and it served them right. Ever since Noah's time the advertiser has been prospering, while the other fellow is being swallowed up in the flood of disaster
When in the market for printing or printing-advertising—and better than Noah's—just telephone or ask us to call and we will show you why we lead in the production of printing

No. 7b

NECHE, N. D.

Harry A. Woodworth, Toronto, Canada.

DEAR SIR: I have for several years been a reader and a student of your spicy department, "More Work Through Publicity," in the NATIONAL PRINTER-JOURNALIST, but I have never, until now, sent you any of my efforts for review. The main reason for this is: In a country town the size of Neche, where there is but one printing office, printers, as a rule—although they assuredly should—do not advertise themselves and their work. At least, such has been the case with us. However, I notice that you quite often review specimens which cannot be classed strictly as printing advertising—office and personal stationery, for instance—and this fact emboldens me to send you a couple of specimens of my work for criticism—viz., the letterhead on which this is written and the envelope in which it is enclosed. I send you in separate package several samples of the envelope-corner, each done in a different color-scheme.

Some months ago you reproduced a piece of printing-advertising from, I think, Mr. Dell Shaw, of Mayville, N. D., a feature of which was a quotation something like this: "Swallows murmur, depths are dumb." Shouldn't the first word be "shallows"? I am acquainted, I must confess, with no quotation in which swallows murmur, although they may indeed have much about which to murmur. In prohibition North Dakota, however, I have heard men murmur at the scarcity of "swallows." Very truly yours,

REX H. LAMPMAN.

I have been acquainted with the good work of Mr. Lampman for some time, through the medium of the other departments. He certainly gets out some very superior jobs for the *Chronotype*. And it is a kind of advertising, but it should certainly not be the only sort that is done. Now that you have such pleasing and distinctive stationery, you would do well to stick to it until all your correspondents have a chance to see it, at least. A printer's time would generally be much more profitably employed by getting up the kind of work Mr. Lampman admits assuredly should be used, rather than in assembling a dozen brands of individuality on his own stationery. And that Mr. Lampman can write as well as print is evident from his letter.

Mr. Lampman has discovered an error on work reviewed in this department which entirely escaped the critic; and he has alluded to the matter in a way which shows him to have "the makings" of a humorist in him.

BUSINESS NOTES

This Department is conducted for the benefit of advertisers, and expresses their claims and views

The Poster Album, issued by The Ault & Wiborg Company, in substantial cloth covers, serves not only to show in a most attractive and instructive manner all the strength and beauty of their famed makes of inks in many rich and varying tints and colors, but is a model text book for the use of colored inks, teaching by pleasing and convincing examples. Many of the plates shown are works of art, and the Poster Album may well be kept as an art treasury as well as a text book of color combinations.

* * *

The half-page advertisement presented this month by the Globe Engraving and Electrotyping Company, of Chicago, deserves especial attention. The plate printed from is a nickeltype, from a half-tone, from a zinc etching, from a proof, from an electrotype, from a wax engraving, from a pen drawing and a photograph of a globe. Every process except wood engraving was used in the operation of producing the plate for this advertisement, and the white lines around the large letters in the center panel are engraved by hand. It is an instructive curiosity in the engraving art, the possibilities of which have become almost unlimited.

* * *

The H. C. Hansen Type Foundry, of Boston, advertises this month novelties in the shape of beveled quads and quotations that will at once commend themselves to every practical printer. They entirely do away with the necessity of the use of plaster paris for holding types in place where other than straight lines are used in designs. The illustrations and text in the advertisement fully illustrate their value and explain their uses. They will be found great time and money savers and will aid the use of slanting lines or panels and help to render it possible to make striking displays in composition with no more cost or time than is required in the setting of straight matter, and render the justifying and handling such forms just as easy and as safe. Every printing office should have a font of these beveled quads and quotations.

* * *

H. D. Roosen Company, of Brooklyn, N. Y., and Chicago, Ill., have just issued a most valuable and comprehensive catalogue of their inks. The work has been gotten up with the greatest possible care and taste, and for highest excellence in color printing is a model. It shows perfectly how inks may be made to cover paper in solid colors without a flaw, and gives as well all the possible beauties of different tints properly printed. Not only are their regular colored inks shown in a way to tell the results possible by their use and to enable the printer to order intelligently therefor, but the three-color process inks, cover inks and also numerous tints, which are usually printed in a book by themselves. The book is convenient in form and size and a thing of beauty in itself. An introduction and a special notice are printed in three languages.

* * *

Samuel Bingham's Son Manufacturing Company present a timely advertisement this month with regard to their widely famed printers' rollers. This company have an experience of very many years and possess all modern knowledge, equipments and requirements to cast rollers to suit the work, the presses and the seasons. They issue mailing cards and other advertising matter that contain valuable and reliable suggestions as to when to have rollers newly cast to suit the weather and all other conditions of the changing seasons.

By reason of long absence in the east we neglected to mention in October issue the very grateful, kindly received and thoughtful act of Sigmund Ullman at the meeting of the United Typothetae of giving to each member and visitor a handsome picture of Niagara Falls, so printed on cardboard with Ullman inks as to look like a photograph. We have our copy framed, as doubtless have many others, and it makes a splendid ornament for the sitting room—it was too good for the office.

* * *

The illustration is an excellent view of the new building occupied by Southern Printers Supply Company, the Washington, D. C., house of Barnhart Bros. & Spindler, located at 425-427-429 Eleventh Street, N. W., on the leading business street of the city, in the heart of the printing trade.

A complete stock of Superior Copper-Mixed Type and all printers' supplies and machinery, electrotype foundry, machine-cast roller plant and machine-shop for rebuilding printing machinery, in a building of practically unlimited weight, carrying capacity—heated by steam, with electric elevator and every modern facility for quick expedition of manufacturing and handling of business—places the Southern Printers' Supply Company as the leading and most complete house in its line in the entire South or East.

The business was established five years ago, and in this short time has grown in the strongest favor with all the leading printers and publishers in the territory in which it does business.

Mr. W. Seton Kent has been the manager since organization, and attributes the continued and steady growth of the concern to fair dealing and the unbreakable rule of the house, to have no dissatisfied customers.

* * *

Mr. R. Chilcott, formerly of Kansas, who was one of the first fruits of the N. E. A. Convention, as a new settler in Guthrie, sends a newspaper with a name probably not duplicated anywhere in the world. It is the *Captain Maramec* and has reached well into its third year. No one, not even the present editor, seems to know why it is so called.

* * *

American type is as good as the name—*the best.* I use it almost exclusively, and it is indeed a pleasure to any craftsman to compose a job in "American" faces.

Talladega, Ala. LENNIS BRANNON.

* * *

The crowbar opens, but it never closes. Don't tear down unless you can rebuild better.

Made by The H. C. HANSEN TYPE FOUNDRY

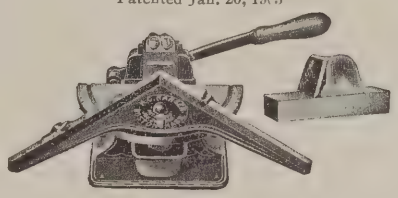
Hansen's Complete Mitering Machine

THE BEST MITERING MACHINE IN THE WORLD

Patented Jan. 20, 1903

Some of its Good Points

The rule holder has an angle of ninety degrees, so when placed in a central position you can miter square sets a lifetime without changing its position. It is easily set by a pin for any desired angle, *having no lines to guess at*, thereby enabling the operator to obtain the required angle positively accurate at all times. It is graduated by 12-pt. ems and has two gauges, the left hand gauge having a supporter that enters any one of the holes of even ems, and by turning the supporter each quarter turn it lengthens or shortens the measure a 6-pt. em. The knife is held firmly by two screws and is regulated by two adjusting screws. A jointer for sharpening the knife to the proper angle is furnished with each machine. This enables the operator to always have the same bevel, which is a very essential point in order to obtain a clean cut. The bed is indexed 2, 3, 4, 5, 6, 8, 10 and 12 respectively, representing the different angles for a 2, 3, 4, 5, 6, 8, 10 and 12 sided figure, therefore doing away with lines you have to guess at. The handle strikes a rubber tube, which does away with noise and jar received on other machines.



Price, with Cup for Chips, $13.50

Hansen's Mammoth Metal Furniture

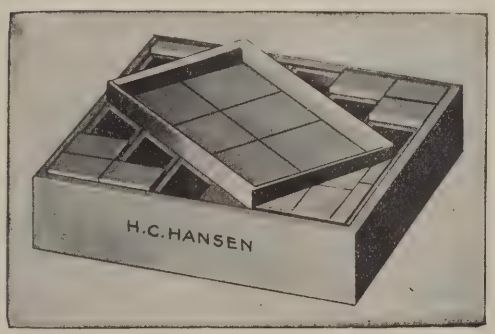
Price 25c per pound
Usual discount

Hansen's Beveled Quotations and Quads

A TIME SAVER ON INTRICATE COMPOSITION



Patent applied for

AN absolute necessity in every printing establishment. Made on three different angles, forty-five, fifty-four and sixty degrees, they allow a variety of arrangement and render artistic and complicated set-ups as rapid and easy as straight composition. These Quotations and Quads completely do away with the necessity of using Plaster Paris after the form is set up, as is nearly always necessary when ordinary quads and leads are used for justification. A slanting panel or line justified with these quads is as secure and may be lifted as easily as a form of straight matter.

The illustration shows a form justified with Beveled Quotations and Quads and a glance will readily convince the printer of their practicability and value for work of this kind. They entirely do away with soldering.

PRICES OF FONTS

Angle of 45 degrees, $2.00 Angle of 54 degrees, $1.75
Angle of 60 degrees, $1.50

Send for circulars of new borders and ornaments, three sets of new initial letters, Printers' Joys and new brass rules.

Potter, Jr., & Co.; four form rollers; measurements of bed between bearers, 54x40; will take form 38x52; rack and screw vibrator; table distribution; three tracks; overhead steam fixtures; eight roller stocks and four angle rollers; in good condition; a bargain, if taken by October 1st. Address "R. P.," care of NATIONAL PRINTER-JOURNALIST.

FOR SALE—Hoe Drums, bed 16x21 in. and 23x28 in.; Scott 4-roller two revolutions, front fly delivery, bed 26x36, 38x55 and 42x60 in.; Campbell two revolutions, bed 23x30, 36x52, 37x52, 43x56 and 41x60 in.; Potter two revolution, bed 36x52 in.; Whitlock two revolution, bed 45x62 in. Send for further information to WALTER SCOTT & Co., Plainfield, N. J.

FOR SALE—Southern California daily and job office, in city of 15,000; fine field; $20,000 proposition, and must have at least one-half cash. Address, "OPPORTUNITY," care PRINTER-JOURNALIST.

MISCELLANEOUS

A MONEY-MAKING SYSTEM FOR THE EMPLOYING PRINTER. A handy little volume describing a simple, economical, yet practical and comprehensive system for ascertaining the cost of printing. This system has been tried and is adaptable to large and small printing and manufacturing plants alike. Illustrates full blanks for all departments along with bookkeeping system for business office; 125 pages, 4½x7 inches, cloth, $1.00. NATIONAL PRINTER-JOURNALIST, Station X, Chicago, Ill.

THE VAN BIBBER ROLLER CO., Sixth and Vine Sts., Cincinnati, will give you *the best rollers* that can be made for any season or press. Our facilities are the best, and we use the latest Gatling Gun and compressed air apparatus. It pays you to have good rollers, and they count more in presswork than anything else. In writing or shipping, "Cincinnati" is sufficient. Everybody knows us.

ANYBODY CAN MAKE CUTS with my simple transferring and etching process. Nice cuts, from prints, drawings or photos, are easily and quickly made by the unskilled on common sheet zinc. Price of process, $1. All material costs at any drug store about 75 cents. Circulars and specimens for stamp. THOS. DAY, Box P, Windfall, Ind. My Simplex Mailer only $2.50, send for circular.

A COLD SIMPLEX STEREOTYPING OUTFIT, $17.00 and up, produces the finest book and job plates, and your type is not in danger of being ruined by heat. Simpler, better, quicker, safer, easier on the type and costs no more than papier-mache. Also two engraving methods costing only $5.00, with materials, by which engraved plates are cast in stereo metal from drawings, made on cardboard. "Ready-to-use" cold matrix sheets, $1.00. Come and see me if you can; if not, send postage for literature and samples. HENRY KAHRS, 240 East Thirty-third Street, New York.

WANTED—Thoroughly reliable, energetic and experienced salesman, familiar with high grade engraving and printing business, to solicit catalog work. One who can command a good salary and secure results. GRAND RAPIDS ENGRAVING Co., Grand Rapids, Mich.

A Gold Ink That Prints

Bronze Jobs, large or small, **are dirty,** cumbersome, waste your time and material, and often spoil other jobs.

Gold Ink is as **Clean** as ordinary printers' ink, and above all works just as easy.

Our Gold Ink Prints Well, shows up well, and eliminates waste of every kind; no washing up of the press after every hundred impressions. In short, we make a

Gold Ink That Prints. It will not dry on the press nor rollers, neither will it fill up the forms, yet it dries well on paper.

A Thoroughly Dependable Ink. Write for samples and price, stating whether you are interested in Rich, or Pale Gold.

Station X - - CHICAGO

It is becoming more and more generally
Recognized that the great strides in the production
Of printing, for which the past few years are remarkable,
Are not only due to the application of our Doubletone
And Ullmanine systems, but would to a great extent
Be impossible without them.
They represent not only an improvement, but a veritable
Revolution in the manufacture of Printing Inks.

The Reliance Lever Cutter

Strictly Interchangeable **BUILT FOR QUALITY** **No Adjustments**

Below We Give a Few Points of Distinctive Construction

THE arch is secured to the side-frame by means of dowel bolts—that is, the shoulders of the bolts are turned to fit snugly, and extend through arch part way into the side-frame, forming dowels. The ends of the arch clasp the entire surface of the side-frame tops, further insuring rigidity.

The lever system is simple and unusually powerful. The Lever is closer to the side-frames than in other cutters and is, therefore, more rigid.

Besides the interlocking back gauge and clamp, the cutter has side gauges front and back of knife, adapted to narrow and accurate cutting.

When Quality Counts WESEL Gets the Order

IT PAYS TO ILLUSTRATE

A PHOTO ENGRAVING PLANT rightly used, is a big factor in determining the prestige and in increasing the subscription list and advertising patronage of a daily or weekly publication.

¶ The amount of machinery actually necessary for such a plant is small and inexpensive; in fact, the cost of installing a Photo Engraving Department is insignificant when compared to the benefits derived from the use of local pictures and other appropriate illustrations in the news and advertising columns.

¶ Our line of Photo Engravers' Machines, Tools and Materials is complete in all details, including every device known to the trade.

¶ Upon receipt of inquiry stating size, kind and quantity of work it is desired to do, we will submit special specifications giving a list of necessary apparatus and cost of same.

¶ Send for our Catalogue of Photo Engravers' Machinery and Materials.

OF ALL TYPE CASES

The "New Departure"
With
Paper Covered Bottoms

REASON WHY?

You want to know the reason why you prefer the brand of goods you buy. When you buy Modern Printing Office Furniture, whether it is to replace old style furniture or for a new outfit, you buy it to save money and get the greatest results from the least expenditure.

Our Furniture has stood the test of twenty-five years and is the standard of excellence throughout the world in the printing line. Every printing office in North America is equipped either wholly or in part with material of our manufacture. *Imitation is the sincerest flattery*, and the fact that other manufacturers copy our designs and our construction is good evidence of their superiority. *An imitation in always an inferior article.*

"NEW DEPARTURE" CASES have paper-covered bottoms. *The reason why is because the paper absorbs the moisture and prevents it entering and destroying the bottom.* It makes a clean, smooth bottom in the type compartment, and will remain in place until long after the case bottom is stained and discolored by age and the pores of the wood filled with the dust from the type, which makes the case bottom eventually impervious to water.

Now, here we have given two good, logical reasons why case bottoms have always been and should be covered with paper. Ask any one to give a reason why they should not be covered with paper except to *cheapen the cost of construction.* It costs us thousands of dollars every year to put on the paper, and we could just as well leave it off if it was not required. *The reason why* others do not cover their case bottoms with paper is because the "NEW DEPARTURE" CASE with paper-covered bottom is patented, and attempts are made to imitate our case as closely as possible; but the paper is a vital point in case construction, and any printer who equips his office with cases not covered with paper will, in our opinion, regret the day he paid the same price for an imitation article that he would have to pay for the genuine "NEW DEPARTURE" CASE with paper-covered bottom.

THE OPTIMUS
THE OPTIMUS

Good enough is not good enough. Make no mistake about this. Good enough always is an apology for that which ought to be better. Good enough is not improvement, but retrogression. It has no future. It is the password of the unsuccessful.

Work is delivered as good enough. The customer pays a price that is good enough. Good enough keeps the business in a hole, and it is a good enough hole. Were service better, price would be better, and there would be more work to do. The extra cost of the better would be trivial. But think of the satisfaction all around!

Whatever is good enough is not worth while. It's a back number; let it go. Get the better, the best. It is business every time. And the Optimus pays dividends! As a press it is not merely good enough; it is much better. It is not merely up to date; it has anticipated the future. There is today no work capable of fully testing it. It is the Best as a producer of quality and quantity. Only the Best is good enough.

PRACTICAL JOURNALISM

A Complete Handbook of Modern Newspaper Methods

By EDWIN L. SHUMAN

Author of "Steps into Journalism"
Literary Editor of the Chicago *Record-Herald*

Illustrated, 12 mo. Cloth $1.25 net; postage 12c additional

THIS is the most comprehensive treatise on newspaper work that has thus far appeared. It explains the organization of a newspaper staff, the best way to enter journalism, the usual steps of promotion, the salaries paid, etc. There are practical chapters on how to start and run a country newspaper, and for workers on the country press there are valuable suggestions on how to make connections with large city papers. There is a chapter for the country correspondent.

Mr. Shuman's method in regard to the large journals has been to tell what each department does, and the best methods of doing it. We get a view of the reporter at work, coupled with clear instructions on how to write a news story. The question of how to get a start is answered in regard to every department. For the experienced editor there is much valuable information in the chapters on errors, libels and copyright. There are chapters for artists, ad writers, women and special writers. The book covers the whole field of journalism with a thoroughness never before attempted.

The MONOTYPE

¶ THIS IS A LABEL attached in the Government Printing Office at Washington to proofs of Slug-set matter:

NOTICE.

Composition on this work was done on Linotype Machines.

AVOID CHANGES

¶ VOLUMES are to be read in its laconic injunction to "Avoid Changes."

¶ THE PRODUCT OF THE SLUG-MACHINE is a line-long stereotype; a line of words inseparably tied together, where every change of a letter means the waste of a line.

¶ IF A LETTER IS WRONG in a thirty-em Slug, you lose the Slug—and thirty ems of composition are gone to the bad. Therefore, with Slug-set proof it is necessary to "Avoid Changes."

¶ BUT THE PRODUCT OF THE MONOTYPE is a line made of single types; and a wrong letter in a thirty-em line means only the loss of one em or less. Compare this with the Slug method and you will find a saving of twenty-nine ems of composition.

¶ THEREFORE, you need never mark Monotype proof "Avoid Changes."

¶ THE DIFFERENCE IN PROFIT is obvious.

& THREE PROMINENT PRINTERS

MONOTYPED BY THE AMERICAN BANK NOTE CO., NEW YORK

The Government Printing Office Inquiry

THE TESTIMONY OF MESSRS. J. J. LITTLE AND T. L. REDFIELD ON THE COMPARATIVE MERITS OF THE LINOTYPE AND MONOTYPE MACHINES

DURING the recent hearing of the charges brought by the Mergenthaler Linotype Company against the Monotype Company, through which it sought to induce the President to revoke the contract for seventy-two Monotype machines ordered by the Public Printer, many printers of highest standing were examined as to the comparative merits of the two machines. Among the number were Mr. J. J. Little and Mr. Tyler L. Redfield, of New York, and the following excerpts from the testimony of these gentlemen will be found of interest:

MR. LITTLE'S TESTIMONY

¶ Being asked if in the matter of corrections there is any advantage in one machine over the other, Mr. Little said: "Well, it is very difficult to make corrections in Linotype matter as compared with Monotype. In the Linotype the unit is the line, and if there is a wrong letter you have to reset a whole line; of course, there is always a liability of the compositor making another error in running out the correct line. Whereas, in Monotype matter you can substitute a new letter for the one that is wrong, as you do with hand-set type." When asked which machine he should choose for turning out the *Congressional Record* (which is plain, straight work), Mr. Little replied: "I should use the Monotype." And to the question: "What special classes of work are the two machines best adapted for?" he said: "The Linotype is best adapted to newspaper work, or work where there is very little correcting to be done, or work where the little burr might not make much difference in its appearance—what we should designate as the lower class of work. That is what we use it for." When asked in what other respects the Monotype is superior to the Linotype, he replied that "in the Monotype work you get a very sharp face," and added: "We use it for making all sorts of technical books, where corrections are apt to run very heavy. On the Linotype we could not do such a thing, because we might have to reset entirely."

MR. REDFIELD'S TESTIMONY

¶ Perhaps no house in the country does work that averages higher in quality than does that coming from Redfield Bros. Several years ago this firm installed Linotypes, and subsequently threw them out and put in Monotypes. Mr. Tyler L. Redfield's testimony is interesting reading to those contemplating the installation of typesetting machines, as it tells why he replaced Linotypes with Monotypes.

MONOTYPED BY THE AMERICAN BANK NOTE CO., NEW YORK

The Government Printing Office Inquiry

When asked to compare the scope of the two machines, Mr. Redfield said: "We find the scope of the Monotype materially exceeds that of the Linotype; it is more elastic. We count on it for better work in a technical way."

Being asked as to why he discarded Linotypes for Monotypes, he replied: "Well, it came to a point where we had to have better composition, a better quality of work."

Then occurred the following:

Question: "Was any criticism made to you as to the character of the work done by the Linotype machines?"

Answer: "Yes."

Question: "Please state what it was."

Answer: "Well, we had a large publication, the '*Outing Magazine*.' We found it impossible to do it on the Linotype satisfactorily to the publishers. We could not get good plates from the Linotype and the run was too long to work it from slugs."

Question: "Do you mean electroplates?"

Answer: "The electroplates were never good. We had to keep sending them back again and again to be corrected for faulty letters."

Question: "Well, you set '*Outing*' on the Linotype machine, did you?"

Answer: "I did not."

Question: "Did you set it on the Monotype?"

Answer: "The Linotype was not good enough. We could not get the result, consequently we had to lay in foundry type and set the magazine by hand. Then somebody came along who had a Monotype, underbid us, and we lost the publication."

Question: "Mr. Redfield, did your house print this little book called 'The Linotype in Book Offices?'"

Answer: "Yes."

Question: "Printed from slugs of the Linotype machine?"

Answer: "Yes."

Question: "How much time did you take to get this out?"

Answer: "I presume that piece of work was in our hands four months, designing, setting the type, and doing the presswork."

Question: "How much of that time was occupied in setting the type by the Linotype?"

Answer: "Actually setting the type?"

Question: "Yes."

Answer: "I would be ashamed to tell you."

Question: "Mr. Redfield, how many recasts did you make of the type in this work ('The Linotype in Book Offices') in order to get the perfection attained?"

Answer: "That book was set probably six times straight through; each slug was recast on an average of six times to get perfect slugs."

Norwood Press

Office of J. S. Cushing & Co.

Dictated. Norwood, Mass., Oct. 28, 1905.

Messrs. Wood & Nathan Company,

Gentlemen:-I am sending you in a separate package, with my compliments, two photographs; one of our keyboard department with ten young ladies busy there, and one of the casting room showing the eight casting machines with the force which runs them. I thought perhaps these might be interesting to you. These young ladies are all doing mighty good work, and their proofs are quite as free from errors as those made from hand-set type.

You might be interested to know that a representative of the competing machine visited me yesterday for the purpose of convincing me that the Linotypes were, after all, the machines I needed. I think before he left for Boston I had about convinced him that the Monotypes were by far the best machines for our purpose.

Very truly yours,

J. S. Cushing & Co.

INLAND TYPE FOUNDRY

SAINT LOUIS CHICAGO NEW YORK BUFFALO

INLAND TYPE FOUNDRY

SAINT LOUIS CHICAGO NEW YORK BUFFALO

THE Caslon Old Style is one of the most popular faces made, and deservedly so. It has not only beauty, but strength and character as well, and after almost two hundred years of continual use is more in demand than ever. Nothing produced by human energy is perfect, and, if Caslon I. had at his command modern facilities and were cutting to meet modern conditions, he would, no doubt, have modified and improved his work. When the Inland Type Foundry purchased the right to make this face in the United States from the Caslon Foundry, it made some minor corrections which have added greatly to its popularity. Its most serious remaining faults can be traced to the change in conditions. At the time it was engraved paper was invariably wet before being used, and the ink, carefully distributed by means of balls instead of by rollers, was not only jet black, but was forced into the paper to such an extent that the resulting print was much blacker and more intense than is produced with modern ink, rollers, and modern presses on modern paper. It is to meet these conditions that the NEW CASLON face has been cut. While it closely follows the Caslon design, minor crudities, due to imperfect tools, have been omitted, the different sizes are properly proportioned to the body, are identical in design, and the lines have been strengthened so as to give the face proper color. This New Caslon is in no sense a Full-Face or Bold; it is offered as a body letter where more color is desired than in the original Caslon. It will be ready in all the regular sizes from 6- to 30-point inclusive by the time this announcement reaches you. The larger sizes will be completed as rapidly as possible. Specimens sent on application.

BE A 20th CENTURY PRINTER

UNITED PRINTING MACHINERY COMPANY

A Company organized to manufacture and sell machines and appliances for reducing the cost of production of printing.

AUTOMATIC TYPE MACHINE.

Leased to printers (30 years, $2000), for making their own type from 6 to 36 point bodies; matrices ready for sale or rent for nearly all the standard and popular type faces and borders. The cost of type is about 6c. per lb., plus metal.

DUX FEEDING MACHINE.

The lowest priced feeding machines; effective on long and short runs of all sizes and kinds of paper.

AMERICAN ROLLER WASHING MACHINE.

A machine for washing rollers for cylinder presses. A great economizer in offices running five presses or over.

VICTOR STEEL DIE EMBOSSING PRESS.

Used by the leading steel die printers. Price reduced.

STEEN POWER COMBINATION PUNCH AND EYELET MACHINE.

The only machine that punches and eyelets at one feed. Price reduced.

SPARKS ROUND-HOLE MACHINE.

A small machine, using ⅛h.p., that does the work of five $200 punching machines, and better work.

SPARKS SLOTTING MACHINE.

Cuts slots in loose leaf paper, and card work of all kinds.

SPARKS CRIMPING MACHINE.

Crimps the binding edge of loose leaf papers, completing the operation without pressing.

DUNNING DECKLE EDGING MACHINE.

Puts a deckle edge on any kind or size of paper, after the printing. Cost of deckle edging is nominal.

MALEY IRON REGISTERING BLOCK.

Holds all sizes and shapes of electrotypes, registering them quickly and absolutely.

ELLIS FAC-SIMILE TYPEWRITER RIBBON HOLDER.

A small device ($10.00) for holding a typewriter ribbon on any job press, producing a perfect imitation of typewriter effect from type.

TYMPALYN.

A woven wire blanket filled with rubber, for use on printing press cylinders, resulting in a saving of one-third the time of make-ready.

PRINTING MATERIALS.

Everything of iron, steel, copper brass or wood, used in a printing office, at lowest prices.

EVERYTHING FOR ELECTROTYPING.

We manufacture the celebrated machinery of Geo. E. Lloyd of Chicago, and Lovejoy & Co., New York.

EVERYTHING FOR STEREOTYPING.

In this we excel. Nearly all the machinery used by Western Newspaper Union, A. N. Kellogg Newspaper and American Press Association, was made in our Geo E. Lloyd factory in Chicago.

EVERYTHING FOR PHOTO ENGRAVING.

Complete plants, cameras, screens, lenses, etc., and all the machinery.

EDITORIAL NOTES AND POINTS.

ONE of the men who has made a most signal success in newspaper making in the United States is James E. Scripps, founder of the Detroit, Mich., Evening News. His experience is especially valuable to members of the craft and his opinions are golden and worthy of observance. On his seventieth anniversary he said:

"It is along the line of better editing that improvements must come, in the journalism of the future.

"Whatever success I have had, I will say this: That I have never reached my ideal of publicity. Journalism is so vast, so complex, that no man may lay down and follow an undeviating plan. He is obliged to change, from time to time, to suit the requirements of the hour. As for the editorial page, I am more and more surprised, often astonished, at its genuine helpfulness, at its resourcefulness, at its immediate and vivid interpretation of events. There will always be room in my opinion for the editorial page. The people, thinking for themselves, also like to know what the paper thinks.

"I believe that some of the best writing today is done by reporters and is found in American newspapers. This is especially true of the class known as special writing. Much of it is of the highest order. The newspapers of today, broadly, have improved immeasurably on the old style of journalism. The crisp, direct, nervous style has superseded the old-time, formal manner. It is in keeping with the spirit of our people."

What Mr. Scripps says as to the necessity of "change from time to time, to suit the requirements of the hour," is applicable in a greater or less degree to all callings in this age of progress and widening intelligence, improved appliances and changing methods from the farms to the great manufactories and mercantile establismments; from the district school to the great university; from the country parson to the minister over the largest metropolitan church.

The greater complexity of the newspaper calling, that ministers to all the members of the trades and callings and must deal with the changing conditions and views, and keep up with all improvements, changes and advancements in all the fields of industry, of education, politics, statesmanship, sociology, society, municipal, county, state and national government, sanitation, public utilities, great and small benevolences in public and private charities, in reformatory, punitory and elemosynary institutions in commerce and even in religion or the beliefs and methods of the churches, makes journalism the more complex and difficult. In our enumeration we purposely mention things that trench one upon the other, in order to make clearer the vast interests that must be, to a greater or less degree, covered by the public press. There is nothing that is human, nothing that touches humanity at any point, foreign to the newspaper.

* * *

Every one should reënforce and fortify his powers —mental, physical and spiritual—by good, upbuilding habits, by order and system in study, work and meditation. One should never become a mere automaton and should be careful to keep alive the inspiration of high motive in every act. Neither the sentiments nor the imagination should be permitted to become dulled. It is a fact that many eccentric geniuses have made greater and more lasting impressions upon the world than have many of the methodical great men, but who can say what these geniuses might not have accomplished had they been reënforced by strengthening habits and system in their efforts? All good things can be overdone, but there is sound sense and philosophy in the following, by Prof. William James, of Harvard University, whch we find in the New York *Trade Review.*

The great thing, then, is to make our nervous system our ally instead of our enemy. It is to fund and capitalize our acquisitions. For this we must make habitual as many useful actions as we can, and guard against the growing into ways that are likely to be disadvantageous to us, as we should guard against the plague. There is no more miserable human being than one in whom nothing is habitual but indecision.

* * *

General prosperity is prosperity for the printer while general depression affects the printer first and continues longest in its depressing influence on the business. No other calling is more dependent on the growth of trade and industries, or more helpful thereto, but when hard times begin, everyone seems to think that economy must begin in the matter of printing, the idea seeming to be that it is an expense or luxury to be lopped off instead of an investment. The amount of printing matter is first curtailed and then every possible effort is used to get reduced prices. In 1893 this was especially noticeable in Chicago, as probably in other large cities. Orders decreased and firms who had for years given their printing to one

house that had come to look to them as regular customers, commenced to get bids on every job of work from ten to twenty different houses and to fight for lowest possible bids obtainable, regardless of the cost of the product. Printers, to hold business, to compete or to secure work to take the place of that which had been lost and thereby to keep their men employed and retain their organized force, commenced the cutting of prices until work was very frequently taken at from twenty-five to fifty per cent below actual cost. As one printer has it, there were many houses that would give from $1.10 to $1.40 in actual cash cost for every dollar on every job of printing. This condition continued until 1898, and was then only remedied through organization. It is singular how printers, apparently all over the world, have been inclined to shoulder other people's burdens and do printing at a loss. Merely changing dollars, even, is rather poor business, but when it comes to working and worrying and then paying for the privilege, it would seem that printers ought to have sufficient intelligence to avoid the policy. This condition is, as stated, general, and not confined even to the United States. Mr. J. A. Burke, a printer and newspaper publisher of Sydney, Australia, is reported in the last issue of the *British Printer* as saying in response to the question by a reporter, "Competition is doubtless keen enough?"

"Rather! Just as in England, prices are very much cut; but an effort is now being made to overcome the evil by forming Master Printers' Associations—with what result remains to be seen."

* * *

People in all the free and enlightened nations are very much the same as to their demands upon a newspaper, so that what makes a success in England will be likely to be very valuable to the members of the press in the United States. The *Lloyd News* of England was established in 1842, and now maintains a circulation of over a million and has been from its start, a wonderful success, and the following newspaper essentials have been kept in view throughout its career, as told by a writer, evidently speaking from the standpoint of the responsible head of the paper, in the November issue of *Profitable Advertising:* "Give all news of importance and print it in a way that makes it easy to read. Further, if the paper is to grow in public favor, its news must be reliable. The reader must be made to feel that so far as is possible the facts set out have been verified before they are printed. Then, too, it must give the very latest news. Hot news, fresh from wire and cable, flashed from all parts of the globe. These things tell.

"Something more than news is also required for a newspaper. Along with papers on science and art, the drama and sport, there must be good, bright fiction. The housewife has to be kept informed on the newest fashions, as well as a multitude of subjects relating to home life. A medical column by a doctor of known repute is eagerly read. History, biography, and nature notes furnish useful lessons; while a deeper feeling is touched in a weekly sermon by an eminent divine."

* * *

Some of the leaders of unionism, in Chicago, complain because they have been enjoined from interfering with employers and their employes. It used to be a homely saying, "What is sauce for the goose is sauce for the gander." How would union leaders like to have employers and non-union printers constantly interfering with their unions and the members, boycotting the members, following them around or writing letters to them, with the object of persuading them to leave their unions, to cease paying dues, harassing them with vile epithets or hateful names? It ought to be settled after a while that this is a free country in which every one is entitled to his individual rights and beliefs, and to the management of his own affairs, free from annoyance, from being badgered or sought after with bribes, persuasions, or anything else to prevent his living out his own life, the performance of his duties, and working out his own destiny as a worthy citizen, responsible only to himself, his family, his God, his country and his fellow man.

* * *

Happy is the family of which the All Father is a member; happy the community whose newspaper is conducted in the spirit of His Son, "Our Elder Brother," who taught love and service to mankind as the highest duties of life.

* * *

Horace Greeley was a great believer in personal mentions for a local paper, and once advised the editor of a weekly newspaper to find occasion to name every one of his subscribers in his columns at least once a year. The Louisville, Ky., *Journal* took a new method of complying with this and thereby doing a great public service as well. It published every name in the poll, forty-seven thousand names in all, and asked for corrections. Some two thousand fictitious names were found. The result showed that, as a matter of protection from fraud at the polls, the publishing of the names of voters in the newspapers would be profitable publicity to be paid for by the city, town, county or state. It would be good business for any newspaper to publish such a list at the actual cost of composition, press work and paper, and in many cases, in small cities at least, such publication would pay for the news contained therein. Such newspaper publication, if paid for at public expense, would be more economical than the methods now used to secure accuracy and honesty. *Newspaperdom,* of New York, says:

> On the face of it, a list of names might not seem to be a highly interesting feature to be run by an up-to-date newspaper, and yet the registration lists in the *Evening Post* were scrutinized, ward by ward and precinct by precinct, and proved of great interest.
>
> Many remarkable disclosures were made. The saying that politics makes strange bedfellows was never more pointedly evidenced than in the case of registration, when citizens, reading the list of names from their precinct, saw strange individuals registered from their own homes, from the alleys in the rear, from their neighbors' houses. School children, dogs and dead persons were registered.

Publicity is the greatest safeguard of the people's rights, and of free government.

* * *

All the numerous friends of Mr. Walter Williams, editor of the Columbia, Mo., *Herald* and a past president of the National Editorial Association, will be pleased to know that he is convalescing from his recent severe illness and expects to be able to resume his editorial duties by December 1. Mr. Williams is highly esteemed and sincerely loved by hundreds of editors throughout the United States, and by reason of his work in connection with the World's Press Congress numbers admirers and sincere friends among members of the calling throughout the world.

In its closing article on the National Editorial Excursion, the Lebanon, Ill., *Journal* says:

At dusk we all assembled again at the station and were witnesses to the ceremony of presentation of a birthday gift to the corresponding secretary of the N. E. A., Hon. William A. Ashbrook, of Johnstown, Ohio. On him had rested the entire responsibility of the trip, and his attention to details and invariable good humor and courtesy had won for him the regard of all of the party.

It was his thirty-eighth birthday and he had recently taken the thirty-second degree of the Masonic order of Scottish Rites. A massive gold ring with diamond setting with the Masonic emblem of the advanced degree was presented to Mr. Ashbrook by Mr. Lowry, of Texas, in a neat little speech which was cut short by the whistle of the train.

The political train in Ohio had been whistling for Mr. Ashbrook ever since until election day, when he was found on board as a member of the Ohio Legislature with a majority greater than that received by any other candidate in his county. He evidently learned to sprint well on the editorial trip, for his last run distanced all competitors, and now his friends are talking of placing him in the race for Congress. A few more editors in that body can make themselves useful. The broad information, and the intimate knowledge, obtained of every section of the Union and the acquaintance with representative editors and the people are important as finishing equipments for men who are not only to represent their own constituents, but to look well and wisely after the interests of the whole country.

* * *

Temperance, or moderation, contentment, sincere love for fellow man, for nature and for God, pure air and sunshine and proper outdoor exercise, if this is not afforded by your work, will do more for health, long life, genuine prosperity and happiness than will all the medicines, doctors, luck or opportunities, wealth, leisure and amusements. As to the employment, the more diversified it is in its duties, the more it brings one opportunities for direct service to his fellows, the more it appeals to the highest faculties of the mind and to the purest, noblest sentiments of the heart, the more it brings one into friendly, helpful sympathy with others, the better and the more strengthening is its influence upon one's own life. In all these particulars we know of no other calling that equals that of the enthusiastic, honest, true-hearted modern newspaper editor and publisher who owns and controls, writes for and helps, in every way, the making of his own paper. It is largely the man who makes the character and influence of the employment.

* * *

To worthy attainment and success, the man who undertakes to lead, to instruct or to inform others, needs something that takes hold of, broadens, deepens, fills and stirs his own life. This has been true in all times from Plato and before, to Benjamin Franklin, from Franklin to Horace Greeley and Rev. Phillips Brooks, and from Brooks to Gunsaulus, the greatest of living divines. As Phillips Brooks once said, in substance, of the influence of the Christ life, spirit and teachings upon himself, it must be something that convinces the reason, lays hold of the affections, enlarges the actions, opens the whole being to the innocent, trusting freedom of the child, widens the views, influences to the living the larger life, invites and spurs forward to every noble duty, to every faithful fulfillment of all that is himself. Three score years of observation of, and experience in, nearly every walk of life, have taught us that men are not so greatly different in abilities as in the great enthusiasm or purpose that leads, inspires and enforces to, and sustains in, efforts for accomplishment. This force may come from worthy ambition, a deep philanthropy, a true love for, and an enthusiasm, pride in and devotion to a calling, an invention, a science or other controlling object or idea, or from a high sense of duty, either religious, patriotic, filial, domestic or philanthropic.

* * *

It is a good thing to get the thoughtful views of unprejudiced outsiders as to our work. If you measure yourselves by yourselves and compare yourselves among yourselves, you are not wise, was the teaching of one of the wise of olden times. It is wise to go out in the world to seek wisdom. Mr. J. A. Burke, formerly of the Sydney, Australia, *Morning Herald,* and the founder of the New South Wales Overseers' and Managers' Association, interviewed by *British Printer,* London, England, said of his recent travels in this country:

"In the States! Well, I had a great time there. I went through most of the large printing offices and type foundries in San Francisco, Chicago and New York, and was much struck with the numerous labor-saving devices seen on all sides, brought about, I believe, by the high rate of wages that have to be paid in the larger American cities. Why, in one New York newspaper office I had the privilege of inspecting the wage book and was amazed to notice that several of the stereotypers, such as the men working on the casting box and dressing horse, were down for as much as from $40 to $43 for the week—part of the amount overtime. Just fancy, £8 per week for ladling out lead. It is wages such as these that makes the American printer throw out a new machine after six months' use if a new device is brought along that will turn out a few hundred more per hour. You see he recognizes the fact that labor is his dearest commodity."

"And what of cylinder machinery?"

"I did not see one stop-cylinder machine in use over there during the whole of my tour, all those coming under observation being of the Optimus, Miehle, Walter Scott or Huber-Hodgman two-revolution type, whilst several offices had large rotary machines turning out their catalogues and book work. In one office that I visited—Donnelley & Sons, Chicago—there were four large rotaries running on work for Marshall Field and the telephone company. One order that was being run off was for 150,000,000 of premium coupons for a dry goods firm, whilst there were several quartos and folios of from 750 to 1,000 pages for which the number required was over 750,000. The contract for the Telephone Guide of 1,000 pages is for a daily delivery of 10,000 books; the Guide, which is issued quarterly, is foolscap 4to set in 6-point (for almost every one is on the 'phone in Chicago). Over 400 people are employed in Donnelley's bindery alone—the foreman is an Englishman, by the way—where there are several perfect binders, as well as a new rotary trimmer that trims the three sides of the book in one revolution at the rate of 10,000 books per day. So it is right through the place. The payment of labor and rate of living being so high the employer is compelled to put in the labor-saver."

"And concerning the workman?"

"Well, as far as the skill, pace or agility of the American workman is concerned, I really did not see any appreciable difference between him and his prototype in other countries. As a matter of fact, I thought the American was slower in his movements, took things easier, had more freedom and did not delve in nearly as hard as we do in Australia. In several cities that I visited I saw linotype operators, makeup and advertisement hands who were smoking cigars at work, with the result that their movements were retarded in consequence and output suffered.

"I had the pleasure of going through the machine works of the Messrs. Goss, Hoe and Walter Scott, and fine establishments they are. I was also shown in New York the machines that it is said will revolutionize printing—the Planograph and the Lithotype, both of which print type characters from wheels operated by a keyboard from a machine similar to the typewriter direct to transfer paper, which is then transferred to aluminum plates and printed off at the rate of from five to ten thousand per hour, in a specially made cylinder press.

Both of them are as yet in the experimental stage, but the inventors assert that they will be live commercial propositions within a few years."

"What of British printing establishments?"

"Oh, I have not had time to go through many large English offices, but in the few that I did visit I was struck by the absence of the modern labor-saving appliances which are in use both in Australia and America. For instance, in one very large office I did not see one labor-saving dust-proof cabinet, and during the fifteen minutes I was in the jobroom I noticed that one man was disturbed no less than three times by others who required a case that was enclosed in the frame that he was working at. Those are some of the things they do not do in America. Then, again, your people stick to the old wooden quoin which takes so much time and skill to lock up and causes so much annoyance in the machine room when improperly done."

"Do we! Where have you been all the time?"

"Well, I never saw a wooden quoin in America. Another labor-saving device much in favor across the Atlantic is a combination chase, which can be made up to any size (the same as steel furniture) and which does away with extraneous wooden or metal furniture, thus giving a very solid lockup without spring; so far I have not seen any of these money-makers in use here. Most Americans also use point sticks where a change of measure can be made instantly. The sticks I saw in use here were the old iron ones that take so much time to adjust.

"It was not the craftsmen but the material they were asked to work with that struck me as being behind their American cousins. All of these appeared to be paying attention to their work, and slogging in harder than I thought the Yank did, but their output was retarded by not having the same speedy producing tools to handle."

"And you therefore conclude?"

"With the seven years' system of apprenticeship that prevails here, as against the four years' system of America, in conjunction with the fact that you have public technical printing classes in most of the big centers, the future of the art preservative in England is particularly bright, and there should be no fear about English printers not being able to hold their own with their fellow craftsmen over the water if employers will wake up and give them the latest tools to work with. As a matter of fact, for these reasons they should leave the Americans in the rear, for by their four years' apprenticeship system they are turning out very few competent tradesmen. In many large offices, as well as small, apprentices are put to roustabout work for the first two years, and by the time they are through their four years' term and have to be paid journeymen's wages they only possess a nodding acquaintance with the art, and have to perfect themselves at the employer's expense, as outside one technical school there are few opportunities for receiving such complete technical instruction as are obtained in England."

Mr. Burke is a native of Australia, and served his time in a jobbing office, but eventually turning to the news side of the business, worked on the Brisbane *Courier* and Sydney *Morning Herald*, whilst for the past nineteen years he has had charge of the mechanical departments of the *Sunday Times*, the *Referee*, and the *Arrow*, of Sydney. He has always been prominent in progressive movements amongst printers in Australia, and is practically the founder of the New South Wales Overseers and Managers' Association, a body somewhat similar in its aims and organization to the London institution. As a result, the printers of the parent State of the Commonwealth were brought into closer trade connection through the means of their monthly meetings, at which technical and other papers were read and discussed. This body also induced the State government to establish printing classes at the Sydney Technical College for both the compositor and the machinist, where a fine plant (the type section of which, by the way, was a gift from the Caxton Type Foundry) is installed and much good work is being done in teaching the youthful printers of Sydney the finer points of the art preservative.

Mr. Burke is also a worker on the benevolent side of the craft, and it is mainly through his efforts as secretary of the association that a movement has been starting for establishing homes for old printers in Australia. Whilst in America he paid a special visit to the Union Printers' Home at Colorado Springs, which is supported solely from the funds of the American International Typographical Union. He also intends going through the Printers' Pension Corporation Building at Wood Green, London, and reporting on the working of both institutions to the printers of Australia.

ESSENTIALS TO THE SUCCESS OF THE HOME PAPER.

Personal acquaintance with the people for whom you write is little less important than that first essential to large circulation—a paper worthy of that circulation. It is an old and inflexible rule—the survival of the fittest. Merit wins. To maintain and steadily add to its patronage the paper must also win and hold the confidence and the trust of the people, and it can only do this by impressing the public with its honesty and with the purpose of its publisher to make the public good his constant aim. Premiums and coupons and other such means may be of temporary value as aids to increase circulation, but the better opinion appears to be that lasting and paying patrons must come and stay through the merits of the paper itself.

The excellence of a newspaper depends in great measure on the plant. Facility, ample equipment, efficient help—these mean much in every office. All the local news should find a

place in the local paper, and its gathering and proper preparation for the public should be the first aim of the editor. "Tap the main news centers," is the advice of a writer on the subject, and he names these centers as usually the court clerks, the justices, the doctors, the undertakers, the ministers, the county school superintendent, county officials generally, club rooms, lodges, etc., with all of which the editor ought to be familiar and from all of which sources, as well as from a corps of regular correspondents and reporters, interesting items of news may be gathered.

Having gotten all the local news obtainable, that being the chief aim of the paper, if space yet remain, well selected State and general news may find a place, but, as this is usually taken from other newspapers, it should be rewritten, both for the sake of brevity and of conformity to a fixed style without date lines. In the preparation of all stories a good rule is to employ simple language, short sentences, making the leading fact the most prominent and the first statement in the article. Details should follow.

Editorial matter intended for publication in the local paper should relate to topics of local interest in the main. It should be written at home by a man familiar with the conditions at home.—R. A. Hall, Editor *Independent*, West Virginia.

¶

Those who stir up the fires of anger get burnt with the flames of their own making.

Among the Associations

"In Unity is Strength"

THE Press League of Pennsylvania is the name of a new organization brought into existence for the purpose of securing the enactment of reasonable and just libel laws in that State. A personal campaign has been planned among the editors and publishers. The pattern of the new organization is along lines similar to those proposed by Past President F. B. Baillio in Texas, though the details have been more fully worked out. As given in a recent issue of the *Editor and Publisher*, of New York City, they are as follows, and are certainly full of suggestions for giving greater effectiveness to the work of State associations:

The plan of operation is to employ a general secretary, who will visit each county in the State and organize the newspapers therein into county leagues. In counties where an organization already exists an effort will be made to have it undertake the work to be done. Such local organizations are to see to it that the men who are nominated and elected from their districts will be favorable to a new and fair libel law. In this work it is expected to accomplish more by the personal efforts of the newspaper men than through publicity in their newspapers.

The State League will be composed of representatives from county leagues, two or more delegates to be appointed from each county. The officers of the State League are to take up the general work of preparing a suitable libel bill and to look after its passage by the next Legislature. In this way it is expected that the combined efforts of all the newspaper men will be utilized to greatest advantage, each one being called upon to do a share of the work. With such complete organization it is expected that the desired results will be secured.

The general secretary, or organizer, is to work under the direction of the president and executive committee, and will, in connection with his work of organization, conduct an information bureau, provide literature pertaining to the work, and issue once a month a bulletin showing the progress being made and giving such information as may be of interest to the members of the league throughout the State, in order that all may be kept in touch with the progress of the work.

The officers of the State League elected at Pittsburg are as follows: President, Charles Emory Smith, Philadelphia *Press;* first vice-president, C. A. Rook, Pittsburg *Dispatch;* second vice-president, Dietrick Lamade, Williamsport *Grit;* treasurer, A. Nevin Pomeroy, Chambersburg *Repository;* recording secretary, H. B. Cochran, Lancaster *Examiner.* Executive Committee—A. J. Barr, Pittsburg *Post;* P. C. Boyle, Oil City *Derrick;* John E. Barrett, Scranton *Truth;* B. F. Meyers, Harrisburg *Star-Independent;* W. L. McLean, Philadelphia *Bulletin.*

* * *

Interest in the thirty-third annual convention of the Pennsylvania State Editorial Association centered in the brilliant banquet. There were 352 members of the association and almost 100 of the most prominent men and women of Pittsburg present at the dinner.

When the guests were seated newsboys rushed into the banquet hall crying, "Extra, all the latest news," and proceeded to distribute pamphlets bearing fac-similes of the front page of every Pittsburg newspaper. The pamphlets were printed on regulation news stock and contained the program, the list of speakers and the menu. They were carried away by guests as souvenirs of the happy occasion. While the newsboys were busy distributing their wares, the orchestra struck up a popular air and the ice was broken for an evening of rare entertainment.

There was no effort to provide special places for the guests, the seats at the table of honor being the only ones reserved. Among those at this table were A. Nevin Pomeroy, of the Chambersburg *Repository*, president of the association; Charles Emory Smith, editor of the Philadelphia *Press;* R. P. Habgood, of the Bradford *Star*, secretary of the association; C. A. Rook, of the Pittsburg *Dispatch;* George S. Oliver, of the *Gazette;* Joseph T. Nevin, of the *Leader;* A. J. Barr, of the *Post;* Arthur G. Burgoyne, of the *Leader;* James Francis Burke, E. J. Lloyd, I. E. Hirsch, George L. Holliday, J. W. Wardrop, Hon. John Dalzell, John G. Stephenson, Jr., John H. Jones, J. E. Joos, D. L. Gillespie, Hon. William Flinn and Stephen Stone, Esq.

James W. Wardrop, secretary of the Merchants and Manufacturers' Association, made the opening address and introduced Congressman James Francis Burke, of Pittsburg, as toastmaster. Congressman Burke paid an eloquent tribute to the press. In part he said:

CONGRESSMAN BURKE'S TRIBUTE.

"In the mind of the thoughtful reader the two distinct duties of the daily press are to present in its news columns a true picture of the world as it is, and in its editorial columns a perfect picture of the world as it should be.

"Thus teaching by the force of both precept and example you fulfill your function and constantly impress the world with the fact that the sin of today means the shame of tomorrow; that the industry of the present means the independence of the future, and that if our coming harvest would be happiness we should busy ourselves today sowing the golden grains of good.

"Such being our estimate of your mission we readily appreciate the sound reason upon which rest those broad and generous privileges with which the press has been invested by the American people.

"Without fear and without favor you may turn the searchlight of truth upon the high and lowly in public and private places and reveal as a result not only the good that men are doing but also the evil that is being wrought by those who are saints in the sunlight but sinners in the shadow.

"Being thus perched upon a pedestal of power akin to that of judge and juror, from which you may exalt and execrate at will, the people insist for the maintenance of your efficiency that you be given the widest latitude of liberty, while at the same time they look for protection against the abuse of that power not so much to legislative enactments as to that high sense of integrity and responsibility which should govern

broad-gauged and honorable men in the faithful performance of a public duty.

"Individual wrongs are not to be rectified by the wholesale punishment of a profession, and he who attempts to muzzle all because of the folly of the one is apt, indeed, to be severely bitten in the attempt. Truth never shunned the light of day, and an honest man never feared publicity. On the other hand, a lie never found a logical or comfortable lodging place in the columns of a well-regulated newspaper.

"We would have you encourage, therefore, at all times by your example the utmost care and conservatism in every department of journalism, but with the same zeal we bid you resist, with every God-given faculty you possess, the slightest encroachment upon those powers in the intelligent exercise of which the newspaper has become the most vigilant guardian of our liberties and institutions.

"Slight as the encroachment may seem at first, we must not forget that the precedent of today becomes the established law of tomorrow.

"Our concluding wish is that as long as time lasts the press shall remain fair, fearless and free in the performance of its duties and the exercise of its rights."

FROM "OLD KING COAL."

John H. Jones, president of the Pittsburg & Buffalo Company, responded to the toast "Old King Coal." He referred to his reconstructed estimate of the newspaper man since he came to know him well.

"My first impression of a newspaper man," said Mr. Jones, "was that he was one of those shrewd fellows endowed with Sherlock Holmes abilities, who would fly through space, enter second-story windows or in some mysterious manner gain an entrance to the individual or meeting, secrete himself in the rafters of the auditorium or niche of the sacred halls, and in this way learn our every secret and send them broadcast into the world. I thought the more cunning the reporter or news gatherer the greater his remuneration. But on becoming better acquainted with this mysterious individual I found him to be somewhat on the mortal order, like the rest of us; a person in whom you could place the most implicit confidence and not fear a betrayal; a man whose business and moral standard was such that when he came into your office and asked you about any projected business proposition in which the public had an interest, or which was of a semi-public nature, and about your connection therewith, that you could freely discuss the subject with him and depend upon it that nothing but what you wish made public property would appear on the front page of the next issue of his paper in bold, artistic type."

BURGOYNE'S VERSES.

Arthur G. Burgoyne, of the Pittsburg *Leader*, spoke for the Press Club, after the guests had sung some verses of his own composition, set to the tune of "Tammany," and referring to the last call of Gabriel. The last stanza follows:

"Old Peter possibly to scan
Their faces may endeavor,
But when he says, 'Your badges, pray,'
And Press Club colors all display,
To each he'll cry, 'Up front, young man,
And sit right there forever.'"

CONGRESSMAN JOHN DALZELL'S ADDRESS.

Congressman John Dalzell's toast was "Pennsylvania and Pittsburg." He said of the press:

"The newspaper editor stands to me for the most omniscient of men. Compelled by his profession continually to keep abreast of the times, he must necessarily be possessed of wide and varied information. Many causes have combined to constitute the newspaper one of the most potent influences in our modern complex civilization.

"The character of the press itself has radically changed. Time was when the newspaper contained nothing but news of local happenings and advertisements. Discussion of public affairs, of questions of moment of whatever character, depended upon the orator on the platform or stump, or upon the pamphleteers. The modern newspaper has taken the place of the lecturer and the pamphlet, and the modern editor has taken the place of the pamphleteer. Since the advent of the Sunday edition the newspaper has taken also, for many, the place of the magazine. The press has become indeed the third estate.

"It is one of the glories of the press that it is not only an educator but that it is also the consistent guardian of liberty in the assertion and practice of the freedom of written speech. Laws seeking to limit that freedom are as blanks on the statute book or withes in the hands of Samson."

CHARLES EMORY SMITH.

Charles Emory Smith, former Postmaster-General and now editor of the Philadelphia *Press*, said in closing:

"I believe that journalism in Pennsylvania is beginning to understand its full power. It has progressed wonderfully in recent years and its outlook for further betterment is good indeed. There is greater work before it in this State now than ever—to purify politics and other public affairs. In performing these duties in a judicious manner journalism will exemplify its value to the public.

"No greater tribute was ever paid to the American press than that of M. Witte, the Russian peace plenipotentiary, when he said that the pen wielded by an American journalist is greater than the sword."

And the banquet closed with singing "Should Auld Acquaintance Be Forgot?"

On Thursday evening the new building of the Pittsburg *Dispatch* was turned over to the Press Club for holding "A Night in Bohemia." The visitors were enthusiastic about the new building. It is said that no less than 10,000 people attended the dance and reception.

BUSINESS SESSION.

A brief business session was held on Wednesday morning. The report of Secretary Habgood showed the attendance was 338, and 16 new members were received after the opening of the session. Mr. Habgood led a discussion on "Advertising from a Newspaper Standpoint." W. T. Smith, of Wilkesbarre, presented a resolution that a committee of three be appointed to investigate the paper situation in the State.

W. S. Cappeller, of the Mansfield (O.) *News*, who was to have delivered an address, was ill and could not be present.

EDITOR FARR ON LIBEL BILL.

John R. Farr, former speaker of the House of Representatives at Harrisburg, and editor of Scranton *Truth*, delivered the principal address of the session. His topic was "Our State Association—Its Past and Future." He said in part:

"In spite of the fact that the newspapers of the State wield a great power, they allowed the Legislature to muzzle them, and then they sent back to the State Assembly the very men who muzzled them. The newspapers should recognize the fact that they are a power and not permit the passage of such iniquitous legislation as the Salus-Grady bill. They should get together and assert themselves.

"The newspaper men of this State should be the bosses and not permit a set of self-constituted politicians to run the affairs of this Commonwealth. The newspapers of this country pave the way for the coming of Roosevelt. The newspapers of Philadelphia overthrew the corrupt ring, and Mayor John Weaver's stand against the political machine followed.

"In my opinion the country papers are more of a power than the city papers, for the reason that they more closely represent the people. The country papers must and do stand by the people, and in that they are strong and wield a mighty power."

The *American Advertiser* for October presents a wonderful array of able articles by leading advertising experts and newspaper men on a great variety of topics connected with the business and science of advertising. Among the prominent subjects treated are the following: "Buy Only Advertised Goods," "Cash Discount to Advertising Agents," "The Personal Note," "Things Which Contribute to Effective Advertising," "Advertising a Factor in Developing a Country's Resources," "Should Publishers Guarantee Results?" "Political Advertising," and so on, covering a score or more of other practical topics.

It is a rich mine in which, with the consent of the publish- month novelties in the shape of bended quads and quotations ers, we expect to delve for the benefit of the readers of the NATIONAL PRINTER-JOURNALIST. The *American Advertiser* is the oldest advertising journal in the world, now well along in its twenty-first volume. It makes no effort at typographic high art or display, but it is full of meat. Mr. Lee Starke is publisher and John M. Forbes editor-in-chief, and it is issued at Temple Court, New York City.

* * *

Executive Committeeman Irving Todd, of Minnesota, favored this office with a copy of his paper containing a brief account of the formation of a district editorial association for the Third Congressional District of that state. County and district associations have been a hobby with us for more than twenty years. They should be organized for business and for intelligent coöperation for the accomplishing of worthy ends for the benefit of the newspapers and the people in the districts covered by the organizations. This new district association was organized at Northfield, Saturday, Sept. 30, with the following named officers: President, J. P. Heatwole, *Northfield News;* vice-presidents, J. S. Pardee, *Red Wing News,* and J. W. Craven, *Norwood Times;* secretary, Andrew Finstuen, *Kenyon Leader;* treasurer, J. W. Wrabeck, *New Prague Times;* executive committee, Carlos Avery, *Hutchinson Leader;* M. W. Grimes, *Le Sueur News;* H. C. Miller, *St. Peter Free Press;* E. Klancke, *Waconia Patriot;* J. E. Casey, *Jordan Independent;* C. P. Carpenter, *Northfield Independent;* D. C. Pierce, *Goodhue Enterprise;* Irving Todd, jr., *Hastings Gazette;* A. T. Johnson, *Winthrop News.* Four counties were represented, although no notice had been given.

* * *

We were pleased to receive the announcement of the marriage, on Sept. 21, of Mr. Walter C. Clark to Miss Octavia Mackenzie, at Rahway, N. J. Mr. Clark was for many years a resident of Chicago and occupied an office with the NATIONAL PRINTER-JOURNALIST. He has charge of the eastern office of the Hamilton Manufacturing Company at Rahway. He has done well and we pronounce the editorial benediction.

PARTIES AND CANDIDATES AS ADVERTISERS.

The rapidly growing tendency of the candidate for public office, or the reformer with an issue to exploit, to seek the columns of the daily newspaper and present his claims to consideration or marshal his arguments in his own way in the type that suits him, confident of the readers' interest in a well displayed advertisement. In the Southern States, where a victory at the primaries is equivalent to election, the practice is an old, old story. It is the only sure way to bring the candidate and the voters together. No man hides his light under a bushel. He rakes his opponent's record fore and aft, and points with pride to his own. He advertises as he talks on the stump, knowing that a hundred will read where one will hear. In Baltimore during a campaign the front pages of the newspapers are covered with party, committee and individual appeals to the voter—all at space rates, the columns being thrown open to both sides."—New York *Sun* Editorial.

The Nashville *American,* commenting upon the *Sun's* editorial, says: "The *Sun* adds that Governor Douglass was the first northern man to realize the value of the political advertisement with cuts. We think this is a mistake, though Governor Douglass was an unusually large advertiser. Chairman Cortelyou was the first chairman of a national committee to employ display advertisements in newspapers and magazines to present the claims of a political party and its candidate for President. Mr. Cortelyou spent large sums for such advertising, and it was a wise investment. It was a policy that will be followed by both parties hereafter.

"We have not noticed that display advertising has been used to any great extent by southern candidates, except in Maryland, though cards, addresses and speeches of candidates are sometimes printed as advertising matter. More frequently candidates for State offices use the daily papers as vehicles of communication with the public without cost to themselves. It is a good thing for them, as it is the cheapest and most effective method of reaching a larger number of people than could be reached in any other way, even through many speeches. In such cases the newspapers feel that they can well afford to publish such matters as news."

ADVERTISING AND TRANSPORTATION RATES.

Newspaper rates are like railroad rates in at least two phases—differentials and discounts for tonnage. Advertising is singularly like transportation. Its cost is based upon the ability of the advertiser to pay the freight—upon his ability to sell goods in the field in which the medium circulates, upon the density, the quality and the buying power of the population reached. In short, I make bold to suggest that the inequalities if not the iniquities of railroad rates have their counterparts in the newspaper business. The fault usually lies in the minimum rate, which should be the basis of the cost of advertising. The smaller newspapers must charge proportionately more, like the smaller railroads, because certain fixed costs are approximately, or rather proportionately, larger. The charges for position should be inconsiderable beside those now generally in force.

Position if sold at all should be put within the reach of the advertiser instead of prohibited by the price.—Medill McCormick, Publisher Chicago *Tribune.*

We have received the October NATIONAL PRINTER-JOURNALIST of Chicago. It is a handsome one and in many ways calculated to delight the eye of an artistic printer. Its half-tone and letter press pages are beautifully printed and the subject matter is so varied that it ought to suit all tastes. The NATIONAL JOURNALIST sells for 20 cents a copy or $2 a year, and is worth it.—Cambridge, Mass., *Times,* Oct. 27.

THE EDITORIAL PAGE OF A COUNTRY WEEKLY.

By George C. Woodruff, Litchfield (Conn.) *Enquirer.**

THERE is, perhaps, no department of a weekly paper that presents more practical difficulties than the editorial page. This is due to a combination of circumstances. To be perfectly candid, I think that the editor of the average country weekly is not generally equipped to handle the editorial page as it should be handled. If we were all To mWallses there would be no trouble each week in having two columns of editorials bubbling over with wit and wisdom. But, unfortunately, nature has not endowed most of us with the striking ability, in the editorial line, of the Hartford man. This is essentially the age of the specialist, and this is true in newspaper work as well as in any other lines. The successful editorial writer is made, not born. He acquires proficiency by practice and sticking to his one particular line. The editor of the average country weekly, on the other hand, has no time to be a specialist. He is usually his own editorial writer, local reporter, religious, musical and theatrical critic, bookkeeper and very often all-around man in the pressroom. Under these circumstances the wonder is, not that so little attention is usually paid to the editorial page but that any attention is paid to it at all.

Of the value of an attractive and instructive editorial page I think there can be no doubt. But better no editorials at all than a series of dry articles written merely to fill space. Some years ago the then editor of the Litchfield *Enquirer*, the late George A. Hickox, who for a quarter of a century ably and successfully directed the policy of that paper, had a series of interesting editorials upon Julius Caesar which caused the funny man of the Danbury *News* to remark, "Julius Caesar is highly thought of in Litchfield." On the other hand, it is equally bad to fall in the habit of writing merely short, so-called funny paragraphs, for that is a role which very few editors are capable of successfully filling.

Another difficulty that presents itself is the fact that in the offices of many weeklies the demand for copy for the next paper comes almost as soon as the last one is out. It is an accepted fundamental principle that matters of local interest should be given preference over anything else. I can best illustrate this by quoting from the remark once made to me by a subscriber to the *Enquirer*, a man prominent in State and national politics. He said, "George, why don't you give us more locals? We don't care a d—n for the editorial column. We are not interested in what you may think about matters of State or national importance, but we do want to know if Jones has painted his barn, or if Farmer Brown has raised a prize pumpkin, or Robinson's children have the measles." After four or five days spent in "demnition grind" furnishing aforesaid local copy, industriously and judiciously using the scissors, writing out many of the advertisements that are to be changed, whipping into shape local correspondence and doing a thousand and one other things, the editor of the average weekly has little inclination for editorial writing even if there is space for it.

The greatest obstacle that presents itself to the country editor with aspirations as to the editorial page is what I may call local environment. He is not hired by an individual or company to write on demand, but he is the owner of his own paper, and usually the best-known man in his community. He naturally learns a great deal that is kept from the general public and that would make mighty good copy, but he also desires to retain the good will of his fellow citizens. It is perfectly safe for him to write on world, national or even State topics, provided he eschews too much politics. But if he treats editorially a matter of live home interest, he almost always finds himself in hot water. Then, as the average country editor is not usually a high officer in a New York life insurance company, or connected with the Standard Oil trust, the financial end of the question comes close home to him. I do not mean to say that the country editor is a coward, but no man can afford to quarrel with his bread and butter.

The views I have just expressed are those given by many editors for not handling editorially, without gloves, matters of home interest. With this view I personally do not agree. As far as I know, I have never lost a subscriber by writing concerning local matters without fear or favor. And, with three or four exceptions, this is also true with regard to political editorials. The day has gone by when the reading public, whether it be in the city or country, blindly follows the lead of the party organ. The editor who is farsighted enough and honest enough to forget that he is a mere partisan and handles men and politics from the broad standpoint of the best interests of his town, city, State or nation, is the man who commands the widest influence and gains the greatest respect, whether he be the editor of a small country weekly or of a large city daily.

It is also true that the country editor is hampered by the fact that he is not surrounded by any kind of a halo. Frequently he has grown up in the community where he now lives. Not only is everything that he has ever done known to the entire town, but also a great many things that he never has done. Nine out of ten people think that they are as well informed upon practically every topic as the editor himself, and eight out of ten think that they can write better than he can. Thus, at the very start, he finds himself up against a stone wall of opposition. But if he is fair, honest and fearless, he is bound sooner or later to break down this opposition and not only win admiration and respect for himself, but, what is far more important, secure the end he has advocated in his paper. To do this successfully the country editor must combine the diplomacy of a De Witte with the aggressive butt-in-edness of a Roosevelt.

I have referred to the fact that the editor of a country weekly must be absolutely fearless. I mean this from a mental and moral and not merely physical standpoint. If his one aim in life is, as it should be, to make a success in every department of his paper, he must give up all thoughts of political preferment. Office seeking and holding do not mix with successful country editorial work any better than do oil and water, and woe be to the man who attempts it. As long as the editor sticks to his legitimate field he is all right, but when he steps outside of that he will find as many rocks and quicksands as does the clergyman who forgets that he is, first and foremost, the minister of the gospel of Jesus Christ. Dogmatism is as much out of place in the press as it is in the pulpit. No editor should ever, for a single minute, lose sight of the fact that there are two sides to every question.

I have written at some length of the difficulties that beset the country editor who desires to make a success of his editorial page. But I wish to most emphatically state that I believe that the country newspaper that has no such page is as much adrift as a ship without a rudder. It is not only the duty but the privilege of the editor to detect and follow public opinion as well as to try and mold that same opinion. In writing, each man should bear in mind not only his limitations but those points in which he is particularly strong.

In editorial writing, as well as in natural physics, it is always wisest to proceed along the line of the least resistance. Molasses catches more flies than vinegar. Never antagonize

* Paper read before the Connecticut Weekly Press Association.

editorially unless it is absolutely necessary. But when you are sure you are right, then go ahead fearlessly. It seems to me that no better illustration of this can be found than the editorial utterances of the late lamented Joshua A. Bolles, of the New Milford *Gazette*. Mr. Bolles was an ardent advocate of the value of the editorial page. He was a student and a fearless writer. As a result he was copied probably more than any other editor of a country weekly in Connecticut. He always had the courage of his convictions; but it seems to me, and I say this with all due respect, that Mr. Bolles would have accomplished greater results had he oftener considered both sides of a question in which he was interested.

It is easier to criticise than to construct; to find fault than to suggest a remedy. Most of the members of this association have been in the newspaper business longer and know all the ins and outs better than I. I do not wish to be considered presumptuous, but want to say this along the line of suggestion: In every issue have not less than one column of live editorials. If you think you have not time or ability to do this yourself, hire some one to do it for you. It will pay. Have a few short editorial paragraphs on matters of the day and then one or two solid editorials. Do not hesitate to tackle any subject in which you know your readers are interested, provided you have real knowledge of the subject yourself. If you have none, acquire it by some means and then write. When possible give the preference to editorials on matters of local interest. Guard the editorial column as carefully as the space of your best-paying advertiser, and no more think of omitting it than you would of failing to change the ad. Then let us have an experience meeting at, say, the April gathering of the association and see if the policy I have outlined has not paid.

The members of the Connecticut Editorial Association have often discussed the question how they can make the association more of a power in the State. I think that this desirable result can be accomplished more through the editorial page than in any other way. In union there is strength, and if we all agree to keep pounding away at any particular evil until that evil is cured, we will come pretty near arriving at the result desired. For instance, if each editor for the next year and a half should devote a large portion of his editorial space to civic morality as applied to this Commonwealth, I believe that many of the evils which we all know now exist would be done away with. We would have back of us the best people of the State, and this force would be so strong that the city dailies would be compelled to fall into line. Legislative graft would become unpopular, if not dangerous. Stationery and pen-knife steals, unearned reportorial and legislative employees gratuities would become a thing of the past. It rests with you, gentlemen of the Connecticut Editorial Association, to say whether you will hereafter fire bullets or merely blank cartridges. As far as I know, practically only two members of this association, outside of the city dailies, have any regular real editorial page. As the logical sequence, these papers are powers for good in their respective communities. What they have done, you all can do. Will you?

THE NEWSPAPER A SCHOOL TEXT-BOOK.

D. O. McRay, member of the Kansas School Text Book Commission, says:

"Our school laws are lame, in that they do not make the teaching of current events compulsory, as one of the regularly adopted texts to be studied daily. That omission should be supplied by legislative enactment. However, Kansas teachers, who are ever in the forefront of movements that will advance the cause of education, realize the importance of adding this interesting and important study to their daily program. Every village, town and city of Kansas possesses a text book for the study of current events in its local newspaper. These reflectors of the world's progress and advancement are a home product and are worthy to be read in the schools of the State to whose growth and development they have so generously contributed.

"Every boy and girl who is able to read newspapers intelligently should be able to converse upon current events. Every school teacher should be able to do so, too. It is of as much importance that current history should be studied in the schools as that history of the past ages and generations should be drilled into the brains of the pupils. Some of the time given to the study of Greek and fads could be devoted to newspaper reading with profit to the student and the teachers as well."

ENTERING THE MINISTRY.

A Fable with an Advertising Moral.

A good old Mother Hen hatched out a brood of four sister chicks and one brother chick.

As a matter of course, the brother chick was the favorite. The sister chicks were constantly admonished to take good care of their "little brother."

When the brood had grown to chickhood, the Mother decided to go visiting one afternoon, and as she was leaving she said—for the six hundred and sixty-eighth time:

"Now, sisters, take good care of your lilttle brother," and they all said, "Sure!"

In the evening when the Mother Hen returned from her visit she found the sister chicks in tears, and asked: "Why, sister chicks, what's the matter? Where's your little brother?"

And a little sister chick said: "Well, that is just what we're crying for. After you went away the minister came and the woman came out of the house and grabbed little brother by the heels, and chopped his head off and fed him to the minister."

Then the Mother Hen sat down and rested her bill on a chip, and joined the sister chicks in their weeping for a brief season; then she got up and wiped the tears off her bill on a stick of stove wood and said:

"Well, this is sad news indeed, but it might have been worse. I always wanted your little brother to enter the ministry, and it's just as well that he has, for he never would have amounted to much as a layman anyway. You've learned how to scratch for yourselves this afternoon. I'm going to lay plans for another brood."

Moral.—If your advertising plans don't hatch out just as you expected, remember the philosophy of the old Mother Hen, and lose no time in laying plans for another campaign.—*Agricultural Advertising.*

DECLARED PRINCIPLES OF THE CITIZENS' INDUSTRIAL ASSOCIATION OF AMERICA.

"No closed shop."

"No restriction as to the use of tools, machinery or material, except such as are unsafe."

"No limitation of output."

"No restriction as to the number of apprentices and helpers, when of proper age."

"No boycott."

"No sympathetic strike."

"No sacrifice of independent workmen to the labor union."

"No compulsory use of the union label."

"That power through organization be placed in the hands of the people to effectually control the acts of all organizations when such acts relate to the public welfare, thus to perpetuate the individual liberty of every citizen and prevent interference with the continuous operation of industries."

MONEY VALUE OF ART IN PRINTING.

By Ingalls Kimball.
Cheltenham Press.

From a paper read at the annual meeting of the Master Printers' Association, New York.

Money is supposed to be wholly sordid, and people talk about "art for art's sake."

I should like to be able to convince you that the man who takes for his motto "art for my sake" will come much closer to success, and incidentally much closer to the working motto of the greatest artists, than he who keeps "art for art's sake" before him.

In other words, I would like to demonstrate that art in printing is not only worthy but profitable. If a number of printers gathered together had each given him an electrotype, a supply of paper and ink, and a press upon which to work, and if each man produced with the materials at hand the best bit of presswork he could produce, it is probable that one man would produce a piece of work mechanically perfect with the expenditure of a great amount of time and energy, and that another would produce a very bad bit of presswork, possibly with a minimum of time; but the great average would take approximately the same number of hours for approximately the same result.

To arrive at the cost of presswork is a mere question of mathematics. The amount of profit any one office can make on a given piece of work of this kind depends, therefore, not so much on the time spent on it, as on the percentage that must be charged to any job for the cost of superintendence, rent and other fixed charges, plus the cost of the work itself. The whole subtracted from the money received leaves the profit.

The country offices, with lower rents, often lower wages, can almost invariably make a profit on what would to the city establishment be a loss. However, the very big office even in the metropolis outclasses the smaller office, because its percentage of fixed charges is immeasurably less. It buys in quantities that give it every advantage in the cost of materials, and is generally fitted with machinery which saves money in a big shop and which the small shop is better off without.

This statement of general business conditions seems at first sight dismal. As a matter of fact, the smaller offices are in a position to make for their owners (aside from mere interest on capital) more money than the big ones, and you will find the remedy for what might have seemed a dismal condition in the one word "art."

WHAT IS "ART"?

Let it be thoroughly understood what is meant by this word. William Morris said, "Art is the expression of man's joy in his work." In a sense Morris was right, for until he began to enjoy his work, man did not begin to embellish it. Prof. Charles Eliot Norton's definition, "Art is the expression of thought," was better.

In the example of the one hundred bits of presswork from like plates on like paper, with like facilities, there was no opportunity for thought. Skill and thought are two separate qualities. It is quite possible, for a man entirely incapable of thought to be a most excellent layer of paving stones. Deftness with the fingers is wholly a physical attribute, and the greatest thinkers are often ungainly and awkward in every movement.

To illustrate further this definition of art. A hut built purely to protect its inhabitants from the weather and the beasts has in it nothing of art; yet a beautiful building, though having primarily the same object as the hut, may be art in its highest form. As, for example, the Parthenon.

The sewing together of two pieces of cloth to form a covering represents utility. The embroidery with which the cloth is decorated represents art. Printing merely as a substitute for speech in conveying ideas represents utility. Printed matter, on the other hand, so contrived as to delight the eye represents art.

As any nation progresses, art and utility come closer and closer together until, indeed, almost every useful thing has in it certain elements of beauty.

No man, however lacking in artistic appreciation, however stingy with his money, would for one moment consider the erection of a building without the employment of an architect.

PRINTING AN ART FROM THE OUTSET.

Printing, unlike any of the other crafts, did not *grow* into an art. It began as an art. Early printers devoted all their energies to the reproduction of manuscript books, and toward the end of the fifteenth century, when printing really began, the production of books in manuscript had reached a state of perfection unequaled by any other art. These manuscripts were not merely utilitarian books. They were in most instances copies of books well known as to body matter, and gave distinction in each instance chiefly by the way in which they were copied and decorated.

Quite aside from the mere beauty of arrangement and decoration, the Gutenberg Bible is one of the most amazingly perfect specimens of typography and presswork ever seen, and the Gutenberg Bible is the first printed book of which we have any record. This mention of the Gutenberg Bible reminds us that all of the early books were known by the name of the man who printed them, because it was from the way in which they were printed that they chiefly achieved distinction. We rarely hear of the publishers of the early days. All of us know of Aldus and Jens and Elzevir, and all of these men were printers.

During the nineteenth century, editions of books began to be recognized by the name of the publisher. Today the production of leading publishers have each an individuality of make-up quite aside from any individuality of the printer. Of course these books are, as a matter of fact, printed in dozens of different printing offices. It is doubtful if one could name more than five printing offices in the world whose productions are known, and in each of these cases the distinction arises not from mere mechanical excellence, but for what may be called, for lack of a better term, arrangement. Arrangement means the selection of proper types appropriate in size and design, the selection of paper, decisions as to margins, and the color of ink to be used. If instead of giving out to every man a plate to print, and paper to print it on, and ink to print it with, each man had been given a copy of, for example, the Lord's Prayer, and told to produce it in the printed form which he himself approved, the result would be as many different and wholly individual pieces of work as there are different and wholly individual members of the printing trade.

Even if a further restriction—that of price—were to be put upon this competition, the variety of examples, though somewhat more limited, would still be great.

RECOGNIZE ESTABLISHED RULES.

In every art there are certain laws that cannot be transgressed. You all recognize discord on the piano. In the same way there are discords in work, in painting and also in printing. Unfortunately, the laws of art as applied to printing have never been properly formulated. Every man must, to a certain extent, learn for himself. All of us have not the time nor the training to learn the laws of good composition, but it is vastly safer to take a few of which we are certain and

stick to them, than it is to experiment in novelty for the sake of novelty. Don't try to convince yourself, for instance, that curious pinks and greens are the colors with which to embellish typography.

You have before you the successes of nearly five hundred years in black and red. Surely there is variety enough in this. Don't try to establish new laws of margin and to make yourself believe that dead in the center of a page is the place for a type page. No good book has ever been made in this way, and probably none ever will be.

Just why modern type and old-style types are entirely different in spirit and in detail is interesting and instructive, but don't bother your head about why. Old-style is good in its place, modern is good in its place, only don't mix them.

The big printing office is a contracting department, each printer is an architect. The value of art is today and always has been expressed in money. Art has never been more liberally paid than it is in this the so-called age of commercialism.

COMPETE IN QUALITY.

Don't undertake to compete with each other in price, for such competition can only end in turning all work over to people who, from the very nature of things, can beat you at this game. Compete with each other in the character of work you turn out as well as its mere quantity. Let the price of your work go up as the value of it goes up, and the value of it will go up steadily as long as you improve it in arrangement.

When a customer comes to you wanting a twelve-page book with a four-page cover, try to see if you cannot serve his purpose by giving him a sixteen-page book without a cover, at even less price than the other would cost, including an allowance for yourself for the service you have actually performed.

This sort of treatment will build you up a clientage that another man cannot possibly take away from you by a mere difference in quotation. It puts you beyond competition, because you are dealing with something in which there is no competition except character. Make yourself independent of the journeyman by getting into his work character which he is not yet able to give it. In other words, make yourself to the greatest possible degree an artist, and you will be paid for the art part of your work. Let us have printers who are not mere manufacturers of printed matter.

CONCERNING SPECIAL EDITIONS.

The *Courier* has been frequently importuned to publish special or industrial numbers by travelers who have had more or less experience in the solicitation part of the work and who generally present credentials which vouchsafe their integrity.

But the management has systematically rejected all such proposals as a precautionary measure for the business men, for it is not untrue that many such opportunities might be taken with financial advantage if attending objections were to receive no consideration.

These gentlemen are in the work as professionals, either temporarily or otherwise. Of necessity they must have a scheme, perfectly legitimate no doubt, but of rather uncertain proportions which occasionally require to be bolstered by extravagant and sweeping assurances to business men for the fulfillment of which the merchant relies not on the oily-tongued orator but on the integrity of the publisher, who as a matter of fact seldom has any intimation of the assurances made. There is a kind of glamour by which the traveler inveigles and appears to be offering something exceptional, impossible for the local publication without the stranger's connection.

But this is untrue.

This paper will publish a special edition—and a creditable one—as often as a disposition is shown in the community to reciprocate in meeting the expense of such a publication, and by this we do not mean to divide the amount with a stranger who makes his living by arousing the business man's interest in the value of advertising his own business and the city in general in an industrial edition. If there is to be an immediate pecuniary profit we see no valid reason for dividing it with one who has never been a factor in local progress. And on the other hand, if without profit the expense may reasonably be expected to be borne by those benefited. Just now it seems desirable to stave off professional enthusiasm arousers until such time as business men and local organizations see th advantage of such exploitation and are willing to pay accordingly.—Corona (Cal.) *Courier*, Oct. 7, 1905.

THE EDITORIAL JOURNEY.

By Addison B. Burk, of the Philadelphia *North American*.

MEMBERS of the National Editorial Association saw a great deal of Oregon besides the exhibition at Portland, which was described in the September number of the NATIONAL PRINTER-JOURNALIST. We stopped at Portland from noon on September 27 until 9 p. m. September 29, and during the three days, left our cars to be cleaned, and put up at various hotels, the greater number of our party being quartered at the American Inn, on the Exposition grounds. Besides taking a cursory view of the exhibition, nearly all found time to make a tour of the city and ascend Portland Heights, from which a fine view of Mounts Helena, Hood and Rainier is presented. A few made side trips to Tacoma and Seattle, and a considerable party devoted one day to a trip to Astoria, at the mouth of the Columbia river, and to Seaside Park, the ocean resort a few miles beyond Astoria. Another contingent ascended the Columbia river to The Dalles and gave glowing reports of the scenery presented on the way. No one could make more than one of these side trips from Portland for want of time. We selected the journey to Astoria, more than a hundred miles away, the trip consuming an entire day. Our route carried us down the Willamette river to the Columbia and thence down that noble river to its mouth. Astoria is named after the famous Astors of New York, rivals of the Hudson's Bay Company in the development of the fur trade of the Northwest. It is now a great salmon fishery village or city in the immediate vicinity of the terminal point of the Lewis and Clark expedition. Much of the city is built upon pilings, and miles of nets are spread out to dry and be repaired, while in the distance, over the broad waters of the Columbia river, may be seen hundreds of fishing boats spreading their nets to capture the famous Chinook or Columbia river salmon—the finest in the world. Our train passed Astoria on the outward journey and did not stop to let us off until we reached Seaside, an attractive beach not unlike the New Jersey coast except that the shore is covered with cobble stones as well as sand, and that within sight of the hotel a spur of the mountains, thickly wooded, comes down to the sea. Seaside is a straggling village far removed from the sea, but there is one hotel on the ocean front, where we dined. Returning from Seaside we visited a government fort that guards the entrance to the Columbia river and saw the place where Lewis and Clark wintered after their long journey to the Pacific. Returning to Astoria we inspected the great canneries where the salmon are packed for the market. American, Chinese and Japanese are employed in the industry, which involves the making of tin cans as well as the cooking and packing of the fish. As souvenirs of our visit we were presented with cans of the salmon and can testify to their good quality. Editors of the two papers published in Astoria, the *Astorian* and the *Budget*, escorted our party through the canning factories and newspaper offices and extended every courtesy at their command. The city, like Topsy, has "just growed up," but it has 10,000 inhabitants and distributes $600,000 annually in wages connected with the fisheries. There is not enough level land to accommodate the houses and factories, and they are built partly over the water or wherever a foothold can be found on the steep hillside. Leaving Astoria late in the afternoon, we had a most enjoyable ride up the

Columbia river while the sun was sinking, the view being much more beautiful at this hour than in the morning.

We arrived at Portland too late in the evening to do any more sightseeing, and therefore turned our attention to statistics, learning therefrom that Portland had a population of only 821 in 1850, less than 3,000 in 1860 and had grown to a city of 125,000 in 1904. It is situated somewhat like Philadelphia—a hundred miles from the sea—but has an immense export trade, likely to grow with an extension of business in the Far East. The exports of lumber, wheat, flour, hops, etc., are enormous, for, although some Pacific ports are nearer the ocean than Portland, not one is so favorably situated to receive the products of an exceedingly rich tributary country.

When our large party assembled at the Portland station on the evening of June 29, prepared to start homeward, we were obliged to part from Mr. A. C. Jackson, the traveling passenger agent of the Southern Pacific Railroad, who had traveled with us for more than 2,800 miles and had been assiduous in his efforts to provide for our comfort and entertainment. The parting had been anticipated, however, and while we were on the station platform a beautiful silver tray, suitably inscribed, was presented to Mr. Jackson with many expressions of good will from the assembled scribes. Our route was over the Oregon Short Line Railroad, which ascends the Columbia river for many miles, presenting, we were told, some of the finest river scenery in the world. Unfortunately for us we traveled through this region in the dark, and what was still worse we did not reach our breakfast station at La Grande until 11 a. m. It is said that the way to a man's heart is through his stomach. Some confirmation of the saying is to be found in the fact that nothing is better calculated to destroy the usual good temper of an editor than to delay his breakfast. By the time we arrived at La Grande we were not only as hungry as wolves but about as amiable.

Having consumed all the visible food supplies in La Grande, we resumed our journey in better humor, passing on our way the famous Hot Springs, now a health resort. The Hot Springs are said to throw out 100,000 gallons of water an hour at a temperature of 198 degrees, forming a hot water lake of eight acres. At Baker City, which was our next stopping place, the Oregonians gave us our last treat of cherries, of which we had grown tired, and decorated our cars with carnations. Baker City is the center of a great mineral district and deserved more attention than we could give it in a hurried journey. At the next stop, Huntington, we changed engines and train crew, turned our watches one hour ahead and soon afterwards crossed the Snake river, which runs from Yellowstone Park to its junction with the Columbia. The Snake river forms part of the dividing line between Oregon and Idaho, and having crossed it we entered the latter State, only to leave it again by another crossing owing to the tortuous course of the river. We stopped for supper at Nampa, a railroad town of some importance with a fine hotel and several restaurants. Idaho is troubled at present by a Mormon invasion, of which Nampa appears to be the center, and it is not improbable that in a few years Idaho will be more distinctly Mormon than Utah. Leaving Nampa in the evening, we ran through Idaho during the night and in the morning some of us endeavored to get breakfast on a dining car, but the greater number remained hungry until Ogden was reached at noon. The food problem was such a serious matter during this part of the journey that we had no time to pay any attention to scenery, resources of the country or anything else. The only thing remaining in memory of Ogden is that we managed to get something to eat there. It is, we believe, a great railroad center, but to us it was only a means to an end. We were bound to Salt Lake City, where we arrived before 2 o'clock in the afternoon and, without stopping to look at the city, hurried away to Saltair, a resort on the Great Salt Lake, where many members of the party took a bath in water so salt that it sustained the least buoyant and enabled them to float or swim. Salt Lake is a great natural curiosity. It is an immense body of salt water gradually drying up, leaving on its shores deposits of salt of commercial value. Our train carried us over the salt meadows to a great pleasure pavilion, with bath houses stretching out into the lake. Some of these had been abandoned, the lake having receded, leaving them on dry land; others stretched out for fully half a mile in order to reach deep water. We spent the afternoon at Saltair, those of us who did not go in bathing being beset by Gentiles who warned us that upon our return to Salt Lake City we would be met by smooth tongued Mormons trying to persuade us that they were patriotic citizens who had abandoned polygamous practices. We were warned that the Mormons were consummate hypocrites and would present to us only the best side of their lives and were cautioned against accepting any of their fine sentiments as being genuine.

Speaking personally, we were not greatly impressed by these Gentile warnings, because they were given secretly and in whispers, whereas the Mormons were at least outspoken and apparently sincere. Returning to Salt Lake, we were given the reception the Gentiles had prophesied. Mormons acted as our hosts and were both smoothspoken and generous. We were escorted at once to the Tabernacle, one of the great auditoriums of the world—perhaps the greatest. It is an egg-shaped structure seating 8,000 people. Our party of 300 or more appeared insignificant in the gallery seats, the remainder of the hall being vacant. But the acoustic properties of the hall were such that every word spoken from the stage was distinctly heard at the extreme end of the galleries. The organ recital was the best we have ever attended, and the vox humana was used with such startling effect that many of the auditors believed that they were listening to an invisible chorus. The organists were extremely skillful and gave us a concert that will long live in memory. Speeches followed. The Mormons were well represented, as we had been warned they would be, by Apostle John Smith and by the editor of the *Deseret News*. They gave utterance to the most patriotic sentiments. No objection could be made to anything they said, but there remained in our minds the warning we had received, that the Mormons were fair-spoken but insincere. It would have been an easy matter to have responded to their fair words in kind, but Mr. Springer, of the Democratic Press Association of Illinois, who had been selected as our spokesman, went out of his way to endorse the Mormons, much to the disgust of the great majority of the editors present. The objection to the Mormons as citizens of the United States has seldom been fully expressed. Their polygamous practices (which they say they have abandoned) are usually the basis of the objections, but the real obstacle to thorough loyalty on the part of the Mormon is that he serves two masters, the Church and the State—and his first allegiance is to the Church. The Mormon Church is in fact a great political machine. It has no proper place in American political life. The Mormons themselves have so far recognized this that they have begun a migration to Mexico. They are not likely to become troublesome in Utah, where the Gentiles are sure of getting control within a few years, but they may get the upper hand in Idaho and bring on a conflict there between Church and State. (Since the above was written the anti-Mormon or American party has triumphed at Salt Lake, electing a Gentile mayor and getting control of City Councils for the first time.) It is quite probable that the Mormons are personally good people, but they can never become good Americans as long as they are under the rule of the heads of the church in opposition to the government.

Our time in Salt Lake was so limited and the distances to be traveled were so great that many of the editors had diffi-

culty in reaching the train on time. All kinds of conveyances were pressed into the service and some members of the party did not arrive at the station until the train had started to pull out. A few minutes before that event Mr. Greer, of Texas, had presented to our efficient secretary, William A. Ashbrook, of Johnsonburg, Ohio, on behalf of the editors, a fine diamond ring as an expression of appreciation of Mr. Ashbrook's services in arranging the excursion.

We were homeward bound, and our schedule called for no more stops except for a few hours each in Denver and Colorado Springs, and yet this part of the journey proved to be as interesting and instructive as any that had gone before. Leaving Salt Lake City at 7:40 p. m. July 1, our route lay through Utah and Colorado, the first stop being made at Grand Junction early in the morning of July 2. Three engines had been employed during the night in hauling our train up a very heavy grade to the junction, but we could see nothing of the scenery presented. Our next stopping place (for breakfast) was Glenwood Springs, a famous mountain resort with hot springs and a grand hotel. The scenery at this point and for many miles beyond was of the grandest description, the railroad running through deep gorges, along mountain streams and presenting at every turn views of snow-capped mountains.

The day was one of unalloyed delight. From the time we left Grand Junction very early in the morning until we arrived at Pueblo in the evening a succession of scenes was presented from the train window that cannot be excelled for beauty anywhere in the world. The train, in three sections, toiled up to Tennessee Pass, at an elevation of 10,441 feet, and then descended through the famous Royal Gorge, a stupendous creation of nature, fitting climax to a succession of magnificent mountain views. In midday on July 2 we passed through an April-like snow storm. In the distance we could see the Mount of the Holy Cross, made familiar by the pictures of famous artists. This mountain has, near its summit, deep crevices forming a cross in which the snow settles, never to be melted. At times the summit is covered with snow, but when it is bared, as in midsummer, the cross shines forth clear and distinct. It is one of the most beautiful mountains in the world and lends itself easily to picturesque representation.

As the road descends, following the mountain stream, the encircling hills come closer and closer together until there is scarcely any room for the railroad. At last in the Royal Gorge there is no room at all, and here the engineers have erected a bracket-like bridge suspended from the almost perpendicular cliffs, which traverses the gorge longitudinally and carries the train over the stream with which it shares the passage. The gorge is very impressive. The rocky cliffs ascend almost perpendicularly to a height of 2,000 feet. At their base in a narrow chasm dashes a wild mountain stream, and following its course, but with no bank room on which its tracks can be laid, the railroad is suspended in the air! Our train stops in the Royal Gorge for a few minutes that the editors may take a last look at the towering mountains, and shortly thereafter we emerge from the confined passageway and pass through broad meadow lands rich in fruit orchards and with signs in the distance of coal mines and oil wells.

On this part of the journey we stopped for a few minutes at Florence, a great railroad center with varied industries tributary to it, including oil, coal, silver and the products of the farm. Between Florence and Pueblo the distinguishing feature of the country as viewed from the train was fruit orchards. We arrived at Pueblo just in time for a good supper at the station restaurant, and those who were fortunate enough to get at the first table had an hour or more to view the city by electric light. It was Sunday, but nearly all the stores were open, especially those that had for sale souvenir postal cards and bric-a-brac. Leaving Pueblo, less than two hours' ride carried us to Colorado Springs, but we did not arrive there until nearly 11 o'clock at night, and sightseeing was postponed until the next day. We were kept awake, however, until long after midnight making arrangements for a trip up Pike's Peak. According to the original program we were to have a special train at 4 a. m., so that we could view the sunrise from the top of the mountain, but the hour was made later and later until eventually we did not start until the regular time for starting up the cog road, about 7 o'clock in the morning. The trip, after our other experiences, was somewhat disappointing. The morning was cold and near the summit of the mountain we came upon great patches of snow lying in sheltered crevices, and icicles were forming in the sun upon aerial pipe lines carrying water from the mountain streams to water tanks. Midway on the way up the mountain we passed the office of the Pike's Peak *Daily News*, which ought to be a profitable enterprise, for the papers sell at ten cents each and nearly every traveler buys one to see his name in print. Even the editors succumbed to this temptation. All issues of the paper are substantially the same except for changes in the list of names of those who ascend the mountain. While the cars are filling up for the ascent, the names of the passengers are collected and by the time the cars have reached the newspaper office on their return trip the papers have been printed with the list of tourists. Such enterprise is of course rewarded by purchases of copies to be sent home to friends. From the summit the view was very grand, but, the atmosphere being somewhat hazy, the scenic effect was disappointing. It was too cold for comfort and in a very few minutes we were ready to make the descent. So many hours were consumed in the Pike's Peak trip that those who made it had no time for anything else, although in the journey to the base of the mountain they got a glimpse of Manitou and the Garden of the Gods. Some of those who did not go to Pike's Peak went on an excursion to the famous mining camp, Cripple Creek, over a famous scenic railway, and others contented themselves with a drive through the Garden of the Gods and Manitou.

The Garden of the Gods is a great natural curiosity, its feature being immense rocks standing up boldly from an almost level plain and carved by nature into fantastic shapes. Wind, rain and the sand blast have eroded the softer parts of these rocks, the action of the elements producing odd forms, all of which have been named to the satisfaction of the imaginative. Colorado Springs is a great health resort, the home of many millionaires, and in every way an attractive city, but we had no time to view it, nor to visit the Printers' Home, which is one of its institutions. This home was founded as a result of donations for the purpose by Messrs. Childs and Drexel, of the *Public Ledger* of Philadelphia, and for a time bore their name; but it has been built and maintained chiefly by the contributions of union printers throughout the country. On a previous visit of the N. E. A. to California, a stop was made at Colorado Springs that the editors might attend the dedication and opening of the home. On that occasion Mr. George W. Childs was present and met the editorial party again in San Francisco.

We left Colorado Springs at noon on July 3 for Denver, which was to be our last stopping place for sightseeing. It proved to be one of the best, for we were royally entertained during the few hours we remained there. Upon our arrival about 2:30 p. m. we were delayed for a time looking after our baggage, as at that point our train was divided and the several cars took various routes to our common destination, St. Louis. But a committee of the Chamber of Commerce of Denver took charge of the ladies and escorted them to the Hotel Savoy, where, in an immense dining hall, our party was gathered together for a farewell banquet. It was the finest entertainment of the kind we had had on our entire trip, the only drawback being that we were jaded by long travel and that we did not have time to thoroughly enjoy the literary entertainment that had been provided for us. Mayor Speer, a former Pennsylvanian, who welcomed us on behalf of the city,

told us that when he arrived in Denver some years ago he was a mere shadow of a man, an almost hopeless invalid. Health had returned to him while breathing the pure mountain air, and as he spoke to us he presented no sign of pulmonary trouble, for he was not only a vigorous but a well-built man, not much short of six feet in height. Others to welcome us were former President of the N. E. A. Wolfe Londener and former Secretary Pierce. After the dinner we were hurried away for a trolley ride—"Seeing Denver"—and we were told that the Denver company controlling the cars had invented this system of showing a city to strangers and had introduced it in the eastern cities—Boston, New York, etc. In Denver, as in the eastern cities, the tour is usually made in great automobiles, but large parties are taken in trolley cars with a guide on each car to explain the points of interest. We were fortunate in having a guide who not only gave us abundant information but imparted it with Celtic humor, so that those who heard him probably have a more distinct impression of Denver than of any other place they visited. Denver is one of the most prosperous cities in all the western country, with great stores and office buildings equal to those of the larger cities of the East and the finest array of private residences to be found in any city of its size. In the suburban section irrigation is employed to provide beautiful lawns, and the contrast between the artificial creations and the natural lots was called to our attention while our guide recited the lines:

"Little drops of water, little grains of sand,
Make a mighty difference in the price of western land."

A moment later he explained that when they could not get water in any other way they planted onions in the same patches with potatoes. The onions bring tears in the eyes of the potatoes and thus furnish the water needed. Crossing a bridge over an insignificant stream, he called out solemnly: "Ladies and gentlemen, you are now passing over the largest stream of its size in the world." Pointing to an old hotel, he told us that it was the place where Horace Greeley stopped and where, after he had paid $1.50 for a shave and $2.50 for a ham sandwich, he had felt inspired to write his famous editorial "Go West, young man; go West."

We left Denver in the evening, two of our cars going to St. Louis by way of the Union Pacific, two by the Burlington, two by the Santa Fe and two by the Rock Island route. Of this part of the return trip we can of course record nothing except what happened to our own party. The car Rome, carrying Pennsylvanians, and the car Helvetia, with Ohio editors, took the Rock Island route and were greatly delayed, partly because of the holiday, for we were traveling on the Fourth of July, but chiefly because of an immense movement of trains westward carrying the delegates of the Epworth League, who were about to hold their convention in Denver.

During the night we passed from Colorado to Kansas and spent the national holiday passing through the latter State. There were fertile fields all the way, with prosperous towns and villages along the line, but the scenery was not attractive compared with that which we had seen within the last few days. Our journey was enlivened by celebrations of the Fourth on the train, but chiefly by the local entertainments provided on the way.

We were in the heart of the continent far removed from the centers of population which monopolize the attention of the country when patriotism is to be manifested in gorgeous pageants, and yet here, on the sparsely settled prairies of Kansas, each small community was having its Fourth of July celebration. We could not leave the train to join in the festivities, but we greatly enjoyed the numerous parades and picnics of which we caught glimpses in our journey, and all of us were impressed by the reflection that 80,000,000 of people were thus joining in celebrating the Declaration of Independence.

As we were homeward bound, the only stops we made were for meals or for the convenience of other passengers on the train, but for this we were duly thankful, as we had had enough of sightseeing. Making a brief stop at Topeka, the capital city, just as the sun was sinking, we reached Kansas City after midnight. Thence we journeyed through Missouri to St. Louis many hours behind time, arriving about noon on July 5. Here we met some members of our party who had traveled by other routes, but the greater number had arrived before us and had already departed for their homes. Some of our own party hurried away immediately upon their arrival, but a few of us lingered in St. Louis until the next day and found a visit to the remains of the St. Louis Exposition well worth while, as many of the buildings were still standing and the scenic effects remained.

Our party had dwindled to a dozen or so when the next day, July 6, we started for home on the lines of the Pennsylvania Railroad. Although the trip of the N. E. A. began and ended at St. Louis, I cannot refrain from saying something about the return journey from St. Louis to Philadelphia. One of the great delights of a far western journey, which I have experienced more than once, is to get back to the Pennsylvania lines, where the service is unexcelled. Chief among the joys of homecoming is the sight of Pennsylvania's well-kept farms and comfortable homes. Rocky Mountain scenery is more rugged and picturesque than that of the Alleghanies, but there is no more beautiful mountain stream than the "blue Juniata" and no pastoral scenery anywhere in the United States which surpasses that of Chester valley. As the train glides along from Harrisburg to Philadelphia the traveler sees scarcely anything but well-kept farms with barns, outbuildings and fences in perfect order, while the entire country presents such a scene of thrift, prosperity and neatness that it seems to have been specially swept up and cleaned for his delectation.

It is a good thing to travel and to view the beauties and wonders of other States, but it is a better thing to return home and realize that, after all, Pennsylvania is the garden spot of the universe and Philadelphia the best place in the world in which to live. I might go further and designate the particular part of Philadelphia that is most desirable as a place of residence, but that is unnecessary, as my address is known.

The itinerary of the trip, with distances traveled, is worth preserving:

According to the Pullman conductor's report the railroads traveled over, with distances, were as follows: St. Louis to Guthrie, Missouri, Kansas & Texas ("Katy"), 584 miles; to Enid, the Denver, Enid & Gulf, 56 miles; to Lawton, the Santa Fe, 194 miles; to Oklahoma City, the Rock Island, 113 miles; to Bliss and Guthrie, the Santa Fe, 204 miles; to San Antonio, the "Katy," 870 miles; to El Paso, the Southern Pacific, 623 miles; to Portland, the Southern Pacific, 2,140 miles; to Huntington, the Oregon & N. C., 404 miles; to Ogden, the Oregon Short Line, 461 miles; to Denver, the Denver & Rio Grande, 778 miles; to St. Louis, the Rock Island, 934 miles.

The distances traveled over the several lines were:

	Miles.
Southern Pacific (including O. N. C.)	3,167
Missouri, Kansas & Texas ("Katy")	1,454
Rock Island	1,047
Denver & Rio Grande	778
Oregon Short Line	461
Santa Fe	398
Denver, Enid & Gulf	56
Total	7,361

Our side trips and trolley rides probably increased the distance traveled to 8,000 miles, to which should be added the varying distances traveled by different delegates to and from St. Louis. For some of the Eastern delegates the mileage was fully 10,000.

ADVERTISING HYPERBOLE.

In glancing through the newspapers of the week and the magazines of the month one cannot fail to be impressed by the fact that business men are not at all modest in setting forth their claims to leadership, and this in many cases without furnishing much more evidence of their title to this than the mere statement in superlative terms.

It is this tendency to exaggeration—this striving to outdo one another in adjectival redundancy—that in other countries has created an unfavorable impression of American business men and methods.

Like the ostrich which, with its head in the sand, believes it is unseen because unseeing, the advertiser who is given to superlatives believes that in persuading himself of his bigness he is persuading the public. But this is wrong. People no longer believe that a thing is "best," or "largest," or "foremost" just because the advertiser says so. My experience is that they are indeed rather inclined to hold the antagonistic view because these claims have become tiresome, and through constant reiteration have lost whatever strength they may have possessed.

Of course, there must be a best, a greatest, a finest of everything, but the mere iteration and reiteration of the claim that the advertised article is entitled to this distinction will never confer it.

How much better, therefore, is the statement of facts in a convincing, clear manner, distinguished, if possible, by original phrasing and presentation, and free from the weakness nowadays so common?—Richard A. Foley, in *Printers' Ink.*

These well put remarks remind one of the story of the young minister who was so much given to exaggeration or hyperbole, that when brought up before the bishop and severely reprimanded for his fault, replied that he fully realized the enormity of his offense in this particular and had shed barrels of tears over the fault.

Exaggeration has become a habit in advertising to such an extent that advertisers seem to feel that goods will be undervalued if it is not claimed that they are the best and choicest, are unequaled, unsurpassed, the most perfect, supremely superior, the most economical, the lowest priced, inapproachable, the superb, the purest, and so on to the end of the list. Such words contain a sort of challenge that at least attracts attention.

Modern civilization is a matter of coöperation. The man who puts up the hammock at the summer resort assists the dealer in wedding presents and both of them help the fellow who advertises soothing syrup.—*Agricultural Advertiser.*

QUESTION BOX

All Questions from Printers will be answered in this Department.

Address CHARLES A. KING, Beverly, Mass.

W. G. J., Penn. Inquires the best method for binding a monthly magazine of about 80 pages, 5,000 copies, and wants to know about covering.

The cheapest method of binding would be to run the forms so that the magazine could be saddle-stitched. This would do away with pasting on the cover and save some expense, but it would necessitate making up the entire 80 pages at one time, or at least having a pretty general idea of where the matter was going. There are publications of 128 pages saddle-stitched and look well. Of course in this case the margin between the first and last pages would have to be at least one-quarter of an inch more than between the two inside pages, and if the paper was heavy the pamphlet might be awkward. Pamphlet covers are usually put on with strong flour paste, although some binders use glue. A pile eight inches or more in height is pasted at one time, and the covers drawn on. Experts do this work very quickly and there is no labor-saving device for this work, except the expensive machines which are out of the question on so small an edition, and would scarcely get into good working shape before the edition was finished. If kept idle for a month it would be in bad order and require considerable time to put in shape. Glue is used in putting the covers on the National Printer Journalist. The book is made up of five sixteen-page sections, gathered and side stitched with three wire stitches. We have known other methods more practical.

Government Printing Office Investigation

Linotype Charges of Unfairness Sustained

PUBLIC PRINTER DISCHARGED

Recent Purchase of Type-Setting Machines "Improvident" "Indicates Great Partiality and Bias"

❧

"We Consider it Maladministration," says Keep Commission

❧

THAT the printing trade in general may be in possession of the facts, undistorted, of the recent Government Printing Office investigation, we show on the following page an extract from a letter written by Mr. Palmer, then Public Printer, to Mr. Dodge, President of the Linotype Company, in which Mr. Palmer gives his reasons for not purchasing additional Linotype Machines. We also print several extracts from Mr. Palmer's testimony before the Commission, and extracts from the testimony of Mr. Brian (Mr. Palmer's chief clerk) narrating his conversations with Mr. Palmer on the subject of additional machines. The several conversations show that Mr. Palmer based his opinion on a report to him, known as "Special Report No. 5."

On the second following page will be found the conclusions of the Keep Investigating Committee, in which they find Mr. Palmer biased and incapable of impartial action in the purchase of type-setting machines, the so-called records worthless, and as a supposed comparison or test as to the merits of the two type-setting machines, grossly unfair to the Mergenthaler Machine. They also find that his purchase of additional machines was improvident, and they consider it maladministration.

EXTRACT FROM MR. PALMER'S LETTER

PHILIP T. DODGE, Esq.,
President Mergenthaler Linotype Co., Tribune Building, New York City.

Dear Sir:

. . . . A record of the output of both classes of machines has been carefully kept, and that record shows the superiority in quality, quantity and economy of the Lanston over the Mergenthaler Linotype machines. . . . .

(Signed) F. W. PALMER,
Public Printer.

EXTRACTS FROM THE RECORD

Mr. Palmer:

Q. Well, have there been any reports of any kind bearing upon the question of their efficiency or economy or cost?
A. Well, some of the men in charge have made their own reports, but no formal reports have been made. . . .
Q. Have you any reports from any official showing the comparative output of the two kinds of machines and the cost as to each of the matter turned out?
A. Oh, yes, sir, we have; yes, sir.
Q. Who made those?
A. Well, sir, in the month of April I appointed a commission of three men, consisting of Mr. A. P. Marston, Mr. W. H. Tapley and Mr. E. C. Bushnell. . . . They made five different reports, and one of those reports related to the comparative cost of the machines, the output of the two classes of machines, and, also, as compared with hand-set type.

NOTE: The Committee who compiled the special reports mentioned in Mr. Palmer's testimony included a printer, Mr. A. P. Marston (who died prior to the completion of the reports), an electrician, Mr. Tapley, and the auditor, Mr. Bushnell. Thus the report made to Mr. Palmer, and in which he placed so much confidence, was made by men without knowledge of the printing trade. See the opposite page for the conclusions of the Committee on this report.

Q. . . . Did you have any conversation with Mr. Brian about the respective merits of these two machines?
A. I did. He concurred with me as to the difference in the machines. . . . He agreed with me as to the superiority of the Lanston machine over the Mergenthaler machine. . . .

Mr. Brian:

Q. If I apprehend what you have told us, you did not advise him to buy those Lanston machines?
A. I did not advise him to buy the Lanston machines. . . . He had that report; I asked him then, "Are you going to buy any Mergenthalers?"
Q. What did he say?
A. He says, "I don't see how I could; I don't see how I could justify myself in the face of that report [Special Report No. 5] in buying any Mergenthalers."

Mr. Palmer:

Q. As I understand it, from the statement of Captain Brian, you have no accurate system of keeping cost in this office?
A. No, sir, we have not.
Q. At the time Special Report No. 5 was made to you, did you know that the work upon which the Lanston machines had been used was charged at double price or any portion of that?
A. Yes; I did.
Q. Did you know at that time that it was the practice in offices outside where machines were used to charge by the hour and not by the em?
A. I knew that the rule was to charge by the hour.
Q. Did you know that no single job or single class of work had been tested on both machines?
A. I knew that.
Q. Did you know how the work in the Gazette division was measured?
A. I did. . . .

NOTE: A 14-point face on a 16-point body was measured as pica.

Q. Did you know whether that rule was a fair rule to apply to machine work?
A. Well, we followed the old rule about that.

NOTE: The Foreman of Printing testified that by this mode of measuring each thousand ems actually set counted as 1,749 ems.

EXTRACTS
FROM THE REPORT TO THE PRESIDENT OF THE KEEP INVESTIGATING COMMITTEE

"After the most careful consideration of the methods followed by the Marston Committee in arriving at its results, ***we are of the opinion that as a comparative statement of cost of composition, as between the Mergenthaler and Lanston machines, the report is worthless.***

"The conclusion reached by the Committee is not justified.

"As a record of any supposed comparison or test as to the merits of the two typesetting machines, ***the report is grossly unfair to the Mergenthaler machine.***

"The work done in this division (on the Linotype) is almost entirely what is known as straight matter, also known as solid or single-price matter. The output of the machines as stated in ems is the actual number of ems set.

"Of the twenty-eight Monotype machines, whose output is compared with the output of the Mergenthaler machines, ten were in the Fifth Division under Mr. Cottle. The greater part of the work done in this division, during the period covered by this report, was tabular work. This tabular work was of the character known as double-price matter. In measuring the output of machines engaged upon tabular work of this character, the actual number of ems set is doubled, and the doubled figures thus arrived at, which are calculated rather than actual ems, were used as a basis of computation by the Marston Committee. Eighteen of the Lanston machines, during the period covered by the Marston report, were engaged for the greater part of the time in Mr. Hodes' division, known as the Gazette Division, in composing matter for the Patent Office Gazette. This matter is set up with type having 14 point face on a 16 point body. In measuring this type to determine the output of these machines it was measured as 12 point. ***The effect of this measurement was greatly to increase the output of the (Monotype) machines.***

"It appears that the Marston Committee had charged against the Mergenthaler machine the daily wages of fifteen proof readers, upon no information justifying any such charge, and the cost of composition on the Mergenthaler machine was thereby materially increased."

"Upon the whole it seems to be very conclusively established that the Public Printer's determination to buy no Mergenthaler machines was not finally reached until 'Special Report No. 5' was in his hands, and that Report and its unfounded conclusions decisively determined the Public Printer's action."

NOTE: It appeared in the testimony that Mr. Palmer and his assistants had repeatedly visited the officials of the Lanston Typesetting Machine Company at their homes.

"It is our opinion that this purchase should not have been negotiated at private residences of Mr. Dove and General Michener, but at the Government Printing Office, and that the method followed in this case was highly improper."

"The Mergenthaler Company should have been informed that the purchase of additional machines was under consideration and should have been given an opportunity to be heard."

"The action of the Public Printer in making this purchase was in our opinion based largely upon the report from his subordinates, ***which report was based on unfair tests and imperfect records and was unjust to the Mergenthaler machine."***

"It was an improvident purchase and indicates great partiality and bias on the part of the Public Printer. ***We consider it maladministration."***

CONCLUSIONS OF THE COMMITTEE VERBATIM:

First: The contract of the 19th of June was duly executed by the Public Printer and the Lanston Monotype Company, before its subject matter was called to your attention, and before, therefore, any orders were or could be issued to delay action. The law gives the Public Printer full discretion to make such a contract, and his contracts for machinery do not have to be approved by any superior officer or by the Joint Committee on Printing. We know of no ground upon which the contract can be successfully attacked. Its validity, is however, more properly a question for your legal advisers than for this Committee. ***If it could be set aside, such a course would be desirable.***

Second: No corrupt consideration, payment or promise passed from the Lanston Monotype Company to the Public Printer, or to any person in the Government service.

Third: The action of the Public Printer in making this purchase was, in our opinion, based largely upon a report from his subordinates, claiming superiority for the Lanston machines, ***which report was based on unfair tests and imperfect records and was unjust to the Mergenthaler machine.***

Fourth: Two important assistants of the Public Printer, holding positions as chiefs of division in the Government Printing Office, and connected in important ways with such report, were indirectly interested in the Lanston Company, their wives being stockholders therein.

Fifth: Both the Lanston and Mergenthaler machines have done excellent work in the Government Printing Office and both are needed there, and, in our judgment, both should have been purchased; but further than this we express no opinion as to their comparative merits for particular classes of work.

Sixth: ***The purchase of forty-five Lanston machines,*** costing about $140,000, for work on patent specifications, without any test of the Mergenthaler machine on this work, although a request for a fair test of the two machines on this particular work had been made by the Mergenthaler Company, and although the Public Printer had promised the Mergenthaler Company careful consideration of the merits of the two machines on this work, ***was an improvident purchase and indicates great partiality and bias on the part of the Public Printer. We consider it maladministration.***

Seventh: The openly avowed belief of the Public Printer that the Mergenthaler Linotype Company had been at the head of the movement to secure his removal from office, and the strong report he received from Mr. Dove, President of the Lanston Company, and from General Michener, his intimate personal friend of twenty years' standing, counsel for the Lanston Company, ***had put the Public Printer in a condition of mind which rendered him incapable of impartial action in the purchase of typesetting machinery for his office.***

These are but sample extracts and we earnestly invite you to read the entire report of the Committee, which will be mailed to any one. Address

FROM AUSTRALIA TO CEYLON

South Australia is the name of the colony of which Adelaide is the capital; the next-door neighbor is Victoria and New South Wales on the West. It was settled directly from England, instead of being, like most of its sister colonies, a child of the mother of Australia, New South Wales. Adelaide is a pretty city, of about 100,000 population, the quietest of the Australian capitals, but very proud of its sturdy respectability, fine homes, and its prosperous tributary country. It was this colony that built the transcontinental telegraph line, which, in connection with the cable from Port Darwin, gives instant communication with Europe and the rest of the world. The laws of South Australia are generous and progressive an index of the characteristics of the people. Under the administration of the Adelaide government is included all the great area known as the Northern Territory, a region considered a desert, but full of mineral resources that are virtually untouched. A line of railway has been built straight north into this part of the country to a point 700 miles from Adelaide, but the fact that train service is maintained only once in two weeks is an indication that the line does not tap a very thickly settled territory. From Adelaide, too, runs the railway to Broken Hill, just within the limits of New South Wales, famous the world over as the greatest silver mine ever discovered.

The colony that claims the greatest future in Australia is Queensland, occupying the northeast part of the continent, consequently it is the nearest to the United States. It was settled from New South Wales, which limits it on the south, as a branch penal settlement, but in a short time this yoke was cast off. It is the tropical colony of the antipodes, with an abundance of appropriate products and fine

FROM INDIA TO SIBERIA

Lucknow is a name known to every reader as a center of the famous Sepoy mutiny and the scene of a remarkable siege with a dramatic ending. On every hand are public buildings and palaces connected with the history of that critical time. Cawnpore is visited with ease from Lucknow, and its name is only second to that of its neighbor for the terrible massacre of Europeans that took place there during that same mutiny. It is less than half a century since the scenes of the Sepoy rebellion were enacted, and many an actor in them still lives to tell the tales that have been embodied in the verse of more than one poet.

Agra, the beautiful city of the Moguls, is considered the finest city of India. Its remarkable palaces date from the sixteenth century, and are lavish in their display of magnificence. Here is the "Taj Mahal" an imperial tomb built of white marble and inlaid with precious stones. It occupied 20,000 men for seventeen years in its building. The pearl mosque and the fort are among the other sights of Agra, but there are a hundred to be seen for every one named here. Agra, like all its neighboring cities of India, has good hotels.

Delhi, not far from Agra, is one of the ancient cities of the world, dating back more than 1,500 years before the Christian era, some of its neighboring ruined fortresses being credited to the time of Joshua. It was the capital of the Mogul empire, and in a later day its capture and the capture of the king with it marked the virtual end of the Sepoy rebellion. The city is full of places of interest, ruined mausoleums and mosques, gorgeous Sultan's baths, and the other attractions of such a center of ancient civilization. Seven ancient and ruined cities, with enormous fortresses, marble palaces, great walls, and imposing temples extend for nearly fifteen miles over the great plain near by. They are wonderful ruins and should not be missed by the traveler. Jeypore is called the finest native city in India. It is the chief city of the semi-

FROM TASMANIA TO SOUTH AUSTRALIA

Names have changed in the southern hemisphere, and the island that was once named Van Dieman's Land, in honor of the patron of a brave explorer's voyage, is now called Tasmania, in honor of the brave explorer who discovered it, Abel Jansen Tasman. Furthermore, the capital of the colony is no longer called Hobart Town, but plain Hobart. And it is one of the prettiest places in all the south. The names were changed by act of parliament many years ago to remove the taint of the convict transportation system which still hung about the beautiful island. It has been a long time since the "system" was abolished, but even today its relics furnish much of the interest that will appeal to the tourist. Tasmania is proud to be known as the England of the south, and well justifies the phrase. The island is about the size of Ceylon, or of Ireland, and much of it is in a high state of cultivation, with villages, hedges, and meadows of a very English appearance. In the northwest are valuable mines of gold, tin, and other metals. The southern part, directly tributary to Hobart, is apple country of great productiveness, possessing the advantage that its crop comes to the English market at exactly the opposite season of the year from the apples of the northern hemisphere, and so commands the highest prices.

Hobart faces a beautiful harbor, with Mount Wellington rising over the city. Electric street-car lines carry the tourist through much of the prettiest scenery in the suburbs, and whichever line one takes, the terminus is sure to be at a pretty little refreshment garden, where they can get strawberries and cream and a cup of tea as they are resting in the shade. A famous carriage drive along the shore of the

THE NEW PUBLIC PRINTER.

The members of the printing fraternity of the United States are to be congratulated on the fact that in appointing a successor to Public Printer Palmer, President Roosevelt has followed his declared and accepted ideas as to having the different departments of government conducted on business principles, with no graft or favoritism, but, on the contrary, with economy, efficiency and a square deal to all legitimate interests and public business first. There has been some scandal revealed in the past and we have reason to believe that much more of doubtful practices existed than has been uncovered. It ought to be understood that no departments of the government are to be used as perquisites of members of Congress, yet we were once informed, by a representative of a type foundry, that a certain member of the Printing Committee of the House had informed him that he would be of use to his establishment, and sometime afterwards, that this particular member had one of the best equipped printing offices in his State, though in a small city. Now, we are not in the detective or informing business, but the very prevailing idea that Congressmen are to influence purchases, or to secure places for friends or partisans in the Government Printing Office, or in other Departments, is injurious both to the work and efficiency of members of Congress and opposed to the welfare of the country. Fitness for a position should be the only guide, and if Congressmen are to put in their time helping favorite dealers or manufacturers, getting places for partisans, or in sending seeds, patent office reports, or speeches that never would have been printed, except at the Government's expense, to constituents, instead of looking after needed legislation and the country's welfare, Congress better be abolished and the affairs of Government be conducted by a wisely chosen commission of experts. However, this was not, at all, what we intended to write when we commenced, for, as editor of a professional paper, we have nothing to do with politics or politicians. What we intended to say was, after the congratulations of the country on this evidence of the further establishing of the merit system and fitness for the service as a rule to govern in making appointments—that the appointee should be left free to carry out the same principle in every branch of the business under his control.

Mr. Charles A. Stilling, the newly appointed Public Printer, qualified and took up his work the 25th of November. *Walden's Stationer and Printer,* of New York, says of the new appointee:

Mr. Stillings' appointment is accredited to Massachusetts, but he has been residing out of the state considerably. Up to May last he was manager of the Printers' Board of Trade of Washington, at which time he resigned his position to accept the management of the Printers' Board of Trade in New York City, which position he now occupies.

His appointment is not a political one. Senators Lodge and Crane endorsed him, but not until after Mr. Stillings had filed his application for the office, supported by indorsements of big printing firms in several cities. The Mudge Press, of Boston, Theodore L. De Vinne & Co. and Rogers & Co., of New York, and Gibson Brothers, of Washington, vouched for his ability.

His specialty has been in furnishing prompt and accurate estimates of the cost of doing printing. In that particular line many printing firms have had an intimate acquaintance with his work. "He stands in the front rank for capacity for such work as lies before him," was the expression of one of the officers of the Typothetae.

Charles A. Stillings was born in Boston in 1873, and has been engaged in the printing business for sixteen years. He is the son of E. B. Stillings, of the Griffith-Stillings Press. His father has long been prominent in Boston, and was adjutant general of the G. A. R.

Three years ago the E. B. Stillings Company was consolidated with the Griffith-Axtell & Cady Company, of Holyoke, Mass., under the firm name of the Griffith-Stillings Press, which occupies commodious quarters at 364 Congress street, Boston. Shortly after the consolidation Charles A. Stillings became manager of the Washington Printers' Board of Trade, and while in that city devoted himself to a study of conditions in the government printing office.

Mr. Stillings will qualify and take up his duties the 25th of this month. He will have charge of a force of printers, bookbinders and clerks, numbering over four thousand.

In regard to the "open shop," which the president established in the government printing office about two years ago, Mr. Stillings has declared his belief in the movement, and in a recent interview is quoted to have said: "I believe that the 'open shop' is the only shop possible with good business methods, but I have no objection to unions. I believe in unions so far as they benefit the individual, but they must not be permitted to interfere with public business, and when a body of men are so strongly organized that they feel they can control the situation and stand still they are no longer useful. There must be progress. The standard will not be whether a man belongs to a union, but whether he can 'make good' and turn out the required amount of work."

"There is no reason," he added, "why there should be any waste or extravagance in the printing office. I don't believe that cheap things are necessarily the best, but I believe that the best results can be accomplished by the exercise of economy. When I take hold that will be one of the things I shall try to accomplish."

An expert in the best of work who will see to it that the Governmnt gets full value for money paid, in labor, material or machinery is the kind of man needed. The establishing of the idea or principle in the Government Printing Office—the greatest printery in the world—that government employment means full, efficient and honest service, will have a good effect not only on other Departments, but on the printing business throughout the whole country.

¶

"WHY WORK AT ALL?"

And another point of interest to our timid fellow craftsmen who fear that their wages will be decreased with the decreasing hours. The old couplet,

"Whether you work by the piece or the day,
Decreasing the hours increases the pay,"

is based on economic truth, as any one can convince themselves who takes the trouble to use his powers of observation in the industrial world about him. So long ago as 1847, in a debate upon this very subject in the House of Parliament, the Earl of Ellesmere said: "It is a remarkable fact, everywhere and at all times the same, the more hours men work in any staple branch of manufactures the less they receive in the form of wages." Lord Macaulay, in a powerful argument, maintained the same position.—*The Typographical Journal.*

Then why work more than one hour or thirty minutes a day and get the largest possible pay, for "the more hours men work in any staple branch of manufactures the less they receive in the form of wages," and *ergo* "Decreasing the hours increases the pay." We do not know why Lord Macaulay should have gone to the trouble of making a powerful argument to maintain this position when it is a settled historical fact that admits of no argument. We believe that he worked, at times, sixteen or eighteen hours a day, for the love of the work, but he did not get as much pay as was received by some of the other great princes and lords of England who did no work. He might have thought this a wrong in his early and immature days, for the Bible, which he was taught in his youth, says: "Beholdest thou a man diligent in business, he shall stand before kings," which was a favorite text of Benjamin Franklin, who never counted the hours and yet grew wise, strong and great through honest toil;

and again, "He becometh poor that dealeth with a slack hand, but the hand of the diligent maketh rich." There are hundreds of such outgrown Scriptural texts and proverbs, like also the commandment of Paul, who wrote: "We commanded you, that if any would not work, neither should he eat," for, all that is necessary now is to be an officer in, or a member of the family of the President of a life insurance company to eat and to revel in good things and to flourish in all the beautiful adornments of the lilies of the field—which neither toil nor spin—for the policy holders provide for them.

¶

PRIZE CARD PARTIES LOTTERIES.

A ruling by the Postal Department that card parties in which prizes are won at euchre, whist and other games, are in the nature of lotteries, and that the publishing of "drawings" or winnings, in the newspapers is a violation of law, subjecting the offending publication to exclusion from the mails, seems to be a little hard on our good church and society people who have been accustomed to give interest to their social gatherings and societies or to bring money into the church treasury by such games, even if it be not an interference with liberty of the press. It would seem to be a joke on the good players, who think they win their prizes by superior science, attention or skill, to rule it all a lottery. We, however, sympathize with the ruling, believing that all playing for prizes or stakes, is immoral and demoralizing, in that it whets the appetite for gambling, or the getting gain without returning an equivalent, which is simply a form of theft. The Chicago *Inter Ocean* prints the following special from Sioux City, Ia.:

"Newspapers all over the state are in receipt of a circular letter from a Des Moines newspaper apprising them that the postoffice authorities at Washington have held that reports of prize winners at euchre and whist parties will suffice under the anti-lottery law to exclude any newspaper from the mails.

"The newspaper in question states that its presses were stopped one day last week and thirty minutes' delay ensued in order to remove from its columns a statement that Mrs. Jones had won a cut glass water pitcher and Mrs. Smith had won a chafing dish at Mrs. Johnson's card party.

"The Des Moines postmaster, after carefully reading his instructions, decided that such reports should exclude a newspaper from the mails quite as much as the report of a raffle, lottery or other gambling device. He telegraphed the department at Washington and was advised by it that his construction of the postoffice rules was literally correct, but that the department had never seen fit to enforce the rule as against reports of society card games. That left the question open, and Iowa editors are asked to secure the intervention of their congressmen."

B. B. Post, writing in the issue of *Newspaperdom* of November 16, states and solves this shorter work day problem in a most convincing and logical manner. He says:

The principal argument in favor of an eight-hour day seems to be that it leaves eight hours for recreation and eight hours for rest.

Why not a six-hour day? Then we would have "Six hours for work, six hours for recreation, six hours for improvement and six hours for rest."

Why not a four-hour day? Then our slogan could be "Four hours for work, four hours for rest, four hours for recreation, four hours for politics and twice four hours for sleep."

Or even a three-hour day? "Three hours for work, three hours for rest, three hours for recreation, three hours for self-improvement, three hours for amusement and thrice three for sleep."

What's the matter with a two-hour day? "Two hours for work, two hours for rest, two hours for recreation, thrice two hours for agitation for shorter hours, two hours for 'chewing the rag,' two hours for amusement and four times two hours for sleep."

A real handy number is 24—divisible by so many digits. The principal fault with 9 as the number of hours to work seems to be that it "does not divide into 24 with anything over." The fact that when 9 hours have been worked, there are still 15 left over in which to rest, amuse and agitate, seems to be immaterial, in spite of the fact that our American forbears accomplished the great things they did outside of working hours with much less leisure.

What's the matter with this slogan: "Nine hours for work, eight hours for sleep, seven hours for recreation"—9, 8, 7—doesn't that look as well and sound as well as 8, 8, 8? Of course it doesn't—nothing sounds as well which means another hour of honest work.

But wait till the agitation for seven hours begins—then 7, 8, 9 will be vastly more attractive than 8, 8, 8. That formula which expresses the thing we want is the most attractive, and 8, 8, 8 will be yelled down in derision when 7, 8, 9 begins to loom up.

But for the present 8, 8, 8.

¶

HANDSOME PRESENT TO PRESIDENT VARNER.

Lexington, N. C., Nov. 16.—In appreciation of his services while president of the North Carolina Press Association, Mr. H. B. Varner, editor of *The Dispatch*, has received through Secretary J. B. Sherrill, a very handsome present purchased by popular subscription among the editors of North Carolina and Virginia. It is a watch fob, bearing the emblems of the Royal Arch Masons and Knights Templars, studded with rubies and diamonds, a very beautiful and costly affair and a gift that Mr. Varner appreciates highly. Mr. Varner has served two terms as president of the Press Association, his last term expiring in July of this year, at the annual meeting of the editors.

Since that time the plan to present to him some token of their esteem has been quietly worked out by the committee appointed by the editors to attend to same.

Mr. Varner has written the following letter to Mr. Sherrill expressing his thanks:

"Mr. J. B. Sherrill, Secretary,
North Carolira Press Association,
Concord, N. C.

Dear Sir and Brother:—I have just received the very handsome gift sent me through you by the members of the North Carolina and Virginia Press Associations and I accept it with feelings of appreciation too deep for words, both on account of the beautiful gift itself, and on account of the spirit of brotherhood and friendship which prompted it.

Throughout the years that I have had the honor and the pleasure of belonging to the Association, my fellow-members have uniformly treated me with the kindest consideration and have honored me far beyond what I feel to have been my just deserts. My elevation to the presidency of the Association in 1903 and especially in 1904, when the constitution was changed to confer this signal honor upon me, was accompanied by feelings of gratitude and appreciation that were equaled only by a sense of unfitness for the high office and the determination to so acquit myself that there would be no regret on the part of my brethren that they had so honored me. And now that they have seen fit to present to me this beautiful little token of their esteem, my measure of joy is filled to overflowing. It seems to me that it was eminently fitting that this gift, prompted by the finest feelings, should bear the emblem of an order whose doctrines are those of brotherly love and whose sentiments are those of exalted benevolence; an order that encourages all that is charitable, kind and good, and one that reproves all that is vicious, unkind and cruel. I wish to express through you, sir, my heartfelt thanks to those who have so kindly remembered me and to assure them of my unbounded appreciation of this beautiful gift.

Very cordially and fraternally yours,

H. B. VARNER."

A page from "Little Rhymes for Little Readers," by Wilhelmina Seegmiller, illustrated by Ruth Mary Hallock. Published by Rand, McNally & Company, Chicago.

THE POLITICAL POWER OF THE INDEPENDENT PRESS ILLUSTRATED.

We have frequently had occasion to refer to the political power of the truly independent press. The candid newspaper that stands for the right without fear, favor or prejudice, will ever find an enthusiastic following, but papers that are always partisan or factional, ever hammering away, in season and out of season, against men and measures, simply because not of their clique or their party, allowing nothing for worthy deeds or good qualities to the men or measures opposed, generally do the men, the measures and party or faction that they espouse, in this day of the independent voter, more harm than good. They frequently help, by awakening sympathy for and advertising, the very men and measures that they oppose. Their overzeal and iteration and reiteration of charges and imputed wrong motives, even when it is evident that attempts are being made for the public good, naturally awaken suspicions of unreasoning, uncharitable and blinding self-interest, if not even of bribery or corruption. The opposite is the case with the newspaper that treats men and measures with honest candor, or, bestowing commendation and praise wherever and whenever deserved, and only criticising the wrong. A case in point is well told, as follows, in the *Editor and Publisher*, of New York City, of November 18:

It was a splendid victory for an independent press that was won in Ohio during the recent campaign, and now that the election is over it is but fitting that some recognition be given the Cincinnati Post and the other papers of the Scripps-McRae League that led the fight.

The history of the crusade is interesting. It shows what a newspaper with the courage of its convictions can do.

The fight began in earnest early in the summer when the Post featured the statement of Lincoln Steffens in McClure's Magazine that Cleveland was the best governed city in America and Cincinnati the worst. In making this move the Post called down upon its head a storm of criticism from machine sources. It was charged with besmirching the fair name of its city. An effort was made to turn away its advertising in the hope of coercing it into silence. Its reporters were assaulted or arrested in the streets. But never once, after the gauntlet had been thrown down, did the Post waver from its purpose to overthrow the bossism that had ruled with a high hand in Ohio for a score of years.

The second card was played when a reporter secured an interview with George B. Cox, the boss. In this three-column interview Cox, instead of spurning the press as had once been his wont, assumed an attitude of defense and virtually admitted many of the charges made against the ring and sought to condone its actions.

Thus in the beginning the campaign was one of education. The facts were laid bare before the public for sober consideration. Then, as the people gradually awakened their emotions were appealed to with editorials, tempered to meet the growing moral consciousness.

To the Post was lent the strength of the entire Scripps-McRae League, of which Harry N. Rickey is editor-in-chief. The Cleveland, Columbus, Toledo and Akron papers were fighting Cox as a state issue, while the Post hammered Cox as both municipal and state issues.

The Post staff, under the direction of John Vandercook, who assumed editorship last May, worked night and day in collecting evidence against the ring. In the series of exposes by William C. Culkins, political editor of the Post, were some of the most brilliant specimens of reporting that have come to notice in recent years.

Jacob Waldeck, of the Cleveland Press, in a series of articles of remarkable clearness and great educational value, showed unmistakably that Cox was the real power in Ohio politics. All this time Cartoonists Bushnell, with his "Dick and Doc" sketches, and Saterfield, with his little bear, were doing powerful work. To cap it all Homer Davenport was engaged to go out during the last two weeks of the campaign to draw Cox as he saw him and in his inimitable style to tell the people of Ohio of the methods of political bosses he had met.

As fruit of all this, the election resulted in a plurality of 6,400 against the Cox ticket in Cincinnati. The revolution meant a change of about 200 votes to the precinct, and it is not too much to say that the boss issue in Cincinnati made a difference of from 25,000 to 30,000 in the vote that would ordinarily have been cast for Herrick.

Yet the Post had no fight against Herrick as a man. It was from beginning to end a fight against the boss.

¶

A RETIRING VETERAN HONORED.

THE HISTORY OF ADVERTISING DEVELOPMENT

A notable complimentary dinner was given to George P. Rowell by one hundred and sixty-two of his friends in celebration of his retirement from active business. He is the oldest of advertising agents and may be said to have founded the agency business. He did very much during his career of forty years as publicity promoter, toward the development of advertising and bringing producers and dealers into profitable coöperation with the newspaper publishers in the advertising of trade. The banquet was given at the Waldorf-Astoria on the evening of October 31. It was tendered by leading newspaper publishers and the speakers, to whose speeches and the encomiums contained therein, Mr. Rowell feelingly and fittingly responded, were: General Stewart L. Woodford, formerly U. S. Minister to Spain, and a lifelong friend of Mr. Rowell, and who presided at the feast; Artemus Ward, Frank Presbrey, Frank B. Noyes, H. B. Harding, Wolstan Dixey, John Brisbane Walker, and Mr. Louis Wiley, of the New York *Times*, a word from whom is said to have been the inception of the magnificent tribute to Mr. Rowell.

Many interesting facts with regard to the history and development of advertising, with which Mr. Rowell's life had been so closely connected, were brought out.

In responding to the toast "Geo. P. Rowell Advertising Agent", Mr. Presbrey, addressing Mr. Rowell, said of

THE SYSTEMATIC BATTLE OF BUSINESS PROMOTION.

It has been your privilege, Mr. Rowell, to observe from your important position on the field the transition of advertising from a chaotic, unsystematic attempt at publicity to an established business in which many of the best trained and most intelligent minds of the country are engaged. You have seen a mighty commercial battle waged for the supremacy of the markets of the world. You have seen the weekly papers which, in your early career, were the infantry on the firing line, fall back to make room at the front for the cavalry brigade of dailies, and you have seen the batteries of the magazines wheel into line and come into action with their heavy guns, whose reverberations are heard around the globe. It has been your privilege, sir, to witness and bear an honored and notable part in the greatest commercial battle ever known—that of conquering the markets of the world by the well-directed fire of publicity through the Gatling guns of the newspapers and the more ponderous long-distance guns of the magazines.

ADVERTISING MAKES NEWSPAPERS POSSIBLE.

Mr. Louis Wiley, of the New York *Times*, said in part:

Our distinguished guest began his career in the very infancy of the advertising business, and its wonderful development and expansion are largely due to his initiative and enterprise.

You have been told by the able gentlemen who have preceded me to-night of the remarkable efforts and the remark-

able success of this advertising propagandist. All his efforts and all his success have had an important bearing on the prosperity and the influence of the American press. The great modern newspaper is now sold at a price much smaller than the cost of production, and its success depends largely on its advertising revenues. These make possible the engagement of able writers, the installment of fast presses and linotypes, and the many other requisites for the daily newspaper.

Among the men who have instilled in the minds of the merchants and manufacturers of America the knowledge of the value of advertising and have educated them in the way to advertise, the name of George Presbury Rowell, like that of Abou Ben Adhem, leads all the rest.

SOMETHING STILL FOR WHICH TO LIVE.

Mr. Rowell expressed his gratitude for the kind expressions of esteem that have been given him and said that demonstrations of regard usually came too late to be appreciated by the object of them. He was grateful that in his case his friends had seen fit to show their affection for him while he was yet alive. He had never before been called on to celebrate the completion of a forty years' job. If he failed to do as well as his friends had a right to expect, they must attribute it to his lack of experience.

He spoke of those present who had been in his employ, of boyhood friends and of early business associates, and then referring to his retirement from business and his anticipations of pleasure at his boyhood home in New Hampshire, he gave a couple of quotations as follows:—

"There is still pleasure in store on earth for those who are old. The song of birds, the smile of childhood, the kindly greeting of an old friend, the rippling sound of running water, the pleasant sunshine and the constantly recurring miracle of spring, are things that one may enjoy so long as one has life." When spring has come again, having leisure and time to spare, I shall say to some of you, dear friends, on whose faces I see traces of care and overwork:

Come with me, O you world-weary, to the haunts of thrush and veery,
To the cedar's dim cathedral and the palace of the pine;
Let the soul within you capture something of the wild wood rapture,
Something of the epic passion of that harmony divine!
And on mossy carpets tarry in His temples cool and airy,
Hung with silence and the splendid, amber tapestry of noon.
Leave the hard heart of the city with its poverty of pity,
Leave the folly and the fashion wearing out the faith of men,
Breathe the breath of life blown over upland meadows white with clover,
And with childhood's clearer vision see the face of God again!

¶

"THE MOST VALUABLE."—"READ BY ALL."

West Virginia Editorial Association, Office of the Secretary,
Elkins, West Virginia, November 13, 1905.

National Printer-Journalist Co.,
Chicago, Ill.

Gentlemen:—I am sending you under separate cover photo of Mr. J. Bruce Hess, president, Col. Thomas H. Dennis, treasurer, and the writer, secretary of the West Virginia Editorial Association, to be used in connection with a short writeup of our recent annual session, as per your request of recent date. The copy to accompany these cuts will be mailed to you in the next day or so. I consider your journal the most valuable trade journal coming to this office and its pages are faithfully read every month by every one of us, from the printer's devil down to the editor.

With kindest regards to Mr. Herbert, whom I had the pleasure of meeting at our Parkersburg session, a number of years ago, I am, Very truly yours,

HERMAN G. JOHNSON.

* * *

The NATIONAL PRINTER-JOURNALIST is a regular visitor at the *Plaindealer* office, and is a big help to the entire force.

FRANK H. LOWE, Almena, Kansas.

PRESIDENT ASHBROOK REPORTS.

Johnstown, Ohio, Nov. 15, 1905.

To the Members of the California-Portland Outing of the N. E. A., 1905:

I come to you with an apology for the delay in reporting and remitting the balance due you on the Pullman deposit on our trip last June and July to Texas, California and Portland. I satisfactorily settled my account with the Pullman Company within thirty days after my return home, but for good reasons a meeting of the committee appointed at Guthrie to audit my account was not called until Oct. 2, when the committee met at the Auditorium Annex, Chicago, and inspected the detailed exhibit of the receipts and expenditures of all moneys coming into my hands as manager of the editorial outing following our convention. It was my intention to put in type the names and amounts paid by each person, but this would make a sheet a yard or less long, and the committee deemed this unnecessary. I therefore herewith submit the finding of the committee.

Chicago, Oct. 2, 1905.

"*To the National Editorial Association.*

"Gentlemen: We, the undersigned committee, appointed at the Guthrie meeting to audit the accounts and vouchers of William A. Ashbrook, Cor. Sec'y of the N. E. A. for the Texas and Portland trip, have examined the exhibits, receipts and expenditures and find the same correct. We further find a surplus in the hands of the Cor. Sec'y of $2,205.85 and recommend that the same be refunded pro rata, to-wit: $5.68 alike to each person paying the full assessment for Texas or Portland trip.

"We wish to add that in our opinion the trip was very economically conducted and reflects great credit upon the corresponding secretary.

BENJ. B. HERBERT,
A. W. GLESSNER,
W. F. PARROTT, Committee.

Upon my return home from the meeting in Chicago, I fully intended to send out the refunders forthwith, but as I was mixed up in politics somewhat, I found things altogether too interesting to do anything but look after my campaign, and until after the election was not in my office a single day. This I trust will be a good and acceptable excuse. Permit me to say, that although my opponent for the legislature was a candidate for his second term and admittedly the strongest man on the Cox county ticket, I skinned him good, with the comfortable plurality of 643, leading the ticket a couple hundred votes. So much for politics and apologies except that we have none to offer in Ohio for electing a Democratic governor.

The committee found that the Texas contingent deposited $15 and that the trip was made in 11 days; that the Portland deposit was $35 and the trip made in 30 and 31 days. Therefore, in equity to all, the same refund is made to the Texas excursionist as to those going to Portland, and that each person paying either $15 for Texas or $35 for Portland to be entitled to a rebate of $5.68. Agreeable thereto I enclose a New York draft (and it's good for I writ it myself) for the amount due you. Should you desire to examine my account, it is typewritten and will be cheerfully sent to any one for examination. Some paid $30 and abandoned the party at San Francisco and Portland, and these will receive 68 cents. No cars were abandoned because some left the party, therefore no other rebate could be allowed. The trip cost a trifle less than one dollar per day after all expenses, including authorized donations were paid, and I hope the cost and management will meet your approval. As I prepare this copy for the printer, that beautiful diamond ring presented me at Salt Lake City sparkles in the sunlight, and either its brilliancy or the memory of the dear friends of our happy party dim my eyes and fill my heart with gratitude to you one and all for your very great kindness to me and evident appreciation of my efforts. May we all meet at Indianapolis, and many times thereafter.

Very respectfully, WILLIAM A. ASHBROOK,
Cor. Secy, N. E. A.

THE EDITOR TALKS OF SPECIAL AND OTHER EDITIONS.

We have frequently insisted that newspapers, like everything else, should be seasonable. There may be nothing religious or obligatory in the observance of times and seasons, the feasts and fast days, but there is wisdom in entering into the spirit of these and helping to increase the joys and to enforce the lessons which they contain. We believe in the precious gladness of harvest home, of "the old home week," of the Thanksgiving, Christmas, New Year's, Washington's Birthday, Easter and Fourth of July issues of newspapers. In these anniversaries, days and observances, the noblest sentiments of human hearts are awakened, gratitude, friendship, religion, aspirations for a new and better life, broad philanthropy, sentiments of virtue, enduring bravery and patriotism, hopes of immortality, and an undying love for liberty that wavers not at sacrifice or even at death itself. Around all these, wherever known and observed, art and sentiment, poetry and eloquence and the love of man, of nature, of the beautiful and the true, and of a great, beneficent All Father, expressed therein, have woven chaplets that need remembering and renewing with the passing of the months in which they are numbered. The newspaper that touches humanity at every point is the more useful and greatly the gainer by taking part with enthusiasm, in all these occasions and helping along in all the joy and upbuilding.

This has all been suggested by the special numbers that are now, at the beginning of the festal season, reaching our sanctum. Besides these, too, each newspaper, like each human being, has its own anniversaries, marked by struggles and successes and the rounding of the years, which by reason of the close relations to the people, and the public character of the press, are of interest to all readers. From Colorado and Kentucky as well as from the New England States come papers that talk of "Old Home Week" and the joys of the home returnings.

From Minneapolis, Minn., Past President Collins sends a copy of his "Harvest Home Special Edition" of Nov. 4, and the half tone reproductions of the first page cover designs, to be printed in colors, of the Christmas numbers of both his publications, and, as a reminder, Past President Cappeller favors us with a very attractive postal card, printed in colors, showing a view of the "Mansfield, Ohio, Daily *News* Outing," Aug. 28, with all the beauties of the green trees in the park, the handsome *News* and other buildings, and of the gay throngs of children in holiday attire.

From far away New Zealand comes our first special Christmas Number of a newspaper for 1905, with a wealth of advertising and a beauty, a magnificence and

completeness of illustration that is wonderful and that cannot be exaggerated by this liberal use of adjectives. For variety, grandeur and beauty of scenery; for splendid as well as unique architecture; for the picturesqueness of the native population, the natives and their huts, and for the loveliness of her flora and fauna, as shown in this Christmas issue of the *Weekly Press* of Christ Church, New Zealand, can hardly be surpassed. The issue before us is, in itself, an enchanting art gallery of artistic illustration from cover to cover, in both the text and the advertisements. We give a half tone reproduction of the first cover page, and one of the views of natural scenery. The cover is elaborately printed in colors, red, blue and gold and naturally the reproduction in black is far from showing the artistic beauty of the original.

* * *

The covers of both Mr. Collins' publications will be printed in colors. It is the plan to use an artistic cover in colors on the *Northwestern Agriculturist* once a month during the winter, making a special or magazine edition of that issue, printing 104,000 copies, the regular issue being 80,000 copies a week. This is an innovation in weekly agricultural publications. The *Home Magazine* is published monthly, with a circulation of 100,000.

* * *

The daily edition of *The Courier*, of Connellsville, Pa., celebrated its entering upon its fourth volume, November 10, with a "third anniversary edition" of twenty-four pages. Hon. H. P. Snyder, president of

the *Courier* company, and managing editor of the paper, is to be felicitated on the success attained, as shown by the following extract from a brief review of the paper's history:

The *Daily Courier* is three years old to-day. It is the sprightliest and sturdiest journalistic three-year-old in Pennsylvania. Since the *Daily Courier* was launched on November 10, 1902, not a backward step has it taken. Every move of its management has been one of progress. It began modestly; it was enthusiastically received by the reading and business public. Starting with a circulation of 1,000, the *Daily Courier's* field rapidly widened. In three years its gain has averaged over 1,000 readers a year. To-day, instead of printing 1,000 papers each afternoon, an average daily circulation of 4,300 to 4,500 is maintained. This rate of increase is even greater now than it was during the first two years.

In two more years the *Courier* will be read in 10,000 homes in Fayette and adjoining counties. The *Courier* is a paper for Fayette county, but while keeping a watchful eye over this county it aims never to neglect the general news of the day, and with a special view to covering thoroughly and accurately Southwestern Pennsylvania.

Three years ago the *Courier* printed an eight-page, five-column paper, with a total space of 720 inches as against a 24-page seven-column paper with 3,360 inches of space and 2,190 inches taken up with advertisements for this anniversary number. This is an evidence of success in three years achieved by good newspaper work and earnest and untiring effort that would be hard to match in a city of the size of Connellsville even in the boundless and growing west.

* * *

The Brillion, Wisconsin, *News* appears in an enlarged quarto form with a four-page magazine supplement. The adding of 32 columns a week is given as a reasonable excuse for an advance of fifty cents a year in the subscription price. Rapidly growing circulation and increasing advertising are given as the very gratifying causes of the enlargement. It is a newsy, well printed, clean, bright paper, in which neither the schools nor any other worthy local interests are neglected. Mr. Otto J. Zander, the editor and publisher, states in a neatly bordered card, set in six point:

It shall be our constant aim to publish the news, to treat all whose names appear in our columns with justice and fairness, and everything calculated to promote the interests of our community will receive our earnest support.

* * *

The Clifton, Tenn., *Mirror,* issued on Oct. 20, an anniversary number just at the beginning of its twenty-fifth volume, but in honor of its first year under the present management. The paper is owned by the business men of Clifton and is edited by W. O. Thomas and H. M. Jackson. This anniversary number contains very complete accounts of Clifton and Wayne county, their history, industries, natural resources and institutions with illustrations of views and buildings and portraits of prominent citizens. It contains some sixty half tone portraits. They show bright, intelligent, refined, noble faces and tell of a healthy, well developed, strong people, but then Tennessee has ever been celebrated for her men and women.

After speaking of the plan and labor of this anniversary issue, which had only been conceived a month previous, the paper further says, editorially:

In this connection we call our friends to witness that labor and effort in connection with this publication are qualities we have used unsparingly during the past year. The *Mirror* office has been a veritable hive of industry during this time. While the immediate effects have not put us in a class with the presidents of the old line insurance companies, yet we have received much reward in the consciousness that we have builded for the *Mirror* a reputation of which the town may well be proud, and that will make for a broader and better patronage in the future.

A little further on, in another editorial, the paper lays down the following, briefly stated, fundamental principles of manly living necessary to the safety and perpetuity of a free government in which every citizen is charged with the responsibility of sovereignty:

The grandest thing on earth is for the individual to recognize his manhood. This is something that should not be surrendered into the keeping of others. If the government planted by our forefathers should prove a failure it will only be because of the decadence of patriotism. Each individual should feel resting upon him the sacred obligation of kingship.

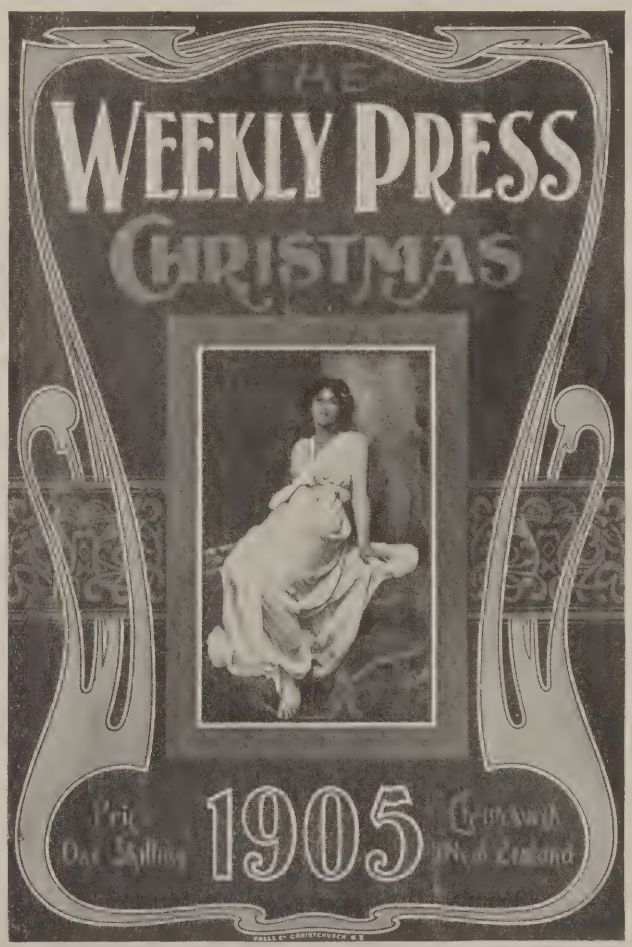
* * *

The Dayton, Ohio, *Journal* has had the honor of introducing the first traction or automobile newspaper car in America, of which it gives full illustrations and descriptions in its issue of November 15. The idea is so important to newspapers that want to reach, speedily, outlying suburbs, cities and villages, and seems so practical in its working that we reprint the following from the interesting account of the plan of construction and the actual workings of the car:

The car is the product of an ingenuity taxed to meet the exigencies of newspaper distribution and is a distinct novelty, serving out the purposes for which it was designed and built, to a nicety.

Every arrangement has been made to serve the dual purposes of convenience and dispatch and the amount of space is so distributed as to leave to each bundle of papers a separate spot, easily reached from any part of the car, no matter what speed is being attained at the time.

From the moment the car speeds on its flight across this



New Zealand First Cover Page. Original printed in blue, gold, green, red and yellow

county and deep into others, the scene aboard is one of bustle and systematic prosecution of duties, which are divided between the crew.

At places where bundles of *Journals* are to be dropped, on which the ink is scarcely dry, the package is ready and waiting and the agents receive them as the car glides past.

There is no doubt that the *Journal* has found the solution of the problem confronting morning newspapers that desire to send their publications into outlying territory which could not be reached by steam and electric roads, owing to no service being given in the early hours, and the auto car so satisfactorily established here will be copied extensively throughout the country.

That Dayton has a newspaper of so enterprising a character is evidently appreciated by the citizens of this city and surrounding territory, as the circulation lists are growing with great rapidity.

At 2:45 a. m. the car is brought from the Miami Motor Company's garage on East Second street and placed on the People's Railway track at Jefferson and Second streets, where it awaits the loading for the trip. Boys with carts hustle the papers from the *Journal's* circulation department to the car. Springfield is loaded first, then Urbana, Xenia, Yellow Springs, Goes, West Liberty, New Carlisle Mail, Medway, New Carlisle, Osborn, Fairfield and Harshman in order named, so that the man in charge can handle without confusion as the car speeds on the run.

* * *

Editor and Proprietor H. B. Varner took occasion to celebrate the meeting of the old soldiers in his city by adding special and attractive features to the issue of his paper, the Lexington, N. C., *Dispatch,* on the day preceding. He not only gave war incidents of "The Stirring Times of the Sixties" and an interesting account by a Lexington veteran of "A Visit to Old Battlefields," but he took occasion to present an interesting account of the nearby city of Thomasville, largely served by his paper, and to describe her industries and to speak of her leading citizens in articles ably written, and well illustrated with excellent half tones of views, buildings and portraits.

His welcome to the veterans expressed sentiments common to both the North and the South and might have been as fittingly printed in a city of Massachusetts as a welcome to those who wore the Blue as in a North Carolina city as a welcome to those who wore the Gray. He said:

The old soldier will be with us to-morrow. To say that all men, women and children are glad to welcome him in our midst, and that all wish him a jolly, merry, happy reunion is only saying what everybody knows. The old soldier occupies a warm and tender place in all our hearts. On a hundred fields of carnage he won his place among the bravest of the brave and engraved his name high on the roll of honor. History will take care of his name and his fame. But it is up to us to see to it that what few days he sojourns among us are made pleasant and as free from care as it is possible for us to do. Long live the old soldier!

* * *

For the past five months, or ever since the National Editorial Association convention at Guthrie, the hundreds of papers of the members, if not special issues, have presented the special feature of interesting stories of travel by the editors in the "boundless West" of their own country. The Pittsfield, Maine, *Advertiser,* by Louis O. Haskell, is one of the many papers that has given full scope to the accounts and called forth the best descriptive powers of the editor.

* * *

The Petoskey, Michigan, *Evening News* celebrated in its issue of Oct. 22 by a description of its well arranged, elegant new building, planned and constructed especially to accommodate the business of the two newspapers, the *News* and *The Independent,* and printing office. The building is flatiron in shape, but very conveniently arranged, as will be understood from the following description that will be helpful by way of suggestions, in the arrangements of other offices:

Across the short end of the building have been arranged the business office, editorial rooms, etc. The corner entrance into a lobby around the counter ends in a hall that extends back to the other parts of the building. First comes the business office proper, then the proprietor's private apartment, and then the editorial room. According to the arrangement, this places the head of the concern in touch with the business transactions, as well as being handy to dictate the editorial policy of the papers. All of these rooms are small, but convenient and well lighted and ventilated.

Across the hall from the proprietor's office is an entrance into the mechanical department. This is a large airy room with three sides. As above mentioned, the one side is mostly glass

The Manawater Gorge, one of the beauty spots of New Zealand.

and there is a skylight in the opposite corner, so that there is not a dark spot in the whole place. Cases in any part of the room have ample light to see to work on. The job presses are located in the narrow end, which is very convenient therefor.

A large and convenient apartment for flat and ruled paper stock, with sufficient space for large quantities, has been located in the extreme back corner of the building on this floor, easy of access from the mechanical department. It is also large enough for the paper cutter and stapling machine in addition to the stock. A large window supplies light and ventilation.

The basement is under the entire building and is about the best part of the shop. The newspaper press, folder, and motor are down here, and as the basement is only half under ground and the other half well filled with windows it is also light and airy. Besides the machinery there is storage room for print paper by the car load, as well as the heating plant, coal bins and closets and the hot water connections for the wash sinks on both floors. There is not a foot of unoccupied space, yet at the same time nothing is crowded.

The building is entirely of brick, heated by steam, and lighted by electricity.

* * *

The *Daily Freeman,* of Belleville, Kansas, celebrated its fifth anniversary November 9 with a special edition of twenty-four pages. These early anniversaries have a zest that may be in a measure lost in the later years when time has dulled the zeal of the conflict.

The editor says:

It was five years ago this week that the writer drove in from Republic City. It was not without an effort that we left that good old town. Near there we were born, and there we had earned our first money by selling catfish fresh from the turbid waters of the White Rock creek; there our mother had spent the best years of her life for our sake, and it looked as though we were a little ungrateful to pull up and leave. Partly on this account and partly because of some fear of attempting

to run a paper in Belleville we rather hesitated in coming here. However, we mustered up the required courage, and we are mighty glad of it. We will tell you a few of the reasons why.

He then proceeds to recount the incidents of a most gratifying success, indicated by a threefold increase in circulation, by nine times more job work, five times as much advertising, and a most gratifying development and betterment of the town through every man, woman and child adding their might of effort for improvement.

The first page contains interior views of the office and a portrait group of bright, intelligent, strong, sweet faced boys and girls and men and women, who constitute the office force. In looking on their pleasantly pictured, happy, healthy countenances, we have felt a desire to grasp the hands of the originals with a sincere God bless you, and even to impart a more endearing and fatherly salutation to the girls. Not only is the office illustrated, but the town and country are lovingly written up, the editor declaring in his enthusiasm, "We feel about the town as we feel about the country, that there is not a place in Kansas where the sun shines brighter, none where the physical, spiritual and moral atmosphere is purer."

The first plan was to issue only a twelve-page paper, but it grew, through liberal advertising patronage and the accumulation of matter, illustrations and portraits into the twenty-four pages. Everything grows in Kansas when backed by intelligent industry and enterprise.

* * *

The Chickasha, I. T., *Daily Star* has the special feature of running at the top of the two center columns of its first page, every day, an inspiring sentiment, set in the form of a double column card with a neat border and in smaller type than that of the body of the paper. The sentiment for November 16 is very appropriate to this anniversary time of the year when every one is expected to take a retrospective view of life. It is as follows:

"Forget not the dreams and aspirations of youth." Youth's golden dreams and aspirations have not all been realized, but the memory of youth's sweet visions keeps in sight the beautiful star of hope, while clinging to the youthful aspirations blazes the way to a bright old age full of sweet expectations for life's brief future. Youthful memories and aspirations conspire with ripe experience to attain a lovely, youthful old age. Old age is honorable, and, adorned with Christian virtues and youthful attributes, is attractive and instructive.

Remember the dreams and aspirations of thy youth.

* * *

The Mansfield, Ohio, *News* recently scored a decided victory in an alleged libel suit for $20,000, brought by L. C. Mengert, a defeated candidate for common pleas judge, the court instructing the jury that criticism without malice is privileged by the press. The public has the right to know as to the honesty, integrity and the fitness of a candidate for office; that only through the freedom of an honest newspaper can this information be obtained. The jury was about evenly divided politically. The *News* is one of the prominent dailies of Ohio, edited and published by the Hon. W. S. Cappeller, well known as past president of the National Editorial Association and prominent in newspaper and political circles.

* * *

The fact that four great Indian reservations are soon to be opened for settlement is immediately responsible for bringing into existence *The Western Homeseeker*, a bright, newsy, illustrated magazine published at Missoula, Montana.

But, while *The Homeseeker* aims to give much desire information concerning reservation openings, its field is a much larger one. With profuse illustrations it discusses live topics of interest to those seeking opportunities in the Great West, whether it be concerning cheap lands under government irrigation projects, stock raising, intensive and extensive farming, or mining.

This new magazine is unique in its character and practically has a great field to itself. Its future success seems to be limited only by its fidelity to its high aims and ambitions. Everywhere men and women are seeking knowledge of the West. If *The Homeseeker* is able to give this desired information, it will assuredly be in demand. The subscription price of $1.50 per year is moderate. It can be ordered through the newsdealers or direct from The Homeseeker Publishing Company, Missoula, Montana.

¶

THREE COLOR PRINTING IN JAPAN.

A traveller in Japan, E. R. Pencock, of Melbourne, Australia, tells in the *British Printer*, of primitive hand printing in colors which he witnessed in the Flowery Kingdom:—

"Walking along a narrow street in an inland town in Japan I came upon an old-time Japanese printing office, and was interested in the curious methods adopted to get very remarkable results. This shop, about twelve feet square, was open right to the street, and the printer was a young man with scanty attire, but bright, happy face and courteous manners. The family were in an adjoining room, with but a partition between, and the chatter and laughter went on all the time. The job in hand was evidently a stock wrapper, printed in gold and three colors, one printing producing a rainbow effect. After watching for some time I tried to enter into conversation with the printer, but he could not speak English, and I could not talk Japanese. However, I went in and looked at the work, examining the plant and process in detail.

"There were no type or type cases. The printing was all done from wood blocks. The design was evidently originally drawn out, the various colors separated, and each color engraved on different parts of the same block, about 11x15 inches both sides being used. The printer, squat on the floor, held the block between his knees, slanting from the floor to his chest; he applied the ink, which was semi-fluid, with a brush, laid his sheet to lay-marks on the block, and took his impression by rubbing the back of the paper with a round, flat disc, in somewhat the same way as engravers take their proofs. In different parts of the block were the engravings for the different colors. While the gold was being printed the other parts had a piece of paper stuck over them to prevent them printing, and so skillfully was the inking done that very little got beyond the actual printing limit. The disc with which the impression was taken was made of wood, with a piece of bamboo bark drawn over and fastened at the back in such a way as to form a handle. I asked permission to try my hand at printing, which was granted, to the unbounded merriment of the whole family at my expense. I got a price for one thousand wrappers, three yen ($1.50). The conversation was carried on largely by dumb show, with remarkable alertness on the part of the printer. Then I offered to buy the plant and got the whole outfit for the ridiculous sum of two yen ($1.00)."

* * *

The Southern Indiana Press Association at its recent meeting in Indianapolis elected officers as follows: President, W. M. Moss, of the Linton *Call;* vice-president, W. W. Aikens, Franklin *Star;* secretary, James Caskey, Greensburg *News;* treasurer, C. W. Thomas, Corydon *Democrat.* The association will hold a meeting next summer at Winona, at the time the national association meets at Indianapolis. It is likely that the delegates to the national meeting will spend a day at Winona. Delegates to the national association were named as follows: J. N. Marsh, Columbus; John J. Wingate, Shelbyville; Luther Short, Franklin; William M. Moss and C. W. Thomas.

* * *

One of the biggest factors in business success is in giving satisfaction.—*General Merchants' Review.*

It is the same in newspaper making.

National Printer-Journalist

A Journal for Printing and Allied Trades

Entered at the Chicago Post-office as Second-class Matter.

BENJAMIN B. HERBERT . . . . . EDITOR

Official Paper of the National Editorial Association.

WILLIAM E. HERBERT . . . . . Resident Manager, Chicago Office
BENJAMIN S. HERBERT . . . . . Secretary

SUBSCRIPTION RATES:—In the United States, Canada and Mexico, $2.00 per year, in advance; single copies, 20 cents.

Orders for subscriptions will be received by all dealers in printing material in the United States and Canada.

Remittances may be made by draft, money order, or registered letter. Make all remittances free of exchange and payable to the order of the NATIONAL PRINTER-JOURNALIST COMPANY.

FOREIGN SUBSCRIPTIONS:—To Countries within the Postal Union, 10s. 6d.

FOREIGN SUBSCRIPTION AGENTS:—International News Company, Breams Buildings, Chancery Lane, London, E. C.; F. O. Strong, 111 Fleet Street, London, E. C., G. G. Turri & Co., Melbourne, Australia; The India Printers' Agency, 249 Mint St., Madras, India; Successful Advertising Co., Bangalore, India; John Dickinson & Co., Ltd., Cape Town, South Africa.

ADVERTISING RATES PROMPTLY FURNISHED UPON APPLICATION

The NATIONAL PRINTER-JOURNALIST is unequalled as an advertising medium in its field. No attention paid to postal card requests. Information cheerfully furnished to all patrons.

Subscribers and patrons will confer a favor on the National Printer-Journalist Company by sending in the names of responsible newsdealers who do not keep the monthly on sale regularly.

Manuscript sent in for publication must be accompanied by a letter of explanation and return postage.

CHICAGO, DECEMBER, 1905

Christmas time has come to enter more and more into the lives of all the people with the thoughtful giving, the reunions, festivities and good will. It is a time of the year for the newspaper to review the past with all its lessons and to cast a hopeful, helpful look ahead.

* * *

The past year has been one of great prosperity in all temporal things throughout this whole land, but it has not been without its unpleasant lessons.

* * *

There have been more revelations, seemingly at least, than ever before of the greed and dishonor of men in high positions. Fearful has been the ruin of reputations and the destruction of the confidence of the people in institutions and organizations that had come to be looked upon as semi-benevolent and almost sacred.

* * *

There has been a wonderful amount of housecleaning going on in corporations, in financial, eleemosynary and other concerns as well as in political and governmental affairs, till the heart has sometimes grown sick over accumulated filth revealed and the unveiled perfidy and dishonor and until the people have felt like crying out with the Psalmist of old, "There is none that doeth good." Yet this has been largely only in the revealing, not in the increase of wrong doing. A people is never stronger than when engaged, boldly, in searching out and righting wrongs.

* * *

A great deal of wrong has come from the letting go of the higher ideals; from the folly of the fool "who hath said in his heart there is no God," no retribution, no accountability; from forgetting all that the Christmas of the Christian means, as to the brotherhood of man and the Fatherhood of God, of the supreme obligation and happiness of service, helpful work, love and mercy.

* * *

There has been too much of seeking after the false and fictitious, after ease, pelf and place that can bring neither contentment or happiness, instead of seeking after the proper use or administration of these.

* * *

We do not intend to trench on the domain of theology or religion, but, to our way of thinking, there has been too much of questioning as to historical verities and accuracies and too little delving for the eternal truths that affect men's lives and that are found on every page of the Scriptures and in the lives, writings, speeches and teachings of all our truly great men—our great editors, scholars, divines and statesmen. We have picked flaws in the narratives instead of studying the great eternal verities which they teach, or, on the other hand, men have been content to seek the propitiation of Heaven, justice and their own conscience with formalism, ascriptions of praise, vain repetitions and professions; with a religion of show, a mixture of paganism, old, exploded Judaism or Phariseeism and the worship of fine words, fine clothes and rich jewelry; ornamental temples, music, high places in the synagogues, social positions—rather than the true worship in spirit and in truth of a God whose attributes as revealed to men, are love and righteousness, both to be sought, first and alone, in the secret closet of the heart—and whose service is to do right, to make others happy and one's own self better, in all humility, purity, truthfulness, healthfulness and helpfulness, avoiding all cruelty, imposition, unfairness, vain pride, wantonness or lasciviousness, avarice and unworthy lust for power, malice, envy, covetousness and filthy concupiscence that walketh in darkness, keeping the mind, imagination, memory, the body and soul clean and wholesome, shunning vile communications, the winking at sin and even the very appearance of evil.

* * *

The manly, open struggle against wrongs shows the old ideals are not dead, that men still love justice and right instead of injustice.

And what a field has been opened to the free and independent press, whose interest, as well as duty, must be ever found to be on the side of right. The wrong doers are many but they are vastly outnumbered by those who must suffer from wrongs and the newspaper's success and well being must ever rest with the great majority. Doubtless some newspapers have been influenced by bribes and the desire for gain and the good will and support of the strong and rich, but these have not been able to fool the great majority for long and have justly, in the end, suffered for their perfidy.

On the whole the American newspapers have stood for that which is right, worthy and of good report, have often, regardless of friendship or present power or reward, condemned the wrong doer and such newspapers have grown stronger through every such condemnation.

* * *

We had written the foregoing paragraphs as containing matters appropriate for the consideration of all and especially of newspaper makers—who undertake to inform, warn and instruct and should do these intelligently and conscientiously—in this last month of the great and eventful year of 1905, at this Christmas time, of goodness and good works, when the Chicago *Evening Post* reached our desk, containing the article, by ex-President Grover Cleveland (sent by special dispatch) from the December issue of *Harper's Monthly Magazine,* on "The Integrity of American Character."

Ex-President Cleveland says in his "Arraignment":

"The departures of the American people from the way originally ordained for them were never so common and never so disquieting as now.

"In official circles offenses of malfeasance and corrupt breaches of trust are alarmingly frequent.

"The old landmarks of integrity and faithfulness to duty which once indicated our nation's course of safety are rashly neglected.

"Public extravagance no longer universally condemned is flaunted before our people as evidence of the splendor of our nationality.

"In business and social circles the pursuit of money has become heartless and rapacious; the deference to those who have won great fortunes has grown in many quarters to be so unquestioning and so obsequious as to amount to scandalous servility.

"The envy of the rich among the struggling poor is more than ever bitter and menacing.

"In politics there is far too often concealed behind a pretense of devotion to the public weal the sly promotion of disreputable, selfish and personal advantages.

"In the industrial field there is no longer found the generous and contented co-operation between employer and employe which should insure the prosperity and happiness of both.

"In addition to all this there is sadly apparent among those who undertake trusteeship a tendency to complacently venture upon bold and rank violations of duty, only explained by the prevalence of lax and flippant conceptions of the sacredness of fiduciary obligations."

In his "Defense" he shows how these evils are being counteracted and condemned, and then draws the "Conclusion" that

"The American character has received no disabling wound or hurts. It can be relied upon to save our institutions, if its moral fiber is not further weakened by the creeping corrosion of greed or wicked neglect. And these cannot occur if the masses of the American people are watchful, faithful to their great trust and in all things patriotic."

* * *

Mr. Cleveland's mistake is only in presuming or implying that these evils are recent in their origin. We know of none of them that have not been shown to have existed for thirty years and those who are old enough to recall the first campaign of Mr. Cleveland and Mr. Blaine, will remember that the moral turpitude or lack of virtue on the part of one candidate and the "Casting an anchor to windward" or political chicanery on the part of the other candidate, were made leading issues. No presidential campaign since has ever been filled with such personalities, such charges of grossness and corruption.

The hopeful condition, now, is that the wrongs existing for a third of a century are being exposed and punished and the evils are being remedied.

* * *

We do not believe in over-praising any one man, nor do we wish in any sense to be partizan, but we believe that the whole American people have come to recognize the fact that not only unearthing, but removing the evils that have existed for three decades or more, is largely to be credited to the fact that a leader has, at last, been found, in Theodore Roosevelt, pure in life and honest in purpose and as brave as he is true, loyal and patriotic.

Neither honor, virtue or love of country was dead, but no one came, without stain, whose purposes, backed by a consistent life, all could trust. Virtue slept until the prince of honor came and then she awoke.

One true leader aroused others, so that now all over the country injustice, corruption, graft and political chicanery, dishonest greed and dishonor are fearlessly, persistently and victoriously assailed by bold, chivalric, unyielding champions of right and duty.

* * *

Let all the people rejoice and take heart for these are not the beginnings of wrong doing but the endings. Things are better and not worse. To say that evils are growing, when only they are being exposed and made impossible in the future, is only to discourage, yet these times and the experience of the past reinforce the fact that eternal diligence is the price of liberty and good government and of all else that is good, true and worthy. Let every editor, every man connected with the free, untrammeled, independent American press, do his duty.

REVIEW OF JOB WORK

BY E. S. HANSON, CHICAGO, ILL.

Address all Communications for this Department to
E. S. Hanson, 1524 E. Ravenswood Park, Chicago, Ills.

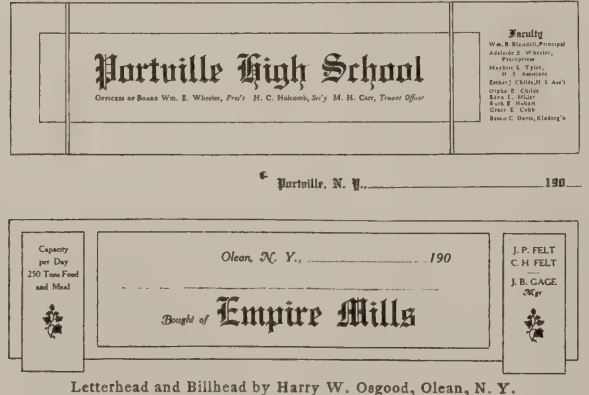
Christmas is coming—with its joys and good cheer, its ringing of bells and its shimmer of gaily decked Christmas trees. And to the job printer it is coming with its increase of work—its invitations, and programs, and gift folders, and all the nice things which crowd on one at this time of year. Make them breathe the spirit of the season. Perhaps you had better get a few new fonts of type, or a new border, or two or three seasonable ornaments. They will give your work a freshness not possessed by that which "the other fellow" turns out. Someone is sure to ask for a Christmas cut or ornament, and you may have to confess that the only thing you have is that old picture of Santa Claus and his reindeer on the housetop, which belonged to classic antiquity when you yourself were young enough to believe in a Santa Claus. Get ready for this work. "Preparedness" is a good word for the printshop, as everywhere else.

It is with pleasure that the faces of some of our contributors are shown in this number. These will help us to know each other a little better, and I trust will eventually lead to an even closer acquaintance. Others of our friends will appear from time to time.

I am thankful to the contributors to this department for many helpful suggestions, some of which are already being worked into these pages, to their decided betterment. All such will be gladly received at any time.

I am receiving occasional requests for samples of work, some of them without even a stamp for return postage. I have on hand a large number of specimens which I shall be glad to send out, but must ask that 10 cents be enclosed for postage and the work of sending them.

Some of our friends are also asking me to send them special criticisms and advice by mail. In some cases they have asked me to send a bill for this work, but I have not done so. I am glad to do this work, glad that you are sufficiently interested to ask me to do it. But you can readily



Letterhead and Billhead by Harry W. Osgood, Olean, N. Y.

see that this does not come under the work required of me by the editor of this magazine, and I shall therefore have to ask a small fee for each such service—just enough to cover the actual time spent in your behalf. So if I can help you in this way at any time, kindly send 25 cents with each letterhead or other such small job, and 50 cents for each booklet or work of similar character. This will include a redesigning of the job if such is necessary.

Prize Contest in Job Composition.

It gives me pleasure to announce definitely a contest in job composition, brief mention of which was made last month. And in conformity with the suggestion of one of my correspondents, the subject on which we will center our attention will be a letterhead. No "copy" will be furnished for this contest—just do your very best with every letterhead which comes into your hands between now and the time for the contest to close, and then send us the one or ones which are in your opinion the best.

The following rules will govern the contest:

1. Specimens must be printed on white paper.
2. Not more than two colors of ink must be used.
3. A complete black print must accompany each color job, also a black print of each color.
4. Specimens must reach the editor of this department not later than January 25, 1906.
5. Competition is open to all who wish to enter.
6. A competitor may submit as many specimens as he chooses, but not more than one prize will be awarded to one person.

These rules, I think, cover all the points necessary to be known, and I cannot undertake to enter into any correspondence with reference thereto. Let your specimen be a letterhead for a business man, a professional man, a school or college, or anything you choose, with much or little matter, as it happens to be. But having chosen, let the work be in harmony with the man or institution which it represents; for the judges will try so far as they can, to judge the work from the standpoint, not of the critic of the printing art, but from the standpoint of the man for whom the work is done. The customer is the man to be pleased; and we must please him, whether the result conforms to all our artistic canons or not. And to this end of finding out in a measure what the customer wants, I shall secure as judges of this contest, not men who make printed matter, but men who buy it—business and profesional men who are spending large amounts of money for printing, and who insist that it shall be so effective as to represent them well and bring the greatest possible returns for their outlay. They will not be easy men to satisfy, I promise you. Some of them will be men whose bills for alterations run up at times to almost as much as the original composition; but when a proof receives their final "O. K." you can depend upon it that the job is going to have backbone enough to make its own way in the world. We shall ask each judge to give our readers a brief criticism of the work, and to tell just why they make the selections they do. The names of the judges will be announced in the January number.

And now for the prizes. The distinction of winning the approval of such discriminating men will of course be the chiefest thing to work for; and yet we want the successful

contestants to have something more tangible as a memento of victory, and therefore will give the following:

First Prize—One 15-inch Rouse job stick, nickel plated, and engraved with the name of the winner.

Second Prize—One 8-inch Rouse job stick, nickel plated, and engraved with the name of the winner.

Third Prize—One set of composing rules in case.

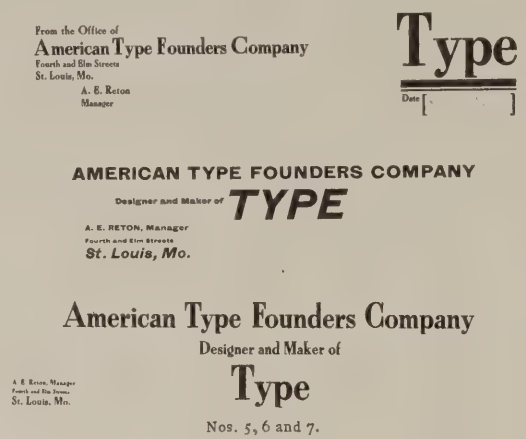
This contest should bring in a large number of specimens, and should be the means of developing a great amount of typographic talent. There is perhaps not an office in the land which will not have several letterhead jobs between now and the 25th of January; do your best on the ones you get, and send them in.

A number of our readers have no doubt seen several different specimen sheets recently issued by the American Type Founders Company, each under the title of "A Portfolio of Letter Heads." They are all interesting specimens of composition, and we are showing a large number of them, all of

Nos. 1, 2, 3 and 4.

which in the original are in a uniform ink color scheme of black and orange. They vary through many widely divergent styles of typography, and there is not one but has features which give it individuality and make it of interest to the type artist; yet I think I am safe in saying that there is not one in the lot which the American people would care to adopt as a permanent letterhead. Of course it is not in line with the business policy of a type foundry to stick to one invariable style of printed matter, as many firms do, and for that reason the foundry can take larger license and use to advantage a few thousand heads of a design which for a steady diet would prove nauseating. And while I am on this subject I might say that many other business men might adopt the foundry system of frequent change of design with advantage. I know it is the theory that the letterhead comes to be a part of the firm's identity; and acting upon this theory, many a house sends out printing in the typography of twenty-five years ago, printed from an old plate that is battered and rounded off from long usage, and the result is that the up-to-date man suspects the goods and business methods of the firm may also savor of the long ago.

No. 1 is one of the most harmonious samples in the lot. It is a distinctly old style effect, the rule at the top, the Bewick Roman and the Della Robbia initial, all admirably carrying out the one idea, and giving the head a unity which some of the others do not possess. The word "Type" is in

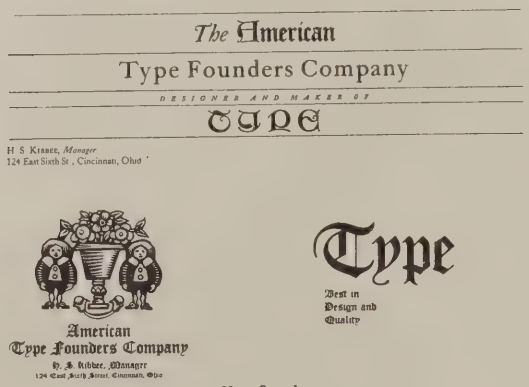


Nos. 5, 6 and 7.

orange, and the initial in the two colors. The same type is also used on No. 4, and on this one the inner border alone is in orange. And by the way, these are serviceable metal borders, not showing the rounding effects of long use. The unequal margins inside the center panel are to me a serious detraction from the beauty of this specimen.

No. 2 is a pretty showing of Flemish Black, though there is nothing gained in strength or beauty by having the word "American" in a different color from the rest of the job. This is not the case in No. 3, the word "Type" on each side in orange lending distinction to a job which many printers might otherwise condemn. In this head the ornaments may in truth be said to occupy the center of the stage. We doubt if anyone except the dealer in ornaments would care to have so large and conspicuous a sample dividing the two parts of the firm name.

In Nos. 5 and 7 we again find the Bewick Roman, and in No. 6 the Modern Gothic No. 4 and italic. These three all have the initials of the corporate name in orange. The effect

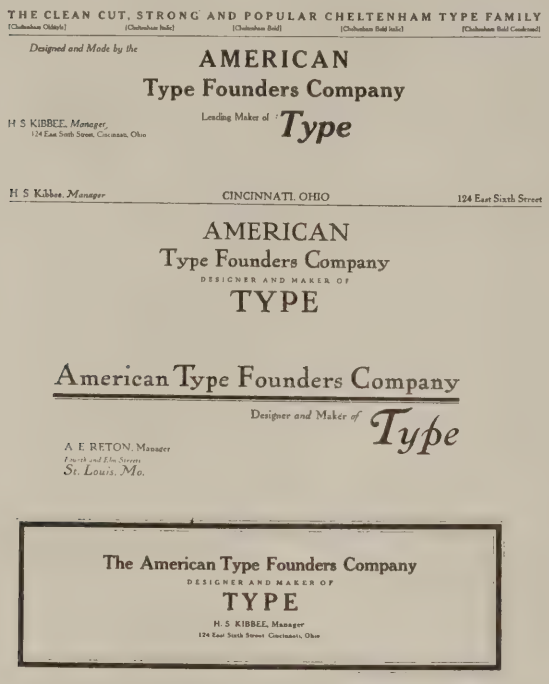


Nos. 8 and 9.

is fairly satisfactory except in No. 6, where the letters are all of the same size; the initials in a lighter color than the remainder of the word, look smaller than the other letters, as will always be found to be the case, and such a combination should always be avoided. Nos. 8 and 9 are two designs of a decided Bradleyesque trend. The first has the rules in orange and the second the one large initial.

The next four designs show two each of Cheltenham and Pabst Old Style. The first two have the same characteristic as

several of the other designs—the word "American" in a larger type than the rest of the name. For myself I prefer the style shown in the two latter designs, and I believe this is demanded by a large majority of business men. No. 11, with its line at the top above the rule, furnishes a new idea which can sometimes be used to advantage. No. 10 has the rule and



Nos. 10, 11, 12 and 13.

the word "Type" in orange; No. 11 has the word "American" and the initials of the other words in the name; Nos. 12 and 13 have the rules only.

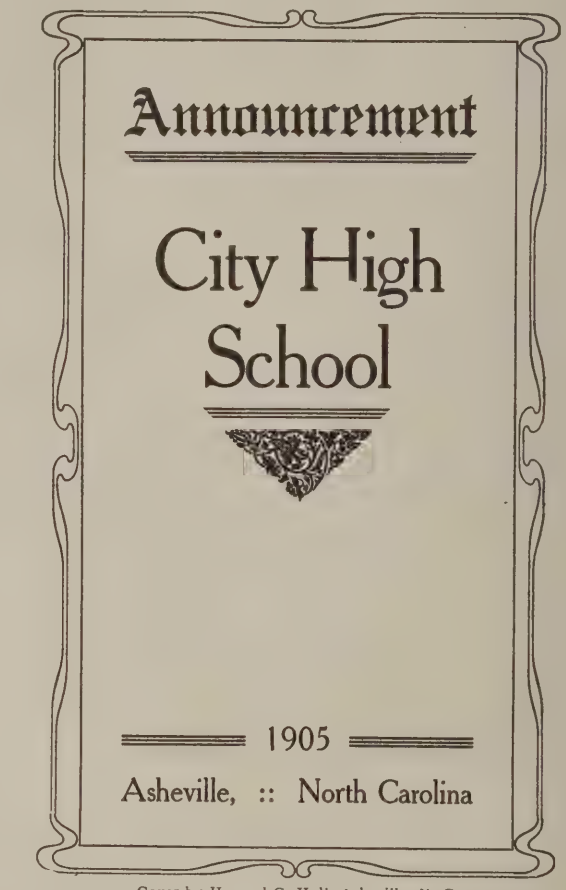
Nos. 14 and 15 are two creations in Old English, the latter with Dutch initials in orange. It is not easy to see why the top line should be set in the open, unless it be merely to display the letter. No. 14 has the rule in orange. The two words on the ends in black look somewhat bold for the rest of the head. I should like to try this with the rule—somewhat narrower, of course—in black, and the two large words

Nos. 14 and 15.

in orange. But I might not like it—one cannot always tell until the actual experiment is made. It would be interesting to know just how much experimenting, changing, rearranging—a cardboard here, a half-point space there—was done on all these specimens before the pressman got his final "O. K." There was lots of it, I'll warrant. But that is the way the printer attains unto perfection.

Rex H. Lampman, Neche, N. D., writes us an encouraging letter—encouraging because it shows that he has given close attention to the criticisms of this department, and has tried to profit by them. He is resetting some jobs accordingly, and I trust we may have the pleasure of comparing them.

And right here might be as good a place as any to say a word about the words of criticism which this department contains. While they come from some years of experience, and some study of the laws of design, they are not given as infallible, and I do not want anyone to consider them as such. Their only aim is to assist in developing original genius among those who read them—not to crowd out such genius by insisting upon certain hard-and-fast rules. The varying styles which even the youngest of us have seen come and go prove conclusively that there are no hard-and-fast rules which may not be disregarded if a man has sufficient force of artistic talent to give the people something else which they are willing to accept. "That seems to sound very well," said a friend to Mozart, in commenting on an unusual measure in one of the great composer's works, "but do the laws of harmony allow it?" "I allow it," answered Mozart; and for him that settled the matter. And so I would not have anyone follow blindly these suggestions. If they meet with your approval, well and good; but the main thing is that you grasp the underlying principle of design which prompts the criticism, and then you can apply it for yourself in a hundred ways. This little homily does not apply especially to you, Bro.



Cover by Howard C. Hull, Asheville, N. C.

Lampman, I know; but it came into my thought while reading your letter.

Mr. Lampman sends in some more specimens—creditable, all of them. While some may be a little better than others, there is not one that I should not be satisfied with, were I a man in business.

Ye Chipman Printery, Poland, Me.—This is the first work I have seen from this noted shop since taking charge of the

card composition. This latter, in composition and presswork, is equal to many such a job sent out by the foundries. The only suggestion I would make is the omission of points from the "At Home" cards.

P. H. Boley, with Quinn Printing Company, Braddock, Pa.—Am glad to see you getting started to sending in speci-

The Bay City Press, Oakland, Cal.—I am showing herewith four of your business cards. While they all have points of excellence, there is not one which could be chosen as a perfect model to be followed in other work of this class. The Dr. Avery card perhaps comes nearest to it. It presents the oft-encountered problem of getting a large amount of matter on a small card. The only change I would suggest would be

to close up the space between the lines at top and bottom, thus allowing the lines in center to stand out more prominently. In fact the undue prominence of the lesser points is a fault of all these cards. Take the one for your own firm. The telephone number, the address and the name of the representative are all so large as to allow the attention to center on

no one thing. The two rules are very much out of place on the Holmes card. If this motto were put in two lines in the upper right hand corner, the name and occupation could be dropped down to the center, making a much better effect. The Kreiss card is really not a card at all, but an advertisement, and even as such it has much to be desired. The location is as prominent as the goods in which the man deals, and the telephone number almost as prominent as either. The spacing, both between words and between lines, needs a thorough overhauling, and even for an advertisement the border is much too heavy for the space occupied. Your billhead is a fairly neat piece of work.

Howard C. Hull, Asheville, N. C.—A large number of jobs—good, as usual. Mr. Hull seems to take especial delight

in a cover page, and he has produced some really effective creations. We show two of them.

Harry W. Osgood, Olean, N. Y.—The only one of your jobs I can criticise is the organ recital program. The panels at the side look as though they were not a part of the original design, but were added later, to provide for a change in the size of the stock. The ornament is also a little too large, unless it were printed in a softer color. The other pieces of work are very tasty. I wish I had room for more than two of them.

A PASS INCIDENT OF PAST YEARS.

The following which we find in the *Stationer and Printer* of New York could easily have happened twenty years ago, but not in this day of the reformed newspaper:—

A certain Western lawyer who stood a good chance of starving to death decided to go East again. Without any money he got into a train for Nashville, Tenn., intending to seek employment as reporter on one of the daily newspapers. When the conductor called for his ticket he said: "I am on the staff of ——, of Nashville; I suppose you will pass me?" The conductor looked at him sharply. "The editor of that paper is in the smoker. Come with me. If he identiles you, all right." He followed the conductor into the smoker; the situation was explained. Mr. Editor said: "Oh, yes, I recognize him as one of the staff; it is all right." Before leaving the train the lawyer again sought the editor. "Why did you say you recognized me? I'm not on your paper." "I'm not the editor either. I'm traveling on his pass, and was scared to death lest you should give me away."

* * *

Your kindly mention of my efforts has been the subject for favorable comment by several North Dakota newspapers.

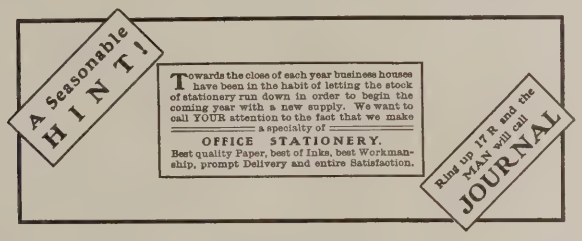
MORE WORK THROUGH PUBLICITY

BY HARRY A. WOODWORTH

Address all Communications for this Department to
349 Jarvis Street, Toronto, Canada

I WAS beginning to wonder what had become of John Hebrank, of Highland, Ill., but he writes that he has been having trouble with his vermiform appendix. He sends me a job (No. 1) with a panel-scheme which is out of the ordinary and is especially attractive. I am sorry to hear of Mr. Hebrank's illness, but am glad he is now feeling "both good and fine," as he writes. His work shows that he has not lost in skill by means of his rest. The rules of the



A Seasonable H I N T !

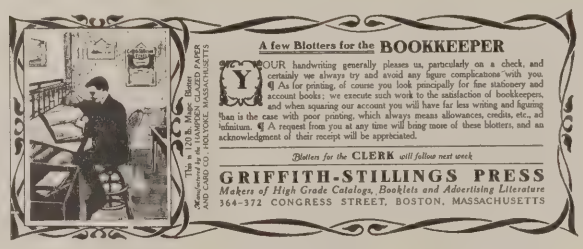
rules are in the two colors, as is the Mission Toy. The initial is black, the initial piece green. This is certainly a job that will attract.

* * *

I have not reproduced much of the Poland brand of printing for some time. But I want to congratulate Mr. Chipman very much on his choice of specimens which he submitted a few weeks ago. They are in a new style, and are, to my mind, about the most tasteful things I have had from Mr. Chipman; and that is saying much. I am reproducing a blotter which Mr. Chipman sent me last summer. The mountains are of the lavender hue which is said to prevail in the West. The coat and the skirt (and incidentally the stock of the woman's rifle) are in green. Mr. Chipman writes that the color-blocks in the cut were home-made from patent leather. It was a pretty good job; only I should like to have seen the stock of the gun in, say, the lavender, as the job is in perfect register.

Mr. J. Eveleth Griffith, of the Griffith-Stillings Press, Baston, wrote me a very pleasant letter in respect to the folder I reviewed in a late issue, and sent me some of the most interest- and attractive follow-up matter I have ever seen. I think he said that he found it was bringing good results. There were a series of blotters in envelopes addressed in this way: "For the President," "For the Vice-President," etc. There were blotters for the superintendent, the secretary, the advertising manager, the clerk, the book-keeper, the stenographer and the office boy. Everybody was included, with the exception of the janitor, the scrubwoman and the cat. Other printed matter was enclosed with each blotter, but these did not seem to be especially applicable to the person addressed, though any one of them ought to be interested in these beautiful circulars. The first blotter sent out announced: "We shall mail during successive weeks, with our compliments and best wishes, individual booklets for your entire office family." Each succeeding blotter was announced a week in advance on the blotters. I am



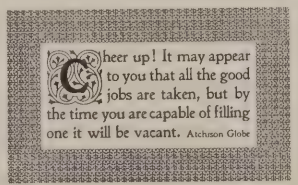
A few Blotters for the BOOKKEEPER
YOUR handwriting generally pleases us, particularly on a check, and certainly we always try and avoid any figure complications with you. ¶ As for printing, of course you look principally for fine stationery and account books: we execute such work to the satisfaction of bookkeepers, and when squaring our account you will have far less writing and figuring than is the case with poor printing, which always means allowances, credits, etc., ad infinitum. ¶ A request from you at any time will bring more of these blotters, and an acknowledgment of their receipt will be appreciated.
Blotter for the CLERK will follow next week
GRIFFITH-STILLINGS PRESS
Makers of High Grade Catalogs, Booklets and Advertising Literature
364-372 CONGRESS STREET, BOSTON, MASSACHUSETTS

No. 3

reproducing the blotter for the Book-keeper (No. 3), because the most of the others would be more difficult to reproduce. As this stuff is late, possibly the half-tone will have to be reproduced along with the rest of the zinc etching, and so you will kindly not take it as an example of the Griffith-Stillings presswork. Some of the folders will be reproduced later. This was certainly a rather vigorous campaign, but doubtless the most of the staff were interested enough to see (and possibly "swipe") many of the blotters.

* * *

A number of excellent specimens come from the School of Printing in connection with the North End Union, Boston. I am reproducing one of these as being appropriate to this sea-

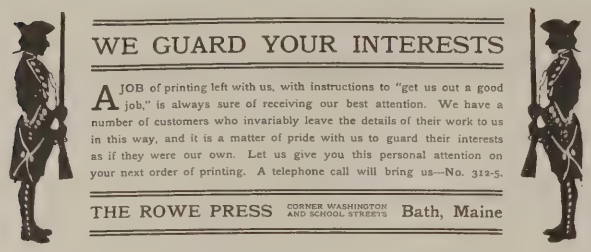


Cheer up! It may appear to you that all the good jobs are taken, but by the time you are capable of filling one it will be vacant. Atchison Globe

No. 4

son of cheer (No. 4). John Ruskin and Ella Wheeler Wilcox have figured pretty largely on such cards as this, and I was thinking that it was about time that such paragraphers as the humorist of the Atchinson *Globe* had a show.

Certainly this blotter from Milton L. Vincent, of the Rowe Press, Bath, Me. (No. 5), may fairly be said to be well balanced. The rules are red. The remainder (I was just going to say "the balance") is dark blue.



WE GUARD YOUR INTERESTS
A JOB of printing left with us, with instructions to "get us out a good job," is always sure of receiving our best attention. We have a number of customers who invariably leave the details of their work to us in this way, and it is a matter of pride with us to guard their interests as if they were our own. Let us give you this personal attention on your next order of printing. A telephone call will bring us—No. 312-5.
THE ROWE PRESS CORNER WASHINGTON AND SCHOOL STREETS Bath, Maine

No 5

I am showing a photograph that should be of considerable interest to our readers (No. 6). It is the handsome office of William Carl Pirsch, of the Pirsch Press, Dayton, O., which he brought with him when he and a number of other Ohio notables paid a flying visit to Toronto this fall. The picture is particularly appropriate for this number, as it represents the office in Christmas apparel. That pot does not contain lye or printing ink, but is a repository (if I remember aright) of Christmas gifts as well as the tree. At any rate it is a place for the names of the friends of the Pirsch Press whom Mr. Pirsch wishes to remember with Christmas gifts. My name, he wrote me, "was in the pot." I did not know what he meant at the time, and was afraid that he had some allusion to jackpots, with which my connection was never very successful. (I wrote all this about the pot while the photo was elsewhere. I guess the pot contains names instead of presents. But I've no

No. 6. Christmas at the Pirsch Press.

time now to alter what I've written.) Instead I received at the dinner in Toronto, to which he invited me by mail, a most handsome ink-stand, which I would be using at the present time were it not that I cannot dictate to a stenographer with it. However, it will always be available in signing checks or writing to my best girl. It is the most beautiful ink-well I ever saw and gives further evidence of the exquisite taste of Mr. Pirsch. I have received many souvenirs from some of my friends all over the country during the last six years, but never acknowledged one *in the paper* before, and my other friends who have remembered me so kindly will understand that I am only doing so now because it is part of the story about the picture. Such a tasteful office I believe to be of itself good publicity for an artist printer. I should be very glad to receive other photographs of the interior of a printing office. I presume that Mr. Pirsch keeps the towel in the composing room.

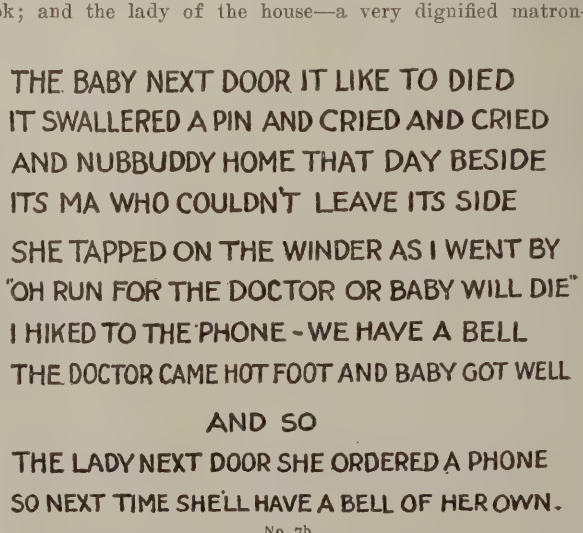
L. A. Ewing, who is now with the Magnan Press, St. Louis, sends me a book, entitled "Hollo, Who Is This?" which has the covers so folded that the address may be written on the first cover page. This has nothing to do with printing-advertising, but as Mr. Ewing has asked me my opinion of it, and as it received a severe criticism in an advertising trade journal some time ago, I am reproducing two pages. This was what the other journal said about it:

Well, what can we say for the Bell Tele. Co. of St. Louis? We just can think of nothing bad enough, so we reproduce the page from the booklet sent out. In this year of supposed civilization imagine a corporation expected to stand for somewhat of dignity and at least to have good taste and some sense, sending out a book of 24 pages and every page but one showing stuff like this.

The first page was reproduced in the magazine with the caption, "The Bell Telephone Style of 'Reason—Why.'"

No. 7a

There is no reason on the first page, but it seems to me that this book is not inconsistent with the dignity of a telephone company, and that the reasons for using a 'phone are more attractively presented in this book than by means of an interminable discourse, dotted with bewildering italics and capital letters, such as the firm which print the advertising paper claim is all to the good. It really takes a more skilful artist than one would suppose to get up such work as this. I have only showed it to one family, whose personnel includes two or three artists. They were all delighted with the humor of the book; and the lady of the house—a very dignified matron—



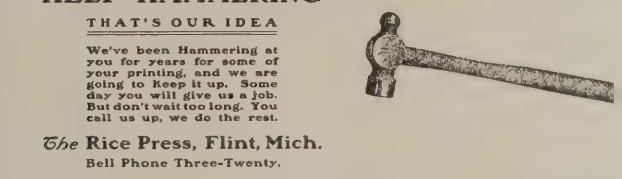
THE BABY NEXT DOOR IT LIKE TO DIED
IT SWALLERED A PIN AND CRIED AND CRIED
AND NUBBUDDY HOME THAT DAY BESIDE
ITS MA WHO COULDN'T LEAVE ITS SIDE
SHE TAPPED ON THE WINDER AS I WENT BY
"OH RUN FOR THE DOCTOR OR BABY WILL DIE"
I HIKED TO THE PHONE - WE HAVE A BELL
THE DOCTOR CAME HOT FOOT AND BABY GOT WELL
AND SO
THE LADY NEXT DOOR SHE ORDERED A PHONE
SO NEXT TIME SHE'LL HAVE A BELL OF HER OWN.

No. 7b

said that this book had convinced her of the necessity of having a 'phone—as she was often alone with the baby in the house. The pages about the baby are reproduced (Nos. 7, a and b).

* * *

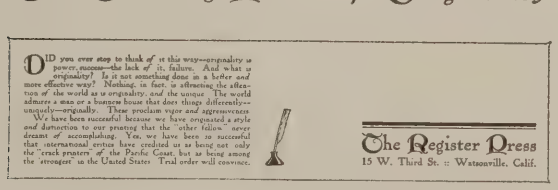
One of the nicest mailing folders I have received for some time is from George Seton Thompson (without any hyphen). Whether he is any kin of the famous author-artist—I forget whether his name is Seton-Thompson or Thompson-Seton now—I do not know, but a picture of a bear, much like that the artist would draw, splendidly printed in double-tone on coated-stock, is attached to the center page of the dark brown folder. The picture is copyrighted by Chas. Scribner's Sons. The coloring of the initial reminds one of a picture of Maxfield Parrish, as reproduced in Scribner's Magazine. These words, which appear beneath the picture, might seem to the reason why folks as lacking in dignity: "'Little Johnnie' has a tail, though you cannot see it. The fact that the tail is not visible need no keep you from reading, to your profit, 'Thompson's Truthful Tale' appended hereto." There is no more attempt at being witty upon the folder, the rest being good, sound, printing-advertising logic. But I wish I could show you that folder!



KEEP HAMMERING
THAT'S OUR IDEA
We've been Hammering at you for years for some of your printing, and we are going to Keep it up. Some day you will give us a job. But don't wait too long. You call us up, we do the rest.
The Rice Press, Flint, Mich.
Bell Phone Three-Twenty.

No. 8.

The Rice Press, of Flint, Mich., has kept me supplied with blotters each month for years. They were always clever, but the firm are doing some of the most original work they ever did now. Here is a sample blotter on white porous stock (No. 8). The abundance of white in connection with the pattern is very effective.



The Drawing Power of Originality
DID you ever stop to think of it this way—originality as power, success—the lack of it, failure. And what is originality? Is it not something done in a better and more effective way? Nothing, in fact, is affecting the efficiencies of the world as is originality, and the unique. The world admires a man or a business house that does things differently—uniquely—originally. These proclaim vigor and aggressiveness. We have been successful because we have originated a style and distinction to our printing that the "other fellow" never dreamt of accomplishing. Yes, we have been so successful that international critics have credited us as being not only the "crack printers of the Pacific Coast, but as being among the strongest in the United States. Trial order will convince.
The Register Press
15 W. Third St. :: Watsonville, Calif.

No. 9.

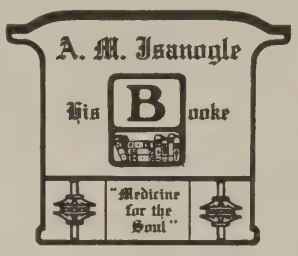
Thomas E. Abbott, of Watsonville, Cal., certainly exemplifies the originality he advertises on the pink blotter here reproduced (No. 9). The heavy rule is red with brown bordering rules. The panel material is brown. The balance is green. It is certainly a very striking blotter.

No. 10

With a very cheery letter from L. Weitlispach, of Streator, Ill., comes a bunch of matter on orange stuff, the most of which aggravates me, for it cannot be reproduced. However, he sends me a black and white proof of one of the jobs, which is shown as No. 10. The heavy rule and the word "Printer" are in orange. Mr. W. was always an original and tasteful printer, and I like his new work better than his old. This is by no means the handsomest job he sent me.

* * *

From Harry L. Kiracofe, with Martin & Bienfeld, Frederick, Md., comes a package of work of all kinds, which shows considerable individuality of a very pleasing nature. The catalogue covers are particularly striking in their daring originality. I believe that the printed stationery, such as Mr. Kiracofe sends, has already been reviewed in the Job Work Department.



No. 11

If this is not so, I shall be pleased to reproduce them later. I am giving a book-mark (No. 11), which certainly shows a unique use of the Post ornaments. The B is surrounded by a small patch of white. The rest of the design is the color of champagne. Possibly a suggestion was intended of "Good books, good wine," etc.

¶

A CENTURY POSTER.

We have received a most admirable specimen of three-color printing, executed on the Century Press, by Bartlett & Co. —The Our Press—of New Jersey. It is the reproduction of one of Schreyer's famous paintings and is embossed on the press in a way to give the appearance of the canvas of the original painting. The colors laid on the canvas by the brush of the great painter are shown with the perfection and beauty of the original. The scene is of a group of swarthy Moors, mounted on their fiery steeds and bearing their weapons. The picture is full of life, action and strength. The different colors of the horses, as well as the bright colors of the picturesque dress or costumes of the Arabs, are shown. It was a difficult piece to reproduce and it is one of the finest specimens of three-color work that we have seen. The splendid results obtained must be largely credited to the accurate registering qualities of the Century press, and its powerful impression mechanism and perfect distribution.

¶

The editor acknowledges, with thanks, the receipt of an invitation from Mr. and Mrs. James O. Amos, of Sidney, Ohio, to attend the marriage of their daughter, Delia Ellen Amos, to Mr. Horace Holbrook, Saturday evening, November 11. We tender our hearty congratulations, though unable to be present. Miss Amos is known and esteemed by all the members of the National Editorial Association. She has been one of the ablest among the active newspaper women of the country and has been, for years, President of the Ohio Woman's Press Association. May her married life be as successful and happy as has been her newspaper career. She will receive the good wishes of members of the press in every state of the Union.

* * *

Mr. G. G. Grimes, a Fostoria, Ohio, real estate man, has bought the *Press*, Adrian, Mich., as a result of the negotiations through the Chicago office of Charles M. Palmer. The *Press* was formerly owned by Willard Stearns, who sold it last spring to E. S. White, an Adrian Republican. Being disappointed in securing a Democratic associate, Mr. White sold.

NEWSPAPER CRITICISMS

BY O. BYRON COPPER, POCATELLO, IDAHO.

Address all Communications for this Department to
316 N. Arthur Ave., Pocatello, Idaho.

THAT "a rolling stone gathers no moss" is a time-honored proverb, with the more recent addition of "but it gets well polished," which is somewhat facetious, but no less truthful. There are many "rolling stones" amongst members of the typographical calling—too many of such, in fact, whose constant "rolling" does not even polish—nevertheless, we feel moved to admonish our fellow craftsmen that it is not good to become a permanent fixture in any one place, or "to get into a rut," as we say. It is only the fearful who do not at least occasionally make a change of location. [Readers of this department will please take notice that the writer does not belong to that class, and send their "stuff" to the new address given at the head.] Stones, it will be acknowledged, always roll from the hilltop downward, whereas, when a printer leaves one position to accept a better one, he is rolling upward, hence ceases to be like a stone. It is, therefore, our advice to employed printers to learn to appreciate the good things at hand, and to enjoy the blessings of the present, yet to simultaneously cultivate a courage adequate for taking advantage of the opportunities for better positions that will anon confront them.

By virtue of the change in our address, as hinted at in the above paragraph, we have recently experienced some little difficulty in getting all the matter for this department entrusted to Uncle Sam's care; for instance, we have letters from old and valued friends in which notice is given of material having been forwarded and which, we regret very much, has not been received, especially so since the work from all of these gentlemen is invariably an excellent subject for discussion in a "school" of this kind. The first of these interesting letters is from the well-known artist, O. H. Walters, of the Albion (Neb.) *Argus*, in which he says:

"Dear Sir—Have just received the October issue of the N. P.-J. and wish to thank you very much for the helpful suggestions you had to offer on my ads. Since reading your criticisms of the Papez ad, I see very plainly that it could be improved by following out your suggestions.

"Also wish to thank you on behalf of the editor and foreman for the criticism of the *Argus* in the September issue. They were very highly pleased with it, as you will see by the enclosed clipping.

"Hoping that the 'Newspaper Criticism' department of the NATIONAL PRINTER-JOURNALIST will continue to grow and prosper, I remain, yours truly, O. H. WALTERS."

The "clipping" referred to in the foregoing letter contains a repetition of our late review of the Albion *Argus*, together with mention of Mr. Walters' high-scoring ads entered in our last ad-setting contest. The next is from L. E. Ovenden, a compositor-publisher who, too, has made his mark in these columns by specimens shown from time to time from the Pawnee (Neb.) *Chief*, in which he simply apprises us of the fact of his contribution, the loss of which we are bemoaning, while the third, under date of October 20, hails from our Socialist friend of the days of amateuria, Erwin B. Ault, yet with the Toledo (Ohio) *Socialist*. Mr. Ault writes more of a personal letter than the others, informing us of the papers sent, adding at length:

"You will note we have not cut out the big head-lines. This is due to the fact that we wish to *jar* people into looking at us. See!"

Now, wouldn't that jar you! The next and last of the quartette is a long and interesting communication from a very highly valued contributor, Rex R. Lampman, of the Neche (N. D.) *Chronotype*, and which we will hold in abeyance, awaiting the arrival of the tardy contributions.

———o———

Chas. J. Waehlte, of the Willapa Harbor *Pilot*, sends us a note as full of gratitude as it is brief, in which he says:

"My Dear Sir—I wish most heartily to thank you for the splendid writeup you gave me. It certainly surpassed by far anything that I could have expected, and I can assure you that I appreciated it very much. Later on I will send in some more work."

When we have occasion to say something pretty of some one of our fellow craftsmen's work, and we can assure all that we never offer flowers where not thoroughly deserved, it does our heart good to learn, as in this instance, that the recipient of our praises has appreciated them; and, moreover, it is to that man's credit who can truthfully say, after all is said and done, that the praise was more than he had anticipated. We are also pleased to learn that Brother Waehlte has resolved to continue to favor us with specimens of his work. It is a good resolution, brother; keep it.

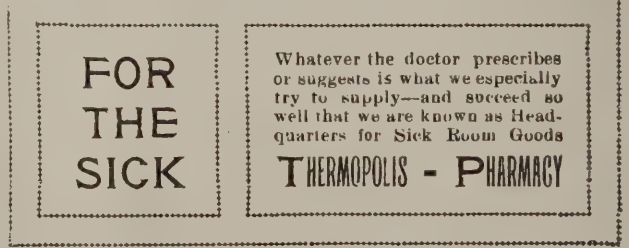
———o———

The following emanates from Thermopolis, Wyo., A. L. Duhig, one of the publishers of the *Record*, being its author:

"Sir—I am taking the liberty of sending you a batch of ads from the Thermopolis *Record*. I do not claim any merit for any of them, but want your wholesome criticism on the same. Kindly remember one point in criticizing, and that is that we have a very crude 'sage brush' outfit, and a fellow is compelled to set an ad with very little to do with. Respectfully,

"A. L. DUHIG."

When a critic takes a batch of ads for review he can, in a more or less accurate manner, determine from the specimens what sort of equipment is that of the plant from which the ads emanate; nevertheless, there are compositors who are able to fool the best of us. Not so, however, with this communicant, whose specimens plainly savor of "sage brush and cacti."



FOR
THE
SICK
Whatever the doctor prescribes or suggests is what we especially try to supply—and succeed so well that we are known as Headquarters for Sick Room Goods
THERMOPOLIS - PHARMACY

No. 1.

Still, we do not desire to give the impression that Brother Duhig's ads are entirely without merit, even though he becomingly claims none for them, because many of his specimens

will compare favorably with those produced in probably much more modernly equipped offices. But we want to add something to that already begun and which we had in mind, and that is that while the critic may from a scrutiny of the sample determine more or less accurately upon the kind of type equipment in the plant where the ad was set, yet it is more difficult for him to know just what the "white-space appurtenances" were, which are, in our opinion, the most important part of the ad-man's material. In this the bright compositor will understand we include leads, slugs, metal furniture and, rather improperly, brass rules. A printer may have ever so complete assortment of type, but without an adequate supply of the last mentioned material he is at a great disadvantage in throwing up his displayed ads. Mr. Duhig's ads, however, do not impress us as of that kind that lack "white-space equipment," but rather as created by one who has scarcely yet fully grasped the "art" of that which we term "massing," by which we mean the correct distribution of black and white. We are reproducing the best of Mr. Duhig's budget, Nos. 1 and 2. We have selected these because they are best with reference to points covered in this criticism. The second is considerably the better design all around, although another nonpareil of white at right and left inside the central panel would have been a desirable improvement. All that ails the other specimen is the typography of the last line, which, in view of our correspondent's warning relative to the "sage brush" outfit, we hardly have a right to mention adversely.

———o———

Here is the letter of a Kansas editor who thinks he got more than his just deserts in a recent criticism. We have that sort of thing quite frequently, where contributors think they have been meted out a little more than was coming to them, but not just exactly the same kind of "stuff" Editor Amrine "complains" of:

"Dear Sir—Ever since receiving the September JOURNALIST I have been intending to write you. I appreciated your criticism of our paper in the September number very much. I think yet you were too warmly commendatory, but who can scold for such a fault as that? Your judgment on some of the points for improvement is excellent and we are working to them, especially in keeping the ads to the right of the page and working more to the reader's point of view in reading, than so much to the advertiser's view as to position. The past two years I have come to appreciate the reader more, anyhow, and too many of us overlook him.

"You mention wanting the 'Advertisers' Edition,' and I send a copy of it today; also send you other recent copies. Many thanks for your interest and helpful work with the former copy submitted. I do not send you copies asking for further criticism now. I feel that you have done enough for me for some time. Be assured that all your work is much appreciated by the readers of the JOURNALIST. Cordially,

"M. F. AMRINE."

It is gratifying, indeed, to hear a practical newspaper man like this one expressing himself as learning to appreciate the "reader" more and more as he continues in the work; and right nearly does he verge upon the truth when he says that "too many of us overlook the reader" in our greedy rush after the advertiser. Those who have seen the Council Grove *Guard* will not agree with him in that we were "too warmly commendatory" in our late criticism of that paper. If it seemed so, then it is but *prima facie* evidence that we were but performing one of the critic's real privileges and, we might say, duties, which is to "admire greatly" anything which happens to come his way that is really worth admiring, as is Editor Amrine's paper. Let us again add that we make no pretty speeches in these columns for the purpose of flattering our contributors, for flattery is really a detriment and not a benefit; but judicious praise delivered at the right time and to the right place is encouraging, and encouragement is one of the greatest blessings of human life. Permit us to conclude with Brother Amrine again by remarking that the non-arrival of the long-looked-for "Advertisers' Edition" has occasioned much real regret on our part.

———o———

Messrs. Robertson & Ball, the enterprising publishers of "the paper with the big circulation," the Gallatin *Democrat*, of Gallatin, Mo., write us as follows:

"Dear Sir—Your department in the NATIONAL PRINTER-JOURNALIST is read by us each month with interest and profit. We send you a copy of the *Democrat* for this week and ask for any criticism you wish to make on same. Also inclose a blank account statement which we place in paper of the delinquent subscriber, and find it the best collector we have ever used. The Postoffice Department permits this blank to be filled out and inclosed in paper—a great saving in postage and trouble of mailing. Yours truly, ROBERTSON & BALL."

This contribution is one of the few out of the many sent this month, which seems to have arrived at its destination in safety; and we're glad it has, too, for it proves a paper well worth looking over. It is a six-column, ten-page product and, as might be surmised, contains an abundance of displayed advertising, likewise an abundance of reading matter. The first page is kept so nearly free of displayed matter that we shall let it pass as though entirely free, and the inner pages are quite liberally supplied with reading matter and quite properly made up, save that the ads circulate too freely in among the straight matter. An average degree of skill has entered into the advertisement composition and a fairly good type equipment is in evidence. Excellent local repertorial and editorial services catch our admiration, as does also the big, healthy department of "County Correspondence," comprising letters from all over the *Democrat's* field. That's the stuff that makes a newspaper popular and builds up a "big circulation"—news, news, news, and local news. Many of these "big" weeklies and tri-weeklies, which are a characteristic of this typographical day, are filled up with exchange clippings and plate, and as a consequence their publishers have to merely *claim* big circulations; whereas, if more local material and more original material entered into their makeup their exaggerated claims might become realities, just as we believe that the claim of "a big circulation" for the Gallatin *Democrat* is true. The print secured on the paper under scrutiny is very good and legible, and withal, as the reader can perceive from

the foregoing remarks, the *Democrat* is a creditable newspaper product. But we cannot help suggesting to the man who sets the heads that heads look better without periods than with them, even though such authorities on things typographic as the *Inland Printer* and the NATIONAL PRINTER-JOURNALIST do persist in the erroneous practice. It is with pleasure that we note that *The Printing Art* does not; so in this case, at least, model after the last named authority. We came near overlooking that very important "silent collector," which has been doing such good service, according to the tell of Messrs. Robertson & Ball. Here it is in full, and we can vouch for its efficacy, having employed it ourselves during our late newspaper experience in Wisconsin:

".....

"We desire to call your attention to the fact that your subscription to the Gallatin *Democrat* expired ....., 190.., and the amount now due is $...., which will pay your subscription until ....., 190.. Respectfully,

"ROBERTSON & BALL, Publishers."

———o———

It is, indeed, a pleasure to get letters from such modest and earnest members of the calling as this from P. Ponceti, Jr., of the Biloxi (Miss.) *Review:*

"Dear Sir—Inclosed you will please find copies of two ads, which I submit for your criticism. I do not consider them perfect by any means, and I know that many can do better, but I submit them that I may reap the benefit of your valuable suggestions. The large one is a six-column advertisement, and as I am job compositor, makeup man and have also to set some of the news matter of the paper, you can readily see that my time is limited and have to do the best I can as quickly as possible. The ads are from the *Daily Review*, Biloxi, Miss., a place of 7,000 population. Hoping that I have not done too bad and that your criticism will be of benefit to me as they have been to others, I am, P. PONCETI, JR."

We are very sorry to have to introduce our remarks to Brother Ponceti with the statement that his six-column ad is very defective. But we don't want that he should take our remark (which is, nevertheless, truthful and sincere) too much to heart; for while, as he himself says, there are many compositors in the land who could do better, yet there are as many more who could not do better, and yet as many more, no doubt, who call themselves "journeymen," too, who could not do so well. But it should not be the object of any artisan to make himself "just as good" as others in his calling, but better than others. On the paper with which the writer is now associated there are several just such ads as this one (No. 3) every issue, and we have found them excellent vehicles for the exploitation of original and tasteful designing (No. 21). One should, it is understood, however, adhere as closely as possible to plain and simple designs, especially on "rush" ads. To begin with, there are too many different type faces in specimen No. 3; the Gothic and Tudor text, at least, could

have been avoided, and by all means should have been, especially the latter, since Old English faces should in no instance enter into the composition of an ad, save when the whim of a customer so instructs. In as few words as possible we shall endeavor to tell this compositor how this ad should have been composed to look well and prove a good salesman, and provided we can find the time before this installment or criticism goes forward to headquarters, we will prepare a sketch for reproduction, illustrating our remarks, that only may prove the more beneficial. A six-point rule or a pica border should have inclosed the whole ad; all around inside of this a two-point rule should have been inserted, leaving at least a pica space between it and the border; this panel should have been cut off into secondary panels (just as it appears) at either end for the cuts, the division lines being also of two-point rule. The typography of the ad could then have been very much as it is in the reproduction as to arrangement, excepting that DeVinne should have figured as much as possible throughout exclusively, and a very tasteful and economical effect could have been secured by inclosing the priced items in an oblong narrow panel

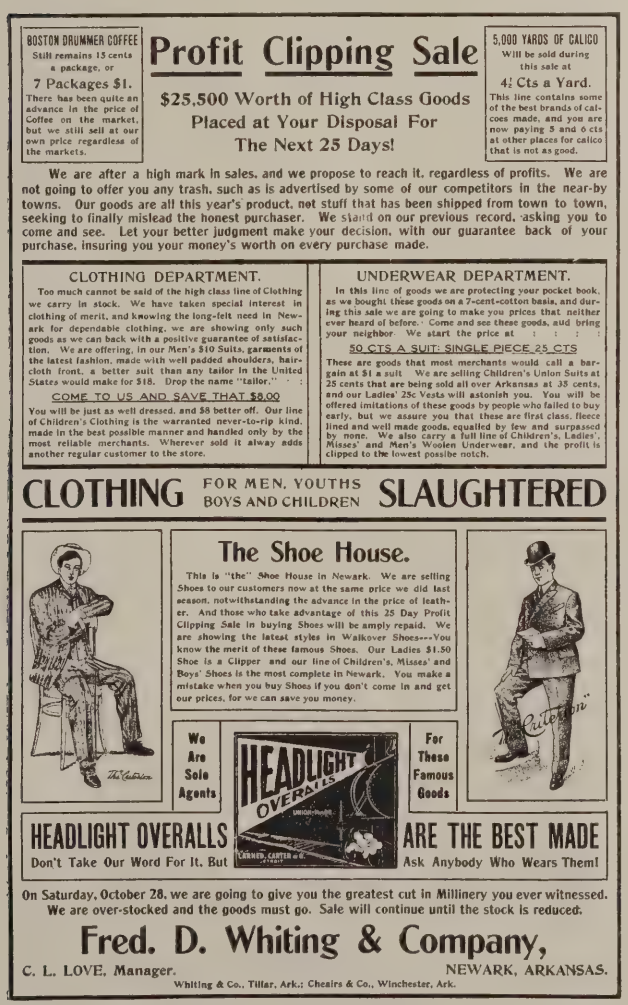
of two-point rule, divided in the middle by a short horizontal rule. (No. 3a.) The smaller ad (which is not shown) is very ordinary and possesses the same defect as cited in specimen No. 3 in that too many different faces enter into its composition; try and confine yourself to at least two and, if possible, one series of type in setting an ad, especially a small one like this. And before dismissing the subject permit us to call attention to the peculiar language of this ad (No. 3), the result of a typographical error: "A large display of children, boys, men's clothes," might attract some people to the "Red Star Store," for, despite this age of "race suicide," we still have enough faith in humanity to believe that there are yet some people who desire progeny, and we are sure that there are many who would quickly take advantage of bargains being offered in "children and boys," it being understood, of course, that boys should not be classed as children, anyhow. And most assuredly, we presume, the men, even in Biloxi, Miss., wear clothes, so the ad is not entirely in vain.

———o———

Indeed, Editor O. F. Craig, of the Newark (Ark.) *Journal*, scents the true object of a department of review as expressed in the following note to us:

"Dear Sir—I inclose herewith an ad, which I would like to have you criticize at your pleasure. I find many good, practical suggestions in your department of the N. P.-J. To a man who is editor, reporter, business manager, makeup, job and adman, as I am, on an eight-page, all-home-print paper, your criticisms are invaluable. We can all see our good points, but it helps us to occasionally have some one point out our faults. With best wishes, yours very truly, O. F. CRAIG."

Yes, indeed, "*we can all see our good points, but it helps us to occasionally have some one point out our faults.*" And what is that old proverb about the fellow who tells us of our faults being our best friend? We know we have to hurt some of our contributors' feelings at times, but we assure all that our strictures are offered in the most kindly and friendly feeling toward them. We don't speak adversely anent a specimen because we delight in it, but because it is our duty to do so, and without the fulfillment of which this department would eventually become worthless. It should be an ever consoling thought to those who patronize "Newspaper Criticisms" to know that those to whom rebuke and reprehension are given, in the end receive the greatest benefit. Brother Craig speaks of the practicability of this department, and we thank him for that bit of assurance, for of all the things in the world that we wish "Newspaper Criticisms" to be, it is practical as well as technical, and when it ceases to be that then we hope the publishers of this great magazine will dismiss us from their honorable staff and strike this matter from their pages, for that which is not practical in a thing of this kind is worthless. Mr. Craig's ad is a full five-column page ad and is a good one. (No. 4.) It shows mechanical skill, fine taste in detail treatment, well-balanced designing and a liberal type equipment. The greatest complaint we could file against this specimen is the too little amount of white space on the inside margins of the panels. This is an error common to so many otherwise good compositors—they allow insufficient white margins inside their panels. While Mr. Craig's specimen contains an over-abundance of matter, and it is rather difficult to determine how the somewhat crowded aspect might have been avoided, yet in the case of the two main central panels, for instance, instead of the two vertical rules at the center, only one should have been employed and the white space between the two distributed evenly at the four sides. There are a few big black commas and periods that might have been eliminated to good advantage, but otherwise we pronounce this a good, serviceable newspaper advertisement.



BOSTON DRUMMER COFFEE
Still remains 15 cents a package, or
7 Packages $1.
There has been quite an advance in the price of Coffee on the market, but we still sell at our own price regardless of the markets.
Profit Clipping Sale
$25,500 Worth of High Class Goods Placed at Your Disposal For The Next 25 Days!
5,000 YARDS OF CALICO
Will be sold during this sale at
4½ Cts a Yard.
This line contains some of the best brands of calicoes made, and you are now paying 5 and 6 cts at other places for calico that is not as good.
We are after a high mark in sales, and we propose to reach it, regardless of profits. We are not going to offer you any trash, such as is advertised by some of our competitors in the near-by towns. Our goods are all this year's product, not stuff that has been shipped from town to town, seeking to finally mislead the honest purchaser. We stand on our previous record, asking you to come and see. Let your better judgment make your decision, with our guarantee back of your purchase, insuring you your money's worth on every purchase made.
CLOTHING DEPARTMENT.
Too much cannot be said of the high class line of Clothing we carry in stock. We have taken special interest in clothing of merit, and knowing the long-felt need in Newark for dependable clothing, we are showing only such goods as we can back with a positive guarantee of satisfaction. We are offering, in our Men's $10 Suits, garments of the latest fashion, made with well padded shoulders, haircloth front, a better suit than any tailor in the United States would make for $18. Drop the name "tailor."
COME TO US AND SAVE THAT $8.00
You will be just as well dressed, and $8 better off. Our line of Children's Clothing is the warranted never-to-rip kind, made in the best possible manner and handled only by the most reliable merchants. Wherever sold it alway adds another regular customer to the store.
UNDERWEAR DEPARTMENT.
In this line of goods we are protecting your pocket book, as we bought these goods on a 7-cent-cotton basis, and during this sale we are going to make you prices that neither ever heard of before. Come and see these goods, and bring your neighbor. We start the price at
50 CTS A SUIT: SINGLE PIECE 25 CTS
These are goods that most merchants would call a bargain at $1 a suit. We are selling Children's Union Suits at 25 cents that are being sold all over Arkansas at 35 cents, and our Ladies' 25c Vests will astonish you. You will be offered imitations of these goods by people who failed to buy early, but we assure you that these are first class, fleece lined and well made goods, equalled by few and surpassed by none. We also carry a full line of Children's, Ladies', Misses' and Men's Woolen Underwear, and the profit is clipped to the lowest possible notch.
CLOTHING FOR MEN, YOUTHS BOYS AND CHILDREN SLAUGHTERED
The Shoe House.
This is "the" Shoe House in Newark. We are selling Shoes to our customers now at the same price we did last season, notwithstanding the advance in the price of leather. And those who take advantage of this 25 Day Profit Clipping Sale in buying Shoes will be amply repaid. We are showing the latest styles in Walkover Shoes---You know the merit of these famous Shoes. Our Ladies $1.50 Shoe is a Clipper and our line of Children's, Misses' and Boys' Shoes is the most complete in Newark. You make a mistake when you buy Shoes if you don't come in and get our prices, for we can save you money.
We Are Sole Agents
HEADLIGHT OVERALLS
For These Famous Goods
HEADLIGHT OVERALLS ARE THE BEST MADE
Don't Take Our Word For It. But Ask Anybody Who Wears Them!
On Saturday, October 28, we are going to give you the greatest cut in Millinery you ever witnessed. We are over-stocked and the goods must go. Sale will continue until the stock is reduced.

C. L. LOVE, Manager. NEWARK, ARKANSAS.
Whiting & Co., Tillar, Ark.; Chesire & Co., Winchester, Ark.

No. 4.

On a letterhead, on which appears simply this in red, "The Ad-Smith, Willow City, North Dakota," the following letter is typewritten:

"Dear Sir—Mr. T. C. Michael, publisher of the North Dakota *Eagle*, at this place, for whom I am acting as foreman and ad-smith, has asked me to send to you a few proofs of recent ads that it has been my pleasure to write and compose for the merchants of this little city. We are doing something out of the ordinary in Willow City; and it is working fine, too. The undersigned has had quite a little experience in writing ads, and when I took the position I now hold I had a few ideas that I wanted to try. One of them was to offer my assistance to any of the merchants wishing it in the writing of their advertising copy, and it has taken good from the start. Another thing that I have inaugurated is the printing of slips for the merchants to put into each package of merchandise that they wrap up—a sheet of these slips is inclosed along with the proofs of the ads. Now, don't be too hard on a poor fellow, but we would like to know what you think of the work and the ideas. Yours respectfully, THE AD-SMITH."

It is the "man with ideas" who is in demand these days, and we are always more than pleased to hear from that class among the printers, because their ideas exploited through this department are what make it beneficial to those who read it. Especially are we pleased when the ideas are good ones like these mentioned in the foregoing letter. First, the idea of offering to assist the merchants in the preparation of their advertisement copy is excellent and should be done, wherever practical, by every country newspaper man, and the slips for the use of the merchants, as explained by the "Ad-Smith" above, is new to us, but, nevertheless, strikes us as being an excellent scheme; also, inasmuch as it has a double purpose, helping to advertise

the merchant and simultaneously advertising the *'Eagle.'* The slips read as follows:

"Read our advertisements printed in the *Eagle,* for they will save you $$.

"Read our advertisements printed in the *Eagle,* for it will pay you big.

"Read our advertisements printed in the *Eagle*—Bargains every day of the week.

"Read our advertisements printed in the *Eagle* for guaranteed bargains.

"Read our advertisements printed in the *Eagle* and get your goods here.

"Read our advertisements printed in the *Eagle*—They tell good news.

"Read our advertisements printed in the *Eagle* and you will save money.

"Read our advertisements printed in the *Eagle* for good goods cheap."

The "ad-smith's" ads from the ad-writer's point of view, at least, are excellent, too, being replete with cuts and prices, "the pictures to attract attention to the ad itself, and the

Warm Clothes for Winter
NOW is the time when you begin to think of that winter wearing apparel. and we are prepared to sell you anything in that line at the best prices you can get anywhere. Especially is this true in Men's and Boys' Clothing, and Ladies' Cloaks, Coats and Furs. Get our prices before you buy, and you will surely save money by purchasing here.

prices to attract people to the store." And typographically they are above adverse criticism, too, as we go to prove by reproducing a few of the best. (Nos. 5, 6 and 7.) The display is correct and always possessing just the right strength, while the designs are plain and simple, therefore being admirably adapted to newspaper work. The border employed on Nos. 5 and 6 is not a good one for an ad of this size, being out of harmony with the type and blocky type design; but this is, we suppose, more a fault with the equipment than with the compositor. In some of the larger ads (not shown) there is an inadequate amount of white margins, and ads of this size (half-page, etc.) are more imposing framed with heavier borders than one-point rule makes. The types employed are good ad letters, and before we forget it allow us to commend another one of the "Ad-Smith's" ideas, we presume, which is a sort of "imprint" in the slug at the foot of the ad which says, "Tell the boys you saw their advertisement in the *Eagle,*" or something to that effect, which is equivalent to our great

Extraordinary Announcement
We take this means of announcing to our friends and patrons that our
Fall and Winter Goods Are Arriving Every Day
and are being placed in position for your careful inspection. The styles are more exclusive than ever, the goods are better and we are able to quote more attractive prices than during previous seasons. We ask you to call and see the goods.

magazines' "Mention the, etc.," and equally as important, it would seem, although we had never thought seriously of it before. Come again, Mr. Ad-Smith.

———o———

Here is something good from a Lakefield, Minn., man, the first we have had from that rich state for a number of long days:

"Dear Sir—For several years I have read with interest your criticisms on newspapers, and I believe I have profited thereby. With this mail I send you copies of the last two issues of the *Standard,* in which I would like you to point out the defects,

Items of Interest to the Ladies
WE present two articles this week that are of especial interest to the ladies. They add much to the general appearance of the person; are distinctively up to fashion's latest decree and are constructed of the best of materials.
The Royal Worcester Corsets
have a world-wide reputation, and are the easiest selling corsets made. They are made in many different styles—two of which are shown in this ad.
The Sorosis Skirts
are also very well known garments among well gowned women. The manufacturers are constantly on the lookout for new, good ideas and their product this year is much better than any previous season. With each Sorosis Skirt is a coupon entitling the buyer of a skirt to a regular 25c pattern handled by the firm. Note prices quoted:
Ladies of average figure would be highly pleased with our Royal Worcester Corset No. 453 while we sell at $1.00
The Dowager, Princess hips, are still very much in fav r with fleshy ladies We sell the No. 525 at only $2.00
The Sorosis Skirt shown in cut is one of the best designs, with adjustable yoke, made from good sateen, strap seams, made up in the best possible manner, our price is only $3.00
Others as low as $1.00
Knit Top Skirts—Ladies in search of fall and winter warm Skirts should not fail to see ourS & K brand They are right in every way, insuring wearer warmth, fit and comfort
Mercerized Satin flounce, $3.00; Morine flounce, $3.50; Silk Taffeta flounce, $6.00

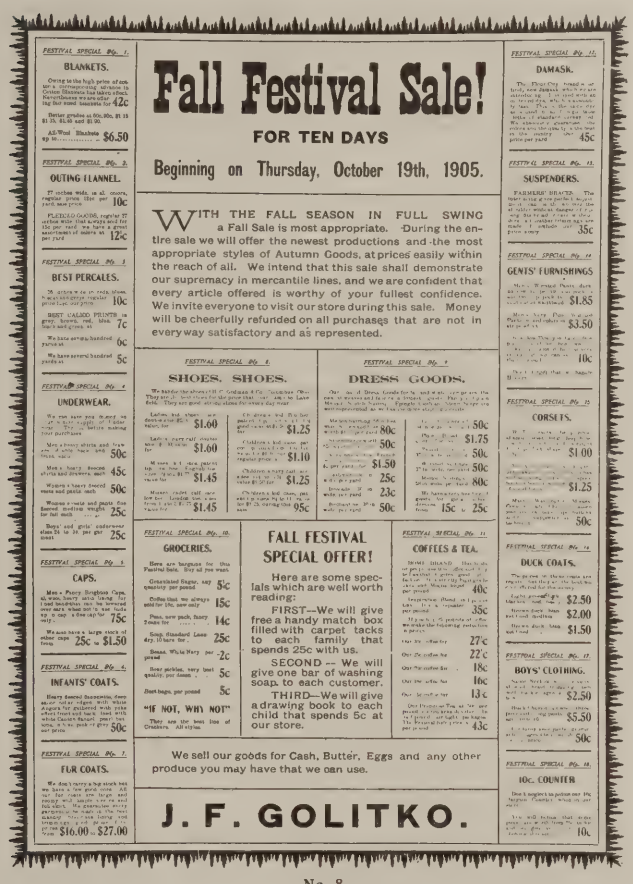
which no doubt are many, as time is scarce in this office, myself and a "devil" with nine months' experience doing all of the work on the *Standard*, besides getting out the usual amount of job work in a country office. Usually we try to keep ads off the first page, but for the past few weeks this has hardly been possible on account of extra space used by advertisers. I send you herewith a proof of an ad from the issue of October 19, which I would like you to criticize. Yours truly,

"THOMAS CRAWFORD."

Unfortunately, because of our recent migration "over the range," the two copies of the Lakefield *Standard* have not yet reached us, but the copy of the ad, which was sent "herewith," being unable to avoid it, has showed up safe and sound along with the above letter. It is, indeed, gratifying to get such an ad as this from a person who makes acknowledgment of the fact that he has been a student of this department for a number of years. Brother Crawford's ad (No. 8) is a large one



Fall Festival Sale!

FOR TEN DAYS

Beginning on Thursday, October 19th, 1905.

WITH THE FALL SEASON IN FULL SWING a Fall Sale is most appropriate. During the entire sale we will offer the newest productions and the most appropriate styles of Autumn Goods, at prices easily within the reach of all. We intend that this sale shall demonstrate our supremacy in mercantile lines, and we are confident that every article offered is worthy of your fullest confidence. We invite everyone to visit our store during this sale. Money will be cheerfully refunded on all purchases that are not in every way satisfactory and as represented.

and not the easiest sort of an ad to treat, since it contains such a volume of matter, yet its creator has handled it in an admirable and highly creditable manner, producing a specimen practically without a fault. This ad is exceptionally well displayed, designed with good balance, with a touch of art in every panel and a perfect "whiting out" which lends life and strength to every mass and line. Skillful artistic treatment is strongly in evidence, and the carefulness with which every detail has been attended to meets with our heartiest approval. The only thing in this ad of which we do not approve is the periods in the heads, which would have been better left in "their rspective boxes." Let these few remarks suffice until we get hold of those copies of the *Standard* next month.

———o———

"The Ben Freedman First Anniversary Edition" of the Munising (Mich.) *Republican* is something rather out of the ordinary and is introduced to us by the following brief missive from Editor F. L. Baldwin, publisher of the above named paper and secretary-treasurer of the Lake Superior Press Association:

"Dear Sir—I inclose copy of a special advertising edition which we printed for one of our local merchants. Would like your criticism on the 'general get up' of the paper. Kindly overlook typographical errors. It was a rush job and we depended upon the merchant to do the proofreading. Two persons did all the work on the edition in about two and one-half days. The printing was done on a Babcock Reliance press. Yours truly, F. L. BALDWIN."

The special advertising edition consists of a locally printed folio, six-columns to the page, devoted almost exclusively to the Ben Freedman store, with just enough reading matter to catch the ordinary reader's attention. The first page has printed across the head just below the title and date line, "The Ben Freedman First Anniversary Edition" in red. At each corner of the page, then, is a neat ad for the Freedman establishment, the remainder of the space being given over to local news, the leading article in which is a well-worded writeup of Mr. Freedman's business career in Munising. The second page is made up half of plate and the other half carrying a displayed announcement of Ben Freedman's free prize offer of a graphophone, while the following pages each contain excellent commercial ads for the store to which the edition is devoted, all handsomely and appropriately illustrated and replete with bargain prices well displayed. All of the typographical work on this edition is of a high standard and the impression is first class. The ads are well written, exceptionally well designed and neatly composed. Withal, Mr. Freedman is to be congratulated upon his enterprising idea and the *Republican* upon its ability in so successfully carrying this idea out. The ad on the last page, too, is in two colors, red and black, and the men who turned this special edition out merit special praise for their skill and care in the construction of the many displayed portions. These special advertising editions are becoming quite a source of revenue for the country publishers and certainly a peerless advertising opportunity for enterprising merchants.

———o———

H. Mahraun, that competent ad man on the Muscatine (Iowa) *Journal*, sends us another of his ads, together with the following explanation:

"Dear Sir—By separate wrapper I send today's issue of the *Journal* and wish to call your attention to the seven-column ad of the Boston Store. Although I do not claim the layout to be original, I think the ad looks very fair. Old age and scarcity of material prevented me from doing any better. Very truly yours, H. MAHRAUN."

Mr. Mahraun's ad is a pretty fair specimen of metropolitan work, neatly designed, well displayed and details carefully treated. All of the head lines within the various panels should have been centered, and the whole thing is just a trifle crowded, although just how this might have been overcome is difficult to say. And, while anything like this is not usually the fault of the compositor, yet we feel moved to state that such a border as that which encircles this design is too spotted, too indefinite, too indistinct to give a clear finished aspect to so large and compact a typographical specimen as this. For ad work we prefer neat, square, clear-cut borders, only medium dark.

———o———

Just a few lines of "Errata" now, and then this tardy installment goes whizzing over the Rocky Range to the main office at Chicago, no doubt too late for the December edition. The blooming engraver got things somewhat mixed up in our October department, showing the same specimen twice as exhibits Nos. 8 and 9, proving conclusively that he is quite blind to "details" in typography, so couldn't see the difference in the two originals. No harm done, though, as we daresay, H. Ray Haughton, in whose review the blunder occurred, probably remembered his own design.

PRESIDENT OF WEST VIRGINIA ASSOCIATION.

Mr. Hess has the distinction of being the youngest president, so far as reported, at least, of a State Press Association. He was elected at the recent convention of his association. He was born in Mannington, West Va., June 6, 1875, and graduated at the graded public schools of that city at the age of fourteen years, when he entered the office of the paper of which the *Enterprise*, that he now owns and edits, is the successor. After learning his trade as printer, he went to Pittsburg, Pa., and worked two years, saving sufficient money with what he earned vacations and after school and study hours, to attend the West Virginia Conference Seminary—now the Wesleyan University of West Virginia—and the Dickerson College at Carlisle, Pa. In 1898, he returned to Mannington and started

J. BRUCE HESS,
President of the West Virginia Press Association.

a job printery and one year later bought *The Enterprise*. He joined the State Editorial Association in 1900 and in 1901 was elected its secretary. In his brief career, he has seen his city grow from six or seven hundred to a population of over five thousand and has kept his business and paper fully up with this remarkable growth of his town. His life has been one of hard work and saving. He has hoed his own row and helped to support his widowed mother since he was fourteen years of age. His career shows what can be accomplished by untiring industry, perseverance and thoughtful economy, when one is blessed with good health, and husbands his energies by change from work to study and from study to work. He has rightly won his spurs and deserves the honor of being the youngest Editorial Association President in the United States.

NOTES AND POINTS.

"Promotion" has become a profession in this country, often useful in the putting on foot and financeering great enterprises, if not always honorable. The fact is that the accomplishments have been so great and the money craze has become so general, that what the promoter will not undertake is beyond the dream or imagination of mon. The strange thing is, too, that a scheme can scarcely be so visionary, if it is only sufficiently stupendous with promises of great gains, but that, in the hands of skillful manipulators, it can be capitalized for millions. The plan frequently is to parallel the new undertaking with some known success and then point the possibilities and appeal to cupidity. It matters not that for every success bringing millions of gains, there have been ten schemes or inventions causing the losses of ten times as many millions—if the new enterprise is confidently and boldly pushed, man's boundless greed and credulity opens the way to success.

"The Promoters" is the title of a new book from the press of Rand, McNally & Company, publishers, portraying in a graphic manner the delusions and the methods of two promoters, from the conception of their visionary scheme and the manipulation of the members of a Nebraska legislature in attempts to secure a charter, to the obtaining options and financing the scheme, which was no less than that of changing the position of the earth by bombarding the heavens and bringing the North pole to the center of Russia.

The first basis for flouting the stock was to be contracts from the farmers of Nebraska for one half of the increase in all products coming from the increase of the moisture in the state. Many compliments are paid—backed by exact statistics—to the productiveness of Nebraska and to the character of its people. A hit is made at New Jersey as a place for trusts, when one of the promoters thanks heaven that "there is one state in the Union yet where almost anything can be incorporated, on almost any basis that anybody pleases." A blow is given to the ever willing modern underwriter of stocks and bonds, when he says, "The underwriter will not give a rush as to whether we can add a drop of moisture or not, all he cares for is to make sure that the block of stuff he stands behind will sell and that he can get his rake-off for services as sponsor!"

Incidentally, the methods of the promoters of the schemes and of "mergers" are portrayed and in the final failure of the undertaking, lessons are enforced as to the growing sentiment for conducting business according to the principles of the golden rule. The wiley, dishonest and heartless methods of promoters and brokers are illustrated and while their rough, profane language is much in evidence to the running of the text, the book is vastly entertaining and instructive and ought to be helpful in its exposure of the unconscionable scheming of promoters and brokers and also in teaching men to understand that all real gain in this world must have a reasonable basis in honest industry and useful production.

* * *

The Illustrated *Record* of Cannon City, Colorado, of November 27th, reaches us just as the last form of the NATIONAL PRINTER-JOURNALIST for December is being put in type. No other part of the world affords better opportunity for the presenting the views of scenery, both grand and picturesque, than Colorado, and the people have builded well as to homes, factories, schools, churches, business blocks and all public edifices. This issue of the *Record* shows wonderful growth since the editor of this paper visited Canon City in 1887 and is an honor to the publisher, to the beautiful city and to the wonderful scenic Centennial State.

* * *

L. S. Scott, who was connected with the NATIONAL PRINTER-JOURNALIST in its early days and afterwards made a signal success in the newspaper and printing business at Crowley,

THE BIG SISTER.

Mezzograph Plate—A new process now being operated by Barnes-Crosby Co. Specially adapted to landscape, portrait and art subjects. Printing qualities same as halftones.

Louisiana, and afterwards moved to San Bernardino, Calif., has sold his paper at the last named place, *The Times Index,* in order to be able to devote his full energies to his Crowley, La., enterprises, among which is *The Signal.* W. S. Conger, formerly advertising manager of *The Herald,* Grand Rapids, Mich., bought, through the Charles M. Palmer agency, a controlling interest in the San Bernardino *Times-Index* and will take charge. The sale was made November 6.

* * *

Barnhart Brothers & Spindler have organized and established a new type foundry at Dallas, Texas. The new company is incorporated as The Barnhart Type Foundry Co., of which M. W. Barnhart is president and R. C. Dyer is manager. The new foundry is located at 258 Commerce street, Dallas, in the building formerly occupied by the Scarff & Occomer Company. Its establishment tells of the great development of the mighty Empire State of the Southwest. It is equipped to meet all the present and growing demands and besides handling all the Barnhart Bros. & Spindler types and manufacture, will carry all machinery and supplies needed by printers, cylinder presses, job presses, electric welded chases, wood goods, etc.

* * *

"Little Rhymes for Little Readers" and "Songs of the Open" are two very attractive books for children published by Rand, McNally & Co., Chicago and New York. We show a page from each in this issue of the NATIONAL PRINTER-JOURNALIST. These pages are not only appropriate for this Christmas month but give a pretty good idea of the books' illustrations, rhymes and songs for the little folk. It is wonderful how richly and artistically the numerous books for children are gotton up. There is a great improvement over those of a few years ago and they must have a highly educative influence in refining and improving the artistic tastes of the boys and girls who are so fortunate as to receive them.

* * *

The new mezograph screen halftone, a speciman of which is shown for the first time in this country on this page of this issue, in the pleasing illustration, "The Big Sister," will be found especially adapted to art, portrait and landscape subjects. These plates are made by the Barnes-Crosby Co., who hold the copyright. The plates can be made of varying degrees of fineness, fitting them for use on different grades of paper.

* * *

The Old Roman Condensed, shown in this month's number, by Barnhart Brothers & Spindler, will be found to be a most useful series of type. It is strong, clear, substantial and durable and has been pronounced as beautiful, in body, display or capitals, as any type ever made.

* * *

Curtis Guild, Jr., Governor-elect of Massachusetts, has been engaged in newspaper work for a quarter of a century and is now proprietor of the Boston *Commercial Bulletin,* which was long published by his father. He was born in Boston in 1860, and was graduated from Harvard with the class of 1881.

BUSINESS NOTES

This Department is conducted for the benefit of advertisers, and expresses their claims and views

The F. Wesel Manufacturing Company has opened a new salesroom in New York City. The address is No. 10 Spruce street, which is just off Park Row, near the bridge entrance. This room was formerly occupied by the offices of Geo. P. Rowell & Co., publishers of *Printers' Ink*. It is directly opposite the site of the Wesel Company's old location at 11 Spruce street, which they occupied during 1883-96, and which is now the home of the New York *Daily Press*.

This new salesroom is now the headquarters of the company's New York City salesmen. A full stock of Wesel supplies of the allied trades will be carried at all times, and the complete facilities at the Wesel factory on Cranberry street, Brooklyn, just across the bridge, will be maintained as heretofore.

Mr. J. X. Brands is local manager for the New York City branch. He is a man who thoroughly knows the conditions existing in the printing and plate making trades, as he devoted ten of the early years of his life to the daily newspaper business. He entered the supply business in 1882 by identifying himself with the Chicago Newspaper Union, remaining with that concern until the organization of the American Type

J. X. BRANDS.
Sales Manager for the Manhattan Store of the F. Wesel Mfg. Co.

Founders Co., in 1892, and in 1895 he took charge of their Portland, Ore., branch. In 1904 he came to the F. Wesel Manufacturing Company, and it goes without saying that the interests of their customers in New York City and vicinity are in good hands.

* * *

The Champion Coated Paper Company, of Hamilton, Ohio, has commenced the publication of a house organ, under the attractive name of *Pure White*. It promises to be right up to date on all the good new things in the illustrating, engraving and printing lines. It will tell how to obtain *good paper* and *why good paper* is essential. A department devoted to helpful advertising suggestions will be a special feature. Bright sayings, clever illustrations, short stories and interesting verse will appear in each issue.

The size of the journal will be 11x14 inches. It will be printed in colors and profusely illustrated with the best engravings obtainable. As a specimen of unique and attractive typography it will rank with any publication in the country.

* * *

"New Ideas in Modern Printing Office Furniture" is the title of a handsome twelve-page illustrative circular by the Hamilton Manufacturing Company, Two Rivers, Wis., and Rahway, N. J.

It is filled with valuable ideas and the table of "Extra Discount to Printers," occupying the lower half of the first page, will prove of especial interest.

The Hamilton Manufacturing Company has always kept right up to date with their manufactures. There is never a new want, arising from new machinery or new conditions, that is not anticipated and supplied. New ideas and new time-saving, labor-saving, space-saving or money-saving devices always find a welcome and consideration in the Hamilton factory. It is wonderful how wisely and thoroughly the useful fields of Modern Printing Office Furniture is covered. The ideas are worked out and perfected in the factory, frequently from suggestions as to wants or conveniences coming up from practical, successful, up-to-date printers with whom this company is in touch all over the world of printerdom. The Hamilton goods have stood the test as to usefulness, quality and durability, and they are carried in stock by all first-class dealers. A study of this comprehensive circular will give the printer a pretty full view of the manufactures, their convenience and value, as well as the substantial methods used in making, and of the great factory at Two Rivers.

* * *

We are pleased to call attention to a new publication by Barnhart Brothers & Spindelar that will be of great interest and value to the printer. This Type Foundry has a way, in their publications, not only of showing their many popular type designs, or faces, but of displaying the way to use these most effectively. This last publication, a paper-covered color book of eighty large pages, showing some forty complete series of their latest type designs, in a manner intended to give the buyer an opportunity to judge of the beauty and fitness of their product. The display exhibits the faces as in actual use, with rule, border, tint and color. The composition covers many job and advertisement forms, each in an appropriate face. There is none that does not offer something adaptable to every-day work, or that cannot be readily duplicated by the average office if demanded by a customer. To the job printer and the ad man the work is suggestive and valuable.

Of course it is expected that the book will be used and preserved as a specimen book of the desirable and up-to-date type faces this firm of typefounders presents. Every purpose for which printing is used will find therein an appropriate letter, artistic in design, and of the utmost durability as to material and exactness as to manufacture. A request from any purchasing printer will bring a copy by mail.

* * *

"The Graphic Arts and Crafts Year Book" is the title of a new work in course of preparation by the Republican Publishing Company, of Hamilton, Ohio. The standard set by this company in all work is a sure guarantee of a work of value, both in text, illustration and perfect execution. It will contain two hundred 8x10-inch pages, bound in cloth covers.

This work is to be issued annually, and will contain examples of the finest color and black and white work of the allied

industries, with specially written articles by experts. It will be a work of art, a book of reference, and a true reflex of the high standard of present day achievements. Many experiments and practical ideas in color work and printing upon various grades of stocks, with the same and different screens of half-tone cuts, will be shown, so that instant comparison can be made of four different treatments of cuts, or different grades of stocks with the same cuts, and all viewed at the same time.

The *Reporter*, of Oregon, Ill., has been sold, through the Chicago office of C. M. Palmer, of New York, to F. R. Robinson, formerly of Chicago, and A. B. Connitt, a Milwaukee job printer. It is understood that Frank J. Schattzle, the late owner, will enter business in the West.

* * *

An advertisement should be like a chicken, which can be stripped of its plumage then present desirable meat.

Monotype Keyboard Room of J. Stearns Cushing, the Norwood Press, Norwood, Mass.

Monotype Casting-Machine Room of J. Stearns Cushing, the Norwood Press, Norwood, Mass.

Color schemes and combinations of colors of type and illustrative features will be shown, so that selections may be made to insure harmony of every detail.

The Graphic Arts and Crafts will be a text-book of typographic standards.

It is claimed that a new photo-mechanical process for color printing has been invented and will be fully described and illustrated for the first time in the "Graphic Arts and Crafts Year Book." It is given as the opinion of an expert that this new method will revolutionize color printing. Patents are pending in the United States and all foreign countries.

CLEVELAND, O., Nov. 9, 1905.

The NATIONAL PRINTER-JOURNALIST, Chicago, Ill.

Gentlemen—we sold 270 Gordon presses in September, 303 in October, and already have our November output sold, and we hope the NATIONAL PRINTER-JOURNALIST had a part in making such unprecedented sales. We thank you for the service you have rendered and the uniformly good advertising you have prepared for us.

With every kind wish for your continued success, we remain, yours truly, THE CHANDLER & PRICE COMPANY,

Per R. J. FRACKELTON, Treasurer.

Wants and For Sale.

Advertisements will be inserted in this column at the rate of 25 cents a line, ten words to the line. Copy must reach this office no later than the 20th of the month preceding date of publication. Cash must accompany order.

FOR SALE—PRINTING MATERIAL

ELECTRO COPPER-FACED TYPE. Empire Type Foundry, Delevan, N. Y.

FOR SALE—Two Revolution, back delivery press made by C. Potter, Jr., & Co.; four form rollers; measurements of bed between bearers, 54x40; will take form 38x52; rack and screw vibrator; table distribution; three tracks; overhead steam fixtures; eight roller stocks and four angle rollers; in good condition; a bargain, if taken by October 1st. Address "R. P.," care of NATIONAL PRINTER-JOURNALIST.

MISCELLANEOUS

A MONEY-MAKING SYSTEM FOR THE EMPLOYING PRINTER. A handy little volume describing a simple, economical, yet practical and comprehensive system for ascertaining the cost of printing. This system has been tried and is adaptable to large and small printing and manufacturing plants alike. Illustrates full blanks for all departments along with bookkeeping system for business office; 125 pages, 4½x7 inches, cloth, $1.00. NATIONAL PRINTER-JOURNALIST, Station X, Chicago, Ill.

THE VAN BIBBER ROLLER CO., Sixth and Vine Sts., Cincinnati, will give you *the best rollers* that can be made for any season or press. Our facilities are the best, and we use the latest Gatling Gun and compressed air apparatus. It pays you to have good rollers, and they count more in presswork than anything else. In writing or shipping, "Cincinnati" is sufficient. Everybody knows us.

ANYBODY CAN MAKE CUTS with my simple transferring and etching process. Nice cuts, from prints, drawings or photos, are easily and quickly made by the unskilled on common sheet zinc. Price of process, $1. All material costs at any drug store about 75 cents. Circulars and specimens for stamp. THOS. DAY, Box P, Windfall, Ind. My Simplex Mailer only $2.50, send for circular.

A COLD SIMPLEX STEREOTYPING OUTFIT, $17.00 and up, produces the finest book and job plates, and your type is not in danger of being ruined by heat. Simpler, better, quicker, safer, easier on the type and costs no more than papier-mache. Also two engraving methods costing only $5.00, with materials, by which engraved plates are cast in stereo metal from drawings, made on cardboard. "Ready-to-use" cold matrix sheets, $1.00. Come and see me if you can; if not, send postage for literature and samples. HENRY KAHRS, 240 East Thirty-third Street, New York.

WANTED—Thoroughly reliable, energetic and experienced salesman, familiar with high grade engraving and printing business, to solicit catalog work. One who can command a good salary and secure results. GRAND RAPIDS ENGRAVING CO., Grand Rapids, Mich.

DO YOU WISH TO SELL OR BUY a publishing or printing business? Frank H. Knox, Albany, N. Y.

FOR SALE—The only paper published in a town of 500, in Washington state, fine climate. Land publications bring big money. In close access to two large reservations to be opened soon. $600 will buy. Address G. W. Bison, Springdale, Wash.

OHIO VALLEY DAILY

without competition in small city of great promise at $7000.00. Business has grown steadily for six years and now approximates $8000.00 yearly. No job department. Excellent opening for anyone wishing small, solid, quiet daily newspaper property. Proposition #106.

Three Color Process Inks

NEXT to the plates, proper ink is the most important factor of three-color printing. Not only must the shade of the ink be right, but the working qualities must be such as to insure perfect results. ¶ Our Three Color Process Inks have both; in fact, with the years of experience, and the large amount of money which we have spent in experimenting, we have attained an enviable degree of perfection. ¶ Our Process Inks come nearer the "ideal" colors, and come nearer to producing the "ideal" effects, than any other inks on the market. ¶ Authorities on the Three-Color Process use and recommend our Process Inks. The reason is obvious. ¶ We have prepared a little leaflet showing the various shades of Three Color Process Inks which we manufacture, and we will gladly send one upon request.
